Rectors discuss proposal to revive Little Sibs Weekend for next year

By BUD LUEPK
Staff Reporter

A proposal to revive Little Sibs Weekend was approved by the Faculty Council at a recent meeting.

The idea of an underpass or overpass between Notre Dame and Saint Mary's is "not realistic," said Saint Mary's Director of Security Richard Chlebek.

An Indiana State Highway Department study of the intersection revealed that students use the button which controls the signal an average of 1 out of 21 times, Chlebek said.

"If students do not use the button, how would you force them to use a tunnel or climb up an overpass?" asked Chlebek. "The shortest distance is a straight line," he explained.

Overpass is unrealistic, says Security director

By CLIFF STEVENS
News Staff

The idea of constructing an alternate means across U.S. 31 rose in the wake of the Kevin Hurley accident last September.

Chlebek said the high cost of an underpass or overpass would be spent better on additional street lighting along U.S. 31 to make pedestrians more visible to motorists. "Another problem with an underpass is the hazard of sexual assault," said Chlebek.

Chlebek said a request for additional street lighting on U.S. 31 was turned down by the state highway department because, the street lighting was determined adequate in the study. Chlebek said he was not aware

Smoke denied any allegations that Associates acted improperly.

"I don't feel any of these charges are warranted. Beyond that, any consents would not be appropriate," said the South Bend Tribune yesterday.

The allegations contained in the letter do not constitute criminal charges. No criminal charges have been filed against Associates.

Just before his company filed in bankruptcy court, General Micro President David Bowers blamed "market forces for the company's woes. The firm suffered from declining sales to individuals and slim profit margins in the highly competitive business market, he said.

"The effect of that is giving us a very difficult time financially," Bowers said at the time.

But Ransel's letter made no mention of market forces and hinted the computer company may sue Associates for $100 million for alleged actions against General Micro.

"Defensor has a valid claim against Associates. This picture because the sun's glare. Story at left.

"Comets are the fossils of the solar system," said Terrence Rettig, a member of a scientific team from Notre Dame and Fermilab who have reproduced pictures of the comet faster than anyone else in the world.

They give us clues as to the origin of the planets," he said. "It is believed that they were formed just before the creation of our solar system.

Rettig, who spoke last night at the Center for Continuing Education, discussed some of the history that surrounds the space object.

When the comet appeared in 1684, the English believed it was a comet of the Black Plague. Comets were used to predict disaster since the first one was recorded in China in 240 BC.

"What would you think if you saw some undisembodied dirty snowball shooting through the night sky and you knew nothing about it?" asked Rettig, a Notre Dame physics professor.

He also gave pointers on the best viewing conditions for the comet.

"It will be very difficult to see the comet in South Bend when it will be closest to the Earth in the end of March," said Rettig.

"The comet will be very low on the horizon and it will be on the wrong side of the sun for humans to get a clear view."

"It is twice as far away as it was the last time it appeared in 1910," said Rettig.

"Your best bet is to go 10-20 miles out of the city to get away from the streetlights," added Rettig, who said

**In Brief**

Notre Dame reached its 1986 United Way goal in raising $180,556, it has been announced by co-chairmen Fernando Dutra and John Mennell, director of development. Included in the total is $7,056 raised by Notre Dame students. The campus campaign goal of 1980,500 represented an 8 percent increase over the $167,732 contributed in the 1985 United Way campaign. - The Observer

Notre Dame's Institute for Cerege Education has changed its name to the Center for Continuing Formation in Ministry. According to center director Father Robert S. Pelton, the new name was chosen "to indicate the wider diversity and availability of our program." The center, a component of the University's Institute for Pastoral and Social Ministry, administers a 16-week long continuing education and spiritual renewal program for priests twice a year. - The Observer

Two Evansville legislators say a poll they have taken shows the resolution to lift Indiana's ban on lotteries and parlors with betting would pass the House if it reached a vote there. Reps. J. Jeff Hays, a Democrat, and Vaneta Becker, a Republican, said Tuesday that at least 52 of the 100 House members signed a petition they passed around this week on the lottery issue. Only 12 representatives have refused to sign it and the remainder had not been contacted, Becker said. - The Observer

Ralph Richard is set to be released Monday from a Colorado jail where he is serving a drug-related sentence so he can return to Rhode Island to prepare for trial on charges he raped his 4-month-old daughter. His wife, Donna, 33, a native of Bloomington, Ind., is charged with murdering the couple's only child, Jerri Ann. Their trial was tried separately, with both proceedings set to begin March 31. The Richards reported the infant kidnapped Nov. 11, 1984. Jerri Ann's bludgeoned and raped body was discovered four days later in an alley one block from the family's Parroquet apartment. - The Observer

**Weather**

Dandruff problems? Not necessarily. It could be the result of the weather early today, with otherwise cloudy skies and not as mild temperatures. High in the upper 30s. A 60 percent chance of light snow tonight. Low in the mid 20s. - The Observer

**Athletes thrown for big loss when it comes to academic courses**

**Introduction to Recreation - 101** This three-credit course will examine the fundamentals of many major recreational activities. Particular attention will be spent on the proper height and placement of basketball nets in suburban back yards.

Now, there is a course just about anybody could pass. Surely no school would offer a class called "Introduction to Recreation," right? Maybe you can laugh at that course now, thinking about that thermo-dynamics assignment due tomorrow, or that 500-page novel that you must read. Unfortunately (or fortunately for those who get to take the course), the course title is real at the University of Miami (although the actual content most likely varies from the fictitious description above.).

The course has gained some notoriety through The Sporting News' publication of Vinni Testaverde's class schedule. Last semester Testaverde, the Hurricane quarterback, had four courses: Introduction to Sports Nutrition, Sports Injury, and Introduction to Recreation. He also had a very good football season.

While two of the courses are numbered "101," indicating that they are freshmen-level introductory courses, Testaverde is not a freshman.

He is a fourth-year junior. If this course list is any indication, his life has not been filled with too many difficult courses. I doubt he will be taking many engineering courses this semester.

The course is a second-semester senior's dream. At Notre Dame it would only be a dream. You cannot find many similar courses while paging through "Revised Additions" of course selection guides.

This would be another great opportunity to take a semester of recreation. Use that Notre Dame is a classy academic institution where student athletes really are students, but that is not the real issue.

The problem is the exploitation of the college athlete.

If those are the courses Testaverde is taking in the heart of his academic career, I'm sure his overall academic experience will be very enlightening. He may get a degree when he graduates, but I could probably get a Ph.D. tomorrow by answering an ad in the back of some magazine with enough money.

The NCAA has tried to make sure that student athletes are students by requiring a certain number of courses and certain grade requirements. But how difficult would it be to earn a "C" in Introduction to his teammates. Many of them probably have taken or will take the same courses he has taken. They might also get their diplomas and head out into the world ready for nothing.

The villain is the University of Miami. The school probably promised the recruits an educational opportunity. Anyone watching the public relations spot for Miami during the halftime show of the Miami-Notre Dame football game last fall would have seen an image of Miami as a bastion of higher education. There may be some challenging academic programs, but I do not think Testaverde has found them.

What Miami is doing is denying the people it recruits the education they deserve. If the school lets the athlete graduate, then they have earned a degree. But then the opportunity for that athlete to have gone to some other school that wants to give that athlete an education will be lost.

Maybe there should be a list of NCAA required courses Introduction to English might be a good start for some.

**The Observer**

**John Mennell**
Production Manager

**Recreation?** It is much easier to pose the question of academic standards than to answer it. Some courses at Notre Dame are significantly easier than others. Some courses may sound simpler than they are. You cannot judge a book by its cover.

Texas has raised much national attention with its No Panic No Play Law. Students who fail any course or who do not maintain a required grade-point average are not allowed to participate in school athletic programs. Opponents point out this denies many opportunities that they never again will have.

But then the opportunity for a free education does not come along every day either. Of the large number of students who are denied the opportunity to play under the Texas law, very few, if any, will make it into professional sports. Everyone, however, probably will need to earn a living at some time.

In all likelihood, Testaverde will be playing professional football. The same will not be true for an overwhelming majority of those who probably have taken or will take the same courses he has taken. They might also get their diplomas and head out into the world ready for nothing.

The university is the University of Miami. The school probably promised the recruits an educational opportunity. Anyone watching the public relations spot for Miami during the halftime show of the Miami-Notre Dame football game last fall would have seen an image of Miami as a bastion of higher education. There may be some challenging academic programs, but I do not think Testaverde has found them.

What Miami is doing is denying the people it recruits the education they deserve. If the school lets the athlete graduate, then they have earned a degree. But then the opportunity for that athlete to have gone to some other school that wants to give that athlete an education will be lost.

Maybe there should be a list of NCAA required courses Introduction to English might be a good start for some.

Electronics & Defense Sector

The huge room was mostly empty with items placed here and there. Most prominent were two large sections that appeared to be remains of wings. There was nothing in the area where the crew cabin would be.

The crew cabin and its voice recorders have not been found, NASA said.

The officials in charge of NASA's in-house investigation of the accident were in Washington, preparing to disclose for the first time what they think caused the shuttle to explode in flames.

Their testimony will provide the first substantive public information about the accident from NASA since the catastrophe.

The underwater search was split between two areas yesterday. The booster recovery ship Freedom Star and the landing craft Variety November, were searching an area 15 miles east of the launch pad, where the water is 150 feet deep. The Freedom also carried a submersible, but did not put it into the water.

Associated Press

CAPE CANAVERAL, Fla. - NASA sent a second ship yesterday to an area 30 miles from Challenger's launch pad to search for an object that could be the ill-fated shuttle's suspect right rocket booster.

There have been strong sonic "bumps" in that area, indicating that the booster may be there in 1,100 feet of water. The Independence, a booster recovery ship, was steaming in that direction to join another such ship, the Liberty Star.

The Independence carried a robot submarine capable of photographing the object, but NASA said plans for its use were undetermined because of a choppy sea.

Meanwhile, television networks showed a dramatic photograph made just after Challenger exploded which clearly shows two distinct smoke trails from the ship's right booster, indicating that fire somehow was coming from the side of the booster.

The picture, made by an employee of a Kennedy Space Center contractor, shows the two boosters flying off on their own, with twin columns of smoke emerging from one on the left and one on the right. One of the smoke trails is from the exhaust, the other appears to come from the booster's middle.

Speculation has been that a leak in the shuttle's right booster either penetrated the tank or warmed it to the point that its fuel turned to gas, expanded and exploded.

In the photograph it is impossible to tell whether the rupture is at a seam or a break in the casing.

Sources reported, meanwhile, that ships had recovered 17 feet of explosives from a "destruct package," which was on the side of Challenger's main fuel tank when it lifted off. The explosives had not been detonated, the sources said, removing them from the list of possible causes of the catastrophe.

The fact that only a fraction of the shuttle and its cargo has been recovered - about 10 percent - was underscored dramatically in a videotape showing the wreckage laid out on a grid pattern of yellow lines in a NASA warehouse.

NASA sends second ship to search for shuttle's suspect rocket booster

Man arrested

GRAPEVINE, Texas - A knife-wielding man took 232 people hostage aboard a Delta Air Lines' jumbo jet yesterday and held them at Dallas-Fort Worth International Airport before releasing the captives unharmed and being arrested, officials said.

The man, who held a knife to a steward's neck, was arrested unharmed by airport police nearly two hours after the plane landed around 6:50 p.m., said airport spokesman Joe Dealey.

The plane, Flight 139 bound for Los Angeles from Fort Lauderdale, Fla., with a scheduled stop in Dallas, had 221 passengers and a crew of 11, said Delta spokesman Dick Jones in Atlanta.

The man, who was not identified, was arrested at 8:44 p.m. after the passengers had left the craft and was turned over to the FBI, said Dealey. He did not know details of the arrest.

Passengers were able to leave the plane by normal methods, but the crew was still aboard when the man was arrested, said Dealey. "I understand that the individual appeared to be and wounded disturbed," said Dealey. "Perhaps he was suffering illness. He just appeared to be mentally disturbed."

Corrections

Because of a reporting error, an event title was reported incorrectly in yesterday's Hall President's Council story. February 27-28 will be Focus on Unity week in the Notre Dame community.

Also, because of a reporting error an event was dated incorrectly Tuesday in an article about the Saint Mary's Board of Governors. The Keanen Revue Party in the Haggar College Center will take place tomorrow night after the Revue.

Also, Mark McLaughlin's major was listed incorrectly in the Tuesday's Observer promotions story. McLaughlin is an aeronautics/psychology major.
Indebted farmer commits suicide

Waynesboro, Ga. - A 67-year-old farmer shot and killed himself Tuesday at his east Georgia courthouse, "Deborah Jennings said. "He just couldn't stand to see his whole life go on the steps of the courthouse," Deborah Jennings said after her father, L.D. Hill III, shot and killed himself minutes before his property was to be auctioned for unpaid debts, the sheriff said.

"He wanted to stop the sale, we were surprised by the death," Coursey said. "It showed his principles. It's given us new pride in our daddy," she said.

Hill's death officially has been ruled a suicide, the sheriff said. "The shooting occurred about 20 minutes before the 700-acre farm was scheduled to have been sold at 11 a.m. on the steps of the county courthouse," Burke County Sheriff Greg Coursey said yesterday.

"He wanted to stop the sale, which in fact he did," Coursey said. Hill's death officially has ruled a suicide, the sheriff said. Hill owed $62,000 on the land, Jennings said.

She said the family was proud that Hill had died until shortly before the scheduled auction to repay the debt. "It showed his principles. It's given us new pride in our daddy," she said.

"There is nothing against the student body at Saint Mary's Century Center enjoys the school and student government support," Heller said.

According to Student Body Vice President Jeanne Heller, a fashion show for Little Sister's Weekend will run from March 7 to 9. "The show will have prom and spring fashions, and History's will not be running it. They have been replaced by Maurice's," said Heller.

ANYONE interested in being a model should be fitted between the last week in February and the second week in March, according to Heller. She added that registration for the weekend will be at the end of next week.

Also discussed last night was the "Toast to the New Year" party held last Friday. "The problem that we had with the Toast to the New Year party was not getting guys to come over, it was getting girls to come," said Heller.

Sophomore Class President Sarah Cook suggested the problem may be that most people want to get off campus for the weekend.

"There is nothing against the student body at Saint Mary's Century Center enjoys the school and student government support," Heller said.

**SMC Board discusses upcoming Charity Ball**

By MARYLYN BENCHIK

Staff Reporter

The Saint Mary's/Notre Dame Charity Ball will be held May 2nd at the Athletic and Convocation Center, the Saint Mary's Programming Board learned last night.

The theme this year is "A Family Celebration of Life," according to Saint Mary's student Kathy Hartweg- wen.

The dance is expected to raise about $10,000 which will be donated to help ease world hunger, Hartwegwen said.

Meg Heffernan, another student helping with the dance, said, "We will be running activities after AnTostal. The plan's at the preliminary stages right now, and we're looking from the student body, faculty and administration for support, not from organizations like the United Way."

According to Student Body Vice President Jeanne Heller, a fashion show for Little Sister's Weekend will run from March 7 to 9. "The show will have prom and spring fashions, and History's will not be running it. They have been replaced by Maurice's," said Heller.

Sponsor of Wednesday Lunch Fast works to alleviate global starvation

By JAMES WINKLER
News Staff

Many people in the world are starving, and the World Hunger Coalition wants to do something about it.

The WHC is the sponsor of the "Wednesday lunch fast" to benefit the hungry of the world. The coalition is much more than a few skipped lunches, however.

The WHC is an awareness group made up of students who wish to help the starving of the world and make the Notre Dame campus more alert to the problem of world hunger. As the name suggests, the group works toward an alleviation of the problem of global starvation.

With projects in Bangladesh, Chile, Africa and India, the coalition aims to help as many starving people as possible.

Senior Kevin Moser is the leader of the WHC. He and a core group of five people work together to organize the many projects of the hunger-fighting group. Moser said he hopes that the coalition can work to make the Notre Dame student body more aware of the seriousness of hunger, both in America and world-wide.

"We are an awareness group," Moser said. "It would definitely be great if more people were aware of the need for help here and worldwide. The domestic aspect is very important."

Moser said that because many students at Notre Dame are of middle-class background, with little or no financial problems, it is often difficult for these students to realize that world hunger exists.

The WHC is probably best known for the Wednesday lunch fast. In this program, students give up lunch every Wednesday for a semester. In return, University Food Services donates one dollar for each meal skipped.

Last week, Moser received a check amounting to $7,860 from Sister Jean Lenz, assistant vice president for student affairs. In a letter to Moser, Lenz said "These meals were given up by those students who pledged to forego their Wednesday lunch in order to come to a greater awareness of what hunger actually feels like and to aid those less fortunate than themselves."

For the WHC, awareness and aid are the purposes of the fast, he said.

Moser said that each semester the coalition raises nearly $40,000, representing 8000 skipped lunches. "Ten thousand lunches each semester would be great, but we are very happy with the amounts we have now," he said.

Each semester, nearly 800 people sign up for the fast. Moser said after some time, about 100 people will drop the sacrifice program, he said.

The Wednesday lunch fast is only one of the coalition's projects. The WHC also sponsors "Hunger Awareness Days" in conjunction with the United Nations Day of World Hunger Awareness.

Masses for hunger awareness are held periodically, and the coalition, with the help of University Food Services, organizes an awareness program called the simple meal.

Moser said. The meals, offered in each dining hall, give the student a choice of eating the normal entrée or choosing a simple meal, usually of soup, bread and rice.

The WHC has a series of activities planned for the upcoming months, according to Moser. Lectures and movies will take place in the Center for Social Concerns. A walk for hunger awareness is being planned for later this year in South Bend, and the coalition is organizing a retreat in Michigan March 6-7 for reflection on world hunger. Interested students may attend the WHC's next meeting on Feb. 17 at 7:30 p.m.

BEVERLY HILLS, Calif. - "The Color Purple," the struggle of a poor, black Southern woman for dignity, and "Out of Africa," a romantic tale of a Danish writer, led the field with 11 Oscar nominations yesterday - but voters snubbed "Purple" director Steven Spielberg in his bid for ar- ticulate acclaim.

"Puziz's Honor," a black comedy about a loveless Mafia henchman, and "Witness," the adventures of a New York cop in Amish country, each captured eight nominations. The list of contenders for best picture of 1985 was rounded out by "Kiss of the Spider Woman," about a revolu-tionary and a homosexual who become friends in jail. It had four nominations.

The 58th annual Academy Awards will be presented March 24.

The nominations reflected the in-dependence of Academy of Motion Picture Arts and Sciences voters. They were unswayed by the big-bucks of 1985's biggest box-office hits. "Back to the Future" could manage only the song and writing nominations and two for sound, and "Rancho - First Blood, Part II" avoided its way only to a mention for sound effects editing.

Spielberg has yet to win an Oscar, even though he has directed the all-time movie money-maker "E.T. The Extra-Terrestrial".

"The Color Purple" was widely considered his bid for peer accep-tance as a director of substance.

At Spielberg's Ambinder Enter-tainment, a secretary said the director was out of town and unavailable for comment.

Spielberg's star, stand-up comic Whoopi Goldberg, was nominated for her role as the downdroven farm wife. "It's amazing," Goldberg said in a statement read by her publicist, Nan Leonard. "I'm grateful and very excited."

Also nominated for best actress were Anne Bancroft for "Agnes of God," Jessica Lange for the country singer Patsy Cline in "Sweet Dreams," and Meryl Streep as the Danish novelist Isak Dinesen of "Out of Africa."

Geraldine Page, the homeward-bound Texas woman of "The Trip to Bountiful," scored her seventh nomination. The 61-year-old actress has yet to win.

The trading cards with pictures of pudgy, round-faced, ugly children doing disgusting things are the latest of a merchandising set, and some people are not amused.

There's Acme Amy, a pimple-plagued, brace-faced adolescent; Mad Mike, a savage in a leotard wielding a sword and ax; and Wacky Jackie, in a paddedlock strait-jacket. Or Greaser Greg, with his devil's head T-shirt and a cigarette, death's head T-shirt and a cigarette.

Several schools have banned the cards, and parents have been writing...
Reagan wants boost in U.S. military spending

Associated Press

WASHINGTON - In a budget that slashed dozens of domestic programs, President Reagan asked Congress yesterday to boost military spending by almost 12 percent to $520 billion to pay for a surge in space-defense research and keep virtually every other weapons program intact.

"I fully appreciate the fact that we are preoccupied with defense," Defense Secretary Caspar Weinberger said in presenting the fiscal 1987 spending plan to the Senate Armed Services Committee.

"But the defense budget has become the target of opportunistic demagogy, and our security has suffered," Weinberger said. "The administration has made its priority choices regarding defense - I urge the Congress to get the defense debate back to the question of what this nation's security requires."

Committee Democrats quickly served notice that cuts were inevitable. Congress struggles to comply with the Gramm-Rudman deficit-reduction act. "I do know that this budget request won't fly," said Senator Carl Levin, D-Mich.

The request for the fiscal year beginning Oct. 1 totals $275.3 billion in actual outlays for the Defense Department, up $15.9 billion or almost 6.2 percent from this year after the 1986 cuts under Gramm-Rudman are taken into account.

But because many purchases of military hardware take place over several years, Congress gives more attention to the Defense Department budget authority request, which includes the term money to acquire ships, planes and missiles. This figure would jump by $33.2 billion, or 11.9 percent, to $311.6 billion in the year starting Oct. 1.

When the money earmarked for nuclear weapons produced by the Department of Energy is added to the Pentagon amounts, total military outlays in fiscal 1987 would climb to $282.2 billion from $265.8 billion this year and budget authority would leap to $320.5 billion from $286.1 billion.

Senator Sam Nunn, D-Ga., said "steady annual increases are a thing of the past" and that they could "anticipate" in hold defense spending in future years.

Senator Gary Hart, D-Colo., predicted "total rejection of your budget."

ND student recovering from wounds suffered in shooting

By MARK PANKOWSKI

Assistant News Editor

A 24-year-old Notre Dame law student is recovering from leg injuries suffered in a shooting incident Friday night.

John Figeller, an off-campus third-year law student, was released from St. Joseph's Medical Center Tuesday afternoon following surgery to remove the .38 caliber bullet Monday.

South Bend police detectives were unavailable for comment last night, but Figeller said they were continuing their investigation into the incident.

Figeller was out for a walk about 10 p.m. on Western Avenue when he "heard a loud blast" but didn't see what the shot came from, he said.

He then felt a sharp pain in his upper right thigh. The bullet is believed to have been fired from a hand gun, he said.

When I realized what happened I decided I better leave the area and get help," said Figeller, who added he didn't know why he had been shot.

Figeller said he then walked a couple of minutes to Gates Chevy-Cadillac, where employees called an ambulance and police. He arrived at St. Joseph at about 10:30 p.m., he said.

The bullet was found lodged in Figeller's thigh and had not struck any bone, he said.

Figeller's leg is now bandaged, he said, but he is six inches shorter. He added that there was no permanent damage and that he was fully recovered in a couple of weeks.

Coed dorms should be a choice for students

Is there a conflict between the Notre Dame administration's philosophy of the University student and the concept of coed dorms? Is it realistic to expect the University's policies on parietals and coed housing to be updated in the near future? The Observer believes it is time for students and administrators to begin serious discussion on these questions. This week's news series on parietals illustrated how in the past the University's parietals policy has been adapted to fit the times. We believe it is time for another such change.

Obviously, many students prefer to live in single-sex dorms with parietals. But what about those who would rather live in a coed dorm? What about students who disagree with the University's parietals regulations? What real choice do they have?

If a student who disagrees with the parietals regulations wishes to stay at Notre Dame, he or she has only one choice — to move off campus. And technically, the parietals regulations apply even there. A move off campus need not be the only choice.

Notre Dame students should have the option of living in coed dorms. This could feasibly be done by having some coed dorms with floor-by-floor parietals and some dorms with none at all. This would allow the choice for those who prefer the privacy, security and good order that administrators claim parietals provide. It would also allow, however, those who prefer coed dorms to choose that residence life.

Coed dorms would offer students who have faith in their own sense of responsibility the opportunity to live and interact in the same environment as students of the opposite sex. With the option of coed dorms, better and more realistic communication and understanding between men and women would be offered. A healthier environment would exist for the development of relationships, instead of the inhibiting influence that currently exists between the sexes here.

With the choice between single-sex dorms with parietals or coed dorms with or without parietals, the administration can show its faith in its students' responsibility and maturity. It would be a vote of confidence in the decision-making abilities of the adults that learn, live and grow together in this community.

University President Father Theodore Hesburgh, in a letter to the Judicial Council last week, addressed the administration's attitude toward the parietals issue. Hesburgh ended the letter in a hopeful tone, noting, "The rules and regulations that guide our lives on this campus are not all etched in concrete."

We encourage Father Hesburgh, opening the door to discussion on the issue. Student government should initiate a forum for discussion about parietals, their future and the possibility of coed dorms. Students should initiate a forum for discussion about parietals. This week's news series on parietals illustrated how in the past the University's parietals policy has been adapted to fit the times. We believe it is time for another such change.

On Philippine elections

The press, including our own Observer, has recently characterized the present political situation in the Philippines as a result of the "soap" election — a reference coined by the Philippine press — that President Marcos has called. The press reports, to a large degree, do not accurately reflect the true political situation in the Philippines.

Jim Lahren

This column will be devoted to discussing the nature of Philippine politics in general and tomorrow's will show why the election should not take place. In addition to discussing why Cory "Cory" Aquino is not a viable candidate.

My family has lived in the Philippines for almost four years now, and I had a chance over the past few years of politics, politicians and must resort to practices that would be corrupt by U.S. standards. This results partly from the legacy of Spanish Colonialism. The authoritarian Spanish influence pervades politics as well as the minds of Filipinos. In general, Force is viewed as just one means of influencing a political outcome. The combination of this and widespread poverty creates an atmosphere that severely limits, if not disallows, a democratic government as we know it to function. Filipinos have a tendency to vote for the candidate who can promise them the most. This can take the form of vote-buying on the part of candidates, promises of physical well-being, job security and business payoffs. In the 1968 elections, the Area Handbook on the Philippines, published by the U.S. Department, reported that campaign spending reached one third of the national budget. The 1968 presidential campaign resulted in a severe recession as well.

Press reports from the Philippines charge that Marcos is corrupt and suggest the United States should re-evaluate its support for the Marcos regime. Marcos is indeed corrupt. It would not do to doubt the validity of the charges of government complicity in the murder of the opposition candidates. The consumer inury is also responsible for many political murders. Marcos' corrupt point and corruption are not necessarily corrupt. It would also allow, however, those who prefer coed dorms to choose that residence life.

Coed dorms should offer students who have faith in their own sense of responsibility the opportunity to live and interact in the same environment as students of the opposite sex. With the option of coed dorms, better and more realistic communication and understanding between men and women would be offered. A healthier environment would exist for the development of relationships, instead of the inhibiting influence that currently exists between the sexes here.

With the choice between single-sex dorms with parietals or coed dorms with or without parietals, the administration can show its faith in its students' responsibility and maturity. It would be a vote of confidence in the decision-making abilities of the adults that learn, live and grow together in this community.

University President Father Theodore Hesburgh, in a letter to the Judicial Council last week, addressed the administration's attitude toward the parietals issue. Hesburgh ended the letter in a hopeful tone, noting, "The rules and regulations that guide our lives on this campus are not all etched in concrete."

We encourage Father Hesburgh, opening the door to discussion on the issue. Student government should initiate a forum for discussion about parietals, their future and the possibility of coed dorms. Students should consider seriously whether they are compliant with the present system, or whether they would invite a choice.
Petitier letters lacking any sense of balance

Dear Editor:

I do not know if other males have the same sneaking suspicion do I, but I suspect I am "...a man," and not a woman. I have been reading Simone de Beauvoir, Betty Friedan or even Alan Petifer. I know of a thousand reasons why the male gender has over-displayed power, wage, public wars and generally fanned its "pacockish" feathers. I can even understand the attribution of blame to "...a man," a sense of guilt for his specific immoral actions.

But I do not understand the rewriting of history which focuses on the overt insensativity and violence of males while neglecting the contributions of females. It is not in my history to have been written focusing on the seduction, character, moral standards, fiscal responsibility, family planning, productivity and so forth, of females in order for there to be a sense of balance? The more here is equilibrium, balance or even focus. In particular, I find myopic focus on sense of balance in the copious letters of Petifer.

Would it not be advantageous for the human race, for Petifer and others like her, for me and others like me, to consider, judge, write, and speak with a sense of balance? This way we would not destroy humanity. Would we not have suffered history if we thought and acted with a sense of hope and possibility rather than despair? Think of how life could be created and fostered in the embrace of such a productive balance. Think of the contributions of sensitive males when given a sense of balance.

Second, Campbell and FLOC have worked to establish a joint commission indeed headed by former Secretary of Labor John Dunlop. However, I would invite the editors to explain exactly what this commission has accomplished towards improving migrant farmworker labor conditions, such that he might find out how inefficient this commission has proved to be.

Third, Campbell has worked to establish approximately three day care centers, but three centers hardly serve the thousands of migrant children who could benefit from such care. Furthermore, Campbell only directly supports eight farms in the state of Ohio. Again, this merely scratched the surface.

First of all, the arguments introduced by Yaldon and Markety are indeed valid today. Although the conditions of the migrant farmworkers have improved somewhat in scattered areas, they are by no means adequate improvements. In a recent survey, it was estimated that 95 percent of migrant farmworkers still experience severely deprived conditions.

New Christian's fervor resembles early Church

Dear Editor:

Kumori: "Hello the Khanis say "Hello." The Khans are people of Shillong near India where the Pope visited Tuesday. Coming from Shillong I thought I would share a few memories of Shillong with you.

Shillong is the capital of the state of Meghalaya, very near Bangladesh. The people of Meghalaya are comprised of three tribes: the Khasis, the Jaintias, and the Dogus. Each speaks a different language. The Meghalaya symbolizes "Abode of the clouds" and that's very evident when you walk on some of Shillong's hilltops with your feet in the clouds.

Shillong is a place with gentle hills, vibrant waterfalls, pine trees and pure air. The young people of Shillong are fond rock n' roll! It was very interesting to see the youth of Shillong on a stage with different Presidents, Nuns, and lovely music. Shillong is the education center for northeast India. In fact, it could well be called the "student's city." Walking by one of Shillong's winding streets you would meet many different parts of northeast India: a Naga student from Nagaland, a Mizo from Mizoram or an Apanese from nearby Assam.

New York is now to northeast India about 100 years older. Being new, you can feel the spiritual fervor in some of the people you would not have been able to experience were you to have written scripture with some friends from my university.

The perfect couple: Suzy and Tommy. Every one can recall they have been inseparable. Their constant companionship is indicative of their strong bond. You are envious of their relationship which appears to be the ideal. Then, to much astonishment, you discover they are no longer a couple.

Coping with and after a relationship (or lack of one) is a situation common to every student and every college. At Notre Dame, it is a very close second on the list of stress-causing stresses. According to the Counseling & Psychological Services Center, slightly ahead of anxiety due to relationship anxiety due to academic academic academic Academic-related tension is the major root of Notre Dame students' stress.

Academic-related tension is the major root of Notre Dame students' stress. It is the result of how you react to certain circumstances and if not dealt with properly, can take its toll on your physical and emotional well-being. In fact, prolonged stress has been linked to acne issues, depression and chronic disease. According to ISMA, everyone experiences stress, but the key is to learn how to define what is causing the stress and then deal with it appropriately. Stress can be either positive or negative.

Positive stress is the reaction to a taking a vacation, getting a raise, promotion, attending a wedding, or welcoming a new grandchild. It can also be the reaction of moving into a new home, making a new friend, your marriage, or your involvement when working on a social project. Negative stress is created from events and circumstances such as the death of a spouse, a loved one, illness, divorce, relocating, or financial problems. It can also be the result of retirement and the separation of family members. This type of stress can become chronic because solutions to these problems are not found easily. Stress causes large amounts of chemicals to be secreted in the body. This causes muscle tension and increased heart and respiration rates. Stress can also cause digestive problems, a lump in the throat, loss of appetite, butterflies in the stomach, and diarrhea. Some major diseases like heart disease and cancer can be directly linked to stress. Long periods of chronic stress can be very dangerous and can even turn an effect on how well and how long we live.

Excessive drinking and smoking will also add to stress, says the ISMA. Practicing poor nutritional habits and not watching caffeine and sugar intake can contribute to feelings of anxiety.

There are many methods of overcoming stress, but you must be determined to take the initiative. First, learn how to relax. This may include taking a hot bath or going for a walk. Whatever you decide to do, be sure it is something you enjoy. Exercise is a good tension reliever. Breathing deeply and exhaling very slowly can also reduce tension. Other techniques you can use to deal with stress include:

- Eating nutritional meals
- Thinking positively
- Learning to accept yourself
- Confronting your fears or unrealistic perceptions of yourself
- Expressing your emotions rather than bottling them up for a big explosion.

Remember, all stress is not bad. Consider a change in your social activities, personal habits, or work responsibilities. Changes like these are key to helping you keep your stress levels under control.

Stress is generally created from negative events or situations which are perceived as threatening. Stress can be either positive or negative, depending on how we define it. Positive stress is the reaction to situations such as receiving a promotion, attending a wedding, or welcoming a new grandchild. It can also be the reaction of moving into a new home, making a new friend, your marriage, or your involvement when working on a social project. Key to job search is preparation

There is an office in the lower level of the Memorial Library. The majority of seniors know about it. Many juniors are aware of it. And a few sophomores and freshmen know it exists.

Career and Placement Services is an office that can aid students in any facet of career development and in job search techniques for summer and full-time employment. There are dozens of opportunities untapped by most students. Procrastination is usually the culprit. Many students put off discovering what they are interested in doing after graduation until senior year. Un­necessary parents usually have a way of convincing students that the real world is right around the corner.

It doesn't matter where you are in your career search. There are services in all areas.

The Career and Placement Services office has three professional staff members and a part-time counselor to assist you with individual counseling sessions. According to Kate Dascenzo, assistant director, "Most students wait until they're forced to take some action and that puts them at a distinct disadvantage." Dascenzo added that in the long run, it is easier for the student to begin counseling as early as possible, even if this counseling only reaffirms his or her own thoughts. Unfortunately, not enough students take advantage of this service.

Along with individual counseling, on-campus interviews are arranged. In 1985 there were approximately 10,000 on-campus interviews and more than 250 companies visited the campus to recruit Notre Dame students.

Most on-campus interviewing is directed toward graduating seniors. There are, however, some interviews for sophomores and juniors for summer internships.

Joan McIntosh, career counselor, recommends that students visit the Career Library. It contains a wide variety of career publications and corporate literature. She also reports there are many small group workshops and presentations with subject matter ranging from how to decide on a career to job search skills and techniques. Students may attend these workshops at no charge.

A computer-assisted career information and guidance system called DISCOVER is available for student use. It offers a very systematic approach to career decision making. "With all of the confusion out there about careers, it is difficult to understand why more students don't take full advantage of our assistance," states Kitty Arnold, director of the office. "We're delighted to help, but they (Notre Dame students) have to take the initiative to ask for it," she adds.

There are probably still students who doubt about whether it would be worthwhile to check these things out. After all, some students won't be graduating until 1989. But the years roll by quickly, and it is always easier to win the race when you're ahead than to catch up when you're lagging behind.

"It's never too early to start. Talk to as many people as you can. Don't procrastinate." These are the comments of John Cywinski, a 1984 Notre Dame graduate in management who now works as an assistant account executive with the Leo Burnett advertising agency.

Preparation is the key ingredient to a successful job search. Many students return to campus for their senior year with the intention of taking interviews and conducting an extensive mail campaign. Far too often these students have done very little to prepare for what should be a major priority in their final year at Notre Dame.

The career search is a difficult and time-consuming process. Students must first assess themselves—their values, interests, skills, weaknesses and goals. In short, they should discover and understand what makes them tick.

Research is a significant aspect of the job campaign for students unsure of the opportunities available for someone with their aptitudes, major and background. Many reference guides are available in the Career and Placement Services' library.

Mike Harvey, who received his mechanical engineering degree last May and is now a production manager at the Ivorydale Food Plant of Froster & Gamble asserts, "You can't wait until your senior year to begin looking at different careers. Start now by going to the placement office and finding out what they have to offer.”

Sophomores and juniors should consider talking with experts in different career fields to receive firsthand information. Only then will they have the knowledge and expertise to perform well during the interview process.

"It is a key part of the job search experience," said Joan McIntosh of career counseling. "The job search is a difficult and time-consuming process. Students must first assess themselves—their values, interests, skills, weaknesses and goals. In short, they should discover and understand what makes them tick."

Career and Placement Services offers a variety of opportunities throughout the year. Above, students wait patiently for their on-campus interviews. At left, a student talks to a representative at the annual MBA mini-forum (above), while another student takes part in one of the thousands of interviews conducted on campus each year.

Freshman year is not too early to start planning your career

Brought to you by Career and Placement Services
Most students have lived away from home while attending Notre Dame. This experience should be helpful when your wings are snapped on graduation day. However, there is no guaranteed smooth transition.

The following are comments from 1985 graduates offer helpful hints on what you might expect when you leave Marley, assistant dean in the College of Engineering. "There is some shortage that exists, but it is not as acute as a few years ago." The question surfaces when planning for the future, the shortage con-tinue to decrease.

The areas of electrical engineering and electronics show more signs of a shortage than do other engineering disciplines. This is probably because there is more demand for electronics graduates. Marley says there is not neces-sarily a shortage within graduate schools. There has been an increase in the number of foreign nationals attending graduate school. Foreign nationals now comprise approximately 60 percent of the total number of the global workforce.

When the foreign nationals receive their degrees, they usually take their achievements and knowledge back to their own countries. This leaves the United States with a shortage of professors.

A sense of humor can be a good survival technique when the going gets a little rough. Our next report mentions a few more practical hints that can be taken into the field.

John Runger 1984 graduate - Economics/ALPA

The Citizens and Southern National Bank of America. Leaving home, leaving the college life and striking out on my own to begin my career was an exciting experience for me. Let me share a few things to help make the transition a little easier.

Arrive in your new city at least a couple of days before you have to report to work. You’ll have plenty to buy so you must make an apartment. Your cash flow can really get squeezed, since most of your payments need to be made up front. It may be three or four weeks before you receive a paycheck. Be prepared to pay a month’s rent in advance as well as a security deposit. In addition, you may have to send a deposit to get your phone and other utilities.

Don’t be in a hurry to rush out and buy a new wardrobe. Wait a couple of weeks to get a feel for the style of your new environment. Within six months, you’ll finally begin to feel comfortable in a suit. It took me a while to adjust to being in the office for eight or more straight hours. A day in the office is a lot longer than those three morning classes followed by a two hour nap.

I can’t emphasize enough that you’ve got to find a job that you enjoy. Job satisfaction is the key to your success. One of the more frequently asked questions of career counselors by Arts and Letters students is, "What type of job can I get with my major?" Though a slight exaggeration, an appropriate response might be, "The sky is the limit."
If at first you don't succeed... 

Volunteer work can be a great place to start

Suppose you don't want to work for a large corporation, or a major financial institution or an industrial behemoth. You may prefer to consider working with kids in an inner-city neighborhood, or working to promote peace, or helping the elderly in a small town. Perhaps you would like to use particular skills, such as accounting or engineering, in the setting of a non-profit agency.

It is not unusual for Notre Dame students to consider such alternatives. Many students have gained great satisfaction from postponing their careers to engage in volunteer work or beginning their careers in a non-profit agency. It may not seem as glamorous as a Fortune 500 corporation or the fastest path to follow, but it can meet certain students' needs.

In 1985, several students turned down lucrative job offers to enter the Holy Cross Associates. This year, considerations like these still exist. Remembering that it is not unusual to consider these options may aid in evaluating alternatives.

Career and Placement Services receives information from hundreds of non-profit agencies, both religious and secular. Many of these offer volunteer positions and internships as well as long-term careers. Just as in more traditional career paths, these organizations need individuals who have analyzed their personal interests, aptitudes, and skills and can state their career goals clearly.

To find out more about alternative careers, stop by the Career and Placement Services library or make an appointment with Joan McNichol, a career counselor, to discuss your plans on an individual basis.

The Peace Corps and Holy Cross Associates are well-known to most Notre Dame students. Listed below are just a few of the many other groups that express interest in Notre Dame students.
Time, effort are keys to finding internship

One of the fastest growing professional fields is human resource management. The Department of Labor reports that human resource employment is growing at a 168 percent faster rate than other professional fields in the next several years.

Human resource management is also one of the most popular among college graduates, particularly those in general business administration programs, the social sciences and the humanities. One reason so many students think they want to work in human resource is that they frequently see it as the only truly people-oriented job in business. This perception is, however, misleading. Not only does it ignore the many other types of business occupations that require strong interpersonal skills, it represents an extremely narrow view of what human resources is all about.

Human resource management is no longer just hiring and firing. It is a complex set of responsibilities in including human resource planning, development, and work force utilization. Typically, human resources may be thought of as a combination of five different types of functions: human resource planning, recruitment, selection and staffing, compensation and benefits, employee relations, and training and development. Depending upon the size of the organization, a human resource professional may be a specialist in one of these areas or have responsibility for several or all of these functions.

According to Roger Mullins, Notre Dame’s director of personnel, entering a position in human resource is becoming much more difficult to enter today than in years past. He attributes this to the growing diversity in benefits programs. In fact, the increasing diversity in pensions and other benefits is one of the major reasons that human resource as a field is expected to grow significantly relative to other professions.

For the graduate hoping to enter human resource, Mullins recommends considering master’s level work in organizational development, organizational behavior, industrial psychology or MBA programs with coursework in human resource management. He also says a desire to work with people is only one of many criteria needed to access human resource positions and, by itself, is not enough to sell a prospective employer on a candidate.

Human resource management is more than hiring and firing

Mauro believes her internship with General Motors has no doubt that recruiters are strongly influenced by experiences in the student’s area of interest. Although it takes time and effort to obtain an internship, the payoff appears to be well worth it. There is no doubt that recruiters are strongly influenced by experiences in the student’s area of interest. You never know what you will learn during the college experience will be priceless in the long run. It is essential that you take advantage of off-campus summer internships and interviews with friends, family and professors.

Mauro’s approach was through a contact. She had a friend who knew someone who worked at General Motors. She was able to get the information she needed to apply to the summer internship program.

Contacts can be vital in a job search. Approximately 80 percent of jobs found are through personal contacts. Contacts can provide you knowledge and insight that may help in obtaining an interview. Once you get that, you’re on your own.

The tools for finding a summer internship are similar to those in any job search. You need a resume, cover letter, location targets, contacts and/or mailing lists. The common thread is to begin early.

Although Eric Howard, a senior finance major, did not begin his actual job search until Christmas vacation his junior year, he began thinking about it and collecting information during the previous summer.

Gathering your tools is very time-consuming. Howard found developing his resume and cover letters to be much more difficult than the interview task. These usually cannot be done in one sitting — revisions are necessary. He obtained most of his help from Career and Placement Services, taking advantage of individual counseling and the Career Library.

For most summer internships, your target area is usually in your hometown. This is especially true because of the high living expenses. There are many programs that provide inexpensive housing for summer interns. Leaving no stone unturned is a productive attitude to take when looking for an opportunity like an internship.

Bush Mauro and Howard found the internship experience to be very insightful and well worth the time and effort. Mauro learned how to get answers on her own, a skill she says she could not do without. Decisive- ness and assertiveness are vital to get what one wants. Both students agree that networking is the key. Howard, who interned with U.S. Bancorp in Portland, Ore., said “it is not only exposed me to the business environment, it made me a lot more sure that is what I wanted to do.”

Extra-curricular activities open doors for many science majors

Where do science majors with bachelor degrees find careers? Surprisingly, industrial management, technical writing, sales, accounting, business, law, computers, military service and teaching are some of the fields open to science majors. One entering 1985 graduate went to work for a charter boat company.

Many science majors go on to graduate school. According to chairman of the different science departments, approximately 65 percent of biology majors, 75 percent of earth sciences majors, 25 percent of math majors and 95 percent of physics majors go on for advanced training. Students who attend graduate school do not necessarily choose the same area of study. Although medical school is common for many science majors, advanced degrees in business administration and law are also possibilities. It is impossible to become a professional research scientist with an advanced degree. There, however, some companies that hire students with bachelor degrees for laboratory work.

There are many kinds of careers that give all the answers. Starting early is the key to a successful career. The key is to keep an open-minded attitude to open all the proverbial doors.

There is no one avenue that will give all the answers. Starting early is always a productive suggestion. There are many kinds of careers that a science major can find through imaginative exploration and research. Discovering different interests during the college experience will possibly lead to some answers. Balancing one’s academic work with an interesting variety of extracurricular activities, community work and summer jobs can open up new and exciting alternatives. Combining one’s interest and abilities will surely result in a fulfilling career.
2nd effort a strong breath of fresh air

TIM ADAMS features copy editor

This is a strange album. I mean, I enjoyed the Bangles’ album a lot while I was listening to it, but once I took it off my turntable, I couldn’t remember only a few faint melodies from all 12 of the songs. Is Different Light just the sort of equivalent of eating Chinese food I dunno.

Records
Different Light
(out of four)

But I do know that it’s good to hear this wonderful female quartet back in action, because their most recent record, 1985’s All Over the Place, whetted my appetite for more of their delicate yet tough sound, a combination of beauty and the beast.

Lyrical, the Bangles have mellowed. No longer does the group sing lyrics like “James, letting me down again.” Now it sounds like “Walking Down Your Street,” a Motownish ditty with relatively pedestrian lyrics:

“We’re gonna walk right down your street
With a love that I can’t hide
I’ll even sacrifice my pride
‘Cause I want you”

I’m ranking on this because it is one of the few weak points about Different Light. For the most part, this record highlights well-crafted, original pop songs sung by some of the best female voices in rock. Susanna Hoffs, the primary singer, can make one melt with her charming, pint-sized voice, and she does just that in the Prince-penned single, “Manic Monday.” This song features a straight 4/4 beat, but the added touches of Victorian piano and strumming guitar give it a somewhat regal touch.

Gerrit Rundgren’s voice offers a nice contrast to Hoffs; it’s husky and conveys more of a sense of emotion, which is evident in the melancholy “Return Post.” Drummer Debbi Peterson adds her vocals on a few of the tracks, as does bassist Michael Steele.

Different Light offers a variety of musical styles. There’s theitary, King-Tut-on-acid “Walk Like an Egyptian,” the brainy “Following,” and even a cover of Alex Chilton’s excellent pop song, “September Gurls.” And of course, there are plenty of great Bangles pop songs, as there should be on a Bangles album.

The Bangles didn’t exactly outside themselves here, but the album is certainly adequate. To put it in cliche terms, it’s like a breath of summer in this dreary, wet South Bend winter.

Well deserving album steps into spotlight

DON SEYMOUR features writer

Now that “Perfect Way” has danced its way up the charts, meet Scritti Politti, the latest in a string of British synth-dance bands to riddle our airwaves.

The album Cupid & Psyche 85 has been out for quite awhile, but only now on the heels of “Perfect Way,” is it receiving any popular, commercial attention.

Records
A Cappella
(out of four)

A Cappella is especially ambitious because there is no other instrument on this record other than his own quirky voice: either he has maneuvered up to 40 times into a little Rundgren Choir, or electronically manipulated to sound like the usual assortment of band instruments.

Despite this high-tech trickery, the songs and words are the real strength of this record and can more than stand by themselves. They are as musically varied as the career of writer-singer-producer-musician-engineer-obsessive eccentric Todd Rundgren himself. They remain related by the tone of sincerity which underlies every emotional situation. Rarely textured with inspiring waves of harmony, his voice really shines from within his pleading heart. His affectations are weak, but his calm understanding settles in beautifully with the warm textures and harmonies of this album.

“Jodji” is a traditional, upbeat “doowop” melody where Rundgren begs for rhythm so he can dance and spar further interaction from his spinning and popping peers. “Honest Work” conveys the sad tale of union man who has become obsolete in modern society. His voice is powerful and painful, yet understanding to his situation.

“I knew I’m not the only one You saw who did arrange To pay my union dues so I’d Not have to learn or change His personal life is examined on the straight forward pop tune “Something to Fall Back On.” With a catchy bass line and bright production, it’s hard to tell that he’s upset about being used, but his seeing things for what they are is his best medicine.

Typically, the Bangles have mellowed. No longer does the group sing lyrics like “James, letting me down again.” Now it sounds like “Walking Down Your Street,” a Motownish ditty with relatively pedestrian lyrics:

There is no other instrument on this record other than his own quirky voice ...

Cupid & Psyche 85
(out of four)

Melodious key for this group; melody and a strong bass line drive these songs. Guitar and acoustic piano for flavor. The songs allude from the 70s-80s British pop-reggae of “Word Girl” to the eccentricity of “Wood Beer.” An integral part of Scritti Politti’s sound is lead singer Green’s natural alto, if not soprano. That’s right, his name is Green (apparently a British trend as illustrated by Sting, Bonzo, Morrissey, etc.).

He is the lead singer and principal songwriter for the band, though he is joined in the production of the album by keyboardist David Gasson and drummer Fred Maher. The three are also joined by a large group of studio musicians including Em, half of the New York duo Etta Oxen, responsible for “ABCD Sometimes V,” who handles most of the Fairlight programming.

This is a great album. The songs don’t come across as staid or over-calcified, as Go West does. High-lighting the album is “The Word Girl ( Flesh and Blood),” a top ten record in Britain, that takes its form from ’60s British reggae, though its flesh is pure pop. Another curiosity is “Wood Beer” (Pray like Aretha Franklin!), a dance club hit in Britain in the winter of ’84-'85 and now the follow-up single to “Perfect Way.” “Wood Beer” brings up the band’s interesting lyrics.

There’s nothing I wouldn’t take off even intravenous There’s nothing I couldn’t take to get it to be approved.

Green commands respect because the guy uses words like heroinotic, as he does in “Lover to Lover,” regularly. The lyrics create a bit of intrigue about these songs that are already rhythmically and melodically interesting.

Those who like “Perfect Way,” who like pop music in general or who like to adventurous should check out Cupid & Psyche 85.

Miller fired as Buckeye head coach pointing to a misdirected program

Associated Press

COLUMBUS, Ohio -- Eldon Miller, fired as head basketball coach at Ohio State, said Tuesday that he was never aware he'd become the latest in a long line of outlaws and misfits to take over the program.

"I felt the program was not prior to the start of practice," Miller said. "He fired me, and I accepted the fact that and thought a change in leadership was needed. I'm not bitter and believed his departure itself," she said. "She's a consistent person. She goes into every game with a plan, and she always has a way to get her hands on the ball. She's part of a team where she carries a load and we look for her to take control. That's what she's done. So, you see, there's a consistent performer, and over her four years of one-year contracts, an improvement in facilities and more and better marketing of the university and its basketball program.

He blamed the insecurity of one-year contracts for difficulty in competing for blue-chip recruits.

"Anyone who doesn't understand what that has got to be a blast," he said. "When you want the program to be the very best, you want absolutely nothing that speaks of any weakness. But when you have a kid in your office and say, 'I like you are going to be here next year?' then what is your contract worth?"

Miller said he had not discounted remaining in coaching after the Ohio State season ends.

"I've never spent a whole lot of time worrying about what some body else thought of me. And I'm not spending a lot of time (worrying) now," he said. "I've got a couple of job offers right now. None are in coaching. I'm not interested in a job right now. We've got a damned tough job coming up Thursday night (against Northwestern)"

The Buckeyes are 10-9 this season and 4-5 in the Big Ten Conference with nine games remaining. Miller, with a career mark of 167-113 at Ohio State, came under fire from fans and media after a loss Thursday at Minnesota, which was playing with only five scholarship players after losing three to a sexual assault scandal and two others to suspensions.

Miller said the program needed improvement in three areas: the goal, the team's play and the school's performance in its final games.

I've been coaching 24 years and had 24 winning seasons, and I need nine games in which I'd have to bear down and start playing hard. We're going to really have to try to play well in order to convince somebody that I can coach basketball?" he asked. "Does that seem ludicrous to you? It seems ludicrous to me."

Miller said he was hamstrung throughout his tenure by the Ohio State policy of offering one-year coaching contracts.

"How many years do you think in modern day basketball you're going to survive at Ohio State with one-year contracts?" he said. "Ten isn't a bad number. This is the longest I've ever worked any place. Now, the other places I've been, I was a little more of a hero when I left."

MSU player Skiles will seek efforts to continue talks to avoid jail term

Associated Press

PLYMOUTH, Ind. - An attorney for Michigan State basketball star Scott Skiles today said his client may well continue negotiations with prosecutors in an effort to avoid a possible jail term for the Big Ten player of the week.

Marshall Circuit Court Judge Michael D. Cook earlier yesterday rejected without comment Skiles' motion to dismiss a probation issue to revolve his probation on a drug conviction.

The ruling clears the way for a Feb. 21 court hearing at which prosecutors will attempt to show Skiles violated probation by drinking and driving.

If the judge agrees, the 6-foot-1 senior guard could be ordered to serve a one-year jail term.

"It will be heard then unless the prosecutor and I reach an agreement of some kind," said Skiles' attorney, Charles Scruggs of Kokomo.

Skiles violated probation by drinking and withdrawing until then.

"A" dominated Lyons. Farley "B" and withdrawals until then.

Badin 47-41, Lewis "A" winning 40-30, Breen-Phillips defeating in the third quarter, with a hot hand from outside. "O'Connor was just...

Michigan facing tough road games against crucial Big Ten opponents

Associated Press

Michigan's Wolverines face a pivotal week on the road in the Big Ten basketball race, but Coach Bill Frieder isn't ready to push any panic buttons.

The seventh-ranked Wolverines play at Purdue tonight and travel to Illinois for a nationally televised game Saturday.

"We know this is one of the toughest trips in college basketball," said Frieder, whose Wolverines have been 6-11 in games played at Purdue and Illinois in the past six seasons.

"We know Purdue will have fire in its eyes, and Illinois feels it can still win it all," Frieder said. "But if we lose two, we won't push any panic buttons.

The reason is that after this road trip, the Wolverines have seven games remaining with five at home and road games at Wisconsin and Northwestern, the league's bottom two teams.

Michigan has a 19-2 record overall and is 7-2 in the conference. That gives Michigan a one-game lead over Indiana and Iowa who are both 6-5 and a two-game lead over Purdue, Illinois and Michigan State who are locked in South place with 5-4 records.

While Michigan is at Purdue tonight, Michigan State will be at Illinois, Wisconsin at Indiana and Northwestern at Ohio State. Saturday's schedule finds Michigan at Purdue, Wisconsin at Illinois and Northwestern at Indiana. Iowa is at Minnesota in a Sunday matinee.

Michigan can virtually wrap up its second straight Big Ten title with victories at Purdue and Illinois. Even a split would greatly favor the Wolverines in their title drive.

But if Michigan loses both games and Indiana or Iowa win a pair, the Wolverines could drop out of first place for the first time this season.

Although Indiana and Iowa immediately trail Michigan, Frieder doesn't fear Illinois most.

"Illinois is a great team and capable of being in the final four," said Frieder, looking ahead to the NCAA tournament. "They have done a good job despite their injuries."

Coach Lou Henson didn't disagree. But he said that "we'd like to be better than 5-and-4. But in view of everything, things could be worse. Our defense has been carrying us. If we can get our offense going, we have a chance to win some games."

Henson lauded the play of junior Ken Norman, who is averaging 16.1 points in Big Ten play and is ranked eighth in the league in scoring.

Henson also is aware of the situation in the conference race.

"Illinois is a great team and Illinois feels it can still win it all," said Frieder, looking ahead to the NCAA tournament. "They have done a good job despite their injuries."

Some NHL players are concerned about increasing injury problems

Associated Press

HARTFORD, Conn. - With high-sticking penalties up significantly this season over last year, National Hockey League players are expressing concern over their safety.

Doug Wilson of the Chicago Black Hawks is wearing a helmet and mask for the first time in his career, and Wayne Gretzky of the Edmonton Oilers would like to get more protection from the referees.

"You get a little leery when you see some of the accidental injuries - the high sticks and the puck," said Wilson, a starter on defense for the Campbell Conference in Tuesday night's NHL all-Star Game. "Now you look through the league and see some of the best players wearing a mask."

Wilson was a longtime holdout against the helmet and mask, but changed his mind when he got hit by a stick and had his nose broken in the second game of this season.

"I had a few problems before, such as a skull fracture (three years ago), and the doctor recommended (a helmet and mask)." Wilson didn't feel comfortable at first wearing the head and facial protection, but eventually adjusted.

"For me, it's more psychological," Wilson said. "I had never worn a helmet and mask before. I think I let it bother me more than I should have."

"There is a little trouble with sights lines. If the puck gets around your feet, you lose it a little bit. But if you worry about it, it becomes a bigger problem than it really is." Being a player who never wore a helmet, Wilson said, "I almost thought it would be better if nobody would wear one and everybody would keep their sticks down. But then you see the accidental things happening. You don't have to see somebody lose their eye before you wake up."

Gretzky has added his voice to the chorus of complaints from players over the number of high-sticking incidents, particularly after Boston's Ray Middleton was slashed in the mouth by Montreal's Chris Nylander earlier this season. Middleton was out of action for a while and Nylander suspended for eight games.

"This (high-sticking and slashing) has been happening for five and six years now," Gretzky said. "It didn't happen overnight. They used to say people were crybabies for complaining about it. Now it's getting the attention it deserves."

John McCauley, director of NHL officials, said that high-sticking penalties are significantly higher than last season, but could not cite a percentage.

He said that his office has instructed referees to crack down in that area of penalty, hoping to reduce facial injuries.

Peter Sundstrom (25) of the New York Rangers is checked between Miroslav Frycer and Chris Kotsopoulos (26) of the Toronto Maple Leafs. Doug Wilson of the Chicago Black Hawks and Wayne Gretzky of the Edmonton Oilers have expressed concern for rough play in the NHL in the story at left.
UGA admits athletes are favored, that admissions linked to revenue

Associated Press

ATLANTA The revenue potential of some athletes is part of the reason they are admitted to the University of Georgia with lower academic standards than ordinary students, school president Fred C. Davison testified yesterday.

But he disagreed with a statement attributed to another school official that athletes are merely "raw material." "Every student that comes to the university benefits by being there," Davison said. "If an individual learns only how to communicate better, that is some justification."

Davison was the final defense witness in the federal trial of former instructor Jan Kemp's suit against two university officials in which she alleges that she was demoted and fired from the remedial Development Studies program because she protested preferential treatment of athletes.

Davison also said he believes high schools have failed to provide student athletes with a basic education, creating a "subculture" of football and basketball players who have graduated from high school but cannot read.

Davison said he has been concerned for several years about the effects of the so-called "2.0 Rule," which allows athletes to enter college if they leave high school with a 2.0 average.

Davison, who said he does not play an active role in the admission process, in response to a question from the defense testified that he had no knowledge of politicians, alumni or contributors ever influencing whether a student is admitted to the university.

Defense attorney Hue Henry presented a letter addressed to Ervin which concerned a student, identified only as R.C. of Cartersville, who was seeking a reconsideration of his admission application. Henry said the student's grandfather, father and mother had served in the state legislature.

Kemp is seeking reinstatement, back pay and damages in the five-week-old trial.

Post Basketball and Pre-SYR Laughs at

'We Can Make You Laugh'

Student price is $2.00. Guest judges will be John Carney (Jim McMahon look-a-like), Maureen McDonnell (Miss Virginia) and John Spotz (Senior Class President). Show is Saturday, Feb. 8, 7 pm at Washington Hall. $25 reward to the person who won't laugh. Tickets at the Ticket Stub.
Interhall hockey action heating up as OC and Carroll both score wins

By ORLANDO RUBIANO
Sports Writer

Interhall hockey action Tuesday night yielded two identical results, but the caliber of hockey was anything but. Carroll and Off-Campus beat Dillon 3-2 in a very entertaining and exciting game, which was contrasted by Carroll’s defeat of Stanford, 5-2.

Off-Campus (2-0-1)’s defending interhall chimpards, were greeted by a charged-up Dillon team. After coming off of a disappointing tie with Morrissey, Off-Campus had hoped to show its dominance once again. However, Dillon was not willing to comply as it gave Off-Campus all it could handle.

Off-Campus scored all of its goals in the second period, including the rest of the way, and the Irish could sacrifices to the zebras, each time handling. Dominance once again. However, Campus had hoped to show its game-winner from Mike Clemens.

Irish continued from page 20

midway through the second period, but seemed to have run out of gas after having expended so much effort in the first period.

Coach Kevin O’Shea of Off-Campus breathed a sigh of relief as the last second ticked off the clock. His squad the victory tonight,” said O’Shea.

Carroll was able to hold on for a narrow 3-2 victory over Stanford in a haphazard style. Carroll (5-1) grabbed a 3-0 lead on goals by John Berestka, Don Moran, and John McConnville. Stanford (0-4) made it interesting by scoring two late goals, but it wasn’t enough to prevent the loss.

Dayton played with a lot of intensity and we didn’t have the concentration in key situations - that’s where we broke down. We shot well in the first half, but Dayton shot better. In the final seconds, the Irish took one last run at Dayton when Jim Dolan hit a disputed jumper with 1.2 seconds left to bring Notre Dame to within two at 65-63. He was fouled on the play by Goodwin, but his ensuing free throw attempt was ruled no good because he stepped over the free throw line.

The Irish were lucky in the first place that Dolan’s basket even counted. Replays clearly showed that Irish forward Ken Barlow touched the ball while it was in the cylinder, although Barlow denied that fact after the game.

In the first half, the Irish backcourt came on strong, while the frontcourt appeared to still be in the locker room. Stevenson and Rivers connected from the outside for 12 of Notre Dame’s first 15 points. Stevenson had 15 first half points on 7-of-8 shooting.

N o t u n t l D o l a n ’ s t i m g i n g w i t h 9-38 gone did the Irish front line register anything other than three free throws by Donald Royal.

Notre Dame falls short at Dayton as Stevenson shines with 23 points

DAYTON, Ohio - Freshman Negelo Knight hit six free throws down the stretch to send Dayton to a 67-65 upset of the 14-ranked Notre Dame basketball team last night at UD Arena.

Overshadowed in the loss was the 23-point performance of Irish freshman Mark Stevenson, a career high.

"Dayton upsetted us," said head coach Digger Phelps. "We deserved to win. We were a little tired down the stretch, but that's no excuse."

"Mark Stevenson had a spectacular game for us. He's been just the great last two games," Dayton's 15-8, led by the Irish that wasn't, but lost its lead four and a half minutes into the second session when another Notre Dame freshman, Sean Conover, hit a jumper from the left baseline to put the Irish on top, 42-41.

The Irish would stretch that mar­gin to 46-45, before the host Flyers ran up eight straight points to take a commanding 51-46 lead. Ed Young, who missed all of last season with a knee injury, capped the Dayton spurt with a short jumper and a resounding slam dunk on its first dunk of the season - off the fast break.

Young's dunk sent Phelps calling for his first timeout, and the brief respite appeared to aid the Irish. Notre Dame, 15-4, again rallied to even the game at 55, but the Irish blew their chance to go ahead when David Rivers missed the second shot of a two-shot foul.

Dayton, at that point baffled by the match-up zone of the Irish, had to call two timeouts in a 1:08 span to regroup.

"When Notre Dame went to its match-up zone, we were having a hard time getting in to it (Dave) Col­bert and Young," said Dayton coach Don Donoher. "We had a lot of trouble with that defense when they changed to that zone. We took the two timeouts at the right time - we needed them just to get organized."

"In the first half, our offensive ex­pectations were high. We were down 46-37 at the half. We got a little quick, and we didn't know how somehow we lost the lead and then got it back."

When Dayton broke its boulder for the second time, Dayton Goodwin hit a baseline jumper to put the Flyers back on top. Young followed with a fast-break layup moments later, and Dayton had control again at 59-55 with just 1:55 remaining.

At that point, the Irish had to start fouling, but still had four to go. Notre Dame made four quick free throws from the line to pull out a 61-58 lead at the ACC last night.

With 8:37 remaining to play in the game, Keys sank a baseline jumper to give Notre Dame a 46-45 edge. The shots marked a string of 10 Irish points in a row for Keys, and brought her career total to 1,375, surpassing the Notre Dame all-time mark in a losing effort against Dayton last night at the ACC. Marty Strasen details the action at right.

The Observer/Howard Hacker

Irish forward Trena Keys, shown here in action earlier this season, raised her career point total to 1,375 surpassing the Notre Dame all-time mark in a losing effort against Dayton last night at the ACC. Marty Strasen details the action at right.

By MARTY STRASEN

Trena Keys was on a roll. The Notre Dame women's basketball team had opened up a 56-45 lead after a tight first half. But a record-breaking second-half performance by five-point lead were not enough to hold off the Dayton Flyers, who rebounded and handed the Irish a 61-58 loss at the ACC last night.

With 8:37 remaining to play in the game, Keys sank a baseline jumper to give Notre Dame a 46-45 edge. The shots marked a string of 10 Irish points in a row for Keys, and brought her career total to 1,375, surpassing the Notre Dame all-time mark in a losing effort against Dayton last night at the ACC. Marty Strasen details the action at right.

The moment was shortlived, however. After the toilet paper streamers were picked up off the floor and after it looked as though the Flyers would not relinquish the Irish lead, Keys scored on a drive to the hoop with just under a minute to go. The Irish had a chance to pull ahead when Keys pulled down a rebound after a missed Flyers shot on the way to tying the game, 57-56, and 23 seconds to go.
