WHC takes no funds from dining hall meals

By SEAN PICKETT

No money was donated to the World Hunger Coalition as a result of the special meal served in the dining halls Monday and Tuesday. The meal, consisting of brown rice, vegetable soup, bread and salad, was meant to be a typical meal in an underprivileged country.

According to William Hickey, director of Notre Dame Food Services, although the menu appeared to be less expensive than regular dining hall meals Monday and Tuesday, the menu was a poor choice.

"It was a beautiful day to be on campus," said the president of the WHC, "and the artist spent most of the day finish- ing a number of canvas paintings of the fall colors surrounding the dome.

Reagan and Mondale plan strategy for Sunday foreign policy debate

Associated Press

President Reagan and Walter Mondale settled in yesterday for four days of intensive study for their foreign policy debate and left campaigning duties to their running mates on the West Coast, where Vice President George Bush called the latest Soviet overture "a positive sign.

As the countdown continued before the final presidential debate Sunday night in Kansas City, Soviet President Konstantin Chernenko held out hope that superpower relations could improve if the United States shows interest in seeking a policy to reshape the political landscape.

"Where all of this will lead… I don't know," Bush said in San Francisco. "There is a new tone and I think it's a positive thing.

Mondale and Reagan spent the first part of the week exchanging criticism of each other's grasp of world issues. Reagan said his Dem- ocratic opponent was "confused" about Soviet intentions, Mondale said the president had "naive and primitive notions" about national strength.

Montada is hoping that a second strong performance against Reagan in their final debate will "serve as a catalyst for a last-minute surge to victory," aides say. Reagan will spend a little less time in his debate prepara- tion, according to White House aides, in response to concerns that he was "overheated" for the first encounter.

The White House has arranged a campaign pep rally in Kansas City just prior to the debate. "It's got to pump you up," one aide said of the effect on the president.

Mondale's running mate, Geraldine Ferraro, is also preparing for Sunday night in Kansas City, where she will focus on women's issues.

Both men plan to keep their schedules as free as possible for debate preparation. Mondale canceled out of the Al Smith dinner in New York tonight. Reagan is still scheduled to attend.

Meanwhile, a new ABC News/Washington Post poll released last night gives Reagan a 12-point lead, 54 percent to 42 percent, compared to an 18-point margin in a similar poll taken before the Oct. 7 debate. The poll, with a margin of error of 3 percent either way, surveyed 1,505 registered voters by telephone Oct. 12 to 16.

**Inside Thursday**

**Reach out and teach someone**

Let me take you back three years. I am a freshman at Notre Dame. It is a Sunday morning after the first football game. At 9:50 a.m., the telephone rings. After I peel myself off the ceiling, I reach for the phone, cursing the fool who called me so early. "Peter, you fool! It took a while, but I finally recognized my mother's voice."

Mom broke freshman rule number one: don't call your freshman before noon on weekends. From that moment I knew my mother had a lot to learn about college life. And since I am the first and only one in my family to attend college, it was up to me to teach her.

Because Notre Dame was a noted sports college, one of my first tasks was to teach Mom something about sports.

Throughout that first football season, Mom marveled at exciting aspects of a Notre Dame football game. But Mom's idea of an exciting game seldom had anything to do with the game itself. The band, the fans, and even the Gooyard blimp held her attention more than trivial things like the final score.

Mom also had a lot of questions about the points of the game. "Why do they throw those little yellow flags?" she would ask me, or, "Why do all of the sudden stop playing and kick the ball?" Both very tricky questions.

Now, after two and a half years, Mom is a seasoned fan, and her questions are even tougher. Now she asks me what went wrong this week.

At big a challenge as football presented, basketball was even tougher. Since the action is much quicker in basketball, it took Mom a long time to pick up the subtleties of the game — like how teams score points. "Why do they follow the whistle so much?" and "Why do some players get to throw the ball while everyone else watches?" she would ask.

I've patiently tried to deal with Mom's questions, and although she still doesn't fully understand the game, she has shown some improvement. At least now she knows that we get two points almost every time the ball goes through the hoop.

But Mom college social life also presented Mom with some problems. Yes, Mom, we do have parties, with girls and everything.

Also, Mom had trouble with my rather odd sleeping habits during the week. "What do you mean you didn't get to sleep until 4 a.m.?"

"Well, Mom, there was this 10 page paper and..."

Since I've been at college, my relationship with my help has evolved from one of simple mother and son to a true friendship, where each of us learns from the other.

Whereas when I first arrived on campus, it was always Mom who called me worried and I wasn't around, now I actually call her once in a while. And if she's not there I sometimes worry.

Once I had to call Mom with some urgent news. I tried unsuccessfully to reach her until well past mid night, when I finally went to sleep. As soon as I woke up, I called and asked her where she had been all night.

She gave me a weaker excuse than I'd dare to offer after a such a blatant curfew violation. She told me that she was at a parish council meeting until 2:30 a.m. Sometimes Mom acts like I was born yesterday.

Now whenever I'm out late, I always tell Mom I was at a parish council meeting.

While at home I took Mom for granted. She was always there to offer sound financial advice and a nice home. Now there are 711 miles between us and I have to make do without her help.

Although New Jersey, Pennsylvania and hours of exiting Ohio landscapes separate us, in some ways we are closer than ever. Our weekly conversations are more mutual advice sessions than typical mother-son conversations.

We share more than our weekly experiences. We ask each other for advice on everything from me asking her how to do laundry, to her asking me if I think a certain stock sounds like a good investment. My times have changed.

Before I left home not only did I take Mom for granted, I also treated her like she was born yesterday, and I was Mr. Know-it-all on my way to college. How wrong I was.

WASHINGTON - The House Intel­
ligence Committee had been unaware o f its
existence prior to the A P's supplying
Boland said the House Intelligence
Committee had been unaware of its
existence prior to the A P's supplying
a copy to the panel on Oct. 1.

In a report Monday, the 4 P, citing
intelligence sources, said the manual was
produced by the CIA.

In a letter to Rep. Thomas
Downey, D-N. Y., who had called for
a congressional probe, Boland con­
tinued to refuse comment on
yesterday the agency still had no
answer questions about it.

Boland, using his toughest lan­
guage to date in attacking CIA covert
support for the rebels, said "the
document should never have been
produced by any element of the
United States government. It
opposes the doctrine of lenity, not
jefferson.

"It embraces the communist
revolutionary tactics the United
States has pledged to defeat through
out the world. Its emphasis on
deceiving the populace makes a
mockery of American's championship
of democratic values."

The manual suggests arranging a
violent demonstration that will lead
to the death of one or more rebel
supporters and the creation of a
"martyr." It also instructs the rebels
in how to coerce Nicaraguans into
carrying out assignments against
their will.

In his letter, Boland said the
manual "offers proof (that) the se­
cret war in Nicaragua is not directed
against Sandinista guerrillas. The war
is an effort to overthrow the Sandi­
nistas." Nicaraguan leftist ruling
administration officials have al­
ways denied this, but the manual
clearly adopts the contras avowed
aim of deposing the govern­
mint in Managua. Further, the - manual
reveals both the conscious targeting
of individuals for 'neutralization' and
a commitment to the safety of lives of
citizens in demonstrations that is
repugnant to a nation that con­
dems such acts in others," Boland
said. Boland also compared the manual
to CIA-directed mining of
Nicaragua's harbors early this year.

"Like the mining of Nicaragua's
harbors, the manual was not
revealed to the committee until
after the fact, and then only after the
committee asked about it. Like the
mining, the manual is a disaster for
United States foreign policy."

Yesterday, administration officials con­
cluded to refuse comment on
reports about the manual, and Sen.
Daniel Patrick Moynihan, D-N.Y.,
vice chairman of the Senate Intelli­
gence Committee, told the CIA to
explain the manual to that panel by
the end of the week.

CIA spokeswoman Patti Volz said
yesterday the agency still had no
answer questions about it...

Administration responds to Soviet offer to break arms talk deadlock

Associated Press

WASHINGTON - The Reagan administra- tion, responding to a Soviet call for possible U.S. steps to break the arms control deadlock, said yes- terday it wants improved relations but has no obligation "to pay a price so that the Soviet Union will come back to the nuclear negotiating table."

White House spokesman Larry Speakes, responding to Soviet Presi- dent Konstantin Chernenko's offer to improve superpower relations, gave no indication the United States is prepared to shift its position on any arms control issue Chernenko cited.

"When the Soviet Union is prepared to move from public ex- changes to private negotiations and concrete agreements, they will find us ready," Speakes said in a state- ment issued in response to an inter- view with Chernenko published in yesterday's editions of the Washing- ton Post.

"The next step is to do it privately," Speakes said.

But he added "we don't believe we are obligated to make any major concessions in advance of negotia- tions."

Speakes responded to Chernenko's suggestion that U.S.- Soviet relations would improve if the United States would show some movement on "at least one of the es- sential questions" that divide the two nations on arms control.

Govt. panel reports on problems in education

Associated Press

WASHINGTON - A panel of prominent educators, bidding to turn the reform spotlight from America's high schools to its col- leges, is warning that higher educa- tion is suffering serious problems, from underpaid faculty to deteriorating student facilities, that have led to students abandoning the liberal arts.

The panel, in a report prepared for Education Secretary T.H. Bell and his National Institute of Education, called for sweeping changes in college life. "We are prepared to shift its position on arms control."

Speakes responded to Chernenko that there is no sound al- ternative to constructive develop- ment in relations between our two countries," Speakes said in an an- nouncement read before television cameras, which generally are barred to journalists.

"We are pleased to see the empha- sis he puts on possible possibilities for U.S.-Soviet relations," he said.

He insisted the United States has "repeatedly demonstrated that we are ready for cooperation with the Soviet Union." And he repeated the standing U.S. position on the four conditions that Chernenko mentioned that space weapons talks be preceded by a moratorium on the testing or deployment of such weapons, a freeze on nuclear weapons, U.S. ratification of underground nuclear testing treaties signed in 1968 and 1976, and a U.S. pledge not to be the first to use nuclear weapons.

Speakes said that in his recent meeting at the White House with Scien- tific Foreign Minister Andrei Gromyko, Reagan stressed "our strong desire to move to a more constructive dialogue across the board."

During the current presidential campaign, Democrats and other crit- ics of the president have faulted him for failing to achieve any arms con- trol agreements with the Soviets, for not aggressively hostile to the Kremlin, and for failing to meet with a top Soviet leader until last month's session with Gromyko.
More women enrolled in colleges than men

*Associated Press*

WASHINGTON - American women are pursuing higher education in ever greater numbers, accounting for much of the increase in college enrollment over the last decade and now outnumbering men at the nation's universities, the Census Bureau said yesterday.

Women accounted for about 52 percent of all college students as of October 1982, the new study said, with the biggest jump among women aged 25 to 34 and those attending two-year colleges.

And in a related report, the National Science Foundation disclosed that its survey of graduate schools in 1983 showed that women collected one-fourth of the doctoral degrees in science and engineering, nearly double their rate of a decade earlier.

"One of the most significant developments in higher education and research in the last 20 years has been the increasing participation of women," the science foundation said.

The Census bureau counted 10.9 million students aged 14 to 34 in colleges and universities in 1982, up nearly 3 million over 10 years.

"About four-fifths of the total increase in enrollment was accounted for by the increase in the number of women enrolled," said the census report School Enrollment - Social and Economic Characteristics of Students.

"More than half of the observed increase in the number of college students was among students 25 years old and over," the bureau continued. "In fact, the increase in the number of older women alone accounted for 44 percent of the total growth in the number of persons enrolled in college over the decade."

The bureau counted 3.5 million women and 5.4 million men aged 14 to 34 enrolled in colleges. There were 4.6 million women and 4.4 million men undergraduates, while in graduate studies men slightly outnumbered women. The small number of people over age 34 enrolled in colleges and universities is about evenly divided between men and women.

By comparison, in 1972 there were 4.8 million men aged 14 to 34 enrolled in colleges and universities and 3.5 million women.

While increased desire for education among women was the prime reason for their growing share of places in college, the bureau noted that another factor was relatively low growth in male enrollment.

This resulted as men returned to a more normal rate of college attendance after the Vietnam War, which had spurred males to higher attendance because it was a means of deferring the draft and, later, because veterans were eligible for educational benefits.

While the tendency of women to marry younger than men has tended to lower their college attendance in past years, many may now be returning to local community colleges to resume their education, raising the percentage of women over 25 attending college.

A recent study by the Conference Board, a business-sponsored research organization, has also found that women students now outnumber men at colleges and universities.

Lt. Gov. asks support for state tourism

*Associated Press*

MADISON, Wis. - Lt. Gov. James Flynn is asking carpers to increase their support of Wisconsin tourism by expanding the state's subsidy of recreation advertising.

The proposal to spend more money on television and literature promotion reflects the industry's argument that the legislature spends too little in comparison with the promotional campaigns of Minnesota and Michigan.

Spokesmen for the Division of Tourism say Minnesota, and even Missouri, are making increased pitches to the Chicago area in hopes of wooing some of the summer and weekend traffic which Wisconsin traditionally hosts.

Flynn said yesterday he is asking Gov. Anthony Earl for 86.27 million to operate the Division of Tourism from 1985-87, including a 97 percent increase in the portion designated for advertising and promotion.

He said the money would enable Wisconsin to double its fall and winter advertising programs.

It would allow the division to buy television commercials in Illinois, Wisconsin, Michigan and Minnesota, and launch new spring-summer campaigns in Indianapolis, St. Louis, Louisville, Columbus and Cleveland, he said.
American biochemist wins 1984 Nobel prize

Associated Press

STOCKHOLM, Sweden - An American biochemist yesterday won the 1984 Nobel Prize in chemistry for research that led to safer medication, and the prize in physics was awarded to an Italian-Dutch team of nuclear physicists who found particles that scientists had sought for 50 years.

The chemistry prize, to R. Bruce Merrifield, 63, of New York's Rockefeller University, gave Americans a share more than half the three annual Nobel science prizes since World War II.

Merrifield was honored for work he did in the 1950s and 1960s, developing a new method of synthesizing amino-acid compounds called peptides, which has revolutionized the manufacture of drugs such as high blood pressure medicine, insulin and other hormone medications, and has been used in genetic technology.

The Royal Swedish Academy of Sciences gave the Nobel Prize in Physics to Carlo Rubbia, 50, of Italy and Simon van der Meer, 59, of the Netherlands for discovering the W and Z subatomic particles which are believed to carry one of nature's four basic forces - the "weak interaction force" - in much the same way that photons carry light.

Unlike the Rubbia-van der Meer discovery, which has no immediate practical application, Merrifield's development of a simple peptide-synthesis process has "become a basic tool that all laboratories use," said the Swedish Academy's Professor Bengt Lindberg.

Merrifield, a native of Fort Worth, Texas, described his prize-winning work as "an idea I had 25 years ago on how we can do chemical synthesis of compounds, particularly peptides, by anchoring them to some insoluble support."

"It had advantages of increased yield and purification," he said. With their growing importance in medicine, he said, "we can do them much faster, we can make more of them and therefore they're available for medical use."

He didn't know he'd won until he arrived five minutes late to his laboratory and got the news from the cleaning woman. "Some years ago, I knew that somebody had nominated me. But that was years ago and I had assumed that nothing had happened," Merrifield said in a telephone interview, his voice still shaking.

At a news conference later, he said he didn't know what he would do with the $193,000 prize money. "I could use a new car, but I really haven't given any thought to that," he said, adding that the prize might mean "maybe I can get a few more rooms" in the lab.

Rubbia, caught up in an air traffic controllers' strike, learned he and van der Meer had won the Nobel Prize while he was trying to catch a plane to Trieste, Italy. "I was riding a cab from Malpensa (Airport) to Linate (Airport) in Milan when the radio announced the Nobel decision," Rubbia told reporters.

The existence of W and Z particles had been predicted before, by 1979 Nobelists Sheldon Glashow and Steven Weinberg of the United States and Abdus Salam of Pakistan.

They never had been found, however, until Rubbia and van der Meer discovered them last year in a particle accelerator they built for the European nuclear research organization, CERN, in Geneva, Switzerland.

When he was told about his prize in Geneva, van der Meer said, "I hope it gives a boost to CERN and allows it to continue the research despite criticism for being too expensive."

The other Nobel Prize winners this year were black South African Bishop Desmond Tutu, for peace; Czechoslovakian poet Jaroslav Seifert, literature; and Niels Kai Jerne of Denmark, Cesar Milstein of Argentina and Georges Kohler of West Germany, for medicine. The $193,000 prizes will be presented Dec. 10.

Canadian Banquet

Canadian External Affairs Minister Joe Clark, left, and his wife Maureen McTeer, far left, chat with United States Secretary of State George Schultz and his wife Helens at a banquet in Toronto Monday.
The Federal Communications Commission, under its Fairness Doctrine, requires holders of commercial broadcast licenses, both television and radio stations, to allocate a certain amount of air time every day to items of public interest and to provide a balanced presentation of opposing viewpoints on controversial issues of public importance. This rule has been in effect since 1959.

The FCC is currently holding hearings to determine whether the Fairness Doctrine should be made permanent. Most of the major stations agree that the Fairness Doctrine is necessary and that it should be extended to radio stations as well. Yet, the station administrators are not familiar with the Fairness Doctrine and, therefore, they may not know its implications. Does having these media available make the Fairness Doctrine unnecessary? Unfortunately, the answer is no. Despite this technological proliferation, over 75 percent of the time viewers and radio listeners now watch or hear commercial broadcasts.

Admittedly, the Fairness Doctrine is not a perfect device, but at least it provides TV/radio audiences with a much needed break from the mind-numbing endless commercials that are presented today. Perhaps, rather than focusing on the consequences of requiring broadcasters to provide a balance of views, we should focus on the benefits that the Fairness Doctrine brings to society. The Fairness Doctrine forces an undue hardship on them, for example, by requiring them to listen to the ideas of every crackpot and cranks. But isn't communication supposed to be free and equal for all? Haven't we learned about the importance of freedom of speech in our school system? Therefore, why do we need the Fairness Doctrine to protect the public from these ideas?

One can argue against this analogy by saying that the Fairness Doctrine is a sham. Not only were the trials and adjudications ex post facto, but the leaders of nations were only following the laws of our pluralistic society from stoppage of the murdering of innocent, unarmed civilians. Of course, the Nazi judge also argued that he was only acting in accordance with the laws of our pluralistic society. So, then, are the issues of abortion analogous in a rigorous sense? I don't know. If they get my sarcasm thus far has not appealed to you, let me be direct that the weakest, most impertinent thing I have ever heard in my life is that the same laws that were not made to stand trial like the Nazi, I would pray that we never come to death in the coming years. Perhaps, rather than focusing on the consequences of requiring broadcasters to provide a balance of views, we should focus on the benefits that the Fairness Doctrine brings to society. The Fairness Doctrine forces an undue hardship on them, for example, by requiring them to listen to the ideas of every crackpot and cranks. But isn't communication supposed to be free and equal for all? Haven't we learned about the importance of freedom of speech in our school system? Therefore, why do we need the Fairness Doctrine to protect the public from these ideas?
by Paul Cimino

I don't like racial discrimination. I think it shows the uglier side of man's feelings towards his brother. Furthermore, I am disgusted at the beginning of the film.

The "big shots" at Army Headquarters in Washington D.C. assign a special investigator to the case. Captain Richard Davenport (expertly portrayed by Harold E. Rollins) is sent to Fort Neal, Louisiana, to solve the mystery. While trying to sort out a complex murder, Davenport must contend with discrimination from white officers and insubordination from black enlisted men who are amazed at the white man's army. Waters is murdered at the beginning of the film.

Waters is the sergeant was and the ideals he exuded. The movie is filled with flashbacks which recrue the last two years of life at the fort for Waters and his men. These flashbacks serve to develop not only Waters' character but the characters of his men. The mystery becomes more involved as Davenport digs deeper, and when he finally feels that he has the whole story, Davenport must contend with sharp turn and ends in an unexpeceted murder.

Rollins' role was first to try to sort out a complex murder. Davenport must contend with discrimination from white officers and insubordination from black enlisted men who are amazed at the white man's army. Waters is murdered at the beginning of the film. Waters is by far the most intricate character in the movie. Rollins' claim to fame was the movie "A Ragnite" (1981), in which he played Coldhouse Walker, a role which earned him an Oscar nomination for Best Supporting Actor. 

In fact, the girls studied never drifted into the unrealistic never-land and increases with age, and it's hands of a boy, it becomes a magic wand.

Watson found the high fantasy level of the two and learn how to differentiate fantasy and reality," he said, "very often, parents worry about kids doing all these crazy things," said psychologist Malcolm W. Watson, son of Brandeis University. So he set out to learn how much time youngsters spend in the realm of fantasy and reality.

He found that bizarre, often combative, daydreams filled with magic and the supernatural are the almost exclusive domain of little boys. But he says parents shouldn't worry, because these fantasies are normal and offer a stirrin g performance. "A Soldier's Story" is adapted from the play "A Soldier's Play." When the script made the jump to the big screen, so did many of the play's actors. One such actor is Adolph Caesar. Caesar makes his movie debut as Sergeant Waters. He is the most prominent character in the movie and Caesar is able to bring his character alive in a way that facilitates the audience's association with his life's turmoil. As such, the other actors are all unknowns. Yet this cast is superb and professional in all it does. Nowhere is there a hint of amateurism and at times it seems as though these men are really living their lives.

The background music was composed by a musician who has become rather popular of late; Herbie Hancock. His work enhances the feel of the movie while never stealing the show.

In all, "A Soldier's Story" is a fine movie worth the price of admission. So, if your 1.15 lab gets cancelled some day, you might want to take in this flick.

Associated Press

BOston - Little boys pass as much as a quarter of their playtime fantasizing spaceship rides, ray guns, and aliens with ray guns. Watson said there's no reason to worry about kids doing all these crazy things; Watson notes that high fantasy almost always involves lots of time pretending, but their fantasies are almost always realistic domestic dramas. They play house, go to work, cook dinner and talk to their neighbors.

Injustices in print and reckless cheap shots

by Rev. Robert Griffin
features columnist

As the senior columnist, I read almost everything printed on the opinion pages of The Observer. I love to see good writing, and I enjoy the wit and irreverence. I admire the sensitive insights, the passion for justice, and the various kinds of cutting characters of bright young people struggling to be masters of their own destiny. I don't mind the occasional preaching; I tend to be preachy myself. I like the realism of rebels who protest against the establishment. Fussiness should be encouraged in a community of scholars, and I am anxious to avoid groupthink. Patience and decorum are traits that sheep-herd encourages in a flock of sheep he wants to keep out of trouble; but sheep are dumb creatures who don't offer much of an example to Christians being trained to raise their own young to face the troubles of the world.

I never bother me to hear that the natives are restless, as long as their discontent doesn't turn the world. I'm not going to answer that it is indeed a failing her nails and drinking Tab, girls played rough games on the other bank. She would then shout out with brilliance in print. Students have no untouchables that can't be challenged, or sacred cows living on ground too holy to be walked on, though a show of respect never diminished anyone's gracefulness. I'm talking about fairness. Fairness means you don't use any old stigma to beat a dogma you hate, as though you had a God-given right to be a bully.

Paper doesn't refuse ink, we all know that. Every newstand has its pile of trash. A campus is not the real world, they say. A campus should be in love with the truth, the real world lives on lies. A student, unhappily in life, lets his type writer get out of control with rash judgments. His vituperations get published, the words sitting in the middle of a page like a mess left by a dog on the lawn, which the creature never looks back at. A dog doesn't know any better. One wishes the printed merde could follow its author like a ghost, saying "You are responsible for me, I'm not an undergraduate prank you can leave fatherless. You must at least acknowledge me with shame." We aren't warned that our irresponsibilities will go with us to the judgment, where we will be held liable for every ill-considered word.

A writer for The Scholastic wrote a serious allegation about the personal life of William Buckley. Buckley was sent a copy of the article and he wrote to Fr. Hesburgh in this manner: "I'm not willing to get into a hassle with a student in publication, however the allegation, the letter is false. I'm sure to see if Notre Dame; being Catholic, will be more fair than anything I would have the right to expect from an institution less concerned about justice." The Scholastic printed the denial as Buckley wrote it. Some allegations can't be dignified with a denial, because they are as mendacious as though an idiot broke wind in your face.

Like The Observer so much students wanting to say something, rarely mean any harm. Some of them should learn that their newspaper is not a substitute for the walls of the John where they record their graffiti. Wit is not a cheap shot fired into the crowd. Truth is not an insult you're anxious to get off your chest. Cleverness wins more victories when it's sure what it's saying, it can bring tyrants to their knees, if it's reasonable. Unlike the conversation you left in the bar, words don't die easy when they're once on paper. They take on a life of their own, ambassadors you send before you, evidence that you leave behind, you'll meet you later old friends who praise you as the creator who made them so they could walk with their heads up.

A book only for nerds

by Paul Aiello
features staff writer

The Total Nerd is indeed a book by and for nerds. Inspired by the box-office flop "Revenge of the Nerds," the book tries to serve as a comprehensive nerd handbook wherein the authors (Judy and Lydia Wilen) attempt to capture the essence of the nerd's way of life.

As soon as I received the book last week, I eagerly skimmed through the first few pages hoping to find something with creativity and originality. What I found was a mess of "something," but I will let you judge what it is. For example, in the opening section entitled "What is a Nerd," the book provides an etymology for the word "nerd."

Once upon a time there was an American Princess who, day after day, sat by the side of a stream filing her nails and drinking Tab while a group of little boys and girls played rough games on the other bank.

Come across and play with us, they would call, but the girl was always laughed. "Don't bother me, nerds," she would then shout out with disgust.

One day her father, the Polyester King, asked, "why do you call them nerds, daughter?" "Because," she whispered, "they look like nerds."

From this brief taste of The Total Nerd I think everyone will agree there exists not a more appropriate comment than the one given by the all-time great nerd, Mr. Rogers: "Can you say 'This book is trash!'" "I thought you could!"

One may think I am being too harsh. But the book has no redeeming qualities. It is simply a cheap spin-off on a terrible movie. Still, for the fun of it, try answering some of these questions found at the end of The Total Nerd.

The questions come from the GNAT (General Nerd Aptitude Test). If you answer some of these questions correctly maybe The Total Nerd is for you.

Circle the answer that seems correct:

1. College students who are highly motivated toward the above achievement are probably (a) perfectionist, (b) dominated by their parents, (c) nerds.
2. Which tattoo would you select for your arm? (a) A picture of your dream girl (b) the name of your girlfriend (c) a picture of a comet (d) the label is unfitted with "monon" written on the screen. In the following section entitled "What is that word that is different from the other three?"
3. (a) nerd (b) link (c) jock (d) your mom.
4. Is being laughed at (b) being rejected (c) being ridiculed (d) dating.
5. (a) beer (b) gluttonous maximus (c) hash (d) rhino.
6. Which phrase believe people should live by? (a) take no prisoners (b) the golden rule (c) the slide rule. "The most respectable way to advertise" (d) The Tots in (a) S.F. (b) Fiat (c) Science Fiction.
7. Complete the following sentence: "Girls are... (a) irresistible (b) intelligent (c) by accident.
8. Which of these heroes do you most admire? (a) Conan the Barbarian (b) W. Lanceford (c) Pao Man.

Answers: 1. e 2. None. Real Nerds do not give雍e 3. 4.6 5. 9. 6.2 7. 8. 2. 9. 8.

Sports Briefs

The Irish field hockey team beat Michigan at Ann Arbor, Mich., last night, 4-2. Sophomore Corinne DiGiacomo scored the only goal of the game unassisted, while Patty Gallagher had six saves for Notre Dame. The Irish now face Western Michigan tomorrow at 4 p.m. in their final home appearance of the season. — The Observer

The Notre Dame Boxing Club is holding its annual novice tournament this week. Finals will be today, beginning at 4 p.m. in the boxing room at the ACG. The public is welcome to attend. — The Observer

The Saint Mary’s ski team will be meeting tonight at 7 p.m. in the LaFortune lobby. Anyone interested in the trip at 7 p.m. in the LaFortune. For more information, call Tim O at 800-327-Navy. — The Observer

The ND Windsurfing Club will be meeting tonight at 7 p.m. in the LaMans lobby. Throttles are at full power as a supersonic roar sweeps in the clouds and looking good.

Soccer continued from page 20

Meanwhile, the Notre Dame defense had allowed the Zips only five shots of their own on the Irish goal in the first half. Dan Flynn, who went the whole game in the net for the Irish, made four saves in the first period just before halftime, Notre Dame continued from page 20

Would require minimum scores

Associated Press

KANSAS CITY, Mo. — The NCAA council has agreed to seek postponement of a controversial requirement that high school students must reach minimum scores on standardized college entrance tests to be eligible to participate in college sports. NCAA officials said yesterday.

The effective date of the requirement would be postponed from 1986 until 1988 under the NCAA council proposal, said NCAA president John Toner.

It’s quite evident from the research that there is a disparity of performance between minority students and whites, but there is evidence that there’s a catch in generated some offensive threats, but the team could not finish well in the last third of the field.

Our composure in the offensive third was lacking,” Coach Dennis Grace said. “That really hurt us, particularly at the end of the first half.” A great deal of momentum built up for the Irish at that point, however, and Grace said he wanted to keep that momentum going for the team following the intermission.

The coach said he had intended to take sweeper Dominick Dionisio out of the lineup in favor of an additional offensive player, but Akron coach Steve Parker countered his move before the Irish could take advantage of the change.

Parker instructed Shaun Pendleton, his own sweeper, to begin sending the ball long down the field, thus forcing the Irish to keep a defender back at all times.

Still, Notre Dame was able to mount several more impressive offensive efforts, and the Irish outshot their opponents in the period, 5-4. Most of the Akron shots did not even challenge Flynn, who was forced to make only two saves.

None of Notre Dame’s chances provided any points on the board, though, and when the Zips scored, the Irish could not recover. The goal came with only 10:55 left on the game clock when Shaun Docking got a pass in front of the Irish goal and shot it past Flynn, who was out of the net about 10 yards.

With top-level training, thus forcing the Irish to keep a defender back at all times. The Irish will play three games during break, beginning with Kentucky on Sunday.

The rewards are there, too. A great deal of momentum built up for the Irish at that point, however, and Grace said he wanted to keep that momentum going for the team following the intermission.

USFL files suit against NFL

Associated Press

NEW YORK. The United States Football League filed a $1.32 billion antitrust suit against the National Football League yesterday, seeking the voiding of the NFL’s television contracts with the three major networks and charging that “a conspiracy” exists to put it out of business.

The USFL also asked the court to break up what it calls the NFL’s monopoly on player contracts and stadiums in the nation’s major cities.

NFL spokesman Joe Brown said the league would have no comment until it had seen the court papers.

In the suit filed in Federal court here, the USFL, which has played two spring-summer seasons, said it seeks remedies for past and ongoing violations of the federal antitrust laws by the NFL, it names as defendants all 28 NFL teams as well as Commissioner Pete Rozelle.

Rozelle, contacted by USA Today, termed the action “totally baseless. I think it is ridiculous to be suing on the basis of what they have done.”

ABC spokesman Irwin Brodsky said the network would hold off comment until the network receives a copy of the suit. Attempts to reach spokesmen for NBC and CBS were unsuccessful.

Filed on behalf of the league by New York attorney Roy Cohn, the suit accuses the NFL of “numerous predatory and unlawful actions” by which it “sought to perpetuate the monopoly of the NFL by making successful entry by a competing professional football league into the business of major league football impossible.”

It claims “there is a conspiracy” among NFL clubs “to create a complete barrier to the entry of a competitive league into the business of major league competitive football.”

Since the emergence of the NFL “the efforts of the defendants and their co-conspirators have been specifically directed at the elimination of the plaintiffs USFL member clubs as competitors.”

The suit seeks $1.32 billion in damages, which under antitrust law would be automatically trebled if the court finds in favor of the USFL.

The suit also asks that the NFL be enjoined from negotiating with or making contractual offers with players currently under USFL contracts before their contracts expire.

Last year, the USFL signed a number of NFL players, including Chris Collinsworth of the Cincinnati Bengals, who is currently playing in the NFL, and will report to the Tampa Bay Bandits of the USFL after the season.

The suit also challenges the NFL’s contracts with the three major television networks and asks the court to declare them illegal. It also requests the court to order one of two possible revampings of the NFL network contracts.

The court papers claimed that NFL clubs strengthened “their monopoly position by increasing their control over virtually every facet of the business of professional football.”

The USFL claimed it was able to secure a network TV contract with ABC, which “was willing to pay much less for the television rights of a ‘spring football’ league than it would” for a pro or major college fall football program.

Signed contract in senior year
Rozier admits to NCAA violations

Associated Press

NEW YORK - Mike Rozier, the 1983 Heisman Trophy-winning running back from Nebraska who now is in the United States Football League, has admitted in a published report to having violated NCAA rules by accepting money in his senior college season.

Sports Illustrated, in its Oct. 22 issue, says Rozier admitted in a tape-recorded interview that he signed with an agent and accepted money during Nebraska’s 1983 season and that, before playing in the Orange Bowl, he entered into a contract with the USFL’s Pittsburgh Maulers, for whom he played last spring.

Under NCAA rules, Rozier could have come to terms with an agent or a pro team only after the Orange Bowl game against Miami, which ended shortly after midnight last Jan. 5.

But, according to the magazine, Rozier said he signed with Los Angeles-based agent Bruce Marks in August 1983, before Nebraska’s first game of the season, and that Marks paid him four monthly installments of $600 during the season.

Marks is an associate of Mike Trope, but Rozier said he did not know that at the time.

Rozier also told the magazine that, several days before Nebraska’s 31-30 loss to Miami that gave the Hurricanes the national championship, he, Marks and Maulers General Manager George Heddleston agreed to terms.

"We just sat down and went over the contract," Rozier was quoted as saying. "It sounded good to me."

Rozier also told the magazine that, several days before Nebraska’s 31-30 loss to Miami that gave the Hurricanes the national championship, he, Marks and Maulers General Manager George Heddleston agreed to terms.

"We just sat down and went over the contract," Rozier was quoted as saying. "It sounded good to me."

In Lincoln, Neb., Cornhuskers’ Athletic Director Bob Devaney said the university was unaware of any contract Rozier might have signed or any money he might have received.

Under NCAA rules, colleges are not penalized unless they knew their players signed with agents or pro teams.

The New York’s Downtown Athletic Club annually awards the Heisman Trophy to the best college player based on a vote of 1,090 members of the media. Andrew Cicerone, chairman of the Heisman Trophy Committee, told The Associated Press the club had no intention of asking Rozier or any other Heisman winner to return the trophy because of any improprieties.

Reinhardt, still in coma, returns home

Associated Press

DENVER - Ed Reinhardt Jr., unconscious since a football injury put him in a coma in September, has been flown back to Colorado with his father at his side.

The 19-year-old University of Colorado tight end was flown to Denver on Tuesday in a specially-equipped jet, accompanied by his father, two nurses and a university doctor.

The flight was nearly postponed because of an early season blizzard in Colorado which dumped up to three feet of snow in the Denver area and slowed air traffic almost to a standstill.

Reinhardt’s flight left Eugene’s Mahlon Sweet Airport early Tuesday afternoon, according to Nancy McMahan, a spokeswoman for Sacred Heart General Hospital in Eugene, where Reinhardt had been hospitalized.

Reinhardt has remained unconscious and in critical condition since he was injured during Colorado’s 27-20 loss to Oregon in Eugene on Sept. 15.

The season had a promising start for the 6-5 sophomore when he was ranked second in the nation in pass receptions. Then, after catching a pass late in the Oregon game, he suffered a severe head injury when he collided with two Oregon players.

Reinhardt underwent emergency surgery to remove a blood clot caused by a subdural hematoma — bleeding in the brain.

Save time, work faster with your own computer system

ComputerLand now makes available to every student the advantages of your own personal computer. Through a special financing program called 'ComputerLand' we can now offer four complete systems specifically designed for students by our staff. At ComputerLand you will find a professional and friendly staff to assist you, complete service department, a wide variety of computer classes and a hot line for use when you have questions about your system. And remember, your satisfaction is guaranteed because ComputerLand is part of the world's largest computer retail chain with over 700 stores worldwide.

The ComputerLand STUDENT STARTER SYSTEMS

- **Apple IIc**
- **IBM PC jr.**

Flexible, capable, portable, here is a complete system that can work with a huge selection of programs and accessories to enhance the way you learn, work and play. Included in this system are the computer, mouse, the Apple Scribe printer, paper, word processing software for writing papers and all the necessary cables and connectors.

The most respected name in personal computers, the IBM PC Jr. is truly a tool for modern times. From its cordless keyboard that lets you move around and get comfortable, the "Junior" is designed to be easy to operate. This system also includes a mouse, printer, paper, word processing software and all necessary cables and connectors.

Either for as little as $49 a month*

The ComputerLand GRAD STUDENT SYSTEMS

- **IBM PC**
- **Compaq Portable**

The advanced features of the IBM PC are exactly what you expect from IBM - superb. And our system is specifically designed for graduate students or those who spend many hours in paper writing or computer programming. It is complete with two double sided, double density disk drives, monitor, printer, WordStar - the extremely powerful and flexible word processing program, and all necessary cables and connectors.

It's the portable computer with its own built-in, nine-inch diagonal screen. It delivers the advantages of portability without trading off any computing power capability. The system is complete (like the IBM) with two double sided, double density disk drives, printer, WordStar software and all cables and connectors.

Either for as little as $89 a month*

Enhance your system with a **Telephone MODEM**

Enhance your system with a Modem that allows you to tap into a local computer system or area bulletin boards. Yours for just $10 a month.

A special note:
When we say your system is "complete" we mean just that. Included are diskettes, paper, ribbons, disk storage lock, a power line filter to protect your computer and your valuable data from damage due to lightning and other disturbances to the flow of electricity. Most important, an introductory class in how to use your system. Also included is complete assembly, installation and testing of your system so all you have to do is take it home and plug it in.

Special Coupon Book
Yours free. Contains many valuable coupons good for special discounts throughout the school year on computer supplies, games and educational programs, additional classes and much, much more.

I've paid my dues," said Weinle. "I shifting to the nose tackle spot. Defense and sees little trouble in believes that he is ready for a start on guard) because we felt we needed graduate degree from the College of him this spring. We didn't move him moved him over there (to offensive this position last spring, but we percentage of the time.

There's a pretty good chance that Jerry is going to start," said Lantz. "If not, he'll play at least 50 percent of the time."

"We have the ability to compete for this position last spring but we moved him over there (to offensive guard) because we felt we needed him there. I was very pleased with him this spring. We didn't move him to offense because we didn't think he could play, we just thought that based on the number of people around it would be for the betterment of the team if we moved him there."

Weinle, who majored in mechanical engineering, received an under graduate degree from the College of Engineering with a 3.08 grade point average last May. Commenting for his final year of eligibility, the graduate is currently working toward a Masters degree in Business Administration.

The 1982 monogram winner believes that he is ready for a start on defense and sees little trouble in shifting to the nose tackle spot. "I've been here a long time and I've paid my dues," said Weinle. "I think I could do very well. It's not that tough (switching back to defense) because I played defense for three years and offense for one. Last year, I switched back and forth a lot. You always want to do your best and you always want to be a starter and that's what I'm striving for. Either on offense or defense, I'd love to be a starter. I'm happy with the playing time that I've received in the last couple of weeks, but I won't be satisfied until I'm starting."

The factor that will determine whether or not Weinle plays will be the condition of Griffin. If Griffin practices and looks good, Lantz believes that he will probably start. However, he believes the Irish will not be hurt in his absence because of Weinle's abilities.

He is a sound, fundamental football player who is a movable player against the running game," said Weinle. "Offensively, I feel more comfortable on defense,"

"The Irish must take away the big play if they are to upset the 11th-ranked Gamecocks.

"For the rest of the season, the fifth-year player believes that the Irish will still regain some respect. He attributes Lantz with good ability to call good schemes, and he has faith in his fellow teammates."

"I'm happy with the guys," said Weinle. "Obviously, we haven't performed as well as we are capable of. We're going through a tough time and we're going to have to regroup and get back on track Saturday. With the caliber of teams that we play coming up on our schedule, it gives us an opportunity to gain some respect back and show people what we're capable of doing."

Coach Lantz will make the final decision as to whether Weinle or Griffin will start on Saturday. In either event, Lantz believes the versatile lineman is a great asset and one of "the real valuable players" on the team.
Irish fall to Akron in frustrating game

By PHIL WOLF
Assistant Sports Editor

Time and time again the Notre Dame soccer team found itself frustrated when everything seemed to be going its way.

Yesterday afternoon, the Irish fell nationally ranked 1-0, on a lone goal, to the University of Akron in the opening game of their NAIA District championship tournament.

Earlier this season, the Irish had established the lead in games against several other highly-ranked opponents, only to lose it in the closing minutes of the games. Yesterday, Notre Dame went ahead of Michigan State, 2-1, only to have the Spartans come back to tie the game. That was the first goal of remaining. Rich Herdegen scored the first goal in Notre Dame’s contest with Indiana and Marquette, but both the Warriors and the Hoosiers came back with a vengeance.

Yesterday, for only the second time this season, the Irish did not score first in a game. In fact, the Irish did not score at all, and that is something that was so frustrating for them.

Notre Dame outplayed Akron for much of the game and had many excellent opportunities to score. Of course, opportunities are not recorded on the scoreboard, and a momentary lapse in the defense cost the Irish a goal. Last year, in the overtime round, the Irish were only one point behind the Dynamo but the game never ended in overtime and Notre Dame could never get that one point. But a momentary lapse cost the Fighting Irish the national championship.

Sean Cronin, a 6-7, 207-pound forward from Zeigler, Ill., yesterday announced his intention to enroll at Notre Dame as a member of the soccer team. Cronin was the leading scorer in Illinois prep bas­ketball last year, and he signed the national letter of intent on Nov. 14, the first day recruits are allowed to do so.

Cronin averaged 33.4 points and 18 rebounds per game season for Zeigler Royalton High School. His highest output in a single game was 61 points.

Named first team all-state by both AP and state newspapers, he is considered the best Illinois star announces intent to enroll at ND
