Professor proposes mandatory AIDS test for U.S. population

By MARY BERGER

A visiting law professor at Notre Dame has proposed mandatory testing of the entire U.S. population to identify the carriers of Acquired Immune Deficiency syndrome or AIDS.

Richard Duncan, a University of Nebraska professor, said such testing would help slow the spread of the disease, which breaks down the body's immune system and often leads to death.

"Currently, there is no public policy attempting to stop the spread of the disease," Duncan said. "Considering effective ways to slow the spread, testing and identification of carriers is the only answer."

Duncan said the test would be confidential and it would be left up to those found to have the virus to "make the appropriate changes in their lifestyles."

Confirmed cases of AIDS victims in the United States, those that are ill with the disease, presently number more than 18,000, according to the federal estimate made by the Center for Disease Control.

Duncan said the number of carriers, those infected with the AIDS virus but not ill with the disease, could be as high as two million at the present time.

"The real problem is not the 18,000 who have the disease, but the two million carriers who do not know they have the virus, have contact with others, and are spreading the disease," Duncan said.

"If the spread of the disease is not checked now," Duncan said, "two to ten million new cases will be exposed in the near future."

Duncan's proposal is detailed in his article in the next issue of the "Journal of Contemporary Health Law and Policy." In this article, he calls for mandatory testing of the entire population of the United States to identify carriers of AIDS.

Duncan noted that the disease is not spread through casual contact but through needles and sexual intercourse. Duncan said he hopes that once an individual knows he is infected, he will refrain from infecting others.

"If this step is not effective, then we would need to reevaluate the situation and consider further steps like the law which prohibit knowing exposure to a person with AIDS, page 3

Phillipine investigator says document lacks credibility

Associated Press

WASHINGTON -- The chief Philippine investigator of deposed President Ferdinand Marcos, said yesterday he does not "give much credence" to a document indicating contributions of $50,000 each in 1980 to the presidential campaigns of Ronald Reagan and Jimmy Carter.

Josvina Salenga told Congress, "I did not give it (the document) much credence because it does not bear any signature or initial," and three congressmen also said the paper should be viewed with caution because its authenticity has not been established.

Spokesmen for both the Reagan and Carter campaigns said they knew nothing of the purported contributions, and Sen. Alan Cranston, D-Calif., who is named in the paper as receiving $10,000, said he was unaware of any such contribution.

Fred Elliott, chief spokesman for the Federal Election Commission, said it is illegal for foreign nationals to contribute money to presidential candidates.

Reagan endorses program to attack acid rain

Associated Press

WASHINGTON -- President Reagan said yesterday he would support a Canadian pressure to join in combating the sources of acid rain, announced his endorsement yesterday of a $50 billion program to develop methods to attack the causes of the problem.

Canadian Prime Minister Brian Mulroney, who came to Washington to win a U.S. commitment to fight against acid rain pollution, called Reagan's statement "a significant step... in the right direction" and told the president, "We now have an agreed foundation upon which we can build.

Reagan, commenting for the first time on the recommendations of special envoy he and Mulroney appointed a year ago to study the problem, said, "I fully endorse the report." His spokesman, Larry Speakes, said the administration "will seek to provide in the future the funding recommended" in the envoy's report that was presented to Reagan and Mulroney in January.

The president for years has insisted the acid rain problem needed further study before a control program could be designed.

The report calls on the United States to embark on a five-year program, with $2.5 billion provided by the government and $2.5 billion by industry, to develop methods of reducing the sulfur and nitrogen oxide emissions from coal-burning plants.

Such plants, particularly in the midwestern and northeastern states, are responsible for most of the pollution that scientists say mixes with moisture in the air and returns to earth as acid rain, damaging lakes and streams and killing fish.

Speaks, in describing the U.S. position, left open the possibility that the government would seek greater industrial support than the 50 percent recommended by the envoy.

Former Reagan Transportation Secretary Drew Lewis and former Ontario Premier William Davis.

At the conclusion of two days of White House talks, the president and his prime minister also signed a five-year extension of the North American Aerospace Defense Command (NORAD) agreement.

Critics said extension of the pact, which Reagan and then-Prime Minister Pierre Trudeau signed in 1981, could lead to Canada being drawn into Reagan's "Star Wars" space defense plan. The Mulroney government has declined to participate in the research program, formally known as the Strategic Defense Initiative, but private Canadian concerns are permitted to sign contracts to help develop portions of the system.

Legislation to formalize the agreement passed the House on March 31 and is expected to win Senate approval soon. Mulroney agreed the launching of the long-sought demonstration program to reduce acid-causing emissions is only the beginning of U.S. and Canadian efforts to solve the problems of acid rain.

"Serious scientific and economic problems remain to be solved," a Senate Banking Committee report said. "But with increased cooperation and good will which has come to characterize the way we now approach our problems, Canada and the United States can make a start toward a solution that we hope will benefit future generations in both our great countries."

Mulroney expressed his gratitude to Reagan for agreeing to endorse the report.
The only good news medium is a responsible, responsive one

Sarah Hamilton
Editor-in-Chief

I wonder if Professor Bob Schmuhl realizes how completely he summarized American journalism for me in one afternoon class last year.

Commenting on the three basic media, Professor Schmuhl explained that radio alerts, television inform, and newspapers explain. By its power of immediate radio can bring a news item to your attention first. Television, also an immediate news source, can offer more details about its advancement. Newspapers have the space to devote to an issue, personality or event; therefore, they act as educator.

A knowledgeable society needs all three components to maintain and function in a democracy. This may sound arrogant, as the press often does, but it is the plain, undeniable truth: the press is responsible in helping to mold, or at least to influence, society.

The news media does not tell people what to think, but it does tell them what to think about. The media sets people's news agenda. If reporters continually fill the pages with tales of urban blight, national attention will turn to the decay of the city. Consequently, it is the editor's task to decide what is news.

In the determination of news and its presentation, editors and reporters must consider several things. Accuracy has to be a given. Readers and viewers should not be left with questions after reading or watching a news story. If a newspaper is not credible, it has no place on the newsstand.

Decision-makers everywhere involve everybody who present what the public wants to know, or what they should know. There has to be a middle ground. Band Aid, We Are the World and Live Aid were respectable, predominantly altruistic actions to help alleviate the worldwide famine. They are a star-studded, flashy media to air the media. But the press had an obligation to dig deeper into the situation. Although it would have been easier merely to interview the celebrities and report the record sales, the news media had to explain how such famine could sweep through Ethiopia and other African nations, leaving human shells and corpses in its wake. That is education. That is the way to bring about improvement.

The value of the news media is that it is there every day, more regularly than the postman. Consequently, people tend to derive their perceptions of public figures, events and issues from these daily sources of information. The press must accept this responsibility without abdication. Although a newspaper, television or radio station may want to offer all the news that's fit to print, broadcast or telecast, the media must consider the public welfare. What is in the best interest of society? The New York Times uncovered the Bay of Pigs invasion of Cuba in 1962. When President John F. Kennedy asked the paper not to reveal it for fear the news could ruin the invasion, the newspaper obliged him. Ironically, Kennedy admitted after the disastrous results of the invasion that he wished the Times had gone ahead with the story. It may have saved lives and international embarrassment.

Just last summer, the major networks conducted a press conference with the terrorists of the TWA jetliner that was hijacked to Beirut. When the reporters were granting the hijackers the same coverage they give elected officials, they were offering legitimacy to terrorism. By offering the terrorists an avenue of communication, did the press think that it was just working to free human beings? The press must ask itself these questions all the time, and face the reality of the answers.

Radio, television and newspapers — responsible news media — are essential in a free society. This Professor Schmuhl taught me. What he left out, however, is that a fourth component is needed. The public. People must be knowledgeable about and actively concerned that the press lives up to its social duties. The best way to do this is to know how the press works and why it works.

While radio alerts and television inform and newspapers explain, people must be listening, watching, reading and speaking up. The only good news medium is a responsible and responsive one.

Spring Break in Fort Lauderdale

Monday, March 24  
Intra-coastal boat trip with dinner. Fee is $10.00

Tuesday, March 25  
Everglades day bike tour with lunch. Fee is $8.00

Wednesday, March 26  
Baseball -- Yankees vs. Kansas City 7:30pm

Thursday, March 27  
Student Union and Alumni Dance & Party

Friday, March 28  
Baseball -- Dolphins vs. Rangers 1:30pm

Saturday, March 29  
Everglades day bike tour with lunch. Fee is $8.00

Depart for campus with boxed lunch immediately following Mass.

Come meet us at the Alumni Association Van located behind the Riviera Hotel! We will be providing:

* A Hospitality Center
* A free WATS line to phone home
* A student locator file to find out where your friends are in Florida
* Orange juice and newspapers provided by St. Mary's every morning
* Shopping center excursion each evening
* Information and message exchange

SEE YOU IN FLORIDA!

Mending a broken heart

A surgeron at the Milton S. Hershey Medical Center in Hershey, Pa., on Monday adjusts the temporary Penn State artificial heart implanted in the chest of Robert Cresswell of Huntington, Pa., during an operation to replace a transplanted donor's heart that Cresswell's body rejected.

AIDS continued from page 1

venereal disease," Duncan said.

However, another visiting law school professor, Joel Newman, described Duncan's proposal as "an enormous invasion of privacy.

"If I am not sure we have reached the point where such a step is necessary," Newman said. "Considering the number of lives which will be saved by such a measure, it is not worth it."

AIDS continued from page 1

strategic Defense Initiative (SDI), will speak in the Air Force ROTC Detachment 225, with the program tonight at 8 in Washington Hall.

Rankine's speech, sponsored by the Around the Corner Club and Air Force ROTC Detachment 225, will consist of a slide presentation and lecture addressing the basis and progress of SDI, more popularly known as "Star Wars."

AIDS continued from page 1

Yet Duncan said it is. "If no one else is exposed, over a quarter million people will die. But if the spread is not halted, millions will die," he said. "We do not want segregation, we want to protect the AIDS victims, but we must protect public health."

Although Newman questioned whether or not the time has come for the action Duncan proposed, Duncan said he feels action at some later point will be too late to be effective.

"In addition to the testing I propose, I feel that no money should be spread and no paths should go unexplored in the search for a vaccine or cure for AIDS," Duncan said.

"Tonight's forum is an excellent opportunity for students to clear up any clouds on the subject," said Captain Roger Overturf of Notre Dame Air Force ROTC. "It's like keeping the cadets: You don't want to avoid asking the tough questions. That's what he's here for."

Overturf said Rankine, the Air Force's senior official involved with SDI, will arrive on campus at 12:30 p.m. to begin a "whirlwind tour" of activities. The brigadier general will speak in the Air Force ROTC Leadership Lab and an Engineering Values Seminar before his presentation to the public. Rankine's itinerary also includes a brief courtesy call with University President Father Theodore Hesburgh, who is widely known for his anti-nuclear stance.

Rankine is a 28-year veteran of the Air Force ROTC program who has been involved with SDI since its conception. In September 1984, Rankine received a letter of appreciation from Reagan commending the brigadier general's significant contribution to the establishment and implementation of SDI.

As special assistant for SDI, Rankine has overall management for all Air Force resources currently being spent in research efforts. Present research follows many different concepts, involving a wide range of both nuclear and non-nuclear technologies.

The program is designed to answer a number of scientific and engineering questions that must be addressed before Congress and the president can decide whether or not to adopt the advanced defensive system. The decision point is expected to be reached sometime in the early 1990s.

Funds continued from page 1

tional contributions were $2,200 pages of documents Marcos took with him to Hawaii last month after his 20-year rule in the Philippines collapsed.

The papers were turned over Tuesday to Salonga, head of the Commission on Good Government, and the House Foreign Affairs subcommittees on Pacific and Asian Affairs, which is investigating Marcos' U.S. dealings.

Salonga appeared before the panel yesterday and said the papers detail what he called Marcos' "unbelievable plunder" of the Philippine treasury. He has estimated Marcos' worth at $5 billion to $10 billion.

Rep. Stephen Solarz, D-N.Y., chairman of the subcommittee, said the Marcos papers led him to conclude that Marcos' government "existed for the primary purpose of looting and plundering the wealth of the nation."

The documents were not released publicly, although Solarz said, "I want to make as much of this public as soon as possible."

Rep. Robert G. Torricelli, D-N.J., told reporters after the hearing that the campaign contributions were detailed in a document dated 1982 and referring to the 1980 campaign.

Torricelli said the documents indicate a Manila-based company named "Mabuhai" transferred "several hundred thousand dollars" to U.S. campaigns.
The Observer announced the selection of 14 students to complete its special program for 1986-87. Anne Culligan, a junior American studies/ALPA major, will continue as advertising manager. Culligan received $557,916 in grants during February for the support of student programs, instruction programs, and research.

First and second year law students have a unique opportunity to apply for the Marine Corps Platoon Leaders Conference (PLC) Law Program leading to a commission as an officer in the Marine Corps and membership in one of the largest law firms in the country, the Judge Advocate Division.

WHAT A MARINE JUDGE ADVOCATE DOES

The Judge Advocate Division functions much like a large civilian law firm and includes about 400 practicing lawyers. Few civilian practices, however, can offer a young lawyer the diversity of assignments that will receive in the Marine Corps. As a judge advocate, you will have the opportunity to work in a variety of fields, such as international, labor, torts, environment, family, and aviation law.

To be considered for the program, you must have a GPA of 3.0 and be in your second or third year of law school.

U.S. doctors say Nicaraguan rebels deliberately attack health centers

Associated Press

NEW YORK — On the eve of the congressional vote on aid to the Nicaraguan Contras, a group of U.S. doctors is charging that the rebels have deliberately attacked rural health centers and killed and kidnapped health workers in violation of international law.

The rebels, who belong to an organization of health workers opposed to U.S. aid to the rebels, said Contra forces have completely or partially destroyed 61 health facilities and forced the closure of 37 others since 1981. Thirty-eight health workers have been killed and 28 others kidnapped, the doctors said.

Their report, prepared after a visit to Nicaragua by 120 American health workers in November, is being distributed to members of the House of Representatives this week, said one of the report's authors, Dr. David Siegel of the University of California in San Francisco.

Today, the House will decide whether to approve President Reagan's plan to give $100 million in military and economic aid to the Contras. A compromise appeared possible yesterday when White House spokesman Larry Speakes said the administration might agree to changes that would delay delivery of military and other aid for up to four months to permit time for diplomatic negotiations.

The doctors' report, following a full-day hearing held last month in Washington, said Contras continue to attack health centers.

"As health care professionals, we are particularly disturbed by the pervasive violations of medical neutrality committed by Contra forces," the doctors said in the report, "Health Consequences of War in Nicaragua.

The report cites a section of the Geneva Conventions of 1949 requiring that medical personnel "be granted all available help for the performance of their duties" and that medical units "shall not be the object of the attack."

In Washington, an official in the State Department press office who refused to be identified said the department had not seen the report and had no comment on it.

Bosco Matamoros, spokesman for a Nicaraguan government supported guerrilla group, did not return telephone calls to his Washington office seeking comment.

Siegel said the attacks on the health centers could not have been accidental.

Accounts of the destruction of health centers were verified during visits to the centers and interviews with sources outside the Nicaraguan government, including the Pan American Health Organization and the International Red Cross, Siegel said.

Contras continued from page 1

postal made him more likely to vote for the $100 million.

In a statement accompanying the draft order, Reagan said he favored a negotiated solution with the leftist Nicaraguan government and that "approval of my request for additional assistance does not mean that a military solution is inevitable."

While the House debated, a fresh appeal to avoid the use of force in the Central American crisis was made in Washington by the eight-nation Contadora group of Latin American countries seeking a peaceful settlement in the area.

Speaking at a meeting of the political council of the Organization of American States, Venezuelan Ambassador Edilberto Moreno said it was necessary to reiterate the obligation of all member states of the OAS to solve their controversies exclusively by peaceful means and to obtain from the use of force directly or indirectly.

Moreno said he was speaking for Argentina, Brazil, Colombia, Mexico, Panama, Peru, Uruguay and Venezuela.

"I urge all members of the OAS to demonstrate their commitment to the Contadora peace efforts," he said.

House Speaker Thomas O'Neill, D-Mass., described the upcoming House decision as a "Tonkin Gulf vote," a reference to the 1964 resolution that enabled President Johnson to introduce U.S. troops in Vietnam.

"I see this leading to war," said O'Neill. "I see a quagmire down there."

O'Neill said the Democrats maintained a 10-to-15 vote lead and had seen "no erosion" over the past week despite an intensive personal lobbying campaign by Reagan.

In the House debate, Republicans charged that defeat of Reagan's proposal would amount to abandoning Nicaragua to communism, while Democrats contended that approving the aid would launch the nation on a course toward war.

"The United States is embarked on a lonely crusade of support for the Contras," said Rep. Lee Hamilton, D-Ind., House Intelligence Committee chairman.
British playboy prince to marry childhood friend called ‘Fergie’

Associated Press

LONDON — The royal family said yesterday that Prince Andrew, whose flings with models and actresses delighted gossip columnists, will marry a childhood friend with red hair and freckles called Fergie.

Buckingham Palace's announcement said Andrew, second son of Queen Elizabeth II and fourth in line to the British throne, is engaged to Sarah Ferguson, daughter of Prince Charles' polo manager, Maj. Ronald Ferguson. Both Andrew and Miss Ferguson are 26.

No date or place was set, but Andrew said he hoped the wedding would be in the summer at Westminster Abbey. His parents were married there in 1947, and it is the site of all coronations since the crown was placed on William the Conqueror's head in 1066.

Prime Minister Margaret Thatcher and Archbishop of Canterbury Robert Runcie, spiritual head of the state Church of England, were among the first to offer congratulations.

Prince Charles, the 37-year-old heir to the throne, whose marriage to Lady Diana Spencer in 1981 was televised around the world, said he "could not be more delighted" by his brother's choice. "I think she is wonderful," he told reporters.

Soon after their engagement was announced, the couple had their first joint interview with British newspaper and television reporters in the prince's study at the Palace.

Andrew and Sarah kissed for the benefit of the cameras, giggled, teased one another and displayed the engagement ring, a large ruby set in a circle of diamonds.

She replied, when asked what they like about one another, "wit, charm... looks." He said, "the same, and the red hair."

After marriage, Sarah will be Her Royal Highness, the Princess Andrew. They probably will become Duke and Duchess of York, the dukedom traditionally reserved by tradition for the monarch's second son.

Andrew, a Royal Navy lieutenant and helicopter pilot, saw action in the 1982 Falkland Islands war with Argentina. Ferguson is a sales executive with a London graphics and printing firm.

Both said they would continue working.

The engagement was announced in a brief statement handed to reporters outside Buckingham Palace.

It said, "It is with greatest pleasure that the Queen and the Duke of Edinburgh announce the betrothal of their beloved son, Prince Andrew, to Miss Sarah Ferguson, daughter of Major Ronald Ferguson and Mrs. Hector Barrantes."

The Duke of Edinburgh is Prince Philip, the queen's husband. Ferguson's parents were divorcing 11 years ago, and her mother, Susan, married Hector Barrantes, an Argentine polo player.

His romantic escapades made newspaper headlines for years and earned him the name "Randy Andy" in the gossip columns. The most notable was a long relationship with American actress Kathleen "Koo" Stark, who appeared in soft-porn films during her early career.

Buckingham Palace announced yesterday the engagement of Prince Andrew, second son of Queen Elizabeth II, to Sarah Ferguson, daughter of Major Ronald Ferguson. The couple, pictured here at Royal Ascot last summer, have been childhood friends since the age of 4 or 5. Story at right.
Carter said in a tape recording: "apartheid economy," the 18-year-old arrested by the activists. The protesters have withdrawn its approximately $100 million in South African-tied stock, which will remain in this office until IBM stops doing business in apartheid South Africa. Specific charges were not immediately available.

Carter, were arrested yesterday in an anti-apartheid protest at a local International Business Machines Corp. office. Providence police arrested the students approximately 30 minutes after they began a sit-in protesting IBM's dealings in racially segregated South Africa. Specific charges were not immediately available.

The protesters had said they would stay in the building until they were arrested or until the company stops doing business in South Africa.

"In a non-violent manner, we will remain in this office until IBM withdraws its approximately $100 million worth of support for an apartheid economy," the 18-year-old daughter of former President Carter said in a tape recording released by the activists.

"We are prepared to be arrested for taking this action," Ms. Carter said. "Though illegal, this action is done in solidarity with those who struggle for freedom... As such, we believe it is justified."

The demonstrators included 13 Brown undergraduates and one University of Rhode Island student. They are members of Brown Free Southern Africa Coalition.

Earlier this month, four coalition members staged a nine-day, water-only fast at the campus chapel in protest of South Africa's segregation policy and the university's refusal to immediately sell its $35.2 million in South African-tied stock.

Coalition organizers said the group planned the civil disobedience in advance, and on Tuesday went to the front office and took a guided tour to check out the layout. The students said they wanted to occupy the office's main computer center on the second floor, but were stopped by security guards in the lobby. Police said they were arrested without incident.

Ms. Carter, the youngest of four coalition members since coming to Brown in September 1985. While a participant in anti-apartheid rallies and other campus protests, Ms. Carter has been quiet. She has declined interviews, and yesterday again declined comment before entering IBM's Charles Street office.

"I really don't want to make a statement on my own," Ms. Carter said. "I'll leave it to the official (coalition) spokesman."

The blonde-haired, bespectacled freshman, who often was seen on the nightly news during her youth at the White House from 1977 to 1981, was arrested in April 1985 at another anti-apartheid protest at the South African embassy in Washington.

Charges in that case were dropped.

Melissa Montgomery, a Carter family spokeswoman in Atlanta, said neither the former president nor his wife, Rosalynn, would comment on Tuesday's arrest. Ms. Carter and four other students on the tape recording attacked IBM for doing business in South Africa.

"Business as usual at IBM means apartheid as usual in South Africa," said freshman Jordan Ash, 18, of Long Branch, N.J.

Michael Dutton, a spokesman at IBM's corporate headquarters in Armonk, N.Y., said: "We respect the rights of students to express their views in a peaceful and lawful manner. However, we believe IBM is not an appropriate target."

Dutton said IBM is opposed to South Africa's policy of racial segregation and is working to change the apartheid system.

Annual revenues for IBM South Africa are approximately $250 million, or approximately 0.5 percent of the corporation's worldwide revenues, he said. The Johannesburg-based subsidiary, which involves sales and service but does not manufacture, employs approximately 1,900 workers, Dutton said.

Told that Ms. Carter was among those arrested, the public relations officer said, "Oh gosh."

Robert Kitchley, Brown vice president for university relations, had a similar reaction. He declined immediate comment.

The students said they also are protesting the Ivy League school's investment policy. The university voted last month for a limited divestment plan that student activists have labeled unacceptable.

Coalition leaders identified the Brown protesters as: Robert Ayres, 22, a senior from San Mateo, Calif.; Jonathan Walsh, 21, a senior from West Newton, Mass.; Margaret Cummings, 21, a junior from Providence, R.I.; Lauren Cushing, 21, a junior from Concord, Mass.; Rebecca Smith, 20, a junior from Rockville, Md.; Greg Gruzyznik, 21, a senior from Mill Valley, Calif.; Nerissa Wu, 18, a senior from Bloomington, Ind.; Eric White, 22, a senior from Stanford, Calif.; Scott Krigsmann, 22, a senior from Tacoma, Wash.; Jack Defandorf, 21, a senior from Lynnfield, Mass.; and Ms. Carter. The URI student was identified as James Monti, 21, a senior from West Warwick.
Cliches mar good music

KRIS MURPHY features writer

Frontier Days, the Del Lords' final album, with its youthful energy, generates a bit of a bittersweet feeling as its ten tracks mark the end of the band's nearly two-decade run. The Del Lords' sound has always been a blend of rock, country, and roots music, and with this final album, they leave us with a parting gift of some of their best work.

Lyrics, however, are a different matter. While the first record had simple lyrics that stood out because of the music, this album's lyrics are more complex. The Del Lords' songs have always been about the joy of living, and this record reflects that mood. The band's sound is trim and tight, with an emphasis on melody and harmony.

P.A. CIMINO features writer

Every two years, the Electric Light Orchestra (ELO) releases another album, and the latest, Electric Light Orchestra: Balance of Power, is no exception. The band has been around for over 40 years, and they continue to impress with their innovative and experimental sound.

ELO has been in existence for over 40 years, and with each new album, they continue to push the boundaries of what is possible in rock music. This album is no different, as it features a mix of old and new songs, as well as some collaborations with other artists.

Classic harmonies and driving music

Record

Johnny Comes Marching Home (out of four)

The second Del Lords' album is a testament to the band's ability to blend various styles and genres to create something unique and memorable.

P.A. CIMINO features writer

Every two years, the Electric Light Orchestra (ELO) releases another album, and the latest, Electric Light Orchestra: Balance of Power, is no exception. The band has been around for over 40 years, and they continue to impress with their innovative and experimental sound.

ELO has been in existence for over 40 years, and with each new album, they continue to push the boundaries of what is possible in rock music. This album is no different, as it features a mix of old and new songs, as well as some collaborations with other artists.

Classic harmonies and driving music

Record

Balance of Power (out of four)

ELO has been in existence for 13 years and after many personnel changes, the newest album, Balance of Power, includes only four members: Jeff Lynne (writer, producer, guitar, keyboards) and Bev Bevan (drums) and keyboardist Richard Tandy. Balance of Power is an interesting album from a few viewpoints. The band's sound is trimmed down from the days of a New World Record and the double set Out of the Blue. These earlier endeavors featured many backing string parts which gave an orchestral feel to the music. Balance of Power lacks these components and follows a more essential trend toward using only guitars, keyboards, and drums.

This trend in ELO's music has been building during the band's last two efforts, Time and Secret Messages. This record also contains an abundance of sequenced programmed, Tandy is a wiz in this area and captivatingly enhances many of the album's 10 songs. As expected, the second side contains the first single, Calling America, which is quickly rising up the charts. It is a light bouncy tune which sticks in the mind from first hearing and also features Lynne's creative lyrics. Talk is cheap on satellite, but all I get is static. Information I'm still here, redial on automatic.

Unfortunately, the song employs the same simplistic chord progression used in ELO's last two top ten singles (Hold On Tight and Rock 'n Roll Is King) and it is sad to see that Lynne must rely on banal means to create hits.

The first side of the record is awash with captivating melodies. The quirky Heaven Only Knows opens the side with full harmonies and a colorful chorus. The second side's Groovin' (out of four)

The second side is somewhat impediment to comparison to the first. Although it has "Calling America" and the equally jumpy but shallow, "Send It," the side suffers from three poor songs. In each of these there are spots of promise, however they are overshadowed by plodding dry lyrics and melodies. "Send It," ends the side with intrigue echoing harmonies and a rollicking runaway train-type rhythm.

Thursday, March 20, 1986

By ED JORDANICH

Napoleone's 1986 outdoor track season begins this weekend in Tucson, Ariz., at the Willie Williams Invitational, which will be the first of two meets over spring break, as the Irish will return home to host their own meet the following Saturday, March 29. Saturday will mark the first visit to the Tucson event for Joe Plane's team. Entering his 11th season as the Irish head coach, Plane's high hopes for this season's squad are fueled by anticipation of a quick start.

"The Willie Williams will be a great track meet," said Plane. "Arizona, BYU, Illinois and Notre Dame will all be competition, and they all have excellent programs for better seedings in later meets, and our people in the field events will finally get outside to show the public their stuff."

"For example, if Jim Tyler runs the 1,500 in 3:44-3:45 he would qualify for the NCAA's. It will be a non-scoring meet and I think this weekend we won't have the pressure of team stuff, It will be good preparation for the big stuff in April."

Napoleone's all-American two-mile indoor runner will get an immediate test on the outdoor surface from Napoleone's squad of young runners, but it will not be the only challenge.

"Arizona has a great group of middle distance runners," said Plane. 

"It will be treated by an independent medical facility and be required to submit to random testing for the remainder of the season and the off season."

According to the proposed plan, approved unanimously by the executive directors of the NFLPA on Saturday, second-tier and off-season offenders must forfeit a paycheck for one game.

If a player is tested positive for the drug use three times, he would be suspended from the league and could appeal for reinstatement after one year before a joint committee made up of NFLPA management and medical officials.

Holtz’s ND debut to be televised as ABC announces TV schedule

Associated Press

NEW YORK — Lou Holtz’s first game as coach of the Notre Dame football team will be nationally televised on ABC, the network announced yesterday. The Sept. 13 home game against Michigan will be televised at 3 p.m. EDT (2 p.m. EST).

Defending national champion Oklahoma will open its 1986 season on Sept. 6 against Rose Bowl king UCLA as part of a day-night college football double-header, ABC also announced.

The UCLA-Oklahoma contest in Network Coliseum, originally was scheduled for Sept. 13. Instead, it will be played a week earlier, with ABC-TV’s national telecast beginning at 3:30 p.m. EDT, and the kickoff at 3:30.

Oklahoma, 11-1, captured the 1985 national championship by defeating Penn State 23-10 in the Orange Bowl. UCLA, 9-2-1, finished seventh in the Associated Press rankings following a 45-28 rout of Iowa in the Rose Bowl.

On the night of Sept. 6, ABC will televise Florida State at Nebraska at 8 p.m. EDT. Both teams were 9-3 a year ago, with Florida State finishing 15th after defeating Oklahoma State 34-23 in the Gator Bowl and Nebraska winning up No. 11 after losing to Michigan 27-23 in the Sunbelt Fiesta Bowl.

In order to switch the Florida State-Nebraska game from Sept. 13 to Sept. 6, the University of Toledo agreed to move its game with Florida State from Sept. 6 to Aug. 30.

The Michigan-Notre Dame game on Sept. 13 will air at 3 p.m. EDT, with the kickoff at 3:30. Michigan, 10-1-1, finished second nationally last year. Notre Dame was 5-6 and Coach Gerry Faust’s contract was not renewed.

ABC, currently in the second of a two-year contract with the College Football Association, said it will televise a game every Saturday from Sept. 6 through Dec. 6.

Most games will be announced 12 days in advance, although there are a number of exceptions when the network can withhold its announcement until the Sunday or Monday before a game.

NCAA sweet 16 to get under way; four from ACC and SEC still alive

Associated Press

ATLANTA - Georgia Tech is the odd team out — but the sixth-ranked Yellow Jackets will feel right at home tonight in the Southeast Regional semifinals of the NCAA basketball championships.

Georgia Tech, 27-6, will play Louisiana State, 24-11, in the second semifinal at the Omni in Atlanta, after third-ranked Kentucky, 31-3, meets Alabama, 24-8. LSU, Kentucky and Alabama are from the Southeastern Conference.

Georgia Tech left the SEC 22 years ago and now belongs to the Atlantic Coast Conference.

Also tonight in the West Regional semifinals at Houston, Arkansas, 21-10 (fourth in the SEC team), plays Nevada-Las Vegas, 33-4, and North Carolina, 28-5, faces Louisville, 28-7.

The Omni isn’t Georgia Tech’s home court — the Yellow Jackets normally play on campus at the 8,000-seat Alexander Memorial Coliseum elsewhere in Atlanta — but Coach Bobby Cremins says his team still has the home-court edge.

“We won’t have to travel and we should have good fan support,” Cremins said.

Tech has third-team All-American Mark Price — and Cremins no doubt wishes he also had LSU sophomore John Williams. Price leads Tech in scoring with a 17.3 average and Williams is averaging 18.3 points and 8.6 rebounds.

Cremins called the 6-foot-8, 237-pound Williams “a young Magic Johnson. He is a superstar.” He can do anything — rebound, assist, score. He is truly, truly an incredible basketball player. You’re not going to be able to stop him. The only thing you can hope to do is control him.”

The Yellow Jackets are big favorites to turn back LSU. Kentucky is only a slim favorite over Alabama, despite the fact the Wildcats have beaten the Crimson Tide three times this season and have won 75 of the 100 games between the two schools.

North Carolina was No. 1 in the nation most of the season, before guard Steve Hale went down with a collapsed lung and took the Tar Heels with him. Now that he’s back, North Carolina, a slender favorite against Louisville.
Choosing a long distance company is a lot like choosing a roommate.

Living with someone for the first time can be an "educational" experience.

And living with a long distance company isn't any different. Because some companies may not give you all the services you're used to getting from AT&T.

For instance, with some companies you have to spend a certain amount before you qualify for their special volume discounts. With some others, voice quality may vary. But when you choose AT&T, there won't be any surprises when you move in. You'll get the same high-quality trouble-free service you're used to.

With calls that sound as close as next door. And discounts off our Day Rate on your state-to-state calls.

With savings of over 50% during weekends until 5pm Sundays, or nights from 11pm to 8am, Sunday through Friday. And 40% discounts evenings between 5pm and 11pm, Sunday through Friday.

With AT&T, you'll continue to get services like immediate credit for wrong numbers and collect calling, and long distance operators to help you anytime there's a problem on the line.

So when you're asked to choose a long distance company, choose AT&T. Because whether you're into Mozart or metal, quality is the one thing everyone can agree on. Call 1 800 222-0300 for more information or to choose AT&T.

Saint Mary's softball season starts with trip to Florida

By KELLY PORTOLESE
Saint Mary's Sports Editor

When a softball team loses seven starters from a 23-9 1/2 team, it's a pretty good bet that the following season will be a rebuilding one. Not so, for the Florida-bound Saint Mary's softball team. With eight players and as many returners, Head Coach Scott Beisel is looking forward to molding the old with the new and thinks he will come up with just the right combinations to succeed this year.

"We're still experimenting," said Beisel. "The team may not realize its potential yet because of all the combinations we've been trying out. We've got a strong group right away, we won't know what the others can do until the season starts." Beisel, in his seventh season with the Belles, sees many players' abilities to adapt to several positions as a definite plus.

"We added strength to our ball club with our versatility," said Beisel. "A lot of people can play at two or three spots if injuries become a problem we won't be at such a loss." Assistant coach Sue Becker has also been pleased with the team's progress thus far.

They are very coachable," said Becker. "Even when we've wanted to make the slightest adjustments they've been very cooperative and enthusiastic."

One player who has got a position pretty well locked up is pitching ace Cathy Logston. The senior finished last season with a sparkling 17-3 record and credits Beisel with giving the team a positive outlook for the upcoming season.

"Some coaches would have bowed out, but he took it as a challenge and a lot of potential," said the Sewickley, Pa., native. Logston should have a solid pitching staff to back her up this season, according to Beisel.

"We will be stronger this year than last," predicted Beisel. "We should have more consistency and reliability."

Katy Boldt, in her fifth year, because of a year abroad, has made great improvements with her speed and control on the mound. Sophomore Betty Mihalko, who saw a lot of pitching action last season, also will put in some time at second base and in the outfield.

Newcomers Tammy Shiel and Mary Maloney are also working hard at picking up the fundamentals on the mound and should make solid contributions from the first day.

Rounding out the battery should be junior Janine Adams, who had never caught a game before arriving at Saint Mary's and yet managed to earn all-district honors the past two years while batting above .500 through most of the season.

Freshman Jeanette O'Neill, who is doubbling on the track team, is also looking strong at the catching position.

Last year's first baseman, Barb Theris, graduated with a .987 fielding percentage and will definitely be a tough act to follow. Lori White and Julie McNish will most likely fill the void while contributing in the outfield as well. Junior Kris Panattonia, who played second last year, is also working at the shortstop position, while classmates Marge Reynolds and freshman Laura Danich are practicing at third. Sophomore Diane Schroeder, who saw limited action last year, has improved a great deal and also should put in some time at second base. Sharon Hegg is also a junior but in her first year with the team because of her sophomore year abroad and other commitments freshman year.

"She has improved a great deal since the beginning of tryouts," said Beisel. "She will be a definite utility-type player for us in the outfield and infield." In the outfield, Beisel will also look forward to freshmen Ann Credi and Trish Tierney for their speed and accurate throwing ability.

Because of the recent upsurge in weather the Belles have only been able to get in one hitting practice outdoors, and a game scheduled with Notre Dame was rained out yesterday. As a result, Beisel doesn't have much of an early indication of his team's offensive capabilities.

But the South Bend weather will no longer plague the Belles this month because tomorrow they will head south with a final destination of Florida to play the University of Tampa at Kissimme, Fla., and Bethune Cookman College at Daytona.

Before the team gets out of Indiana, however, it has a date with IUPUI, the district's number one team the past few years. According to Beisel it will be a "real test," especially since IUPUI will just be returning from their spring trip and have 14 games behind them.

But it won't be all work and no play. Once they reach Florida, a trip to the beach and Disney World is also planned.

On the way home the Belles will stop in Louisville, Ky., where they will take on Indiana University and Bellarmine College of Louisville.

"The trip will get us together as a team," said Boldt. "It will help us get to know each other both on and off the field."

When the Belles return they will head right into NAIA play. And if their level of play matches their enthusiasm, another successful year is in store for the Saint Mary's softball program.
Tennis travels to Texas

Coach Fallon starts 30th year

By RICK RIETBROCK
Sports Writer

The Notre Dame men's tennis team will embark on an eight-match road trip to Texas over spring break, with Head Coach Tom Fallon once again leading the charges. Fallon, in his 30th season as men's tennis coach owns a career record of 467-180.

This record is particularly impressive given that the tennis team is allotted only two scholarships, which keeps some of the top players with pro aspirations from coming to Notre Dame. Fallon says that may change, however, with a new construction of a new indoor tennis facility that is scheduled for completion in the fall.

"With the new facility, we will be able to offer year-round tennis and, therefore, we will be able to attract better athletes," Fallon says. It's hard to attract players from warmer weather states when our only indoor courts are being shared with other organizations.

The new facility will aid a program that has already enjoyed tremendous success under Fallon. His teams have enjoyed eight 20-win seasons and have had only one losing campaign. It will also be a symbol of the amount of change that Fallon has seen during his tenure.

"When I got the tennis coaching job, I was also the wrestling coach," he recalls. "The end of the wrestling season and the beginning of the tennis season overlapped. I had both teams work out together."

"Tennis teams were known for being in great physical shape in those days," he notes.

"For tennis practice, I had to stretch elastic to make lines for the court in the old Fieldhouse, and we had to schedule practice around the basketball team as well as the other sports practicing there," he says. "It was quite a zoo."

But Fallon and his troops managed to handle consistently successful seasons. In fact, Notre Dame is the only school from the Midwest to have won at least a share of the national championship twice. Fallon's championship squad of 1959 was particularly awarding to the 1942 Notre Dame graduate.

"We won the championship with serious students on the team," he says. "The members of that team do doctor, teachers, psychologists and judges today. That was before the lure of money and professional opportunities controlled the sport."

Just as he enjoys the success that the 1959 championship team has attained, Fallon also looks forward to the reunions that the tennis team holds every two years to "talk with his former players, and to see what successful people they have become."

Fallon currently holds the rank of associate professor and is director of activities at the Rockne Memorial. Fallon says he has been fortunate to coach for 30 years, but it is obvious that Notre Dame is far more fortunate to have the benefit of his services.

Even though the upcoming road trip does not feature any powerhouse teams, Fallon sees the teams that the Irish were able to schedule as quite formidable in their own right.

"We would like to play the toughest teams like Texas and TCU College, but the big teams usually schedule only teams that will win three or earn a bid to the NCAA tournament," he says. "They don't want to get upset. Nevertheless, we have a good schedule of teams from the second echelon with Texas-San Antonio, Pan American University, Rice, Southwest Texas University and Baylor being the toughest."

Other teams the Irish, featuring four freshmen, will face on the road trip are St. Mary's University, St. Edward's University and Texas Lutheran.

Irish men’s fencing team captures NCAA crown

Four named All-Americans as DeCicco snare 3rd title

By MARTY STRASSEN
Sports Writer

It’s not that Notre Dame women’s basketball coach Mary DiStanislao doesn’t like being ranked No. 1 in the nation. But she sees that rankings don’t mean a thing in post-season play.

“Tina wants to win a tournament, which begins tonight in Amarillo Texas, Di Stanislao said.

The Irish are the No. 1 seed in the NCAA Tournament. They just don’t take ranking and 25 cents only get you a cup of coffee. We can’t afford to look past anyone.”

Notre Dame’s road to the NCAA title begins tonight against a quick team from the U.S. International, which is ranked eighth in the eight-team tournament. But once again, rankings can be deceiving.

USIU has the West Coast Athletic Conference with a 23-7 overall record and an 11-1 conference mark, averaging over 84 points per game with a devastating run attack.

“U.L. International is a running team much like Detroit,” says DiSta.

“Also, they’re second in the nation in point production and they’ve got an extremely quick and talented player named Toya DeCree. We expect a lot of running out of Notre Dame.”

DeCree, a 6-1 senior, averaged over 21 ppg. and scored nine rebounds per contest. Freshman guard Sonya Carter chipped in over 16 ppg. during the season while sophomore Fiona Murray, 6-4, and Amanda Spay, 6-2, each averaged double figures.

And USIU was running up the scoreboard all season long. Notre Dame, however, finished seventh in field goal percentage defense as they held opponents to under 38 percent.

The title was Notre Dame’s third straight in fencing in 10 years. When we lost John Edmondson, 151-141, to win the 1986 Tournament, she just doesn’t take ranking and 25 cents only get you a cup of coffee. We can’t afford to look past anyone.”
