No parietals changes imminent at ND and Saint Mary's

By MARK PANKOWSKI
Assistant News Editor

Although the parietals regulations at Notre Dame and Saint Mary's may not be etched in concrete, they aren't written in sand either.

Changes in the parietals regulations at Notre Dame are unlikely in the near future, according to administrators. And the same holds true at Saint Mary's, College officials said.

"The rules and regulations that guide our lives together on this campus are not all etched in concrete," University President Father Theodore Hesburgh wrote to the Judicial Council last December.

"In fact, there have been many changes during my 33 years in the presidency, and I suspect that there will be further changes and clarifications in the years ahead," Hesburgh wrote.

Junior Bruce Lohman sees the changes as entertaining and perhaps change "the spider's web of dependency" that students are tied to. But Lohman interpreted Hesburgh's words as "channeling the Judicial Council next week, said Hesburgh was steering students in the direction of change in the last part of his letter.

That last portion stated in part that "there are mechanisms for change and appropriate forums in which rules that are discussable should be discussed."

Lohman interpreted Hesburgh's words as "channeling the possibility should be discussed in the枧ich the Office of the Judicial Council is not the place to start." Healy said.

The president suggested few in-"the future, according to University President William Beauchamp.

"It's my impression that there hasn't been any serious discussion," he said. "I've never heard of them being discussed."

Yet many students want coeducational dorms at Notre Dame, said Student Body President Bill Healy.

"I think there's a significant number of students wanting coed dorms," Healy said. "But I wouldn't necessarily say a majority.

Beauchamp, however, said he's "not convinced that students... would want coeducational dorms."

"It's not my impression that that's a big issue among students," he said. "If push came to shove they really wouldn't want them."

Although student government is not working on any coed dorm proposals, Healy said he thought Notre Dame should have them.

"I think there should be open for the people who would want to choose them," Healy said.

Several factors play a part in explaining the absence of coed dorms at Notre Dame, including the design of the University's current dorms, said Beauchamp, who stressed that, because administrators haven't discussed the possibility of coed dorms, he was giving his own opinion and not speaking for the University.

security conducts searches of Flanner, Keenan rooms

By ALEX PELTZER
Assistant News Editor

Notre Dame Security offices conducted surprise searches in some students' rooms in Flanner and Keenan halls Monday night, according to Security Director Rex Rakow.

Rakow said one or more rooms in Flanner and one room in Keenan were searched but would not say what the officers were looking for or what was found.

The searches were "a disciplinary action taken against certain students," Rakow said. He added that it was an internal matter from the Office of Student Affairs.

A Flanner resident, who requested anonymity, said he was "relieved" to hear about the searches.

"I'm not working on any coed dorm proposals," Healy said. "I think there's a significant number of students wanting coed dorms."
Birth control or abortion? New drug raises ethical questions

Keith Harrison
Assistant News Editor

If there is one issue most Notre Dame and Saint Mary's students agree on, it is abortion. Most believe the Catholic Church's doctrine that says abortion is murder is wrong. However, the pro-life movement has a lot of support here, as evidenced by the bussload of students which recently trekked to Washington, D.C., for the annual march and protest against abortion. Some pro-lifers believe the battle is nearing a conclusion, claiming that public opinion on the issue is shifting toward an anti-abortion stance.

They may be only half right.

Meet RU-486, a new pill which could end the abortion debate with the pro-life movement on the losing side.

As New York University's Tony Kaye reported in a recent issue of The New Republic, RU-486 is an experimental pill which is at least five years away from commercial release. Nonetheless, it has the potential to end the abortion debate because of its convenience and because, for many people, it will blur the line between abortion and contraception.

RU-486 is a sterilization compound which "blocks the cells in the lining of the uterus from receiving progesterone, the hormone that builds up the uterine wall, allowing the fertilized ovum to implant in the womb and mature," Kaye reported. "Deprived of progesterone, the wall of the uterus breaks down, just as it does in a normal menstrual cycle. The ovum breaks off from the uterine wall and is biopsied in the abortion.

As far as an effectiveness concern, RU-486 has had a 90 to 90 percent success rate in recent laboratory tests. The new pill has induced dizziness and serious bleeding in several cases, but researchers believe those problems will be eliminated when the proper dosage is discovered.

If approved, RU-486 will be the first pill released. RU-486 will pose several problems to the pro-life movement.

From a practical standpoint, RU-486 will block the pro-lifers' most potent weapon - their war against abortion: shock value. While Notre Dame and Saint Mary's students may oppose abortion for moral or theoretical reasons, the public has been influenced largely by emotional means. Grisly photos of aborted fetuses and movies such as "The Silent Scream" have presented a brutal, ugly picture of abortion. Such displays have been very useful in the pro-life movement's effort to sway public opinion.

But, as Kaye points out, RU-486 will provide no such opportunity. It will, instead, make early pregnancy abortions more attractive, because the RU-486 method can be used at home, rather than at an abortion clinic. Thus, the explicit photos of newly-developed fetuses will no longer be germane to the debate. They will have to be replaced by much less convincing pictures of embryos. For many people, then, RU-486 would be a form of contraception rather than abortion.

RU-486 will pose another problem for pro-lifers. Women will be able to use it without ever knowing whether or not they are pregnant. A woman who has missed her period can quickly take RU-486 and it will induce a period within 48 hours. This convenient procedure will seem very attractive to many women, much to the pro-life movement's dismay. For, as Kaye noted, just knowing RU-486 is available is not sure she is having an abortion does not mean she is not having one.

None of this means the battle is over for the pro-life forces. They can emphasize the theoretical side of their argument: that life begins at fertilization, regardless of how little it resembles a human being. And they can try to get the Supreme Court to outlaw abortion before RU-486 becomes available.

But one thing is certain: if and when RU-486 is released commercially, it will make the pro-life movement's battle against abortion a much tougher one.
No Need for Change

Notre Dame's student affairs office has not discussed a change because "we haven't seen any need," said Tyson, who added that University officers likewise aren't looking into the matter.

"I don't anticipate any change," he said.

Student affairs administrators at Saint Mary's haven't discussed changing or eliminating parietals because "limited visitation allows students to establish friendships and bonds with one another and with men," Jackowski said.

Other reasons, she said, include the extension of parietals last year and a student government survey showing students to be satisfied with the new hours.

"I don't anticipate changing them unless there's a real growing sense of dissatisfaction," she said.

"Then we'd reconsider it. Not necessarily change them, but we'd consider it," Jackowski said.

"If ever there was a company that made all the right moves in a tough market, Inland Steel is it."

Shuttle boosters, cabin possibly located in sea

Associated Press

CAPE CANAVERAL, Fla. -- Searchers may have found one of Challenger's two rocket boosters yesterday, which could be a "very valuable piece of evidence" in the investigation of the space shuttle's explosion, according to NASA.

"Sonar readings indicate a solid rocket booster may have been located," a NASA statement said. There was no information on the precise location.

There also was no indication whether it was the right booster, which is the chief suspect in the lift-off explosion that destroyed the shuttle and killed its seven astronauts Jan. 28. Challenger had two such boosters to help propel it into space.

"It would be a miracle if we could find the right hand segment we saw in the pictures and everybody has a hypothesis about," said Jim Mizell, a space agency spokesman. "There are many things you could tell engineering-wise if you recovered that data."

CBS, meanwhile, reported that "at least a portion" of the shuttle's main crew compartment has been located and that some of the personal effects of the astronauts floated to the ocean surface. NBC said some of the human remains brought to shore in recent days have been identified as belonging to the seven astronauts.

NASA spokesman Richard Young, adhering to a self-imposed agency rule, said: "We don't have any word from the investigation board about that."

If the booster is from the right side "we have a very valuable piece of evidence for the (accident) review board," Mizell said.

When the shuttle blew up, the two boosters separated and began flying crazily in the sky. When one of them appeared to be headed toward the Florida coast, a range safety officer sent a radio signal that detonated an explosive charge and blew the tops off both boosters.

That had the effect of shooting flame out both ends, stopping the forward motion and tumbling the rocket into the sea. Under such circumstances, the casing could have survived almost intact. NASA was expected to summon a salvage ship to retrieve it.

The search, however, was hampered by, among other things, the need for precise location.

"There's a lot of negative attitude about rifles and shooting," McGee said.

"Through our efforts with the Army ROTC, we hope to illustrate the true fun and competitive nature of shooting." The Sorin Rifle Team competes two or three times a year, according to Sergeant Aaron Thomas. This year the team match is in March. As well as competing with other schools, the Sorin Rifle Team co-sponsored a turkey shoot with the Notre Dame Athletics department. The shoot, which took place on November 7th, had about twenty people, four people team.

Despite the misleading name, the team is about involved in real turkeys. But then again, the Sorin Rifle Team has nothing to do with turkeys. What's in a name anyway?

The thick and the thin: attitude is key to weight loss

In the next phase, starting the positive spiral, the dieters found that their eating plan and weight loss had brought them to a point where they felt better. They discovered positive reinforcement comes in small steps.

In the next phase, starting the positive spiral, the dieters found that their eating plan and weight loss had brought them to a point where they felt better. They discovered positive reinforcement comes in small steps.

The authors also examine such areas as the "guarantees of failure" and how to overcome them. Their only specific diet suggestions are that the dieters cut out sugar and fat. Also examined are such special problems as being carbohydrates, cholecystokinin, lipoproteins, and that which to overcome.

The bottom line in weight loss, the authors say, is "ownership." Having one's own plan. The authors say that leads to self-trust, which in turn leads to lasting thinness.

Even the book itself stemmed from throwing out pre-conceptions and asking successful dieters themselves how they did it. Colin and his staff.

Olson is director of psychological services at a nutrition center in Scottsdale, Arizona. He is also an active member of the Southern Illinois University School of Medicine faculty.
Send inconsistent ND parietals policy packing

Inconsistency seems to be adjective that best describes the parietals policy at Notre Dame.

As several rectors have admitted, the procedure for reporting minor parietals violations to the Office of Student Affairs varies from hall to hall. Subsequently, the punishment for breaking parietals in different dorms also varies. In effect, this means there are 24 parietals policies at Notre Dame.

Du Lac gives no penalty for minor parietals violations, only for overnight parietals violations, which involve suspension or dismissal. Nowhere are “overnight parietals” defined. John Goldrick, assistant vice president for residence life, has said he could not define at what hour a parietals violation becomes an overnight violation. Father Theodore Hesburgh, University president, wrote to the Judicial Council that common sense should determine an overnight violation. “I do not believe it would be in the best interest of anybody, including the students, to set a specific time as to when overnight parietals violations occur,” Hesburgh wrote.

Once a rector or security guard uses his or her common sense to determine a violation serious enough to report to the Office of Student Affairs, this office says it treats each case individually.

In reality, du Lac’s suggested penalties for overnight parietals violations are imposed more often than not. In deciding whether to suspend a student, the administration appears only to be paying lip service to its claim that it looks at individual circumstances. In fact, Hesburgh has said the punishment for parietals violations must be as strict as du Lac states, even for first-time offenders, so that students abide by the policy and the common good of the community is served.

According to the administration, the reason for the parietals policy mainly is to protect the students’ privacy. But Hesburgh has categorized parietals violations with such offenses as possession of illegal drugs, causing physical or moral violation, and stealing and destroying property. That’s ridiculous.

Suspending a student from Notre Dame, the usual punishment for violating visitation hours, is inconsistent with Christian notions of justice.

Notre Dame and Saint Mary’s share similar philosophies concerning the collegiate Catholic experience. They also share many of the same regulations for maintaining such an environment, including a parietals policy.

The same offense that at Notre Dame would send a student packing is treated more justly at Saint Mary’s. No specific penalty for any offense is stated in the College’s Social Code Contract. Saint Mary’s considers each case individually in practice as well as in its words. The College places the parietals violation in the proper perspective.

Notre Dame should be able to say the same.

---

Keenan lines disastrous for revue patrons

Most early winter afternoons at the ACC are rather mundanely similar. There’s usually a few pajges running laps around the basketball arena around 3 p.m. The aerobics classes start up. Sometimes you can even watch the men’s and women’s basketball teams practice, at least until a student manager comes and chases you away.

Mark McLaughlin

there you are

Monday, though, was different, as hordes of Doners descended upon Gate 10 in search of that all-too-scarce commodity, Keenan Revue tickets. Signs posted around campus told us “no lines before 1:30” at the ACC. So I off went at 1:15, hoping that I would get Saturday night tickets, but willing to settle for tickets to Friday’s performance.

Once I walked into the ACC, I found a line stretching up the stairs and all the way back to the concourse area between the north and south domes. So much for “no lines before 1:30.” According to a Keenan Hall resident, the ACC had requested the no lines notice and had done nothing to enforce it. No problem. I said, I’d still get tickets anyway. Since it looked like there were only a couple of hundred people ahead of me.

At 1:40, someone wearing a Keenan Revue T-shirt walked toward the back of the line. “How many?” I asked. “A little over 200,” he replied. “I asked if there would be a problem getting tickets. He informed me that there would be 1,600 tickets available, 400 for each hour. Great - still there had a chance for Saturday night. I stretched out on the floor to get some reading done, as had most of the people in line around me.

As I looked up from my work around 2:30, I noticed some people walking up to the middle of the line and staying there. Their techniques were remarkably similar. Most of these line-cutters would wander along the corridor until they spotted someone they knew. Then they would stand around and chat for a few minutes, drew these books to the floor so they wouldn’t have to hold them. Then the jacket would end up on the floor next to the books. And in and after, after a few minutes, the student was sprawled out on the floor, looking as if he’d been on line for hours.

By 3:00 the line had grown some distance behind me. It had also grown several people wide in front of me. Out of curiosity, I got up from my spot and walked up front. It was crowded. I counted the number of people in front of me and came up with a reasonably accurate count of 306. "Amazing,” I thought. I didn’t know how many people were waiting for the night they wanted them, or that they might not get tickets at all. Many of you will say something like, “I was supposed to meet someon in line at 3:30.” That is sheer madness.

If this sort of thing only happened once in a while, perhaps it wouldn’t bother those of us who patiently wait our turn. But it happens all the time, in lines for football tickets, for basketball tickets, for registration, for passes in the dining halls. Let’s face it, Notre Dame is a place where we have to wait on lines a lot. A little common courtesy would save a long way toward making those lines a little more bearable.

And for those of you who waited, thanks. You are true Domers.

Mark McLaughlin is a sophomore aerospace psychology major.

No. Carolina catches Tech, wins in OT

Associated Press

ATLANTA - Brad Daugherty sent the game into overtime with a 10-foot footer from the baseline and then gave top-ranked North Carolina the lead it never relinquished Saturday as the Tar Heels overcame a 13-point second-half deficit for a 78-77 win over Georgia Tech in an Atlantic Coast Conference basketball contest last night.

Davidson hit free throws in the final 46 seconds of overtime, including two that sealed the game with 11 seconds left, in the first meeting between teams ranked first and second in the Associated Press poll.

Georgia Tech appeared to have the game under control when Mark Price sank two free throws with 11.56 remaining to give the Yellow Jackets a 59-46 lead.

Davidson started a run of 9-0 over the Tar Heels, who eventually tied the lead to two points on a 20-foot jumper by freshman Jeff Lebo with 4:55 to play.

Davidson had 22 points and 18 rebounds for the Tar Heels, 23-1 overall and 7-1 in the ACC. Freshman Tom Hammond had 16 points and Price 15 for Georgia Tech, 17-5 and 0-2. It was the second straight ACC meeting in which Davidson had beaten Georgia Tech, whipping the Yellow Jackets 85-77 in Chapel Hill on Jan. 25.

STOLEN: My black book bag was taken from the South Dining Hall 8 during the first week of classes. It contains my checkbook, driver's license, and all my books. Anybody with information should contact the Campus Police. - The Observer

### NHL All-Star Game

Hartford, Conn. - Bryan Trottier scored the winning goal 3:45 into overtime after taking a goalmouth pass from New York Islanders teammate Mike Bossy as the Wales Conference continued its domination of the Campbell Conference with a 4-3 victory last night in the 38th National Hockey League All-Star Game.

Campbell goaltender Grant Fuhr of the Edmonton Oilers was named the Most Valuable Player of the game.

Bossy gathered the puck in at the blue line and skated in on the right side of Edmonton goalie Andy Moog before sliding a pass through the legs of Oder defenseman Paul Coffey to Trottier, who knocked it in from in front of Moog.

The goal was the first in All-Star competition for Trottier, who played in six of these previous games.

Fuhr's work in the nets for the Campbell was outstanding. He stopped all 15 shots he faced before relinquishing the net to his teammate, Moog, with nine minutes left in the second period.

Also scoring for the Campbell Conference in the second period was New Jersey's John Vanbiesbrouck, who faced 27 shots from the Wales Conference.

Last Saturday the Saint Mary's basketball team traveled to Fort Wayne, Ind. to take on St. Francis College. The Belles lost in overtime, 55-55, to a tough St. Francis team. Saint Mary's averaged this loss on Monday night, however, by defeating Grace College, 56-56, on Grace's home court.

The key to the victory over Grace, according to Head Coach Marvin Wood, was the team's togetherness. "We had a great team effort," he said. "Togetherness was an important factor. Whenever we needed a shot, someone came through for us most of the time. We had to have it to win." Wood went on to say he felt that the togetherness that the Belles had has been apparent throughout the season.

"That's the beautiful thing about this team," he said. "The girls always take what the other team gives them." The leading scorer for Saint Mary's in the game against Grace was Tammaye Radke, who had 17 points. She was followed closely by Beth Kreber who contributed 15 points, and Jenny Herre, who added 13. Harte also paced the defense with nine rebounds.

Junior Kris Pantella also chipped in to the Belles' cause, handing out six assists. Pantella, in addition, made a couple of key baskets near the end of the physical game to cement the victory for her team.

In the game against St. Francis, Saint Mary's trailed through much of the second half. However, with six minutes left, the Belles tied it up at 49. In overtime, though, the ball seemed to belong to St. Francis. Wood commented on a couple of dead spots that occurred in Saturday's game.

"We hit a dead spot when the ball just could not go in," he said. "It was almost as if someone put Saran Wrap over the basket."

Another problem that the Belles faced on Saturday, and throughout much of this season, was the team's lack of offensive play. "We are always on the short end in terms of size," Wood said. "However, our girls have had as much talent (as their opponents) and sometimes even more. So has been our biggest problem this year, though."

Wood felt that there were other ways to compensate for this problem.

"We need to have more finesse and a lot more shooting," he replied. "We need to be alert and aggressive."

Kreber, who was the leading scorer against St. Francis, had 18 points, while Radke contributed 12. Kreber and Radke also led in rebounds with eight and seven respectively.

Although playing on the road was a big factor in the game against St. Francis and Grace, it nonetheless affected each team's performance.

"Travel was not a big factor," added Wood. "Our league is like the Big Ten in that Notre Dame plays in North Star Conference. It isn't easy to win away from home." The Belles' coach has some goals that he would like to see the team accomplish by the end of the season.

"I'd like to see them get into double figures as far as wins are concerned," he said. "Right now, we're 7-8. We'd like to win at least three more games. However, we've had some real tough opponents ahead of us, so we'll have to play our best basketball."

The next game for Saint Mary's is on Saturday night at Taylor College.

**Irish**

continued from page 12

suffered in the team's last game at Evansville. The 6-4 freshman missed eight games this year with a stress fracture in her right leg, and her 9.4 points per game will be needed.

Despite the large front line of Dayton, the Irish have been playing very well as of late and will give the Flyers a big challenge.

"We've been very pleased with the level of our performance the past two weeks," Dittislaw stated. "I've been especially pleased with our defensive effort. We've been forcing teams out of their offenses because we've been working a lot on the defensive end of the court.

"We've also been very pleased with our offense," she continued. "We're running very smoothly right now because we're moving the ball and hitting the open man.

"Dayton will be strong but if we can execute, take advantage of break opportunities and play smart basketball we can win. Dayton has a good position to make a run at the NSC title and we'll have to play a very good game to beat them."

**Dayton**

continued from page 12

Jim Dolan, Monday night's Mark Strevelon. The UCLA game it was Timmy Kempten.

"Right now, we're also trying to rent some of our front line players when we have the opportunity. We can't expect a David Rivers or a Ken Barlow to play 39 or 40 minutes every night and still have something left for March."

**Irish ITEMS -** The game tonight will be televised by the national cable syndicate, TEN. Ken Barlow will be on JIVE strength tonight after failing to start Monday's home game against Maryland due to an ankle injury.
Freshman forward adds enthusiasm

Connor fast becoming a key factor off Irish bench

By DENNIS CORRIGAN
Sports Writer

The latest fan favorite, at least in the student section of the ACC, is freshman forward Sean Connor.

Head Coach Digger Phelps is among those fans of Connor's enthusiasm.

"(Sean's) the type of player you love to get because he is full of enthusiasm and takes it on the court," says Phelps of the 6-7, 207-pound native of Zeigler, Ill. "That rubs off on the other players."

Connor is appreciative of the fans' reaction toward him.

"It's a good feeling," he says. "The student body does an excellent job on the other players."

Given the ovations that Connor has received when he comes off the bench for the Irish basketball team, the newcomer has become a favorite with the students not only because of his outside-shooting ability, but also because of his unlimited enthusiasm.

Connor fast becoming a key factor off Irish bench

Connor has a deadly outside shot and has been able to hit it at times when the rest of the team hasn't been able to start an efficient perimeter game. Case in point, the game with American University two weeks ago. The game was Connor's first real chance to show his ability. With the rest of the team struggling midway through the first half, Connor entered the game and proceeded to knock home three long-range jumpers. From then until now, Connor's reputation has been sealed.

"It was a situation where the up-front was struggling," Connor says. "I was able to come in and fortunately hit the shots. It was not a chance to prove myself. I was helping the team."

Since then, Connor has seen an increased amount of playing time. Phelps has had a lot of confidence in the freshman.

"I am obviously not afraid to play him a lot," Phelps comments. "He has a good attitude, works hard, and waited for his moment. I listen to what we want and plays with confidence."

Phelps' confidence in the young player was never more evident than when he had Connor on the floor in the waning moments with the game on the line Saturday against Marquette.

"He was a spark for us against Marquette as much as Jimmy Dolan was," Phelps said. "I told him to take the last shot, he was open."

Although Connor's shot was off, Dolan was able to rebound it and send the game into overtime, and the Irish went on to the victory.

"It was not a set play," Connor recalls. "If I was open and had the shot, I was able to take it. I was a little disappointed that I wasn't able to hit it but thanks to some hard work by Ken Barlow and Jim Dolan, we were able to tie it."

While attending Zeigler-Royalton High School, Connor averaged 35.4 points per game to lead the state of Illinois in scoring during his junior year. In the same campaign, Connor scored a single-game high of 61 points and captained the team his sophomore through senior years.

Connor was also captain of the school's football team during the same period, and quarterbacked the team to the Illinois Class A championship in his sophomore year.

Although he had a lot of success at football, he says that there was never a choice between football and basketball.

"I was offered a few scholarships from Illinois, Iowa and Indiana, but I like basketball better, that's all," Zeigler-Royalton is not a large school. In addition to his basketball (his jersey was retired by the school's football and track activities), Connor was also president of his senior class and says there was a little bit of an adjustment to be made when he became just another face in the crowd at Notre Dame.

"It was an adjustment coming here and playing with 12 other players who are equally talented. Once I made the adjustment, it's been a good experience."

Connor also has learned the occasional difficulties of being a Notre Dame student athlete. After tonight's game at Dayton, he has to return for an exam tomorrow.

For Connor, the future appears to be unlimited. If he continues to develop as he has so far, Connor should be a fan favorite for the next three years.

Irish ready to confront "real" Flyers

By GREG STOHR

Sports Writer

When one analyzes the Dayton basketball team prior to its clash
with Notre Dame tonight at 7:30 in the U.D. Arena, one must not be
deceived by the home team's mediocre 12-8 record.

The Flyers have tended to be two violently different teams this year. One
team has meandered to a 1-7 road record. The other, the one which
will take on the 13-5 Irish tonight, has terrorized visiting squads,
winning 11 of 12 games on its home hardwood.

"Dayton has always been very, very good. It's the Notre Dame head
coach Digger Phelps. They play very well at home. The place gets fired up. It's
one of the toughest places to play in the country," says one pollster.

One of the men who will make tough on the Irish is 6-8 center
forward Dave Colbert, Dayton's top player. The senior is averaging 19.5
points and 8.5 rebounds per game. He will receive inside help from 6-7
junior center Ed Young, whose 13.5 ppg scoring and 7.1 pgp averages are a key
on the team only to Colbert.

"Colbert's very good inside, and he's very good at getting open to
score," remarks Phelps. "And they've got Young, who can comple-
ment him on the front line, who shoots 50 percent and he
hits the boards very well.

"The pair will be seeking to neutralize a Notre Dame rebounding
corps which is third in the nation with an average rebound margin
over their opponents of 10.1. Outside, a unit featuring Damion
Goodwin, a 6-12 pgp, senior; freshman;

Pick of the Week

Another sport where the little guy makes the difference is wrestling, and Irish fans will have the chance
to see their squad in action twice on Saturday. Notre Dame wrestlers
Purdue at 2 p.m., while 20th ranked Clemson pays a visit at 7 p.m.
Both the action is in the ACC pit, so don't miss it. Be there!

Chuck Freeb

Irish items

He'll be a scintillating point guard over Washington. That means Saturday's
matchup should be a dandy at the Carrier Dome.

The era of the big man has been replaced by the era of the point
guard, and can create," said another. Most people believe Richardson is a
potential high NBA draft pick come summertime.

"I think they've got a lot of con-

IRISH women face Dayton tonight; forward Keys eyes scoring record

By NICK SCHRANTZ

Sports Writer

The Notre Dame women's basketball
team faces its toughest competi-
tion in North Star Conference play
thus far this year tonight, as the Irish
are led by Keys, who
leads the team with 19.7 points per
game. The all-America candidate can
do more than score, as she leads the
Guard position.

"That's what I like about this
Irish. It's important because it's a home
game and we want to keep the momentum we have going,"
"The Flyers pose a problem to the
Irish because of their height inside and
balanced scoring from seven key
players.

Forward Michele Kruty, at 6-2,
leads the Flyers in scoring with 12.2
points per game while also grabbing
8.2 rebounds per contest.

Kruty is joined at the forward spot
by 6-4 junior Kathy O'Brien, who
scores 9.4 points and hauls in 5.9
rebounds per game.

Senior center Theresa Yingling
(6-5) adds to the imposing Dayton
front line by contributing 11.3
points and 6.1 rebounds to the
Flyer cause.

Cheryl Dickerson may be only six
feet tall, but her senior presence is
forward or center and adds 8.6
points and a team-leading 8.4
rebounds per contest.

The Flyers have a trio of guards who
can score, but much more impor-
tantly they feed the ball well inside
to their large front line. Senior Mary
McCarty, at 5-6, helps guide the offense,
while also pouring in 7.9 points from the
Guard position.

A pair of Brenda, 5-8 Andy
Brown and 5-7 Ann Serra, join Byers
in the backcourt, and contribute 6.4
and 3.6 points per game respectively.

In order to win this important
matching, DiStanislao feels the Irish
must contain the Dayton front line.

"Dayton has a good, solid inside
game, where they get most of their
points," she explained. "Their top
four scorers are inside, so it should be
a good test for us.

"Dayton's strength is their inside
game, but they also get good leader-
ship from the point guard, who does
a good job of getting people the ball
inside. Right now, I'd have to say that
Flyers and Dickerson are our most
consistant players.

The Irish are led by Keys, who
leads the team with 19.7 points per
game. The all-America candidate
can do more than score, as she leads the
team in blocked shots, is second in
rebonding and steals, and has dished
dout 4.5 assists.

Keys will soon be on top of Notre
Dame's all-time points list, but she is
doing the all-time scoring average
leader with a 13.7 average for her
four years.

Top substitute Heike Buten may
miss the Flyers due to an injury.
