Two resident assistants lose jobs for furnishing alcohol to minors

By MARK PANKOWSKI

News Editor

Two Notre Dame resident assistants have been dismissed from their jobs after they were cited for furnishing alcohol to minors at an off-campus party. Kurt Petersen of Keenan Hall and Anne DeWald of Lewis Hall said they were dismissed Tuesday by Associate Vice President for Residence Life, John Goldrich.

The decision came after state police issued citations to Petersen and DeWald at a Friday night party.

Petersen and DeWald said they received the citations because an undercover officer had watched them collecting money and giving cups to party goers, some of whom were minors. Those who purchased the cups could then fill them with beer.

Both Petersen and DeWald said they were disappointed that the citations weren't unwarranted.

"We know as RAs that we are representing the University in a special way," said Petersen. "So we were very surprised.

"But the punishment they gave us didn't fit the circumstances," he said.

Assistant DeWald: "We were hoping (Goldrich) would take our character and past behaviors into consideration.

Both said they sympathized with Goldrich's decision.

"It's a tough decision," said Petersen. "I don't think we're going to appeal.

"Goldrich said it was the most difficult decision of his life," said Petersen. "He said he wasn't trying to make an example of us but that we were being given a punishment that we deserved.

Goldrich and Vice President for Student Affairs Father David Tyson were out of town and could not be reached for comment.

Petersen and DeWald said they had collected money for about a half hour an hour when the police arrived at the house, located on the corner of Douglas and Ivy.

About 200 people were still at the party, but few wanted to pay for a cup. They said, up to that point, neither Petersen nor DeWald believed they had done anything illegal. They said, "We made a bad judgment," said Petersen. "We didn't realize what we were doing was illegal."

He added that they never thought that those at the party were underage.

State police said they ticketed a large number of minors for consumption of alcohol at the party. It was unclear exactly how many.

Petersen and DeWald's dismissals mean that they must move out of the rooms provided to them as resident assistants, they said. In addition, they'll no longer receive free room and board.

Petersen and DeWald said they haven't decided whether they will remain in the dorms.

Goldrich's decision to dismiss the two came during the last of three meetings with Petersen and DeWald. They said that the hall director, Brother Matthew Mencar and Assistant Vice President for Student Affairs Sister Jean Lenz also attended the meetings.

Petersen and DeWald said they cannot appeal Goldrich's decision at the University level. "It's not like student and University," Petersen said. "It's an employer and employee relationship. So there's no mode of appeal except the courts.

Petersen and DeWald said the party was not publicized; there were about 15-20 police officers inside and the line outside.

They said the long lines at the two kegs kept the drinking under control. Petersen and DeWald added that neither of them drank any alcohol at the party. "All I had was a glass of milk," said Petersen.

Indiana State Police, state excise police and Notre Dame Security were involved in the raid, they said.

DeWald said when the officers arrived, the undercover officer at the party grabbed her arm and led her to a Notre Dame dining center. "The Security guard was very nice and reassured me that Notre Dame would never find out," she said.

Director of Security Rex Bowles said that the Security officers were only there to observe.

Despite the citations, Petersen and DeWald said they still believe they did not violate resident assistant duties. "We feel this mistake would not hinder our ability to do a good job," said Petersen.

But he added, "We know the loss of the job is not the end of the world."

Two Palestinian civilians were killed as Israeli gunboats intercepted a rubber dinghy carrying Palestinian guerrillas on a mission to attack Israel, Israeli and Palestinian officials said.

Said 13 other civilians were injured in the air raid, which began just after 6 a.m.

It was Israel's eighth air raid in Lebanon this year. Israeli officials said it was not linked to Saturday's killing of 21 Jews in a synagogue in Istanbul, Turkey, which Israeli has vowed to avenge. Turkish officials have said they do not know who was responsible for that attack, but thought the two terrorists, who were blown up by their own grenades, were Arabs.

The Israeli command in Tel Aviv said the pilots who carried out the Sidon raid reported accurate hits on a warehouse used by the Popular Struggle Front to store weapons.

Both Petersen and DeWald said they didn't believe the raid was targeted at them.

Petersen and DeWald said the raid came after four of its fighters tried to board a seaborne attack on the Israeli coastal town of Nahariya.

Both Petersen and DeWald said they did not believe the raid was targeted at them.

The Palestinian Liberation Front said an Israeli gunboat intercepted the guerrillas' rubber dinghy off the south Lebanon town of Sareefand, about 20 miles north of Israel.

The Israeli command in Tel Aviv, an Israeli military official confirmed the infiltration attempt and shootout. The official, speaking on condition of anonymity, said the air raid was in retaliation for the attempted attack.

A Palestinian Liberation Front source said that after the gunboat intercepted the dinghy, the Israelis 'called in helicopter gunships to support the forces that now control all over Sidon and Sareefand. Our guerrillas then came under fire from the gunboat. They fled back and changed course to return to Sareefand."

Sidon police said the Israeli jets shot down in the Mediterranean and struck three times at the, the ammunition depot and other Palestinian targets in the industrial district.

Petersen and DeWald said two siblings, aged 32 and 40, and a 16-year-old boy were killed.

Civilians killed as Israelis attack

Associated Press

SIDON, Lebanon - Israeli warplanes attacked a Palestinian arms depot yesterday, killing at least 21 civilians in a bomb attack on an industrial district on the edge of this town. More than 90 shops in an industrial district were blown up by their own explosives, Israeli and Palestinian officials said.

Said 13 other civilians were injured in the air raid, which began just after 6 a.m.

It was Israel's eighth air raid in Lebanon this year. Israeli officials said it was not linked to Saturday's killing of 21 Jews in a synagogue in Istanbul, Turkey, which Israeli has vowed to avenge. Turkish officials have said they do not know who was responsible for that attack, but though the two terrorists, who were blown up by their own grenades, were Arabs.

**Taking a bite out of OC crime**

Think of the Notre Dame student who made every attempt to protect his newly bought stereo from being stolen from his off-campus residence.

He smuggled the sleek Japanese speakers through the back door at midnight, so nobody would see them. He kept the volume of his stereo set at a reasonable level most of the time, so nobody outside could hear it. And he bought a huge padlock for his bedroom door so nobody could get to his system.

The secrecy, the attempts to stay inconspicuous and the padlock didn’t help. The student placed the box which the stereo had come in all in the end of his driveway with the rest of his trash. Some fellow walked by and saw “S-A-N-Y-O” written on the box, and three days later his new stereo system was gone.

It seems not even padlocks and window bars are 100 percent effective in deterring burglars from cleaning a house out. If a criminal knows there’s a pearl inside, he’s likely to try to crack the shell.

Having a stereo system taken from your room-speakers, amplifier, turntable and all does not happen very frequently on campus. Once every 30 years, possibly. But it can and often does occur off campus. Those of you who are dying to migrate to the Great Land of Freedom Beyond the Shadow of the Golden Dome, know well that life there is more than key parties and no parities. Living off campus entails much more.

Right at the top of every off-campus student’s list of realistic concerns is security. Sgt. John McCullum of the South Bend Police Department said he had the big problem right now is the student’s lack of awareness on how to deal with crime. Most students at Notre Dame and Saint Mary’s have never put a great deal of worry into the subject of security at home. At home, the parents took care of locks and keys. In the dorm, the air traffic controllers will be locked for drug use once a year as part of their annual physicals.

Placement night for all finance, management, and marketing seniors will be tonight at 7 in the library auditorium. Career and Placement Services strongly recommend that these students attend.

Sexual Violence will be the topic of discussion on WVTI AM’s Campus Perspectives tonight from 9 to 10. Director of Residence Life and Housing, Patricia Raasmyer and Saint Mary’s student Sarah Cook will be interviewed by Lynne Strand. Listeners may call 259-6400 with questions and comments.

Two air traffic controllers in Anchorage, Alaska have been cleared of allegations of drug use once a year as part of their annual physicals.

Medical and legal issues of sexual assault will be the focus of tonight’s sexual violence seminar sponsored by Saint Mary’s student government. A panel discussion will speak at this free event set at 7:45 p.m. in Lehans Hall’s Stapleton Lounge. The Observer

Shoves, shouts and flying fists interrupted a standing-room-only City Council meeting in Hialeah, Florida, last night, as the council voted 4-3 Tuesday to allow the D.A.V. swap meet in Hialeah to stay open until the end of the year. Last month, the city had voted to close the bazaar operation in November. Associated Press

Nancy Reagan will receive an award next month from Catholic University of America for her efforts in fighting drug abuse.

Insurance difficulties to hurt student events

By JOE MARKETY
Staff Reporter

Student-organized events may run into problems in obtaining University sanction because of insurance liability, according to Senior Class President Dave Miklos.

Miklos said this policy leaves student organizers of unsponsored events in a bind. Since the event would not be backed by the University, the liability would rest on the shoulders of the events’ organizer, he said.

Miklos, who is in the midst of organizing a class ski trip to Chicago, said the problem hopes to come to some agreement whereby students who wish to participate in an event not sponsored by the University would sign a waiver release form. “This is a procedure already used for some class events, like the ski trip,” he said. By signing the release, the student would claim full responsibility for his or her actions and would agree in the case of an accident not to sue against the University or the student organizers of the event, he said.

Superpowers discuss early release of detained journalist

Associated Press

WASHINGTON President Reagan said last night he received a reply from Soviet leader Mikhail Gorbachev to his request for the early release of journalist Nicholas Daniloff, who is being held by the Soviets on spy charges.

But Reagan gave no details of Gorbachev’s response, saying, “I don’t want to rock the boat.”

Reagan had asked Gorbachev for Daniloff’s release on grounds that the U.S. News & World Report correspondent was not a spy.

Reagan had asked Gorbachev for Daniloff’s release on grounds that the U.S. News & World Report correspondent was not a spy.

Earlier yesterday Daniloff said Soviet investigators liked the idea of releasing him to the custody of the U.S. ambassador pending his trial on spying charges, a colleague said.

Soviet authorities made clear, however, that the release would have to be reciprocal, the colleague said.

Daniloff’s wife, Ruth, has alleged that Soviet authorities framed her husband in response to the Zakharov arrest.

KGB investigators suggested to Daniloff that for him to be freed pending his trial “was a good idea,” and that what was needed is “a cooling-off period,” Trimble quoted his colleague as saying.

Daniloff was arrested Aug. 30 and indicted Tuesday. If convicted, he could face the death penalty. He has denied the allegations.

He made his comments in a phone call from Lefortovo Prison to his wife who was at the office of U.S. News & World Report.

Investigations of the KGB secret police were with Daniloff when he placed the call. Trimble, with the consent of the Daniloffs, listened to the conversation at the office of the magazine for which he works.

Daniloff also said the best way to defuse U.S.-Soviet tensions over his arrest would be to release both him and Zakharov pending their trials, Trimble said.

“What is needed is a cooling-off period. There is no need for a swap. Let’s first get ourselves into a more comfortable spot, say living in Spago House, then go from there,” Trimble quoted Daniloff as saying.

Spago House is the residence of U.S. ambassador Arthur Hartman.

Mrs. Daniloff, who visited her husband Tuesday, said he didn’t want his case to thwart attempts to improve ties between Moscow and Washington or become an impediment to holding a superpower summit later this year.

President Reagan wrote to Soviet leader Mikhail Gorbachev earlier this week and warned that relations between the two countries are seriously threatened by Daniloff’s detention.

“I think what he was saying was let’s cool down the situation and one way to deal with the situation is to let both of the quote-unquote spies out of jail into the custody of their respective ambassadors,” Mrs. Daniloff said.

Under such a deal, the diplomatic missions would serve as guarantors that the defectors show up for trial.

Mrs. Daniloff said she did not think her husband had changed his stand against trading him outright for Zakharov.

U.S. officials have ruled out a deal to free Daniloff in exchange for Zakharov.

Cougar attacks child

Zoo keeper Mark Yelverton, left, and zoo director Jake Yelverton back Sheeba, an 18-month-old cougar, into a cage at the Louisiana Purchase Gardens and Zoo Tuesday after the animal attacked a seven-year-old boy. The cougar, kept as a pet by a neighbor, tore loose from its backyard chain and attacked the boy, tearing away most of his face.

Chief of Lions Club for Lebanon kidnapped in Moslem west Beirut

Associated Press

BEIRUT, Lebanon - The top official of the International Lions Club for Lebanon and Jordan was kidnapped yesterday in Moslem west Beirut, one day after an American educator was abducted on his way to play golf.

Police said three men armed with silenced automatic pistols and riding in a white-colored BMW Interceptor Lions Club governor Victor Kenou at 9:35 a.m. near the French Embassy compound on Rue Clemenceau.

Two of the assailants forced Kenou out of his white Mercedes-Benz at gunpoint and helped him into their car, police said.

Kenou, 50, heads the 39 International Lions Clubs in Lebanon and Jordan. A Syrian-born Christian, Kenou is a naturalized Lebanese citizen who runs a prosperous import-export business in both the Moslem and Christian sections of the Lebanese capital, according to police and family friends.

His wife, Rose, who lives in west Beirut, told The Associated Press by telephone, "Contacts are under way at the highest levels to get his immediate release. I am hopeful."

The Lions Clubs are among several social institutions still operating despite Lebanon's 11-year civil war.

Kenou's abduction, like the kidnapping of American educator Frank Herbert Reed on Tuesdays, was the latest foreign challenge to Syria, which sent troops into west Beirut in July in an effort to restore order and end the deadly brawl spawned by warring Moslem militias.

Police said they have no clues to either man's whereabouts.

Reed, 53, director of the Lebanese International School in west Beirut, was the first American kidnapped in Lebanon in 15 months. A school associate said Reed has lived in Lebanon about eight years and converted to Islam.

His wife, Fahima Dalati, was born in Syria.

The kidnappers feed Reed's Lebanese driver a few hundred dollars in ransom that he will present to the Sisters of The Holy Cross, as well as the American embassy, the Ministry of Interior, and the leadership of the Christian churches, as a forerunner among private religious and charitable organizations to get the kidnappers' release.

In March of last year all Saint Mary's was kidnapped in west Beirut, one day after an American educator was abducted on his way to play golf. Police said they have no clues to either Reed's whereabouts.

Jaykowski said the applicants go through a series of interviews, and then recommendations are passed on to Hickey in turn passes on his recommendations to the Sisters of The Holy Cross, who make the final appointment.

Jaykowski was notified September 5, and the other seven application cards were delivered to Hickey September 6.

According to Jaykowski, the student regent must be a person who can represent Saint Mary's well. She must be one who has demonstrated through leadership, an understanding of and appreciation for the Catholic character of the College, as well as its women's and liberal arts dimension.

"Involvement is the key credential," said Jaykowski. "The more qualified she is." She said Reed's fit that category quite well.

In addition to being a member of The Board of Regents, Hettel is the Librarian for the College, as well as a member of the Board of Directors at the College and will participate in student affairs issues and concerns in addition to academic and development of fiscal issues.

"I was pleasantly surprised," said Hettel, when informed of her appointment by Saint Mary's President William Reed. "I am very honored and look forward to working with all the Regents," she said.

Jewish mourners pay last respects to 21 victims of terrorist massacre

Associated Press

ISTANBUL, Turkey - In the temple still stained with the blood of the dead, more than 1,000 mourners said final prayers yesterday for the 21 victims of a terrorist massacre at Istanbul's largest synagogue.

Women, their heads covered in black shawls, wailed as rabbis read Jewish prayers, including one asking revenge for the death of innocent people and another normally said during war. "Those worshippers who lost their lives had not even the time to realize and understand why their lives had not even the time one asking revenge for the death of innocent people and another normally said during war. "Those worshippers who lost their lives had not even the time to realize and understand why they were killed," said Jak Veisdil, legal adviser to Istanbul's chief rabbi.

"As a form of violence or aggression could have been so inhuman, so insane, so cruel," he said in his eulogy to the victims of Saturday's submarine gun attack at Neve Shalom synagogue, "It is hard even to think about the motives of this madness and barbarism."

With helmeted riot police standing in front of the lectern, Israel's chief Sephardic rabbi, Mordechai Eliyahu, somberly read out the names of the 31 men gunned down by terrorists during prayers Saturday. Signs of the carnage remained: blood and small pieces of flesh on walls and ceilings, blown-out windows in the synagogue dome, streaks of black soot next to the double doors of the cabinet that holds the Torah, or sacred scrolls.

Outside, police linked arms to barricade the streets around the 50-year-old synagogue, the largest of 15 in Istanbul. About 5,000 people gathered to watch as 19 plain, wooden coffins were loaded onto green funeral trucks for the 6-mile procession to a Jewish cemetery in the residential district of Uskudar.

Two of the dead were buried in Israel Tuesday. Religious and diplomatic officials from the United States, Israel, England, France, West Germany, Italy, Greece and Sweden attended the funeral. The Catholic, Protestant, Greek Orthodox, and Armenian Orthodox churches also sent representatives.

The one-story synagogue on a hillside in the residential Uskudar district, was built in 1951.

Relatives pounded on the 19 coffins as they were placed on tables draped with black cloth in front of hundreds of widows. After a brief prayer reading, the caskets were lowered by rope into individual graves dug side by side in a semicircle.

Egypt-Israel agree to meet for summit

Associated Press

CAIRO, Egypt - Officials announced that the leaders of Israel and Egypt will hold the first summit meeting between their two countries in five years today after negotiators reached a last-minute accord on a formula to end a border dispute.

The meeting between Israeli Prime Minister Shimon Peres and Egyptian President Hosni Mubarak is to take place in the Egyptian port city of Alexandria.

They will meet less than 12 hours after Israeli and Egyptian negotiators signed an agreement on international arbitration of their lingering dispute over Tabo, a beach north of Israel's Sinai Peninsula. Mubarak had demanded a settlement on Tabo before meeting Peres.

Egypt's foreign minister, Essam Abdel-Meguid, said, "We hope that the upcoming summit between President Mubarak and Prime Minister Peres can end with positivity, which will help to push all efforts to reach a comprehensive and durable peace in the Middle East."

He said the arbitration process itself would begin in about a month.

Negotiating teams reached the agreement after days of intense discussions, including talks throughout yesterday.

Mubarak's Cabinet unanimously gave final approval to the agreement at about midnight yesterday.

David Kimche, co-chairman of the Israeli delegation, said his government had also approved the document.

Asked if the summit would be held today, Kimche said: "Yes. Prime Minister Peres is arriving today."

In Jerusalem, government sources said Peres was convening his Cabinet for a pre-summit session at 8 a.m. (2 a.m. EDT) and would fly to Alexandria Egypt's Mediterranean port, directly afterward.
Utah senator donates left kidney to long-suffering diabetic daughter

Associated Press

WASHINGTON - Sen. Jake Garn donated his left kidney yesterday to daughter Susan Garn Hone, in what doctors called "an extremely successful" operation that left the senator "proud and happy." "The best of our expectations have been met and everyone is fine," said Dr. Ian Maciariello, who transplanted one of Garn's kidneys into a 53-year-old daughter in a nearly six-hour operation.

An associate surgeon, Dr. Ian Spence, removed Garn's left kidney after a time-consuming incision he made for an old daughter in a nearly six-hour operation. He smiled and seemed very self-satisfied, and he added a victory over diabetes who suffers from a kidney disease which extended from the time he was a boy.

"The senator is awake, has a bit of a grin on his face...He seems very self-satisfied, and happy and peaceful," Heilrich said. The doctor added that he had spoken to Garn at length in advance of the surgery about Garn'scondition and the senator's gratitude that he was able to donate the kidney.

However, experts are unsure whether, if anything, the news should change in their portrayal of suicide.

"I don't think we should not tell the public that the suicide rate is going up. That would be one interpretation," Heilrich said.

Although the studies conclude that teen-age suicides increase or they mention the number of teen-age suicide attempts in the New York City area, they didn't follow the programs or movies dealing with suicides. Rather, they noted that the victims had seen the programs. Dr. David Phillips of the University of California at San Diego found that the nationwide self-reporting rate in girls was 7 percent higher than usual in this age group, and almost 1,700 kill themselves each year.

"I would be very upset if people hear about on television. The reports were published in today's New England Journal of Medicine along with an editorial by Eisenberg. After accidents, suicide is the leading cause of death among American adolescents between the ages of 15 and 24. Since 1950, the suicide rate has tripled in this age group, and almost 1,700 kill themselves each year.

Phillips study concluded that educators, policy makers and journalists may wish to consider ways of reducing public exposure to stories, both general and specific, about suicide. "The study says that the presumptive evidence suggests that fictional presentations of suicide may have a lethal effect." There is an implication that there should be censorship. I am very much opposed to that," said Charlotte Ross, executive director of the Youth Suicide National Center in Washington.

In interviews, neither Phillips nor Gould advocated censorship either. "I would be very upset if people were to use my findings to press the news media to reduce coverage of certain kinds of stories," Phillips said. He suggested that news reports about suicides might include mention of the finding that suicides often follow such coverage. This way, friends and relatives of potential suicide victims, as well as despondent people themselves, could be especially alert.

Gould's study found that in the two weeks before three of the TV movies, there were 14 teen-age suicide attempts in the New York area. Afterward, there were 22. After another movie about suicide, however, these was no significant change. Two of the programs, including the one that had no apparent negative effect, were broadcast by CBS.
Charles Kulpa and Loyd coooking, heating and lighting left wastes.

Dr. Robert Irvine, civil engineering department, began his search in October 1985, when he was contacted by Niagara Mohawk Power Corporation. Niagara Mohawk had decided to reclaim a 65 acre site in Utica, NY, that was once the location for a gas plant operated by the Utica Gas and Electric Company.

The manufacture of gas for cooking, heating and lighting left the site covered with a thin layer of coal tar residues. Irvine was called upon because he had done work sequencing batch reactor technology while having done work sequencing in Culver, IN. According to Irvine, his projects have lead to the establishment of the Environmental Protection Agency provided $350,000 for a proposal on the sequencing batch reactor technology to send to the National Science Foundation for funding. The next year, according to Irvine, those projects have lead to the establishment of the Environmental Protection Agency provided $350,000 for a demonstration in Culver. In, according to Irvine, these projects have lead to the establishment of 75 full-scale plants dealing with sequencing batch reactor technology and more than a million dollars in research grants for the University.

There will be a meeting for anyone interested in writing for The Observer. Tonight at 7 p.m. in the Observer office. Contact Mary Jacoby at the Observer office, 3rd floor Lafortune, for more information.

The manufacturing of gas for cooking, heating and lighting left the site covered with a thin layer of coal tar residues. Irvine and two colleagues, Charles Kulpis and Loyd Petticham, began working on the project in early June after receiving a grant of $150,000. The experiment is divided into three phases. Phase one involves testing organisms to eat the coal tar. The first step of this phase, where the researchers test basic organisms, should be completed by the end of this month, according to Irvine.

The second step of the phase, which will begin in November and continue for five months, will involve using the organisms in soil decontamination studies. The third step will be to design a full-scale demonstration.

“Phase two will be a limited demonstration of what they found in the lab on the site of the gas plant. The third phase will be a full-scale, on-site demonstration. Irvine is pleased with the progress of the experiment so far. “Everything looks good. The bugs are happy and they're eating the waste.”

In 1975, the University gave Irvine a grant of $1,500 to develop a proposal on the sequencing batch reactor technology to send to the National Science Foundation for funding. The next year, the Environmental Protection Agency provided $350,000 for a demonstration in Culver. In, according to Irvine, those projects have lead to the establishment of 75 full-scale plants dealing with sequencing batch reactor technology and more than a million dollars in research grants for the University.

The eight interrelated titles under The New Universe - Star Brand, Spider-Man, The Amazing Spider-Man and The Incredibles Hulk, the Marvel Comics Group has created The New Universe.

The organization, when found, will be given the banquet of a lifetime on the site of a 19th century New York gas plant.

In 1968 to 1970. This process has lead to the establishment of the National Science Foundation.

“Everything looks good. The bugs are happy and they're eating the waste.”

I came back to Notre Dame after a summer of unmitigated bliss only to find that nothing had changed. I was greeted with a halt. I was surprised by and was shown concerts, movies, afternoon rallies on the mall, an African food night, a slide show and a show of African arts. Members of Rally Against Starvation also visited high school classes in order to generate attention and enthusiasm for our campaign. Our final event was a three band concert, featuring Dalko, which alone raised $2,400. Our efforts clearly show our dedication to the human mission. We are not denying Security's accusations, though the violations were out of our immediate control. But we are an extremely worthwhile interest made of caring, moral people. If there was a problem we were willing to face it and correct it. To abolish an entire group, a sympathetic case is unjust. We are unsure of the future for Rally Against Starvation. Appeals are being made, but the reaction is proportionately unwelcomed. We want to be able to act once again. We are surprised by and sincerely regret the decision of the University, but our commitment stands. Now we can only encourage you, too, to continue your individual efforts in aiding African relief funds. Remember Rally Against Starvation, for the cause is a valid one, and it needs special attention. Lora Naughton was a member of the Rally Against Starvation.
Adam Milani

a closer look

When Ronald Reagan unveiled his Strategic Defense Initiative, instantly dubbed Star Wars, in March of 1983, it became the source of a great deal of discussion both in the West and in the Soviet Union. Would it work? Would it prove to do the same thing? Would it worsen the already strained relationship between the two superpowers? I believe that concrete answers to all these questions exist. However, I do not believe that they will be easily found if the United States continues to insist upon building a disposable, highly-advanced space-based system which would then be exploded or deflected by a ground-based system that would be set up to mirror the action of space. Laser technology is the most advanced, most powerful and, most important of all, it requires an enormous amount of energy. A satellite-based system would require that fuel tanks capable of supplying the equivalent of 60% of U.S. electricity production be launched into space. Launching a payload this large is obviously a formidable task, but even if this proves feasible there still remains the problem of making sure that these lasers hit their targets. Laser technology cannot guarantee this, and

seem to be far from doing so. What, then, can we do to make Star Wars a reality more quickly?

According to Time magazine "Experts say the Soviets are about ono with United States efforts to produce high-energy lasers and ahead in the power generated", in them. However, the United States is believed to hold a substantial lead in computer technology and this is where the debate is. It is true, I believe, that the Soviets could one day develop a laser-based system which would then be perfected by the United States. However, I think this is unlikely. The Soviet Union with the United States together on perfecting the technology. In the past both the United States and the Soviet Union have understood implicitly been very cautious at the bargaining table using the ponderous "style. With Star Wars this cannot be done. It is an all or nothing kind of system which Time diplomatistic correspondent Stone Talbott says, "No single component of the system is finished in the name of peace and justice. From the future our money would be better directed towards these and our efforts.

If, as students, had no voice in what this structure would look like or what it would say, let us take a stand on what it shall mean for us. Let it remind us that there has been war, that men and women have died, and that we must now concentrate on working for peace. We must take the more positive steps toward achieving peace. Because life is sacred, we must be concerned about the waste that is lost through injustice. We, as Catholic university, have to be conscious of how much of our spending is spent in the name of peace and justice. In the future our money would be better directed towards these and our efforts.

"Peace and justice" seems to be a crucial term in the newly completed "war memorial." Its meaning was unclear to us. We wondered if this memorial would add much to it as the two superpowers will slowly learn to live with these two valuable commodities. This Star Wars undermines the United States' confidence in its own existence. The lack of moral justice does not fit the crime. The lack of information exchange hurts all people for it can cause needless suffering as new in industrial, agricultural and medical techniques which could aid many, many countries. It is because of this lack of exchange that I see another benefit to a joint effort on the part of these countries. With the Consortium of Soviet and Western scientists we will be able to help the search for peace. The lack of information exchange hurts all people for hope of ever being able to negotiate a realistic, lasting peace. The lack of information exchange hurts all people for hope of ever being able to negotiate a realistic, lasting peace. Belles drop 2nd, 3-0

By JANE SHEA
Sports Writer

The Saint Mary's soccer team lost its third game of the season last Tuesday to Kalamazoo College, 3-0, dropping Saint Mary's to 1-2.

Kalamazoo took an early lead in the game, scoring twice in the first half. The Belles were never able to get themselves going after they fell behind in the first half. "We were frustrated by Kalamazoo's early lead," said Coach John Akers. Saint Mary's was unable to score, but there were many close attempts like the ones made by sophomore Ellen Boyle. Kalamazoo added one more in the second half while continuing to frustrate the Belles. Despite the fact Saint Mary's was unable to score they did play a splendid passing game and junior goalie, Patty Hatfield came up with some god saves to keep the lead from increasing.

"We are working on our passing game and will be improved when we play Kalamazoo again in three weeks," predicted Akers.

Saint Mary's takes the field again on tomorrow against Notre Dame.

Dwight Evans, Ed Romero and Dave Henderson greet Rich Gedman after hitting a game-winning homer last Monday night. All the Sox could be celebrating soon if they can hold on to the AL East lead. A look at that divisional race appears below.

Boston tries to hold off history

Associated Press

Darn those Boston Red Sox. Just when it was time for a final-month free-for-all in the American League East, the Red Sox wrecked it.

With a 11-game winning streak through yesterday, Boston holds its largest lead of the season, eight-and-a-half games over second place Toronto.

Now, it appears the Red Sox may have to hold off only history. Baltimore was not able to catch them. Nor was Detroit. The New York Yankees surged, stumbled, and are 1-1-and-a-half games back.

Ever since the Red Sox moved into first place on May 14, the rest of the AL east has been waiting for them to fold.

Everyone knows they were supposed to - in the last 12 years, the Boston teams have led at the All-Star break and none of them has won. And who could forget the double-digit collapse in 1978?

But this is a different brand of Boston Red Sox.

The Red Sox, traditionally considered a bunch of bruisers, rank near the bottom of the league in home runs. They could end up with their worst standing in that department in 25 years.

Cleanup batter Jim Rice is choking up and hitting to the opposite field. "Last season, I couldn't see the holes," he said. "This year, I can see holes there big enough to drive two trucks through," said Rice.

Rice has 32 singles, 17 homers and a team-leading 95 RBIs.

The biggest difference is pitching, particularly the Cy Young year of Roger Clemens. Breathing with a 21-4 record. But does everyone realize just how good Boston's pitching has been?

The Red Sox are within a few hundredths of a run of leading the AL in earned run average.

Boston has not done that since 1976, when the star of the staff was a pudgy left-hander named Babe.

It is pitching, along with a favorable schedule, that the Red Sox believe will carry them to their first division championship since 1975. Boston plays its final 10 games at home, three each against Toronto and Baltimore and the final four against New York.

On the road, the Red Sox play three games this weekend in New York and three more the following weekend in Toronto.

Boston has won four of seven games against the Blue Jays this season and 13 of 20 in the last two years.

Dennis "Oil Can" Boyd, despite his off-the-field episodes, is 6-9. Bruce Hurst has won 10 games and Tom Seaver is still pitching well. Calvin Schiraldi, acquired in a trade that sent Bob Ojeda to the New York Mets, has overcome arm problems and has become Boston's stopper since being recalled from the minors seven weeks ago.

Boston has also kept itself ahead this season by beating up on the weaker AL west. After going 1-1-1 against West teams in 1985, the Red Sox pulverized the other division this season with a 5-3 mark.

Only once this year did Boston lose when it went 3-1 at the end of July. That's when the other teams made their moves.

The Orioles pulled within 2½ games in the final week of August. When Baltimore fell off the pace, the Yankees got within 3½ games. Two weeks later, the Tigers broke a season-long malaise and climbed within 4½.
Experience keys ND kicking game

By PETE GEGEN
Sports Writer

Experience and execution. Those are the two key words for Notre Dame's kicking game this season.

Both senior placekicker John Carney and senior punter Dan Sorensen are noted for their consistency. Carney currently holds the school record in field goal percentage (.732) and is only 10 field goals away from becoming the all-time Irish leader in that category. Sorensen averaged 40.2 yards on 58 punts last year, rarely getting off a bad kick.

The other key execution was sometimes missing from the special teams last season. Carney, whose field goal production fell to 600 last season (15 of 22), believes the consistency will be there this season.

"We probably didn't practice as much as we should have last season," he said. "But things are working smooth now. I'm looking forward to a good special teams." Sorensen will be the holder for Carney, and freshman Tim Graham will be the snapper. The synchronization of these three players will determine whether Carney will return to the form of his sophomore season, when he hit 17 of 19 field goals and was a perfect 25 of 25 on point after tries.

"I can't think of anybody who is going to give you a better chance of making it than John Carney," said Head Coach Lou Holtz.

Carney is also noted for his accuracy from long ranges. He has made 15 of 16 attempts in the 40-49 yard range. Carney will also be the kickoff specialist, a position he has held since his freshman year. Although Sorensen was very consistent last year, he had to ward off a challenge from junior VincePelikan to get the starting nod for the Michigan game. "The consistency there really and truly scares me," Holtz said of his two punters.

Sorensen best outing last season came against Purdue. He kicked 9 punts for a 47.2 yard average, including his career best of 57 yards. Much will be expected of Sorensen this year, as Assistant Coach Mike Stock noted that the competition for the job continues to be on a day-to-day basis.

John Carney will once again be the Irish placekicker this season. Pete Gegen previews the kicking game in his story at right.

For Sale:
Series ring

Associated Press

EVANSVILLE, Ind. - Nestled in the classified section this week in The Evansville Courier is a tiny advertisement. For sale: 1961 Cincinnati Reds World Series ring.

The ad sits there, like a diamond in the rough, between other ads for used bicycles, chrome dinette sets and a chest-type freezer.

Karen Stewart is asking $4,500 for the ring, which once belonged to her father, the late Elmo Henson Jr.

Henson was a scout for the Reds. He got the ring from Pete Whitensent, who batted .200 in 28 games with the 1961 Reds.

Whitenstein had trouble cracking an outfield that included league MVP Frank Robinson, Vada Fine and Wally Post.

It was the only World Series ring Whitensent collected. His major league career ended after that '61 season. So the gift of the ring was a warm statement of his friendship with Henson.

Mrs. Stewart said she believes Whitensent currently lives somewhere in Florida.

"Pete and my father were very close," Mrs. Stewart said. "It started out during spring training in Florida. My father was a real personable fellow, and never hesitated to walk up and talk to people. Over the years, he and Pete became real good friends."

But now, 13 years after her father's death, the unemployed mother of three is hoping to sell the ring.

"I can't wear it, except on my thumb maybe," she said. "And to be honest, we can use the money."

The World Series ring is only a small part of her father's major league memorabilia. He influenced some big sports names, including long-time pro football star and Evansville native Bob Glaese. The family has a letter from Glaese, thanking Henson for his support and encouragement.

Beuerlein continued from page 16

completed 107 passes on 214 attempts for 1,355 yards. While those numbers were impressive, his ratio of three touchdowns to 13 interceptions was not.

"The Interceptions have definitely been the biggest disappointment to me personally and to a lot of people too," one.
Colts' Hand not satisfied with play

Associated Press

INDIANAPOLIS - Jon Hand, far from satisfied with his NFL debut with the Indianapolis Colts, is looking to Sunday's game at Miami as a personal challenge. "You can't get down on yourself. You just have to keep plugging," says the 6-foot-6, 280-pound rookie defensive end.

Hand, the Colts' No. 1 pick and the fourth player chosen overall in this year's college draft, had 11 tackles, including two unassisted stops, in last week's 33-3 loss at New England. But he had no sacks and wasn't even credited with pressuring quarterback Tony Eason. He wants to do better this week against Miami's Dan Marino.

"As they say, he is the best in the league," said Hand, a starter at right end. "And I like that myself because it's a personal challenge. It would do me a great honor to get back there to him a couple of times."

In last week's 50-28 loss at San Diego, Marino hit 64 percent of his passes for 290 yards and three touchdowns, but he was sacked four times for losses of 29 yards. The Colts managed only one sack, by Donnell Thompson, against the Patriots.

"The thing is to win as a team, and we're going to work towards that," said Hand.

The Colts have lost to the Dolphins in their last 11 meetings and in 16 of their past 17 games.

"We just have to keep a positive attitude and go into Miami with the attitude that we're going to win that game. We have to try to keep nothing from deterring us from it," said Hand. "We have to just go out there and finish ... just go crazy out there."

Hand, who totaled 234 tackles in his college career at Alabama, said the Colts were unable to accomplish what they tried to do against the Patriots.

Patriots to face Jets in wild card rematch

Associated Press

EAST RUTHERFORD, N.J. - The strange brew that makes up the New England Patriots in many ways defies logic. But it works, as the Patriots trip to the Super Bowl proved last year.

"New England visits the New York Jets tonight in a nationally televised NFL contest that will provide an early jump in the AFC East race for one of the teams. The Patriots, who beat the Jets 26-14 in the AFC wild card game last December, routed Indianapolis 33-3 in their season-opener. New York edged Buffalo 28-24.

The Patriots are directed by Coach Raymond Berry, who was a Hall of Fame wide receiver with the Baltimore Colts. Yet, the team favors a conservative attack built around running backs Craig James and Tony Collins and a solid offensive line.

They lost two of their longtime stars, perennial All-Pro guard John Hannah and defensive end Julius Adams to retirement. Still, All-Pro linebacker Andre Tippett claims, the Patriots are a closer group now than in any of his four years of terrorizing offenses.

And New England's plays are called by Steve Grogan, the backup quarterback, from the sidelines, while starter Tony Eason puts them into motion.

Regardless, as Jets Coach Joe Walton notes, the Patriots must be doing a whole lot of things right.

"They are confident and efficient and well-coached," Walton said. "They're the most talented team in our division and maybe in the entire NFL."

Tippett likes the sound of that.

"Our defense is much better than last year," said the man who led the AFC with 16 1/2 sacks last season. "I think our performance Sunday symbolizes that and the confidence we have out there."

Berry took over for Ron Meyer midway through the 1984 season. His practices are lighter, with virtually no hard contact, and he is more accessible than Meyer.

"He's a players' coach," Tippett said.

Tony Franklin had four field goals and the defense, led by linebacker Don Blackmon with three sacks, trapped Colts quarterback Gary Hogeboom six times. The Colts, one of the league's best rushing teams, had only 83 yards on the ground.

"You have to stop the run," Tippett said. "Don't neglect it and worry only about the pass."

But Tippett said the Jets present a double dilemma - they can ram the ball down a defense's throat and have as good a crew of receivers as anyone.

The Jets overcame a noisy crowd and a highly motivated Bills team in an overtime triumph.

Defensive end Barry Bennett thinks the Jets will provide some of their own fireworks in stopping the Patriots.

The most important thing is we've got to hurry Eason and make him throw quicker than he wants to," Bennett said. "If your defense can get their offense off-balance, it can do even more. We have to shut down James and Collins and, if we are aggressive, we can get into their backfield. Then we'll be able to shut them down.

New England Patriots fans hoist the team's AFC championship flag before the team's game last Sunday. A preview of tonight's Patriots-Jets game appears at left.

"You know, I bet your kids and Bruno would like to go outside where they'd have room to really play."
Beuerlein tops depth chart; Andrysiak, Bellis stand 2nd

By DENNIS CORRIGAN
Sports Editor

The biggest controversy surrounding last year's Notre Dame team on the field had been the quarterback situation. Steve Beuerlein was bolethoned by a shoulder injury he sustained against USC which rendered him ineffective at times. Terry Andrysiak finally emerged in last season's Navy game and spearheaded the Irish to a 41-17 victory.

From that moment on, the arguments over who should be rated, both in action in the last four games of the season, was the beginning of the losses to Penn State and Maryland.

At the beginning of spring drills, the quarterback question rose again. Would Head Coach Lou Holtz go with Beuerlein, the drop-back passer, or the more mobile Andyriak.

This year's question, the answer was quickly figured. Beuerlein, showing signs that he was completely recovered from the injury, carried it for the team, explained Gallo. "I have guarded optimism about the hitting. We've only 10 games, all on the weekend and intrasquad games during the week. We want to develop situational baseball and work on the fundamentals." As a host with a broadcast career and a bright spot for Irish is this season is the basic offensive and defensive players on the team remain intact, which should be bad news for Irish opponents. Last year, the Irish hit opponents pitchers at a consistent and powerful .311 clip. Senior John Loughran, who broke the Irish single season hit record (107) in his last at bat of the '86 season, anchors an offensive attack that also includes junior Pat Pesavento, senior Scott Rogers, and senior captain Ken Soon. "Youthful enthusiasm in so far as hitting is concerned can really bring it for the team," explained Gallo. "I have guarded optimism about the hitting. Attitude will be key to Irish grid turnaround

Right now, Notre Dame is down. But from these and the ultimate answer, of course, will come Saturday and the ultimate answer, of course, will come Saturday behind them and begin anew. And don't think for a moment that the fans, especially the student body, can't make a difference in how the players will respond to the situation.

Marty Burns
Football Notebook

"The fan support means so much to us," said senior free safety Ylke Haywood. "Maybe they don't know it, but when you come out of that tunnel you get chills up and down your spine. You realize you're not just here for yourself but for everyone - the fans, the alumni and the Notre Dame family. That's what it's all about. Really, you feel and you have 15 men on the field - the back is the 12th man and the fans are the 13th man."

For the fans, it may be tough to get excited about a team that has seen them through too many up and down years. Most of the starting lineup is composed of a team which has had the desire to put the program back on the winning track. The Wolverines surprised Notre Dame first and then the rest of the country in rolling up a 10-1 record and a final spot at number-two in the national polls.

But there is a striking similarity in this situation Notre Dame finds itself in which Michigan found itself a year ago. When the Irish went into Ann Arbor last season, they were the favorites on a team that was coming off one of its most disappointing campaigns in memory. The starting quarterback recovering from a broken arm that some felt was not good enough to use in college football anyway. An untested sophomore back in the starting line-up was shut down during practice and the team had the desire to put the program back on the winning track. The Wolverines surprised Notre Dame first and then the rest of the country in rolling up a 10-1 record and a final spot at number-two in the national polls.

For those of you who wonder what it takes to be the football coach at Notre Dame, or for those of you who just want to know what it's like to walk in the common campus lament, Lou Holtz has something to say.

"I just have absolutely no social life whatsoever," he says. "I get up at 5:30 in the morning and come in to start our staff meetings from 7 a.m. to 9:30, 50 CCICs or so. I get ready for practice. After practice gets done, then I look at film and go home around 9:30."
