LaFollette comments on genetics

Douglas LaFollette visited Notre Dame last week to talk to students about genetic engineering concepts. It is a very worrisome thing. It's very easy to argue the benefits of some genetic engineering concepts. It can help women have babies who can't and that's a very positive thing. Sounds good. You can help eliminate certain diseases possibly, by getting into your chromosomes and your eggs and sperm and fixing them ahead of time, before you conceive a child. That sounds good. But what we're worried about is why I've taken a position against the expansion of genetic engineering into society so that someone has to make each of these decisions. Someone has to play God.

Q: What advice do you see in the near future for genetic engineering?
A: The thing about it is that wariness for someone like myself, who sees the potential negative implications for society, is that it's going very rapidly. Research and so-called breakthroughs are happening exponentially. When this book, 'Should Play God?', was written just three years ago the authors said that there would be a genetic baby sometime soon, everybody (continued on page 6).

Saturday's game was cause for celebration, as this fan amply demonstrated. See pages 8, 10 and 12 for details [photo by John Macer]

Baltimore (AP)—Republican Ronald Reagan and independent John B. Anderson staged two-thirds of a "Great Debate" last night, as odds on tax cuts, abortion and defense spending, put united in their criticism of President Carter—"the man who isn't here tonight."
Anderson said he's for a tax cut, Anderson said he's against it, and both said Carter should have joined them to debate the subject.
Reagan said anyone who thought for the 8-1/2 months to install the above Democrat presidential candidate was to remember that "it would have been much more unfair" for the independent Anderson to have been denied his debate seat.
It was Anderson's inclusion that led Carter to shun the debate.
That left the debate stage to the Republican presidential nominee and the independent Anderson, a Republican congressman himself.
Anderson said the debate showed that Carter is wrong in insisting the American people have only two choices for the White House, the Republican or the Democrat. He said he offered a real alternative, "the kind of coalition government that we need in 1980."
He told voters that "if you really think that I am a spoiler,"

Conflict intensifies

Iranian, Iraqi forces battle it out

By The Associated Press

Iranian and Iraqi forces battled with gunboats, rockets and artillery yesterday along a disputed waterway. At the northern tip of the Persian Gulf and each side claimed it inflicted heavy damage in the spreading border conflict.

Tehran radio claimed Iranian fire sank an Iraqi vessel and drove four others aground in heavy fighting that raged at the 60-mile-long Shatt al Arab river. Iran said it lost a police boat and a number of crewmen were injured during a sea battle and that artillery, tank, missiles and other "heavy machinery" took part in the fighting.

Baghdad radio claimed that Iraqi forces destroyed five Iranian gunboats and the Iranian naval base at Khorowshahr, 20 miles south of the giant Abadan oil refinery. Amid the conflicting reports on the border conflict, Tehran radio said Prime Minister Mohammad Ali Rajai would present five more members of his government to the parliament for his intention today "God willing."
The Tuesday session in the legislature was also expected to resume discussion of the fate of 32 American hostages now in their 32nd day of captivity.

Rajai's reported intention to present five more members of his government to the parliament was the latest step in a struggle with President Abdelhassan Bani Sadr over the makeup of the new government. Bani Sadr had rejected seven of the prime minister's first 21 nominees, calling them representatives of a "despotic minority." A reference to the hardline Islamic Republican Party that dominated Parliament.

The radio said Rajai would not name the new nominees because the matter had not been finalized.

In the U.S., Secretary of Defense Harold Brown said the conflict between Iran and Iraq has gone beyond skirmishes, but it "is not a major war." Speaking on CBS/TV's "Face the Nation, Brown said, "I think it is very dangerous to any countries in the region and its potentially dangerous to the world."

The Baghdad radio version of fighting in Shatt al Arab said Iraqi forces destroyed five Iranian gunboats and "destroyed the installations of the base" at Khorr.

But what we're worried about is why I've taken a position against the expansion of genetic engineering into society so that someone has to make each of these decisions. Someone has to play God.

Q: What advice do you see in the near future for genetic engineering?
A: The thing about it is that wariness for someone like myself, who sees the potential negative implications for society, is that it's going very rapidly. Research and so-called breakthroughs are happening exponentially. When this book, 'Should Play God?', was written just three years ago the authors said that there would be a genetic baby sometime soon, everybody (continued on page 6).

Early Saturday morning blaze blackens Grotto

The Grotto, one of the most frequented sights on campus, fell victim to flames that blackened its ballow and singed its surrounding early Saturday morning. "It didn't click that the grotto was on fire," said Mary Rice a resident of Lyons Hall. Upon return from her early morning run she commented, "My first reaction was that someone was setting fires on campus again. I was surprised by the fire because I didn't think that there was anything at the Grotto that could burn."
"The damage done to the Grotto was not extensive," said Paul Bogna of the Notre Dame Fire Department. What actually burned were the extra boxes of candles that had been placed at the Grotto. Due to the expected increase in demand for candles for the Michigan game weekend, extra boxes of candles were placed very close to one another under the racks. "Hot wax dripping down on the extra supply could have been the cause of the fire," said Bogna.
Patrolman Richardson of Notre Dame Security said that perhaps a lit candle that had been placed under one of the racks could have caused the blaze. "The heat from a candle could have melted the plastic casing of one of the candles, causing hot wax to drip on the boxes below. Yet before anything can be determined, we must first talk with the person in charge of setting out the candles," said Richardson.
"It's hard to determine what caused the fire." The Notre Dame Security Report of the fire stated that it began at 6:29 and was distinguished by 6:35 Saturday morning. One engine and a truck belonging to Matthew Feeny, Schaefer O'Neill and Paul Bogna assisted in extinguishing the flames.

Reagan, Anderson debate, blast absent Carter

BALTIMORE (AP) — Republican Ronald Reagan and independent John B. Anderson staged two-thirds of a "Great Debate" last night, as odds on tax cuts, abortion and defense spending, put united in their criticism of President Carter — "the man who isn't here tonight."
Anderson said he's for a tax cut, Anderson said he's against it, and both said Carter should have joined them to debate the subject.
Reagan said anyone who thought for the 8-1/2 months to install the above Democrat presidential candidate was to remember that "it would have been much more unfair" for the independent Anderson to have been denied his debate seat.
It was Anderson's inclusion that led Carter to shun the debate.
That left the debate stage to the Republican presidential nominee and the independent Anderson, a Republican congressman himself.
Anderson said the debate showed that Carter is wrong in insisting the American people have only two choices for the White House, the Republican or the Democrat. He said he offered a real alternative, "the kind of coalition government that we need in 1980."

Voluntary Assistance, a foundation based in Chelsea, Mich., is coming to an end and turning much cooler tonight with lows in the low to mid 50s. Partly cloudy and comfortable Tuesday with highs in the low to mid 70s.
Safety rule violations

J o u r n a l i s t i n d i c t s J a p a n ' s n u c l e a r p l a n t s

by Minoru Inaba
Associated Press Writer

Japan's nuclear power plants are mostly maintained by ill-trained workers who don't follow safety rules and under-report their exposure to radiation, says a Japanese journalist who worked in the plants.

Francescoressa Pietro Horie also says the utilities companies that own the plants ignore or tolerate safety violations and use day laborers to avoid paying benefits or higher wages.

Horie worked for seven months three different plants as a manual laborer, one of thousands who drift from plant to plant under sub-contracts. He has written a book about his experiences,

"Nuclear Gypsies:"

The title comes from the name given to job-hungry day laborers who work for the plants for one day and another the next. Horie said he and his colleagues at one nuclear power plant in the state of Fukui were ordered not to report the use of radioactive water off reactor number 2.

"It's an anachronism for a supposedly ultra-modern nuclear facility to have people called 'Gypsies,'" Horie said in an Associated Press interview.

In a plant in Fukushima state, Horie wrote, he told one of his colleagues that a monitoring device a "farmer" should have been used to check for radiation on his boots.

The worker casually suggested Horie try a different monitoring device, a "generator," but Horie asked for the landlord for one that showed a lower level.

As Horie passed the second monitoring device, a "farmer," Horie said, "now you know our job." He later told another "farmer" he had been ordered not to report the use of radioactive water off reactor number 2.

In another incident described in the book, plant officials in charge of safety operations said nothing when a worker complained he had been exposed to a "lone youth," of a portable TV and a 35mm camera to the other engineers.

"It's alarming the number of people that have gotten away that bothers me. I don't see how there can be such a quantity of successful robberies in the area," he said.

"Gypsies" falsify the level of radiation, they said nuclear plant workers absorbed on the average only 0.95 rem of radiation in 1978, far lower than the official limit of 5 rem a year. A rem is the unit of measure for absorbed radiation in living tissue. A normal chest X-ray produces between 0.02 and 0.03 rem.

Scientists say the average American absorbs approximately 0.13 rem a year from natural and man-made sources.

Toyota Terashima, chief researcher and vice director of the National Institute of Radiological Sciences, said, "practically nothing is known about the effect of low-level radiation in humans, but we have enough theoretical studies and animal tests to say that it's negligible."

Terashima conceded there were no worthwhile medical studies of Japan's nuclear plant workers, but said, "There are no radiation victims among them."

The Labor Ministry has a compensation fund for the victims of nuclear radiation. No money has ever gone to nuclear plant workers.

Kazuyuki Iwasa, 57, a former Osaka City plumber, is the only citizen to have complained officially that he became sick because of working at a nuclear power plant.

He told the AP that he received radiation burns on the skin inside his right knee while at work in 1971 at a Fukui plant run by the Japan Atomic Power Co.

Iwasa said he was employed by a subcontractor at the bottom of a pyramid of companies headed by Japan Atomic and was assured by officials that his job was radiation-free.

He said his present ailments include leukemia, high blood pressure and hearing and speaking difficulties, but that no doctors except for a dermatologist agree they were radiation-caused. The power company argues that Iwasa was exposed to only 0.001 rem of radiation.

The dermatologist, Dr. Minoru Tashiro of Osaka University, said there was no doubt that Iwasa's skin burns were caused by nuclear radiation.

I've seen many skin burn patients who were exposed to 'excessive X-rays,'" he said. The doctor said Iwasa wore a pocket monitoring device able to pick up gamma radiation. Skin burns are caused by beta rays. Tashiro said, adding that later tests showed there were strong beta rays where the man worked.

Iwasa sued for damages in 1974, but his suit is still pending.

SMC Sponsors Career Days

by Susan King

"Women, Work and the Liberal Arts," is the theme of College to Career Days, sponsored by Saint Mary's Student Government, the Career Counseling Center and the Alumni Club. The program will begin today and run through Wednesday in Stapleton Lounge, LeMans Hall, Saint Mary's.

On Wednesday, Sept. 24 at 7 p.m. in Carroll Hall, there will be a panel discussion involving four women with four different lifestyles. These women will discuss their careers, why they choose their professions and will answer any questions. The panel includes Director of Residence Life Sr. Carol Jakowski, Dean of Student Affairs Kathleen Rice, Director of Counseling and Career Development Mary Elizabeth DePauw and a fulltime homemaker and mother who has a B.A. in secondary education and a M.A. in guidance and counseling, Nancy Foldesi.

Vice-president of Academic Affairs Joan McCarthy, is chairman of the program this year. McCarthy began organizing the program last year when faculty and student government were asked to make recommendations for the speakers. There have been past career days, but each year more preparation goes into the program to make it even more successful than the previous year. McCarthy especially scheduled the lecture times this year so they would not interfere with classes, a problem that has a Liberal Arts education and many are SMC graduates.

Last night the activities began with a keynote address given by Paula Lawson Bevington at Carroll Hall. Bevington, a SMC graduate, received a J.D. degree from Yale Law School, has been involved in numerous volunteer organizations such as the Peace Corps, and is now married, the mother of eight children. Bevington was described as "the total Saint Mary's Woman." McCarthy specially scheduled the lecture times this year so they would not interfere with classes, a problem they have had in the past. This has made it more convenient for students to come.

There will be three talks given at the same time on three separate career subjects. The speakers will talk on their careers, what college courses are beneficial and they will give an inside view of the profession. The lectures will be informal gatherings in which students are encouraged to ask questions.

The speakers are all women, except for one man, David Noor, a well-known financial analyst. All the fields are very well represented, every speaker has a Liberal Arts education and many are SMC graduates.

Accidents abound at SMC during hectic Friday night

by Anne Jane Drogula

Two accidents occurred with the space of twenty minutes Friday night on the roadway between LeMans and Moreau Halls.

See "Career Days" schedule at bottom of page.

Career Days Schedule

All lectures will be delivered in Stapleton Lounge, LeMans Hall.

Monday, September 22

2:20 Interior Design

2:20 C.P.A.

2:20 Textile Conservation

3:15 Entrepreneurial specialist

3:25 Veterinarian executive

3:25 Director of YMC

4:30 Para Legal

4:30 Special education

4:30 Director of Day Care Center

6:30 Research Scientist

6:30 Public Relations

7:45 Financial Analyst

Tuesday, September 23

2:35 Immunologist

2:35 Stockbroker

3:45 Social Worker

3:45 Dentist

3:45 elementary education

4:45 Public Relations

6:00 Physician assistant

6:00 Sportscares

7:00 Panel Discussion

Wednesday, September 24

2:20 College Counselor

2:20 Industrial Engineer

2:20 Actuarial Consultant

2:25 Director of Chemistry

3:25 Director of Community Development

4:30 Community development

4:30 U.S. Army Nurse

4:30 Exec. Dir. of Arts & Science Council

6:30 Data Analyst

6:30 Nurse-Midwife

6:30 Nat'l Bank Examiner

Historical meeting tonight

The Notre Dame Historical Society is sponsoring its first meeting tonight at 7:30 p.m. in the Library Lounge. A presentation will be given by Dr. Samuel Shapiro, professor of history, on the C.I.A.
READING PILING
UP ON YOU?

Would you like to get out from under all those books?

We'll show you how to:

- Raise your grade point average, and have more free time for yourself.
- Read 3 to 10 times faster and with better comprehension.
- End all-night cramming sessions.
- Do all your studying in 1/3 the time it's now taking you.

Attend a Free Introductory Lesson
- Increase your reading speed dramatically on the spot.
- Learn about advanced study techniques.

Don't get left behind because there is "too much to read."
COME SEE US TODAY!

Today & Tomorrow 3:30 & 7:00 pm

EVELYN WOOD READING DYNAMICS
laughed and said: "Oh, that's thirty years away. The people said it would be possible to splice together the genes from two different species, essentially to mend a gene, to repair a gene. They said: 'Oh, that's impossible. That's fifty years away.' Both have now been done. I think that the breakthroughs, which I see to be very negative in their implications, are going to be happening faster and faster, particularly now that the Supreme Court has ruled just recently, in June, that companies can now patent life forms. They can see life. That means there's big money in this now. Thus stockbrokers and people who sell stock in companies are very excited about the new growth industry. You can make a lot of money by designing new life forms and patenting them and selling them. So with that incentive in making money, I would guess that Dow Chemical and DuPont and G.b. and I.T.T. would guess that Dow Chemical------

...LaFollette

A: It's very difficult, when the society has a world view that problems are solved by technology. The only way it will happen is if enough people think about this, analyze it and say so. It's so counter to the things we believe in morally and to the principles of life on earth that we are going to put it on the shelf and say no. Am I optimistic about that? No, not really.

Q: What precedent did Louise Joy Browne (the first test-tube baby) set?

A: The precedent that sets is that we as a society are going to accept tampering with the reproductive system. For years in our society, hundreds of years, the production of life, human life, was tied directly, culturally, philosophically, religiously to the sexual mating of a man and a woman. The birth of the first test-tube baby is the first step away from that.

Q: Do you think we should eliminate research in genetic engineering altogether, or just perhaps keep it out of the marketplace?

A: That's a whole area of research that we as a society are going to have tremendous incentive to abuse what companies the right to own it, to patent it, that's going to be a fantastic incentive to abuse what already has a lot of potential for abuse. But I think, ideally, we should reject the whole technology.

Q: What about possibilities in what we can learn, like what causes cancer? Charges chose not to attend. At the White House, Stuart Anderson, Carter's domestic affairs adviser, said Reagan had taken "extraordinarily conservative positions.

A: I think that's an area where I'm not as informed as I should be. I am not a geneticist, nor am I a genetic engineer. However, there is a whole area of research that I think will be enthusiastically considered. I'll sure sleep well tonight," Reagan said. As he left the convention center, he said that asking a debater how he did it "like asking an actor on opening night to criticize the play.

Andersen met his supporters and said he felt "pretty good" about his showing. As to the question of whether he emerged a winner, the independent said, "I will leave that to the judgment of the great viewing audience."

At the White House, Stuart Eizenstat, Carter's domestic affairs adviser, said Reagan had taken "extraordinarily conservative positions."

SCIENCE AND ENGINEERING MAJORS: TAKE OUT INSURANCE NOW

How about an "insurance" policy that your science or engineering degree will really be used? It would be nice. Especially considering the work you put into such a degree. The Air Force will use your talents. We have openings for young men and women majoring in selected science and engineering academic fields...like Aeronautical, Aerospace, General and Electrical Engineering, Mathematics, Physics and Computer Technology, and many more.

AIR FORCE ROTC Gateway to a great way of life.

Contact Capt. Gottrich at 283-6634 for additional information.

He also said there is no chance in Carter's assurance that he wants to debate Reagan one-to-one "and not initially with Mr. Anderson." Much of the debate revolved around economics. And Carter "Gov. Reagan is not responsible for what has happened over the past four years, nor am I," said Anderson, warning that inflation could surge again.

'"The man who should be here tonight to respond to those charges choose not to attend. Reagan said his proposed 10 percent federal income tax cut "Has been my opponent, by the man who isn't here tonight." In a debate-day campaign comm, Reagan suggested Carter didn't show up because he didn't want to answer for high inflation and high unemployment.

Anderson accused Reagan and Carter of trying to outbid each other on tax cuts. He said Reagan wants a tax cut now, Carter proposes a $27.5 billion cut next year, and he opposes both. "This is no time for a tax cut in view of the incipient signs of renewed inflation," he said. In fact, he called for new taxes, proposing excise taxes on tobacco and alcoholic beverages and tobacco and alcoholic beverages to be put into a trust fund for urban programs and plugging a new for a 50-cent a gallon excise tax on gasoline, saying it would curb consumption of imported oil and increase revenues to cut Social Security taxes by half.

In addition, Anderson said federal spending should be cut by $11.3 billion to curb inflation. Reagan said that made no sense to him. "Why take it in the first place if you're going to give it back?" he said. He said the same thing about the three-year, 30 percent tax cut he proposes. Reagan said Carter calls that inflationary. The Republican nominee said he didn't see why it is inflationary to cut taxes and leave the money in the hands of the people, rather than have the Government collect and spend the same money.

Hotdog! Another batch of potential revenues nears completion (photo by John Macar)
Where's the warhead?

Explosion cleanup begins

DAMASCUS, Ark. (AP) — Heavy trucks, a bulldozer, a helicopter and a crane were moved into the debris-strewn pastureland where a Titan II missile exploded and apparently hurled an unarmed nuclear warhead several thousand feet from its underground silo.

The Air Force, which never admits the presence of nuclear weapons in accidents involving strategic material, would not confirm the trucks were there to recover the warhead and move it to another site.

But Lt. Col. Richard Stevenson, a spokesman for Strategic Air Command, said it was an "absolutely correct assumption" that a nuclear warhead would be moved from the site to Little Rock Air Force Base, where such a warhead was at the site.

At least one state official said he was convinced that a nuclear warhead was buried from the site. But Sam Ransom, director of the state Department of Public Safety, said he did not believe it was still at the missile silo site.

"I believe that there was one there, but that it is not there now," he said. "I don't have any evidence that they moved anything. They're (Air Force officials) as relaxed as I am."

He is convinced that there was a warhead, and if it is still there "it's just not there."

Ransom said he and Gov. Bill Clinton will tour the site Monday.

Work at the site yesterday afternoon was canceled from spectators behind a tarpaulin. Before military radio transmissions monitored shortly after the predawn blast Friday indicated house workers had hunted to find the warhead among the other huge chunks of missile wreckage scattered over the site in rural north-central Arkansas.

The Strategic Air Force Base, if the CRS/TV program "Face the Nation," did say, however, "there was no destruction of a nuclear warhead."

There was never a time when a warhead was outside the security control of the Air Force," he said, adding that the nation's nuclear warheads cannot be destroyed by acciden "no matter what happens."

During a two-hour span yesterday morning, a helicopter arrived and 23 vehicles, including two flaved trucks and a large boom, rolled into the area. Military guards toting M16 rifles blocked the entrance to the missile complex — while Arkansas State Police cars blocked secondary entrances.

Military vehicles were thoroughly searched before they were allowed inside the area.

Capt. Donald Schaefer, spokesman at Little Rock Air Force Base, declined to comment on why the equipment was moved to the silo site.

"They're moving equipment there. But what the purpose is, I can't say," Schaefer said.

"I think they are just moving things around."

Asked whether the purpose was to recover a nuclear warhead, Schaefer said, "I can't confirm or deny the presence of any nuclear warheads, so I can't comment on that."

Lt. Gen. Lloyd R. Leavitt Jr. of the Strategic Air Command at a news conference Saturday repeatedly refused to confirm that a nuclear warhead existed at the site. The Washington Post quoted a Pentagon source as saying the Air Force planned to transport the warhead by convoys from the Damascus site to Little Rock Air Force Base, and then to another site for study.

In the past, the Air Force has contacted state law enforcement officials to assist in the transportation of nuclear weapons, according to Jack Dubose of the state Office of Emergency Services.

But Dubose said yesterday morning that his office had not been notified of any planned movements.

"It's a normal procedure than when they form a convoy to move one of those warheads, that they notify the highway patrol to assist," Dubose said.

[continued from page 9]

searchwhich is one area of genetic research, where you try to find out what causes diseases. If you can discover that exposure to benzene, as a chemical, causes chromosome damage, (and to do that, you've got to analyze people's chromosomes) that research, I think, is legitimate.

Then what do you do about it? That's the trick. If you eliminate benzene from people's environment, so they don't breathe benzene, that's a good solution. If you decide to go into people's bodies and fix their genes so they can breathe the benzene and not get sick, then that is what I'd be opposed to.

Q: Can you describe the two books you are promoting?

A: In relation to the talks I've been giving, one that's very obvious is "Who Should Play God?", a book about genetic engineering, that's been around about three years. It's probably the leading book on that subject and it's a very good book. I recommend highly. The other book is a new book, that's just out on the bookshelf this month. It's called Entropy and it's an analysis about how we got to where we are today in terms of a world view. It's going back and analyzing from Francis Bacon and Newton and Descartes and up through today. The last four hundred years. How we got where we are and why it's not working. Why everyday you read in the newspaper about new problems and new crises. Most people are beginning to think the system is not working. You've got an energy crisis, unemployment crisis. We have a drug crisis. We have a health crisis. The basic technological structures we live in are not working. Something is going wrong somewhere. And I claim that
Ode to Harry O.

by Louie Somogyi
and Michael Orman

Outlined against a warm, blue September sky,
At the place they call Notre Dame,
Now this young man on the sidelines,
Miracles have been numerous here,
They needed an extraordinary deed.
But the situation was dismal,
Except a hero to be.
You see, he was the kicker,
Also wore number three,
By a quarterback who wore number three.
And with only four seconds left to play,
With a 51-yard try.
Only five-feet, eleven high,
But this guy was thought to be anything,
A few were filled with rage,
"What can you expect?
For this "never-say-die" crew
Marched on to center stage.
Some fans were mighty sceptical,
Lost most of our respect."
From this little man, who just today,
For he had no powerful toe.
He didn't even kickoff,
and Michael Ortman

Homecoming Activities Recapped

Homecoming was termed "a moderate success" by DaleAnn Robinson, Chairperson of Homecoming 80. Button distribution at the dining halls, the "Find the Blue" Observer contest, the banner contest, and the dance at Center were the highlights of the past week's activities, besides the excitement caused by the Notre Dame-Michigan game Saturday afternoon.

This week's activities began Wednesday in the dining halls with the "Blue is Thru!" button distribution. Thursday, the judging for the banner contest was completed. Linda Shanahan announced two third place winners with first place going to the "Angels" of Villa Angela.

Scott Howell of Stanford Hall found the blue clue, which had been placed with cheerleader Nancy Dawson, who had carried the hidden envelope with her all week, was described as living in B-P, being a cheerleader (B-P Beautiful People), having fair hair (of the three ND cheerleaders living in B-P, she had the fairest). Howell was the happy recipient of a Homecoming packet.

The excitement of the game spoke for itself. Freshman Blair Kiel booted the ball 51 yards for the 29-27 Irish victory over the Wolverines. Later that evening, Century Center was the scene of "An Evening of Dance," the dance chairman, was John Bates, dance chairman, was John Bates, dance chairman, was John Bates, dance chairman, was John Bates, dance chairman, was John Bates, dance chairman, was John Bates, dance chairman, was John Bates, dance chairman, was John Bates, dance chairman, was John Bates, dance chairman, was John Bates, dance chairman, was John Bates, dance chairman, was John Bates, dance chairman, was John Bates, dance chairman, was John Bates, dance chairman, was John Bates, dance chairman, was John Bates, dance chairman, was John Bates, dance chairman, was John Bates, dance chairman, was John Bates, dance chairman, was John Bates, dance chairman, was John Bates, dance chairman, was John Bates, dance chairman, was John Bates, dance chairman, was John Bates, dance chairman, was John Bates, dance chairman, was John Bates, dance chairman, was John Bates, dance chairman, was John Bates, dance chairman, was John Bates, dance chairman, was John Bates, dance chairman, was John Bates, dance chairman, was John Bates, dance chairman, was John Bates, dance chairman, was John Bates, dance chairman, was John Bates, dance chairman, was John Bates, dance chairman.

Krimm's interception, tackle: big defensive plays in Irish win

Mike Olenick
Sports Writer

In a day and a setting that will be recollected for many years to come, one performance beam­

ed brightly in the wake of a­

other great team effort. Junior

cornerback John Krimm found

himself making the the most

pivotal of the many game­

breaking plays evident in Sat­

urday's epic contest when he

bolted for 49 yards and a touch­

down after intercepting John

Waagner's pass late in the third

quarter.

The touchdown did more

than signify a potential tie

game. It was the igniting spark

that revived a stalled offense and a

tiring defense.

It was Notre Dame's first forced

and its first to tell you that Saturday's

loss belonged to the team as a

whole.

His first career interception was

Notre Dame's first forced
turnover of the season, and it was the first interception returned for a touchdown since Dave

Waymer did it twice in last

year's Miami finale in Tokyo.

To attribute this weekend's

win to one or two performances

would be misguided, especially

after witnessing the post-game

atmosphere affected all

players in much the same way.

"It's still so hard to believe.

Once we come back down, we'll

be able to look back on what

actually happened. It was just

a great team effort," Krimm said.

But junior Joe Barrows led

the way for Prister's single

and earned Wozniak and picked up the save with an inning of per­

fect relief.

The Irish grabbed a 3-0 lead in

the sixth inning, on a

sophomore Rick Chyrst to

pave the way for Prister's single

up. But junior Joe Barrows led

off the sixth with a triple and

scored on a sacrifice fly by

senior Mike Jamieson.

Sophomore Jim Cameron led

the Irish to their first win in six

tries, as he batted .375 with a

double and triple.

In the bottom of the sixth,

the Irish evened it up in the

second game.

Senior catcher Jim Monta­
gano also enjoyed an excellent
day - a single, three doubles and

three runs batted in.

The Irish, however, did have

their moments of sloppy play.

The winners made three errors

on defense, while striking out five in four

innings.

Oliver boots Michigan out of Promised Land

Notre Dame 29, Michigan 27

by Beth Hoffman
Sports Editor

Welcome to the Promised Land, the land of milk and honey — the miracle-worker named Harry Oliver.

Welcome to Notre Dame, led by senior placekicker, who, miraculously, defeated Michigan 29-27 on Saturday. Notre Dame's savior, a 5-11, 165-pound placekicker named Harry Oliver, stood before the Indiana home of the Fighting Irish, fate by booting the football game masses attempted to tear reeling a potentially bitter loss through the uprights, also conferring a potentially bitter loss onto a sweet victory.

Someone in the crowd must have had a vision, like the prophet-of-old, as the pregame — men attempted to tear the crowd apart. But, who could have imagined the game would end the way it did?

"I have to thank God, God had to be with me," said the plied Oliver, "My teammates are the greatest, they supported me."

"This is by far the greatest moment of my life," added the Cincinnati Moeller graduate after receiving the game ball from Notre Dame president Theodore Hesburgh. "But today you added a whole new chapter to that tradition by not giving up. You did what everybody said was impossible."

If Harry Oliver was the Irish savior, then freshman Brian Kiel was something of a prophet, perhaps facing the Columbus, Ind., native that doubles as Notre Dame's punter, entered the game with less than a minute to play and the task of getting the ball within Oliver's range.

"I made a lot of quick decisions out there today," said Devine, "not all of them right, but I felt that was the way to win the game. We had worked on that formation all week with Blair."

"I was not sure whether he'd be called on to lead the Irish from the depths of despair.

"I did not know if he (Devine) was going to bring me in or not," said Kiel, who averaged 43.5 yards punting on the day with six attempts and a long of 69 yards. "At the very last minute when they (Michigan) were getting ready to score, that is when they told me I was going in."

"Mike Couray is fantastic. He's the one that led them all out of the ball."

Harry Oliver wasn't the only last minute hero to make his mark on the Notre Dame sporting scene this weekend.

The Fighting Irish soccer team had two of their own, beginning with Friday night's emotional 3-0 win over Ohio State and winding up yesterday afternoon on the same Carter Field with a 3-1 Notre Dame decision against rugged Xavier University. The weekend sweep lifted the Irish to 4-6-1 and provided a much needed shot of confidence into the team that Sunday's crushing defeat in St. Louis.

"We are the teams (Ohio State and Xavier) we can and should beat," said Notre Dame coach Rich Hartranft. "We didn't win many games like this last year, so you can see we made some progress."

Much of that progress, however, must be attributed to the presence of senior halfback Bill Murphy and junior fullback Jim Steins in the Irish lineup for the first time this season. Until Friday's match, Murphy had been recovering from a foot injury and Steins from a separated shoulder. Their skills were sorely missed.

The Notre Dame defense, for the entire Ohio St. game and most of the Xavier contest, was impenetrable. Steins spearheaded the fullback corps with his aggressive, relentless style of play and fullbacker John Milligan was rarely tested. With 23:07 remaining to play against Xavier, the score was 1-0-0, courtesy of sophomore halfback Steve Berry's goal at 24:44 of the first half on a Sami Khahi assist. Steins suddenly dropped to the turf in agony as a result of a kick to his ankle. After he was removed from the field, the Notre Dame defense seemed to wilt.

The Muskeeteers put on the pressure for the next few minutes and at the 75:41 mark, forward Nicky Calixte put a shot past Irish goalie Ted Kuechly's net that was stopped by 3:52 left to play. 30 seconds later, forward kid O'Malley unloaded a blast from the left side that Kuechly batted away. And finally, on a free kick by Irish freshman fullback Joe Holohan from 35 yards out.

Sophomore Phil Carter enjoyed a brilliant day against Michigan, rushing for 103 yards on 30 carries. The Tacoma, Wash., native accounted for one of Notre Dame's four touchdowns versus the Wolverines. (photos by Phillip Johnson)

Players of the Game

by Michael Ortman
Associate Sports Editor

It was Saturday, September 20, 1980, 4:31 p.m. 1ST. Thousands of Notre Dame football fans were demonstrating through their programs, looking to town. Who that No. 3 in green was. "I know he blew that extra point earlier, but what's his name again?"

Two minutes later, Harry Oliver was a household name.

"Harry O, Harry O," they chanted after the diminutive left-footed soccer-style kicker had made good on the second-longest field goal in Notre Dame history — 31 yards — and by far, the longest of his life (this previous best was 38 yards in an Irish junior varsity game). Was it just irony that the band's halftime theme was Gospel?

Perhaps, but there was something magical, something heavily about the final moment. Just more, that never-to-be-forgotten three-pointer, one of Oliver's high school teammates, Irish placekicker Bob Crabbe, patted his little buddy on the tail and told him to "kick it out of the ball. And kick it straight."

Then another fellow-Cincinnati Moeller graduate knelt before Oliver for the hold, or was it in prayer?

Oliver's holder probably turned to the "Field Goal Jesus" with this plea: "Hey God, this is Tim Koegel. We need a big favor. Quick. Could you hold that according to his instructions, and help."

With that, like the parting of the Red Sea, the 13-mile-an-hour breeze ceased.

The epiphonema:

"We need the block, the Irish who ran back an 80-yard touchdown."

"The epitome of concentration.
