Watt gives in to pressure resigns as Interior Secretary

WASHINGTON — Interior Secretary James Watt resigned yesterday after his political allies deserted him over his latest verbal gaffe and a stormy two- and a half year career of what critics call mismanagement of land and natural resources.

President Reagan reluctantly accepted the resignation and said Watt would remain on the job until a successor is sworn in. Watt made the announcement in a conference room at the White House where he has been vacationing near Santa Barbara, Calif., telling reporters "the time has come" to step down.

Reagan said Watt "has initiated a careful review of the needs of people and the importance of protecting the environment. His dedication to public service and his accomplishments as secretary of the interior will long be remembered."

Reagan decided to resign during a telephone call shortly after 5 p.m. EDT.

Watt said he resigned because "out of nowhere...has come in an end." His letter of resignation was hand delivered to the president at 6 p.m. EDT.

There was no immediate word on Watt's successor. But White House aides have said for the past several days that candidates included former Sen. Howard H. Baker Jr., Wyoming, J.J. Simmons, a Democrat who works at Interieur, and Energy Secretary Donald Hodel, a former Interior Department official.

The controversy was touched off Sept. 21 when Watt told a Chamber of Commerce breakfast that an Interior Department advisory committee contained a "4 black, 2 women, two Jews and a cripple."

The remark prompted several Republican senators to demand his resignation and end Senate Minority Leader Robert C. Byrd, D.W.Va., to propose a formal resolution calling for Watt to resign.

As recently as last Wednesday, Reagan was defending Watt, declaring that his statement was a "stupid" remark but that it was not as impeachable as Watergate.

But Watt's support continued to deteriorate in the Republican-controlled Senate.

Cleaning service bolts Saint Mary's citing lack of security against theft

By JOHN-JOHN AMORES

Plagued by theft, and at odds with Saint Mary's over a lock change on their establishment, the Campus Cleaners at Saint Mary's have decided to discontinue their services when their contract expires on Oct. 31. The cleaners' departure is the result of a dispute with the Saint Mary's Physical Department over the installation of a master lock on the door of their business, located in the basement of LeMans Hall. The lock change is a part of a lock replacement program that is supposed to improve security on campus.

Sandy Shwarhaw, owner of Campus Cleaners, rejected the proposed contract because it relieves Saint Mary's of all responsibility for stolen goods. Her insurance only covers theft when there are signs of forced entry; with the master key she feels it is too easy for someone to gain access to the shop.

During the summer, all of the locks were changed in LeMans Hall, including the one at the Campus Cleaners. At this time, some items were stolen from the cleaners, and Shwarhaw believes that the new locks are to blame.

On the other hand, Earl May, director of purchasing at the Physical Department, says that the locks are amongst the best available, and that security throughout the building has been enhanced.

May said that the locks are being changed at Saint Mary's because with the older locks, anyone who wanted to duplicate a key to one of the campus buildings could make a key in a local store. "Now, the new locks are stronger and more durable, and the keys cannot be copied anywhere in the area," he says.

However, for Shwarhaw, who has been running the cleaning service for the last seven years, and that she regrets her decision to leave. After it was determined that Shwarhaw's cleaning service would not return, May obtained the services of the infirmary, the infirmary's head administrator. Sister Ruidl said an increase in patients the past week, according to Sister Marion Ruidl, the infirmary's chief administrator. Sister Ruidl did say that there were some cases of the flu, students were admitted with various other problems as gastritis, strep throat, colds, and injuries.

As for the waits, Sister Ruidl said that the best solution would be to hire more doctors, which is not practically or financially feasible. Currently, the infirmary employs two full-time doctors, Dr. Bernard Vagner and Dr. Robert Thompson, who are also on call for emergencies when not on duty.

"We want our staff to be challenged," Sister Ruidl said. "And with too much staff it would have
Changing Cleaners

Changing cleaners is as easy as changing locks at Saint Mary's. To prove it, Campus Cleaners will no longer be at the College, provide its service to the campus of fe­
dec­. $1.95. During the summer maintenance changed the old lock on Campus Cleaners' door and a installed master lock, unlocking a room full of sweaters and suits to just about anyone with a master key. It's having a lock installed at University Park Mall: clean, pressed and ready for the picking. It's been nine years to theft; however, according to owner Sandy Shawhan, the spring change has caused the increase which is driving her out of business.

Campus Cleaners refuse to sign the contract which is up renewal for the end of this year because of the increase in theft. The contract releases the College of all liability due to theft. In the past Shawhan agreed in clean, but not anymore. Signing the contract now would mean if you can get and the master keys cannot be duplicated anywhere on the South Bend area. Then why the sudden increase in thefts?

Every day there are signs of people rearranging them in the room. There is evidence that someone has been sitting through the racks of clothes rearranging them after choosing her or his new wardrobe.

So why change the locks in the first place? May says the locks were left in the collection and changed to increase security. Supposedly only a few people have a key to the cleaners. The school told Shawhan a master lock was installed to allow quick access for emergencies such as fire or a broken water pipe. Firemen do not have a key when it's along from the dry Cleaner; and once a water pipe has burst, the damage is done. The new lock is allowing easy access to just about anyone with a master key, other than firemen and plumbers, of course. For seven years Campus Cleaners has been providing con­
venient for the cleaners.

There is an easy solution to the contract dispute. Campus cleaners would accept responsibility of known persons did not have unlimited access to the room in its LeMans. The lock can be changed as easily as the last one. After all, what cleaners in South Bend has a master lock so that firemen, plumbers, housekeeping people and others from all of South Bend have access to the business. It kind of defeats the purpose of business hours.

The program, according to Doyle, has an average of 250 students who participate each year in about 60 different Plunge sites around the country. Applications for this year's Plunge are due Friday afternoon, and may be picked up at the Center for Social Concerns, the Campus Ministry offices, or from hall representatives.

The sites for the Plunges are chosen by the students who are going on the Plunge. The city or town chosen by the student is the city or town that the students will actually spend four to six days in. The students have schedules which are made to start one there. They are put into small groups of four to six according to the city to which they are going. "Contacts" within the city are in charge of running the actual Plunge itself. We look for people in inner cities who are operating social programs, or working in agencies trying to alleviate the problems and injustices," said Doyle.

The Center for Social Concerns also knows most of the contacts personally, said Doyle. The contacts have schedules which are structured so students can get the most out of the program, and they have definite guidelines in which the students operate, said Doyle. Kelly Quinn, a senior who went on the Plunge last year, said she went on the Plunge because "I have never really been exposed to the urban life of the city which I have lived so close to for so many years. I understand this life only in terms of fear, dirt, and a few lights shining out a window."

"There are some situations which simply require experience to allow understanding to develop," said Mary McDaidle, a senior. "It is not always enough to say I've read about that. The Urban Plunge provides the experience."

Ramona Sedil, who made a Plunge last year in Paterson, New Jersey, said "Going into the Plunge, I was not sure what types of programs were available to the poor in general." Following the Plunge, she said she saw many of the federal programs that exist to help the poor. "It seemed that everywhere we went, Uncle Sam was paying at least part of the bill."

Seidel said that on her Plunge she went to a soup kitchen and helped out by serving lunch to 140 people, toured a Medical Center and a housing project and then had dinner with a Nicaraguan immigrant.

"My experience (before the Plunge) was that of Washington was quite limited, as I had not gone beyond looking at low-income, low-opportunity areas from the car window. But the Plunge has been a different Plunge sites around the part of Paterson, New Jersey, said "Going into the Plunge, I was not sure what types of programs were available to the poor in general." Following the Plunge, she said she saw many of the federal programs that exist to help the poor. "It seemed that everywhere we went, Uncle Sam was paying at least part of the bill."

"My experience (before the Plunge) was that of Washington was quite limited, as I had not gone beyond looking at low-income, low-opportunity areas from the car window. But the Plunge has been a different experience. I will value for a long time. I urge everyone to go."
Infant Doe attorney speaks tonight

By MICHAEL SPELLMAN

The attorney for Infant Doe will speak on legalized infanticide tonight at an auditorium lecture. The attorney, James Bopp, was the legal representative of the baby Infant Doe who was allowed to die of starvation in an Indiana hospital during the spring of 1982. The lecture is sponsored by ND/SMC Right to Life.

On April 9, 1982, a baby boy was born at Bloomington Hospital. The boy was born with Down’s Syndrome, which causes varying degrees of mental and physical retardation, and also had a deformed esophagus which prevented him from taking food orally. The parents, after conferring with doctors, decided to withhold intravenous feedings and forgo corrective surgery on the deformity. The hospital had refused to make the infant’s condition public, and when the press did find out, the boy was on the verge of death. There were many families willing to adopt the child. Bopp represented one of these families, and filed suit to give guardianship of the baby to the state. The child’s parents did not want the child adopted, and their decision was upheld by the Indiana Supreme Court.

The baby died on April 15, and since the parents’ names were withheld for their protection, the boy is known only as Infant Doe.

Bopp will draw on his own experience in the Infant Doe case to discuss the legality of infanticide and its ramifications. He believes that infanticide must be stopped not only because it is bad in itself, but because it can draw the best crowds, but I think that for the beginning of the year and for just getting started on it, we’ve been very pleased with the whole thing.”

CAREERS IN BUSINESS MANAGEMENT

Challenging opportunities are offered in the following areas of business management:

- Finance
- Contract Administration
- Retail Merchandising
- Food Service
- Inventory Analysis and Purchasing
- Transportation and Distribution
- Fuel Planning and Analysis
- Computer Systems
- Operations Analysis

Visit with representatives of the U.S. Navy Supply Corps to learn how your degree in accounting, economics, business administration, computer science, or engineering can prepare you for an exciting business career.

An Equal Opportunity Employer

Flu

wasted talent during off periods.”

University Health Services maintains an outpatient clinic on a general first come, first serve basis. Emergencies are handled first. But Sister Ruidl said that appointments are not made because of the students’ odd schedules. Also the infirmary likes to keep students who do not think they are seriously ill a little longer for examination to be sure the person is all right.

“We don’t ever do walk-in’s,” Sister Ruidl said. Consequently, in individuals are sometimes kept waiting because of the thorough policy.

On a recent weekday morning, there were ten students in the waiting room, varying in condition.

Freshman John Logue, who has been recovering from gastroenteritis in the infirmary for several days, was generally complimentary of the staff and the service.

“The nurses are very nice and concerned, and everyone makes an effort to see that you’re comfortable,” he said.
Coping with pressure and seeking help

The tension hangs in the room like cigarette smoke in a bar and your palms feel sweaty as you pick up your pen. You try to tell yourself that it is no big deal, yet you feel as though someone has their hand around your neck while another person stands on your chest.

A short while later you feel much more at ease. Now there is a spring-like atmosphere in every step you take. You’ve passed the test, you feel as though someone has their hand on your chest. Around your neck while another person feels sweaty as you pick up your pen. You try to tell yourself that it is no big deal, yet you feel it less frequently and are less likely to alter your behavior due to its effects. Others find it to be a constant menace which restricts their sleep, upsets their eating habits and exerts a negative effect on personal relationships and academic performance.

A certain amount of pressure is good. Without it we would avoid bettering ourselves. We would feel more competent and self-satisfied. The problem is not pressure, but our ability to cope with it. If a person has a major exam and claims to feel no pressure, then chances are they are taking it too lightly, or they are lying. Denial is not an adequate coping mechanism. In fact, it may cause the situation to become worse since the pressure continues to build without any way of releasing it.

The individual most finds his or her own way to cope with pressure, because it is not a short term thing confined only to a person’s academic career. In fact, as most graduates will attest, undergraduate pressure is only the tip of a very large iceberg.

Coping mechanisms range from physical activity to light reading and almost everything in between. The specific method is not important, as long as the person identifies the anxiety and puts it in proper perspective. Only then will the individual avoid suffering any undesirable side effects.

There is nothing wrong with seeking help from a friend or trained professional if you are unable to cope with tension on your own. Too many people go around tearing their insides out as they strive for the top grade, the prestigious graduate school, or the important job.

Those who are unwilling or unable to cope with the strain and tension should ask if the goal they seek is really worth it. In my mind, the long-term effects on health and personal relationships are too great a price to pay for some type of publicly recognized success. But for some, it is obviously a cost they are willing to bear, regardless of what they lose along the way.

United Way

Dear Editor:

Late Tuesday the annual Student Campaign for the United Way began. So far things are going well and we thank all of you who are helping to coordinate the drive. As you may have noticed, there have been a few changes in this year’s approach, hopefully for the better.

First off, we have eliminated the competition between dorms. Charity should be done for the sake of others more necesarily than for ourselves, not to see whether one dorm is “better” than another. Also the phrase “give your fair share” is not being used. For one thing the term “fair share” is quite ambiguous.

What might be considered fair for one student is not necessarily fair for others. Similarly we are doing everything we can to end the hard sell approach of the past. If a student, for whatever reasons, chooses not to contribute to the United Way, it is his or her prerogative. The United Way is a cause very worthy of your consideration. It acts as an efficient clearing-house for 35 service organization in the South Bend area, including Logan Center and Goodwill Industries. No money goes to the United Way, or to provide abortion services. Student participation in past years has been fantastic, and hopefully we can all do an exemplary job this year as well.

Thanks for taking the time to read this and for considering the United Way. You can make a contribution to the United Way through your section leader, or if you are an off-campus student you can donate at the Umbredman booth in the main lounge of LaFortune. As stated on the posters around campus, our message is a simple one: Please Give. Brian Callaghan Mike Cartlin The 1983 United Way Chairmen

Abortion funds

Dear Editor:

One of the reasons I came to Notre Dame was it’s commitment to uphold beliefs taught by the Roman Catholic Church. However, I am upset by its support of an organization which promotes murder, either directly or indirectly. I refer to the United Way drive, and my charge is specifically directed against the Planned Parenthood organization, an organization fund in large part by the United Way.

Planned Parenthood counsels couples on how many children they will have. Those who come for advice are often poor and sometimes desperate. The counselors present several options, and one of these is abortion. Abortion is a completely unacceptable alternative in the eyes of the Catholic Church. Therefore, any organization which presents abortion as a viable option for family planning should not be supported by the Catholic Church and we are a part of the Church. Helping the United Way with our contribution will, directly or indirectly, help Planned Parenthood.

Thus, Notre Dame should not support the United Way Drive.

You may ask, “Why deprive the United Way of our contributions, when it does so many good things?” Because there is nothing that can compensate for the murder of innocent human beings, absolutely nothing. I have heard that none of these funds will go to Planned Parenthood. That may be true, but our contributing to all the other branches of the United Way will allow more of any other funds be directed towards Planned Parenthood. I do not believe it is just to say that we will remove this crime from our society.

Surviving by more than the skin of its t
A comedy of every man featuring a dizzy but dazzling S
by Kenneth Moore
features guest columnist

Theatre

In an age of silent movies every man could take the avances by inches, stepped unknowingly over open manholes and dodged locomotives, bullets and wild horses with a dance step. Such is the humor of the Skin of Our Teeth. But it's better than that, for the comedy is imbued with a love of humanity, its frailties and its genius.

The seriousness of the threat to the human species is made official early in the first act with a WNDU-TV new report from Mike Collins. But as we, in Excelsior, are Sabina, the housekeeper who lets us know that all is mad confusion. The author hasn't seen "such a week as this year," as noted by law, the head of household says he'll check it out with Moses, who incidently is then in the house warming himself.

Well, the human species' one playwright lets us know, survive only by "The Skin of Our Teeth." Life is a comedy amid impending doom. Sabina says let's hear the comedy now. She in of course the eternal "other woman." Mrs. Antrobus, on the other hand, is the personification of the maternal instinct. She's a warm loving mother, a kindly and setting nurseryman, but if she has to, she'll kill to protect her children.

The children are not all that great. Henry Antrobus has a weapon, a slingshot which he aims with childish treachery where it will do the least harm. Mother Antrobus combs his hair over a nasty wound on his forehead, that is as red as ever, and she would like to forget his former name. Care, and just call him Henry Gladys Antrobus, a bonny little daughter at the hopscotch age is fast becoming a woman. Are they the future of humanity? My God!

In Act II, the Antrobus family is in Atlantic City at the convention of the Ancient Order of Mammals, sub-species Humans. Mr. Antrobus has been elected president of the society and is preparing a speech to the whole world which he views as the reigning beauty queen of the convention. Did Mr. Antrobus fix it for his wife? Maybe so. Does Sabina, the tempers, have designs on Mr. Antrobus? Yes she does, and she decides that getting him for her own is the most important thing she'll ever do. She lures him off to a beach cabana, she seems to have no choice, but while he's there the worst of storms appear on the horizon, and he selects to return to his family, leading them and all the animals two by two, to temporary safety. His wife is glad to have him back, even though she knows that nothing is special. But she's moved by the promise that he's kept them together for 500 years. As Act III is a testimonial to kinship, thus is Act III a celebration of civilization.

Act III begins following a war. War isn't all that bad. Sabina tells us. It wasn't exciting at all. She's not sure she'll enjoy the monument of normal living we refer to as post-war. Meals on time, the evening news. It's all too predictable. She likes a little action. The great news is that she's not pregnant, thought, e.g., Aristotle, Plato, Spinoza, and the wisdom that lives with us dramatized in outrageous I, hence as the first half progressed, the Irish were taking shape. Because of our interest, all answers had to be factual and statistical in offensive categories. More importantly, the answers had to evolve from some peculiarity in the player's name. Questions took on whole new meanings.

Holled running back? Jerome Heavens.

"Stately" quarterback? Joe Montana.

Log rolling quarterback? Johnny Lapick. (Get it Lapick as short for lumberjack.) I think that one should have been axed.

Passer named for a geological formation? Rocky Biler came to mind but he was a running back. And, we learned, he never was a running back. This game was fun and educational. Oh yes, the answer, Cliff Brown.

By now, Notre Dame was sending in the reserves and our goggles were turning into goggles. While you will be glad to know that it wasn't long before the final gun seemed to be fired my ears. Pleasured receiver? Paul Hornung.

And, finally with quarterback with a name for a geological formation? Rocky Biler came to mind but he was a running back. And, we learned, he never was a running back. This game was fun and educational. Oh yes, the answer, Cliff Brown.

By now, Notre Dame was sending in the reserves and our goggles were turning into goggles. While you will be glad to know that it wasn't long before the final gun seemed to be fired my ears. Pleasured receiver? Paul Hornung.

Aect the audience, please. Mere presence in the theater is not enough. You must engage them. Make them laugh, make them cry, make them think. The Skin of Our Teeth is a play about the triumphs and failures of the human spirit. It is a story of survival and endurance. It is a story of hope and perseverance. It is a story of the human condition.

The Skin of Our Teeth is a play that requires a lot of work. It is a play that requires a lot of effort. It is a play that requires a lot of commitment. It is a play that requires a lot of dedication. It is a play that requires a lot of imagination. It is a play that requires a lot of creativity. It is a play that requires a lot of hard work. It is a play that requires a lot of unity. It is a play that requires a lot of teamwork.

The Skin of Our Teeth is a play that is about the human spirit. It is a play that is about the human condition. It is a play that is about the human experience. It is a play that is about the human heart. It is a play that is about the human soul. It is a play that is about the human mind.

yields per car on the ground and 82 total passing yards, but they thoroughly intimidated and pressured the opposition with an intensity unmatched in the previous games. The defense has also come to terms with the option (veer) which has traditionally frustrated Notre Dame defensive squads in the past.

Notre Dame's offense was consistent and effective although the Gamecock defense nearly rallied at the first part of the second half. On the first Notre Dame play from scrimmage, Picknett ran the fake for 53 yards to the Carolina 15-yard line. Unfortunately, an interference call set the Irish back 15 yards where Johnston kicked his long 49-yard field goal for an early Notre Dame lead.

On the next offensive drive, Beuerlein hit Mark Bavaro for 21 yards and then completed a short pass to Chris Smith who ran the ball 27 yards for the touchdown. The Irish needed nine plays to go 66 yards.

During the next Gamecock possession, the Irish defense pressured quarterback Allen Mitchell to throw an interception into the waiting hands of Chris Brown. The Irish then drove the ball to the Carolina 29 where Johnston booted home another three points.

The Irish did not stop, though, capitalizing on a Gamecock fumble to score three more points on a 41-yard field goal.

With 11:53 left in the half, Beuerlein connected with Picknett for the final score of the half. Beating a Gamecock linebacker, Picknett grabbed a short bullet and took off for 59 yards, giving the Irish a 23-0 lead going into the half.

The game got a little more interesting in the third quarter when the Gamecocks scored a touchdown. However, they faltered on the conversion, ending the third period with a 24-7 lead.

South Carolina made one final bid at the Irish 8-yard line. However, on fourth down, Mike Gain caught Gamecock quarterback Jim Brown for a nine-yard loss.

Notre Dame then proceeded to put an end to it, as Picknett capped off another fine day by scooting around the left side for 10 yards and nal touchdown of the day with less than five minutes remaining.

The Dallas Cowboys remained the National Football League's only unbeaten team — barely — with a comeback 27-24 decision over the winless Tampa Bay Buccaneers on Monday.

The host Cowboys won the coin toss to start overtime and marched into Buccaneers territory. Rafael Septien, given another chance after Tampa Bay's Thomas Morris roughed him on a futile 50-yard field goal try, moving the ball to the Tampa Bay 28, his 42-yarder.

Dallas, 6-0, tied the game with 43 seconds to go in regulation as Timmy Newsome completed a 52-yard scoring pass play by tight-lining down the sidelines the last 35 yards with a Danny White pass. Operating with no timeouts and 29 seconds to play, the Cowboys went 74 yards in five plays for the tying score. Ron Springs caught three passes before White and Newsome hooked up.

The Bucs, who were humiliated only a week ago 55-14 by Green Bay, outplayed the Cowboys despite having more than 170 yards in penalties. Elsewhere, it was Buffalo 38, Miami 35 in overtime; Cleveland 10, the New York Jets 7; New Orleans 19, Atlanta 17; Washington 38, St. Louis 14; Denver 28, Houston 14; Minnesota 23, Chicago 14; Detroit 38, Green Bay 14; Baltimore 12, New England 7; Philadelphia 17, New York Giants 13; the Los Angeles Rams 10, San Francisco 7; San Diego 28, Seattle 21; and the Los Angeles Raiders 21, Kansas City 20.

GROUP PROGRAMS
Sponsored by the
Counseling and Psychological Services Center
and Notre Dame Student Life

BUILDING SELF-ESTEEM: A program designed to help students identify feelings, thoughts, and behaviors that affect self-worth, and to explore and practice new ways of increasing positive feelings. ADMIRATION DATE: Monday, October 31, 1983
TIME: 4:00-6:00 p.m.
RELATIONSHIP ENRICHMENT: A program designed to teach partners to communicate effectively and enhance their relationship by learning about exploring and discussing new skills to express their feelings in a constructive way. Both partners are required to attend. ADMIRATION DATE: Tuesday, October 18, 1983
NO. OF SESSIONS: 1
DEVELOPING ASSERTIVE BEHAVIOR: A program designed to help students identify thoughts, feelings, and behaviors that are not assertive, and to develop more effective ways of relating with others. Membership is restricted to males. ADMIRATION DATE: Monday, October 31, 1983
TIME: 6:30-8:30 p.m.
STRESS MANAGEMENT: A program designed to help students identify stressful factors in their daily lives. Each student will be provided with skills to deal with stress and develop a stress management program to meet their individual needs. ADMIRATION DATE: Tuesday, November 1, 1983
TIME: 7:00-9:00 p.m.
MAN'S AWARENESS GROUP: The purpose of this group is to bring men together to examine the effects of being male, the role men assume, the responsibilities of being male, explore one’s ways of dealing with the demands men face, in order to help students understand and clarify their own personal needs at this, and learn other ways of relating with others. Membership is restricted to seniors. ADMIRATION DATE: Wednesday, October 19, 1983
TIME: 7:00-9:00 p.m.

### Fall baseball season

**ND splits two with Lewis**

By SEAN CALLAHAN

Sports Writer

If you hear the crack of a bat coming from Jake Kline Field, you're not hearing imagine. Although the Irish baseball team has been publicized much, the Notre Dame baseball team is busy with its version of the exhibition season - the fall season.

Lou Beuerlein, Irish baseball coach, received one more of the victories he desires in this fall exhibition season when his team split a doubleheader yesterday with Lewis University.

The Irish are now 3-5 in what Gallo has termed a "probable and pretty successful fall." He explained, "I think the fall is important, because it's something to build on in the spring."

So far the Irish have made this fall worth building on. They even played well in yesterday's 3-1 loss of the nightcap. They got seven hits and nine walks, getting many runners on base. In each of the final six innings, the Irish had a man in scoring position but only managed one run.

"To say we didn't get the timely hit would be an understatement," said Gallo.

In the second inning, after walks to designated hitter Carl Vuono and third baseman Jim Dee and a sacrifice by catcher Brian Gibbons put men on second and third with one out, Steve Pasquill struck out and Rich VanHousen bunted to the shoetop to end the inning.

The next inning was similar. Second baseman Jack Morfin followed outfilder Mike Woodcock's single with a walk, and a sacrifice by outfielder Mike Traudel again placed men on second and third with one out. After first baseman Mike Metzler hit a short fly to right for the second out, Vuono walked to load the bases, Dee struck out to end the threat.

The Irish left the bases loaded again in the fifth. With two outs and Traudel on first, Vuono single and Dee walked, again with the run ending when Brian Gibbons hit a line shot right to the centerfielder.

In the sixth, Irish runners were again placed on second and third. With two outs, third baseman Mike Metzler hit a walk-off single to right centerfield. The Irish offense has shown signs of life this fall, scoring more runs and getting runners on base.

By SEAN CALLAHAN

### Nebraska has close one, Texas romps

Associated Press

Top-rated Nebraska had its first close call of the season, while runner-up Texas whipped eighth-ranked Oklahoma and defending national champion Penn State continued its comeback from a rocky 1983 start by beating third-ranked Alabama.

Those were the highlights of a rather college football Saturday that ran mostly true to form — except in Stillwater, Okla., and State College, Pa.

**Angry Irish shut up 'Cocks, crowd**

By SCOTT BOWER

Sports Writer

A Columbia disk jockey asked an audience of disgruntled Carolina fans, "Gamecocks, can you take it?"

Apparently not. The U.S.C. home crowd which was expected to be a major game factor, went awont as Notre Dame trounced the Gamecocks 50-6, in a very aggressive game of football. The 74,500 record crowd of 74,500 quickly diminished as the Irish and Mother Nature dropped a lot of rain on South Carolina.

Gallo was a quick, aggressive opponent still pumped up after beating Southern Cal 38-14, last week. Unfortunately for the Gamecocks, the Irish got tired of criticism and decided to play tough. The Notre Dame squad took the field and quickly set out to imitate the Irish as well as the crowd.

The importance of shutting down the crowd or twelfth man was emphasized by quarterback Steve Beuerlein who had another fine day in charge of the Notre Dame offense.

"We had to keep the crowd down," said the freshman. "It was still hard (after scoring) to hear the calls."

Beuerlein, who threw his first two touchdown passes as a Notre Dame quarterback to Allen Pinkett and Chris Sierra, played an excellent game, but more than due modesty, giving credit to the size of Notre Dame's offensive line and reducing the skill of the Irish running game.

"They couldn't do anything," Beuerlein, "being a freshman I still need to be brought along."

The freshman quarterback completed 9 of 15 passes for 168 yards.

Tailback Allen Pinkett, who also received a touchdown pass from Beuerlein, was the key to Notre Dame's victory. He had 110 yards from 23 carries, exceeding the 100-yard mark for the fourth time this season.

Pulcifer and Mike Johnson also contributed greatly to the scoring by kicking three field goals, including a 38-yarder with four seconds left.

"We played with great intensity and really kept loose throughout the entire game," said Beuerlein. "It was just a matter of time to put the pieces together."

Things really came together for the Irish defense which played a solid game. Not only has their performance improved, allowing only 3

**see ROMP, page 9**
