Burke investigates soph election result

By KEVIN BINGER

Campaign Reporter

Allegations that some sophomores were invalid for Tuesday’s junior class election are being investigated, according to Student Body President Linda Burke.

John Decker, presidential candidate for the Mob ticket, charged that the extremely close election was invalid since various polling places ran out of ballots, hindering some voters.

“We’re going to look into all the allegations and take any appropriate action,” said Burke. He noted that if they find that the election for junior class officers was unfair, they will ask the Student Senate to declare the election invalid.

Tuesday’s ballot came first in Tuesday’s election, receiving 34 percent of the votes cast. Vince Hackett, candidate for Mob, finished second with 35 percent accruing only 10 votes more than Decker’s ticket.

Decker’s ticket garnered 32 percent, 33 percent the votes cast. Vince Phillips also ran out of ballots but continued lobbying for his ticket even after the election was over.

The Ombudsman was forced to estimate the number of students voting on each campus, and therefore on each floor, according to Koegel. Since the student list was not the same as the floor list, he requested from the registrar’s office labels included with the ballots, which were not broken down by dorm and class.

“There is no doubt, though, that it was our responsibility to get those ballots to the dorms,” said Koegel.

As the investigation progresses, Decker continues to lobby for his ticket, right to the end of the run-off, and stresses his ticket’s strength.

“People want the same old junk that you hear year after year if we don’t do the job and work hard at it.”

The Ombudsman was forced to estimate the number of students voting on each campus, and therefore on each floor, according to Koegel. doctor a. robert caponigri, philosophy professor and member at the university for 35 years, died yesterday in his home. caponigri was scheduled to visit spain later this year to receive a government prize for translating the work of spanish poet antonio machado. winner of the fullbright rockefeller fellowship awards, he was the author, editor, or translator of 17 books and numerous scholarly papers dealing with the history, literature, and contemporary philosophy. he also wrote on aesthetics, humanities, and liberal education. caponigri served as visiting professor at alberta, yale, harvard, and oxford universities as well as at the universities of madrid and rome, harvard's center for italian renaissance studies, and the american university of beirut in lebanon. he lectured at italian universities in genoa, turin, bologna, parma, perugia, pavia, milano, and torino, and at spanish universities of cordoba, valencia, and salamanca. funeral services are set for saturday at notre dame. — the observer

corby's liquor license was renewed yesterday after, after the owner harold rowley met with alcoholic beverage board members to discuss underaged drinking at the bar. corby tavern originally was charged with selling alcoholic beverages to minors and hindering law enforcement during a raid by south bend police. abernathy, 56, was flown to johns hopkins hospital for treatment, readmitted tuesday. no date has been set for the surgery.

authorities say an unemployed computer programmer in glenallen, alaska, went on a shooting rampage in a snowmobile repair business, killing 10 of its 12 residents before he fled in a snowmobile and was arrested by troopers. in custody at anchorage correctional center with six counts of first-deg murder, was 39-year-old louis d. hastings. he was held yesterday in lieu of $500,000 bond, and authorities said they had no clue to what prompted the stabbing.

ralph david abernathy, veteran civil rights leader, has returned to a baltimore hospital for brain surgery aimed at preventing a stroke. abernathy, 56, was flown to johns hopkins hospital for treatment, but was sent home to recover before the surgery. abernathy was re-admitted tuesday. no date has been set for the surgery.

the federal government agreed yesterday to accept $32 million from a texas oil driller to settle all claims arising from the largest oil spill in history, a 1979 blowout in the gulf of mexico that took nine months to clean up. the agreement was filed in u.s. district court in houston. it resolves a complicated lawsuit between the justice department and sedco inc., founded by former texas gov. bill clements. sedco had leased the rig to pensegro, a mexican drilling company with an exploration contract with the mexican national oil company penex. the justice department had sought to recoup $5.5 million in cleanup costs from sedco and penex and had asked an unspecified amount for the cleanup work along the south texas coast. the well, known as "the best play of his life" and "the best s in the world," was 50 miles off-shore and the spill was twice as large as the worst previous one, 65.5 million gallons, when the tanker amoco cadiz ran aground and sank near portsal, france, on march 16, 1978.

the courts had rejected several attempts by the oil companies to limit liability, saying they had "frustrated justice" by trying to limit liability to $530,000 under a "good faith" defense. the court had ordered the defendants to pay $500,000 in verdict costs, and had recouped $3 million in defense costs from the oil companies.

the resolution of the lawsuit is expected to set a precedent for other oil spills around the world.

SMC chooses graduation speaker

By BILL HOGAN
News Staff

Marian Wright Edelman, president of the Children's Defense Fund, has been chosen to deliver the 1983 commencement address at Saint Mary's College.

Edelman was selected because her life, works and achievements provide a role-model for the women of Saint Mary's, according to Joan Hammes, the chairperson of the commencement committee.

Edelman has been active in civil rights and public interest affairs and is noted for her "tireless commitment to the poor and her devotion to justice," said Hammes, who also acts as an assistant to the President at Saint Mary's. Referring to Edelman as "the finest of role models," Hammes also cited the civil rights leader embodies qualities and values that are "worthy of emulation by our students — qualities such as compassion, concern and justice.

Edelman was born in Benet­tsville, S.C., attended Yale University, and earned her Ph.D. in American history from the Yale Law School and Spelman College, where she presently chairs the History Department. The selection process for a commencement speaker is a long one which begins in the spring with suggestions submitted from the students of the junior class, Regents, Alumnae Board, Parents' Council members, faculty and administration. The compiled list of candidates is reviewed, screened and edited by the academic Affairs Council, which is comprised of ten members of the President's commit­tee.

For man, natural law involves "the protection of human rights and freedoms," said Bettcher. It is "non-sexist" because it is "armored or medicated against the uterus," she added.

If found to exemplify the qualities Saint Mary's seeks to foster in its students, the list of candidates is presented to the Board of Regents for final approval, according to Hol­land.

This years honorary degree recipients include Father John Castr, Frances Moore Lappe, Mic­hael Mott, and Rosalyn Y. Yalow. Castr, director of the Christ­ophers, received a doctorate in Canon Law from Catholic University in 1964, and is author of the natural motions. "Enjoy the Lord: Mage is co-founder of the Institute for Food and Development Policy, a non­profit public education and documentation center. A member of the faculty at Bowling Green State University, Mrs. Edelman has written several books on poetry and presently is finishing the official biography of Thomas Merton. The final recipient, is the second woman ever to win the Nobel Prize in medicine and is currently chairman of the department of clinical sciences at the Montheore Hospital and Medical Center in the Bronx. She is a distin­guished professor-at-large at the Albert­Einstein College of Medicine at Yeshiva University.

The College also awards the Presi­dent's medal to someone whose work merits recognition. This year that award will be given to Jerry Hammes, the most of the President of the Board of Regents.

Director advocates 'natural order'

By BILL HOGAN
News Staff

Natural family planning "respects the biological reality of the condom­mented love," said Mrs. Janet Betcher last night, in a lecture sponsored by the South Bend (Across from Martin's on S.R. 23)

THURS., FRI., 8:30-8:30
TUES., WED. 8:30-5:30
SAT. 8:30-5:30

The “barrier methods” of the diaphragm and condom “interfere with the natural act," said Bettcher. With one partner or the other "armored or medicated against pregnancy," contended Betcher, these methods of contraception "increases generosity, self-sacrifice, self-control, and trust, and deepens sexual harmony" between marital partners. There is "a present divorce rate among couples who practice NFP."

Natural family planning should not be another means of contracep­tion, said Bettcher. The natural order of "conjugal love" means that "in couples there must be an openness to new life."

"A MASTERPIECE"

A student fashion show

"College of Science presents...TAKE A PROF. TO LUNCH" MARCH 7 - 11 Students, this is your chance to invite your favorite professor or TA to lunch in the South Dining Hall.

We don't have your answers. But we'll listen to your questions, share our own about who we want to become and where we want to journey. For anyone who has considered the path of priesthood, the Holy Cross Fathers' One Year Candidate Program provides an opportunity to ask and explore the possibilities in community.

Soviet ‘peace meeting’
Miners’ protest seems orchestrated

DONETSK, U.S.S.R. (AP) — The Soviet government cheers when anti-war demonstrators take to the streets in the West, but keeps its own peace meetings indoors and ensures they are carefully controlled.

At Donetsk’s Chelyutsin coal mine this week, 600 workers crowded into a meeting hall during their lunch hour for 4½ minutes of protest against the North Atlantic Treaty Organization’s plans to deploy new U.S. nuclear missiles in Western Europe late this year.

The men were in spotted miners’ uniforms creased, with no trace of coal dust on their boots, hats and limbs.

Like Western demonstrators, they carried placards — “down with the nuclear arms race,” “Do not permit nuclear catastrophe.”

A cowboy looking like Ronald Reagan was on one poster, balancing precariously on a tightrope with the words “MS” in the other.

But these demonstrators did not wave their banners. They held them still while four cameras from Soviet Television photographed them.

The Soviet Union has staged a series of such meetings around official Soviet news agency Tass carries reports on the meetings. The West German government of Chancellor Helmut Kohl, who favors the missile deployment, has protested that the meetings and Tass reports amount to meddling in Sunday’s West German elections.

There was no cheering or chanting by the coal miners, just applause after each speech from a podium adorned with a large red banner proclaiming that miners from the region opposed nuclear arms.

The first speaker, Mikhail Kukhar of the miners’ union, recited a ten-minute litany of alleged Western misdeeds familiar to any student of the Soviet media. After loud applause, five workers took the stand to read statements. The message in each was the same — peace without new American missiles in Europe.

A pensioner remembered the fight against Nazism. The only woman to speak appealed to West German mothers to stop their children from dying in the Holocaust threatened by the new American weapons.

The parade of speakers ended with a mine official, Valentin Sokolov, who read the text of a letter from the workers to their comrades in West Germany. It argued that Soviet missiles are “not first-strike weapons” but “a missile shield and new American missiles in Europe.

Pope John Paul II arrives in Costa Rica

SAN JOSE, Costa Rica (AP) — Pope John Paul II arrived yesterday with messages of hope and peace for Central America — a region shut off by violence that has killed 100,000 people in the past five years.

The pontiff’s plane touched down at 3:24 p.m. (4:24 p.m. EST) after a 14-hour flight from Jose’s Juan Santamaria Airport, repeating a gesture from his three previous trips to Latin America, and then rode 16 miles to the city to meet with Central American bishops. Rain stopped just before the plane landed as the papal party wound its way to the Costa Rican capital and Candidates in Brazil and Central America are largely shut down at noon, and the government virtually stopped operations for the rest of the week, as the whole country appeared to want to make the best impression possible.

Costa Rica was playing up the religious aspect of the event. “We do not have to use his visit for political purposes,” said a Costa Rican government official. He asked not to be identified, apparently so he would not offend neighboring countries the pope will visit, where sensitive political issues are involved.

The Vatican has emphasized that the visit is strictly pastoral, but the pope will face political pressures that are bound to be as difficult as any he has faced in his 16 other foreign trips.

The prospect of the visit has brought joy and expectation to many of the people of Costa Rica, which is politically calm but is suffering severe social and economic problems.

A dreary, windrowed rain did not keep city employees from draping pedestrian overpasses with evergreens, banners and flowers.

The road to the seminary, where the pope meets with 55 Central American bishops, was lined by mid-day with civil guard troops, stationed about 100 feet apart. They were unarmed but carried rope whips and clubs for crowd control.

Government expectations for the turnout at an open-air Mass in Sabana Park today reach 1 million — more than a third of Costa Rica’s population.

How many corporations would be willing to pay you over $1000 a month during your junior and senior years just so you’d join the company? In the case of a special Navy program we’re discussing now, that’s called the Nuclear Propulsion Officer Candidate-College Program. And under it, you’ll not only get great pay during your junior and senior years, but after graduation you’ll receive a year of valuable graduate-level training that is not available from any other employer.

If you are a junior or senior majoring in math, engineering or physical sciences, find out more today. And let your career pay off while still in college.

**Personnel departments promote summer work**

By AMY STEPHAN

News Staff

While searching for summer employment? There might be a summer job for you under the Dome. The personnel department of Notre Dame will be beginning accepting applications for summer employment this Monday. The Saint Mary's personnel office will begin accepting applications April 1.

According to Carol Seager of the Notre Dame personnel department, it is still too early to determine how many positions will be available this year. She said that approximately 225 jobs were available last summer.

Seager explained that her office has contacted the various supervising groups concerning their concern for summer employees. The department heads have until April 1 to state their requirements for summer workers.

Seager mentioned that the personnel office will begin to match applicants to available jobs, according to Seager. Therefore, all department heads must meet with the personnel office no later than May 15.

The department heads will be accepting the applications no later than May 15.

The Saint Mary's personnel department has not yet determined exactly what positions will be available this summer, according to the office of the personnel director. The Saint Mary's personnel office will be accepting applications until May 15.

Jobs in both schools fall into three main categories. Service jobs include groundskeeping, point crew, and maintenance; clerical jobs involve secretaries, office clerks, as well as a lab assistant or computer programmer.

Seager specified that those applying for jobs at Notre Dame are asked to indicate on their application three of eighteen general areas in which they are interested, working.

Last year 600 applicants applied for 225 jobs. According to Seager, a priority system is in effect at both Saint Mary's and Notre Dame which places students of each respective school third in order of hiring priority out of a list of seven general applicant categories.

Seager commented, "I don't want the students to think they're at the bottom of the list." Salaries vary from job to job within each school. Summer jobs at Saint Mary's pay between $3.35 and $4 per hour. Salaries for jobs at Notre Dame have not yet been determined, but according to Seager, there will be two basic pay rates.

The personnel office at Notre Dame is located in Brownson Hall and is open from 8 a.m. to noon and from 1 p.m. to 5 p.m., Monday through Friday. Saint Mary's personnel office is open from 8 a.m. to 4:50 p.m., Monday through Friday.

Seager noted that students must complete a new application every summer.

continued from page 1

must meet with Placement and answer their questions and set up the interviews for the pardons, as they do now. The atmosphere may be even more conducive for holding interviews, she added.

The re-requirements of the students need to say, "We want an undergraduate Club." We need student support to generate administration support," he continued.

Abrams' idea that his student would have a disc jockey booth in Chautauqua. The set-up for "Coffeehouse in the Park" presents acoustic problems and no doubt we will build in a booth would solve these problems and improve the sound quality. He also would like to see a wide screen television placed in the ballroom. Foodwise, Montana soup, spaghetti, Mtv, and feature television movies would be shown, making the Undergraduate Club into something of a coffeehouse at those times. Abrams believes the club should be open seven days a week.

"The money for the club is here," said Abrams. "The student Union made money this year. But the administration, the Student Union, and the Student Government must see the students have an interest in this before they will allocate the money. One dollar of each student's activity fee, which is included in the tuition, could be allocated for the rennovation of Chautauqua. But students must show their interest in this," he added.

There should be a referendum to show the administration how much students want this. Abrams added, "Whether or not there is an Undergraduate Club in Chautauqua is in your hands, so the students should enjoy it. Support or lack of support for Chautauqua must determine whether Chautauqua will go under or become the Undergraduate Club," Abrams continued.

Abrams' term as Chautauqua treasurer will end April 1. Cozza, who proposed the Undergraduate Club, has applied for the position.

Gotta is hoping that he will be able to do more for the club by working from that post.

"I like the Undergraduate Club idea," McDonnell said. "In January, I attended a conference in Illinois. One of the items that came up was alcohol prevention. At the University of Minnesota, a group has created a nonalcoholic alternative bar.

The University of Minnesota alternative bar is funded through a grant from the Minnesota Student Association and sponsored by a group called Chemical Abuse Prevention through Peers. It offers a menu of ten nonalcoholic drinks that can be ordered in any bar.

"If we don't have the problem of the Placement Bureau, we might be able to go ahead," McDonnell said. "I have heard that when the faculty office building is finished, the Placement Bureau will move to the basement of the library."

Let's drink to that.

**Amoco grant 'not enough'**

Engineering school lacks funds

By JACK AMARO

News Staff

The Amoco Foundation grant of $300,000 to the engineering department of Notre Dame will not be enough to give all the help necessary to update the computer laboratory of the college. According to James Taylor, associate dean of engineering, the college did not have adequate facilities from the beginning. For that reason we were never able to keep our computers up to date with our needs," said Taylor. "The grant is a bog improvement, but it is not enough to supply computer capability for all of our needs."

The foundation's grant, the largest one yet, will be given to the University to fund a modernization of the computer facilities for the engineering department. The grant will be paid in five annual $60,000 installments.

Because the grant will not be given in one installment, the department will modernize in phases, said Taylor. One of the first phases will be the addition of three-dimensional computers and touch sensitive TV screens. The engineering department already has purchased one so-called "stereoscopic" system of computers.

The College of Engineering Services Committee, which is in charge of buying these modernizing systems, is not certain about its probable system of buying more sophisticated systems. According to Taylor, who chairs the committee, "the system is a very high priority but it is also very expensive. We have to buy a bigger central processing unit and more terminals for the labs and the instructors."

A recently acquired asset are ten Apple II computers donated to the university by Apple after being used in the World's Fair in Tennessee. According to Taylor, Albert Miller, professor of engineering, will use these computers to give experience to freshmen engineers in his class.

The engineering department is working with the development office in the administration to get more needed computers so that in the near future the department will be able to give students what they need. According to Taylor, "new computers to help the computer needs of the engineering department is one of the highest priorities of the development office." Taylor stressed the fact that the Amoco Foundation gift is not enough to fulfill all of the needs of the college. "The gift will help," said Taylor, "but we need more than this."

Economic indicators predict strong recovery

WASHINGTON (AP) — The government's main economic forecasting gauge shot upward 3.5 percent in January, the biggest gain in three decades and an apparent new sign that the nation's recovery from recession is more robust than many had predicted.

Commerce Secretary Malcolm Baldrige called his department's report yesterday "highly favorable" for recovery. And a national business group quickly raised its own forecast of 1983 U.S. economic growth.

If anyone still doubted the nation was pulling out of the 1981/82 recession, Baldrige said, "There has never been a gain in the leading index in the past this large without an economic recovery."

The January gain in Commerce's Index of Leading Economic Indicators was the fifth monthly increase in a row and the largest since the 4.1 percent of July 1970.

The index, a compilation of 12 economic measures, is designed to show trends in the whole economy.

Baldrige, commenting in a statement distributed by aides, cautioned that the January figures "should not be taken as a sign of a coming economic boom" since the index was pushed up by special factors such as unusually mild weather and a new type of bank account that boosted the money supply.

Most economists already were assuming an economic rebound had begun, and Undersecretary of Com-merce Robert Doderick, had said Tuesday the recovery almost surely will be stronger than the administration's forecast of a 3.1 percent over- all business expansion from the fourth quarter of last year to the fourth quarter of 1983.

Echoing that opinion, Alexander Trowbridge, president of the Na- tional Association of Manufacturers, said yesterday, "Based on the January numbers, we think we can revise upward our estimate of real growth in 1983 to a level of about 3.5 percent to 4.5 percent, which is a jump over our earlier estimate of 2.5 per- cent to 3 percent."

"Things are looking better," he declared.

The only negative indicator was a drop in orders for new plants and equipment.

The United States leads the Soviet Union by a 15-1 margin in basic technologies that "have the potential for significantly changing the military balance in the next 10 to 20 years," a Pentagon report says. This indicates that the United States has maintained its lead in most of the basic technologies critical to defense, although the Soviets are eroding the lead in some of the basic technologies.

Richard DeLauer, undersecretary of defense for research and engineering, said in his annual report to Congress. One of the key technologies in which the United States is ahead of the Soviet Union involves "steadly," which are expected to allow development of bombers, cruise missiles and fighters that would be virtually invulnerable to Soviet radar, the report indicated. But the report, which became available yesterday, also said the Soviets are gaining in six technical areas of defense where the U.S. military still maintains its lead. DeLauer said the Soviets are spending nearly double U.S. outlays in an effort to close what he spoke of as the "technological gap." The Reagan administration's fiscal 1984 budget calls for $23.5 billion on research, an increase of $4.8 billion over this year.

Economic Update

Speaker of the House Tip O'Neill Jr. said today he would urge elimination of "pork barrel" provisions from a $46.8 billion recession-relief measure passed by the Senate. O'Neill criticized Democratic members of the House Appropriations Committee who added costly public works or transportation projects to the bill for their congressional districts. "I think it is wrong to do that," O'Neill said. "I will personally tell them I was disappointed in what they did." There is $110 million in the bill for mass transit, most of it designated for districts of the 10 members on the House Public Works Committee which approved the $4.6 billion measure last week. Other programs critics have objected to including highway and water projects in the measure, but two senior House Democrats have said they will seek to add more money for health care and for mass transit on a national basis. Despite the criticism, quick House action on the emergency relief bill seemed certain. The measure includes funds for repair of federal buildings, road improvements and relief for the unemployed.

Wall Street Update

The stock market has shown evidence of a new, resuming economy, as the market posted a broad advance in heavy trading yesterday, topping the record highs it set the day before. Oil and precious metals stocks, which had sold off early in the week, recorded some of the day's best gains. The Dow Jones average of 30 industrials, up 189.09 Tuesday, rose another 1.35 to 135.90. The average has now gained 88 points since the start of the year, and nearly 560 points since Wall Street's bull market was born last August. Volume on the New York Stock Exchange reached 112.6 million shares, up from 103.75 million Tuesday. The market drew some fresh encounters today from the broad index of leading economic indicators jumped 0.6 percent in January. The daily tally on the Dow Jones average of 30 industrials jumped 189.09 Tuesday, rose another 4.35 to 135.90. The. .

Social Security to be saved

WASHINGTON (AP) - House tax writers have embraced a $165 billion pact reached by Social Security solvent again, but they are leaving it to the full House to settle a quarrel over evening the retirement age.

The House Ways and Means Committee was wrapping up work today on the rescue package which embodies Secretary of State James Baker's recommenda- tion to the National Commission on Social Security reform on 65 to the House floor next week.

The committee today considered a series of measures relating to the Social Security bill and then moved to take up a proposal to extend the Supplemental Security Income welfare program. Later it planned to consider proposals to extend un-employment benefits and Medicare reforms before taking a final vote on the entire bill.

Lisa project

Apple introduces new computer

By ALEXANDER GLOCKNER BCT Reporter

John Couch, vice-president of Apple Computer, Inc., demonstrated Lisa, Apple's newest microcomputer, yesterday afternoon at the Center for Continuing Education.

While it is faster and has more memory than its predecessors, Lisa's notable feature is its revolutionary easy-to-learn instructions, designed for new applications.

Instead of requiring special lan- guages and long typing sessions to perform a task, Lisa displays, either verbally or pictorially, the options available to the user. The user then selects the option he desires with a "mouse," an indicator that can go anywhere on the display by using a hand held control.

Lisa is designed to overcome two major problems with using com- puters in the business world. Lisa solves the first problem, the length of time required for first time users to acquaint themselves with the computer, with its software (built-in instructions). The computer works on the normal business office. The TV-like display acts as a "transportation computer" on which the user can put "documents" (reports, graphs, balance sheets, etc.), which can have documents inside them, and "filaling cabinets," which can store folders. The user can put on his desktop a clock, a calculator and a program which temporarily keeps documents the user no longer wants to save.

Lisa solves the second problem, difficulty in moving data from one place to another, by using data in a new way. Before, a computer would store data in some user-specified for- mat, and the data could only be used in that format; for example, numbers could not be stored to make mathe- matic easy for the computer, but then penning those numbers on paper required a complex trans- formation.

Now, Lisa stores the method the data will be used with the data, so the transformation is easily done by changing the data type.

Besides solving these problems, Lisa has many other benefits. The user can call up any type of information by pushing the appropriate key, and the computer can do more than one task at a time. It can talk to other Lisa with an answering machine, store short novels in its main memory, and huge tomes on hard disks or Boppy disks. Lisa includes word processing, accounting, and graphics functions, among others in its available software. Lisa can be updated to include additional functions written by the user or companies, and Apple promises to be able to make Lisa act like a standard computer, with special languages and com- mands, in the near future.

Economic Update

Social Security to be saved

By ALEX SEVILAS BCT Editor

"Ethical Considerations and the World of Commerce" was the topic of yesterday's sixth annual Faculty Forum Justice Trach in held in the Hayes-Healy Board Room.

Professor Ken Molnai of the Ac- countancy Department introduced a distinguished panel of professors, each of whom discussed the implica- tions of business ethics in their respective areas of expertise.

Decision-making and leadership were the focus of Sol Bella's com- ments. A professor of management, Bella cited the best guide to managerial decision-making as being an examination of the position in question itself. He advocated adopting the position which was inherently right or true rather than basing the decision on the consequences which would result or on the beliefs of the majority.

Quoting Father Theodore Hes- burgh, Bella remarked, "No other position is in the least defensible."

Bella explained that what is right or ethical need not be explicitly defined. Emphasizing the role of the conscience, he stated that the manager must carefully decide an issue after taking all relevant inter- ests into consideration.

Speaking about ethical considera- tions in commerce, Professor Mark Dunn of the Marketing Depart- ment highlighted the social responsi- bility of business managers.

"Since the consumer determines if you make a profit," he said, "the consumer must support social responsibility in the market."

Dunn was business in wisdom to do its part as long as consumers sup- port it, but sometimes consumers have not yet done.

"It is a matter of people wanting us to do things which they aren't wil- ling to support."

Dunn sees long-run corrections in the system, but "not until con- sumers support businesses which support social responsibility."

John Halton, Finance Depart- ment professor, spoke about the role of ethics in financial institutions. He cited the tension which exists between owners, managers, and deposits in a financial institution. "Traditionally, regulatory authori- ties have watched out for the de- positors' interests while the manager's job was to watch out for the stockholders."

He added that the role of regulatory agencies has grown over the last decade. These authorities see their task today as involving more than keeping the institutions from falling. Regulations protecting potential borrowers, the com- munity, and other parties have become increasingly common. A bank, for example, may be required to reinvest funds in a low income neighborhood where the rate of return is substantially lower than that of alternative investments. This has resulted in an ethical dilemma which the financial manager must most continually face.

Given the goal of management is to maximize profits of stockholders, where does one differentiate between sound business judgement and what is simply self-interest? Between duty and un- ethical practices.

Numerous opportunities exist, Halton stated, for the management man to make profits for their stockholders.

Professor Jim Gaertner of the Ac- countancy Department was unable to speak as scheduled due to illness.

CALIFORNIA (AP) — A Pacific
storm stalled off the coast kept California under siege yesterday with giant waves and mudslides
eroding lavish hilltop homes and famous
piers. Thousands of people were
relocated by floods up to rooftops
in places.
The death toll from the West Coast storms that began during the
weekend rose to 15, with more than
50 people injured.
Among the dead was a 5-year-old
boy buried about dawn in Clear
Lake, approximately 125 miles
north of San Francisco, when a wall
of mud 500 feet wide swept down a
hillside and crushed his home.
Rain, mud and rocks closed major
highways and railroads and parts of
Arizona and Colorado were warned
to expect up to a foot of new snow.
Snow was already higher than
houses in parts of the Sierra Nevada.
"You want to know how high the
water was?" asked Don Finney in
one San Diego neighborhood. "Well,
someone brought a boat down and
my wife easily stepped into the boat
from our roof."
The National Weather Service,
noting that it was the eighth con­
secutive day of rain in California, said Mount Wilson, near L.A.,
had received eight inches of rain in the past 24 hours, bringing its total for
the week to 16 inches. And no end
was in sight soon.
"We've got bands of showers spin­
ning off a weather system stalled off
shore, and that pattern likely will
continue into Thursday," said weather service forecaster Ron
Wagner.
Thundering surf as high as 16 feet
shattered beachfront homes and businesses in Southern California,
where 1,000 homes had been
destroyed or damaged since the
latest storm hit the coast on Tuesday
and about 1,000 people had been
evacuated. Four landmark piers suf­
fered severe damage.
Several homes in the exclusive
Los Angeles suburb of Malibu were
sinking into the ocean, including one
owned by tennis star Billie Jean King
and her husband, Larry.
About 50 homes in the Santa Bar­
da area just north of Los Angeles
were destroyed or damaged by
waves.
The man-made oil island Esther,
about three-quarters of a mile off
Huntington Beach was destroyed by
surf and 2,750 gallons of oil were
floating on the surface, the Coast
Guard said.

levelled by a predawn blast this morning, killing
at least three persons and injuring more than a
dozen. (AP Photo)
Television reared its powerful head again Monday, convincing even the skeptics of its ability to mesmerize the masses — to hold a nation in its grasp.

Skip Desjardin
On the Media

America came to a standstill as it hadn’t since President Nixon resigned. People glued to their television sets, or the sets of friends, or the wide-screen set in their local bars, watched it all. They were watching the nation in its grasp.

“Goodbye, Farewell, Amen,” the final episode of television’s most successful series, M*A*S*H, ran on CBS Monday. With its airing, the country didn’t know if it was the first time or the last that everyone watched the ending of a television series.

The Observer

But M*A*S*H was not always as popular as it was Monday night. In its first season, the show finished 50 out of 60 programs in the Nielsen ratings.

When peace finally came to the Vietnam war, it came while its characters were in the operating room, battling to preserve life — despite the immenseness of new lives for themselves. And it is fitting that the men and women of M*A*S*H should be working as the war ended. For the series always taught us one thing — verbalized by Col. Henry Blake in an episode entitled “Sometimes You Hear the Bullet” — “Rule number one in war is that young men die.” Blake — ironically the only cast member to die in the war — told Hawkeye, “Rule number two is that doctors can’t change rule number one.”

For 11 years, through laughter, pathos, and stirring drama, M*A*S*H never let us forget that.

Goodbye, farewell, amen.

P.O. Box Q

Validity counts

Dear Editor: Everyone knows how important the “challenge to be pro-life” has been. In the past few weeks in these pages has been reflected by the totality of Notre Dame letter writers. The fact that this opposition has been so complete, unanimous, and final, the fact that we all knew that the pro-life choice didn’t have a chance of finding support among the Notre Dame community, leads me to suspect that the pro-choice perspective has been misunderstood here. This suspicion is deepened when I see the majority of letter writers refer to the “pro-abortion” position, seeing it at the simple rejection of their own self-proclaimed principles.

I am fairly certain that in most cases “pro-choice” does not imply “anti-life.” In fact, just aren’t that simple. The pro-choice position, as I see it, is not ultimately addressed to the issue of whether or not abortion should be legal in itself, but to the question of the morality of a legal governmental stance on abortion. Of course, the latter question is intimately associated with the former, since the moral character or legitimacy of the activity legislated involves the moral character of the activity legislated. In order for legislation to be moral, it seems to me, the activity legislated must (1) be of a sufficiently social character to warrant legislation. Of course, the situation does exist beyond the pro-choice perspective, that many “pro-life” supporters have lent moral agreement.

In addition, I am not sure that abortion is of a sufficiently social character to warrant legislation. Of course, the situation does exist beyond the pro-choice perspective, that doctors can’t change rule number two.

Fourth, they feel guilty already. A woman may feel deprived because she has had sex and become pregnant, perhaps before marriage. She thinks, “I have sinned so much, what’s one more sin?” Catholics should not judge others, but show compassion, forgive what’s one more sin?” Catholics should not judge others, but show compassion, forgive.

Editor’s Note

Editor’s Note: Letters should be brief and deal with specific issues. They must be typed and bear the address, telephone number and signature of the author. Initials and pseudonyms are not acceptable. Reproductions, carbon copies, or letters addressed to persons other than the editor are not acceptable. All letters are subject to editing.

Pragmatic look

Dear Editor: I would like to share my thoughts regarding abortion. Like many Catholics, I believe that life begins at conception and that abortion is murder. However, I can see why so many people still choose to abort their children.

First, they may not understand that their baby was a soul and its own person. Perhaps they have not reflected on the implications of their choice; they may act impulsively. For this reason, Catholics should help to educate all people on the meaning of “abortion,” but first, a true, objective look at abortion.

Goodbye, Farewell, Amen.
You're lost in a strange land. You have no money, no credit cards.

Many of the seniors who are about to graduate in May have already lined up jobs with prestigious firms across the country, many others have been accepted for graduate work at countless institutions. A large number have not.

Freelance Away!

You're a college graduate. You've got a degree, a job offer, or many offers, or you may want a novel way to keep fed during summer break. Marietta Whittlesey's book, Freelance Forever, may replace the family bible. (Trivia Note: what book did I say the same thing about last week? Ah, well.)

Joe

Whittlesey's book is a regular cornucopia of information on how to get and keep your own business on track. Whittlesey herself is a freelance writer and has incorporated the testimony and advice of many, many other freelancers in various lines of work to compile her guide. It is simply an encyclopedia designed to help the serious freelance keep track of finances and lifestyles while trying to maintain a steady flow of creativity and cash.

Nonetheless, even if you aren't planning to go out and start your own corporation (one of the books better points — even if you are the entire product, incorporate anyway), the book will probably be a great help to anybody starting out in the real world. Included and of major interest are sections on buying, renting, or just plain old finding housing, establishing a credit rating, setting up work space, arranging taxes, and a particularly fascinating little dialogue on "creative debt management."

If, in fact, you are planning to go out and start your own business or plan to make a career of your own in the arts, this book is an indispensible encyclopedia. It is set up and arranged as a reference book — interesting to read all the way through but more valuable to keep around just as a handy helper when specific situations arise. Whittlesey provides a wealth of studied advice in areas such as how to remain creative, how to cope with lean times, how to live economically and still enjoy it, and how to keep the sort of records efficiently, that keep freelancers out of jail and the poorhouse at the same time.

As you may have noticed, the platine is rather simple. The hardest part of reading the book is waking through the sexual confusion. Not everything about the book is bad though. Wonderful descriptive phrases are used that give the lines a sense of poetry. It is because of this that I feel the story lost something through translation. For lines to flow like that in English, the original French must have hung together like music.

You might try it in its native language.

Claudine in Paris

When I read this book before last summer, I would have known, for instance, that I need not have any of my income from specific contracts withheld, that even the newspaper which provided the closest thing as regular employment should not have withheld any tax. I also could have benefitted from what is perhaps Whitleysey's most relevant advice for the graduating or self-employed college student: "Getting Work." This section (as are many of the others) is loaded with relevant and tantalizing lists of people and firms who are likely to be interested in whatever it is one wishes to do for a living.

The back cover of the book is topped by a statement in bold red letters: "As a freelancer, you are your own employer, employee and product." This is a much more popular lifestyle than it used to be, and I can vouch for the fact that it holds many very rewarding benefits. Freestyle Forever is an invaluable investment for anyone who is considering the route of the freelance.

Atlantic Coast Conference
Cavaliers, Tar Heels win easily

ATLANTA (AP) — Michael Jordan scored 24 points, 15 in the second half, as eighth-ranked North Carolina downed Georgia Tech 85-74 in an Atlantic Coast Conference basketball game last night. Jordan had two baskets, one a slam dunk, as an 11-0 Carolina burst that stretched a 42-36 advantage to 55-66 with 11:18 left in the game.

Tech never threatened thereafter as the Tar Heels eventually rolled up a 25-point lead, their biggest of the game, which they held on five occasions.

The victory lifted North Carolina to 24-6 for the season and 11-2 in the ACC. Tech fell to 12-14 and 4-10. Sam Perkins added 16 points for North Carolina.

GREENSBORO, N.C. (AP) — Ralph Sampson scored 28 points as No. 2-ranked Virginia cruised to a 107-74 Atlantic Coast Conference basketball victory over Wake Forest yesterday.

The victory boosted the Cavaliers’ ACC mark to 11-2 and 24-3 overall. Wake Forest faced out to a 20-13 lead in the first seven minutes, but Virginia rallied and tied it on a Ricky Stokes jumper with 11:10 remaining in the opening half.

The score was tied twice more before the Cavaliers slowly pulled away and eventually opened a 46-42 edge on a Sampson dunk with 5:28 left. Using 62-percent shooting, Vir­ginia claimed a 54-36 halftime lead. Wake Forest went scoreless for four minutes to start the second half as the Cavaliers expanded their margin to 69-41 with 15:19 remaining.

... Briefs

The ND-SMC Bicycling Club will hold a meeting tonight in the LaFortune ballroom at 7:00 p.m. — The Observer.

The women’s golf team will be meeting on Mon­day, March 7 at 6:30 in the women’s varsity office in the ACC to view videotapes and discuss the spring tournament and spring practices. Also, the roster is up in the golf shack so that players can now get on the course. — The Observer.

The Ultimate Frisbee Club will be practicing behind Jake Kline field, weather permitting. The practices will run from 3:30 to 5:30 Monday through Friday. New members are welcome. — The Observer.

Ski team members who have not picked up their jackets, sweathirts or ski bags should contact Phil Penny at 277-5799 as soon as possible. — The Observer.

An Tostal inner tube water polo signup will be on Sunday, March 6, in the Ballroom in LaFortune from 4-6 p.m. Registration will be limited. There is a $5 fee to enter the tourna­ment. Each team must have a minimum of seven players, including two girls, per team. Teams may not have more than two water polo players and one varsity athlete, or two varsity athletes. — The Observer.

Saturday, March 5

Bus leaves library circle at 12 noon returns after show.
continued from page 16

With the game still tied 52 seconds later and Notre Dame with the ball — just when one thought Paxson would make the key one on one move — Dolan took a pass from Paxson, drove toward the hoop, and banked home the game-winner.

Dolan's heroics started the Notre Dame dreams of an NCAA Tournament bid that just a week before seemed unrealistic.

"That (Marquette) game really gave me the confidence I wanted," said Dolan. "I was just at the right place at the right time."

Since that game, Dolan has rarely been out of place at all on the basketball floor.

Going into the DePaul contest last Saturday, Dolan had a 10-game stretch over which he scored 109 points (third only to Paxson and Kempson over that same stretch) and garnered a team-leading 76 rebounds. Kempson was a distant second over this same period with 49 rebounds.

Dolan also led the team in scoring twice in the stretch (including a career-high 20 points against Maryland) and was the runner-up two other times. He also led the team in rebounding in six of those 10 games (including a career-high 15 caroms against Bucknell), and was second in another contest.

Such performances have earned him a starting forward slot in the last eight games. "I didn't think I would come this far so soon," admits Dolan, the 16th-highest scorer in New Jersey high school history. "I'm happy with the way I've progressed, but I still have a long way to go."

Still, Dolan has reached that point where he realizes that most of his mistakes now come, not from being a freshman, but from being human.

Dolan's recent statistics, however, are actually a poor source for measuring his overall performance and abilities on the hardwood. As Phelps said after the Hofstra game, it is his ability to "really make things happen" through his intelligence, conscience, resourcefulness, and court savvy that has helped the Irish maintain their hopes for a Tournament bid.

Nevertheless, the most impressive part of his game is his ability not to dwell on past mistakes or focus on any single facet of his game during the course of a contest. Against DePaul, for instance, Dolan did not take a shot in the entire game. Instead of forcing shots, though, he displayed his most overlooked skill, passing. Twice during the last, futile rally, he drilled picture-perfect passes inside to set up layups.

"Right now I think I'm contributing to the team with my passing and rebounding," says Dolan, "but I try to prepare myself for whatever a game situation demands. It's important to have a complete game and not just specialize in one thing. A complete player is more aware of things going on on the court and can react to things better."

So while he may not have the raw power of a Kempson, the fluid smoothness of a Barlow, the outside shot of a Price, or the defensive know how abilities of a Buchanan, Dolan has managed to synthesize all of those elements into his own little package to become, in the second half of the season, the most pleasant surprise of Phelps' squad.

"Leave it to a man who comes from a town in New Jersey called Point Pleasant to be the most pleasant point and surprise of this year's team," Phelps, though, knew it all along.

No. 3 Louisville leads from start, beats Hokies easily

BLACKSBURG, Va. (AP) — Charles Jones, Rodney McCray and Lancaster Gordon teamed for 49 points, 15 caroms against Bucknell, and was second in another contest.

Dolan has reached that point where he realizes that most of his mistakes now come, not from being a freshman, but from being human.

Roller-coaster season
Basford rebounds from adversity

By MIKE RICCARDI
Sports Writer

In the wild ferris wheel ride that has been the 1982-83 season for the Notre Dame women's basketball team, no player has experienced more dramatic highs and lows than freshman guard Denise Basford.

Basford's recent contributions off the Notre Dame bench are the result of a long, up-and-down year of growing up for the 5-9 guard from Farmington, Mich.

Basford made an impressive debut with the Irish, starring in November's intraground and playing more than 20 minutes in each of Notre Dame's Orange Crush Tournament games, showing poise and ball-handling ability that belied her lack of experience. She was a large part of the silver lining around the two tournament losses to Top 20 opponents in the tournaments.

"Before the first game (against UCLA), I wasn't real nervous," says Basford, "but when I first went in, there was a feeling of, you know, playing against a team like that. Once I shot that, though, everything was all right."

It seemed that everything was going Denise Basford's way — in November. She was being groomed to take over at point guard, of course. And she just might earn that spot before the season was out.

The leader of two state championship teams at Our Lady of Mercy High School, Basford came to Notre Dame, like most athletes, with imperciable credentials. Basford was a unanimous all-state choice, and an honorable mention selection on two major All-American teams.

"My grade school athletic director also ret some women's basketball games," says Basford. "I was ready for that. I knew I was going to te Notre Dame, like most athletes, with imperciable credentials. Basford was a unanimous all-state choice, and an honorable mention selection on two major All-American teams.

"I came in with the impression of a player who's been more comfortable in a two-guard setup where there's somebody else back there to handle the ball too."

"I've had my ups and downs," says Basford, "but I've learned a lot — more than 20 minutes in each of the two tournament losses to Top 20 opponents in the tournaments."

The Far Side

"Gertrude!"
Prophecy coming true

Dolan emerges from shadows

By LOUIE SOMOGY
Sports Writer

Ever since Notre Dame basketball coach Digger Phelps made national news last spring with revelations of the cheating and scandals that go on in college athletics today, he has been jokingly labeled as "The Holy One." But after his prophecy in the preseason about 6-8 freshman Jim Dolan, though, one has to wonder if Phelps' words are indeed becoming the gospel.

Jim Dolan might be the surprise of the freshmen because his such an intelligent basketball player," predicted Phelps. "He knows the game, he doesn't make mistakes, he's an excellent passer, and a good shooter.

"From the very start of the year, you'll see him in key situations. He'll get the ball in key situations. He'll get the gospel.

"Before the year is over, you'll see him on the floor in ten tries.

"The key rebuffed when you thought Kempston was going to get it, or you'll see him make a key one-on-one when you thought Paxson was going to do it."

"Surprise" was Phelps' word choice because of the way Dolan seemed to be overlooked by the fans and the press in the early part of the season. With four other highly-recruited, but not-touted recruits joining the squad, he became lost in the shuffle.

"Tim Kempston was seen to be the heir apparent to John Paxson as a Notre Dame All-American. Ken Barlow, though was touted as the next Orlando Woolridge. Joseph Price emulated the sharp-shooting star as Ken and Price all earned starting spots.

Dolan was regarded as the best all-around athlete on the squad. With Dolan, however, there was no comparison, no bestiality of a title, no superiority. Despite his 51 and 14 rebound averages as a New Jersey high school senior, he was not selected to the prestigious McDonald's All-America team like his three classmates, Kempston and Barlow.

Once the season began, he began an even deeper journey into the obscurity.

"While Kempston, Barlow, and his roommate Price all earned starting roles in the lineup, and Buchanan served as an important off-the-bench, Dolan was relegated to mostly mop-up roles, averaging only 5.2 points and 2.5 rebounds through his first twelve games.

"Phelps' prophecy about Dolan began to sound as hope less as the "We're going to steal-20" prediction he made before the 1981-82 basketball season.

"Naturally, I was a little frustrated, but I was prepared. I knew my early season performances," says Dolan. "It doesn't work out that way where you think you should play more in a game just because you want to. You just have to go out and work harder and concentrate more on the court."

The patience paid off for Dolan in the 15th game of the year against traditional Midwest nemesis, Mar queett.

"Dolan's prophecy was fulfilled. The fact that Scott May, Kent Benson, Steve Green, Bobby Wilkerson, Tom Abernathy and John Laskowski were named the Hoosiers' Randy Wittman as its player of the year in District 4. Wittman isn't even the best 6-6 player, however, the 6-6 forward from Indiana, D.C., who has started all 26 games, has always known his ability to play with the better teams and once again be the leading scorer and points and seven rebounds a game.

Also going after starting roles in their first year at a Pirate were the two junior college transfers, Kenny Brown and Kevin Morris.

"Dolan immediately began the process of bringing Seton Hall up to the competitive level of the Big East Conference. He's played for Digger Phelps' 26-3 team that has its back up against the wall.

"Three of these additions have earned starting berths in their first year at the Hall. Freshman Andre Carlesimo has been the big surprise, though. The 6-6 forward from Washington, D.C., who has started all 26 games, has already proven his ability to play with the better teams and average seven points and seven rebounds a game."

Dolan remains the most dynamic player on what was, before Kitchel's injury, a classic example of a team that was far greater than the sum of its individual parts.

Of course, we've all had our families have at the Irish during their NCAA campaign. This season Rogers has been averaging 7.3 points and four rebounds a game.

"In fact, the fact that Scott May, Kent Benson, Steve Green, Bobby Wilkerson, Tom Abernathy and John Laskowski fell far short of NBA stardom, though, is hardly an indictment of Knight. On the contrary, the ensuing unmasking of the run-of-the-mill talents is a testimony to Knight's coaching genius.

"Can Dallas Green be serious? The general manager of the New York Mets, is guaranteed because a Chicago columnist once picked his 30-and-over club to finish sixth in the National League East. There are two conclusions in the wake of Green's series of recent moves (Bill Casteel, Ferguson Jenkins, Keith Moreland, Dan Larsen, Bump Reynolds, etc.) that leaving Philadelphia - Green is still on the payroll, and somebody must have read the offensive prediction to him. Besides, the guy is probably going to be due for an all-star game for finishing fifth last season.

"The way, by the way, that almost anybody at Notre Dame's hockey game. It's the best in the world, but the players get paid to play.

"The way, by the way, that almost anybody at Notre Dame's hockey game. It's the best in the world, but the players get paid to play.

"But when we send a camera crew on horseback to cover the Notre Dame-Navy game, the Navy players get paid.

"As Seton Hall's point guard, a 6-6 junior who can play either forward or guard, leads Brown in shooting for the Pirates in blocked shots with 13... and the Cheyenne State."
