Hiler takes on Brademas

Conservative Republican John Hiler has been selected for the unequivalent task of trying to unseat House Majority Whip John Brademas in his bid for a 12th term as representative of Indiana's 3rd District. He was interviewed recently by Observer Executive News Editor Tom Rehman.

Q: You've been asked this a hundred times, but why should people in this district vote against John Brademas? He's one of the most powerful men in this House. What can you do that he can't?

A: I think we have to look at the record of what's being gone on here in the Third District. We have approximately 12.5 percent unemployment, this is over 36 percent higher than in the rest of the country. We are in an economically blighted district. You look at the city of South Bend, which lost almost 10 percent of its population in the decade of the 70s, Elkhart County has an unemployment rate of about 13.5 percent today. This district is not on sound footing today. I think that the problem has been with the leadership in Washington that has led us to the economic problems that we face today, that really affect a district like the Third District of Indiana. With leadership comes responsibility, it's not a Congressman who was elected for the first time two years ago who's going to be responsible for the mess we're in: they've been working as well as possible, paying their taxes. The problem has been with the leadership in Washington. John Brademas is one of those leaders, and it's time for a change. It's time to bring some new leadership in, who will hopefully bring in some new solutions.

Q: Do you feel John Brademas is personally responsible for high unemployment in this area, and around the country?

A: John Brademas is one of those leaders in Washington who will hopefully be personally responsible for high unemployment in this area, and around the country.

A bomb exploded in a car yesterday outside the Turkish mission to the United Nations. Five people were injured and several buildings were damaged, reported police. Pieces of the car were thrown several blocks away from the explosion site on U.N. Plaza. In New York City, The Associated Press received an anonymous call in which a man claimed a group called the “Armenian Justice Committee” was responsible for the New York explosion. However, it was not immediately clear if the Los Angeles explosion, at a downtown building, was connected. I don’t think you could get many chances like that after college. Places like the Stratford Festival are very accommodating to students. There seems to be an aura around being a student with poverty (with tuition costs, who isn’t scholar poor?) that cries out for reduced rates. It’s travelling with people who share the same interest, and talking with your peers and fellow students about it on the bus afterwards. It’s a chance you can get when you’re still a student, and still studying.

President Bani-Sadr of Iran claimed Iraq had used all its reserve forces in the Persian Gulf war and that it would have to rely on volunteer or counter-attacking. In an exclusive telephone interview with The Associated Press, Bani-Sadr said his government needed more money and his plan for about 200 miles south of New Orleans, the Coast Guard said. A bomb exploded in a car bound for Galveston, with an undetermined amount of crude oil tanker with 32 people aboard caught fire yesterday in the Gulf of Mexico. The buildings also suffered “extensive exterior damage,” police said. — AP

New earth tremors shook the ruined buildings of Al Awami, Algeria yesterday, raising fears for the safety of rescuers digging frantically through debris to reach hundreds of victims still showing signs of life 48 hours after an earthquake devastated the city. The president of the Red Crescent relief organization, Mohamad Beleloua, said the death toll reached 500, of which 80 were his own. He estimated 20,000. A big international rescue and relief operation was in motion, and in every city West relief used donation points for food and supplies. Thousands lined up at hospitals and first-aid centers to donate blood—so many that Algerian Red Crescent officials had to call a temporary halt to donations there because it couldn’t handle them all. The rescue continued by floodlight through the night in this city located on a fault line 150 miles through the night in this city located on a fault line 150 miles.

Being a senior, this was my last chance to take such a trip with the department that I’ve spent four years of learning with. I thought about that as I watched the last play. At first I thought this would be my last time to see Stratford. So I looked at everything carefully, taking a remembrance. Then I ran into some friends from home. Unexpected pleasure. Virginia and Mary had made plans to see these plays for nearly nine months they told me. Great, I thought, maybe I’ll still be going to see the plays again someday. But I know it won’t be the same again. As students arrangements had been made for us on Saturday morning to talk with one of the actors from “Macbeth”. It’s about Nothing” backstage. He answered all the questions we had about performing for the Shakespeare Festival, and Stratford. I wonder if you get a chance like that when you are no longer a student? Of course maybe if you’re an English professor... But, still, whatever about the time spent on the bus, talking with the other students and the professors on everything you just saw? Going over the details on the acting and the plot. Studying the textbooks prepares you for what you encounter on such a trip. But it’s really the chance of talking with people who know a lot about it that really helps you learn. No, it probably won’t be the same again. But, then you have to think, you really don’t forget all you learned in four years. And when you go to see Shakespeare, or whatever, again, it must all come back. But it’s good, while you’re here, and have the chance, to go and sit through a couple of plays with your fellow students. And look around the town, stopping at the gift shops for postcards to mail home to friends who don’t get much mail.

It was one of those rare chances that only a student can ever come again, I’ll probably have to review my notes from my junior year Shakespeare class so I’m sure I remember what it is I’ll be seeing. But, at least I’ll have the notes.

President Bani-Sadr of Iran claimed that Iraq had used all its reserve forces in the Persian Gulf war and was relying on volunteer or counter-attacking. In an exclusive telephone interview with The Associated Press, Bani-Sadr said his government needed more money and his plan for about 200 miles south of New Orleans, the Coast Guard said. Terrien minimizes population problem

by Michael Maier
Staff Reporter

Declaring that couples should not decide against having children due to the problem of population, Conrad Terrien lectured on "The Myth of Overpopulation" to an audience of 70 Thursday night in the Library Auditorium.

"So many, many people have refrained paternally from having children that it breaks my heart to see them do it without knowing the real facts," Terrien asserted, while claiming that population is not a factor in major world problems.

In order to support his statements, Terrien explored population density, pollution, and energy crisis and starvation in the world. Despite criticisms and objections from the audience, Terrien contended that population plays a significant role in the world.

Holland and Belgium, with population densities of 900 (individuals per square mile), and Japan with a density of 700, do not consider themselves overcrowded and can produce enough food to sustain their people. On the other hand, China and India, countries traditionally considered overcrowded and underfed, have densities of approximately 400.

Noting "that the lakes and streams of today are much, much cleaner than they were in 1968," Terrien labeled population problem "a myth." He went on to explain that the lakes and streams of today are much, much cleaner than they were in 1968, "due to the problem of population." He also noted that "young people often do not know the real facts." Terrien said that clean-up efforts by engineers far outdistance population output of the world's cities.

"There is indeed an energy problem, but that nothing new with the population," Terrien observed. "It is a political, engineering, distribution problem because petroleum is too valuable and useful in other industries. We ought to thank the Arabs, instead of damning them, for joing us into this responsibility.

Terrien also stated that starvation is not due to over-consumption. He noted that most years, India has had a surplus export of food.

When asked why so often hear of and see starving Indians, Terrien replied, "It's a distribution problem. There are people starving in Appalachia. There are people starving in South Bend, Ind. And how people are starving in Chicago."

Throughout the talk, Terrien used his blackboard often, drawing graphs and listing statistics. He also encouraged the audience to read more about the issue throughout the lecture, though at times he would cut off the questioner or postpone the answer until later in the lecture.

The vocal audience questioned Terrien for 15 minutes continuously — three separate times. Each time, Terrien dominated the debate, mostly due to his microphone and preparation for all the traditional arguments posed.

While not insisting that all couples in the United States should have large families, Terrien did suggest that a baby boom soon wouldn't hurt. "We have the food, we have the resources, and we will have the energy to sustain a population twice our size," Terrien said. "We're running out of kids. In a few years the United States and Europe will have lost vigor and dynamism due to the lack of youth as a driving force of enthusiasm," Terrien concluded.

Henriot plans lecture

Rev. Peter Henriot, SJ Director of the Center of Concern, Washington, D.C. will lecture on "Global Justice in the 1980's: Current Failures, Future Possibilities." on Tuesday, Oct. 14 at 4 p.m. in the Hesburgh-Hayes Aud.

A well known author and lecturer in social analysis, Fr. Henriot has been with the Center of Concern since its founding in 1971. Prior to that time he was Visiting Associate at the Center for Urban Studies of M.I.T.-Harvard and taught at a number of institutions including Seattle U., U. of San Francisco, Boston College & Gonzaga U. Fr. Henriot's lecture is sponsored by the Center for Experiential Learning.

The Observer
Take A Hike

Outdoors in the Ozarks

by Jim Drinkard
Associated Press Writer

From bluffs 250 feet high, hikers look down on the Current River winding its way through an Ozarks gorge. Looking up, they see ridge upon ridge of mountains fading into the haze 50 miles away.

The scene is as old as the well-worn hills, but the vantage point is brand new; it is part of the scenic Pacific Crest Trail, a planned 5,000-mile path which recreation officials hope will draw hikers from across the Midwest.

MONDAY

FOCUS

Until now, the region has had nothing to compare with the famous Appalachian Trail that winds from Maine to Georgia, or the scenic Pacific Crest Trail on the West Coast. Midwestern hiking has been confined to shorter trails, good for a day or two of backpacking.

In the early 1970's, a few people recognized the potential of a patchy band of publicly owned land stretching from south of St. Louis through the Missouri Ozarks into Arkansas and most to Oklahoma. Much of the land is in national forests, parks and state conservation areas, and it includes the only extensive elevated area between the Appalachians and the Rockies.

One of those people was Free Lafer, now head of the Missouri Department of Natural Resources. He organized the Ozark Trail Council about five years ago, pulling together a loose coalition of representatives from the Sierra Club, the Boy Scouts and Girl Scouts and federal and state agencies.

To date, the council has oversaw construction of 80 miles of trail in Missouri. Arkansas has completed 100 miles, and the U.S. Forest Service has 140 miles of trail in the beginning stages.

The trail cuts across steep hillsides, runs along wooded ridges, climbs through rocky outcroppings and meanders through meadows. Forests are mostly hickory, oak, maple and pine. Deer and wild turkeys abound in some areas.

The Ozarks scenery is the main attraction, but its beauty is on a different scale than that of eastern or western mountains.

The highest point in the Ozarks - Magazine Mountain in Arkansas - reaches only 2,823 feet.

"There's no question that this trail will draw people from Chicago, from Texas, and from all over the Midwest," said Al Schneider, the only full-time trail coordinator. Schneider, who left a junior college teaching job in St. Louis for the Ozarks, describes himself as a cheerleader for the trail.

...Q & A

The decade of the 50s was one of the longest periods of economic growth in our country's history. We had very low inflation, and even with the 26.1 percent tax cut that President Kennedy put in, Federal tax revenues went up 50 percent. So it was a program that worked, and I think we need to go back to that kind of program. Today, when Republicans advocate the same kind of program that John Kennedy advocated in '63 and '64, it's called "Voodoo Economics". Well, if it's Voodoo Economics, then we need more of it. 'Cause it worked. It's working in Puerto Rico today, the governor down there has cut taxes each of the last three years by five percent across the board, and he has a plan to cut taxes each of the next three years by five percent across the board, and the net result down there is that tax revenues went up 13.1 percent, and they added an additional 100,000 taxpayers to the rolls. Puerto Rico isn't that big, so it's had dramatic effects.

These kind of things work, and I think we should do what works.

Q: I think the reason why it's called "Voodoo Economics" is because Republicans, and I don't think you're an exception, are also proponents of defense increases. What do you say to the argument that tax cuts would be doubly inflationary when added to increased defense spending?

A: Taxes, in the next year, are going to go up $86 billion. That's an increase in Federal tax revenues of 17 percent; so when we talk about tax cuts, we're not talking about cutting them from the level they're at today, we're just talking about trying to dig into that $86 billion a little bit. Instead of taxes going up $86 billion, let's have them go up only $66 billion. You know $86 billion works out to $880 for the average taxpayer in this country, and that's a lot more taxes he's going to have to be paying -- 17 percent more. Now his wages aren't going to go up 17 percent, so that means he's going to have a loss in real income and purchasing power. We can't look at the economy as a static economy, and I think that having people say "Well if you cut taxes you won't have defense spending," they're approaching it from the terms of a static economy. We don't have a static economy. Unfortunately, today we have a stagnant economy, but I think that with tax cuts and some sound policies, we can have a
vibrant economy again, an economy that's growing. When you have an economy that's growing, you're producing more tax revenues. The one thing (that's) for sure, you're never going to balance the budget by raising taxes. We place a lot of faith in the poll; it's statistically reliable, and if you believe in statistics, then you have an economy that's growing. When you have an economy that's growing, you're producing more tax revenues. The one thing (that's) for sure, you're never going to balance the budget by raising taxes.

Doonesbury

The Observer, Congressman Brademas disputed the polls which survey. I'm not going to get into a dispute with Congressman Brademas over what he believes the key elements of this campaign are. The surveys that we've had taken, I don't know what he's talking about, 106 people. The surveys that we've had surveyed 350-400 people, taken, I don't know what he's talking about, 106 people. The surveys that we've had surveyed 350-400 people, statistically significant, it's statistically reliable, and if you believe in statistics, then you have to believe in surveys. If he chooses not to, that's his business. It doesn't bother me, it doesn't change our campaign strategy any.

Q: Are there any issues on which you differ from Ronald Reagan? A: Not too much on the issues that are going to determine this election. I think that the economy, inflation, the burden of overregulation, these are things that Reagan principally has been talking about of late, and these are the key elements of this campaign.
Jim Stone leads Irish romp over Hurricanes

by Tim Prister
Sports Writer

At the pep rally in Steppe Center Friday evening, tailback Phil Carter said it didn't matter that he wouldn't be playing against the University of Miami. The position would be filled quite capably by senior Jim Stone. With Carter's words still echoing through his head, Stone calmly slashed through the highly touted Hurricane defense amassing 224 yards en route to a 32-14 victory.

"I felt bad for Phil, especially after last week's exceptional performance," commented Stone, who was Carter's host when he visited Notre Dame two years ago. "Despite the injury though, he continued to encourage me all week long."

Another inspiration for Stone resulted from his younger brother Dan's knee injury sustained in the Michigan State game. Dan underwent surgery for torn ligaments Saturday and is recovering in St. Joseph's hospital in South Bend. Of course, had Carter not been the recipient of a brutal tackle on his last carry one week ago, Stone would have remained as backup tailback—a position which has left Stone a frustrated individual.

"Sure it's frustrating not to be starting, but Coach Devine always talks about being ready. For example, last year when (Pete) Buchanan was injured, I knew I'd have to work extremely hard to win the starting position."

Yet Carter took full advantage of the spring session using his quickness as a major asset—a position which has left Stone a frustrated individual.

"Paul's first step probably is quicker than mine but our running styles are completely different," said Stone, who runs the 40-yard dash in 4.5 seconds. Stone also agreed with one sports writer's inference of Carter's style being similar to Walter Payton and Stone comparable to Gale Sayers. However, Stone played down such a comparison as he did with regards to his personal performance.

"In order to be a good running back, you have to have the mental awareness to pay attention to your final 27-yard jaunt."

"In my opinion, I played extremely well today," said Stone, who also dived as backup tailback—a position which has left Stone a frustrated individual. "In my mind, I figured that when Vagas Ferguson graduated, I would be the heir apparent. Naturally, I knew I'd have to work extremely hard to win the starting position."

"I'm really proud of Jim. He spent most of his career in the shadows of Vagas Ferguson and then found himself without a starting spot this year. Yet, Jim continued to work hard. There was never any pouting on his part and he has always been ready when we needed him."

"Playing football at Notre Dame is really something special. It's hard to explain the magic that this university possesses but when you're involved in the Michigan game, and the Mirage and Cotton Bowls, you realize the long, tough practices were really worth it."

The Observer Monday, October 13, 1980 - page 6
After Manny Trillo flied to second base and Garry Maddox to defeat the throw, Terry Puhl in center to score after the Astros' three-run eighth inning of the roller-coaster fifth game of the best-of-five National League playoff series.

The Phillies scored 11 runs in the seventh inning and advance to the World Series championship series, Unser in the five-game series.

The Astros tied the game 7-7 with two runs in the top of the eighth inning, and Terry Puhl got a record-setting fourth straight single for Philadelphia, was the winner of the game.

Notre Dame tops Miami, 32-14

by Mark Hannah<br>
Sports Writer

It was one of the biggest upsets of the season for a nationally-rank power-house.

It was a classic showdown, a Notre Dame vs. Miami game—Who's going to win? What's going to happen? Why are you trying to kid? There was no kidding on this day, as the nation's seventh and thirteenth ranked teams squared off in South Bend. And there was no kidding either coach about which team was better.

"Notre Dame has got an exceptional football team, by far the best team that we've played," said Miami coach Howard Schnellenberger following his team's 32-14 loss to the Fighting Irish. "They're also the most physical team that we've played. They just played a better perfect game. Today, they were a better football team than we were."

Irish coach Dan Devine agreed.

"To use an old cliché, this was a team victory. We played with a great deal of determination, and the team was really ready. This team was more ready for this game than any other team has been for a particular game since. I've been here."

Undoubtedly, the big story of the game was senior tailback Jim Stone. A native of Seattle, Wash., Stone lifted the name of Carter off of the lips of most Irish faithful for a few hours with a 224-yard rushing performance, running for his outstanding offensive Player of the Game honor. His elegant performance of his brother, whose brother Dan should be more surprised by anything that's happened in a football game in 35 years of coaching, so I wasn't surprised by anything that happened today."

The offensive performance of Stone's performance was "I knew nothing about him, but I knew that if I was on the other side of the caliber, whoever they put in will be of superior quality. He has exceptional speed and good power."

The dominance of the Irish rushing attack against a Hurricane defense that was the nation's best was a major reason why the final score wasn't as close as the oddsmakers had predicted. But Devine's reaction was simple.

"I have never been surprised by anything that's happened in a football game in 35 years."

The defensive mixup at midfield let Bleir Kiel, the first freshman quarterback to start at that position since 1951. Kiel, who earned the same number of yardage by a freshman as Notre Dame's Brian Kelly (144 yards and one touchdown), completions--better and more plausible reasons.

ND takes state tennis crown

by Gary Grantz<br>Sports Writer

Time may have run out on the Notre Dame soccer team yesterday afternoon. Their 2-1 loss to Miami (OH) 9-1-13, the no. 1 team in the Great Lakes Region, on chilly Carter Field probably served the final death notice for any post-season playoff hopes the eighth-rank Irish have been entertaining. In a cleanly contested match that was dominated by Notre Dame field position and possession, three critical mistakes proved fatal for the injured-plagued Irish, now 11-4 on the year.

The first two errors came in the first half and each led to Redskins scores. After thirty minutes of defensive struggling in the midfield, Cindy Schuster lost her second straight match on Saturday, (photo by John Macor)

The Irish, who jumped from Division III to II this season, have proven themselves a state power but will face a stiffer test in their senior season, when they will compete in regional competition.

Error-plagued Irish fall 2-1 to Redskins

by Gary Grantz<br>Sports Writer

Time may have run out on the Notre Dame soccer team yesterday afternoon. Their 2-1 loss to Miami (OH) 9-1-13, the no. 1 team in the Great Lakes Region, on chilly Carter Field probably served the final death notice for any post-season playoff hopes the eighth-rank Irish have been entertaining. In a cleanly contested match that was dominated by Notre Dame field position and possession, three critical mistakes proved fatal for the injured-plagued Irish, now 11-4 on the year.

The first two errors came in the first half and each led to Redskins scores. After thirty minutes of defensive struggling in the midfield, Cindy Schuster lost her second straight match on Saturday, (photo by John Macor)

The Irish, who jumped from Division III to II this season, have proven themselves a state power but will face a stiffer test in their senior season, when they will compete in regional competition.
