S.U.R.E. examines ecology issues

WASHINGTON (AP) — A day after President Reagan demanded that his budget critics "put up or shut up" the White House yesterday flatly rejected the President's call for a virtual freeze on Pentagon spending while trimming by half the administration's Office of Tax Cuts.

But despite the claim by presidential spokesmen that Sen. Ernest Hollings, D-S.C., "hasn't put up", the Senate's top two Republican leaders found merit in the counterpoint to Reagan's big-deficit budget.

Majority Leader Howard Baker Jr. & F. Perr, in his most notable effort and produce a surplus in 1985, the White House yesterday forecast a deficit of $82 billion.

The plan calls for a one-year, two-stage tax cut, and major reductions in the three-year, $106 billion tax cut plan Congress approved last summer.

In short, Hollings would wipe out 10 percent of the cuts scheduled for this year and trim next year's cut by another 10 percent to half that. In the first phase of the plan, taxes were cut by 5 percent per year.

Hollings and several Republicans said the details of the plan were not as important as the fact that it could be called

Former UN ambassador speaks on third world

By MICHELE DIETZ
Staff Reporter

"The U.S. tends to look at the rest of the world through an east-west lens," Donald McHenry, former U.S. Representative to the United Nations, said in a lecture yesterday sponsored by Student Government.

"We have a tendency not to look at problems of newer countries in the world in terms of our own needs, but in terms of our own experiences," McHenry said. "We try to look at what other countries do, or what we might do, to solve our own problems, but forget the way we did it. We've romanticized our past. Times have changed."

McHenry explained that people of the United States expect quick solutions, but forget that our own history was not that simple. The U.S. tends to forget that we had war and slavery and other such burdens to overcome, and, therefore, get impatient with the third world, McHenry said.

He added that 'Reagan's current policies come from the President's own concept of the United States, maybe even out of Hollywood. He

believes that private enterprise built this country. It didn't, but he thinks it is possible to change the same as his problem with federalism. He doesn't recognize that this country is different in 1982 than in 1790."

McHenry also believes that the United States is often more interested in the situations in these developing countries. "We're at a time when Europeans are more interested in problems third world countries face then we Americans."

"It's the same for any country a very poor report card," he continued. "The time has come to ask ourselves why. Could it be they might be right, and we might be wrong."

Another problem with the way we handle third world crises, according to McHenry, is in our resistance to change. "The Soviets recognize there is going to be change, and with change, instability and turmoil. The U.S. tends to view its cake and eat it too. We talk about change but we are uncomfortable with it.

They tend to be more comfortable with the

The Observer

Observer stands behind its stories

John McGrath
Editor in Chief
Inside Thursday

The past week has been somewhat more lively than usual. It is a balance of several factors. On one hand, the campus, particularly during the start of student semester, the un

daying leaf issue and the resignation of Fr. Conyers on the second floor of the business administration building. The Observer was "unfair and misleading" because it gave the impression that he was throwing in the towel in the face of the administration. The Observer's al

ditches with the administration in the story because we knew that he was also writing for a newspaper.

On another front, I'd like to set the record straight about our coverage of Fr. Conyers' resignation. Last Tuesday we ran a top priority story on the front page of the Observer report

ing the news of the rector's decision to resign along with an accompanying excerpt from the letter that Fr. Conyers had written and posted in Keenan Hall. The night before publication, I talked to Fr. Conyers on the telephone and asked him about the publication plans, including the printing on his letter. I told him that it was our policy to publish the letter as written, and that if he had any objections, he should let me know.

In the case of our article, we did not include the full text of the letter, but instead quoted a portion of it. We felt that our readers deserved to hear the rector's own words, and that publishing the entire letter would not serve the interests of the students or the university.

As a result, we published a news story that quoted from the letter, and included an excerpt from the letter in the body of the article. We did not make any editorial changes to the letter, and we made no attempt to alter the meaning of the rector's words.

We regret any inconvenience this may have caused the rector, and we apologize for any misunderstanding or misinterpretation of our reporting.

Thank you for your understanding.

The Observer
Jones speaks on sexual asymmetry

By ROBERT MAROVICH

"Men and women bring different needs and expectations to marriage," explained E. Michael Jones, editor of Catholic Digest, during a lecture on "The Asymmetry of Sexes" at the University of Notre Dame.

The lecture, sponsored by the Thomas More Society of Notre Dame, was originally scheduled for March but was rescheduled for later in the month. Using examples from sources in American literature and the Gospels, St. Paul, Jones stated that an asymmetric marriage situation is beneficial for a stable family relationship. According to St. Paul, each man needs to love his wife as he would love himself, and each woman needs to respect her husband. Jones asserted that the man also needs to carry authority in the household and that the woman needs the security that the male can bring, as a result, the male and female would search for other ways to satisfy their needs. Jones paraphrased Washington Irving's "Rip Van Winkle" to give examples of sexual asymmetry. In the story, Rip was a "heavenly" husband whose family authority was frequently questioned by Dame Van Winkle, who, according to Rip, was "a shrew" and a "shrew." In the Van Winkle household, Jones explained, the asymmetry was broken.

Governors disapprove of New Federalism

WASHINGTON (AP) — President Reagan's new federalism is running into fresh opposition from governors who say the domestic programs they would inherit are being stripped down to pay for record increases in defense. The result, some say, could be higher state taxes.

Republican and Democratic governors alike are calling for a re-examination of administration priorities while looking for new sources of revenue for their financially squeezed state budgets.

Gov. John Spellman of Washington, a Republican elected in 1980, said the 1983 Reagan budget, if approved by Congress, could force him to seek an increase in state taxes.

"This state is in severe financial distress now," he said, noting that his administration already has had to absorb $400 million in federal cutbacks.

Democratic Gov. James B. Hunt of North Carolina also predicted state taxes would be forced higher by the Reagan budget.

The National Governors' Association holds its midwinter meeting in Washington beginning Feb. 21, and Hunt said he would ask the governors to consider an alternative to Reagan's new federalism plan to shift 40 programs to state and local governments.

"I think we'll come up with some grand swap idea, but it will not be the president's plan," Hunt said.

None of the more than 30 governors who responded to an Associated Press survey offered an unequivocally condemned or endorsed the Reagan budget and declined comment.

There was widespread opposition to Reagan's plan to increase defense spending by 18 percent. The projected 391.5 billion deficit also prompted concern among governors.

Film Club broadens impact

WASHINGTON (AP) — President Reagan refused to retreat yesterday from his plan for reducing inflation in the years ahead even though he acknowledged the nation must endure the highest unemployment in decades and a recession along the way.

In an economic report to Congress, Reagan also held firmly to his record-deficit budget and predicted that his tax-cut medicine would nurse the nation back to a "vigorous economic recovery" this year.

At the same time, Federal Reserve Chairman Paul A. Volcker vowed to hold to an anti-inflation course of slower money growth. And he warned congress that without smaller deficits, "we would be on a колл-

sion course" between the need for economic growth and the lack of money for lending to finance that expansion.

Volcker told a committee that the independent Federal Reserve Board, the nation's central bank, will not waver from its policy even if Congress tolerates deficits approaching $100 billion a year.

Reagan's new budget plan predicts record deficits averaging $91 billion from 1982 through 1984, but the figures assume Congress will approve savings averaging $80 billion a year.

Volcker's comments appeared to bolster arguments by Reagan's critics that the Fed's tight-money policy along with Reagan's huge deficit policy will drive up interest rates again as the government and private borrowers compete for a limited supply of capital.

But Reagan's 215-page economic report cited no ground to the critics' prediction that giant steel deficits will keep the economy in an ever worsening downturn.

"I am convinced that our policies, now that they are in place, are the appropriate response to our current difficulties," Reagan said in a statement with the annual report. The report was prepared by his Council of Economic Advisers.

Instead, the report stressed the progress the administration is making in reducing inflation and the growth of federal spending, and its commitment to stay on that course.

In the clearest language to date, the administration acknowledged essentially that it is fighting inflation with a recession and high unemployment, at least temporarily.

The report acknowledged the "short-lived trade-off between unemployment and the rate of inflation" and said "this means that the policies designed to reduce inflation initially will temporarily increase unemployment and reduce output growth."

Using current technology

Molinelli designs space station

BY MICHAEL WILKENS
Staff Reporter

The concept of a space factory manufacturing aluminum for the development of a space colony may seem like a far-fetched idea, but for fifth year architecture student Michael Molinelli, that idea is a definite possibility.

Molinelli has designed exactly such a project as an entry in the 22nd Annual Reynolds Aluminum Competition for Architectural Students. Molinelli’s entry will represent Notre Dame in national competition later this month.

Current technology would enable the production of a space colony housing 10,000 people in as little as 10 years, but Molinelli’s design is a sort of “middle step,” a space factory housing approximately 300 workers.

The ship would actually be a factory as well as a dormitory, launched in pieces through a cargo hold similar to the Space Shuttle and later assembled in space. The ship would be located in a position where the earth’s gravity and the moon’s gravity produce a zero gravitational mode which would enable the ship to remain stationary in space.

The design of the ship uses aluminum for the structure and the skin. Aluminum is used since it is cheaply transported into space and also since there is no need for the strength of steel due to the lack of gravitation in space. The design is modular in design. Expansion of the factory could be done by simply attaching new sections of the factory to the existing frame. The structure is actually a series of tetrahedrons and pyramids forming a truss, aiding in the case of the ship’s expansion.

The factory of the ship would use a photoelectric power station to supply energy to a moon base as well as the ship itself. The moon base would use this energy to power a mass driver that would propel dirt into space. This “moon dirt” would be put through a process called reduction to be transformed into aluminum.

The design of the ship is a circular ring rotating at three revolutions per minute to simulate the earth’s gravity. The ship’s workers would work two week shifts consisting of 12 hour days, similar to the shifts taken by workers on oil rigs. At the end of the two week shift, the workers would return to earth for a rest period.

There are many advantages to constructing a factory in space instead of on earth, according to Molinelli. Through the availability of energy, resources, and with the aid of weightlessness, the economics of the factory would be much better in space. In addition, aluminum could be produced without digging up the earth and without polluting the earth. Energy could eventually be produced in space at one-tenth of the cost of producing energy on the earth.

The aluminum produced in space could be used to construct other space factories or even to produce space colonies. Excess aluminum could even be returned for use on the earth.

None of this plan is out of the reach of current technology, Molinelli noted. The biggest drawback of the plan is that private industry is discouraged from undertaking such a project since any profit taken from mining space must be shared with all nations.

Though plans for the colonization of space or even for the construction of factories in space may seem far-fetched, the continued advancement of technology has made these ideas very real possibilities. Once one company decides to use space as an aid in production, the possibilities for using space are virtually limitless.
**Rural American Women Director speaks on Appalachia**

By LESLIEANNE WADE  
News Staff

Marie Cirillo, Regional Co-Director for Rural American Women, discussed her life and work in Appalachia last night in Carroll Hall at Saint Mary's. This was the first in a series of lectures on "Christians and Justice" to be presented on the topic of "The Role of Women in Rural Appalachia."  

Ms. Cirillo began by describing herself as "more of an activist than anything else." She has worked as a Rural Community Developer in Appalachia for the past fourteen years. This organization is committed to community development with an emphasis on the role of women.  

Cirillo said: "Rural is living everyday with an awareness of your dependency on the land and the land's resources. The people of rural communities truly know the importance of this relationship with the land. They use the land for food, shelter and fuel. They are forced to understand not only social relationships but social relationships in harmony with ecological relationships."  

Cirillo pointed out that a significant number of poor Americans inhabit rural America. She spoke of the contributions these people can make and emphasized that such people have a unique perspective on the world. "Rural poor have the experience of having to destroy the land they love to bring in needed money. They work in coal fields and lumberyards. They have a unique consciousness of the world because they've been forced to leave rural life and move to urban communities. They probably have a key to the future from seeing that."  

Cirillo describes her work in Appalachia as "catalytic." The women who are members in her groups needed only to be motivated and guided. Their strength came from within.  

A woman from Cirillo's Rural American group spoke of her own experience as a woman in Appalachia. She said: "We want pride and we want dignity. I don't want to go on welfare. I love my mountain land but it's so hard to earn a living."  

The "Rural American Women's Group," under the guidance of Marie Cirillo, utilizes the strengths, desires and talents of such women. One of the group's current crafts a craft store that promotes crafts made in Appalachia. Another runs a summer youth program that provides education and recreation for the children. At the same time, the women staff the center receive an education and a new sense of themselves.  

Ms. Cirillo spoke of the unbelievable strength of the Appalachian women desiring to work for their land, their families and their community. "I believe education and guidance previously hindered these desires. People like Cirillo changed that," Cirillo said, "I have learned that in social justice you can't do all to change the world. You are lucky if you can change yourself."  

Marie Cirillo is working with the women of Appalachia to make them more aware of themselves. In a sense, she is encouraging changes in the people. She is changing a small part of the world.

**At Madrid conference**

*Haig warns allies about gas deal*

LISBON, Portugal (AP) — Secretary of State Alexander M. Haig Jr. said yesterday that Western allies are in close agreement on condemning Poland's martial law, but he added that they probably will not have a major European plan to participate in a $2.5 billion gas pipeline project with the Soviet Union.  

Haig said the Reagan administration hopes the Europeans will reduce or cancel their plans. He spoke at a news conference in Madrid, where he addressed the 35-nation conference on European Security and Cooperation which is reviewing the Helsinki accord promising human rights.  

Haig said Tuesday that there could no longer be "business as usual" at the Madrid conference because of the Polish crisis. He said that Chief U.S. Delegate Ambassador Max M. Kampelman would continue to discuss the Polish crisis to the exclusion of other conference business.  

Haig flew to Lisbon yesterday for talks with Portuguese leaders on the economy and continued U.S. efforts to get a base on the Azores islands.  

The Reagan administration has consistently opposed the natural gas project. But Haig's statement appeared to reflect the administration's frustration that the Europeans have not abandoned the project in the face of what the United States considers Soviet instigation of imposition of martial law in Poland.  

The European involvement, especially the financing, is considered vital to the Soviet project. The European nations maintain they need the gas to meet their future energy needs.  

Farms in West Germany, France and Italy are completing agreements to purchase gas when the pipeline from Siberia to Europe is completed in 1984. Other Western European nations likely also will purchase Soviet gas.  

In addition, European banks have arranged much of the financing and guarantees will be involved in the project.  

Haig said the administration had high great concern that our West European partners not permit themselves to become overly dependent on eastern sources for natural gas or any energy project.  

The Haig administration is preparing new energy alternatives for the Europeans to consider. He acknowledged that proposals submitted previously, "were not attractive sufficiently."  

**Spirit of Solidarity still strong in Poland**

GIOANK, Poland (AP) — A worker in the giant V.I. Lenin shipyard looked around, and then spoke quietly when asked about the future of Poland's free labor movement, suspended by martial law Dec. 13. "Solidarity was here, is here and will be here," he said.  

One after another, workers standing and talking briefly in the bone-chilling winter cold of the shipyard where Solidarity was born echoed a similar theme. They want their independent trade union back.  

Eighteen months after the August 1980 strikes launched an agreement with the Communist authorities to establish the union, workers are saying they want the return of a trade union, independent of state and party control.  

Solidarity, the first such union in the Soviet bloc, was suspended by martial law. Its leaders, including President Lech Walesa, were arrested and charged with conspiracy to overthrow the government.  

"Trade unions in this country cannot be confined strictly to union affairs," Walesa said. "They play some political role, and this is not possible, there will be another August."  

Many workers said they want to elect their own union leaders by their own workers, and that Solidarity should be reborn as their trade union, not a centralized, state-run body.  

"I'll never join another (state) trade union," one worker said in Gdynia, 15 miles northwest of this Baltic city that with the port of Gdynia is a key area paralyzed by strikes during 1980.

Can Israel survive Begin?

William Buckley

On the Right

Israel’s leaders are so preoccupied with the threat to their own power that they overlook the fact that the problem of Israel’s survival is not a political one, but a moral one. The survival of Israel is not at stake, but the survival of the Jewish people. The current crisis is a crisis of identity, a crisis of purpose, a crisis of values. The leadership of Israel, both political and religious, must take responsibility for the survival of the Jewish people and the survival of Israel.

Jenny Pitts

Anthony Walton

How do I love thee...?

There has been much discussion about the meaning of love and its various forms. Love can be conditional, unrequited, or unfulfilled. It can be expressed in words or actions, or it can be kept hidden. Love is a complex emotion that defies simple definitions.

The Observer

The Observer is an independent newspaper published by the students of the University of Notre Dame du Lac and Saint Mary’s College. It does not necessarily reflect the policies of the administration of either institution. The news is reported as accurately and objectively as possible. Editors represent the opinion of a majority of the Editorial Board. Comments, opinions and letters are the views of their authors. Column space is available to all members of the community, and the free expression of varying opinions on campus, whether letters, is encouraged.

"That's what turned it around. "That's the Notre Dame we've come to know and love," she added when told of one past's post-game question. Who was that team that played the second half? "I feel like I've been on To Tell the Truth!" the past couple of weeks — you know. Will the real Notre Dame team please stand up?"

Stand up it did in the second half, after taking an 18-point first-half disadvantage through the first half, only to be out-scored 10-2 over the last seven minutes.

Notre Dame entered the dressing room with a 6-26 edge, but Taylor left the floor with the momentum, thanks in large part to St. John's, and a 52 percent shooting chart.

"They shot a good percentage from long range," DiStanislao said, "but we knew that's where they did their scoring from. It was just a lack of concentration." Although the Irish shot even better in the second half (54 percent), they took only 13 shots, in Notre Dame's nation-leading defense, forced 14 second-half turnovers, including one 30-second violation and a muster of forced shots with time running out in the shot clock.

The Irish themselves were denied from the floor in the second period, as DiStanislao's transition game shifted into high gear. Twelve of the 19 Irish field goals in the period were layups, and over all, Notre Dame connected on 68 percent of their shots. For the game, Notre Dame shot 57 percent.

"I think in the second half, we started treating the situation as isolated," said DiStanislao, who raised her coaching record at Notre Dame to 25-22. "We were breaking things down into situations that we could handle with basic fundamentals." The Irish did cut down their turnovers in the second half, committing only 10.

They finished with 22 for the game.

Taylor, meanwhile, committed 54 turnovers for the game, and Notre Dame set a new season-high for steals with 20. Free of them belonged to Laura Dougherty.

GYMNASTICS — The men's gymnasts lost last weekend to School Craft at Flushing, Michigan by the score of 121.55 to 115.2.

Club President Brian McLaughlin, however, is more pleased with the progress of the young squad than anything else. "This is the youngest team we have had in my four years, but it also the best. It's just going to be a matter of gaining more experience from the meets." The team was led by Ed Barrett and Ian DeLeon who both put in first place performances in their events. Barrett had a score of 6.65 in winning the high bar competition while DeLeon had the same score in winning the pummel horse bar. Barrett also scored a second-place finish in vaulting with a score of 8.0. McLaughlin was third in vaulting with a 7.95 score. McLaughlin, who placed fourth out of 15 people in the all-around events, also chalked up a second place finish in the parallel bars with a score of 5.9. The most pleasant surprise was turned in by freshman Tom Treat who in his first gymnastic competition ever finished in second place in the floor exercise. Between nine and 11 people competed in each event. Denise McGalih was once again outstanding in the women's exhibition meet as she put in scores of 9.0 in the vault, 8.5 in the floor exercise, 7.7 on the balance beam, and 6.8 on the parallel bars. The squad will compete this Saturday at the University of Miami in Ohio.

"Don't ever expect me to say I'm 100 percent of how we've done," said coach Dan McGuffey (Carlisle, Kentucky) as the Irish swimmers have taken the No. 1 spot in the first half of the season. "We're still in the process of building a solid foundation. We've been working on technique and I think we're making strides."

"But we're not going to say we're not going to win," added coach Dan McGuffey. "We're in the process of building a solid foundation. We've been working on technique and I think we're making strides."

"But I think in the second half, we started treating the situation as isolated," said DiStanislao, who raised her coaching record at Notre Dame to 25-22. "We were breaking things down into situations that we could handle with basic fundamentals." The Irish did cut down their turnovers in the second half, committing only 10.

They finished with 22 for the game. Taylor, meanwhile, committed 54 turnovers for the game, and Notre Dame set a new season-high for steals with 20. Free of them belonged to Laura Dougherty.

OSU Buckeyes fight for tourney berth

COLUMBUS, Ohio (AP) — Ed Don Miller, Ohio State's basketball coach, refuses to admit the Buckeyes are out of the Big Ten Conference race before they play at Purdue tonight.

Ohio State has dropped three of its last four games to fall into sixth place in the Big Ten with a 6-5 record. The Buckeyes would be tied for at least fifth place after a 60-overtime loss to Purdue in Columbus last month, Ohio State has played a Big Ten record six overtime games this season, winning three of them.

Ohio State will face a revamped lineup against Purdue, 9-10 for all games.

Pittsburgh (AP) — Defensive tackle Jojo Greene, the original building block of the Pittsburgh Steelers dynasty and cornerstone of the Steel Curtain from four, said yesterday he was retiring after 15 seasons.

Greene, 35, announced his decision at a luncheon at the Allegheny Club in Three Rivers Stadium, where he had been a scoundrel of opposing quarterbacks, running backs and defensive linemen.

This past season, however, Greene was relegated to part-time status as the Steelers gave more playing time to Tom Beadles and experimented with a three-man line.

Greene played in 10 pro bowls and was unanimously chosen for the National Football League's team of the decade for the 1970s. He was Chuck Noll's first draft choice when Noll took over the team in 1960.

His coaches at North Texas State called him "a foot on fence," although heading in a Pittsburgh newspaper head "Jojo Who?" after Greene was chosen as the fourth player overall.

The 6-4, 260-pound tackle earned the nickname "Mean Joe" because his college team, the Eagles, was called the Mean Green.

He would be known forever as Mean Joe following a tumultuous rookie season during which the Steelers went 1-13 before blossoming into one of pro football's all-time powerhouses.

Greene was twice thrown out of games as a rookie. Once he belted quarterback Fran Tarkenton, then with the New York Giants, well after Tarkenton had released a pass. And he was later batted for fighting with Minnesota lineman Jim Vellone.

In addition, the NFL fined Greene $500 for knocking out several teeth from Cleveland center Bob DeMarino later that year.

More recently, Greene won a Clio award for his acting in a soft drink commercial and was the subject of a television movie that ironically dealt with his retirement.

During Greene's illustrious career, the Steelers transformed themselves from NFL doormats to win four Super Bowls in six years.

More possible
First and a chance to fresh list

By KELLY SULLIVAN
Sports Writer

New Dame signed a total of 24 high school seniors yesterday and may add one or more in the next week, according to athletic director Greg Fournet. In addition to those mentioned in Wednesday’s Observer, the Irish added running back Par Barteau (Pueblo, Colorado), defensive back Mike Haywood (Houston, Texas), and defensive lineman Eric Dorsey (McLean, Virginia). One name on yesterday’s list, tailback Regis Dupard (Kenner, Louisiana) is still undecided, and probably won’t announce his choice of colleges until after he takes his visit to Southern Mississippi.

“Our coaching staff did an excellent job once again,” said Fournet. “They got an early lead on the seniors, and stayed on top of the whole season. And they were successful despite a season-ending injury to linebacker. The worst five weekends of this winter were our heavy recruiting weekends. Yet the very worst day of weather was our best day as far as recruiting verbal commitments,” he added.

Many of those commitments came from Chicago’s prep stars. The Irish signed with in the sprint events from that area, and the talent was considered to be the best in the nation.

“George Kelly (infielder catcher) is in a reason way with me, added Fournet. I got on his back for not bringing any Chicago players in last weekend. He was able to call him out and the kid did a heck of a job this season.”

There was a couple of prospects that disappointed the coaches by not signing. But most of those that did said ‘Our team is going to be better next year’. You’re going to lose some every year.” Eleven seniors that Notre Dame wanted either did not sign or make visits here.

The Piercet’s from Michigan picked up some speed with the ’82 recruits. He named eight players with 40-yard dash times of 4.4 or 4.5, and said no
