Freshmen start life under dome

By DAN MCCULLOUGH
News Editor

The Center of 1989 began arriving on the Notre Dame campus this weekend to begin their four years under the golden dome. Traffic on Notre Dame Avenue and St. Joseph's Way continued to be congested as the approximately 1,830 freshmen arrive to begin their college careers.

Pat Leonardo, assistant director of admissions, said this year's crop of freshmen are academically on par with the classes from the previous ten years.

"The thing we are most impressed with is their enthusiasm," Leonardo said.

About 2,950 students who applied were invited to attend Notre Dame by the admissions department, but only 1,830 accepted the invitation, Leonardo said. This is roughly 64 percent. "This is routine in some of these freshmen who agreed to attend Notre Dame but not show up." "There's a certain amount of attrition every year," he said.

The size of this year's freshman class is slightly larger than last year, when 1,790 freshmen came to campus. Two years ago, in 1983, 1,775 freshmen experienced orientation and planning.

About 1,300 of this year's freshman class are men, and 550 are women.

Freshman Studies offers support throughout year, Hofman says

By MARK PANKOWSKI
Copy Editor

You won't find any freshmen in the College of Science or the College of Engineering at Notre Dame: Nor are there any freshmen majoring in business or arts and letters in the College of Arts and Letters.

The freshmen can be found, however, in a program that is attracting national attention, according to its dean.

The program: The Freshman Year of Studies. Its debut followed Hofman, now serving his 17th year as head of the program.

"The Freshman Year of Studies is, in effect, the college for freshmen. It is responsible for arranging the academic program for freshmen and for providing the support systems especially needed by freshmen," Hofman said.

The goal of the program, begun in 1962 and embarking on its present course in 1973, is to "emphasize to freshmen the meaning and purpose of higher education," said Hoffman.

"We try to impress upon them that the experience of a Notre Dame education is a liberal education," he said.

Some institutions have variations of Notre Dame's program, according to Hofman. "A large number of universities now come to me for consultation about our program," he said. "It has attracted national attention."

The Freshman Year of Studies is successful because "of what we do to relieve (students') anxiety," said Hofman.

That anxiety, he said, stems from "particular problems and particular needs (of freshmen) that require special attention, such as an adjustment to a new situation and planning one's future."

"Very few freshmen have a clear idea of what is to happen to them at a university," he said. "A large number of them view the university experience to be a career or job oriented. This view causes many problems."

For example, Hofman said, although there are students who know what they want to do in life upon entering the University, "relatively few know exactly what career they want to pursue and therefore do not know how to fashion their education."

The Freshman Year of Studies offers several support systems, said Hofman, including a guidance program, the Freshman Learning Resource Center, and special activities for freshmen.

In addition to the support systems provided by the Freshman Year of Studies, Hofman credited the "magnificent efforts in the other support systems (at Notre Dame), like the residence halls, the University Minstety, and student activities" for the success of the program.

Hofman also cited the quality of the students that Notre Dame attracts. According to Hofman, Notre Dame's "freshman class, year after year, is classified in the highest category of the American Council on Education system," which, he said, is based on average Scholastic Aptitude Test scores.

According to Hofman, having students with high SAT scores is not enough. "A large number of universities have good students, but still have a very high drop-out rate for students during and after their freshman year."

In fact, he said, "Nationally, the average drop-out rate for freshmen is about 55 percent." But, Hofman said proudly, "Ours is about one percent."

SMC class has quantity and quality

By MARGIE KERSTEN
Assistant SNT editor

This year's freshman class at Saint Mary's College is the largest since 1981, according to Mary Ann Rowan, director of admissions for the College. More than 500 freshmen will be arriving on campus this weekend.

"It's an excellent class that is strong both in quality and quantity," Rowan said. She added that 30 percent of the freshmen were in the top 10 percent of their graduating high school class. From 1,900 applications, 850 women were accepted to attend Saint Mary's, she said.

Thirty-four states and seven foreign countries are represented in the class of 1989. Most of the students are from Illinois, Rowan said.

The class is a positive addition to Saint Mary's College, she said. "A well planned admissions program with support from the faculty and the college staff has resulted in a full freshman class." Rowan said.

The end of summer and the beginning of another school year is a transition period for most students, but especially for freshmen.

Some freshmen living in hall study lounges

By MARY HEALY
Staff Reporter

Some Notre Dame freshmen are starting college right off in study lounges, but not to hit the books. Being in a dormitory is a big transition period for many freshmen with high SAT scores is not enough. "A large number of universities have good students, but still have a very high drop-out rate for students during and after their freshman year."

In fact, if they have had to set up their bunks temporarily in the study rooms of Planter House in each of Planner, and Grace lounges, they will have to move off campus after June 10 are without a room.

According to Pat Leonardo, assistant director of admissions, most of the students that Notre Dame attracts are students who want to know what they want to do in life upon entering the University, "relatively few know exactly what career they want to pursue and therefore do not know how to fashion their education."

The Freshman Year of Studies offers several support systems, said Hofman, including a guidance program, the Freshman Learning Resource Center, and special activities for freshmen.

Police in Johannesburg, South Africa, fired shot­
guns at black rioters in Cape province yesterday, killing six and wounding 20, and jailed nearly 700 children for boycotting classes in Soweto. Some of the children were 6 or 7 years old. Bishop Des­mond Tutu negotiated for their freedom, then used a bullhorn to tell hundreds of worried parents outside a police station. "All those un­der 15 will be released immediately without being charged. Those over 15, the police are taking their particulars and they will be released to their parents." -AP

A 13-year-old AIDS victim in Kokomo, Ind., who has been barred from school this fall will be connected to the class­room via a telephone hookup to his home beginning Monday, school officials said yesterday. Ryan White, a hemophiliac who con­tracted acquired immune deficiency syndrome through a blood transfusion, has been out of school since December. The seventh­grader would have started school Monday, but Western School Con­ference officials objected to Ryan's enrollment because they fear the boy's condition could harm other students. -AP

A crackdown on alcohol abuse is being planned at Purdue University. The school plans to decrease alcohol abuse and events that might encourage it, from rock concerts to student parties to athletic events, university officials said. Barbara Cook, the dean of students and task force chairman, said she will suggest that the task force form about eight committees, each as­signed to one of an area of concern such as effective campus alcohol ed­ucation programs, alcohol abuse at university and student social org­anizational events, fraternity, sorority and co-op events, off­campus drinking, residence halls, social climate of campus and com­munity, sources for individual alcohol abuse treatment; and ethical considerations and public-issues relations. -AP

The Miss America Pageant may be known for its glamour, but Miss Indiana says she sees it more as a prolonged job interview. "To really answer questions is exactly what is important, as all these women were a job interview, which is exactly what this is for, for a one-year job," said Laurie Jean Broderick of Elkhart. "I've already made some contacts that can help in my future career. But it keeps me feeling positive." Broderick, preparing for the pageant that ends Sept. 14 in Atlantic City, N.J., plans to pursue a career in busi­ness with fitness mixed in, perhaps by running a fitness center. -AP

Of Interest

David Stockman, former director of the Office of Management and Budget, will be campaigning for U.S. Senator Dan Quayle (R Ind.) during a stop in South Bend next Wednesday. Stockman will appear at a fundraising reception at the home of Er­nestine Raclin, 1st Source Corp. chairman. Stockman and Quayle served together in the House of Representatives from 1976-80, when Stockman represented Michigan's Fourth Congressional Dis­trict. — The Observer

The scavenger hunt, begun at 8 a.m. today, will continue until 5 this evening. In order to be eligible for prizes, Notre Dame freshmen must submit their scavenger sheets before 8 p.m. Tours of Notre Dame for freshmen and their parents will leave from the Main Circle hourly from 2 p.m. until 4 p.m., with those at 2 and 4 p.m. offered in Spanish as well as in English. Beginning tonight at 6, freshmen can go Hawaiian at the Saint Mary's Luau on the Dining Hall Promenade, or the College School. Saint Mary's freshmen can pur­chase tickets for $5.50 and $4.25 for those 12 and under. And last but not least, a carnival and dance at Stephen Center, complete with a fog and light show and featuring "The Music King," is scheduled for 9 p.m. until midnight tomorrow for all Notre Dame and Saint Mary's freshmen. — The Observer

Weather

Welcome to weather in South Bend. Today it will be cloudy with a 60 percent chance of showers. The temperature will peak in the lower 70s. Tonight's 60 percent chance will accom­pany a 50 percent chance of showers, and a brisk low is in the upper 50s. The clouds will remain tomorrow, and there will be a 30 per­cent chance of showers. The high will be in the lower 70s. — The Observer

Delia vu!

Just as the Class of 1989 anticipates its stereos, sweaters, popcorn poppers and more sweaters this weekend, so did our Donna ancestors a century ago.

Through the past century the tradition that Notre Dame has survived fires, the admission of women, and losing football seasons, but life under the Dome would be unrecognizable to the Class of 1889 — all 20 of them.

Besides the absence of women, the most obvious change is the campus itself. What are now buildings were then men. Father Thomas Walsh was the Univer­sity president, to be succeeded by Father Andrew Mor­rosey in 1893. Father John Zahn was a physical chemist.

In 1889, the campus's latest structural addition was Soris Hall. The first building composed entirely of private rooms for students, Sorin offered its residents the most modern of facilities. "The building is com­modious, thoroughly ventilated, and the rooms and cor­ridors are well lighted, and comfortably heated at all times," according to a Uni­versity bulletin from that year.

Although the dome rested on the same administrative building that now stands, underground there were a few differences, including an armoire on the first floor, complete with haysew. Next door, in the Music Hall (now known as Washington Hall), were the dressing rooms of the Bicycle Club and the Alumni Association

Buses now shutle stu­dents to downtown South Bend for shopping and en­tertainment, but in 1889 a University bulletin outlined the benefits of a rural campus: "Its comparative isolation insures immunity from distractions of every kind... association with per­sons of depraved tastes and bad habits is necessarily avoided."

Soon the Class of 1899 will be introduced to du Lac, the disciplinary bible many freshmen may choose to hide in their bottom dresser drawers. But when hit with a fine for using an air conditioner or rooftop in your dorm room, (both of which are prohibited) think of those in the Class of 1889 who were saddled with the following discipline code:

-All students were required to rise at the same time in the morning, no later than 6:30 a.m.

-All students were required to remain at the University during the day.

-All students were required to take meals at the same hours during the day.

-All students were required to retire no later than 10 p.m.

-"No student shall leave university grounds without permission of the president or vice president, or the persons delegated to represent them.

-"The use of tobacco is strictly forbidden, except to such students of the Senior Department as receive from their parents written permission to use it."

-"The use of intoxicating liquor is absolutely prohibited under all cir­cumstances."

-"To guard against clan­destine and improper correspondence, the presi­dent reserves the right to su­pervise letters to and from students."

Rather than The Obser­ver, last century's Donners turned to The Scholastic, a weekly magazine, for all the campus news. A regular item in the Saturday publication was the Roll of Honor for those recognized students "for their poiselessness, neatness, order, amability, correct deportment and observance of rules.

Paralleling The Observer's Personal Classified sec­tion, The Scholastic published Local Items. Among those read by the students of 1889 was an item ob­viously posted by the administration."NOTICE — The centre walk through the paterns in front of the main building is not intended as a drive for carriages or buggies."

As you settle in to enjoy four years of unrestricted sleeping hours, almost 90 more buildings, tobacco and unenclosed letters, give a thought to the Class of 1889 who will move into their co-ed dorms with video phones, laser writers, sweaters, jet shoes and more sweaters.

SMC government sees communication as job

By THERESA GUARINO
Saint Mary's Executive Editor

Residence hall and class vice presidents are members of the Programming Board. Student commissioners include publicity, off-campus, athletics, social and traditional events.

The third student government body, the Academic Council, is chaired by the vice president for academic affairs and public relations. It consists of student representatives from each academic department of the College and various College committees. The Academic Council provides a forum for student discussion of different academic policies and proposed changes.

Anne Marie Kollman is this year's student body president at Saint Mary's, with Julie Harmon and Jeanie Heller as vice presidents for student affairs and academic affairs and public relations, respectively.

Heller sees student government as a liaison between students and the college administration. "We are a major communication link between students and the administration," she said. "We serve in getting the requests of students acted upon."

Student government offices are located on the third floor of Haggar College Center.

ND government aims at better student life

By FRANK LIPO
Copy Chief

"We the students, in order to form a more perfect University..." Although these words are not inscribed in gold letters above the doors of the student government offices in LaFortune Student Center, the different branches of student government attempt in diverse ways to improve the quality of student life at Notre Dame.

Student Government

Campus-wide student government is established by a written constitution. The constitution establishes the positions of student body president, vice president, and treasurer, and allows a cabinet to be chosen by the student body president. Residence hall and class presidents are members of the Board of Governance, in addition to student commissioners. A Notre Dame representative and a resident advisor representative also attend Board meetings.

The Programming Board is the student government body that is chaired by the vice president for student affairs. The Programming Board plans activities and coordinates student-related events on campus.

The SAB has been the organization of student-run businesses such as the Irish Garden, a flower shop; Rock DuLac, a record/ticket store; and the Underground, a variety shop.

The Student Senate

The Student Senate also is established by the constitution. It is composed of representatives from other branches of government, an elected off-campus senator and four elected on-campus senators. The student body president acts as the chairman of the senate.

The senate determines the fiscal policies of student government and allocates funds.

The Judicial Council

The Judicial Council also is established by the constitution. It is composed of the judicial board chairmen of each dorm. They vote once a year to elect a judicial coordinator who oversees the council. The council serves to provide assistance to students accused of violating University rules and regulations. It also serves to foster greater student understanding of University rules, regulations and disciplinary procedures.

By THERESA GUARINO

The Hall Presidents' Council

The Hall Presidents' Council is composed of all 24 hall presidents, an elected off-campus commissioner, a secretary and a chairman. The HPC acts as a network of information and a support system for the individual dorms and helps sponsor dorm events. For example, if a certain event works well in one dorm, that fact easily can be conveyed to the presidents of other dorms.

It meets once a week and has its own constitution. The HPC also has legislative responsibilities. The HPC chairman and three other members hold student senate seats. The HPC coordinates and discusses weekly senate reports and sometimes is asked to testify student government proposals.

The Campus Life Council

The Campus Life Council is the part of student government responsible for passing or rejecting proposals initiated in the senate. It includes people from every aspect of the University. Each student's $35 student activities fee pays for the act of student government.
Who's who among Notre Dame administrators

Father Theodore Hesburgh, president
As president, Hesburgh is executive head of the University and is responsible for the general direction of its affairs. He appoints most of the University staff and presides at all academic functions at which he is present. Hesburgh also is the public representative for Notre Dame, and he has been active in a variety of issues, including civil rights and world hunger.

Father David Tyson

Father William Beauchamp, executive assistant to the president and executive vice president
As executive assistant to the president and executive vice president, Beauchamp is involved in upper-level administration in a variety of different ways. He performs specific projects, such as chairing the alcohol committee two years ago, and gathers information for the president and executive vice president. Beauchamp's responsibilities include the Morris Inn and student laundry services.

Father Francis Cafarelli

 Sister Jean Lenz, assistant vice president for student affairs

Father Francis Cafarelli is assistant vice president for student services. Cafarelli's responsibilities include student facilities, health services, student government, career and placement services, student media, and specific student activities.

Father William Beauchamp

Father Francis Cafarelli

Sister Lenz's responsibilities include the Morris Inn and student laundry services.

Emil Hofmann

Emil Hofmann, dean of freshman year of studies
As dean of freshman year of studies, Hofman is in charge of all academic matters relating to freshmen entering their sophomore year. He provides a support system for freshmen, including counseling, and study aid programs, and he arranges freshman activities such as date nights.

Emil Hofmann

Father Francis Cafarelli

Father Francis Cafarelli is also the liaison with the athletic department and lo cal government.

Father Theodore Hesburgh

Father O'Meara

Father David Tyson, vice president for student affairs
Tyson heads the student affairs department, which presides over student services, residence life, and student activities. He is liaison with the offices of the University, the graduate school, the four colleges, and the freshman year of studies. He is also in charge of the University ministry and rectors.

Father William Beauchamp

John Goldrick, associate vice president for residence life
Goldrick is in charge of security, discipline, residence halls, and residence assistants. He is also the liaison with the athletic department and local government.

Sister Jean Lenz, assistant vice president for student affairs

Sister Jean Lenz has responsibility for international student affairs, minority student affairs, transfer students, and specific student activities.

Father O'Meara

Father William Beauchamp

Timothy O’Meara, provost
As provost, O’Meara is the second officer of the University and is in charge of the absence of the president. He has responsibility, under the president, for the administration, coordination, and development of all of the academic activities and functions of the University. The dean of the freshman year of studies, as well as the deans of the various colleges at Notre Dame, report to O’Meara.

Timothy O’Meara

Father William Beauchamp

John Goldrick

Father William Beauchamp

Father Beauchamp is involved in upper-level administration in a variety of different ways. He performs specific projects, such as chairing the alcohol committee two years ago, and gathers information for the president and executive vice president.

Timothy O’Meara

William Hickey Jr., director of food services
As director of food services, Hickey is in charge of the North and South dining halls, the Oak Room, the Huddle, the deli, football concessions, and all vending machines at the University. He also oversees a campus-wide catering operation that serves functions such as Junior Parents' Weekend and commencement.

John Neal, director of student activities
Neal is in charge of a vast network of students and administrators which works to provide entertainment and activities for the students. Neal and her staff work in various capacities, ranging from creative programming and broadcasting to negotiating with agents and coordinating events.

Daniel Winicur, registrar and dean of administration
As registrar, Winicur is in charge of all record-keeping associated with academics. According to Winicur, this includes students' transcripts, course catalogues, class schedules, and student directories. He also oversees student registration and enrollment as well as commencement. As dean of administration, Winicur is in charge of all academic buildings.

Sister Lenz

Sister Jean Lenz

Sister Jean Lenz is assistant vice president for student affairs.

Calling all Dimes Collectors... Support the March of Dimes, on the March for Babies. Call 282-2801 for student rate.
William Hickey, acting president. Hickey, who is ultimately responsible for all academic and fiscal affairs at Saint Mary's, said having an acting president will not slow the College's growth. "This will be an active administration and we will be making decisions," Hickey said. An expansion in computer science studies and the completion of a $25 million fundraising program are two goals for the year, he said. Hickey has been acting president since John Duggan retired July 1.

Hickey tops list of Saint Mary's administrators

Lawrence Durance, vice president for College relations. Generating support for Saint Mary's is Durance's primary goal.

Dorothy Feigl, acting vice president and dean of faculty. "I supervise the academic focus of the College," Feigl said. Her duties include keeping academic programs up to date, overseeing faculty selection and making sure the students' academic needs are fulfilled. She is also professor and chairwoman of the chemistry department.

Mary Anne O'Donnell, director of student activities. O'Donnell works with student government organizations such as the Programming Board and the Board of Regents. She also helps organize freshman orientation and commencement activities and advises the Blue Mantle, Saint Mary's yearbook.

Patricia Rissmeyer, director of residence life. As director of Residence Life, Rissmeyer supervises the five residence halls and the housing office at the College. She also oversees the residence staff and coordinates hall programs.

Sister Karol Jackowski, dean of student affairs. As the head of the student affairs office, Jackowski deals with the aspect of education occurring outside the classroom. Her office oversees six departments: Residence Life and Housing, Student Activities, Health Services, Athletics and Recreation, Campus Ministry and the Counseling and Career Development Center.

Patricia Rissmeyer

Freshmen, we need your help!

The Observer news department has immediate openings for dedicated, energetic people interested in reporting and writing the news. We currently are developing a staff of writers who care about what goes on at Notre Dame and Saint Mary's and who want to keep people well-informed. If you think this could be for you, why not give us a call? We'll stick a pencil in your hand and a notebook in your pocket and put you on the beat right away.

INTERESTED? Call Dan McCullough, Keith Harrison or Tess Guarino at 239-5303 TODAY!

Dance, scavenger hunt on tap for ND frosh

By SCOTT BEARBY
Assistant News Editor

Notre Dame freshmen will be able to purchase tickets for both Notre Dame and Saint Mary's freshmen. During the party, games, prizes, and refreshments will be a part of the fun.

Freshmen will also have the opportunity to dance to the music of "The Music King," complete with a fog and light show. A carnival is scheduled from 9 p.m. until midnight for all Notre Dame and Saint Mary's freshmen.

Saint Mary's goes Hawaiian as part of Orientation

By SCOTT BEARBY
Assistant News Editor

Saint Mary's freshmen should be constantly on the go based on the many activities the Saint Mary's Orientation Committee has planned for the weekend.

Beginning tonight at 6 on the Dining Hall Green, incoming students have the opportunity to go Hawaiian at the Saint Mary's Luau. According to the orientation committee, good food, dancing, and socializing will be part of the night's festivities.

Orientation Publicity Chairperson Mary Beth Braun said Hawaiian will be the "start of a long-standing tradition" of freshmen activities. Students are scheduled to wander the campus in search of answers to campus trivia until 5 p.m. in order to be eligible for prizes. Scavenger sheets must be submitted before 8 p.m.

Socializing will continue on Sunday night students will be treated to a carnival and dance at St. Pat's. According to Griego, games, prizes, and refreshments will be a part of the fun.

Group meetings currently are scheduled for the afternoon and on Monday, according to Braun, the informal gatherings will also continue through October.

In addition to the socializing, educational meetings will be scheduled for incoming students today and tomorrow. Meetings for parents and discussions about college majors are among the events planned.

For those students and parents who have not yet toured the campus, the Freshmen Orientation Committee will continue to offer tours today. Groups will leave from the Main Circle hourly from 1 p.m. until 4 p.m., with those at 2 p.m. and 4 p.m. offered in Spanish as well as in English.

Other events also are scheduled during the weekend in conjunction with the Freshmen Orientation Committee. Dean of the Freshmen Year of Studies Emil Hofman and his department have planned welcome and introductory sessions tonight and tomorrow.

According to Griego, his committee also has been working closely with hall orientation committees to plan mixers, movies, and other hall sponsored events in between campus activities.

Experience the wonderful 'firsts' of college

This column is for the new freshman classes of Notre Dame and Saint Mary’s from someone who was there himself, but on the other side without too much damage. You are entering a time of new experiences and new friends. You have come to this new Mary Ellen Harrington

batteries not included

beginning with old ideas and impressions. We all enter Notre Dame with some preconceived images and traditions that we have come to believe in, but the reality is that we will be at the University of Notre Dame du Lac and Saint Mary’s College. It does not necessarily mean that you will be more involved at the University or have a more complete understanding of what the University is all about.

The class of 1989 should be realistic about future possibilities. You wish to remember that I tell his son how one becomes a “Domer” and a member of the class of 1989. The man asked about the alcohol policy. I will not. Instead, this column is about pressure, parents and present. To the class of 1989, some simple advice is offered. Do not let the pressure get the best of you. Your parents will be just as proud of you whatever may be the outcome. Do not accept second place for you or your school. Go beyond your potential and expect Notre Dame to go to the top. In the last and all you can ask of Notre Dame. Simply be the best. The purpose of your education is not to place you above others, but to make you and those around you happier. The future is not a yardstick, but it is a future. Why should you become a better person and that Notre Dame will be a better place for your having been here.

For the class of 1989, the question of acceptance has been answered. I am sure that the question of academic and social survival remains a nagging doubt hidden in the back of your mind.

The class of 1989 has many simple advice is offered. Do not let the pressure get the best of you. Your parents will be just as proud of you whatever may be the outcome. Do not accept second place for you or your school. Go beyond your potential and expect Notre Dame to go to the top. In the last and all you can ask of Notre Dame. Simply be the best. The purpose of your education is not to place you above others, but to make you and those around you happier. The future is not a yardstick, but it is a future. Why should you become a better person and that Notre Dame will be a better place for your having been here.

For the class of 1989, the question of acceptance has been answered. I am sure that the question of academic and social survival remains a nagging doubt hidden in the back of your mind.

A Dormer dictionary

by Phil Wolf
features staff writer

‘Za

Emil A person, a thing, an event, an even, a verb. Dr. Emil Tompkins is the chairman of the freshman year of studies, every freshman’s pseudo major. Chemistry 115 is Emil’s class, which almost every freshman takes. An Emil is the seventh quiet Emil goes every Friday. Emil Night is Thursday night when everybody is studying for Emil. One even can come out of the first floor. Emil’s a dormer who describe the process of cramming for the big test. It gets confusing, but not nearly as confusing as Chem 115 can be.

Ethan A relative non-alcoholic substance - until you get a whirl of the exhaust from the plant southwest of Notre Dame.

Hooser The janitor in your hall who cannot change a light bulb in a Hooser. The dining hall worker who won’t give you two servings of Hungarian Noodle Bake is a Hooser. The guys who try to run you off the basement sidewalks with snow shovels are Hoosiers. The origin of the word is unknown, but the Hoosiers are everywhere.

H.T.H. Home Townsman. The person you left behind whom you pretend to write to weekly. The person you will dread seeing by the time October break rolls around.

Major If you have one now, you probably will change it three times before Christmas. If you don’t have one yet, you probably won’t until you graduate. Just don’t ask the cute girl in your punched class what her major is.

O.C. Off Campus. Where you will want to move after you learn about alcohol policies in the dorms.

Parietals Midnight on weekdays and 2 a.m. on weekends. Of course, all the things who your RA is. Supposedly, parietals are serious rules, but watch out when your roommate closes the traeusen, leaves the key in the lock and hangs a tile on the doorknob.

Pavilion Pit The lounge in Regina Hall. Go by there at about 2:15 a.m. on a weekend and you’ll see how it got the name.

Pit The basement of Memorial Library. Home of all those fires which make living in the dorm for days at a time possible. A good place to meet the cute girl/guy you’ve been staring at for three hours on the second floor.

Quad Everybody on South Quad thinks it’s the best. Everybody on North Quad thinks it’s the best. People in the towers and Pasquerillas call themselves the Mod Quad.

Sacred Heart and the Dome as God’s Quad. The mall where all the students go over there then.

SIV. Stand for Screw Your Roommate. No, this does not refer to any strange sexual behavior. It refers to a dance for which your roommate attempts to set you up with the gay of your dreams - or the boyfriend of your dreams.

SHSU. Scottish Hall, Chicago. There’s the word that SAGA stands for Scottish Attempt to Gag America. They serve steaks on Saturdays, but they won’t let Notre Dame students go over there then.

SMC Chick SMC rhymes with chick. A term for a student at Saint Mary’s College. Don’t call your date this while she is in hearing range.

SYB. Stand for Screw Your Roommate. No, this does not refer to any strange sexual behavior. It refers to a dance for which your roommate attempts to set you up with the gay of your dreams - or the boyfriend of your dreams.

Throat. Originally, this word referred to those highly competitive students who use cutthroat tactics to improve their grades by making their classmates look worse. A threat is what you call a brown-nose in high school. The threat in your class is the one who borrows your notes and makes himself a typed, indexed copy, even though he recorded every lecture on tape.

Tofa Nobody knows what it is, but when they serve it in the dining halls, it’s time for a call to a pizza.

Tower The elevator in Lewis Hall. Saying the whole word is at least as difficult as walking up to the fourth floor.

Tofu Nobody knows what it is, but when they serve it in the dining halls, it’s time for a call to a pizza.

Valor The elevator in Lewis Hall. Saying the whole word is at least as difficult as walking up to the fourth floor.

Vendo Land The world of vending machines in which a few quarters and a bit of change can get you from Pizza Hut, you can get it from a trip to Vendo Land. When you enter Vendo Land, you have no money to buy a pizza, it’s time for Vendo Land. Down in the basement of every hall at Saint Mary’s is a world of vending machines in which a few quarters and a dime can give you more junk food than your parents let you eat in the first 18 years of your life.

Za Short for Pizza Hut. You can get it from Dominos, you can get it from Pizza Hut, it’s time for you to buy a pizza.

The Observer - Pete Laches

Before - the bare cell

Center sale on Aug. 27 and 28. At Saint Mary’s, there’s a plant and poster sale in front of LeMars Hall until tomorrow. There is also a rummage sale at Morose Seminary until Aug. 27, where second-hand belongings are available. Before you spend big bucks, wait for superclassmen to return who often are anxious to get furniture or other belongings.

For the lucky ones in renovated dorms who may not find anything to suit the walls, molding hooks and fishing line are your best bet. The hooks soon will be available in the bookstore, and can accommodate posters, pictures, wall lamps, and anything else you may want to hang up.

Look at your RA’s room for ideas. Their rooms often are the best decorated.

Mary Healy

features editor

It’s your first day at Notre Dame or Saint Mary’s and you enthusiastically bound into your new room - only to trip over what appears to be a pile of desks, beds, large wardrobes, a sink, or maybe a couple of dressers. Putting out your hand to steady yourself, you find it’s already touching the opposite wall. Now, how, you think, can you possibly make a home for yourself amid such an accumulation of furniture in such a small space? Well, with the wisdom that comes from long practice, there are ways. With the right touch, you not only can make enough space to walk around in, but you can create a classy and personal atmosphere.

Here are some tips to help transform that bare cell into a home.

1. First of all, check out the rules for the University or the College and for your dorm. It’s no use tacking up a lot of gory posters if you’re only going to have to take them down plus pay a hefty fine once your rector learns.

2. Sometimes it’s useful to get rid of excess furniture. If you prefer studying on your bed or at the library, you might consider moving your desk and study chair to a different room, for instance. Some dorms also allow wardrobes to be stored downstairs for those who don’t want them.

3. Bunking or trundling beds does not a lot for increased room. Cinder blocks under the bed posts usually will raise the bed high enough to put another bed underneath. Lofted beds are an easy way to fit in more to less space.

If you and your roommate bought totally clashing bedspreads, you can help coordinate the buying of cheap fabric and using it for wardrobe covers, curtains, sheets, skits, and bed ruffles.

Plastic milk crates are inexpensive and are ideal for stacking and to hold sweaters, record albums, knickknacks.

Inexpensive furniture, plants, plywood, refrigerator and carpets will be available at the Stepan Center sale on Aug. 27 and 28. At Saint Mary’s, there’s a plant and poster sale in front of LeMars Hall until tomorrow. There is also a rummage sale at Morose Seminary until Aug. 27, where second-hand belongings are available. Before you spend big bucks, wait for superclassmen to return who often are anxious to get furniture or other belongings.

For the lucky ones in renovated dorms who may not find anything to suit the walls, molding hooks and fishing line are your best bet. The hooks soon will be available in the bookstore, and can accommodate posters, pictures, wall lamps, and anything else you may want to hang up.

Look at your RA’s room for ideas. Their rooms often are the best decorated.

SAVE $98,500 ON AN ALPINE CAR STEREO.

A new Lamborghini with a factory standard Alpine car stereo will set you back about $99,000. However, at Classic Stereo you can get the same Alpine sound quality without the Lamborghini and save the tidy sum of about $98,500. Fact is, during Alpine Week, through Aug 31 you can save handsomely on all of our Alpine systems and components. So if you can't afford a new Lamborghini, get the next best thing. The Lamborghini sound - an Alpine car stereo. At Classic Stereo.

Polk Audio's design goals were all selected to achieve better sound in your home and give you the greatest listening pleasure and long term satisfaction from your music, your records and your hi fi system.

- Open, life-like, three-dimensional imaging recreates the illusion of musicians actually playing in your room, with height, depth and placement across the sound stage.
- Smooth, accurate frequency response across the entire audible range provides you with natural, non-fatiguing, easy-to-listen-to sound.
- Dynamic bass performance. Your speakers will rattle the windows when a kick drum or low organ pedal calls for it, but will also reproduce all the subtle delicacy of pizzicato or bowed string bass or cello.

State-of-the-art technology, performance and value (Starting at $79 each)

- Ultra-wide sonic dispersion ensures that you will receive optimal sound through your listening room.
- Optimal performance in your room. Polk speakers are easy to position and are designed to provide superior performance in your listening room.
- High efficiency and power handling. Your Polk loudspeakers can be used with virtually any amplifier or receiver, large or small. They will play very loudly if desired, but also sound exceptionally clear at low volume levels.
- Unit to unit consistency and long-term sonic integrity. Total 100% quality control means your Polk speakers will sound as good as the laboratory prototypes and will continue to do so for many years to come.

"Literally a New Dimension in Sound."
Stereo Review Magazine

"Vastly Superior to the Competition."

Bang & Olufsens

The most economical way to bring the quality of a Bang & Olufsens turntable to an audio system. The KS turntable offers ultra-low tracking error, an accurate electronically controlled belt-drive system, automatic anti-skating, and the incredible pendulum suspension system that protects your records from harm and your music from distortion. What is perhaps the most impressive feature of the KS is that even in a modern audio system, the KS will show an incredible improvement.

Wouldn't miss the big game?

Are Orioles and Blue Jays more than just birds to you? Ever wonder what it's like behind the scenes of a major college athletic program? If you answered yes to these questions, then writing sports for The Observer could be just like pitching a no-hitter in the seventh game of the World Series for you.

Come to a meeting on Thursday at 7 p.m. in the Observer office on the third floor of LaFortune Student Center. We'll put you on deck, and it won't be long before you're in the batter's box and hitting away.

Wrestling comes to ND ACC

If the excitement of professional wrestling is your cup of tea, prepare yourself. The World Wrestling Federation's Super Stars of Wrestling come to town on Tuesday, Aug. 27, with six bouts at the ACC, scheduled for an 8 p.m. starting time. The night's main event will be an Inter-Continental title match between challenger Tito Santana and champion Greg "The Hammer" Valentine. In other bouts, Tony Atlas squares off with The Missing Link, Ivan Putsky matches up with Adrian Adams, George Mikl wresles Mike Sharpe and Tony Garea faces King Kong Bundy. In a tag team match, the British Bulldogs meet Volkoff and Sheik.

Tickets are $9 and $7 reserved and are on sale at the Gate 10 box office of the ACC. Office hours are 9 a.m. to 5 p.m. Monday and 9 a.m. until match time on Tuesday.

Meet the ND/SMC athletic administrators

Jo-Ann Nester - Nester is in her second year as Director of Athletics and Recreation at Saint Mary's College. In her first collegiate athletic administrative position, some of Nester's accomplishments include organizing Saint Mary's first student-athlete council and bringing in four highly-rated coaches to the Saint Mary's staff.

Joyce was named executive vice president of the University in 1952, three years after his ordination. As a college basketball coach and teaching behind her, Nester currently is head of the Notre Dame women's tennis team, which finished 10th in the nation in NAIA competition last spring. Nester holds bachelor and masters degrees from West Chester State in Pennsylvania, and she received her doctor of education degree with a minor in sports administration from Temple University.

Col. John Stephens - This is Jack Stephens' 18th year in the Irish administration and his third year as director of special projects for Corrigan. He assumed the role after having spent seven years as associate athletic director and another eight as an assistant director. Despite holding his present job for only a short time, though, he already has made an impact, playing a major role in the formation of the North Star Conference - a conference in which several women's sports now compete.

Jo-Ann Nester

National Vice President of the College Church, Valdiserri has earned 43 awards since 1976 from the College Football Association (CFA) with both the NCAA and the television networks. Corrigan was a driving force in the organization and planning of Notre Dame's first ever athletic endowment fund, designed to increase opportunities for Notre Dame students at all levels of competition. He also is credited with the introduction of two new varsity sports - lacrosse and women's swimming - in birefringent full year as athletic director.

Meet the ND/SMC athletic administrators

Joyce was named executive vice president of the University in 1952, three years after his ordination. As a college basketball coach and teaching behind her, Nester currently is head of the Notre Dame women's tennis team, which finished 10th in the nation in NAIA competition last spring. Nester holds bachelor and masters degrees from West Chester State in Pennsylvania, and she received her doctor of education degree with a minor in sports administration from Temple University.

Col. John Stephens - This is Jack Stephens' 18th year in the Irish administration and his third year as director of special projects for Corrigan. He assumed the role after having spent seven years as associate athletic director and another eight as an assistant director. Despite holding his present job for only a short time, though, he already has made an impact, playing a major role in the formation of the North Star Conference - a conference in which several women's sports now compete.

Jo-Ann Nester

National Vice President of the College Church, Valdiserri has earned 43 awards since 1976 from the College Football Association (CFA) with both the NCAA and the television networks. Corrigan was a driving force in the organization and planning of Notre Dame's first ever athletic endowment fund, designed to increase opportunities for Notre Dame students at all levels of competition. He also is credited with the introduction of two new varsity sports - lacrosse and women's swimming - in birefringent full year as athletic director.
Tom Kelly - As director of non-varsity athletics, Kelly oversees 19 intramural and 12 club sports, in addition to 36 recreational programs for both staff and students. Kelly, who was named an assistant athletic director in 1983, received his masters degree in physical education from Penn State and his masters and Ph.D. in Educational Administration from Notre Dame. He previously was N.Y.A.'s assistant director for 11 years (until 1979) and varsity baseball coach from 1976 through the 1980 season.

Brian Boulec - A former Notre Dame tight end, this 1963 University of Notre Dame graduate was named assistant athletic director in 1983 following 13 seasons on the Irish football coaching staff. During that time, Boulec was recruiting coordinator for seven years, an administrative assistant to Dan Devine for two years, and a participant in several administrative tasks, but she will continue to teach physical education. Petro graduated from Wayne State and received graduate degrees from both Eastern Michigan and Notre Dame.

Mike Bobinski - Bobinski is something of a newcomer to the athletic department's administrative ranks, although certainly no stranger to Notre Dame sports. He was named ticket manager and assistant business manager in the spring of 1984. The 27-year-old Bobinski is a 1979 Notre Dame graduate and a former Irish baseball pitcher who returned to South Bend after two years in management audit and participant accounting with Disney in Orlando, Fla. He earned two letters as a right-handed pitcher and a right-handed batter. Bobinski is a four-year member of the Irish starting rotation.

John Heisler - have been busy creating "The Second One of Equal Value for..." Imagine the finest ice cream only with 40% less calories and one quart of the cholesterol. Coolum Frozen Yogurt is all natural and made with fresh whole milk.
Several facilities now available for athletics

Whether you enjoy playing football, basketball, tennis, golf or racquetball, or just like going for an occasional dip in the swimming pool, there is an athletic facility for you. The pads are available in the fall and spring for various activities (although the University tends to freeze up too much use of the lawns), while, during the cold weather months, you can receive indoor. Here is a list of the facilities available to students on both campuses:

Athletic & Convocation Center
- The double-dome MCC, located east of the Stadium, contains more area than the Houston Astrodome. The South Dome houses the basketball arena used by both men's and women's teams. The North Dome is used by the hockey, tennis and track teams, among others. Within the structure are handicap, racquetball, squash, basketball, tennis and volleyball courts that usually are open to the public. Reservations are required for most of the courts. One may also take advantage of the ice rink, boxing room and running track. For those interested in the North Dome sports history, many of Notre Dame's awards are displayed outside the athletic department offices on the second floor.

Nautatorium (under construction) - Construction is expected to be completed in October on the Olympia-size pool that will be located on the east end of the Athletic & Convocation Center. The pool will have the capability of being divided into three sections. For instance, this would allow diving into one end, recreational swimming in the middle and water polo in the other end. The pool, which will measure 50 meters in length and 25 yards wide, also will include a diving area with three one-meter boards and two high boards. In addition, an observation deck, seating 480 spectators, will be part of the structure.

Rookies continued from page 20
 position. In high school, you were at the top from freshman to senior years. Here, it's not as easy to do. "Almost (Pinkett) has everything down pat. I'll be able to learn a lot from him this season just by watching the way he looks at the ball and the way he hits the hole."

But that person just as well may be Francis, younger brother of senior defensive back Hiawatha. He arrived in South Bend with equally phenomenal numbers.

Twice named all-city, all-conference and all-state as a member of the team at Moeller High School in Cincinnati, Francisco set Moeller career records for rushing yards (4,052), career points (359), single-season touchdowns (27 in his senior season), single-season rushing yards (1,658 as a junior), single game TDs (five) and career 100-yard games (11). As a junior and senior he was chosen Big Man of the Year in Ohio. As a junior and senior he was chosen Big Man of the Year in Ohio.

However, things now are different than they were in high school.

"At this level, there's a lot more technique involved," says the 5-10, 178-pounder. "In high school, there wasn't so much technique as emphasis on just using your talent. I like the fact that Hiawatha is here to help me with the adjustment as much as he can."

At 6-2, 185 pounds, Southall plans to take his own shot at becoming the next great Irish back. A standout at Rash-Henrietta Sperry High School in Henrietta, N.Y., he was an honorable mention pick on the Adidas/Scholastic Coach prep all-America team.

Angela Athletic Facility
- Located north of the Cushwa-Leighton Library on the Saint Mary's campus, Angela includes basketball, volleyball, racquetball and indoor tennis courts. Weight machines, fitness and gymnastic equipment also are housed in the facility. In addition, there are baseball and basketball courts outside the building. The facility is open to all Saint Mary's and Notre Dame students upon presentation of a student ID. Reservations are needed for the racquetball courts.

Burke Memorial Golf Course
- On the west end of campus is the 18-hole, 6,500-yard University golf course. The course is open until late fall and reopens in early spring. Green fees are $3 for students, faculty and staff. Alumni can golf for $8 on weekdays and $7 on weekends. The course is a par 71 and does not require that the golfer have great skill.

Rockne Memorial Building
- Located at the west end of South Quad, "The Rock" is the center for the physical education program. The brick structure contains basketball courts, handball-racquetball courts, a weight room, a lights-appearance room, a swimming pool and the golf pro shop. Use of the Rockne Memorial is free to all students and faculty members upon presentation of a University identification card. Closing time is 11 p.m. daily.

Stepan Center - Stepan Center includes an adjoining field and three outdoor basketball courts are located in the northeast corner of the campus.

Outside of the domed center, one can play basketball, football, soccer, rugby and softball. The basketball courts, which can be turned into an ice rink in the winter, are outfitted with lights that allow students to play basketball late into the night. Within the Stepian Center are soccer, basketball and volleyball courts, open courts for recreational and league play. Many of the interhall sports are conducted in this area of the campus.

As part of his career rushing totals of 2,531 yards and 26 touchdowns, Southall racked up 988 yards and tied his senior record. In his best game, he picked up 241 yards on 17 carries.

Also an outstanding defensive performer, Southall had six career kickoff returns for touchdowns. A senior at high school as his team posted a 24-5-2 record over the course of his senior year.

The biggest difference from high school for him is

"The hitting is a lot more explosive," Southall says. "It's clean, but it's more explosive. You have to have linemen that always know exactly what to do, and I like the total team concept here."

ATTENTION SCIENCE AND ENGINEERING MAJORS!

The Air Force has openings for young men and women majoring in selected science and engineering fields. Like Environmental, Aerospace, Electrical, Chemical and Materials Engineering; Mathematics, Physics and Computer Science.

If you are interested, please visit the Air Force ROTC office and talk to a representative. One of our officers will help you explore the various options available. You can make an appointment with any other officer of the air force reserve. There are several officers who will be on campus the next few days.

Freshman football players find challenges at Notre Dame

By JEFF BLUMB

Sports Editor

Challenges and new beginnings

For 1,800 freshmen, the arrival at Notre Dame this weekend signifies the start of another period in life. Still, the team here will not be without its growing pains.

For 24 freshman football players, arrival at Notre Dame two weeks ago for the opening of fall practice marked a new beginning in a football career. No longer are they the stars and heroes of their teams. Once again, they are forced to work themselves up the totem pole in an effort to reach the same kind of plateau they reached in high school.

And, as one might expect, the transition from high school to college football is not as easy one. Domination on the playing field because of superior size or talent is no longer possible as it was in high school. They look around the field and see that everyone out there possesses the same superior size and talent.

The challenge is there for these 24 freshman scholarship players to one day rise above their peers and reach new and more lofty heights. However, there will growing pains for them, as well. The test will come when each of the 24 are forced to deal with and overcome those growing pains.

Once again, Notre Dame's freshman recruiting class has rated the top of the nation, so there is no shortage of players with the capability to rise above the rest. Yet, Fauza, in his fifth year as Irish head coach, sees something different in this class.

"It's too early to tell how good this class is," he says, "but it is the first class I've had where no one has been a disappointment. In past years, there was always somebody we recruited that when they got here were a disappointment to us."

"I'm pleased with all of them. They all seem to have very good work habits, and that's something you need to be successful on the college level."

A trio of freshman tailbacks will be putting their work habits and potential to the test in an effort to become the next Allen Pinkett. The next 1,000-yard rusher, the next Heisman Trophy candidate. Mark Green, D'Juan Frazo and Cory Southall all have the potential to fill the shoes of Pinkett someday, and each has noticed the difference between the high school and college levels in the short time they have been here.

Green comes to Notre Dame with one outstanding credential. A consensus prep all-American. He was named as one of the top 100 incoming freshman by The Sporting News.

With his help at both a tailback and a defensive back, Riverside Poly High School in Riverside, Calif., was able to win two state titles.

As a junior, Green rushed 94 times for a total of 1,035 yards. Poly went undefeated at 14-0 and captured the California Class 5A state crown. In an effort to top his junior year, he then ran for 1,384 yards on 116 carries in his senior season as Poly compiled a 15-1 mark and went on to win the Class 4A title.

On July 27, Green showed his mettle in the 34th Annual Shrine Football Classic at East Los Angeles College as his South squad took apart the North, 25-6. Beside running with an amazing speed of 44 yards in nine-tenths of a second, he caught two passes for 70 yards, one of which went 55 yards for a touchdown. As if that wasn't enough, Green continued his show by opening the second half with a 94-yard kickoff return for a touchdown.

Can he do the same thing at Notre Dame? Green thinks so, but says it won't be as easy.

"Everybody is just as fast at the skill positions, I think. But I can make a complete recovery in time for the season. That question mark now may have been erased with the success of the operation.

"There has yet to be official word on the success of the operation. The loss of Mike is going to have a big impact on our football team for the season. Griffin, who started all but the Missouri and South Carolina games last year, again was listed as No. 1 on the Irish depth chart.

"Nose tackle Mike Griffin breaks ankle at practice"

Junior nose tackle Mike Griffin suffered a broken right ankle at yesterday morning's practice and will be lost to the Notre Dame football team for the season. Griffin, who started all but the Missouri and South Carolina games last year, again was listed as No. 1 on the Irish depth chart.

Surgery was performed on the ankle yesterday afternoon and there has yet to be official word on the success of the operation.

"It's been a tough break," said coach Gerry Faust. "Mike is a tough player and we'll be back and ready to go next fall."
