Pipe leak holds up LaFortune renovation

By CHRIS SKORZC
Senior Staff Reporter

The renovation of the LaFortune Student Center suffered a minor setback due to a leak last week in the Little Theater in the wake of last week's rain.

Although the damage was minimal, the situation has caused some concern to Brother Frank Gorch, LaFortune's manager.

"The flooding happened a few times this summer, although we didn't have a lot of rain," said Gorch. "This was a result of the storm sewer in the southeast corner of the building. The water just bubbled up like a fountain."

Gorch is not certain of the source of the flooding. One possible explanation for the problem is a break in one of the many underground sewer pipes, he said.

The cause of the break is equally unclear to Gorch. Physical Plant Director Don Dedrick "is continuing an investigation of the matter. Gorch speculated that the pipe was broken during some construction on the roof last May, immediately after graduation."

The purpose for the underground plumbing project was to lay the twenty-four inch piping needed to transport cold water for the Memorial Library's air conditioning with a new water line in place.

"The Dye Plumbing Co. of LaPorte, Ind., did the work. They are a first rate company and their work has been very good. However, in laying the piping for the chillers, they had to go through the roof, and there is a break in one of the nonstructural columns. The engineers feel that there may be a break in the concrete, but they aren't sure," he said.

Kidnapping victim found

Associated Press

SAN SALVADOR, El Salvador - Security forces recovered a stolen red van used to kidnap President Jose Napoleon Duarte's daughter and another woman, a top official here said yesterday.

But, despite a massive search, there were no clues about the victims' whereabouts or fate.

Julio Adolfo Rey Predes, the president's closest adviser, said yesterday that a second woman was kidnapped along with Ana Guadalupe Duarte Duran. He identified her as Ana Cecilia Vel- lela, 25, a university student and a secretary at the radio station run by the president's daughter.

It was the first report that a second woman was kidnapped after President Duarte Duran, 35, was kidnapped when she drove up to the New San Salvador University, where she attends classes. Six armed men in civilian clothes surrounded her car, shot and killed the driver and wounded one of her bodyguards.

Witnesses, who asked not to be identified for reasons of safety, said the men dragged Duarte Duran out of the Toyota and took her away in a waiting van. The wounded guard was reported alive but in critical condition. Another bodyguard was unhurt.

After meeting with his Cabinet much of the morning, a worried-looking Duarte appeared briefly at a news conference in the presidential residence in the early afternoon, but refused to disclose any information of importance concerning the raid.

Rey Predes said police recovered a red van which the kidnappers drove away from the university. He said the van was found by police late Tuesday at La Rabida, a lower middle-class neighborhood in the southeastern part of the capital.

A presidential source, who asked anonymity for security reasons, said the van was one of four vehicles that gunmen stole at gaspont a few hours before the kidnapping.
In Brief

The Student Activities Board at Notre Dame was assembling final evidence this week for submission to the Guinnes World Records company to claim the undisputed title for participation in a musical chairs game. Board members claim their total of 5,151 participants during an all-campus picnic Friday surpassed the old record of 5,050 held by the State University of New York at Albany. A freshman from Gainerville, N.Y., William Patrick Brockman was awarded a color television set as the surviving chair holder. Faculty and administrative personnel at Notre Dame were present to verify the numbers participating, and at least one video tape of the event was recorded. - The Observer

City firefighters in Evansville, Ind., have been ordered to stop burning condemned houses as training exercises by Mayor Michael V andevreer. Fire Chief John Behme said hot weather probably made that day a poor choice for the exercise. "It was very hot," Behme said, "and the smoke just stayed on the ground. It probably bothered a lot of people." -AP

The 1985 corn crop is estimated at a record 8.47 billion bushels, up 2 percent from the forecast a month ago and 11 percent more than last year's harvest of 7.66 billion bushels, the Agriculture Department said yesterday. Last month, the department's initial production estimate of the season showed the crop harvest to be 8.47 billion bushels. The latest estimate was based on indications of as of Sept. 1. -AP

Volunteers for Special Olympics are needed. There will be a free informational meeting for anyone interested in helping during the event tonight at 7 in the New Orleans Room of Lafayette Student Center. Volunteers are needed for coaching and numerous other duties. - The Observer

Information and applications for the 1986 Indiana Senate Majority Intern Program are now available to interested sophomores, juniors, seniors and graduate students by contacting Professor George Brinkley of the Notre Dame government department. - The Observer

Weather

Sweater weather. Sunny and continued cool today, high near 75. Northeast wind 10-15 mph. Clear tonight, low in the low to mid 50s. Sunny tomorrow, high around 75. -AP

Equal time, freedom of speech, and other issues at Notre Dame

What do an outstanding spokesman for the Catholic Church and an ex-convict/drug user have in common? Very little, except that one is the honor of speaking at Notre Dame, the most prestigious Catholic university in America.

Timothy Leary, a convicted drug smuggler and the self-proclaimed "messiah of LSD" speaking on campus tonight, Cardinal Joseph Bernardin and John O'Connor, two of the most articulate and well-known upholders of Christian values, will present a joint lecture on Oct. 1.

How is it that individuals of such differing rep are allowed to sit down to hear one another at the same place? The choice of controversial speakers is certainly no accident. Michael V andevreer of the Ideas and Issues Committee which is responsible for Leary's and many other campus lecture invitations, believes they add a dimension of interest. "We're looking for people that will bring an unusual perspective to campus," he says.

In fact, Vore says he was chosen for his position because he is the person who will be brought in controversial speakers. On his agenda for the future is Abbe Hoffman, founder of the Yippie movement, and one of the "Chicago Seven" tried for conspiring to incite riots.

In the past, other University departments have also raised not a few eyebrows by sponsoring such speakers as Christie Newberry, president of the Playboy pornography empire, and prostitute feminist Eleanor Smeal.

"There is a perception on campus that the administration body is conservative. I question that. Seeing the interest (the speakers generate) will prove that point," Vore said.

Such lecturers also have the distinct advantage of drawing in larger audiences. The Student Activities Board has made the most of this by playing up Leary's notorious public speaking for the lecture. All available tickets to the Washington Hall appearance have been given out in advance, and as of last night there was a waiting list of 500. If Vore does receive any objections to the lecture, he can be sure they will not come from the University. Notre Dame has an official open-speaker policy (stated in Dr. La) allowing students the freedom to choose any speaker they wish.

Several decades ago, the University would not have allowed such a public speaking invitation to such people; some would have been heard as scandalous and dangerous. Notre Dame has radically shifted ground in the balance.

Portuguese train crash claims at least 100 lives

Associated Press

VISEU, Portugal - More than 100 people were reported killed when an express train loaded with immigrant workers bound for France slammed into a domestic passenger train yesterday, according to a foreman at the scene.

Prime Minister Mario Soares, who flew by helicopter to the crash site near this town in central Portugal, said the accident was the worst in the history of the country's railway system.

Firefighters and witnesses said cars in the two trains tipped over and burst into flames, setting a pine forest along the tracks on fire as well.

The domestic news agency, ANOP, and the state television, RTP, quoted the foreman giving the death figures.

ANOP also quoted police as saying there were another 140 injured. But RTP said it was difficult to determine the number of injured because they had been taken to many different hospitals.

According to railway officials, the accident occurred at 6:40 p.m., when the behind-schedule eastbound international train hit a Coimbra-bound local train between the towns of Mangualde and Viseu in the mountainous Serra da Estrela region.

Alvaro Rodrigues, a ticket collector on one of the trains, told ANOP he was forced to escape with two women when the car they were riding in tipped over.

"I could do no more because flames were spreading through the carriage, and I feared explosions," he said.

Hospital authorities in Viseu, 185 miles northeast of the capital, Lisbon, appealed for donations of blood, and police asked people to stay away from the scene to facilitate removal of the dead and injured.

The Observer

That's all, folks

Sophomore Sam Dempsey was lucky enough to get the last Michigan ticket from Don Dickenson yesterday. Students raced to Davis Faculty Hall at 5 p.m. after WVFI announced the hard to get tickets would be on sale there. The tickets were left over from last Friday's lottery.

First comet-satellite encounter a success

Associated Press

GREENBRIET, Md. - A hardly little satellite glistened unscathed through the tail of a comet and temperatures of one-half million degrees yester-

day, in the first on-the-spot sampling of a comet's physics. The satellite, which was景德镇 in a solar electrical field but

surprisingly little dust. 

"From the human perspective, from the project point of view, from the scientific perspective, mankind's first encounter with a comet has to be ranked an unqualified success," said NASA scientist Edward Smith.

The satellite, called the Interna-

tional Cometary Explorer, inter-

cepted the comet Giushii-Zinner

44 million miles above Earth and

spent 30 minutes traveling through a tail 14,000 miles wide.

Its mission was to sample space plasma, the electrically charged mat-

ter that occupies most of the limit-

less void.

Fears that dust might cloud the spice-\"er's electricity producing solar power would reduce its ability to transmit data proved groundless. So did worries that even a gravel-sized particle could change the direction of the satellite's antenna away from Earth.

"It looks like very little happened to it," said Director Robert Far-\n
tiquhar, who had given the satellite only a 50-50 chance, said at the God-

\n
dard Space Center here.

With their achievement, American scientists beat the Soviet Union - which is sending two much

and soak up the viruses before they could bring on the sneezes and clogged

noses.

The NSF and the NIH also helped pay for the experiments, which relied heavily on such high technology machinery as Purdue's 205 supercomputer and the Cornell University High Energy Synchrotron Source.

Basically, the experiments in-

volving growing virus crystals, which were then subjected to X-rays at Cornell, where the synchrotron collected the x-ray information, were then analyzed by Purdue's supercom-

puter.

Rossmann said he had wanted to conduct such experiments for more than 20 years but they were simply impossible before development of such advanced machinery.

One common cold virus 'mapped'; vaccine a possibility

Associated Press

WASHINGTON - A group of scien-
tists headed by a Purdue University professor said yesterday they have finally mapped one of the tiny viruses that cause the common cold, raising hopes for vaccines or other drugs to fight any number of life-

threatening or merely pesky viral ail-

ments.

The findings could lead to new progress against diseases ranging all the way from sifflies to multiple sclerosis to leukemia and perhaps even to the mysterious and deadly AIDS virus, the lead researcher, Purdue University professor Mic-

tul Rossmann, whose Purdue team worked in collaboration with a Uni-

versity of Wisconsin group headed by Roland Borekert, said there ac-

tually may never be a one-shot vaccine for colds because they can be caused by more than 100 dif-

ferent viruses.

Still, he said that in light of his group's findings, "it may be possible to find a cure for the cold that may not be along the lines of a classic vaccine," a drug, for example, that would attack not the virus itself but would involve the site where the virus attaches to healthy cells.

As for broader significance, an of-

ficial of the National Institute of Allergy and Infectious Diseases said in an interview that Rossmann's fin-

dings were "a good basic piece of in-

formation."

"It takes a lot of pieces to put together something of clinical im-

portance," added William Allen, a

associate program officer for the federal institute, which helped pay for the research.

He said Rossmann and Dr. Robert Gallo of the National Cancer In-

stitute were already setting up an ex-

periment aimed at mapping leukemia-linked viruses using the same high-technology processes used on the cold virus. The virus that ap-

parently causes acquired immune deficiency syndrome, or AIDS, could

eventually be part of that effort, though success in that area "is very speculative," Allen said.

"It's very exciting," agreed Dr. Robert Farnt, who had given the satelli-

te only a 50-50 chance, said at the God-

dard Space Center here.

With their achievement, American scientists beat the Soviet Union - which is sending two much

and soak up the viruses before they could bring on the sneezes and clogged

noses.

The NSF and the NIH also helped pay for the experiments, which relied heavily on such high technology machinery as Purdue's 205 supercomputer and the Cornell University High Energy Synchrotron Source.

Basically, the experiments in-

volving growing virus crystals, which were then subjected to X-rays at Cornell, where the synchrotron collected the x-ray information, were then analyzed by Purdue's supercom-

puter.

Rossmann said he had wanted to conduct such experiments for more than 20 years but they were simply impossible before development of such advanced machinery.

Drug-running parachutist killed; $41 million worth of cocaine found

Associated Press

KNOXVILLE, Tenn. - A heavily armed parachutist, wearing a bullet-proof vest and carrying $41 million worth of cocaine, fell to his death in a bedroom, according to police who discovered the body yesterday morning. "It looks like he jumped out with too heavy a load," said Gorch said.

"I got up to shave and looked out my window and saw him," said Fred Myers, 40, who discovered the body yesterday morning. "I was there a few days ago complaining to the police, and we've been very helpful. He said he hadn't realized the problem was so bad and he looked at it. He had bags attached everywhere," said Ralph Johnson, a x-ray technician of Myers who notified authorities.

"There was a trickle of blood from his nose that had dried on each cheek. Other than that he looked OK," Johnson said. "He was lying on his back with his knapsack half under him."

Meth Narcotics Squad Lt. Jerry Day said the man was "aiming for this area and there was probably someone supposed to meet him."

Detective Charles Coleman said the death appeared to be an accident.

"He had several IDs on him, all different. We're checking to see which one is his," said Coleman.

The victim's main parachute apparently failed to open and the reserve chute had been deployed, Coleman said.

Pasquerillas

beats down on large windows that cannot be opened, further heating the already warm rooms.

"When the elevator reaches the fourth floor, you step out and feel heat rising in the lobby," said one resident.

"We're not pushing for air-conditioning," Binder said. "We just need real, cross-ventilation. Now it's cool outside, but how can you get that in? We don't have a fan to get it to our stated system out," she said.

Last spring, Pasquerillas East President Carlie Hand asked university officials and the Hall Presidents' Council to find a solution to the problem.

She sent out six copies of her appeal, one of which was addressed to Dedrick. Dedrick told her the solution would not arrive in the immediate future.

Dedrick and an architect from Minneapolis then went through both dorms. The architect later wrote that the only way to alleviate the problem is to have the Pasquerillas be air-conditioned.

The two men concluded that a huge fan system would not solve the problem because it only would replace hot inside air with hot outside air.

Hand said at an HPC meeting last spring that the heat in the dorms was a "health hazard." Mr. Dedrick has been very helpful. He said he hadn't realized the problem was so bad and was glad that I had pointed it out," said Hand at the meeting.

Yesterday I finally heard the first of the two terrible sounds I have dreaded hearing since I came to the Midwest: the wail of a tornado siren. The second of the sounds - the sub-bass rumblng of the tornado itself. We at Notre Dame were spared this time, as the tornado mercifully topped over our section of the city.

Steven Horst

But the comfort I take in this fact is more than offset by the realization that, had a tornado struck Notre Dame, the damage done in terms of injury and loss of life would have been tragically and unnecessarily high.

In the building, classes continued as usual in rooms with 9-foot plate glass windows that contained plenty of glass for everyone in the room in the event that they be shattered by the 200-mile-an-hour winds at the periphery of a tornado. At least one professor had the wisdom to take his class out of the classroom and into the hall, but his choice of the Great Hall in O'Shaughnessy, with an exposed roof, four open doors and enormous stained glass windows (admittedly stronger than plate glass, and certainly a much more classy way to be cut to ribbons) was perhaps a trifle misguided.

The dean's office did not know what to do and evidently had not been prepared in what measures to take in the event of an emergency. When they called personnel, they were given the edifying advice that if they felt unsafe, they could go to the basement.

Perhaps most alarming of all were the confusions of individuals. One person wondered whether she should drive home during the warning despite the fact that a tornado was currently being tracked in the very area she would be driving through. Personally, I live in one of the post-era apartment complexes that you always see the remains of on the evening news after a tornado has struck, so I was quite glad to be home at the time. Others, when the word tornado was mentioned, said, "Oh, is that what those sirens were? I wondered!" One person I talked to thought they must have been testing the sirens, despite the fact that they routinely do this on

That initial excitement wears off, most girls would probably start thinking more seriously about the consequences of such a change grover. Let us now pretend that the plans have been made - the contract reading, "On the date of Jan. 1, 1986, the all-girls college, St. Mary's of Notre Dame, will become a coed campus." Isn't this what we have all been waiting for? What problems could possibly occur? Why don't we go over some of the positive and not so positive effects that would be likely to occur if Saint Mary's College went coed.

First of all, the favorable results, since those are the ones we think of initially. No more parietals! No more attempting to sneak past the parietal desk until you hear, "Hey, we need an ID from him before you can go up." Or worse yet, problems arise when parietals are over at their boyfriend and you, along with twenty other dumbfounded coeds, are sitting in the lobby at 2:30 a.m. Undoubtedly, with the new policy there would be no more sneaking, no more parietals! No more attempts to sneak past the parietals. Everyone must admit that parietals have always been a sore point of Saint's girls, and no one would cry over its abolishment.

Another plus is the fact that the reputation Mr. Broadrick (president of the college) wishes to improve is that of a school that is too academic. The perception that Notre Dame is a school that-always plays second fiddle to Saint Mary's is slowly being corrected. That is not to say that Notre Dame is known for its academic standards, but that it is not as strong academically as Saint Mary's College.

A final advantage of a coed campus is the simple fact that there would be guys everywhere. No girl enjoys the feeling of being shuttled off to a party at Notre Dame that all too often ends up to be an open meat market. Guys stare, girls stare, guys give one their best pick-up lines, girls actually fall for them; it's all so mechanical. Of course, this is not all bad, but before you go up to the party, you should realize that guys are going to have a cow, right down the hall instead of a shut-eye's ride away.

So, we have gone over how great coed dorms would be at Saint Mary's, now there is always a "but" in every favorable situation. Being at an all-girl's college, Saint Mary's girls have enjoyed many freedoms that just would not conform to coed living. No more prancing around in a T-shirt and underwear when you go to the bathroom or get a pop from the lobby. No more waking up ten minutes before class and jumping into yesterday's pungent volleyball shorts and shirt with Wildroot in your hair. Now the Saint Mary's girl cares about how carefully her make-up is applied when she sits in class everyday with 200 other girls. If the campus went coed, there would be a lot of changes such as the showers going on earlier, the curfew being plugged in, the make-up being applied meticulously and the dresses and skirts being dragged out of the back of closets.

But that is not the worst part of this coed stuff. Along with the transition of the male sex comes the male competitiveness, dominance and ego. Where there is now friendly competition between coaches, the guys would soon turn this peaceful setting into a sweaty battleground. Also, the new unified, supportive clubs and organizations would be overtaken by the ever dominant male sex. It may be more difficult, but our all-girls college would be more ready than they were on Monday.

Erlin O'Brien

Decision to go coed at Saint Mary's weighed

that excitement wears off, most girls would probably start thinking more seriously about the consequences of such a change grover. Let us now pretend that the plans have been made - the contract reading, "On the date of Jan. 1, 1986, the all-girls college, St. Mary's of Notre Dame, will become a coed campus." No more waking up ten minutes before class and jumping into yesterday's pungent volleyball shorts and shirt with Wildroot in your hair. Now the Saint Mary's girl cares about how carefully her make-up is applied when she sits in class everyday with 200 other girls. If the campus went coed, there would be a lot of changes such as the showers going on earlier, the curfew being plugged in, the make-up being applied meticulously and the dresses and skirts being dragged out of the back of closets.

But that is not the worst part of this coed stuff. Along with the transition of the male sex comes the male competitiveness, dominance and ego. Where there is now friendly competition between coaches, the guys would soon turn this peaceful setting into a sweaty battleground. Also, the new unified, supportive clubs and organizations would be overtaken by the ever dominant male sex. It may be more difficult, but our all-girls college would be more ready than they were on Monday.

New to the News

that excitement wears off, most girls would probably start thinking more seriously about the consequences of such a change grover. Let us now pretend that the plans have been made - the contract reading, "On the date of Jan. 1, 1986, the all-girls college, St. Mary's of Notre Dame, will become a coed college." Isn't this what we have all been waiting for? What problems could possibly occur? Why don't we go over some of the positive and not so positive effects that would be likely to occur if Saint Mary's College went coed.

First of all, the favorable results, since those are the ones we think of initially. No more parietals! No more attempting to sneak past the parietal desk until you hear, "Hey, we need an ID from him before you can go up." Or worse yet, problems arise when parietals are over at their boyfriend and you, along with twenty other dumbfounded coeds, are sitting in the lobby at 2:30 a.m. Undoubtedly, with the new policy there would be no more sneaking, no more parietals! No more attempts to sneak past the parietals. Everyone must admit that parietals have always been a sore point of Saint's girls, and no one would cry over its abolishment.

Another plus is the fact that the reputation Mr. Broadrick (president of the college) wishes to improve is that of a school that is too academic. The perception that Notre Dame is a school that-always plays second fiddle to Saint Mary's is slowly being corrected. That is not to say that Notre Dame is known for its academic standards, but that it is not as strong academically as Saint Mary's College.

A final advantage of a coed campus is the simple fact that there would be guys everywhere. No girl enjoys the feeling of being shuttled off to a party at Notre Dame that all too often ends up to be an open meat market. Guys stare, girls stare, guys give one their best pick-up lines, girls actually fall for them; it's all so mechanical. Of course, this is not all bad, but before you go up to the party, you should realize that guys are going to have a cow, right down the hall instead of a shut-eye's ride away.

So, we have gone over how great coed dorms would be at Saint Mary's, now there is always a "but" in every favorable situation. Being at an all-girl's college, Saint Mary's girls have enjoyed many freedoms that just would not conform to coed living. No more prancing around in a T-shirt and underwear when you go to the bathroom or get a pop from the lobby. No more waking up ten minutes before class and jumping into yesterday's pungent volleyball shorts and shirt with Wildroot in your hair. Now the Saint Mary's girl cares about how carefully her make-up is applied when she sits in class everyday with 200 other girls. If the campus went coed, there would be a lot of changes such as the showers going on earlier, the curfew being plugged in, the make-up being applied meticulously and the dresses and skirts being dragged out of the back of closets.

But that is not the worst part of this coed stuff. Along with the transition of the male sex comes the male competitiveness, dominance and ego. Where there is now friendly competition between coaches, the guys would soon turn this peaceful setting into a sweaty battleground. Also, the new unified, supportive clubs and organizations would be overtaken by the ever dominant male sex. It may be more difficult, but our all-girls college would be more ready than they were on Monday.

Because of a shipping error, Doonesbury arrived late this week. The entire week's strips will be run in sequence today and tomorrow.
Peter Walshe

...the freshmen campaigns context. It is too easy to watch things change right in front of our eyes. Baseball as I want to remember it has changed. Of course, the superior firepower of whites, a new strain of leadership emerged from the student resistance. Under a colonial dispensation, this new black middle class was enabled to participate in the parliamentary system of the Cape. By 1963, 12,000 Africans had qualified for the vote, the 1960s. In percent of the voters’ roll was black. This system was ended after the Boer War, when Britain unified the region and regionalized a color-bar constitution with an all-white parliament in an effort to accommodate the defeated Afrikaners. No sooner had that parliament met in 1910 than it started to pass a series of segregationary statues.

Outraged by these developments, Africans formed the African National Congress (ANC) in 1912. Its purpose was to oppose segregation and for a non-racial system of government. Father John Dube of the Congregational American Board Mission educated an African schooled in U.S. black colleges, was the ANC’s first president. Decade after decade the ANC produced black leaders of calibre, men like Dr. A.B. Xuma and Albert Luthuli. Xuma was the president during the 1940s, married a black American, Madie Hall, and received his medical training at Northwestern University and the University of Edinburgh. Luthuli led Congress during its passive resistance campaigns of the 1950s and was the first South African to receive the Nobel Peace Prize (1962).

After almost a century the peaceful but ineffective protest, the ANC was banned by the apartheid regime in 1960. This forced it to go underground, and, reluctantly, to adapt the use of counterinsurgency. Since that time, a continuing stream of able, humane black leaders have taken up the struggle, only to be imprisoned or driven into exile — crushed by the superior firepower of whites, a new strain of leadership emerged from the student resistance. Under a colonial dispensation, this new black middle class was enabled to participate in the parliamentary system of the Cape. By 1963, 12,000 Africans had qualified for the vote, the 1960s. In percent of the voters’ roll was black. This system was ended after the Boer War, when Britain unified the region and...
Leary ‘Questions authority’

Frank Mastro

features writer

T F YQA

Look for yourself and question authority,” said Dr. Timothy Leary when questioned about the topic of his lecture. “That doesn’t mean to protest. It means seek out the self-confidence which is happening” said the 64-year-old Leary.

“My mission is to encourage and empower individuals in the Notre Dame community to TFYQA,” said Leary.

Recall, that this is the same man who taught a graduate course at Harvard called, “Creating Your Own Reality” with the optional text of LSD.

“The best way to think for yourself is to allow a tremendousuple of his or her own mind, called a Mind Map,”

Leary is better known, however, as a leading figure during the decade we refer to as ‘The 60’s.”

“The greatest explosion of individual self-confidence occurred in the 60’s. We changed the world in the direction of individual pride and self-confidence,” said Leary.

“The Baby Boom phenomenon took place in 1946 and they totally dominated society,” said Leary.

“They hit high school and college age and said ‘Treat me as an individual.’”

Leary is also well known among political circles. He ran unsuccessfully against Ronald Reagan in a bid to become governor of California in 1969.

There were 10 million Democrats better than Jimmy Carter. There are 28 million Republicans better than Reagan and Ford. Any 10 planks they could have figured out the Cold War,” said Leary.

Leary has spoken at Notre Dame twice before, the last time being in 1978. He also reflected on his experiences from his 1968 visit.

Whenever Leary spoke back then, he always had to debate an official government person. In 1968, he and Sidney Cohen squared off at Notre Dame.

The students asked Leary why he was here and he responded, “To question authority.” Next they asked Cohen his reason for being on stage. He replied, “I came for the money.” The students cheered Cohen.

“Notre Dame was into the 80s in the 60’s,” said Leary.

“I’m a humanist. The hope of the human race lies in the United States of America,” said Leary. “The genius of America is that we have the power to think for ourselves. There will be an explosion of intelligence in the future. Everything in my power is done to encourage TFYQA.”

Those students who were unable to obtain tickets, who were given out in a scant hour, will have a chance to hear Leary when he speaks at the patio on the Fieldhouse Mall from 12:10 until 12:25 this afternoon.

His lecture at Washington Hall commences at 8 p.m. and is bound to be filled with further acronyms and witty comments.

When he does and she doesn’t

Child-free marriages on the increase

Associated Press

“Too be or not to be,” child-free is a decision that can divide otherwise loving couples—often it is the woman who does not want children and the man who does.

The 1983 Census revealed that up to 40 percent of married women in their early 20’s choose to remain childless, according to an article in the September issue of Cosmopolitan, while 10 percent of women in their late 30s made the same choice.

They are backed in their decision by recent studies of childless women that show the same degree of happiness, maturity and satisfaction attained by parents can be had by those who do not have children.

A counselor at the American Institute of Family Relations said that households in which the man wants a child and the woman does not are rare.

Most couples reach a decision about parenting before marriage, but some marry assuming they agree on children, only to learn later that they do not.

Child care therapist Merle Bombardier said others drift into nondecision, which sometimes ends with an "accidental" pregnancy.

Reaching a decision is difficult, and as child-free broadcaster and author Betty Rollin has said:

"Look, I feel I missed something, which I’m occasionally wistful about, but that doesn’t mean I’m sorry or that I wouldn’t make the same decision again. I think people who do have children miss something too."

Los Angeles psychologist Diane Elvenstar Medved advises couples to place the highest priority on their relationship when trying to reach a decision on parenthood on needs and goals, rather than feeling of obligation.

"If thinking about having a baby makes you depressed, you know you’re not ready to have one," she said.

"On the other hand, if imagining sterility causes swings of happiness and depression, parenthood is more important than you realize."

Couples struggling with this problem often experience feelings of helplessness, frustration and anger, as well as tension and anxiety. "Taking openly and honestly will help," writer LeAnn Lowe, the mother of two children who wanted her current relationship to be childfree, offered these suggestions for keeping discussion direct and forthright:

"Listen to your partner without anger, and express in words your understanding of his position."

"Don’t assume you can read his mind or that he can read yours. Ask questions about his feelings and explain your own."

"Concentrate on feelings and avoid accusations and hostile outbursts."

"Recognize that you are partners and there is no right or wrong in this situation."

Psychotherapist Bombardier said women who have had children by a first marriage and want a child-free second marriage may be in a special category. She said they may be affected by the unpleasance of the first marriage, and she recommended they consider how patterns would be different with a second husband.

Ann Snyder, a marriage counselor in the Los Angeles area, she said people married for the second time often have children who are not the children they raised, which can cause problems.

In her own case, author Lowe said it in Cosmopolitan that she and her partner have decided to postpone a decision on children and she added, "Meanwhile, I feel confident our eventual decision will be made by not default but by choice and together."

Compromising Positions

Movie review

"Compromising Positions," at first glance, seems to be a delightful mixture of comedy and mystery. Presented with such a title, how could one hope to be bored? Read on.

The plot revolves around the mysterious murder of an upright, upstanding oral surgeon, Bruce Fleckstein. A Pillar of the community type. Get the picture? However, soon after his death, rumors start flying. One hears whispers over the back fence, low voices on the patio and the word spreads.

One friend Bruce was involved with, prenuptial traffic via the mob. (Gasp).

Granted, even this tidbit of information would be of passing interest to us except for one minor detail. Pictures start turning up.

Enter Judith, our heroine, played by Susan Sarandon. It becomes her burning desire to track down Fleckstein's killer. We await her first move with baited breath. And this is where our story starts to sound its death knell. Instead of exploding into a maze of mystery and intrigue as Judith tracks down the villain, the plot becomes dated, trite. Sarandon's character seems to be caught in a web of shallow, one-dimensional relationships. The scenes which should have inspired terror, humor, compassion, or even love, merely elicits apathy.

The problem wasn't the movie's concept, which I found delightful. It was the manner in which the concept was presented that made me want to get up and leave.

"Compromising Positions" couldn't seem to offer any shred of originality or flair to the age-old question: "Who done it?"

And this is the movie's downfall. However, aside from it's obvious problems, the movie does furnish some relatively good acting in the form of Judith Sing, who plays Nancy, Sarandon's best friend, and Raul Julian, playing Suarez, the chief inspector. Their interplay with Sarandon shines like a diamond amidst the wreckage of the script.

The victim of this movie isn't the murder of Fleckstein. It is Judith, the freelance investigator. The victims of "Compromising Positions" Sunday night were the eight people in the Town and Country Theatre 2. Seven of us were hoping in vain that a fly would land on the projector lens in order to give us something at which to look. The eighth snoozed gently in the corner. Now there's an idea! If your roommate is up late keeping you from your sleep, try "Compromising Positions." It can't hurt. And there'll be plenty of empty seats.
Sports Briefs
The Notre Dame soccer team won its first game this season when the Irish beat DePaul, 3-1, yesterday in Chicago. Details will appear in tomorrow's paper. - The Observer

The Notre Dame-Michigan football game will be broadcast live on WVR (AM 64) on Saturday, beginning at noon. Pete Provisor and Joe Malamazza will call the play-by-play, and Brett Musburger of CBS will be featured at halftime. - The Observer

The ND Water Polo Club will play Michigan on Friday at 6:30 p.m. in the University M.I.T. Pool in the center of the Arbour campus. - The Observer

The ND Tae Kwon Do Club will hold a class tonight at 7 p.m. in the fencing gym in the ACC (Gate 4). This is the last chance to sign up for the Tae Kwon Do Club. The club will provide the club by playing - The Observer

The ND/SMC Women's Golf Club will play at Notre Dame's Invitational in Big Rapids, Mich., this weekend. - The Observer

The ND Squash Club will play the Michigan Squash Club on Saturday in the CCBB Building following the football game. Anyone who is interested may stop by. For more information, call William Mapother at 283-3451. - The Observer

Interhall officials are needed for football and soccer. For more information, contact the office in the ACC. - The Observer

Bengals will stay with new alignment
Associated Press
CINCINNATI - Cincinnati Bengals Coach Sam Wyche says his team will probably use what he calls a "bip formation" at Sunday's game in St. Louis.

The Bengals used the formation in last Sunday's 28-24 loss to the Seattle Seahawks. Though the Bengals didn't win the game, the formation did work as the Bengals took a few first downs. Wyche said.

Wyche put wide receivers Cris Carter, Curtis Johnson and Charlie Joiner on the same side of the field. Seattle continued using five defensive backs and doubling coverage on Brown and Collinsworth.

And toward the end of the game, the Seahawks reacted the "right way," Wyche said.

"They overshifted ... and took a go-on with which they stopped us one play in the last drive. We ended up making a first down after that, but that play was five yards short to come the quarter," Wyche said.

SMC tennis team crushes IU/PU, but drops 5-4 match to St. Francis

By PAMELA CUSICK

The Saint Mary's tennis team traveled to St. Francis College yesterday and split two matches by shutting out Indiana University-Purdue University at Fort Wayne 9-0, and falling short of a victory against St. Francis College by a match score of 5-4. The Belles split against the two fellow NAIA District teams to improve their season record to 1-3.

Under the leadership of first-year coach Debbie Laverie, the Belles are on the upswing and took to the District tournament to show their cumulative strength and experience.

Against IU/PU-Fort Wayne, the Belles had no problems on their way to victory. Anne Drahota led the way for the Belles at No. 1 singles by claiming her seventh match when her opponent retired early with a final score of 6-4, 6-4, 3-1. Teammate Valerie Falbo was victorious at the No. 2 singles spot 6-3, 6-4.

Dominating the entire match, Shawn Boyd won easily 6-0, 6-1, 6-1, at No. 3, while the No. 4 position was won, 6-1, 6-0, by Belle Kim Drahota. Also a winner, Bridget Hare won her opponent by a score of 6-0, 6-0.

Because Saint Mary's had already claimed the match by winning seven singles matches, IU/PU-Fort Wayne forfeited the doubles matches to wrap things up.

"We were very happy with our performance in the Indiana matches," Laverie said. "But singles players are regaining the confidence needed to improve with every game. We just have to keep up the good work."

Although the Belles seem to be improving, they could not pull things together against St. Francis. The team struggled and fell short of a win by one match.

The Belles won their matches against St. Francis at No. 4, No. 5 and No. 6 singles as well as No. 2 doubles.

"We encourage the runners to talk to each other. We have to get used to it, but they gradually do." By following this philosophy, last year's team put a quick end to races.

"In one race (the National Catholic League Invitational), two of our runners finished in a 38-second spread. It was unbelievable," Plante said.

"At home, you have to worry about 15 to 60 seconds."

"If you get a quick start, you would come in, and the race would be over."

This season the Irish will run twice at home. The site of the meets is the Burke Memorial Golf Course. "Pinehaven," usual course, is very flat and very fast, with just a few 'bumps.'

Holland has been identified as a friend of Strong's and has been linked by others to cocaine use.

Parker was the sixth major league to implicate Strong, 38, who is on trial on charges that he sold cocaine. He has played some part in it.

"Curtis was pretty well known to have been using cocaine," Parker said.

The trial is expected to continue tomorrow when the Irish travel to Columbus, Ohio, for their season-opening race against Ohio State, Michigan State and Missouri Baptist.

In preparation for this season, the team has followed a workout consisting mostly of overdistance runs and FCRs (fast continuous runs). During these runs, Plante has emphasized the team concept by encouraging the runners to run as a group.

"They have to run in a pack," he said. "I have yet to see a successful cross-country team that did not run as a pack.

Holland was the sixth major league to implicate Strong, 38, who is on trial on charges that he sold cocaine. He has played some part in it.

"I'm really psyched," said Strong in his first public admission of cocaine. "My game was slipping and cocaine was right there."

Holland has been identified as a friend of Strong's and has been linked by others to cocaine use.

"Curtis was pretty well known to have been using cocaine," Parker said.

"We definitely can see improvement with our team's overall performance," Plante said. "We are getting better with every match," commented the Bella head coach. "We hope to gain confidence at the time of Districts, but we have to make a few changes in our doubles teams before then."

"Our overall team is as strong as any other," Plante said. "We just have to get used to it, but they gradually do."

By following this philosophy, last year's team put a quick end to races.

Presence of Nicklaus is 'a real shot in the arm' for Milwaukee Open

Associated Press
MILWAUKEE - The young turks may be taking over the PGA tour, but Jack Nicklaus still is the draw.

Ask the organizers of the Greater Milwaukee Open, who are overjoyed to have Nicklaus in a tournament field minus Ryder Cup competitors, including defending GMO champion Mark O'Meara and local favorite and U.S. open champion Andy North.

"It's a real shot in the arm" and should boost gate receipts, said GMO spokesman John Abya.

The 18th annual GMO was scheduled to begin today at Tuckaway Country Club in nearby Franklin. The $300,000 four-day golf event will go 72 holes on the par-36, 7,010-yard layout, a hilly course with big greens.

Notable players in the announced field were: George Burns, coming off a win last week in the Bank of Boston Classic; Roger Maltbie, who's among the top 10 moneywinners on the tour, two-time 1985 tour winner Joey Sindelar, and tour regular Andy Bean.

Jack Nicklaus II, the 23-year-old son of the "Golden Bear," also will compete in the GMO tour stop, a father-son event organizers say never has occurred.

"If I'm playing ahead of him, I'll probably be looking over my shoulder to see how he's doing," the elder Nicklaus said of his sometime caddy. "It won't be any problem."

"I'm not approaching it any differently than any other tournament," the younger Nicklaus said. But he admitted he was excited because he was playing in the same tournament as his father for the first time and because it was his second Professional Golfers Association Tour event.

Young Nicklaus, an amateur, made his first appearance this summer in the Quad Cities Open but missed the cut.

This also is the first year the elder Nicklaus has competed at the Greater Milwaukee Open as a professional.

The 45-year-old Nicklaus played in the tournament as an amateur in 1961 and in 1963 when it was played at North Hills Country Club, finishing three strokes behind winner Bruce Crampton.

But Nicklaus probably is here only because he's having an off year, one in which he hasn't won a tournament. Normally, he'd be in Europe with the U.S. Ryder Cup team.

"You're darn right I intend to win some tournaments," Nicklaus said as a news conference Tuesday. But then the winner of 70 tour events and 17 major championships said he wasn't really sure what he wanted to do with the rest of his playing career.

"I happen to enjoy playing golf," Nicklaus said. "Even though this has been a disappointing year, I feel I still can play. I know I don't play as well as I used to.

"If my family wasn't playing, I probably wouldn't be playing," he continued.

Dave Dravecky. Tuesday night. Rose started against Padres right-hander LaMarr Hoyt but went hitless in four at bats. He hadn't had a hit in his last six at-bats and, for the fifth time in the past nine games, he had gone hitless.

Rose was able to get to Show right away, though, last night as he lined the first-inning single and a later triple, and scored both Cincinnati runs to lead the Reds to an emotion-filled 2-0 victory over the Padres.

Left-hander Tom Browning, 16-9, who was barely 3 years old when Rose broke into the major leagues with the Reds in 1965, tossed a five-hitter for his seventh consecutive victory and the most by a rookie pitcher in the majors this season.

"I'm not approaching it any diferently than any other tournament," the younger Nicklaus said. But he admitted he was excited because he was playing in the same tournament as his father for the first time and because it was his second Professional Golfers Association Tour event.

TUDOR, Cedeno boost St. Louis

Associated Press

NEW YORK - John Tudor pitched a three-hitter for his third straight shutout and Cesar Cedeno led off the 10th inning with a home run last night, giving the St. Louis Cardinals a 1-0 victory over the New York Mets that tied the two teams for first place in the National League East.

Tudor, 18-8, won for the 17th time in his last 18 decisions and helped the Cardinals break a four-game losing streak. The left-hander held the Mets hitless until the sixth, when pinch-hitter Marni led off with a soft single to center.

A leadoff single in the eighth by Darryl Strawberry was New York's only other hit until Wally Backman led off the 10th with a single. Tudor, who struck out seven and walked two.

The loss went to Jesse Orosco, 3-5, who relieved Dwight Gooden in the 10th.

Dodgers 12, Braves 3

ATLANTA - Mike Marshall held the Mets hitless until the sixth, while Roy White slugged a two-run homer in the sixth of his last nine decisions.

The Cards' 10th victory in 12 games boosted the club to 500 for the first time this season.

Cubs 3, Pirates 1

PITTSBURGH - Leon Durham hit a solo homer to snap a tie and Gary Matthews singled home an insurance run to give the Chicago Cubs a 3-1 victory over Pittsburgh last night and send the Pirates Jose DeLeon to his 17th defeat.

With the score tied 1-1 in the seventh, Durham hit his 18th homer of the season, giving the Cubs a 2-1 lead.

Cubs reliever Luis Tiant, 3-0, retired the only batter he faced when he got Jason Thompson to fly out to end the game. The victory gave the Cubs a 3-1 victory over the Pirates.

Phillies 4, Expos 1

PHILADELPHIA - Kevin Gross struck four hits, scoring three times, Joel Youngblood, who hit a solo homer in the ninth, drove in three runs, while Dan Driessen and Rich Adams batted in two each for the Giants.

Gott, who also doubled in the ninth, struck out four and walked three in his seventh victory against ten losses this season.

Gladen doubled and scored on Driessen's sacrifice fly in the sixth inning off Jon Mietz, 9-12.

The Astros came back to edge San Francisco, 10-9, in the nightcap and gain a split of the twinbill.

ROYALS stretch lead

Associated Press

ANAHEIM, Calif. - Jamie Quirk singled home one run and pinch-hitter Jorge Orta hit a run-scoring double in the seventh inning to snap a scoreless tie last night as the Kansas City Royals defeated the California Angels 2-1.

The victory gave the Royals, who won two games of a three-game set against the Los Angeles Dodgers and Fernando Valenzuela hit his first homer as the Los Angeles Angels clubbed the Atlanta Braves 12-3 last night.

Valenzuela, improving to 5-9, won the eighth of his last nine decisions against the Braves, counting to victory while allowing five hits and a run in six innings. The winning pitcher also batted the score with a one-out homer off starter and loose Steve Bedrosian, 6-12, to tie the score at 1-1. It was the first of six straight at-bat Bedrosian gave up in the inning.

Cubs 3, Pirates 1

PITTSBURGH - Leon Durham hit a solo homer to snap a tie and Gary Matthews singled home an insurance run to give the Chicago Cubs a 3-1 victory over Pittsburgh last night and send the Pirates Jose DeLeon to his 17th defeat.

With the score tied 1-1 in the seventh, Durham hit his 18th homer of the season, giving the Cubs a 2-1 lead.

Cubs reliever Luis Tiant, 3-0, retired the only batter he faced when he got Jason Thompson to fly out to end the game. The victory gave the Cubs a 3-1 victory over the Pirates.

Phillies 4, Expos 1

PHILADELPHIA - Kevin Gross struck four hits, scoring three times, Joel Youngblood, who hit a solo homer in the ninth, drove in three runs, while Dan Driessen and Rich Adams batted in two each for the Giants.

Gott, who also doubled in the ninth, struck out four and walked three in his seventh victory against ten losses this season.

Gladen doubled and scored on Driessen's sacrifice fly in the sixth inning off Jon Mietz, 9-12.

The Astros came back to edge San Francisco, 10-9, in the nightcap and gain a split of the twinbill.

Quirk, Orta RBIs beat Angels

Blue Jays 3, Tigers 2

TORONTO - Lloyd Moseby singled home Tony Fernandez from second base to snap a 2-2 tie in the seventh inning as the Toronto Blue Jays defeated Detroit 3-2 last night, sending the Tigers to their seventh straight defeat.

The victory was the fourth consecutive for Toronto, the Blue Jays extended their lead to 2 1/2 games over the New York Yankees in the American League East.

Fernandez opened the seventh with a single to center and after moving to second on a sacrifice bunt by Darnell Evans, Moseby hit a shot to right-fielder Andy Van Slyke to score Fernandez and move to third on a wild pitch. Van Slyke then collided with second baseman Raul Alcantar who dropped the ball. With the bases loaded, Larry Parrish hit a sharp single to left.

Associated Press
CINCINNATI - Pete Rose broke Ty Cobb's last swing. The historic No. night, 57 years to the day after Ty Cobb's career hit record last the Cincinnati Reds player-manager "Charlie Hustle" and future Hall of Fame, in the bottom of the first inning. Cobb, the brawling "Georgia Peach" and original Hall of Famer, as baseball's all-time hit king. Cobb's totals included 3,052 singles, 724 doubles, 297 triples and 109 home runs. Rose's home run was one of three this week in practice for the Michigan game and preparations for Friday's interview. "I began the application procedure over the summer but I've still had some work to do. As far as the interviews go, it's a pretty important date for me. Michigan is a really good medical school, so I'm pretty serious about it." For Dingens, a resident of Bloomfield Hills, Mich., a successful interview would be a stepping stone towards the achievement of a long-time goal. His career hope is to the success of other students, both at Notre Dame and across the country, but in comparison to the nation's field of sacrifices. It's hard to come home from practice after getting pounded all day and then drag yourself to the library to study. A lot of times I'd rather just relax and watch TV. I guess I've been pretty disciplined as far as that goes, but I've still managed to keep a good perspective on things. It's an opportunity," he says. "I could get a deferment from medical school for travel and a lot of great experiences. I'm not sure what would happen in the future because the scholarship would open up a lot of different avenues for me." Dingens is a one-time monogram winner, are the four returning runners from last season's top seven. The talented, however, does not stop there. Head Coach Joe Piane said he is excited about two young runners, sophomore Rick Mulvey and freshman Ron Markovich. "Mulvey is the big surprise," noted Piane. "He made the Junior National Cross-country team hopes to stage surprise "It's been pretty hectic," says Dingens, who has had to split time this week between practice for the Michigan football team and studying for finals. "It's an important for more than football. The Michigan game isn't the only noteworthy event on Dingens' calendar for the next few days - Friday afternoon the 6-5, 257-pound senior will be interviewed for admission to Michigan's medical school. "It's been pretty hectic," says Dingens, who has had to split time this week between practice for the Michigan game and preparations for Friday's interview. "I began the application procedure over the summer but I've still had some work to do. As far as the interviews go, it's a pretty important date for me. Michigan is a really good medical school, so I'm pretty serious about it." For Dingens, a resident of Bloomfield Hills, Mich., a successful interview would be a stepping stone towards the achievement of a long-time goal. His career hope is to become an orthopedic surgeon, and Michigan is the only medical school to which he applied. Dingens' accomplishments are not unique when held up to the success of other students, both at Notre Dame and across the country, but in comparison to the nation's field of college athletes, his achievements make him a model for the ideal student-athlete. Dingens has produced just under a 3.8 average, 62 points higher than the average of college athletes, his achievements make him a model for the ideal student-athlete. "At first I had my doubts about it (the scholarship), but I finally decided that I would pursue it," he says. "It would mean two more years of school and it requires a lot of work for travel and a lot of great experiences. I'm not sure what would happen in the future because the scholarship would open up a lot of different avenues for me." Dingens is a one-time monogram winner, are the four returning runners from last season's top seven. The talented, however, does not stop there. Head Coach Joe Piane said he is excited about two young runners, sophomore Rick Mulvey and freshman Ron Markovich. "Mulvey is the big surprise," noted Piane. "He made the Junior National Cross-country team hopes to stage repeat of 1984's successful season...
