Age of women

Flaherty calls for new model

By PETE JOCCA
New Staff

Emphasizing that women must have a complete and positive understanding of them­self, Sr. Helen Flaherty urged women to move away from the image of women as "filled with struggle, doubts, and sexual pleasure." She called for a new model of safety and property and suggested that women must know the image of what it means to be human. To do this, she said, society should emphasize the cultural background, education, and empowerment of women, and that the time of emancipation is now.

She also pointed out that the University of Notre Dame is one of the few institutions where women must make up for the missed meals and extremely tasty - not to mention the stress - of being a woman. While attempting to locate a company representative who could legitimate its actions, she discovered that the company has no phone listing in the metropolitan Atlanta area. Also, the company's post office box is registered in the name of Mr. and Mrs. Jackson. This is interesting enough, but there is no longer available in a hard-bound edition, and can be purchased in paperback at a local bookstore for $2.30.

The form which the company has sent out guarantees to deliver food that is "nutritious and extremely tasty" - not to mention a source of energy to make up for missed meals and stress. It is registered in the name of Mr. and Mrs. Jackson. Interestingly enough.

A company selling exam survival kits to parents and students has no official merchandising representative on campus, according to Student Activities Director Joe Joseph Russo. The distributor of the survival kit, the company has sent order forms to the parents and students, but the price is $18.75 to $23.50. These prices are lower than at K-Mart, but the prices are generally no higher and often lower than at other college bookstores. In all cases, the Notre Dame price is beaten only at campuses offering a low price for the same book.

El Salvador elections

Hesburgh prepares for 'war zone'

By MARK BOENINGHAUSEN and BOB VONDERHADE Staff Reporters

The Notre Dame Bookstore may not have prices like K-Mart, for the prices are generally no higher and often lower than at other college bookstores.

The bookstore manager, Brother Moran, thinks the store is well respected in the college field and "wouldn't trade it for any other." The bookstore is owned and operated by the University and any profits generated by the store are put back into the general fund, said Moran.

Moran added that ownership and operation of a bookstore by the University is the norm in the bookstore field, though there are exceptions, such as Harvard and Yale. At these schools, the stores are run as a co-op. Students pay $1 to join the co-op and then at the end of the year the students receive a dividend determined by the amount of purchases they made. Moran commended that Harvard’s bookstore has had no problems in the past where no dividends were paid.

Problems are caused at bookstores because of the nature of the business. Textbook ordering is difficult for a store, said Moran, since many professors do not decide what to order. As a result, books are ordered and then returned at a cost of $2.99 at the University of Kentucky to $3.90 at Cal Tech. Taken in sum, the prices at the Notre Dame bookstore are very competitive with those of other college bookstores.

News Briefs

WIND GUSTING UP TO 60 m.p.h. toppled a power line that sparked a $50 million firestorm Wednesday, burning more than 50 buildings, leaving up to 1,500 people homeless and injuring at least seven, authorities said. The fire apparently started about dawn when a live wire, whipped by the wind, touched a palm tree and turned into a towering torch, then the wind swept the flames a square mile just north of Disneyland. Anaheim Fire Chief Bob Simpson said it was the biggest in Orange County's history and estimated the damage at $50 million, adding, "We believe there are no fatalities." Gov. Edmund Brown Jr., who flew over the burn area, called it "like some kind of war-ravaged area," and declared a state of emergency in Anaheim. (AP)

RETIRING ADM. HYMAN G. RICKOVER, who pioneered America's nuclear-powered Navy, says the Soviet Union and the United States "have too many weapons. The proper thing to do is to try as hard as possible to stop producing not only nuclear arms, but all arms," said Rickover. R. Rickover spent 63 years in the Navy. For more than half that time, he ran the Navy's nuclear propulsion program. Rickover spoke Tuesday night at Ball State University urging the audience to become more involved in the government's use of nuclear power. But he said he was not assailing congressional and private business, the White House confirmed late Wednesday, church officials said.

FIREFIGHTERS FIGHTING A BLAZE is a chartered grain elevator where five men were feared dead today and wire water through up to six miles of hoses following a building explosion. Towers of concrete chunks of concrete a mile away. Officials said they thought the explosion, which injured 22 people, sprang from grain dust ignited by a spark. Firefighters struggling to battle flames fed by high winds complained of low water pressure, but were unable to approach the hydrants closest to the blazing structure because of heat and rabble. Hoses were hooked up to hydrants ranging from a half-mile to six miles away from the 56-year-old elevator, across the Missouri River from Omaha. The fire was expected to take several days to extinguish. (AP)

HON. BOBBY INMAN, the deputy director of the Central Intelligence Agency, is resigning to enter private business, the White House confirmed late Wednesday. Inman is immediately available for comment, but the White House released an exchange of letters dated a month ago - in which Inman asked to leave as soon as a successor could be confirmed. President Reagan accepted the resignation "with deep regret." The four-star admiral's speciality is high technology surveillance. He moved through a succession of intelligence jobs until he took over as the No. 2 official, behind CIA Director William Casey. There was no immediate word on a successor. Traditionally, one of the top two CIA jobs at the agency goes to a civilian and the other to a military officer. (AP)

THE FIRST GROUP of Roman Catholic pilgrims allowed to enter Poland since the imposition of martial law last December arrived Pope John Paul II's weekly general audience Wednesday, church officials said. The group of 40 held up a large red and white Polish flag, then Polish-born persons spoke to them in their native language, declaring that neither men nor nations "can live without truth and freedom." A member of the group, a student from Poznan, said, "We demand our freedom, our rights from God and the Vatican." He added, "The Vatican has no emergency lighting system, in addition to other potential safety hazards. He adds, however, that he believes Maintenance Director Donald Dedrick is trying to keep "We're staying ahead of the storms," he said. service is being performed up. "Hopefully, they're going to save lives," he said. (AP)

Floors in Keenan. Although repairs for the stairs have been approved, no action by Maintenance has been seen. Keenan was a physical wreck when I took over," Conyers said. "Now we're fairly con­ consulted, and all our offices. The University supported and encouraged us in upgrading the quality of our dorm. "It took years of planning and participation. Initiative must be taken within the dorm, according to Conyers. "Structural renovation is more important for dorms such as Farley and Sorin, which are mostly wood." Conyers believes that when dorms are old, priorities should be re-evaluated. St. Mary Lou Marchetti thinks emergency lights will be installed in the necessary dorms as soon as possible. "Although the electrical wiring is scheduled to be removed during the summer of 1983, she noted that the emergency lighting situation surfaced after the wiring agreement, and is confident that the emergency lighting will be installed immediately.

"We believe there are no fatalities." Gov. Edmund Brown Jr., who flew over the burn area, called it "like some kind of war-ravaged area," and declared a state of emergency in Anaheim. (AP)

Inside Thursday

Dorm safety deserves careful eye

As the academic year draws to a close and students face the burden of making living arrangements for next semester, a long, serious look should be taken at the structural safety of the residence halls, and what can be done to improve them. Three incidents of note regarding dorm safety occurred this semester: two power failures on the North Quad and a serious break in Sorin. After the second North Quad outage, it was reported that there are no emergency lights in several dorms; Farley, Breen-Phillips and Cavanaugh to name a few. Keenan resident Rick Conyers noted that Keenan has no emergency lighting system, in addition to other potential safety hazards. He adds, however, that he believes Maintenance Director Donald Dedrick is trying to keep "We're staying ahead of the storms," he said. Service is being performed up. "Hopefully, they're going to save lives," he said. (AP)

Bellalta stresses work 'obligation'

By SUSAN O'HARA
News Staff

Proving that 'Work is good for the environment' was Professor Jaime Bellalta's main objective in his lecture, 'Hospitality is for Working Householders,' delivered last night in Saint Mary's Carroll Hall.

In the last of the 'Christian and Justice Series' of lectures, Professor Bellalta stressed the 'moral obligation' we have to work, noting that work is 'a good thing for man because it develops him, makes him what he is.' Prof. Bellalta also stated work 'helps in forming a family and establishes the first school within the home.' Also 'work is the basis of cultural and historical links.'

Prof. Bellalta also discussed the subject of leisure, saying, 'leisure does not exist for the sake of work but rather that leisure helps to fulfill the sphere of human activity.'

According to Bellalta, leisure by itself is a form of silence since it is not productive in and of itself.

Bellalta added that as products of our environment we tend to see only what we are conditioned to see and ignore what we believe to be unusual or out of the ordinary.

Work is necessary to improve our environment, according to Bellalta, and through work we develop a respect for our surroundings and as a result we help to curtail the negative aspects of our society.

Leisure also helps

'Professions' series

Sinclair focuses on engineering

By LAUREL ANN DOOLEY
News Staff

Focusing on the close ties between engineering and the American way of life, Professor Bruce Sinclair concluded the 11-day lecture series on 'The Professions in American History,' Tuesday night at the Century Center.

A professor of history at the University of Toronto and an award-winning author, Sinclair dealt with the changing role of American engineers and the problems of the profession.

Stating that 'engineering incorporates some of America's most cherished ambitions,' Sinclair views the profession as solidly connected to national goals. 'Technology is the nationalistic expression of the mass.'

The field was at first considered a battlefield, but as a profession, it is now considered a subject of leisure, saying, 'Men's club culture' in early engineering societies, according to Sinclair. He said, however, devotion to ambition, hard work, and success together with a self-image of being hard-working and hard-playing have prevailed.

A panel consisting of the vice president of engineering of the Beaux Corporation, the president of a resource management company and the Dean of the College of Engineering at Notre Dame later discussed current problems in the field with much participation from the audience.

Expanding bureaucracy was cited by Sinclair as a major drawback with regard to innovation. "It seems that engineering functions better in smaller firms," he said.

Extreme specialization was seen as a weakening force in terms of political lobbying and the rate of technical progress was considered to be sharply decreasing, due largely to governmental regulations.

'Dealing with life'

Poet Tillinghast utilizes maxim

By ANNE MONASTYRSKI
News Staff

Dealing with life as you find it is the maxim on which American poet Richard Tillinghast based his poetry. Tillinghast read a selection of poems, 'Aspens and Colorado Photographs,' 'Return,' Tillinghast said, 'The poem vividly relates one of his childhood experiences with his father's old pocketknife.

Many of his poems describe weapons and images of violence. Tillinghast commented on his use of weapons and violence as imagery, saying "If there weren't violence in the world, there wouldn't be any in poetry."

As an introduction to his poem 'Aspens and Colorado Photographs,' Tillinghast said, "The poem is an interesting and valuable subject for poetry. But history should do more than reflect the social and economic forces effecting past times. It should try to give a sense of how people felt. Would they be exactly the same? What would it be like to walk down a small town Colorado street during the 1920s?"

A graduate of Harvard University, Tillinghast has taught at the University of California at Berkeley, but is recognized for his involvement in the college program at San Quentin Penitentiary.

Services for Garner on Friday

Archbishop Lawrence L. Graner C.S.C., formerly archbishop of Dacca, Bangladesh, died yesterday morning at Center Hall. He was 81.

Graner was born in Franklin, Pa., in 1915, and entered the Holy Cross Seminary in 1935 as a freshman. He was ordained June 29, 1941, and was consecrated a bishop April 21, 1947 by Cardinal O'Hara. He was named Archbishop of Dacca in 1950 by Pope Pius XII.

The body will be exposed at Moreau Seminary from 3-30pm today. Services will be Friday at 7:30pm in Moreau Chapel. The funeral will be Saturday at 10am in Sacred Heart Church.

... Flaherty

continued from page 1

"The importance of knowing one's personal history is to know that it need not stay static. The real woman gradually emerges when she accepts who she is," Flaherty said.

Flaherty commented that women have difficulty with power since they associate it with men or with evil. Asserting that power is brought out in women when women implement its "nurturing" and "integrative" qualities. "The mystery of every woman is that she has the power to be co-creator, she has the power to be a life-giver," Flaherty said.

Praising this life-giving mystery of womanhood, Flaherty remarked that "women are in absolute tune with the universe." Flaherty determined that the dehumanization and violence perpetrated by our involvement in Latin America, the economic fear and depression caused by repressive budget cuts, abortion and nuclear war are the major immoral issues facing us today. Calling women "peace makers," Flaherty called for women to attack these problems on the grounds that they are "aberrations of life and therefore are women's problems."

"Women because of their wisdom, mystery and power are the greatest hope for peace," Flaherty said.

Citing the intimate experience women have with pain and hardship, Flaherty concluded, "God is calling women to shift the tide of destruction."

Praising the emergence of women at Notre Dame, Flaherty concluded by calling for women to unite and to share their personal experiences. She added that women must read and study the works of women in order to create a brighter future for themselves.

Flaherty's appearance concluded the Distinguished American Women lecture series "in style," stated Sr. John Miriam Jones, assistant provost at the University. Some 2000 people have attended the seven-lecture series. The fine response to the series raises the possibility of obtaining an endorsement for continuing the series.

The south and around the capital where most of the violent political struggles have taken place, trying to make some telling visits to polling places in the eastern region.

In general, it was agreed that more than one of our official group should go to the east, and since Congressman Jack Murtha had already arranged to be one of the two, I volunteered to be the second.

There had been only one extra place on the helicopter and that was assigned to a State Department official named Joe Sullivan, mainly because he knew Spanish. Since I also can speak Spanish, I suggested that I take his place. The whole group was agreed, and Joe Sullivan agreed to give me his place, obtaining thereby a good deal of publicity for the part of the others. In any event, that’s where we stand now.

The security people will be looking at the picture in the eastern area, and in the morning when we get together at seven o’clock, and all things being equal, which they almost never are, Jack Murtha and I will be going out on the copilot with a television camera.

We’re going to try to enter some of the cities. There are the guerrillas say they are in control and perhaps by landing there and encouraging the people who are voting to do so, we should be able to give a body blow to the guerrilla forces. It’s a fairly far-fetched thing, but it is all of us on all of us that unless we do this, we are not really going to pass muster with the large press corps here who are not able to get answers to the questions we really want to see that someone does and checks the voting situation.

When we set out, I thought, I am calling it a night because it is going to be a long morning for Mass and rendezvous at seven o’clock for the final readjustment of the security information is available.

...Hesburgh

Sunday March 28

This is the day for which everyone in this country has been waiting for so long. I think I can say in all honesty that it was for me one of the most exciting, most demanding, most dangerous, and most satisfying days of my life.

As I probably have indicated earlier, we were divided into four groups, A, B, C and D. Group A, the one that I am part of, is leaving for the east and north and will be involved in looking at the election in all of those regions which are called in Spanish “fotivosis,” that is to say where the guerrillas claim to have control.

Presumably, they will try to cancel the elections in that part of the country and will take a very dim view of our coming in to see what is happening. There are about 6000 guerrillas in the country and the greatest number of them in this area which they claim as their own, we can only look forward to serious trouble. Group B is going in the opposite direction out to the west. Group C along the coast towards Liberia, and Group D will be concerned with the voting in the capital area.

There was a real sense of tension in the room as the confidential Embassy assessors handed us our reports. First, they excused the media, even though some of them were going with us. Looking around the room, one found people in bulletproof vests and other kinds of protective equipment. No one was feeling very confident about the day ahead. We are about 6000 guerrillas in the country and the greatest number of them in this area which they claim as their own, we can only look forward to serious trouble.

In any event, we were ready to leave about 9:15. The preparations were a bit grue­some, since we were all issued flak jackets, which we put under our seats so that if we were shot at from the ground, there might be interpreted before giving us. Also, the helicopter was rather heavy with our equipment and many boxes of ammunition, so that in the event we were hit in the air or crashed on the ground, at least those members of our crew who could handle its weapons could defend us.

I had made up my own mind that I wasn’t going to show anyone, but I was somewhat happy to have a colonel in the Marines, namely Congressman Jack Murtha, sitting next to me. He seemed to know all about all of the weapons present and was prepared to use them if necessary.

THE COMMODITY CREDIT CORPORATION will soon demanded that the Federal agency make good on Poland that are overdue, a Commodity Credit reimbursement for federally guaranteed loans to

THE UNITED STATES HAD the highest standard of living among industrialized countries in 1980 and, as a result of the strength of the dollar on foreign exchange markets, very nearly the highest prices, according to a study of 17 nations. The study, by the Organization for Economic Cooperation and Development in Paris, represents a fresh approach to a longstanding problem of comparing economies with different currencies and price structures. The 24-nation organization has embraced a method that adjusts economic activity in individual countries by using an index known as "purchasing power parities." The index is based on the actual cost in each country of a representative group of 1,300 goods. In the past, most efforts to compare economies have relied on exchange rates, a less accurate measure, according to the O.E.C.D. (AP)

AN INTERNATIONAL ECONOMIST says countries around the world are losing millions of tax dollars because of the flourishing underground economy. Vito Tanzi, head of the fiscal affairs department at the United States gross national product - the value of goods and services produced - is about $3 trillion a year, and Mr. Tanzi estimates that perhaps 8 percent of the GNP is unreported. The underground economy is the reason why government is not able to collect tax revenues. In the United States gross national product, the value of goods and services produced - is about $3 trillion a year, and Mr. Tanzi estimates that perhaps 8 percent of the GNP is unreported. The underground economy is the reason why government is not able to collect tax revenues. In the United States, then drop "concrete" or anyshinhg with enough kinetic energy on the missile, destroy ing it. The second layer of attack is the Global Ballistic Missile Defense System. 432 the non-nuclear satellites could "track down any Soviet intercontinental ballistic missiles in the air or in space" and "launch," and by infrared track ing systems, could send little "bullet vehicles," or destroy the ICBM."

"We were hoping to see a little bit more encouragement there," in the spending figure, said a second official. There was a 0.2 percent increase in March, compared with a 0.4 percent gain in February. And the Commerce Department's new report said Americans' total personal income rose 0.4 percent to a rate of $121.8 billion, the first increase in that category since October, the report said.

But the report said personal consumption spending -- a key indicator for the economy -- rose 0.3 percent in March to $121.8 billion, the first increase in that category since October, the report said.

**Space program tied to defense system**

By ROBERT MAROVICH

"Some Christians point out that religion has given man more control of his fallen nature. I think that we will find out that she new perspective of Space can do the same." In a lecture Tuesday entitled "The Nuclear War and the Space Program: A New Perspective," Mr. Tihamer Toth-Fejel examined the possibilities of using Space for defense against nuclear attacks and as a means of eventually eliminating some of the causes of war.

Toth-Fejel said that it is imperative to realize that our space programs and our military defense systems are not separate, but are part of the same endeavor. The use of space, the exploration of space, the peaceful use of space, is about more than just the exploration of space. It is about peace, as well. The use of space is about more than just the exploration of space. It is about peace, as well.

Toth-Fejel explained that the communication program in Space is prevention of war. Both the Americans and Soviets are using satellites to monitor each other's compliance to the Strategic Arms Limitation Talks. He also pointed out that satellites could be used as a means of surveillance of technology ever found a way to mass-produce them. Everyone could own a standard signal receiver, and war would become much more personal.

Toth-Fejel then outlined the uses of Space in relation to the nuclear arms race. He said that the Heritage Foundation recently proposed a new U.S. defense policy which would destroy Soviet missiles in the air by non-nuclear means. Their defense system consists of three "layers."

The "swarmnet" system, or first layer, would be used against satellite-busting Soviet missiles. This non-nuclear system in Space would track down the Soviet missiles and "slip through the cracks."

The second layer of attack is the Global Ballistic Missile Defense System. 432 the non-nuclear satellites could "track down any Soviet intercontinental ballistic missiles in the air or in space" and "launch," and by infrared tracking systems, could send little "bullet vehicles," or destroy the ICBM."

"We were hoping to see a little bit more encouragement there," in the spending figure, said a second official. There was a 0.2 percent increase in March, compared with a 0.4 percent gain in February. And the Commerce Department's new report said Americans' total personal income rose 0.4 percent to a rate of $121.8 billion, the first increase in that category since October, the report said.

**Consumption falls, income rises**

WASHINGTON (AP) - Personal income rose modestly in March, but consumers spent less on goods and services, undermining hopes the economy had begun to recover.

"I don't know that consumers stopped spending in March," officials said, adding that the reported decline might be masked by sales of new durable goods. "But the report said personal consumption spending -- a key indicator for the economy -- rose 0.3 percent in March to $121.8 billion, the first increase in that category since October, the report said.

**Academy researches natural areas**

Scientists and researchers attending the spring meeting of the Indiana Academy of Science April 23-24 at Notre Dame will have the opportunity to examine the sugar maples at the Bendix Woods Nature Preserve and visit the Indiana Dunes National Lakeshore.

The field trips, including additional nature sites in northern Indiana, are part of the first "Northern Indiana Natural Areas Conference and Field Day," being held in conjunction with the Academy's spring meeting. Dr. Theodore Covello, chairman of the Notre Dame Biology Department, said the combined Academy meeting and natural areas conference is hoped to serve the "overlapping goals" of scientists, researchers, conservation organizations and government agencies concerned with the reservation, research and management of northern Indiana's natural areas.
Sure, he's not Reagan, but... It's so obvious

If you are like me, you are tired of reading about all the troubles in the world and not being able to do anything about them. Unlike the weather, it is not something we can actually do. So let's do something about all the world’s problems.

Michael Molinelli

Pollution, while on the surface seems to be a complex problem, is actually a simple one. Make sure everyone buys electric cars so the air will be clear. Make it illegal to dump any sort of waste into the rivers and onto the streets. Let's reform the prison system so it is more efficient. Remember, the best way to approach and its problems logically, can it come to rest, either nation will be more secure than it was ten years ago. If this is not the case, then it is reasonable to expect that neither nation will be more secure after ten more years of an arms spiral! If the spiral is not halted voluntarily, then where, logically, can it come to rest, except with the final battle?

This week is “ground Zero”, a national effort to raise awareness and to promote open discussions about the nuclear arms race. Concerned individuals of all viewpoints are encouraged to participate in the local events. Today, “Gentle Thursday,” Mass was celebrated at the Grotto at 8 a.m.; there will be a gathering for song and celebration on the South Quad at 4 p.m.

While the world stands poised for war, more voices than ever cry out for peace and justice. The agony which our world now suffers will only add more weight to this cry. Mass is necessary to halt the arms race. We hope to see commencement of a free-thinking university. We hope to see the continuation of the student vote on commencement speakers. We hope to see the continuation of a free-thinking university. We hope to see the continuation of the student vote on commencement speakers.

Steve Mangine

never before has humankind stood closer to the precipice of total destruction; and never before have so many rational people called for an earth, new, guided and guarded by love. While the nuclear stockpiles of both superpowers increase, it becomes clear that the choice of political speakers will be made and made in a context of decisions that will have consequences for our world.

The very existence of these weapons of mass destruction proclaims that men and women are not infinitely valuable sons and daughters of God, each one to be treasured, but mere beasts; that life is not a precious gift, but a burden to be dragged about, for no purpose, until death’s deliverance into the arms of our maker. The bombs proclaim that Christ shed his blood and a fool and a lunatic; that his bones still lie cold in a borrowed grave. The reality of love which we have all known condemns these infernal declarations as lies and blasphemies, slanders against the goodness of God and the glory of humanity.

Though the United States and the Soviet Union have both expended enormous amounts of resources on the development of nuclear weapons in the past decade, is either nation more secure than it was ten years ago? If this is not the case, then it is reasonable to expect that neither nation will be more secure after ten more years of an arms spiral! If the spiral is not halted voluntarily, then where, logically, can it come to rest, except with the final battle?

It’s so obvious
The lead changed hands many times before settling at a 19-19 tie. Janine Garret popped the ball and finally upset the entire tourney. "The Farley Five" fought a long and hard battle before finally upsetting the other teams.

"Hey Let's Play to 11," 21-19. The girls from Farley jumped into the lead on some awesome outside shooting, 6-1. Cheryl Sweeney racked up 10 points; she is also a leader on the court. Limited to scoring, though, as the girls from Farley took 13 games last season.

The girls from Farley jumped into the lead on some awesome outside shooting, 6-1. Cheryl Sweeney racked up 10 points; she is also a leader on the court. Limited to scoring, though, as the girls from Farley took 13 games last season.

Cindy Bartel then tossed in the winning point. Bartel and teammate Sharon Koehler each had seven points.

In another rough game, the last two Saint Mary's teams faced each other. The final score read "Twisters" 21, "The Big Macs" 15. In another great performance, ex-Saint Mary's basketball player Cheryl Sweeney racked up 10 points. Sweeney's talent is not limited to scoring, though, as she is also a leader on the court.

These four teams will gather tomorrow at Stepan to determine who will be in the championship game on Sunday. The two matches tomorrow are at 5:30 and 4:30.

LONDON BOOKSTORE BASKETBALL scores are coming in! This is the first year for the tournament organized by Mike Sullivan and Brian Murray. The four-team round robin tournament began with "Punks Who Dunk" defeating "London Calling" by a score of 15-10. The other contest featured "Lady Di, Three Sports and An Heir," who defeated "Innsbruck Connection," 15-12. London games are played to 15 points because of fees charged for court time, according to observance correspondent Tim Vercellotti.
MEN'S VOLL EY BALL: "Young, inexperienced and at times somewhat inconsistent in our practices," is the way Volleyball Club President Barry Smith summarized the trials the team had before its opener back in January. That was when 15 teams set out to claim the "Midwest Intercollegiate Club-Volleyball Championship" to be held at Bowling Green (Ohio) on April 17. Despite some of the early season pessimism, the Irish were one of the 12 teams that qualified for last Saturday's playoffs. For the afternoon's end, the Irish were in the championship match against Northern Illinois University. Split into two six-team pools, the team breezed into the semi-finals by sweeping matches against Miami (Ohio), North Dakota and Bowling Green, while splitting with Wheaton. A gutsy "never say die" effort propelled Notre Dame to the Midwest mmc in the semi's. After being waipioed by a 15-4 count in the first game, and behind 10-12, Notre Dame rallied to a 15-12 victory to send the match into the rubber-game. As a result, the Irish fell behind by 3-2 in the first set. After winning the first game 25-19, the Irish dropped the second 25-15 to lose out on the Midwest Championship. "It was just an amazing tournament for us," says Smith. "I think we should have won it all, but as some others have pointed after the loss, there aren't any losers after a championship game performance," said Smith. At the second-place team race, three members of the squad received plaques for outstanding individual performances. Junior Coe and John Kiebha were selected for the "All-Tournament" team, while Smith was placed on the second team. Other members who helped the team with their outstanding performances include; Mark Stewart, Eric Kuehn, Kevin Henders, Scott Erbs, Mark Basset and Carlos Arapito.

WOMEN'S SOCCER: The soccer team had its own second-place finish, last Saturday. It wasn't in any championships for the Midwest, but given the circumstances it was an impressive performance. The team started its first major intercollegiate tournament. "I was pleasantly surprised to see the way the team played against Tracy Walters of the six-team tournament. "The weather has hampered us all year as we only managed to get in only one full week of practice before the spring season. The other teams have been practicing much longer and were more experienced." In the 1-0 opening game shutout of Kalamazoo, freshman Lynn Webster tallied the lone goal on an assist from classmate Kay Healy. Walters helped earn the shutout as the goalkeeper. The Irish then defeated "Big Shysters" there. John Schafer shot a 77 and 76 to win the Farley Five quarterfinals on Friday. Allmaras the javelin (97 feet 11 inches), Kennedy, the 800 meters (2:32) and Luking the 3000 meters (11:42). Luking also placed second in the 1500 meters (5:36). Monti and Celia Driscoll also placed third in their second six-out of six competitors in the 100 meters and long jump. It only was the second time that Driscoll competed in the long jump event.

WOMEN'S SOFTBALL: By virtue of the sweep over Bethel College and a John Paul II, the women's record now stands at 5-4. "We could easily be 8-1," says student-coach Bob Spain, "but we have just had so much bad luck in one way or another. I think once we get some consistent weather, we can really start a winning roll." On Monday, the team swept Bethel by scores of 6-2 and 18-2 (a game shortened to five innings). Alyson Hritz went for the distance in the rubber-game. Alas, the Irish fell behind by a 3-2 count before finally earning a 16-14 triumph in the match. "They (Northwesterns) were pretty upset with themselves at the match's end," chuckles Smith.

Unfortunately, the Irish had the semi-final scene reversed in the championship. After winning the first game 15-10, the Irish dropped two straight heartbreakers, 15-12 and 15-13, to lose out on the Midwest Championship. "It was an amazing tournament for us," says Smith. "I think we should have won it all, but as some others have pointed after the loss, there aren't any losers after a championship game performance," said Smith. At the second-place team race, three members of the squad received plaques for outstanding individual performances. Junior Coe and John Kiebha were selected for the "All-Tournament" team, while Smith was placed on the second team. Other members who helped the team with their outstanding performances include; Mark Stewart, Eric Kuehn, Kevin Henders, Scott Erbs, Mark Basset and Carlos Arapito.

WOMEN'S TRACK: Wind, cold and rain hampered us all year as we only managed to get in only one full week of practice before the spring season. The other teams have been practicing much longer and were more experienced. In the 1-0 opening game shutout of Kalamazoo, freshman Lynn Webster tallied the lone goal on an assist from classmate Kay Healy. Walters helped earn the shutout as the goalkeeper. The Irish then defeated "Big Shysters" there. John Schafer shot a 77 and 76 to win the Farley Five quarterfinals on Friday. Allmaras the javelin (97 feet 11 inches), Kennedy, the 800 meters (2:32) and Luking the 3000 meters (11:42). Luking also placed second in the 1500 meters (5:36). Monti and Celia Driscoll also placed third in their second six-out of six competitors in the 100 meters and long jump. It only was the second time that Driscoll competed in the long jump event.
In the dark about night football

At first glance, next September 18 should be a wild day. It means, what more can one ask for -- Notre Dame against Michigan, under the lights, in prime time, on ABC, in the first night game ever in Notre Dame Stadium.

The Notre Dame athletic department is still buzzing over the idea, and all the talk over there is about how neat it's going to be to "break tradition" and all that. Of course, $1.1 million in the till, which is ABC's standard fee for a prime-time game, won't hurt either.

It seems like a situation where nobody loses. ND and Michigan get their million and their exposure, and ABC gets what is sure to be a hit in the ratings during a period when it would normally show old "Love Boat" and "Fantasy Island" reruns. The only added expense will be the $50,000 necessary to import the portable lights from Iowa. Of course, that translates into about 15 seconds of prime time advertising.

ABC first approached Notre Dame about this unique idea a few weeks ago. Chuck Howard, ABC's vice president of programming production and the senior producer of NCAA Football, came up with the brainstorm about six weeks ago in what now looks like a last-ditch effort to get a Notre Dame game on ABC.

You see, the network has been unsuccessful in two previous attempts to get the Irish to adjust their schedule for TV. First, the network wanted to move the Nov. 6 Pitt game to Labor Day evening in prime time. Notre Dame refused. Then, ABC asked the Irish to switch their Nov. 27 battle with USC to Dec. 4. Once again, ND refused, which explains why this year's ND-USC game will be on CBS.

Finally, after much debate among the ABC hierarchy (Howard, 'senior VP Jim Spence and executive producer Roone Arledge), the network proposed the night game using lights from the Musco Lighting Co., an Iowa-based firm that had contacted ABC and the NCAA two years ago just in case their services might come in handy some day.

According to ABC's media director for its NCAA coverage, Don Bernstein, getting Notre Dame to agree was the problem. "We had to clear the idea with both teams and their coaches," he said. "But getting Notre Dame to approve the idea wasn't a problem. We've experimented with these lights enough in pilot studies, and our ABC engineers think it is a viable system."

Of course, the people over at the ND athletic department can hardly hide their enthusiasm. "I'm all for it," said Gerry Faust. "It'll be a first-ever thing for Notre Dame and it ought to be a lot of fun. It'll be good for college football, too, to get a really good intersectional rivalry on prime-time TV.

Athletic Director Gene Corrigan echoed Faust's sentiments. "When I first heard about it," he said, "my first reaction was 'Why not?' I think as it was worked out with Gerry and the team and Fr. Hesburgh and everybody else it was okay with me."

Those are the two major problems that come to mind right away. Surprisingly, nobody seems to believe that there is a problem. "The players take care of themselves," said Corrigan in reference to the students' excessive drinking. "I don't think they'll sit and drink all day -- you've got to be stoned to do that."

Oh yeah? Then there must be an awful lot of stupid people at Notre Dame.

Now don't get me wrong. I'm looking forward to Sept. 18 as much as anyone else, and I think it's going to be an awesome experience for everyone involved.

But it seems to me that Notre Dame is taking the security aspect of the situation very lightly. And that may turn out to spoil all the fun.

St. Joseph's College missed hitting the Irish by a mile as the Notre Dame baseball team was the warmest of round two. St. Joe's team 7-2 and 13-5. The Irish next play Saturday against Dayton on Jake Kline Field at 1 p.m. See Ed Konrady's story below. (Photo by Cheryl Ertelt)

Cameron stars

Lackluster Irish sweep St. Joseph's

By ED KONRADY Sports Writer

"When you win two games every day, you're playing without intensity," said Irish Baseball Coach Larry Gallo, "I guess you should feel some consolation, but we didn't play well at all."

Although the Irish swept a doubleheader from St. Joseph's College, 7-2 and 13-5, Gallo was very upset with his team's performance. "We were laying back on our heels all day, not charging the ball, but letting the ball play us," he said.

Jim Cameron provided the offensive thrust for the Irish in the first game as he went two-for-three, scored two runs, stole a base and knocked in a run. Brian Smith (6-1) was credited with the win, going the distance, striking out four and giving up only one walk. "Brian threw strikes," said Gallo, "but he wasn't as effective as he was early in the season. He really didn't have his good stuff today, his ball wasn't moving out there, but Brian's a tough competitor and he won.

In the second game, Notre Dame was ahead 6-5 going into the bottom of the sixth, when with one out, Cameron pinch-hit for John Deasey. Cameron singled, and scored the first run of a nine-run inning that put the game out of reach.

Co-captain Chuck Tasch was two-for-five, including a triple, and had three RBIs.

Mark Clementz (4-0) went five innings, striking out three and walking one. Larry Lackner got the save, going the rest of the way.

"It just wasn't a good day of baseball -- we've got to get our intensity back," said Gallo. "Especially if we want some more shots at the NCAA."

The NCAA people look at two things, our record and the quality of our opponents.

"These next games will be tough ones, and we'll have to play better."

The final four decided

In Women's Bookstore

By JANE HEALEY Sports Writer

The field has been cut to four teams as Women's Bookstore winds down. The final four were the winners of round two, St. Joe's team 7-2 and 13-5. The Irish next play Saturday against Dayton on Jake Kline Field at 1 p.m. See Ed Konrady's story below. (Photo by Cheryl Ertelt)

Denison wins

Irish lacrosse team misses upset

By MIKE SULLIVAN Sports Writer

For a while it looked like the Irish lacrosse team might pull off a major upset against lacrosse-power Denison, but the visitors rallied in the second half and coasted to a 15-10 win.

The game, played in the cold and wind, was physical from the outset as the Irish came out hitting and Denison came out running and gunning. Hard checks by the Irish put a damper on the Denison attack and some scrappy play around the Denison goal kept the game close for the first half.

Things started out normally for the Irish as Denison wasted little time in jumping on top 1-0. However, the Irish answered quickly as Steve Linehan hit Steve Pearshall with a pass, as Pearshall cut in front of the goal. After Denison scored again to go ahead 2-1, Linehan and Pearshall connected again.

The loss gives the Irish a 6-5 overall mark and a 4-0 league record. However, whatever hopes the Irish held for an upset were dashed in the third quarter as Denison's score soared to 4-0. Like the first half, the Irish outplayed and outscored Denison, but the breaks went against them.

"I wouldn't say that we outplayed them, but we did out hustle them."

The team tried to make a comeback in the last period, but was once again stymied by the Denison goalkeeper. They never got closer than five but hustled to the end, scoring with three seconds left in the game.

Linehan led the team with two goals and four assists as John Updated last time 3/12/2023 12:04 PM. He was once again stymied by the Denison goalkeeper. They never got closer than five but hustled to the end, scoring with three seconds left in the game.

The third time was the charm for the "Assasins," and I'm pretty anxious to go against Bob Crable. He's been talking about his Bookstore team all year," said Jim Bader led "M.C.O.B." with five baskets.

The third time was the charm for the "Assasins," and I'm pretty anxious to go against Bob Crable. He's been talking about his Bookstore team all year," said Jim Bader led "M.C.O.B." with five baskets.

The referees made their first trip to the Bookstore on Saturday, April 22, 1982, and on that day, two irate fans were ejected from the building.

The loss gives the Irish a 6-5 overall mark and a 4-0 league record. However, whatever hopes the Irish held for an upset were dashed in the third quarter as Denison's score soared to 4-0. Like the first half, the Irish outplayed and outscored Denison, but the breaks went against them.
