Six to run for ND student body president

By BETH COWNGILL
Staff Writer

Six potential student body presidential tickets and at least one candidate from each student senate district were present at a mandatory meeting for prospective candidates Wednesday night.

The prospective presidential tickets include Theodore's manager Vince Willis and junior class president Cathy Nonnenkamp, juniors Todd Graves and Brian Moffitt, Grace Giorgio and Bill Sammon, Willie Franklin and Jim Mangan, Black Student Union President Martin Rodgers and L.B. Eckekamp.

Sophomore Class President Paris Perrish; and Ann Rucker, President Reagan to seek the

ons tests, postponing further
day for halting funds for weap­

dates are required to attend.

In Brief

The number of incunabula in the Memorial Library is now 76, thanks to a gift of a text written by King Ramanus, bearing the first edition printing dated of Feb. 6, 1946-97. Incunabula are books printed before 1500. The author was a member of the Order of the Hermits of Saint Augustine who became Archbishop of Bourges, France, in 1286 and died in 1316, according to Prof. A. L. Gabriel, director emeritus of the Medieval Institute, and donor of the book. - The Observer

Off-key singers are in demand by a University of Washington music professor who says she can teach anyone to sing. Elena Cooper has taught an evening, non-credit class in tuneless singing since 1979 and only accepts the worst of off-key warblers - students. - The Observer

Laser Tag gets the green light at some campuses, where it is an almost official sport. Teams like the Lensmen of California State University-Long Beach and the Falcons of Seattle Pacific University participated in the sport's first national collegiate championships last month. The weapon is a three-in-one infrared beam with infrared wearing targets that register hits with red lights. The game was originally designed for children. - The Observer

A Video News system has replaced the College of Business' in-house newsletter at Ohio State University. A two-minute news segment is repeated continuously, Monday through Friday. The video can be prepared much more quickly than the printed newsletter, which required two months to produce. Officials hope the video format will also increase student interest in college activities. - The Observer

Press has a chance to bring positive attention to AIDS

Pianist Liberace, famous for his garish costumes and flashy rings, died Wednesday. At his death, however, a new notoriety overshadowed the performer's legacy: he's carried the press speculation that he died of AIDS.

This type of press speculation is nothing new; it has happened before. When Liberace had died, for example, the newspaper headlines did not report simply that the actor had died, but that he had died of AIDS. More recently, the death of designer Perry Ellis generated controversy when several dailies, including The Washington Post, suggested that AIDS was the probable cause. The Liberace obituaries are simply another episode of AIDS speculation, and thus are not particularly interesting.

What does interest me, however, is the journalistic dilemma such reports pose. The ethical problem of whether newspapers should violate the victim's privacy by citing AIDS as a possible cause of death. The question currently causes debate among editors and AIDS victims alike, and its answers are inevitably caught up in the social stigmas and health hysteria surrounding the disease.

To say that AIDS carries with it the stigma of homosexuality in a heterosexual society is nothing particularly new or profound. One need only note the proliferation of AIDS jokes in the past few years (one popular joke book dedicates an entire chapter to poking fun at the predominantly gay disease) to perceive that homophbic Americans are slow to accept the deadly seriousness of AIDS. Yesterday, I heard a student say with a chagrined laugh that he had lost the Liberace death pool; several of his friends had placed bets on when Liberace would die from AIDS.

Given this jeering attitude and the morbid fascination with AIDS, it is not surprising that families of AIDS victims would want to disguise the diagnosis to protect their privacy. But if we are to dispel this cavalier attitude that the disease is a joke, the press must publicize that AIDS victims have a right to privacy. However, if AIDS is not a joke, then we must do something different in the press.

This is precisely the reason why a Honolulu paper decided to announce that its managing editor was suffering from AIDS. When Executive Editor of the Honolulu Star-Bulletin John Simonds discovered that Bill Cox was resigning his job because he had contracted AIDS, Simonds grappled with the problem of whether newsmen should violate the victim's privacy by citing AIDS as a possible cause of death. Cox decided to write a column about his condition.

"As a journalist, I have spent my career trying to shed light in dark corners," Cox wrote. "AIDS is surely one of the darkest corners. It can use some light."

Cox's column shows how reporting on AIDS can have a positive, enlightening effect on the reading public. The ethical problems occur when the reports are used for exploitation rather than education.

Headlines like the one in Tuesday's Chicago Tribune, which read "5 Catholic churchmen dead of AIDS," use the disease to titillate the reader's curiosity and exploit clerical taboos ... and in the process, raise revenues. After all, journalism is a business, and AIDS sells papers.

As the AIDS problem grows, so will the challenge facing the press. One would hope editors will use their public forums to bring positive attention to the disease, and not simply to continue its status as a misunderstood social problem.
Professor: female ideals too high

By PEGGY PROSSER
Staff Reporter

Women tend to set very high standards of perfection for themselves, which are admirable, but unrealistic, according to Saint Mary's assistant professor of psychology Catherine Hale.

In a lecture, sponsored by the Sexuality Education Council of Saint Mary's College, she said women set themselves up for failure and low self-esteem.

Self-esteem is rarely associated with women, who spend the majority of their lives wishing they had greater self-esteem, Hale said. This affects the way women cope in addition to everything women do, see or think, she added. Hale also said the lack of self-esteem affects women's choices concerning boyfriends and mates.

Self-esteem and self-concept do not go hand in hand, Hale said. "The gap between self-concept and self-esteem is large for many of the women who have a fairly low sense of identity and self-esteem. These women tend to stay in relationships that are unhealthy for them. The second group are fairly confident and have a high level of self-esteem, but have difficulty making a commitment and staying in a relationship for any length of time," she said.

According to Hale, everyone has or her own "ideal self" which is the notion of who we think we should be. "The wider the gap between self-concept and ideal self, the lower the ideal self," Hale said.

The majority of fathers want sons, she said. The birth of a daughter, therefore, brings about more problems and distress between couples as fathers admit to feelings of disappointment and deprivation when their wives give birth to daughters, she said.

This distress causes parents to treat sons and daughters differently, Hale said. Boys are given more mechanical toys as they learn about ruining their self-esteem but girls have problems because they are afraid of hurting people's feelings.

Women can be divided into two groups, Hale said. The first is the group of women who have a fairly low sense of identity and self-esteem. These women tend to stay in relationships that are unhealthy for them. The second group are fairly confident and have a high level of self-esteem, but have difficulty making a commitment and staying in a relationship for any length of time, she said.

Second Marine force sails into the Mediterranean

Associated Press
WASHINGTON - A second amphibious force of Marines continued to sail eastward into the Mediterranean toward a flotilla of U.S. warships stationed off the coast of Lebanon on Wednesday as the White House sought to dampen speculation that a military strike was in the offing.

Pentagon officials, speaking on condition of anonymity, said three Marines aboard five ships that left Spain on Tuesday would link up with U.S. forces already in the area by Friday.

The sources also disclosed the Navy force already on station is slightly larger than previously thought - including three Marine amphibious ships and four ammunition and oiler support vessels - and that several smaller warships had moved within 50 to 100 miles of the Lebanese coast.

The sources said the main aircraft carrier battle groups were maintaining a standard patrol further out to sea. The carriers Nimtz and Kennedy were conducting routine air operations as their jet fighters remaining in the skies over the carrier and not venturing far off it.

At the White House, permanent press spokesman Martin Fitzwater said reporters could not rule out the possibility of a military strike, but he went out of his way to discourage talk of such action.

"I can't speculate on any future course of action," he said, adding the administration has substantial forces in the area but I would urge (you) not to speculate along those lines.

Fitzwater, when asked about rumors of a special action if any hostages were killed, replied, he could urge a little downgrading of the speculation in that area. Our forces are those that in many ways is normal activity and operations.

Bennett and Laney halls.

Sophomores Michael Car- rigan and David Bruner are running for the senate spot in disttrict three, which includes Dil- lon, Peetz, Canan, Lyons, Morrissey, Badin and Howard halls.

Incumbent district four senator, Stephen Viz, will run again, facing freshman Mike Schadek and possibly sophomore Laura Janke, who cleared the allegations. The report did not say where the Thursday flight would take the journalist who is based in Cairo.

Premier Hussein Musavi told Tehran radio Wednesday, without elaboration, "After being questioned, the issue has been clarified."

Shortly before the IRNA report, the BBC (in Arabic) said Seib would be expelled in two or three days. Asked in a Tehran radio interview why a foreign reporter was detained, Mus- avii said the Seib case had gaged in certain investigations and collecting intelligence at the front.

Seib was among 57 foreign correspondents and photographers invited for a tour of the border battle zone where Iranian forces have pushed into Iraq toward its southern capital, Basra. The Tehran government, he said, has been at war since September 25th.

He had been in Iran for 10 days when seized Saturday out side the Tehran United Press offices. The journalists were allowed to leave.

has not decided whether or not to run. The district includes Flanner, Grace, Hemenway, East and West Halls.

Former current Bookstore Basketball Commissioner David Wenc is the unopposed candidate for the off-campus senate district. All candidates must have their petitions for office on file with the Election Committee by February 10th. The 1987 student body to be elected is 1,900. The Ohio student body will release the list of official candidates. Campaigning will begin Feb. 11 at 12 p.m., according to Gamache.
Liberace dies as his fans stand vigil

Associated Press

PALM SPRINGS, Calif. — Liberace, the unequalled king of glitter who dazzled audiences with romantic piano flourishes and outrageous artpunky costumes, died Wednesday. He was 67.

Denise Collier, his spokeswoman in New York, confirmed the death Wednesday afternoon.

Liberace had been gravely ill for weeks with what aides said was anemia, emphysema and heart disease. A published report that he had AIDS.

On Monday, when word spread that death was imminent, friends and relatives gathered at his home. Dozens of fans and reporters stood vigil outside.

Democrats

continued from page 1

conceded the protest had also been considered.

The Democratic resolution labeling the nuclear tests "a setback" for arms control and said it would escalate the arms reduction package.

The resolution never went to a vote because House minority leaders decided not to bring it up for a vote.

Hughes said Wednesday's exercise was routine.

He said Covey sat in the pilot's seat of the simulator, with Bilkers in the commando's couch on the left side of the cockpit. Lounges was behind Covey for support duties, similar to those of a flight engineer on an airliner. Only Covey was in the role he will assume on the actual flight.

The simulator is a duplicate of the shuttle flight deck. Computer simulate signals from actual shuttle equipment and make the cockpit instruments respond as if in real flight.

Television screens in place of the cockpit windows give views similar to what Covey would see during an actual mission.

Hughes said Wednesday's training was designed to keep the astronauts tuned up for training problems that will be specifically designed for their mission.

"This will be just a routine training session," said Hughes. "We've got months before it really matters."

The principle payload of the Discovery mission is a Tracking and Data Relay Satellite, or TDRS, that NASA will use to relay signals from orbiting spacecraft. A twin of the TDRS was destroyed when Challenger blew up.

Crew of next space shuttle

begin practicing launchings

Associated Press

SPACE CENTER, Houston - Three of the astronauts who will fly the first space shuttle mission since Challenger exploded began training as a team Wednesday, practicing launches and landings in a simulator.

Pilot Richard Covey and mission specialists John Lounge and David Bilkers entered a computer-driven cockpit simulator at the Johnson Space Center for four hours of practicing the intricate procedures required to launch and land the space shuttle.

Mission commander Frederick "Rick" Hauck and mission specialists George Nelson were out of town Wednesday, but all five crew members are scheduled to start joint training next week.

They are scheduled to be launched from the Kennedy Space Center on the space shuttle Discovery on Feb. 18, 1986, although that date is expected to be pushed back. It will be the first shuttle flight since Challenger exploded on Jan. 28, 1986, killing its seven crew members. The shuttle fleet is grounded until engineers correct flaws that caused the Challenger accident.

The mission is planned as a four-day flight, with the astronauts placing a satellite in orbit and operating a package of scientific instruments. Landing is slated for Edwards Air Force Base in California.

Training coordinator Frank Hughes said Wednesday's exercise was routine.

He said Covey sat in the pilot's seat of the simulator, with Bilkers in the commando's couch on the left side of the cockpit. Lounges was behind Covey for support duties, similar to those of a flight engineer on an airliner. Only Covey was in the role he will assume on the actual mission.

ATTENTION BSN CLASS OF 1987

The Air Force has a special program for 1987 BSNs. If selected, you can enter active duty soon after graduation—without waiting for the results of your State Board. To qualify, you must have an overall "B" average. After commissioning, you'll attend a five-week internship at a major Air Force medical facility. It's an excellent way to prepare for the wide range of experiences you'll have serving your country as an Air Force nurse officer. For more information, call:

Doctors discover new drug
to help cancer victims’ fight

Associated Press

BOSTON - In a new approach to fighting cancer, doctors say they have used light to activate a beneficial drug in the bloodstream and apparently vaccinate cancer victims against their own disease.

The technique has produced remarkable remissions in some people with a relentlessly fatal form of blood cancer who had not responded to ordinary treatment.

The therapy appears to marshall the body’s own immune defenses to zero in on cancer and destroy it. It seems to do this without causing nausea, hair loss or any of the other common side effects of chemotherapy or radiation.

“It’s a very early stage in the development of something very exciting,” said Dr. Richard Edelson, who created the treatment. “I don’t want to overestimate our success, but with a single disease we’ve got some strong concrete data.”

He says his approach may become the standard treatment for cutaneous T-cell lymphoma, which strikes more than 10,000 Americans. It may also prove competitive with tacking other forms of blood cancer as well as disorders ranging from arthritis to organ transplant rejection.

The therapy combines two rapidly emerging approaches for managing cancer and other diseases: manipulating the body’s immune system and switching on medicines with light.

“For the first time, a drug that has no activity itself has been activated by light in the blood of patients as their blood was being routed outside the body,” said Edelson, who is chief of dermatology at Yale Medical School.

A report on the work, conducted at five institutions in the United States and Europe, was published in Thursday’s New England Journal of Medicine.

“It’s very clever,” said Dr. Faye Ausin, an immunologist at the National Cancer Institute. “There is definitely cause for optimism.”

Doctors have tested the therapy so far on 37 people with advanced cases of cutaneous T-cell lymphoma. This is a cancer of a particular variety of white blood cells called helper T cells. These cancerous cells invade the skin, and the first symptom is often a rash, which may eventually cover the body and attack other organs.

To see that it was our baby, not his baby and not just my baby, and that she needed our Mrs. Whitehead and Stern, who didn’t know where Mrs. Whitehead was calling from when he made the July 15 tape, said Wednesday, “I had visions of her being in some rooming house with the baby and taking pills or something. I was frightened.”

The tape was introduced into evidence by the Stern’s attorneys, who have been trying to demonstrate the Whiteheads do not have the emotional or financial stability to raise the child.

In regard to the upcoming election she said, “We’re up a little bit.” Hetterich, current junior class president, said a major basis for her ticket’s campaign will be change. Hashagen added, “We’d like to shake it up a little bit.”

 Authorities question high school students after discovery of satanic bible in locker

Associated Press

CORYDON, Ind. - Authorities are questioning high school students about their involvement in Satanism following the discovery of satanic materials at Corydon High School.

Elmer Saulman, principal at the school, said he checked some student lockers and found a satanic bible and three drawings featuring satanic creatures.

Saulman and police believe about six students are involved in activities related to devil worship. Although some said they had satanic bibles, none admitting holding meetings or widespread visualizations.

Cartoon cat to make debut with orchestra

Associated Press

MUNCIE, Ind. - Garfield, the canterous cartoon cat, will leap from the comic pages Sunday onto the stage as he makes his concert debut with the Muncie Symphony Orchestra.

"Cats as a whole are very musical animals," said Garfield's creator, Jim Davis. "I've always felt that they moved to a rhythm. They live almost in a cadence. So music is a very natural thing for them."

Davis, who produces his Garfield and U.S. Acres cartoon strips from his Muncie-area home, said the concert in Emens Auditorium was scored by Ed Bogas, composer of the music on the Garfield television specials.

The program will open with "The Garfield Overture," or Rondo a la Tuna, and will include Straus's "Radetzky March," and Mendelssohn's "Watermassen, Sheriff Ed Davis said Tuesday.

Davis said his department is investigating at least 25 reports of anonymous death threats, including one to his own wife, Lisa Davis. She received a call Friday from a male who said she would be sacrificed at a black mass.

Saulman also received a call while he was checking the lockers. A male voice told him that "it would be too bad" if he went through student lockers.

Saulman said one student who disrupted classes and intimidated students was expelled on Monday. The 16-year-old boy had information on Satanism, he said.

In the last few weeks, students have streamed to counselors for reassurance, Saulman said. There also have been reports of mutilated animal's, overturned headstones and satanic symbols painted on a house.

Davis said he has found no evidence of the animal mutilations, but a farmer told state police his bull was killed and had its testicles and anus cut out in December.

The farmer, who did not want to be identified because his fear for the safety of his family and livestock, told the Louisville Courier-Journal that whoever killed the bull drained its blood. No blood was found on the ground or in the carcass, he said.

Golf club-wielding youths blamed for 15 assaults; police form 70-member task force

DENVER - Police formed a 70-member task force Wednesday to hunt a brazen gang of golf club-wielding youths blamed for at least 15 recent assaults, including the beating death of a woman bringing groceries home.

As many as six men have been involved in the attacks near the state Capitol, and robbery appears to have been the motive in each assault, police said.

The assailants, who struck over the past 11 days, carried golf clubs in at least six attacks and knives at least once, and in all cases intimidated their victims, said Detective John Wyckoff.

The woman who died in the most recent attack was fatally beaten as she pushed a cart of groceries home about 10 p.m. Tuesday, authorities said.

The identity of the woman, described as being in her 40s, has been difficult to track down because her purse was stolen, said Sgt. George Masicistro.

Police said a blunt object was used in the assault, but they have not specified it was a golf club. However, they are investigating the death as connected to the other attacks in the high density neighborhood where transients live alongside

Chasing one's shadow

An unidentified female jogger makes her way along the road in front of Saint Mary's Lake at sunset yesterday. Unseasonably warm temperatures have lured joggers outdoors this winter.

The most successful college graduates have a uniform appearance.

Dress for success.

Enroll in the Army Reserve Officers' Training Corps, and you could graduate with the privilege of wearing the proud gold bars of a second lieutenant as well as a cap and gown.

Army ROTC is the college elective that gives you an opportunity to learn, and practice, management skills. Experience leadership styles and motivational techniques. And gain the self-confidence that can spell success in any career, civilian or military.

Start that career with the advantages only Army ROTC can give you. Talk to your Professor of Military Science, today.

Did you watch the Superbowl? Stupid question, of course you did. Every true American watches this monumental game. Only true Godfathers don’t watch Superbowls. Being from Minnesota, home of the only true football team, the Vikings, I had no real interest in the outcome of the contest. Nonetheless, I enjoyed all the pomp and circumstance. Big John Madden, the ridiculous half time extravaganza, the half time coin flip...the Slice blimp. The what?

Matthew Slaughter
and another thing

Yes, you read it correctly. In case you didn’t notice, there was no Goodyear blimp providing those spec-tacular aerial shots this year. Slice pop, in a reprieve display of capitalism at its most base, outdid Goodyear for the rights to the blimp. An outrage? You bet. You just don’t get rid of the Goodyear blimp; it’s an institution as American as cheating on your taxes. I couldn’t believe they would cast aside something as intrepid in American soci­ety as the Goodyear blimp for the Slice blimp. The motive? I was appalled, nay, offended. This got me thinking...is there a trend forming? Is America today cast­ing aside our great traditions for money? Unfortunately, the answer is yes.

Take cartoons for example. Remember Bugs Bunny/Road Runner shows? Vintage cartoons. Stupid jokes and lots of violence - what more could a kid want? And you didn’t just get Bugs and the Road Runner, mind you, you got a veritable plethora of cartoons’ finest artists: Porky Pig, Daffy Duck, Foghorn Leghorn, the Tasmanian Devil...and what are kids watching today? Nothing more than commer-cials. Let’s take a look at the titles: Cars. Children’s. The Avengers. G.I. Joe Show. These shows are nothing more than hour-long commercials which are aimed at the parents for new toys. Remember the one where Bugs played the Barber of Seville? Bugs got his ear wacked off and the baseball card industry is anarchy. All three companies have their own unique cry of agony in their titles. The Goodyear blimp made its glorious escape. Baseball cards used to be made by one company and one time has escaped. Baseball cards used to be made by one company and one

Career & Placement Services: More Than A Placement Bureau

Hang In There Seniors!

THURSDAY, FEBRUARY 5, 1987

have your parents said to you, "You should see the placement office to get a job?" Or maybe a close friend has confided to you, "The placement office is great. They got me a job in Chicago." The truth of the matter is the office of Career and Placement Services does not "get" graduates jobs. Agreed, the term placement can be misleading because it implies the arranging of a job for students. Encourages a passive approach to job hunting. Yet, despite the name, the students who are aware of the numerous opportunities available to them through Career and Placement have come to see this service as more than a placement bureau.

Tim Smith, a senior pre-professional studies major from Grand Rapids, Mich., states, "I've enjoyed my coursework in the sciences, but I wasn't viewing medical school as my only option. I met with a professional staff member in Career and Placement to discuss my career options. Since that time almost six months ago I've had four on-campus interviews and hope to come to see this service as more than a placement bureau. Career and Placement Services is more than counseling and on-campus interviews, however. Monica Schalk, a sophomore from Huron, Ohio, just recently visited the Career and Placement Services office. "I was confused about my decision to major in natural sciences. I made an appointment to use the DISCOVER program and I found out I'm also interested in the social sciences. I'm still not absolutely sure, but through DISCOVER I have another option to consider." DISCOVER, a computer-assisted career information and guidance system is one of Career and Placement's most innovative services. It allows the user to conduct a self-assessment as well as an in-depth exploration of occupations which are of interest. Monika is approaching her career planning realistically, using self-assessment and independent research as preliminary steps to deciding on a career.

Jeff Rice, assistant director of Career and Placement Services, joined the staff just seven months ago. "My first impression of the services was how easy they were for students to use. If a student simply wants to research a particular career, they can spend hours of uninterrupted time in the career library or view one of many videotapes on careers." The career resources library contains a wealth of information for students in different stages of their career development. Reference guides and books on life planning, self-assessment, career decision-making, resume writing, and interviewing skills are contained in the library. Pamphlets on specific careers and literature from over 500 employers are also available.

In addition to the library, students are encouraged to attend workshops and presentations held throughout the year on such topics as career decision-making, resume writing, interviewing, opportunities in specific majors, mail campaigns, and making a job decision. The office also arranges for over ninety employer receptions each year. These activities are scheduled for students to meet employer representatives on an informal basis. Perhaps it's in the individual attention given to students where Career and Placement shines. Whether it's meeting with underclassmen to discuss personal career goals or assisting seniors with interview preparation through videotaped mock interviews, the office's mission is to meet individual concerns. Kizzy Arnold, director of Career and Placement Services, affirms, "Our office has established many goals, yet none is more important than helping the individual student define clearly and specifically their career goals. Students often encounter questions or problems during their career planning, which can best be solved by consulting an experienced career counselor. Our professional counselors look forward to meeting students on an individual basis to discuss their unique career concerns." The staff of Career and Placement Services believes career decisions are best made within a supportive environment where a variety of options are considered. Such an environment is waiting for those who understand Career and Placement Services to be more than a placement bureau.
The Profile Form—What Is It?

McDonnell-Douglas, Foote, Cone and Belding; Westminster Electric; Price Waterhouse; General Mills; Salomon Brothers—this is just a sampling of the more than 150 corporations which ordered profiles of incoming seniors from the Career and Placement Services office last summer.

What is the profile student? All seniors who take on-campus interviews must complete this two-sided form, containing much of the same information as on a resume. "We use a standardized form," explains Paul Reynolds, associate director of Career and Placement Services, "so that employers can locate key information about a student quickly and easily."

"Including your profile in the booklet for students in your major will give you a competitive advantage."

Placement Services, "so that employers can locate key information about a student quickly and easily."

To gain exposure with a variety of firms prior to interviewing in their senior year, juniors are encouraged to hand in their profile forms. Reynolds explains, "To learn how to market themselves on the profile, juniors should attend one of the workshops sponsored by Career and Placement Services shortly after spring break. Doing so could be a major step contributing to a successful job campaign in their senior year."

Junior Profile Workshops in April

- April 8 7 p.m. (123 Newland)
- April 9 7 p.m. (118 Newland)
- April 13 7 p.m. (123 Newland)
- April 14 7 p.m. (123 Newland)
- April 15 7 p.m. (123 Newland)

Profile forms are available in the Career and Placement Services Office.

Can A Liberal Arts Degree Pay The Bills?

Contrary to the thoughts of many Arts and Letters students, and sometimes their parents, a liberal arts degree is marketable. What it requires is preparation, research and a good dose of imagination to identify possible careers. These three activities are especially advised during the sophomore and junior years.

Research is crucial to discovering career options for the liberal arts major. It not only sheds light on the number of occupations available, it also helps focus on the kinds of skills various careers require. Beyond researching occupational literature, Joan McIntosh, career counselor at Notre Dame, advises "talk with people and place yourself on the profile, juniors who might be interested in pursuing a career in retail management. We then encourage these students to attend our corporate presentation and to consider scheduling an interview when we are on campus."

Marynell O'Connell, director of recruiting at Peterson and Company in Chicago, adds, "Students who fill out the profile in the latter part of their junior year frequently are those who are motivated, focused in their career goals, and well-organized—traits we look for in a candidate."

Before filling out the profile, students should first assess themselves and the industries they will be targeting in their job search. Only then will pertinent information be included on the form.

Pat Collins, a May 1986 graduate of Notre Dame presently in the analyst program of The First Boston Corporation in New York, feels that "gathering the information to include on my profile prior to leaving campus at the end of my junior year required me to do some thinking about myself and to establish a plan for conducting my job search. The biggest mistake is to wait until your senior year."

The First Boston Corporation in New York, feels that "gathering the information to include on my profile prior to leaving campus at the end of my junior year required me to do some thinking about myself and to establish a plan for conducting my job search. The biggest mistake is to wait until your senior year."

To learn how to market themselves on the profile, juniors should attend one of the workshops sponsored by Career and Placement Services shortly after spring break. Doing so could be a major step contributing to a successful job campaign in their senior year.

The National Endowment for the Humanities, conducted a survey of successful Americans. While several prominent examples are not full proof of the value of a liberal arts major, the results are suggestive. Cheney found, for example, the communications world dominated by liberal arts majors. Thomas H. Wyman, chairman of CBS, majored in English, as did Cathleen Black, publisher of USA Today.

Washington Post columnist William Raspberry studied history; NBC News anchorman Tom Brokaw, political science. Cheney herself was an English major.

'Research is crucial to discovering career options for the liberal arts major.'

Obviously, these individuals didn't land their present positions right out of college. Yet, advancement didn't just happen without various levels of desire and intellectual curiosity, traditional by-products of the liberal arts. Robert Key, Vice President Account Supervisor of Leo Burnett Company, notes, 'What's crucial for advancement in advertising is not specialized training but the ability to think critically and judge wisely. At Burnett, we often find these qualities in liberal arts majors.'

Conducting research on careers, learning what people do in a wide variety of jobs, and using one's imagination are essential in making a sound career decision. McIntosh confirms, 'Increase your career options by studying careers—the same way you have increased your mind's range by studying the liberal arts.'
TECHNICAL SALES: A Well Kept Secret

Would you believe that technical sales work is fairly independent, successful, and offers the right conditions to put in long days with little or no supervision? Many graduates decide that this type of career offers the highest level of personal satisfaction.

According to Jeff Rice, assistant director of the Career and Placement Services office, recruiters state that a candidate for technical sales must be ambitious. Since technical sales work involves approximately 50 to 60 percent of the time spent with customers, engineers so that we provide products immediately responsive to their needs. Coordinating the service of the product after its sale is the other half of the equation. This may include maintenance of a perspective arrangement for replacement of defective parts, responding to questions from the customer, overseeing bills, investigating delivery delays, or introducing new applications of the product. This entails frequent interaction with individuals within the representative’s own firm. Therefore, developing good rapport with one’s own fellow employees is vital to a sales representatives continued success.

Testing On The Rise

less than 100 miles due west of South Bend lies a mecca for young professionals affectionately referred to by some as "my kind of town." Chicago has become an entry-level career stop for many Notre Dame graduates, partly due to its proximity, and partly yet mostly due to the significant number of Chicago-based companies on campus. Domers are not the only young professionals who have packed their bags for the Windy City. Chicago has slightly more than 3 million people, with 391,471 men and 424,464 women between the ages of 25 and 44. Should you find your own career heading west after graduation, here are some tips.

Finding a place to live will be your first priority. Get a copy of 'The Reader,' it's a free listing of apartments," advises John McNabb, an '86 accounting graduate. "Be willing to experiment. Chicago has a lot to offer in terms of living. There are many apartment-finding services which charge fees, but get a comfortable pair of walking shoes, The Reader, and put the pavement." For urban dwellers, cars are unnecessary and, generally, inconceivable, and too expensive to house. Of course, work may necessitate a car, but Chicago's convenient public transportation, featuring the legendary "L" train, makes door-to-door travel time approximately 20 to 30 minutes. Kathy Balane, an '86 accounting graduate observes, "From 9 to 5 during the weekdays, no one walks, they don't. You'll see more tennis shoes than in a Reebok factory.

Pre-Employment Drug Testing On The Rise

Nearly 30 percent of employers hiring this college's graduates conduct pre-employment drug tests, and another 20 percent plan to adopt the practice within the next two years, according to a recent study done by the College Placement Council of almost 500 national employers. The data found in our survey corroborate other reports that drug screening programs are on the rise. Clearly the study shows this is a major employment issue," said Warren Kaufman, acting executive director of the College Placement Council. The number of firms recruiting at Notre Dame which have notified the Career and Placement Services office of their intention to do drug screening remains relatively small, according to the director, Kitty Arnold.

"The data found in our survey corroborate other reports that drug screening programs are on the rise."

N

"To date, only eleven of the approximately 280 firms recruiting at Notre Dame have notified us of requiring applicants to take drug tests. However, I would estimate that more ALPS firms are doing pre-employment drug testing but simply have not notified us as yet," Arnold reported. "We would estimate that the only companies which have been referred to are: Champion International, Chrysler, Dow Corning, Eastman Kodak, Exxon Research Center, General Foods, International, IBM, Honeywell, "

If you do opt for walking, you'll need an equipped wardrobe. Chicago has considerably been called the "Windy City." Gusts of 35 mph off the lake in winter are not uncommon. "You'll experience all four seasons in Chicago," warns Gretchen Wishnoln, an '86 accounting graduate. She adds one needs a "long, warm coat and a good hat," winter "boots are a must." Once you've made it through winter, summer promises more unpleasantness. "Not humid, sticky. It's like home away from South Bend",

If you want to succeed, Lake Michigan offers a moderating effect in the summer, and Chicagoans do enjoy their summers. Chris is anticipating fun, "I can't wait for summer."

"The data found in our survey corroborate other reports that drug screening programs are on the rise."

Second Interview Workshops

"February 9 4-5 p.m. Memorial Library Lounge
"February 10 4-5 p.m. Memorial Library Lounge
"March 4 4-5 p.m. Career & Placement Conference Room

"HINTS FOR ON-SITE INTERVIEWS"

Y

"If you've finally gotten the call inviting you to fly to the corporate office for an on-site interview. Congratulations! You are a giant step closer to that desired job offer. Before you go, take the advice of some recent grads who were in your place several years ago."

In 1985, the late Dr. John Linder of TRW, a long-time friend of Notre Dame, polled recently hired employees at his firm about their experiences with second interviews. His findings made in a report before his untimely death in September of that year included some of the following suggestions and tips:

Preparation for the plant or office visit is the key to success, according to many of the respondents. It is the number one area over which the applicant can control his or her performance. "The first impression is usually through orientation. If the results are positive, most companies will use a second, more sophisticated analysis technique as a confirmation. If the candidate still tests positive for illegal drug use, employment will generally be denied.

"One of the interesting aspects of this complex issue for me has been the apparent lack of student concern. Not a single student has spoken to me about the tests or questioned their legality or appropriateness," Arnold observed. "Among my colleagues in college placement and corporate recruiting, the questions of invasion of privacy, breach of confidentiality, accuracy of the tests, and the ability of the tests to assess impairment for the job are currently being debated." Since so many of the issues surrounding drug testing in the workplace are still unclear, she advises students to stay abreast of new court decisions, both for job applicants and current employees, and to be aware of the far-reaching implications of casual drug use with regard to today's labor market.

"If you want to succeed, Lake Michigan offers a moderating effect in the summer, and Chicagoans do enjoy their summers. Chris is anticipating fun, "I can't wait for summer."

"HINTS FOR ON-SITE INTERVIEWS"

Y

"If you've finally gotten the call inviting you to fly to the corporate office for an on-site interview. Congratulations! You are a giant step closer to that desired job offer. Before you go, take the advice of some recent grads who were in your place several years ago."

In 1985, the late Dr. John Linder of TRW, a long-time friend of Notre Dame, polled recently hired employees at his firm about their experiences with second interviews. His findings made in a report before his untimely death in September of that year included some of the following suggestions and tips:

Preparation for the plant or office visit is the key to success, according to many of the respondents. It is the number one area over which the applicant can control his or her performance. "The first impression is usually through orientation. If the results are positive, most companies will use a second, more sophisticated analysis technique as a confirmation. If the candidate still tests positive for illegal drug use, employment will generally be denied.

"One of the interesting aspects of this complex issue for me has been the apparent lack of student concern. Not a single student has spoken to me about the tests or questioned their legality or appropriateness," Arnold observed. "Among my colleagues in college placement and corporate recruiting, the questions of invasion of privacy, breach of confidentiality, accuracy of the tests, and the ability of the tests to assess impairment for the job are currently being debated." Since so many of the issues surrounding drug testing in the workplace are still unclear, she advises students to stay abreast of new court decisions, both for job applicants and current employees, and to be aware of the far-reaching implications of casual drug use with regard to today's labor market.
New rules necessary to better college sports

Third And Long  January, 1986  Holy Cross head football coach Rick Carter commits suicide following a disappointing season.

Varnum third and long

February, 1986. At an N.F.L. scouting combine, the top college football seniors were given drug tests. Over 50% of the players tested positive. No action was taken against these players.

In November, 1986, investigations by the N.C.A.A., revealed widespread and systematic drug use in the Southeastern Methodist University football program. In that same season, S.M.U. was found guilty of violating both the N.C.A.A. and the school administrative rules in the football program. Following this, both the head football coach and athletic director resigned their posts, apparently getting off scot-free.

During October, Oklahoma All American linebacker Brian Bosworth and U.S.C. All American offensive lineman Jeff Bregel both test positive for steroid use and are banned from all athletic activities. As you can see, 1986 was not exactly a banner year for college athletics. Whether or not Fr. Burtchaell himself regards the Maguire position as a genuine Catholic position, the basic principles of legalized abortion is precisely the principle that underlie the Nazi extermination of the Jews, that an innocent human being can be defined as a non-person and sub- jected to death at the discretion of others. If the present leaders of the Theatre Department had been around in 1943, perhaps they would have provided a forum for a "Catholic" apostle for Auschwitz and Buchenwald. The Theatre Notre Dame Department (with a few notable exceptions) and Dr. Maguire deserve our greatest criticism. Both claim to be "Catholic" and yet neither accepts the teaching authority of the Vicar of Christ. It is time for the Theatre Department to institute a course on "The Moral Imperative of Truth in Labeling."

Charles R. Rice
Professor of Law

Sponsorship of debate misrepresents labels

Dear Editor:

The University press release stated that "The University of Notre Dame Theatre Department sponsored a February 9th debate on abortion between Dr. Daniel M. Maguire, professor of religious studies, and James T. Burtchaell. This sponsorship is a disgrace to Notre Dame."

There are four or five other freshman football players who are under investigation by the N.C.A.A. for drug offenses. Some of them have been found guilty and are being served with notices of suspension. At the same time, the head coach Pat Dye for allowing this to occur.

As you can see, 1986 was not exactly a banner year for college athletics. Although there are many stories, including the miraculous recovery of our own David Rivers, the N.C.A.A. systematically destroy their students. The 1987 N.C.A.A. convention is being held this month, and hopefully, some positive steps will come from this meeting.

The Observer is the independent newspaper published by the students of the University of Notre Dame de la Louisiane and Saint Mary’s College. Its primary purpose is to provide an outlet for the expression of the opinions of either institution. The news is reported as accurately and objectively as possible. Uninformed critics often forget that the majority of the Editorial Board, Commentaries, letters and the Inside Column present the views of their authors. Column writers are assigned to manage the paper and the free expression of varying opinions on campus. Through letters, is encouraged.

Over 500 letters to the editor and 300 column appearances last year in Viewpoint. Join the growing number of S.C.A.A. representatives who feel their thoughts and opinions do make a difference.
Several ski resorts are within a one hour drive from the Notre Dame campus. Ski World in Buchanan, Michigan, is just 30 minutes away. On weekends lift tickets cost between $15 and $17, depending on arrival time. Weekend rental prices range from $11 to $15. The curious can obtain additional information by talking to any freshman in the skiing program for physical education or calling (616)695-3847. Swiss Valley, located in Jones, Michigan, offers more for the advanced skier with approximately seven hills, three of which are chair lifts. If you have equipment, $17 purchases a lift ticket for an entire day. Tuesdays are free days with rental and lessons provided if you register before 4 p.m. Dial (616)244-8016 to learn more.

Double, triple, quad, and pommel chair lifts are in use at the Timber Ridge Ski area of Otsego, Michigan which is an hour away. Weekend rates are $17 for a lift ticket and $12 for rental. As with the previous ski areas, weekday prices and times vary so call toll free at 1-800-235-2292. Nearby cross country ski trails are in greater abundance than downhill ski resorts and presently are in excellent condition. The county parks of St. Patrick's, Baugo Creek, Madeline Bertrand, and Bendix Woods provide miles of scenic trails. All are within a half hour drive, with St. Patrick's being the closest at only 10 minutes away. These parks are open to skiers from 8 a.m. to 5 p.m. and require a $3 per hour fee for rental services which are available only on weekends. For those who wish to remain close to "home", the Notre Dame golf course boasts its own trails. Rental fees fluctuate depending on the number of hours. To keep the equipment, the NVA will be sponsoring cross country ski "moonlighters" on February 3rd and 17th from 7 p.m. to 9 p.m. With $1 rental and free hot chocolate they provide "cheap fun." On Sunday, February 18th, 8 p.m. to 2 a.m. in white suit and with a lovely array of lights for any brave student who dares to venture out, the moonlighters will be hosted. The deadline for entries is February 5th.

Skating enthusiasts do not have to travel far since the Notre Dame rink has free skating on Monday, Wednesday, and Friday from noon to 1 p.m. Students can also get a little exercise on the weekends as the rink is open from 8 a.m. to 10:15 p.m. on Friday and Saturday nights and from 2:15 p.m. to 4:30 p.m. on Sunday afternoon charging just $1. For those who cannot work these times into their schedule, Howard Park Ice Rink which is less than 10 minutes away on Jefferson Blvd. is open on weekday afternoons and for four different sessions every Saturday and Sunday. Others who enjoy the feel of the winter sun (yes, it is still there) will appreciate the outdoor rink at Merrifield Recreation Complex on Mishawaka Ave. Skating times are 5 p.m. to 7 p.m. on Tuesday through Friday and 11 a.m. to 4 p.m. on weekends. The center provides rental skates for $1.50. Tubing at St. Patrick's, Baugo Creek, and Bendix Woods offers an alternative for the more adventurous. Thrill seekers need pay only $2 per person. Hours at St. Patrick's and Baugo Creek are from 4 p.m. to 8 p.m., Saturday from 1:15 p.m. to 9 p.m., and Sunday from noon to 5 p.m. Bendix Woods proves that even tubing can be romantic. Not only do they remain open an extra hour on the previously mentioned nights, but they also designate Friday night as two for one. Snowshoeing at Baugo Creek demonstrates that walking through the white stuff does not have to be an arduous task as it appears. $3 will provide a pair of snowshoes and an unbelievable day of winter sightseeing.

A flat place worth mentioning is Michigan's Camp Belwood Recreational World. Forty-five minutes separates the Notre Dame campus from this 350 acre winter paradise. After paying $3, cross country skiers, with complementary map in hand, may spend the entire day roaming the trails. A sleigh ride and bonfire could make the day complete. Camp Belwood supplies the teams of horses, bonfire, hot dogs, and buns and the sleigh riding party can bring additional refreshments. Groups making reservations can host up to 10 or more people. The hour long costs $5 per person. With all of these recreational winter diversions, any complaints about the lake effect snow are unjustified. Hurry to get out into the brisk February breezes and take advantage of these winter opportunities because, before long, the fun will be melting away.

Senior Keith Terreri goes for the gusto

Snow days?

KAREN THOMPSON features writer

With at least another month of possible snow storms the ever present hope that classes will be cancelled remains. Timothy O'Meara, provost of Notre Dame since 1978, stated he "didn't recall a campus wide cancellation of classes during his term." This year however, with a record number of off campus students, the issue may become more serious.

O'Meara explained that there are three situations under which Notre Dame and Saint Mary's operate. "They operate with everything open, with classes open and services closed; or with everything cancelled except for security and maintenance." He stated that "there is no policy concerning off campus students and bad weather." O'Meara added, "Even if the number of off campus students increases, I do not anticipate the implementation of a policy regarding this.

Maureen Mullins, Professor of Nursing at Saint Mary's, feels that, "It is important for students to use prudent judgment concerning the weather." She stated that "msne - due to the weather because of extremely bad weather is something that should be kept between the students and the professor." Katie Cerel II, an off campus senior, agreed that "the responsibility for getting to class rests with the students and we have the responsibility for contacting professors if unable to attend." She also feels that "some sort of policy should be implemented to avoid confusion." Mary Ann Lynch, a Campus View resident, stated that "off campus students should be excused in bad weather so they can make up missed work."

On the other hand, Mike Breslin, a Notre Dame off campus student, explained that even though he was in "a three car accident because of the roads, no policy should be implemented because the students would abuse it." Trish Sullivan of Irish Hills apartments disagreed, stating, "both campuses cater to on campus students only. I had to drop a class because I missed several meetings due to the weather and couldn't make up the work." As Regina Lynch of Campus View says, "I didn't realize how bad walking to classes would be until it started snowing so much. It's really cold out there and it's a long walk."

In light of the aforementioned remarks, it is clear that there is some disagreement as to whether or not a policy should be put into effect and if so, what it should be. It is obvious however, that off campus students do have added responsibilities in getting to classes and meetings, regardless of the weather.

Explorers
continued from page 16

just did the things we needed to do to win.

Notre Dame's flatness was evident on defense, as Conlin and Tarr both scored on easy layups when the Irish were slow getting down the court. Tarr then went on a tear, eluding his defender Rivers and scoring three straight times for LaSalle. Eight of Tarr's 13 points came in the first half.

But with LaSalle switching to a zone defense, Notre Dame went to work outside. Rivers and guard Scott Hicks both connected from outside, and three-point specialist Sean Conner went to work from his charity stripe, making two three-point shots in the final minutes, including a 30-footer at the buzzer. That, combined with a Rivers-to-Royal alley-oop slam, gave Notre Dame a 32-30 halftime lead.

Simmons, the freshman sensation for LaSalle, went to work on the Irish defense in the second half. He drew two quick fouls to open the half and hit three free throws to give LaSalle a 33-32 lead. But Conner, who finished with 16 points on the night, responded with two straight three pointers to keep the Irish close.

"Sean's been doing a better job of (shooting the three-pointer)," said Phelps. "We want him to shoot it. He got a little tentative towards the second half, and I don't care if he goes four-for-nine shooting threes - that's 12 quick points."

Simmons continued to take his defenders one-on-one, scoring 14 of his game-high 22 points in the second half. But Notre Dame, behind Royal's patented turnaround jumper and River's outside shooting, built a 57-49 lead with 6:10 left in the game.

The outside shooting touch then disappeared for the Irish, as they did not score the rest of the half. Meanwhile, LaSalle came back with baskets from Tarr and guard Tim Legler. Legler finished with 16 points for the Explorers, including two crucial free throws that tied the game at 57 with 30 seconds left on the clock.

The Irish had a chance to take the last shot, but in a scene which was reminiscent of the UCLA game, Rivers was called for a charge with 22 seconds left.

"The charge on David was interesting," said Phelps. "I thought we were going to be shooting the one-and-one. I was really surprised at the charge call.

The final shot was taken by Tarr, who tried to go one-on-one against Stevenson. But his jumper from 16 feet fell short, and the game went into overtime.

Notre Dame freshman Joe Frederick (3) goes up for two in a preseason game, but has been playing the waiting game on the bench for most of this season. Rick Rickertson features the talented Frederick on page 14.

SMC swimmers fall, 111-76, Improve against Kalamazoo

By JANE SHEA
Sports Writer

The Saint Mary's swim team fell to Kalamazoo on Tuesday night by a score of 111-76, bringing the Belles' record to 5-3. The team showed an excellent improvement from last year's meet with Kalamazoo, said Head Coach Nancy Jo Kuzmitz.

"Both Peggy Marrison and Margaret Mannon did outstanding in their events."

Saint Mary's won the first event, the 200-yard medley relay, with a team composed of seniors, Margaret Mannon, Patty Luckiness, Mary Fisher and sophomore Tanya Reeves. Their time was 2:56.28.

In the 50-yard freestyle, second and third place were captured by junior Meghan Rafferty with a time of 0:27.20 and senior Mary Fisher with a time of 0:28.11.

Holloran, a sophomore, took second in both the 100-yard freestyle with a time of 1:03.39, and the 200-yard freestyle with a time of 2:13.76. Holloran also took second in the 500-yard freestyle while Jennifer Veselik, a junior, took third with times of 5:44.61 and 6:38.32 respectively.

In the 100-yard breaststroke Margaret Mannon had first place with a time of 1:16.95. This qualified her for the national teams which take place in early March.

Tanya Reeves had two seconds in the 200-yard fly and the 500-yard individual medley while Rafferty took second in the 200-yard backstroke.

"Our lack of divers and illnesses hurt the team," said Kuzmitz.

The Belles next meet is an away meet against Calvin College on Feb. 18.
Despite polls and ratings, Tar Heels are McGuire's top team

Editor's Note: Today's column by Al McGuire was received before Notre Dame upset North Carolina last Sunday with in mind that this is a little dated.

Al McGuire
Hoopla

I don't care what AP, UPI or any of the other polls around the country say. With all respect to the Hawkeyes of Iowa, UNLV and all the other 87 heavyweight clubs in the nation, I still truly think that off the charts, the real power is obviously Sky Blue - that the Tar Heels of North Carolina are No. 1.

From top to bottom, Dean Smith has built a solid, well-balanced basketball team. And when I say balanced, I mean from top to bottom the Smith's No. 1. North Carolina's style on offense is to move the ball upcourt quickly and don't let the defense get set. If the numbers don't look right, then they'll go to a set offense, looking to punch the ball inside to one of their quarter-court center keepers. Obviously, if you stuff them off, then they'll open up with their bombers from far out, and everything else being equal, they'll wear you down in the foul situation, so that by the second half you're in foul trouble, ready for the knockdown punch, which usually comes with about eight minutes to go in the game. During the last few minutes, they'll usually spread it out, work the clock, and get their high-percentage shooters to the foul line.

To sum up, watching North Carolina is almost like seeing a move at the movies. They use multiple, multiple substitutions in the first half; Coach Dean will go with no fear to his 11th man. And that 11th man is no fluke. He's a kid out of high school somewhere that, at the end of the game, when I say balanced, I mean

1. baby Twin Towers of J.R. Reid and Scott Williams, add a gentle mix of four other better-than-average players, and present you the nucleus.

North Carolina's style on defense is to move the ball upcourt quickly and don't let the defense get set. If the numbers don't look right, then they'll go to a set offense, looking to punch the ball inside to one of their quarter-court center keepers. Obviously, if you stuff them off, then they'll open up with their bombers from far out, and everything else being equal, they'll wear you down in the foul situation, so that by the second half you're in foul trouble, ready for the knockdown punch, which usually comes with about eight minutes to go in the game. During the last few minutes, they'll usually spread it out, work the clock, and get their high-percentage shooters to the foul line. Believe me, if you can't shoot free throws, you can't play for Dean Smith.

But the real strength of North Carolina, I feel, is more than just the Xs and Os, or five guys on the court. It comes from what Dean Smith has done, from the total basketball package he has created. The character and orderliness of his program is what every coach, guys and dolls, dreams of. Its style is unique.

Win or lose, you'll see Dean Smith's players run off the court at the end of the game, whether they're 20 points up or 20 points down. They'll punch the bench stand and applaud their teammates, and on every basket that's scored off a pass, you'll see the guy who scored pass the player that gave him the assist.

Carolina is truly an efficiently-run juggernaut. Even at practice, no one gets in without a written pass from the athletic department. At courthouse, there's a special carpet laid out, where the ball players can lay while they're doing their stretching, and everything is sparkling clean like the penthouse suite at the Waldorf on the day the President and I were there.

One of Dean's greatest assets, I feel, is that he never expects his ballplayers to pass the public. He also runs the senior star system to take care of his personnel, but I don't think even he can hide fresh faces.

Finally, the big question: Will the Tar Heels win the NCAA? Or even get to eat the 20 points up or 20 points down. They'll punch the bench stand and applaud their teammates, and on every basket that's scored off a pass, you'll see the guy who scored pass the player that gave him the assist.

Carolina is truly an efficiently-run juggernaut. Even at practice, no one gets in without a written pass from the athletic department. At courthouse, there's a special carpet laid out, where the ball players can lay while they're doing their stretching, and everything is sparkling clean like the penthouse suite at the Waldorf on the day the President and I were there.

When the commander-in-chief blows his whistle to start practice, you'd think it was a 100-yard dash for the gold in L.A. From then on, every second is accounted for, and every problem has been anticipated. And I have to add that Bill Guthridge, Coach Smith's assistant, is a complementary basketball genius.

North Carolina sharpshooter Dave Popson (35) fires over Donald Royal in Notre Dame's recent upset of the Tar Heels. Al McGuire tells why he thinks Carolina is the nation's top team in his column at right.
Freshman Frederic is used to waiting for his opportunity

“get a chance to prove he can do it,” continues Frederic, who roomed with teammate Scott Paddock.

Fredrick certainly had the credentials to come to Notre Dame coming out of high school. He averaged 23.3 points, hitting over 58 percent of his shots while garnering co-MVP honors of the Metro Conference both sophomore and junior years. He didn’t have to share the award his senior year. He was also an all-state pick by the AP and UPI.

But he did not enjoy that kind of success at home. His bro­thers, one who played basketball at Ball State College, and one who attended Dayton, proved to be stiff competition than his high-school opponents.

“I always used to play my brothers and they never, ever let me win when I was little,” he says. “All I could do was play as hard as I could in order to get a chance to beat them. It’s like when we (the Blue team) scrimmaged the Gold team in practice. All we want to do is beat them to show them that we can play.”

Joe Frederic

Joe Frederic is confident that his time will come, his waiting will pay off, and he will get the opportunity to prove he can play.

But that does not make spending most of his time during the games on the bench any easier.

After finally proving to his brothers at home that he could play, he is now faced with what seems the same obstacle at Notre Dame. And he knows now he is trying to overcome this obsta­cle than it was the first.

“There’s probably Conner the most frustrating thing so far,” says Frederic. “Most of the freshman there is just go­ing to come in and play a while or two, but it was rougher than I expected. It’s easy to say, ‘You’ve got to pay­ your dues,’ but you don’t realize how hard it is until you’re there.”

“Their’s in Frederic’s case, has been the bench. He has spent action minutes so far, and scored as many points.

Fredrick says, that looking at some history and having other freshmen in a sit­uation similar to his has helped him deal with it.

“Therehaven’t been a lot of freshmen that cut their teeth and actually played right away as fresh­men,” he says. “(Former Irish player) Kevin Hanrahan is one who I had (John Paxson) sat and a lot of people think, ‘Oh, my gosh, I’m like him. I just work as hard as I can.

“We’ll just pay our dues and the next group will come in and do it too. It would be harder to do if I was the only freshman, but there are five of us, includ­ing Kevin (Robinson), and all of them would play as much as we want so we’re all kind of going through it together.”

“It’s pretty good that we can go through it altogether, and we talk about it a lot,” con­cludes Frederic, who roomed with teammate Scott Paddock.

Joe Frederic

“We’re all pretty consistently on the Blue team and we’re working together almost all the time. That can only help us, so when time comes, it won’t be a shock for us.”

And it hasn’t been any easier during the final series. It won 24.1-mile races on the Indian Ocean. Conner and his Stars & Stripes beat challenging boats from six nations.

Over Kookaburra III during the final series. It won five of the eight downwind legs and 14 of the 16 upwind legs; it won the 24.1-mile races on the Indian Ocean.

In 12 hours, 50 minutes and never a bit, he lost the Cup, Conner fought aboard Freedom in 1980, knows

“Frederick say, however, that freshm en knew we weren’t going to come in and play a lot, so I just work as hard as I can.

“I’ll probably all sink in to­morrow or the next day or the week after,” he said. “Right now we’re savoring it. I’m thril­ling it all worked out for us.”

And it worked out so easily. The final four races made it 3-0-0 for the Irish.

It was the 18th American sweep in the 36 Cup competi­tions, and the first time since Ted Turner won with Courageous in 1977.

Stars & Stripes won in light, moderate, and gale winds during the final series. It won 14 of the 16 upwind legs; it won five races overall.

In leg which Kookaburra III was thought to be the strong one; it led after every leg of the eight, 3:4.1-mile races on the Indian Ocean.

In 12 hours, 50 minutes and gales, Kookaburra III led for about 20 minutes and never after the first leg.

‘THERE have really been a lot of freshman that cut their teeth and actually played right away as fresh­men,” he says. “(Former Irish player) Kevin Hanrahan is one who I had (John Paxson) sat and a lot of people think, ‘Oh, my gosh, I’m like him. I just work as hard as I can.

Young ND wrestlers host experienced but struggling MSU

By STEVE MEGARGEE
Sports Writer

In a matchup between youth and experience, the Notre Dame wrestling team will host the senior-dominated Michigan State Spartans tonight at 7 in the ACC Pit.

While the Irish will start four sophomores and three freshmen, in contrast to the Spartans' five seniors, Head Coach Fran McCann insists experience should not make not too much of a difference in the meet.

"I think it will be somewhat of a factor, but it should not mean a great deal," said McCann. "I anticipate a pretty tight meet."

Notre Dame and Michigan State met at the beginning of the season, when the Spartans won their own Michigan State Invitational, with the Irish placing second. Since that time, both teams have fallen upon hard times in dual meets.

"They're going through transition. They have a new coach, and they won some big tournaments early in the year," said McCann. "They haven't won many dual meets of late, but they beat us pretty well last year."

Injuries have forced the Irish to limp to a 1-4 record so far in dual meets. Only four wrestlers in tonight's starting lineup have been starting throughout the season, and Notre Dame still has not fully recovered.

Senior Tom Ryan is sidelined with sore cartilage in his ribs, and his status for this weekend's meet with Central Michigan is still uncertain.

Despite both teams' hardships during the year, tonight's meet promises to include some intriguing individual matchups. Three members of Notre Dame's outstanding sophomore quartet (Dave Carroll, Jerry Durso, Pat Boyd and Chris Geneser) will be facing three of Michigan State's top wrestlers.

In the 136-pound match, Carroll will face Brian Smith. Carroll and Smith have split their two previous matches. Durso, who currently sports a 23-4 record, meets all-American Dan Matauch in the 134-pound match, and the 24-6 Boyd will compete with the Spartans' Stacey Richmond in the 125-pound match.

"We match up really well. Two of their best guys (Matauch and Richmond) are matched up with two of our best guys (Durso and Boyd)," said McCann. "Last year, they both split their two matches."

Notre Dame continues its homestand against Central Michigan on Sunday at 2 p.m. in the ACC Pit.
