Dorm for women to be constructed with $5-million gift

By MARK PANKOWSKY
News Editor

Baltimore businessman Henry Knott has donated $5 million to construct one of two new women's dormitories at Notre Dame.

The residence hall, housing approximately 250 undergraduates, will be one of two built between the Memorial Library and Pasquerilla East and West. University officials said.

The dorm will be named Marion Burke Knott Hall, after Knott's wife, according to Michael Day, assistant director of public relations and Information.

Knott, chairman of the board of the Arundel Corporation in Baltimore, is well known for his philanthropy in that city, said Geryn.

"Catholic education is generally what he is giving to," Geryn said.

Director of the Physical Plant Donald Dedrick said Knott's gift will pay for one of two dorms, both of which will be "essentially identical to the Pasquerilla Hall.

Construction of the halls will begin Feb. 1, 1987, and be completed by June, 1988, he said.

Both will be ready for occupancy by September, 1988.

Workers began clearing the construction sight earlier this week, said Dedrick.

Knott, whose daughter received a master's degree from Notre Dame in 1968, said "competent, committed, and compassionate women are indispensable to levels of a healthy society."

To enhance their access to a Notre Dame education enriches the society which they will later serve, and I count my ability to do so a great privilege," he said.

University President Father Theodore Hesburgh praised Knott for his generous donation, saying "this most recent benefaction will greatly sustain Notre Dame's residential character and accelerate the University's efforts to bring the numbers of men and women students into proper balance."

Notre Dame currently has 3,367 undergraduate men and women.

Attackers strike near Wailing Wall

Associated Press

JERUSALEM - Attackers hurled hand grenades Wednesday near Judaism's holiest site, the Wailing Wall, killing at least one person and wounding 69 soldiers, Chalilans and tourists.

The grenades were thrown at a group of 300 new recruits of an elite Infantry force of the Israeli army who had just completed a swearing in ceremony at the last remnant of the biblical Jewish temple that was largely destroyed in 70 A.D.

It was the most serious attack in the city in 20 years and came during three weeks of Jewish observances known as the High Holidays. Mayor Teddy Kollek called it "a large scale disaster."

A medic who was on the scene said on army radio: "I heard ... two more explosions ... I heard shouts and windows exploding. There were shrapnel injuries, there were smashed limbs, broken hands and legs of those who stood close.

The wall of emergency sirens and screams of the wounded cut the evening air and a nearby sidewalk was drenched with blood. Streets of clothing were strewn about. The injured, some with their clothes ripped off by the explosions, were lifted onto stretchers and carried by soldiers and passers-by to ambulances.

Israel Radio reported at least two attackers threw as many as two, three explosives.

Defense Minister Yitzhak Rabin told reporters at the scene, "This was an attack on the Jewish people."

Buchwald pokes fun at Washington figures

By TRIPP BALTZ
News Editor

ELROYS, Ind. - Art Buchwald, nationally-syndicated columnist, declared himself one of America's greatest employers at the Elco Theatre Wednesday night.

"Most everybody in Wash­ington works for me," he an­nounced.

Dishing out the humorous commentary that earned him the 1982 Pulitzer prize, Buchwald poked fun at Washington figures and issues in a lecture titled "On Morality and Ethics."

He praised the organizers for getting the best possible speaker on the subject. "In Washington, I know morality when I see it and ethics when I don't," he said.

Buchwald, a graduate of the University of Southern Californ­ia, drew upon the humor columns he has been writing for almost 40 years. To be a humorist, he said, "you have to have an unhappy childhood." He told the audience to encourage their children to write columns if they have a good sense of humor. "There's a lot of money in it," he added.

Buchwald said he has enjoyed writing about several humorous presidential administrative fig­ures. Ronald Reagan himself did not escape the slings and arrows of Buchwald's outrageous humor. "I worship the very quick­sand he walks on," Buchwald said.

Reagan got the idea for supply­side economics from watching "Tip O'Neill eat a bowl of soup," according to Buchwald. Buch­wald said he has a terrible fear that if the Soviets ever launch an attack, the president will get his little black box, push the but­ton till he's released 8,000 Scud missiles, and the only thing that will happen, is the White House garage door will go up."

Buchwald said the American public is down on the media. "Everybody wonders where we get our government secrets from. We get them from the govern­ment."

"If a Washington reporter says he's stepping out of the office for a leak, it means he's going to pick up a top secret document," said Buchwald.

Buchwald said every institu­tion is under pressure. He recalls having heard about a University president who told his football coach he was going to give one of his athletes a quilt, because he was under pressure to improve the academic quality of sports at his school. "He went to the boy and said: 'What's two plus two?' and the kid answered four. "Then the coach said: 'Aw, give 'em another chance.'"

Buchwald was touring Notre Dame on his own earlier this week. He said he talked to an
Contrary to popular belief
Hesburgh not to blame

The Observer

The press can be a very powerful tool. In 1958 newspaper moguls William Randolph Hearst and Joseph Pulitzer played a part in persuading the nation to go to war against Spain. Although certainly not as important, in 1986 a commentary from a student appeared in The Observer and persuaded many students the University's president was at fault for the "blacklisting" of "Louie, Louie" from the band's program.

The story began, according to Assistant Director of Bands Richard Morrison, when a woman wrote a letter to the University president's office, complaining she found the song, "Louie, Louie," offensive.

"The original decision was from the fact that someone found it offensive," he said. The final decision is pending further investigation, he added.

"It was a decision made in (the band's) office," said Morrison.

Many students, however, think the decision to stop playing the song was made by University President Father Theodore Hesburgh.

A Viewpoint column in the Oct. 8 edition of The Observer stated word was sent from Hesburgh to Phillips that the band could not play the song, which Phillips later referred to as the "immoral tune."

The fact of the matter is, however, that Hesburgh never gave such a decision to Phillips. Hesburgh said Wednesday he has never even heard the song nor has he received any complaints about it. "I wouldn't know it if I heard it," he said.

In addition, Hesburgh said he has not received any complaints about the song.

Some band members, however, claim Phillips told them the decision to ban the song was Hesburgh's. Thus, a Viewpoint column blaming Hesburgh was born. This led to a letter to the editor in Wednesday's edition of The Observer again blaming Hesburgh.

Morrison claims that a misunderstanding led to some members interpreting Phillips as blaming Hesburgh. "The fact of the matter is, however, that Hesburgh never gave such a decision to Phillips," he said.

Repeated attempts to reach Phillips were unsuccessful. Whether there was a misunderstanding or not, the fact remains that for the last week I have listened to my friends berate Hesburgh for what they believed was his decision to ban the song. A column and letter to the editor, even though written without full benefit of the facts, were able to convince many students of Hesburgh's "blacklisting."

After the Viewpoint column, many students were very eager to jump on Hesburgh's back and blame him for banning the popular song. Although this is not the most important issue to affect student life, two questions still remain. First, was the band misinformed as to who was responsible for banning the song, as some band members and the column writer think? I don't know. Second, should the band directors discontinue playing "Louie, Louie" just because a complaint was received about it's morality? I don't think so.

Morrison said it is possible the song will be played in the future. It will depend on what Phillips, Morrison and Welchin decide about the offensiveness of the song and whether or not the song can be fit into the band's future routines.

I hope they have all the facts. I also hope people will reserve judgement on their decision until they too get all the facts.

Louie who?
Gene discovered for muscular dystrophy

Associated Press

NEW YORK - Researchers have found the long-sought gene responsible for the most common form of muscular dystrophy, a "historic discovery" that could lead to the first direct treatment of this now-incurable disease.

The Muscular Dystrophy Association, which provided much of the financial support for the research, cautioned that the discovery would not immediately help children with Duchenne muscular dystrophy, an illness that afflicts 20,000 to 50,000 American boys who will not survive beyond their 20s.

"We're extremely encouraged and excited by this historic discovery," said Donald Wood, the association's associate director.

The discovery of the gene by Louis Kunkel, Anthony Monaco and colleagues at Children's Hospital and Harvard Medical School in Boston caps several years of unusual cooperation by scientists around the world.

In a report to be published Thursday in Nature magazine, Kunkel and Monaco describe the isolation of a segment of genetic material that makes up about 10 percent of the Duchenne muscular dystrophy gene. This piece of the gene can now be used to isolate the entire gene.

The researchers also report that the gene appears to encode the blueprint for manufacture of a protein in muscle tissue.

Duchenne muscular dystrophy is an inherited disease marked by gradual death of muscle tissue. It occurs when the protein is missing or altered.

Scientists had presumed that the defective protein responsible for the disease was located in muscle tissue, but so little had been known about the ailment that scientists had been unable to prove that - until now.

Kunkel and his collaborators found that the gene had produced in muscle tissue a substance called messenger RNA, an intermediate step in the production of a protein by the gene.

The researchers also report that the gene exists in two forms, one of which is altered.

Kunkel said in a telephone interview Wednesday that the next critical step in the research will be to identify the protein encoded by the gene, a straightforward task that could be accomplished within a year.

When the physiology is understood, researchers might be able to devise ways to alter it - thus ameliorating or even curing the disease.

A refreshing alternative! No bitter aftertaste!
weeks before Election Day, the House and Senate labor to finish work before adjournment

Congressional leaders searched Thursday for compromises on stopgap spending measures, the most recent of which was expiring at midnight Wednesday.

The House approved the compromise measure, which must be cleared Tuesday night after bargainers settled on a $275.1 billion worth of military spending, including agreements with the Reagan administration on arms control issues.

However, the Senate was not taking up the measure before Thursday, leaving the government technically broke unless another stopgap bill was put into place.

The legislation, which has become tied up by opposition from the Democratic-controlled Senate, is a popular election-year issue.

Also awaiting final congressional action was legislation to revise the nation’s immigration laws and provide amnesty for illegal aliens who entered the country before 1982.

The House approved the compromise measure, which includes penalties for employers who hire illegal aliens in the future, on a bipartisan 239-173 vote. But the legislation, versions of which have died in each of the previous two congresses, still could become tied up by opposition in the Senate.

The Senate, meanwhile was expected late this week to act on a compromise $1.7 billion anti-drug measure to shore up federal law enforcement, rehabilitation and education efforts as well as provide aid to local police.

The legislation, which has moved swiftly through Congress, is a popular election-year issue.

House and Senate to finish work before adjournment

Associated Press

WASHINGTON — Less than three weeks before Election Day, the House and Senate rushed Wednesday to adjourn the 99th Congress as legislators beganwhittling a stack of major domestic measures to finance the government, overhaul immigration laws and combat illegal drug trafficking.

Both chambers were in the midst of what promised to be a series of marathon sessions as congressional leaders searched for compromises on sticky issues and prepared to wrap up legislative business by Thursday or Friday, two weeks after the original adjournment target of Oct. 3.

The biggest and most pressing item on the agenda was a nearly $576 billion, omnibus spending bill — the largest ever considered by Congress — to meet the funding needs of most government operations and programs for the fiscal year which began Oct. 1.

Since the beginning of the fiscal year, the government has limped along on a series of stopgap spending measures, the most recent of which was expiring at midnight Wednesday.

Congressional negotiators settled on the final version of the massive spending bill Wednesday morning, and action by the full House was expected late Wednesday.

However, the Senate was not taking up the measure before Thursday, leaving the government technically broke unless another stopgap bill was put into place.

The way for consideration of the spending package was cleared Tuesday night after bargainers settled on a $291.8 billion worth of military spending, including agreements with the Reagan administration on arms control issues.

The House voted approval Wednesday of the compromise defense budget bill.

The Democratic-controlled chamber passed the bill on a 283-128 vote, meaning only approval by the Republican-run Senate is needed before the measure goes to Reagan's desk.

A Senate vote is expected later this week.

Although the conference finished their work, battles on foreign aid and several other provisions of the money bill were expected in each chamber.

Also awaiting final congressional action was legislation to revise the nation’s immigration laws and provide amnesty for illegal aliens who entered the country before 1982.

The House approved the compromise measure, which includes penalties for employers who hire illegal aliens in the future, on a bipartisan 239-173 vote. But the legislation, versions of which have died in each of the previous two congresses, still could become tied up by opposition in the Senate.

The Senate, meanwhile was expected late this week to act on a compromise $1.7 billion anti-drug measure to shore up federal law enforcement, rehabilitation and education efforts as well as provide aid to local police.

The legislation, which has moved swiftly through Congress, is a popular election-year issue.

Nobel Prize discovery to benefit man facing eye loss in New Albany

Associated Press

NEW ALBANY, Ind. — A Van derbilt University researcher may have won a Nobel Prize in medicine this week for developing a cell stimulant, but Thursday Webb of New Albany says he’s the real winner.

Without the cell stimulant developed by Dr. Stanley Cohen and an Italian scientist, Webb would have lost his right eye, his doctor says.

Eye drops containing the protein that Cohen discovered 24 years ago have healed an acid burn the size of a shirt button on the surface of Webb’s right eye. The eye would have been destroyed without the experimental treatment.

Cohen and Rita Levi-Montalcini of Italy were awarded the Nobel Prize in medicine this week for developing a cell stimulant, but it may have won a Nobel Prize in other medical advances, such as speeding up the healing of severe burns and surgical incisions.

"I think he deserves it," Webb said of Cohen’s prize. "I mean, this stuff worked amazing. Nothing else has worked quite that dramatic."

Webb burned his cornea a year ago when acid from a mailbox splashed on his right eye. The drops were placed instead of a cornea transplant.

"A cornea transplant failed because a covering, called the epithelium, did not completely grow over the surface of the new cornea," said Dr. Richard Ellerman of the University of Oklahoma.

"Nothing else has worked quite that dramatic," said Ellerman, who used the eye drops in Webb’s treatment.

Two weeks ago, doctors at New Albany’s Indiana Eye Clinic worked on a new cornea after a cornea transplant failed because of a covering, called the epithelium, did not completely grow over the surface of the new cornea.

Webb, who was the first patient to use the drug in Louisville, put EGF drops in his eyes four times a day for six days and the covering closed over his cornea.

"I was ecstatic," said Webb. "We can now undergo a second transplant with a better chance of success."

Reagan: U.S. still open for talks despite stalemate with Gorbachev

Associated Press

WASHINGTON — President Reagan, declaring "let's not look back and place blame," said Wednesday the two superpowers were closer than ever to ridding the world of nuclear weapons.

In a Baltimore speech, Reagan welcomed a promise by Soviet leader Mikhail Gorbachev not to abandon negotiations despite the stalemate in Iceland over "Star Wars" and repeated his proposal for the elimination of all ballistic missiles over a 10-year period.

"Let's look forward and seek agreements," the president said. "Let's not look back and place blame. I may offer to Mr. Gorbachev: our proposals are serious, they remain on the table and we continue to be prepared for a summit.''

But Igor Bulay, press coun­celor at the Soviet Embassy, said his government wanted to be cer­tain of "concrete results" before settling a date for Gorbachev to come here for a third summit with Reagan.

A Soviet editor, appearing with Bulay at a news conference, called "last-minute intransigence" by Reagan over the U.S. Strategic Defense Initiative (SDI) deprived the world of an agreement to reduce strategic nuclear weapons by 50 percent.

"The results of Reykjavik un­dermined the hopes and aspirations of people around the world," said Georgi Fedyaevsky, editor of Soviet Life, an English­language magazine circulated in the United States.

Similarly, Spurgeon Keeny, ex­ecutive director of the Arms Con­trol Association, said "we have lost an immediate opportunity for a major breakthrough in arms control."

He said he hoped Reagan would reconsider the "surprising control." The Observer Thursday, October 16, 1986, - page 6

Jailed American identifies man who bombed Cuban plane in 1976

Associated Press

MAMAGUA, Nicaragua - A top Sandinista official said Wednesday that an American captured in Nicaragua identified a man he claims is a CIA employee in El Salvador as being involved in the 1976 bombing of a Cuban airliner that killed 73 people.

Deputy Interior Minister Luis Carrion Cruz said Ramon Medina, identified last week by the American, Eugene Hasenfus, as one of two Cuban-American CIA employees working at Ilopango Military Base in San Salvador, actually was Luis Posada Carriles. Posada Carriles escaped last year from a Mexican jail and has not been found.

Hasenfus, captured after Nicaraguan troops shot down a rebel supply flight Oct. 5, said in a news conference last Thursday that Medina and Max Gomez, both Cuban-Americans, worked "for the CIA" in El Salvador, including flight crews, maintenance teams and the two Cuban-Americans.

Carrion, speaking at the Managua presidential offices, said Hasenfus told authorities Monday that Medina was "a person he remains [in El Salvador] as being involved in the American" that an American captured in Nicaragua identified a man he understands to be Ramon Medina."

Asked if Nicaragua had Cuban or Venezuelan help in identifying Posada Carriles, Carrion said: "We have requested information from the friendly governments to investigate Cubans involved in the counterrevolution." He did not specify the countries.

Carrion said Hasenfus told State Security, the Nicaraguan secret police, that "Ramon Medina is really Luis Posada Carriles, responsible for bringing up of a Cubana de Aviacion" plane on a rebel supply flight from Venezuela to Cuba.

The plane blew up shortly after takeoff from a stopover on Bartholdi, killing all 73 on board.

Most of the passengers were Cuban athletes returning from a fencing tournament in Caracas.

"According to the declarations of Hasenfus and other sources that we cannot disclose publicly, Ramon Medina was an assistant to Gomez and was in charge of arranging documents at the U.S. embassy for Americans working for the CIA" in El Salvador, Carrion added.

He added that was needed "information was to the embassy was prohibited for the rest of the personnel." Hasenfus said in the news conference after his capture that about 25 people assisted in the supply program in El Salvador, including flight crews, maintenance teams and the two Cuban-Americans.

Carrion said Hasenfus was responsible for organizing the flights from Ilopango to Nicaragua and on one occasion traveled to the military base at Aguacate, Honduras, to meet with rebel leader Enrique Bermudez.

At NSA, We Have the Intelligence To Keep Your Options Open.

ELECTRICAL/ ELECTRONIC/ COMPUTER ENGINEERS...

Computer Scientists... Mathematicians...

Language Specialists

Latitude. That's what keeps a job invigorating — the chance to expand your interests, to take on unheard-of challenges, to grow out as well as up. Well, that's precisely what the National Security Agency offers you as one of its people.

NSA performs three all-important tasks: it analyzes foreign communications, it safeguards America's vital communications, and it sets security standards for the government's mammoth computer systems. And we want you in on the job.

NSA offers choices upon choices. In assignments. In projects. In careers. But whatever your role, it's going to make a difference; it's going to produce immediate results.

For an Electrical/ Electronic/ Computer Engineer options abound. In fact, the entire technological and functional spectrum are yours for exploration. Microprocessor implementation and programming, communications systems, CATV, digital systems architecture and design. Among others.

To the Computer Scientist, we deliver opportunities across the frontier of finite state machine development. The applications realm: systems design and programs, applications and evaluation, and computer security research and design.

Mathematicians research a variety of mathematical concepts including probability theory, statistics, discrete algebra theory and theory of information. Among others.

Language Specialists in Slavic, Near Eastern and Asian languages meet the challenges of translation, transcription and analysis head on. Every day.

Whatever your field, you can be certain to find many paths cleared for you. You'll also find a competitive salary, enticing benefits and an appealing suburban location between two vital family cities.

That means using heavy construction cranes to remove concrete slabs from the blocking pile of rubble, a move rejected earlier for fear of harming any trapped survivors.

There are Mexican mining engineers here who are very good at assessing the danger of taking a building apart. Dotson said, "There will be no explosives, definitely." He said every effort would be taken to assure that anyone still alive underneath would not be threatened by the shifting tons of concrete, steel and other debris as the building is taken apart.

"They will take a piece out and then they will bring the (especially trained rescue) dogs in to assess whether there is anyone in that area," he said. "If there is then we will resume rescue operations to remove the person."

President Jose Napoleon Duarte spoke to the nation on television for the third consecutive night Tuesday. He said this quake, which was estimated to have killed at least 9,500 people, was the worst since 1917.

He was referring to the Mexico City earthquake on Sept. 19, 1985, which was estimated to have killed at least 9,500 people.

He said he was going to keep close watch on the situation. "We have a duty of responsibility for everyone," he said. "We are going to keep a watchful eye on the situation."

Hopes rapidly fading for finding survivors amidst quake rubble

Associated Press

SAN SALVADOR, El Salvador — With hope rapidly fading of finding further survivors, rescue workers on Wednesday began dismantling the Ruben Dario building, where hundreds of earthquake victims were killed, trapped or injured.

The five-story downtown office complex was flattened by the quake that hit San Salvador on Friday, toppling, destroying or cracking hundreds of buildings; leveling more than 2,000 homes; leaving 982 known dead; and Injuring more than 8,000 people.

The Ruben Dario building was the hardest hit, but more than 150 people were pulled alive from its wreckage, rescue workers said Wednesday. One man who tunneled into the debris, crawling through dark holes and narrow passages to remove survivors one by one.

Even with those successes in five days of painstaking digging under a browning sun and amid the stench of death, hundreds were feared still beneath the wreckage. Dozens of bodies were taken out in the first few days.

Asked about a report in a local newspaper that the Ruben Dario building had been condemned after an earthquake damaged it in 1965, Roberto Viera, vice minister of communications, said: "It is a case about which I have no specific information. Without being absolutely sure, I heard there was a report (in 1965) where it was recommended that the building be torn down. But it appears technicians later felt it could be repaired and it was repaired."

Marcel Chevrolet, a Swiss rescue team member, said Wednesday that the building was surveyed with sensitive listening devices the previous night, and no signs of life were found.

"But you can't say there are no survivors because in Mexico they found people alive after eight days," Chevrolet said. "But time is running against them and their chances are getting less."

Dialogue is vital on campus and around world

The Reagon-Gorbachev summit in Iceland. Hopes soared. At least they were talking. Maybe the International Year of Peace would at least see a movement towards peace. Forgive was giving way to Reconciliation. Technological criteria was giving way to Dialogue. At last, Rambo was on the way out!

Bruce Corrie
guest column

The Reagon-Gorbachev summit failed. Hopes fell. There was no use for all this talk stuff. manipulators. Rambo again could be seen emerging from the shadows.

The crucial questions are: Does Reagan and Gorbachev really dialogue? or was one speaking American and the other Russian? Are they really translating or should they have been Interpreters? If in actuality there was no dialogue, then the summit was not a failure but something that did not exist: a bargaining session. And so we were far off being convinced that a world has come into a pluralistic world. No one has an absolute truth on truth. No one answer has all the solutions. No one way of life brings peace of happiness. Each one has something to offer. That's what we need each other.

The pluralistic world in turn poses us a dilemma: how can we co-exist when we have two or more mutually incompatible worldviews? Can we really live with the Capitalists? Does the survival of one depend on the destruction of the other?

There are no answers to these questions. Only attempts at answers. We have an obligation to search for solutions and through this hopefully begin to build bridges of communication that could lead to reconciliation.

One way is through dialogue. If we learned to dialogue each other's point of view perhaps we could find ways in which we could live our differences. Authentic dialogue is a very radical concept. It represents a way of life that would direct us to see through each other. Let me present two contrasting images which illustrate this point.

The much imaged of Rambo can be contrasted with the image of the skinny, bald headed Gandhi. Both had different approaches to life.

Rambo's solution to a problem was to physically catapult himself into the situation, solve the problem and blow his way out. Force equals force. His human concerns co-existed with 'force', but force dominated him. He did not see any other way to solve the problem. His approach could be termed "Peace through Force."

Gandhi's approach was different. His approach was "Peace through Reconciliation. Reconciliation." The ingredients for a proper transfer of power in pre-independence India was kolhadi. The British needed to realize their exploitative nature and leave India. The Indians had prepared themselves for Independence, spirit and intellectually. His non-violent movement addressed both these aspects. The British would be challenged morally to respect India's quest for self-reliance. At all times the Indians participating in the non-violent agitation would be strengthened spiritually and intellectually.

It is interesting to note perhaps we could find ways in which to raise the issue to a higher level. Both the Indians and the British were made to see how to love each other. The human spirit has known how to listen and communicate with the other. It calls not only for concern towards peace. Force was giving way to Dialogue. At last, Rambo is lurking in the shadows. There is a need for people to come to understand each other and communicate with each other. The human spirit has known to rise to such challenges.

The importance of understanding the other was recently raised on campus. First, P. Pesagh in his recent lecture stressed the importance of American and foreign students discovering each other. Then the Phi Mu Alpha work on campus exposed us to the many cultural groups on campus. Last semester a group of students from different culture groups got together and shared different approaches to Peace. This opened a new era for the International Student Organization with the help of other groups on campus will explore further ways in which we can improve our dialogue skills. Such a meeting will be held in November. If you are interested in participating in such meetings, feel free to contact the International Student Organization at the R.O.T.C. program.

Bruce Corrie is a graduate student in economics.

Serving both war and peace is incongruous

Dear Editor:
The Incongruous is happening at Notre Dame this week. The University's brand new Institute of International Peace Studies is holding its inaugural advisory board meeting to plan the future of peace studies at Notre Dame. Across campus from the institute, University officials will dedicate a brand new war memorial. My Catholic education taught me in good Thomistic logic that war and peace, much like hot and cold, love and hate, were mutually exclusive.

How can you celebrate both? Of course the war memorial will be dedicated to the dead, those Notre Dame graduated who died in battle, and it is hard to deny the goodness of remembering the dead. No one should do that. But why not have a memorial to the living (that incongruous)? and call it Simpy Peace, or Pro Peace? Prayers for the dead could be offered at the future of peace studies at Notre Dame, as well as prayers for peace.

Perhaps we should just leave the war memorial alone and not change it. After all, it is set in tons of cement and would be hard to change. Let's change the Institute for peace; all we have to do is get

some new stationery and a new sign on the door. War may roam, but so humble, there's no place like home; a charm from the sky seems to hallow us there, which, seek through the world, is ne'er met with elsewhere. Home, home, sweet sweet home! There's no place like home! There's no place like home!"
MARY ABOWD  
features writer

A prayer is spoken as some 50 hands reach for the scissors to cut the dedication News of an innocent child slain, a group of students beaten by policemen, a black woman killed, reminders of the turmoil that affects students here. These reminders, all in South Africa. Someone steps forward to share a reading or an original poem. The intensity is like a circuit of concern flowing through the members and uniting them in their cause: the lib- eration of blacks who are oppressed by the apartheid sys- tem in South Africa.

Such is the scenario every Friday at noon as members of the Anti-Apartheid Network.con- gregate at the entrance to the Admin- istration Building. Although primarily concerned with educat- ing the campus on the current situation in South Africa, the Net- work has also been trying to con- vince the administration of the importance of divestment to help bring an end to apartheid.

"We have to keep the South Africans with us on the forefront be- cause it is important that Americans realize their role in bringing freedom to South Africa," said Network Chairper- son, Margarita Rose.

As one of the founders of the Anti-Apartheid Network, Rose insists that he is not responsible for keeping the issue "in the fore- front." in the spring semester of

1985, she and her classmates took an interest in their econom- ic class where social issues such as divestment were discussed. The students started meeting outside of class with other social concern groups to discuss is- sues such as the loosely knit discussion group grew the or- ganization to come to know the meaning of "the Anti- apartheid Network and the Board of Trustees "have the same goals but different methodologies," said Rose. "Some- one has to be involved in South Africa divestment," Rose said. Without the presence and pressure of the Network Rose said she doesn't think "the Board would have formulated their policy of divestment," she added.

A recent meeting of Roman Catholic groups in the United States resulted in two recom- mendations about the South African issue: divestment itself and the initiation of stockholder resolutions to divest in countries doing business in the country.

Although the Board of Trus- tees believes that its invest- ments can help bring about change in South Africa, Reverend Richard Zang, University invest- ment officer, said that the Board's Investment policy will be regularly reviewed and changed for the well-being of their fam- ily. World Food Day pro- vides people...with the opportu- nity to consider the issues, to take stock and to Internally act."

World Food Day was first ob- served in 1961 by more than 100 countries and has been an an- nual event ever since. The WFC at Notre Dame will begin its commemoration of this special day by holding a simple lunch from 11:30 to 1:30 at the Center for Social Concerns. The lunch will include vegetable soup and bread, rice, apples and other such simple foods, most of it donated. A donation of $3 at the lunch will go to benefit the United Nations Children's Fund (UNICEF) which is working develop- ing countries against infec- tious diseases, malnutrition and illiteracy.

This is the first time the WFC has held a special lunch for World Food Day, but other lunches are often held for Inter- ests such as the victims of the recent Mexico earthquake, flood victims, and Viet Nam war protesters among others. These usually attract about 100 people, faculty and students, and raise $200-400 for the cause. A similar turnout is expected for UNICEF.

The dining halls will also be offering a similar meal during daily lunch fasts at the Dining Halls. The group also holds dis- cussion meetings, bringing in speakers from various depart- ments from within the University who have had some experience in the Peace Corps or other in- volvement with the under- privileged in Third World countries.

Other activities include prepar- ing soup for the St. Augustine Soup Kitchen once a month and assisting other South Bend parishes in putting together Thanksgiving baskets for the poor in this community. The WFC is also planning a retreat for later this year.

For more information on how to get involved in the WFC, or for answers to those questions you were always afraid to ask, contact Laurie Konowski, secretary, or Mark Dragem, president.

MICHAEL RESTLE  
features writer

Last week a "meat" and unusual (Billboard, a black woman killed, reflec- tion News of an innocent child slain, the world hunger coalition here at Notre Dame received an unsolicited donation.

"When I heard, I was really ex- cited," said Laurie Konowski, secretary of the WFC. Apparent- ly, Irish Head Coach Lou Holtz had been collaborating on an ar- ticle for The Sporting News and inscribed that he would only ac- cept the check if it were made payable to the Hunger Coalition.

"Somehow you don't get the im- pression that nobody, especially in the administration knows about us or even cares," said Konowski. "This makes me so happy. I just thought it was a really neat thing to do."

The Observer/Mike Moran

The film deals with problem s of poverty, hunger and development in South Africa; and now with the current situation raging, the struggle continues more than ever. Zang said that the Anti-Apartheid Network and the Board of Trustees "have the same goals but different methodologies." Both groups want to see racial injustice eliminated in South Africa but have different means for achieving this goal.

Despite these seemingly polar views, Patrick Mullen, the Net- work's vice-chairperson and en- gineering representative, said, "We feel strongly about our cause. We have something we would like to see get done and we are going to keep pressing the administration until they do something about it.

Perhaps this best deplicts the drive and dedication of the Anti- Apartheid Network: a group working to help an abused race come to know the meaning of their own word for freedom - Amandla.
Choppy framework abounds as really does not sound like it. repeated mention that he has notes inside the album cover Boston album titled Third Stage. conscious than their earlier effort. Mow, eight years later, Scholz released Don't Look Back, an guitarist and M.I.T. electronics group with a characteristic guitar and roll. road to try to make ends meet. So where have these guys been for his reason to continue. Unfortunately, in 1986 the sound was released in 1979. It sounds much, but a bit. The song shows same thing however might have been innovative and on the popiness may bother some, but foreground and personal relations. In all the songs, Byrne's familiar themes of home, names telling the story of one's life. vocal ability in the least. On "Hol­ yman" he soars into the strato­ sphere with crisp clarity and tone reminiscent of "More than a Feeling." In the end, Scholz's lead lines amaze and mystify. They are sheer ecstasy to the discern­ ing musical ear as well as the pop songs are its flair, time under fire. Talking Heads is a band with quirky, filled with familiar themes of home, names, familiar them es of home, names and personal relations. One of "Creatures of Love." Also lyrics of songs that appear in the guadalcanal Diary disappoints. Contrary to the release's title Guadalcanal Diary is bad, but it lacks Con­ tributions to the album's purpose, it shares the story of one's life, the effect of television on youth and personal relations. It sounds like "More than a Feeling" all over again. In contrast, the album's closer, "Holyan," seems like it could be a bit younger, not much, but a bit. The song shows a move toward a slightly different approach. In any case, Scholz must really have stagnated to have his musical style of writing remain virtually unchanged. Sandw iched between these two songs is a concept album exposing a simple pattern: the excitement of impeding explo­ ration, exploration and search­ing for physical and spiritual ends and meanings and resolu­ tion with a decision to enjoy the present and keep hope in tomorrow. Scholz is searching his soul in for his reason to continue making music. Lyrically, Scholz bore distinction which made "Peace of Mind" and "Rock in Roll Band" so strong has dulled with time to the point that he utters philosophical- existential gib­ berish in the second side's "A New World" and other places. "A man is something that's real; it's not what you are, it's what you can feel." What exactly is he trying to say here? On the other hand, the genius which created "Fore Play" and "Long Time" is at work again. But this time contain two inter­ twined pieces ("The Launch" and "Cool the Engines" on side one and "Can'tcha See" and "Still in Love" on two) and while both dis­ play mixing problems, they have great potential. All discrepancies aside, there is something about "Third Stage" that makes it externally enjoyable and at times, even compelling. Delp has not lost his simplicity and desire for love and familycentered with an ease and grace unusual in today's pop. Byrne's viewpoint is not at all shy, but mature, accepting of all that life throws at us. One David Byrne song is filled with more meaningful ideas and per­ ceptions than an entire Madonna album. This is not their Head-Head's, but it's pop like to have around. It's curious how people like David Byrne can take our throw­ away culture--such klutzy, tacky country, post-new wave folk, polka-like accordions, it's that chorus sounds like a church choir (in "Love for Sale") and a sing-along with hand clapping (in "Hey Now")--wrap it up in talk of TV, shopping malls, inter­ states and Mastercards, and produce art. People like David Byrne and bands like Talking Heads should be national treasures, but it remains to be seen whether America is ready for David Byrne and Talking Heads. In the meantime, buy the album. It's not their best, but it's in today's pop market. It's the best you can get. Don't expect a little rise in the blood­ pressure. Unfortunately, it was ten­ ding to "Michael Rockefeller," In the Shadow of the Big Man, I did expect a little rise in the blood pressure. Unfortunately, it was not to be.
Boston celebrates AL series victory; Rice excited after eleven-year wait

BOSTON - Jim Rice, Boston's usually reserved outfielder, whipped it up and joined in the champagne-popping party last night celebrating the Red Sox win over the American League pennant.

"This is great. Just wonderful," Rice said with a big grin after being doused with champagne by teammates. "It's been a long, long time for me, but I have waited 11 years for this."

Rice, whose three-run homer in the fourth inning helped Boston to an 8-1 victory over California in the seventh game of the playoffs, admitted, "I haven't been this excited since I was 11 years old."

"I've been pressing, but the team took control," said the big slugger, who had only five hits in the seven games against the Angels. "I haven't been at my best. I came through in the playoffs."

Rice, who missed the 1978 playoffs and World Series as a rookie because of a broken wrist suffered in September, said he is looking forward to the World Series. "It's in my sights now," he said. "I can't wait to get out there and begin playing Saturday night at Shea Stadium."

"It's going to be a lot of fun. May the best team win," he said.

"It's awesome, just awesome," outfielder Dave Henderson, acquired in a trade from Seattle, said. "It feels like the best, wonderful," Tony Armas said. "I've waited so long for this." "We never gave up," Boston third baseman Wade Boggs said. "Everything we did was by two and then by one, we came back here and said, let's put together a little three-game-winning streak, and that's what we did. We won when we had to win, and we won the last two games here."

"It's almost too much to believe," said reliever Bob Stanley.

"All the work has been worth it."

"It's hard to believe, especially for me," veteran utility man Dave Henderson said. "I've had a miserable personal season. I haven't gotten to play at all. Then I got a chance to play and be part of it. I feel bad for Bill Buckner and Paul Molitor, but it gave me a chance to contribute."

Stapleton took over for Buckner at first base when he suffered a strained Achilles tendon in the third inning.
Mets

continued from page 16

previous at-bats, started the winning rally with a pop-fry double off losing pitcher Aurelio Lopez. Strawberry hit the ball off his bat into center field, and the ball fell between Hatcher and basemen Bill Doran. The ball hit the artificial turf and bounced out of Hatcher's head as Strawberry went to second.

Knight, traded from the Astros to New York in 1984, then singled to right field. Houston right fielder Kevin Bass threw was up on the third-base line and too late to get Strawberry.

Knight went to second on the throw, and Jeff Calhoun relieved Lopez. Calhoun threw a wild pitch that sent Knight to third, and Wally Backman walked. A second wild pitch by Calhoun scored Knight and Len Dykstra added a single off the glove of first baseman Glenn Davis to score the final run.

New York reliever Roger McDowell, who entered the game in the ninth, retired the first 10 batters he faced, completing a string of 15 in a row started by Rick Aguilera.

When Bass singled with one out in the 12th, it was the first Houston baserunner since a one-out single by Davis in the sixth inning. Bass was thrown out trying to steal second base.

Houston reliever Larry Andersen worked three scoreless innings and retired the last eight batters he faced until giving way to Lopez in the 14th.

Knopf had only allowed Santana's three-run inning, a single that knocked up the pitcher and Tim Teufel's single to center field in the eighth, going into the ninth with a 3-0 lead.

But pinch-hitter Len Dykstra led off the ninth with a triple and scored on Wilson's soft liner to center field. Davis' bunting single to center scored Garner, and Bass walked on four pitches.

Joe Cruz's soft liner into shallow right field scored Davis with the third run of the inning as Bass went to third. The Astros then tried the suicide squeeze, but Bass was out in a rundown when Alan Ashby failed to make contact on the attempted bunt. Orioles finally was out of the inning - with Aguilera already warming up in the Mets bullpen - when Ashby lined out hard to shortstop.

The Saint Mary's soccer team won a game on the road and tied one at home this weekend, bringing their record to 5-8-1.

Friday the Belles played an away game against Wheaton College and pulled out a 2-1 victory in the second half. Wheaton took the lead early in the first half, making the score 1-0. But freshman Molly Meehan scored the tying goal with 20 minutes remaining in the second half, and the momentum swung to the Saint Mary's side.

Freshtman Caroline Knoll then scored the winning goal to give Saint Mary's a 2-1 lead.

This was our best game this season," said Head Coach John Akers. "There was good team play. It was an exciting game."

Sunday's home game against the University of Wisconsin-Milwaukee ended in a 3-3 tie.

The Belles were the first to score on a spectacular goal by junior Landry Clement with an assist by Meehan.

"The game was made off a corner kick and was beautiful to watch," said Akers.

The Panthers came right back and scored twice before the half. The second goal was disputed by Saint Mary's because they believed that time had already run out.

In the second half the Panthers scored another goal, but the Belles did not quit.

"I give our team tremendous credit for staying in the game," said Akers. "They could have given up, but they didn't."

In the final 15 minutes two players scored to give the Belles the tie. Knoll and sophomore Emberley Byrd registered the goals, with assists on both going to Meehan.

Wisconsin-Milwaukee declined the offer to play overtime, so the game ended in a 3-3 tie.

"The team captains showed good leadership," said Akers. "Our team played well together, but Wisconsin had better individual players."

The Belles play again on Oct. 20 against Michigan State, a team they lost to earlier in the season.

"Now that we know we can play against good Midwestern teams like Wisconsin, we should do well when we play Wisconsin-Milwaukee next year," said Akers.

Red Sox continued from page 16

Muschl, whose team had been within striking distance of the champion-
ship on Sunday, had said after losing Game 6 that the decisive game would show which team knew how to win when it had to.

Clemens, after failing to win in his last two starts this season, showed the form that made him baseball's most dominant pitcher this season. He settled into a groove early in the 56-
degree night and was never in serious trouble, striking out three while walking just one.

Clemens gave up a leadoff single to Ruppert Jones in the seventh and was relieved by Cal-
Schilling. Clemens walked the field to a thunderous ovation and chased off Schilling. The Angels, who had entered the game after Indian Hill, had the bases loaded, and Rich Ged-
schick trotted home for a two-
derby. The Angels, meanwhile, kept up a pattern of misplays that belied their experience-laden team. Misplays like shortstop Dick
Schofield and center fielder Gary
Petits made the first seven runs batted in and his 11 hits tied a playoff record.

Boston finished with only eight hits, including a solo home run by Dwight Evans in the seventh, but parlayed them into maxi-
mum production.

The Angels' offense, however, continued to miss rookie Rally
Joyner, who batted .435 in the first three games before missing the final four with a bacterial in-
fec tion that put him in a hospital.

Jones gave the eager crowd of 33,001 a scare when he hit Clemens's first pitch of the game to the warning track in center field, where Dave Henderson caught it.

Clemens then settled in and, despite not throwing as hard as he usually does, went out to win for the first time in five starts, ending his longest winless streak of the year.

Candela, the Game 3 win-
er, retired the first three batters before a couple of bad breaks began to demoralize the A's.

Rice, just 4-for-27 in the series, led off the second with a grounder to the hole that Schofield fielded but threw wide to first. That brought up Rice, the only batter of the game, and Henderson fired a perfect throw to first for the double play.

With two outs, Wade Boggs, who led the majors with a .357 average but was only 6-for-26 in the series to that point, hit a liner up the middle that caromed off the second-base bag and flew into short right field for a two-run single that tied it 5-5.

The Red Sox threatened in the third and had Don Sutton war-
cing up in the California bullpen before breaking it open with five runs in the fourth. Again, it was a leadoff error that triggered the outburst.

Henderson opened a long fly to center that Gary Davis, one of the best defensive outfielders in baseball, dropped after reaching with a jump that may not have been necessary. The ball scooted away for a three-base error, and Henderson brooked home on Spike Owen's opposite-field double single to right.

Candela got the next two batters before Dave Stapleton, who had entered the game after Bill Buckner strained an Achilles tendon on a field hit, drew a walk.

That brought up Rice, the crowd was on its feet, trying to rally its slumping slugger. This time, he did not disappoint them and, after taking two freebies, he powered a 3-2 pitch deep into the screen atop the 37-foot-high wall in left for a three-run homer.

Rice's blast whipped the fans into a frenzy, and the teammates had just driven home revel ed in the excitement while awaiting him at home plate. The celebra-
tion continued in the Boston dugout and Candela slowly departed in favor of Sutton. Rice came back out to wave his cap in acknowledgement.

From there, it was merely a matter of how big the final mar-
gin would be.

Irish continued from page 16

schedule - the University of Lowell, Gordon College, Bentley College and Holy Cross. Linden-
field looks forward to the chal-
lenge of playing these tough teams.

"These are four strong field hockey schools," she said. "I look for Holy Cross and Bentley, both Division 1 schools, to be tough."

The games should also pro-
vide an interesting contrast of styles. Notre Dame plays a con-
trolled, passing game, while the schools play a more physical game.
Fall season summary

Youth strengthens Irish baseball

By STEVE MEGARGEE
Sports Writer

After last year's 22-28 season, several people involved with the Notre Dame baseball team took unique approaches to help the Irish improve. If the fall season is any indication, it worked.

Despite encountering several problems with rainy weather, the Irish are nearing the end of the fall season with a 3-1 record and several successful Blue-Gray Intrasquad games. The Irish continue their fall season with a game against Tri-State 2 p.m. today at Jake Kline Field.

Three players leading the way for Notre Dame have been freshman pitchers Mike Coffey and Brian Piotrowicz and freshman first baseman Dan Peltier. Along with Jeff Flanagan, Michael Flynn, Ed Lund, Tim Reardon, Mike Rotkis, Kevin Smith and Dave Yawmin, they represent a freshman class with great potential.

"From what they've shown so far, they show a lot of promise and potential," said Head Coach Larry Gallo. "It's one of the better freshman classes we've had so far."

Piotrowicz and Coffey have been particularly effective in shaping up the Irish pitching staff. Piotrowicz has allowed only one run in 16 and 2-3 innings pitched and recorded 15 strikeouts, and Coffey has a 1.50 earned-run average in five games.

Just ask junior Kevin Chenall about the improved pitching. The ace of the rotation for the last two years, he was injured throughout last season, had his injury diagnosed by Dr. Arthur Pappas, the doctor who worked on Boston Red Sox star Roger Clemens over the offseason. But with the addition of the two freshmen, even Chenall is worried about his role on the staff.

"I've got to start worrying about my own job as far as playing with all the pitchers that are getting healthy," said Chenall. "It kind of pushes you when you realize there's someone there to take your spot if you don't get your act together. Judging from the fall, I think the pitching is looking good. The starting rotation is solid, and I'm sure we'll find some good relievers with Mike Harmon and John Oleason."

Peltier used some practice in the summer to his advantage with his impressive fall statistics. Peltier has 11 RBIs in 22 at-bats. "I played in a summer league with competition similar to this, and I did pretty well, so I was hoping I'd do well here," said Peltier. "From what I've seen we've done fine. The pitching's done well, and the hitting has been good. The Blue-Gray games are a good test for us."

Fellow infielder Pat Pesavento participated in the Cape Cod League over the summer. His team, the Kettleers, led by Gallo, reached the finals after a 45-game season.

"I saw great competition in the Cape Cod League," said Pesavento. "Guys from Arizona, UCLA and Florida State, and guys you saw in the College World Series were in that league. It was compared to Class AA ball."

Junior Steve Skupien also has added punch to the Irish infield, with a .424 average, two home runs and 10 RBIs during the fall.

HOUSTON - Ray Knight keyed a three-run 16th inning yesterday and the New York Mets survived one last Hoosier rally to win their third National League pennant, 7-4. In the longest postseason game ever, the Mets' extra-inning rally was their second of the game as they erased a 3-0 deficit in the ninth inning and took a 4-3 lead in the 14th before the Astros' Billy Hatcher tied it in the bottom of the inning with a home run that hit the screen at the left-field foul pole.

New York will open the World Series at home Tuesday night against Boston, who won the American League playoff series. It makes that long for Mets to come down from their pennant clincher, a game that provided brilliant pitching and clutch hitting and saw the Astros' dream finally die with the winning run on base.

Darryl Strawberry, hitless in four at-bats against Boston, hit a two-run single in the ninth that erased a 3-0 deficit in the ninth inning and took a 4-3 lead in the 14th before the Astros' Billy Hatcher tied it in the bottom of the inning with a home run that hit the screen at the left-field foul pole.

New York's Jesse Orosco and Gary Carter (above), elated over Tuesday's extra-inning victory, celebrated once again last night as the Mets came from behind to beat the Houston Astros, 7-4.

The Notre Dame field hockey team went Wednesday's game against Michigan State, hoping to even its record at 5-5 and head into their Boston trip on a high note. The Irish lost that game to the Spartans, 2-1, and will be in search of a win on Friday night against the same team that defeated them last weekend.

There were some bright spots for the Irish, including a strong performance by senior Bernadette Suplik, who had two goals and an assist in the game. Junior forward Brandy Wells also had a strong game with two goals and an assist. The team as a whole played well in practice and is hoping to carry that momentum into the game on Friday.

In case anybody's wondering about the Motre Dame football team, Joe Klim has more on that in the next section.

New faces to aid struggling Irish

By MARY BURNS

Holtz, therefore, has little choice but to go with some of his younger players. As for the spark this new transition could generate in his team, however, Holtz is just glad for the chance to reward some of his players who have worked hard.

"I say this from the bottom of my heart," said Holtz. "Despite all the adversity, despite every thing that has gone against us, this football team went out Wednesday, after the Pitt loss, and worked with an honest and sincere effort to get better. Things are going to get better for this team. I have no doubts about it."

As for any sudden youth movement on the Irish team, Holtz won't even look at his watch until next week - when Notre Dame has an open date. Only then, after a week to evaluate his team, will Holtz make any drastic changes with next year in mind.

In case anybody's wondering about the Notre Dame quarterback situation this week, Holtz has once again affirmed Steve Beuerlein as his starter. Apparently, junior signal-caller Terry Andrysiak, who did not attempt a pass and played only three series last week after being named the starter, will continue in his previous role as a back up. On Tuesday, however, Holtz did hint that the issue could get cloudier if sophomore Steve Belles continues to play well in practice.

"With the quarterback situation, you try to use variety," said Holtz. "A Heisman Trophy candidate is not always possible, so you just want a quarterback whose going to give you the right plays and utilize the weapons we have on our football team. At the present time, Steve Beuerlein gives us the best plays in the most opportunistic times and is the most consistent doing that."

"Beuerlein is the number-one quarterback. But I do think we will see some of Steve Belles before this season is over as well."

Holtz leaves little doubt about his mental attitude and that of his 1-4 club, when asked by Inquirers.

"Are we embarrassed? - no," said Holtz in a tone that would be described as emphatic. "We're upset, yes. Frustrated, yes. Disappointed, yes."

"But am I embarrassed? There ain't no way in this world. You can't and people act like you should be embarrassed, but I can't be when I see the young men work. I can't say anything negative about the players. I can say a million negative things about the coach, but not the players. We're all tired of losing."
