McFarlane suicide attempt - page 3

Beirut kidnappers extend the deadline for killing hostages

Associated Press

BEIRUT, Lebanon- Muslim kidnappers said they would extend the deadline for killing hostages from the American embassy unless Israel freed 400 Arab prisoners. They said they would raise the level of the "insult" made by U.S. Secretary of State George Shultz, who said the people of Lebanon should instead heed a Church teaching on abortion.

The hostage situation escalated further with the killing of another hostage. The kidnappers said they would kill another hostage if Israel did not free the prisoners by the deadline.

The proposal recommending that homosexu­als be allowed to register for the draft and advertise through University media was defeated for the second time at Monday night's Student Senate meeting, when Student Body President Mike Switek again broke a tie by voting against the proposal. The Senate also voted to increase the number of students on the Senate from 15 to 20.

The proposal recommending extended rights for homosexu­als on campus was resubmitted in revised form by Robert Polhill, one of the authors.

Senator Senator John Gardiner. Gardiner said he resubmitted the resolution because the new one is "clarer in that it separates formal recognition of homosexu­als from the basic privileges of reserved rooms and advertis­ing through University media," adding that he thought the formulation would be more agreeable to student senators.

Another reason for resubmit­ting the proposal, Gardiner said, was the fact that more senators were present at this meeting than at last week's meeting.

Student Body Vice President Don Montanaro presented to the Senate flyers he said were circulated and were posted around campus Monday. The flyers contained a proposal to the upcoming student election ballot asking students to rate The Observer, and, in new business, voted unani­mously to accept a proposal outlining plans for the sophomore-sponsored Little Sis weekend.

A fight during a Thursday night hockey match between Pangborn and Sorin halls left a Pangborn player with a slashed neck and resulted in the expulsion of a Sorin player from the interhall hockey league for the remainder of the season.

Sorin Hall also has been placed on probation for the rest of the season as a result of the fight.

Officials ended the game early in the second half, after a fight broke out which cleared both teams' benches.

An Office of Non-Varsity Ath­letics official said the injured player, Pangborn's Brian Kel­ly, received 18 stitches in his neck, caused by a skate. Kelly was taken to the hospital by Notre Dame Security directly from the ACC.

"One of the guys on our team checked one of their guys who was kind of small," said Sorin Athletic Commissioner Gary Smith. "I saw the kid get taken out on a stretcher and I heard he got 18 stitches in his neck," Smith said. He added that the game was called "about three to five minutes into the second half, probably about quarter after midnight."

Said Pangborn Co-Captain Kevin Dolan: "I've seen worse fights, but that's the worst I've ever been in this league."

The NVA said the player in­volved in the fight will not be allowed to play for the rest of the season. "(Sorin player) Phil Marin was determined the aggressor and has been kicked out of the league," an NVA of­ficial said.

Marin said he was "just checked that guy."

"They're mad about that," Marin said. "But I didn't start a fight with him."

"He was moving the puck, I went after him and leveled him. Then the Pangborn bench cleared," said Marin. "It was my blade (that hit him), but I didn't kick the organization.

If he did kick the player, Marin said, the player would have been hurt very badly. According to Sorin player Mike Moran, "There was a little bumbling on both sides. In the first half, there was a little scuffle in front of the net. One of the (Pangborn) guys showed his glove into the goalie's face. I was on the bench at the time."

The injury to the Pangborn player occurred in the second half, said Moran. "I saw our guy trying to get away. Four guys were after him. The fight­ing was held up, but tempers were flaring."

"The guy with the cut in his neck, he was still pretty gun-ho about getting our guy. Everyone wasn't at fault. I'd say the majority was trying to break it up," he added.

"The refs did the best they could, trying to break it up," said Dolan. "I know one ref was hurt himself."

"It was uncalled for," Dolan said. "I'm sorry it had to come to this. I have nothing against them making some good hits, but it was a little cheap," said Dolan.

Senate again defeats gay rights resolution

Student Senator John Gardiner. Gardiner said he resubmitted the resolution because the new one is "clearer in that it separates formal recognition of homosexuals from the basic privileges of reserved rooms and advertising through University media," adding that he thought the formulation would be more agreeable to student senators.

Another reason for resubmit­ting the proposal, Gardiner said, was the fact that more senators were present at this meeting than at last week's meeting.

Student Body Vice President Don Montanaro presented to the Senate flyers he said were circulated and were posted around campus Monday. The flyers contained a proposal to the upcoming student election ballot asking students to rate The Observer, and, in new business, voted unani­mously to accept a proposal outlining plans for the sophomore-sponsored Little Sis weekend.

**Former security advisor McFarlane fails in attempt to commit suicide**

Associated Press

WASHINGTON - Former national security adviser Bud McFarlane, who figured prominently in President Reagan's clandestine sale of weapons to Iran, was hospitalized Monday for a Valium overdose that police were treating as an apparent suicide attempt.

McFarlane ingested between 25 and 30 pills, said Detective Lauren Acquaviva of the Montgomery County Sheriff's Office. He said he did not know how many milligrams were in each pill.

Acquaviva said a police investigation was routine procedure after a report of "an unattended death or death attempt."

McFarlane had been scheduled to testify Monday before a commission investigating the Iran Contra affair, according to published and broadcast reports. CBS News, quoting unnamed friends of McFarlane, also reported that he had been depressed and emotional recently.

But McFarlane's lawyer, Leonard Garment, said "neither I nor the sources of the report can know what Bud McFarlane's intentions were."

Garment called the story "the most irresponsible and obscene piece of sourcing and reporting I've heard of in my whole professional life."

The lawyer said he had not talked with McFarlane since last Friday. But, he said, experts on the drug believed it was virtually impossible to commit suicide with Valium.

Had McFarlane has served his country long and faithfully, and never with greater distinction than by coming forward and being the only one to give a full story, under oath and without access to a single page of his official record, of the Iranian arms sale," Garment said. "I am sure the country will simply wish him well."

**Class registration, library hours discussed by Board of Governance**

By SHARON HEGG
Staff Reporter

Registration for classes, library hours, and security improvements were discussed at last night's meeting of the Saint Mary's Board of Governance.

Jeanne Heller, student body president, said she met with Teresa Marcy, assistant to the vice president, concerning the registration of Notre Dame students for Saint Mary's classes.

There have been problems with students, particularly Notre Dame students, who go down the back stairs of Angela Athletic Facility, pull cards, and then wait in line, according to Heller. Security will be tightened.

"The only real problem has been with the theology classes. Teresa Marcy is checking to see if theology majors at Notre Dame get registration priority over Saint Mary's students," said Heller.

"Maybe Saint Mary's students could pre-pre-register for theology classes, especially freshmen and sophomores," suggested Betsy Burke, vice president, for academic relations and college affairs.

In regard to the proposal to open Cushwa-Leighton Library earlier on Sunday, Burke said 500 more students signed the petition last Wednesday, bringing the total to approximately one-half the student body.

The petition will not be presented to the Academic Council as previously announced said Heller. "I am going to meet with Sr. Bernice Hellenhorst (director of Cushwa-Leighton Library). It will depend upon the results of the meeting whether or not the petition goes to the Academic Council."

In other business, Mary Fisher, judicial commissioner, announced the proposals made by Security for security improvements. The proposals include better lighting, more sidewalks, and speed bumps.

Rebecca Hetland, campus ministry commissioner, announced that peacemakers, campus ministry, government club, and the women's studies club will sponsor Philippine Awareness Week Feb. 23-26. Activities will include lectures, a presentation on Philippine culture, and a eucharistic celebration in Regina Chapel.

Burke also announced that the lecture series sponsored by student government will begin Tuesday Feb. 3. at 7 p.m. in Haggar Parlor with Dr. David Pilgrim, assistant professor of sociology, taking place every Tuesday thereafter.

United Way
**Coroner's report says Liberase died of AIDS**

**Associated Press**

INDIO, Calif. — Liberase died of a disease caused by AIDS, the Riverside County coroner said Monday, reporting the results of an autopsy on the entertainer.

Coroner Raymond Carrillo said he believed that an opportunistic infection triggered by AIDS killed Liberase, who died Wednesday at age 67 in his Palm Springs home.

"I believe the AIDS virus causes all these . . . It allows all these microorganisms to develop," said Carrillo.

The report contradicted claims by Liberase aides that he had not contracted acquired immune deficiency syndrome.

That Liberase was suffering from AIDS was first reported on Jan. 24 by the Las Vegas Sun. The newspaper attributed the information to unidentified sources.

Denise Collier, a spokeswoman for Liberase, said Liberase had pneumonia, anemia, heart disease and emphysema.

On Jan. 26, publicist Seymour Heller said Liberase's treatment was caused by a heart attack in December, a month, weight-loss diet of nothing but watermelons, although Liberase's Las Vegas physician later disputed that.

Dr. Ronald S. Wayman, a physician who treated Liberase, reported the cause of death as cardiac arrest due to heart failure brought on by subacute encephalopathy. This means the heart stopped due to a gradual loss of the heart's ability to pump brought on by some chronic problem in the brain.

Riverside County officials refused to accept the death certificate signed by Daniels when they discovered the coroner had not been contacted as required in the case of possible contagious diseases, and because a doctor wasn't in attendance when Liberase died, Carrillo said.

Coroner's investigator Sabas Rosas said if proper procedure had been followed, it wouldn't have been necessary for his office to hold a news conference on the cause of death, offending Liberase's fans.

"It's too bad it went to this extent," said Rosas. "If protocol had been followed the way it should have been, it probably wouldn't have ended up where we're at."

"We're doing our duty under the law. We owe it to the public we serve. The mortuary had an obligation to notify us," Rosas said.

Medical records showed that before Liberase's death, the entertainer tested positive in November for the presence of antibodies to the AIDS virus, Rosas said.

A positive test means only that a person has been exposed at one time to the virus and formed antibodies against it, and not necessarily that the person was still infected with the virus or actually developed acquired immune deficiency syndrome.

**Abortion**

continued from page 1

"It is simply fallacious to say Christian teachings always condemned abortion without going into the context in which they did so," he said.

Burtschaell countered that early Christians extended protections to the unborn.

"Among themselves (early Christians), abortion continued to be reviled as unthinkable for the believer," he said. The repudiation of abortion was not an isolated or esoteric doctrine.

"It was the same ruinous willingness to tolerate others that shows in the slaying of the unborn, the newborn, or even the babies, known as Contras."

"No attempt whatsoever is made to moderate such portrayals in the light of actual performance," the report said.

State Department spokes­man Charles Redman had no comment on the report, saying department spokes­men had not seen it.

The administration's own annual human rights report, which assesses all nations of the world, is expected to be released in a few days.

Americans Watch Vice Chair­man Arzy Neier told a news conference the report did not specify whether the Sandinista government or the Contras were responsible for the most abuses. To take such a stand, he said, would tend to minimize the abuses of the side deemed less guilty.

But the report leaves the impression that the most serious rights abuses were committed by the Contras. Last week, As­istant Secretary of State Eli­liot Abrams, who has fre­quently clashed with Neier in the past, said the Sandinista government is carrying out a "reign of terror" on Nicaraguan citizens.

The Americans Watch report calls for an end to U.S. funding of the rebels on grounds that such support "associates the U.S. government with a pattern of gross human rights abuses that, to date, the Contras show no sign of curbing."

Specifically, the report said the Contras "engage in selective but systematic killing of persons they perceive as representing the government, in indiscriminate attacks against civilians or in disregard for their safety and in outrages against the personal dignity of prisoners."

It added that rebel kidnap­pings of civilians have been widespread, apparently for the purposes of recruitment as well as intimidation. "A significant number of the kidnap victims are children," the report said.

But the study also said that the Nicaraguan government, "as a matter of policy," engages in abusive interroga­tion tactics against prisoners, including psychological pres­sure and threats used to secure their confessions.

The report said the judicial system in Nicaraguan is often subject to political manipula­tion because of the close iden­tification between inves­tigators, prosecutors and judges.

Associated Press

WASHINGTON: The U.S. atomic weapons system, as a 40-year-old target for the Soviets, has become one of the largest in the world, and one of the most important, targets for a possible Soviet strike, according to a book published Monday by the Harvard and the Brookings Institution.

An attack on any of the more than 1,500 key points in the system might be misinterpreted as an attack on the whole, triggering a devastating American response, said Ashton Carter, a Harvard professor who helped edit the book and contributed two chapters.

The good news, said one of the editors, Don Cook, is that in 10 years of handling nuclear arms, not one of the union nor the United States has actually launched an intercontinental ballistic missile or exploded a nuclear bomb by mistake.

Yet Cotter, a former assistant secretary of defense, expressed concern that "technological opportunities rather than an overriding strategy drove the acquisition" of nuclear forces, and that they could be tested underground without breaking treaties or endangering lives, the operating systems cannot be tested in conditions resembling war.

More bad news is that the "tissue, written by 22 government and academic experts who are supposed to understand nuclear issues, raises more questions than it answers.

One of the editors, John Steinbruner, who is director of foreign policy studies at Brookings, likened nuclear management systems to a giant machine with thousands of gears and parts, which has never been tested. No one knows how, or if, it will work. Another contributor, Paul Bracken, wrote that the superpowers have not woven ideas on how to end a war into the fabric of military operations, findings, that although the weapons can be tested underground without breaking treaties or endangering lives, the operating systems cannot be tested in conditions resembling war.

"You have to make sure that the weapons designed to deter war do not start one," said Steinbruner, who hosts the foreign policy program at Brookings.

While the Soviet Union and the United States have avoided the brink of nuclear conflict, the book said, several events have highlighted the slippery edge.

After the death of Kremlin leader Leonid Brezhnev in November 1982, the Soviets were four days away from naming a new general secretary. U.S. officials are still not sure what was in charge of the Soviet nuclear arsenal during those four days, and they fear that, given Kremlin problems in transferring power, the lines of control might be confused in a crisis.

In 1983, the Soviets shot down a Korean airliner, killing 269 civilians, including 61 Americans, after the civilian plane entered Soviet airspace, flying over sensitive military areas. The Soviets said they thought it was a spy plane, and Western observers were left wondering about the reliability of Soviet detection systems.

Chris Bowler, a senior government/ALFA major, of Edina, Minn., has been named managing editor of The Observer. Bowler was production manager since April.

Bowler's goals include bringing stability to the production process and providing a smooth transition for the new editorial board to be named in March.

In addition, Mark McLaughlin and Melissa Warner have been named co-production managers. McLaughlin is a junior aerospace engineering major from Middletown, N.J., and Warner is a junior accountancy major from Westlake, Ohio.

McLaughlin and Warner were both assistant production managers and design editors for the past year. Both say they seek to provide direction to the production department.

Margie Kersten, Saint Mary's editor, will be coordinating the bi-monthly Religion page. Jim Riley, an assistant news editor, has been named editor of the weekly Business page.

Mary Heilmann, an assistant news editor, will coordinate the editorial content of the upcoming Father Theodore Hesburgh commemorative issue.
Conversational dolls introduced at toy fair

**Associated Press**

NEW YORK—Once upon a time, dolls just sat there and looked pretty. Then they wet, they talked, and they walked. Now they hold conversations with each other without a child even being in the room.

At the 84th annual American International Toy Fair, which started Monday, manufactur- ers unveiled animated talking toys that not only communicate with each other, but "understand" what a child says to them and respond with an appropriate answer.

Also introduced were high-tech action figures that will take electronic cues from a range beamed by new animated TV shows.

Manufacturers are hoping such toys can enliven the rela- tionship between a child and the $12.5 billion toy mar- ket.

Rick Anguilla, editor of the trade publication Toy World, said, "We see the area of growth in true interactive toys—not just toys that randomly say it, but those that almost seem to think and can have real conversations."

Play Along Cabbage Patch Kids ($100 a piece, retail) is in a room and press the buttons on their stomachs. They'll sense each other's presence and begin chatting.

They may discuss ice cream—some are programmed to like vanilla, others chocolate or strawberry. Children can join in the discussion too, of course.

The new dolls know what's going on around them. Take them for a bumpy car ride and the doll might say, "OK, that's enough. All this bouncing up and down makes me dizzy." Kiss the doll's cheek, and it'll say, "Thank you for the kiss, Julie. May I have another one, please?"

Worlds Of Wonder, the company that introduced the animated talking Teddy Rux- pin, now has come up with Julie.

Unlike past dolls that shot out random phrases with little relevance to what a child said, Julie has more than 100 sound- activated responses in her computer chip memory.

She understands sentences and words. When she hears some- one say he or she is hungry, Julie will respond, "Let's eat. Take her into a dark room and she'll say, 'Can I have a bowl of ice cream? It's kind of dark.' The doll can even be trained to only respond to its owner's voice.

Yes, there is a limit to the dolls' intelligence—they only react to specific words or stimuli.

The next step in interactive toys are those like Alexon's "Tech Force" ($250 for a dual-set control). As Tech Force characters battle evil divers in a television show, their toy counterparts watch from around the living room floor firing laser lights, in response to inaudible signals sent via the cartoon's soundtrack.

The developers say such toys will make television watching participatory, instead of merely reactive.

Labor market spawns need for office day care

**Associated Press**

An increasing number of child-care programs are likely to be instituted by employers who want to keep experienced employees who leave work to start a family, says "Juggling Jobs and Babies: America's Child Care Challenge," a report by Martin O'Connell of the U.S. Census Bureau and David Bloom of Harvard Uni- versity, published Monday by the private Population Refer- ence Bureau.

In the years since the end of World War II, women have flooded into the labor market, a development which has con- fronted millions of families with the dilemma of finding care for small children, accord- ing to the report.

Today more than half of married couples with children under age 6 are employed, compared with only one in eight in 1950, Census Bureau statistics show.

Responses to this develop- ment have varied from family to family and region to region, with some employers initiating programs to provide their workers with child-care pro- grams. Such actions will be- come increasingly important, says the study.

Some women can hire help, but most domestic workers do

2 to 1 ratio

In accordance with the general gender ratio on campus, it would seem there are two men for every woman at the Huddle Sweet Shop, as is the case of these three students pondering over what treat they should buy to carry them through the night. The shop is located in the basement of the LaFayette Student Center.

Fight

continued from page 1

"It was a long cut. It wasn't life-threatening," said Sorin team Captain Tony Watson. "But whenever you get a cut from something as sharp as a skate, you want to get it looked at."

According to Pangolf Re- tor Father Wilford Borden, Kelly's injury was "superfi- cial. He got a few stitches, but he's fine."

Marin said, "I know he went to class the next day. He just had a big pad over his neck. I leveled him, but it was a clean hit. I'm still in the wrong. There's no checking allowed and I checked him.

"The whole bench came after me. (Kelly) was the first one at me. I think the guys hit him from behind and he fell right on top of me," Marin said. "There was checking going on the whole game."

According to Smith, Sorin has "a bad reputation with NVA. We have teams that don't respect us, but there's no hate for any team," said Smith.

Violating approved laws lessens public's trust

Turn on the T.V., it's there; open up a magazine, it's there; why even page through the "Observer," it's there too!
The "Iran-Contra" issue is everywhere. Unfortunately, most people have been too busy to be dennized by this torrential flood of information, that they merely gloss over the "black and white" or disregard it all together.

Jerry Duff

guest column

Are "we, the people," no longer interested in the knowledge explaining what our elected chief executives are doing for us. It would seem to me, that this information is probably paramount if not equal in importance when compared with headlines reading: "X" Died Doing "Y," Can't Solve Dakota, Off the Upset, or Will the Bull Market Continue? Furthermore, the media, for the first time in six years, has finally refused to buy another bottle of Ron's "snake-oil." They will settle for no less then "the truth, the whole truth, and nothing but the truth."

Why do they smell blood in the water? What makes Reagan's current stunt any different from the other ones he has pulled in the past? TRUST! Integrity in a "rule of law."

Take the Libyan bomb episode last year, did the president really gloss over the "black and white" or disregard it all together. The "Iran-Contra" connection, however, was conducted under the (NSC) table. Our National Security Council (Purely an advisory agency), was supposed to guide the administration in making foreign policy, but executing it as well, without the approval of Congress. While carrying out these policies, at least two major laws were broken.

First, the sale of weapons to Iran clearly violated the letter and intent of the Arms Export Act, which strictly prohibits the sale of arms to countries supporting terrorism. I imagine that Iran is £2 or £3 on that list. Second, the order or the request for the sale of arms, generated from the sale, to fund the military overthrow of the Nicaraguan government violates the Boland Amendment, which was effective through October 1, 1986. It stipulates that no military aid may be sent to the Contras in excess of the amount set by Congress.

Beyond breaking the law, the "Iran-Contra" issue raises a very fundamental question. If it can happen to a "self-owed" president, can it happen to the American public? Is the president above the law? I agree that "we, the people," Mrs. Reagan, any others involved are innocent until proven guilty beyond a shadow of doubt. Unfortunately, the excuse doesn't do it for all the right reasons," isn't going to wash as a shadow of doubt. Take my example. If I go to a bank and give the money to the needy and the hungry, I go to jail just the same. Why should the rules be changed for President Reagan or anyone else for that matter. Dele from the "rule of law", the President is "above the law." Independence ideal of equality been rewritten to read: "All men are created equal, but some men are more equal than others." Our country was founded on the basis of a supreme rule of law applying equally to all people, not being changed for one person merely because he broke it for the right reason.

The other common rational given in defense of Reagan's "Iran-Contra" policies is that "we, the people," will resort to a simple analogy. If I am driving down the highway at about 80 mph and the state trooper pulls me over, the line "I didn't know the speed limit," isn't going to get me out of a $200 fine. The same rationale will not get the president of the United States out of a "deceptive" situation, from driver education "Ignorance of the law is no excuse." The same cliche is at work here with respect to the president's responsibilities and duties.

The key in both cases, however, amounts to the degree of accountability "we, the people," expect from the president. He was elected by us to serve us. He does this by executing the laws enacted by Congress, with in our own rule of law, the Constitution. While executing these laws, he must utilize his executive authority to numerous subordinate administrators for the sake of effectiveness and efficiency. In these cases, however, the president is still solely responsible for any action taken by the subordinates as well as himself. If these policy initiatives and actions are carried out in violation of approved law, then the president has stopped serving the American public. Whether the president is above the law is a question about our own rule of law: What matter? Has the "Declaration of Independence" ideal of equality been compromised.

According to reliable sources, much of the irrational behavior was premeditated by some, at least quasi-official body, who put cardboard misprints, in the hands of juvenile minds who reacted predictably when given the opportunity to demonstrate "new" Notre Dame spirit.

The actions of the student body during and after the North Carolina game reached a new low in bad manners and boorish behavior.

Since the football team's victory over Ohio State in recent years, Notre Dame has more than its share of spectacular victories, including the '79 Cotton Bowl, '73 Sugar Bowl, '83 Orange Bowl, '79 Cotton Bowl, '83 Liberty Bowl and numerous upsets of number one ranked basketball teams by Coach Phelps' squad. Thus, we cannot use the excuse that the novelty of the experience validates unconscionable behavior. Since it is unlikely the administration will resume their rightful role in the administration of justice, perhaps the actions of the student body would raise the flag of tradition that would be very effective, especially this time of year.

The Observer is the independent newspaper published by the students of the University of Notre Dame de la Le and Saint Mary's College. It does not necessarily reflect the policies of the administration or the board of trustees. Its sole purpose is to express the opinions of the students. The Editor-in-Chief, Managing Editor, Viewpoint Editor, and News Editor are elected by the student body. The Observer is printed by the University of Notre Dame de la Le and Saint Mary's College. Comments, letters and the inside column present the views of their authors. Column space is available to all members of the community and the free expression of varying opinions on campus, through letters, is encouraged.

Responsible majority able to end disrespect

Dear Editor:

Shame, shame on you Notre Dame! Despite a 50-year love affair with Notre Dame in general, its athletic program in particular, I detected nothing but a crooked ankle and nothing but the truth in "IRAN-CONTRA."

I have pulled on the American public. Does "we, the people," no longer feel they are in charge of our nation's destiny? Are "we, the people," no longer interested with the knowledge explaining our own rule of law? If not, I propose to end disrespect.

Take me for example. If I go rob a bank, I go to jail just the same. Why should the rules be changed for President Reagan or anyone else for that matter. Dele from the "rule of law", the President is "above the law." Independence ideal of equality been rewritten to read: "All men are created equal, but some men are more equal than others." Our country was founded on the basis of a supreme rule of law applying equally to all people, not being changed for one person merely because he broke it for the right reason.

The other common rational given in defense of Reagan's "Iran-Contra" policies is that "we, the people," will resort to a simple analogy. If I am driving down the highway at about 80 mph and the state trooper pulls me over, the line "I didn't know the speed limit," isn't going to get me out of a $200 fine. The same rationale will not get the president of the United States out of a "deceptive" situation, from driver education "Ignorance of the law is no excuse." The same cliche is at work here with respect to the president's responsibilities and duties.

The key in both cases, however, amounts to the degree of accountability "we, the people," expect from the president. He was elected by us to serve us. He does this by executing the laws enacted by Congress, with in our own rule of law, the Constitution. While executing these laws, he must utilize his executive authority to numerous subordinate administrators for the sake of effectiveness and efficiency. In these cases, however, the president is still solely responsible for any action taken by the subordinates as well as himself. If these policy initiatives and actions are carried out in violation of approved law, then the president has stopped serving the American public. Whether the president is above the law is a question about our own rule of law: What matter? Has the "Declaration of Independence" ideal of equality been compromised.

According to reliable sources, much of the irrational behavior was premeditated by some, at least quasi-official body, who put cardboard misprints, in the hands of juvenile minds who reacted predictably when given the opportunity to demonstrate "new" Notre Dame spirit.

The follow-up of food fights and glass- throwing at the evening meal gives fur ther proof that the Notre Dame student body makes the claim that they are in- telligent adults and should be treated as such.
A look at national defense

Observer editor-in-chief interviews Secretary Weinberger

Secretary of Defense Caspar Weinberger

Kenneth Carter

The following interview was conducted at the Pentagon with Secretary of Defense Caspar Weinberger and other senior Pentagon officials shortly after the 100th Congress began. The briefing was attended by 10 college journalists from across the nation at the invitation of Secretary Weinberger. It is the only such briefing the secretary has given to college journalists since he was appointed by President Ronald Reagan in 1981.

Since submitting its budget for fiscal year 1988 to Congress on January 5, the Reagan administration has been criticized for the size of its defense budget and the policies and posture it reflects.

Last week, a public debate began within the administration among Capitol Hill and in Congress, when a phased deployment of the "Star Wars" anti-missile shield should begin.

"We have a very limited agenda. All we really want is to be left alone in peace and freedom and to have that for our allies," said Secretary of Defense Caspar Weinberger.

To achieve the secretary's agenda, the Reagan administration has placed before Congress a military budget of $312 billion in fiscal year 1988 and $332.4 billion in 1989.

"Of that, $5.2 billion would go next year to the Strategic Defense Initiative, commonly known as the 'Star Wars.'"

"We don't think we're in a situation where we are any way exorbitant. We don't think we are in a situation where the Congress can't afford it if we can't afford to keep our freedom, then we will be a very different country," Weinberger said.

In a phone interview Friday, Congressman John Hiler, D-Ind., said, "The Defense Department submitted a three percent real increase in spending, but will probably end up with a zero to one percent increase."

"Prospects for early deployment of SDI are not viewed as very probable. Monday, Secretary of State George Shultz said no decision would be made over the next two years concerning implementation. However, Weinberger has said the administration is close to making just such a decision.

In addition to disagreement within the administration, strong opposition from Democrats in Congress, especially from Senate Armed Service Committee Chairman Sam Nunn, D-Ga., exists.

"Secretary Weinberger opposed to withholding the fund for the administration adopted a broad interpretation of the 1972 Anti-Ballistic Missile Treaty which would permit fur

then testing of SDI so that deployment can occur.

"In the area of SDI, I would guess Congress will authorize less than the administration requested," said Hiler. Mike Androsic, special assistant to the assistant secretary of defense (legislative affairs), said, "When Secretary Weinberger submits a budget, he does not expect anything to be cut."

"The American people want a strong defense, not a frivolous defense," said Androsic.

"I never try to guess what the Congress is going to do. I'm nearly always wrong when I guess," said Weinberger who said the need for their Pentagon requests are real.

"The structure of the budget," said the defense secretary, "is important. Pretty close to half, 45 to 47 percent depending on the year, goes to personnel salaries, retirement, medical benefits, educational benefits-things that add to and are vital to the quality of life."

"The comparable figure in the Soviet military budget is about nine percent which says quite a lot about the differences between the societies."

"(The Defense Department) does have to have a very large amount of money. We would much rather not have to, but we don't know of any way that we can keep our families, and keep ready the forces that we need to deter attack. It's still only about six percent of the Gross National Product. It used to be eight percent. In the 50's it was 12 to 14 percent of the Gross National Product," said Weinberger. In the coming fiscal year, the Reagan administration has proposed spending $1.024 trillion, leaving a deficit of $107.8 billion.

"The defense budget is about 28 percent of the total budget of the United States," said Secretary Weinberger. "That is a great deal less than it was in the 50's. And a great deal less than the 50's when it was actually over 55 percent of the federal budget," continued Weinberger.

"The assumptions are that inflation will run around three percent," said the defense secretary, "so this runs around six percent nominal growth. We have had, however, two years fiscal year 1986 and 1987 in which we went down. We not only had no growth, but minus growth." 

"We shouldn't concentrate too much on percentage increases or dollar increases. We have to look first of all at how we need a defense budget at all which is of course because of the basic threat to our national interests and our agenda."

"We want to do things that protect ourselves. We want to do things that prevent our defense of the nation being complicated by aggression."

"Essentially, we have the same basic strategy adopted by our country at least since WWII. And that is to be strong enough to deter an attack upon us."

"That involves, in a sense, getting into the minds of potential enemies, primarily the Soviet Union, and trying to figure the degree of retaliatory capability after they would make a strike that would con

since them that they couldn't make a successful strike and so they would be detered from doing it.

"It is always a difficult thing, under that kind of a basic strategy, to figure how much is enough. All we know is that if we don't have enough, we won't know it until it's too late to do anything about it."

"And so we try to do what we can, but it's a delicate degree of strength that will prevent anybody from attacking us."

"During the 50's, we went down 20 percent, measured in real terms, over that whole decade and that happened to coincide with the second decade of Soviet expansion and so our ability to deter eroded substantially during that period."

"As we came into office in January of 1981 we found that we had to do a very great deal. We had to modernize our triad of strategic defenses, all at once, because it hadn't been modernized or even improved for over 20 years."

Hiler said, "There have been two major goals of this administration. One has been the modernization of our strategic nuclear forces."

"The administration has also focused on improving our conventional force structure. It sought better people and gave our pilots and ground crews more practice time."

Weinberger said, "We also had to build back our conventional strength. We can't afford to keep our country at least since WWII."

"I think our greatest accomplishment is then to do that. The all volunteer system is working extraordinarily well now. We are now getting all of the people, and more, that we could use. We have walking lists. And we're getting very high quality people now -98 or 96 percent high school graduation.

"We are retaining 50 percent enlistments after one year as opposed to about 30 percent a few years ago. All of those statistics are very encouraging and very good."

"To continue the modernization of the strategic systems which is about completed now and to regain some increases in conventional strength, Weinberger has been staunchly opposed to decreases in the defense budget."

"He says the money is "mostly to add to the readiness of our forces. It does not increase forces."

"The force strength remains continued on page 10"

magine the phone bills. Each day, over twice the population of Notre Dame and Saint Mary's student body works inside the Pentagon. Approximately 23,000 people log over 200,000 phones calls per day there.

The Pentagon is the one of largest office buildings in the world.

The Pentagon is headquarters of the Department of Defense which is headed by a civilian Secretary of Defense.

Since 1981, the head of the DOD has been Caspar Weinberger.

On the other side of the Potomac, is the State Department headed by George Shultz. The two men are different in style, but share the same goals, say DOD aides.

Weinberger, said a young Pentagon intern, who is spending her time analyzing video tapes of his public remarks, is "much cooler than George Shultz."

"Weinberger never gets flustered and he handles reporters very well," she said.

Recently, the two men and the departments they represent have been viewed as at odds over many issues concerning U.S. foreign policy. The New York Times ran a front-page story Monday with Shultz by quoted as contradicting Weinberger on deploying elements of the Strategic Defense Initiative.

DOD officials, however, deny the conflicts exist to the degree portrayed in the press.

"It's overblown," said Fred Smith. "We work very closely with the State Department. We work on a day to day basis with the State Department. There's a lot of cross-information. Military officers work in all of the bureaus of State," said Smith.

Much of the confusion concerning the position of the two cabinet officials results, DOD aides say, from the complex crosscurrents which characterize Washington, D.C.

And DOD aides think Congress will be much more willing to support the military proposals than some critics think.

"In an average year, Secretary Weinberger appears before congressional committees about 20 times," said Mike Andricos, special assistant to the assistant secretary of Defense (legislative affairs).

"We send 16,000 to 18,000 papers of justification to the Hill per day," said Andricos.

"When we work with Congress, we have to take the time to explain the details," said Andricos.

With so many people and so much paperwork, there are bound to be some communication problems which lead to press stories of disagreement, said a DOD aide.

Weinberger on deploying elements of the Strategic Defense Initiative.

The Pentagon, headquarters of the Department of Defense, is one of the world's largest office buildings. It is virtually a city in itself, housing more than 23,000 people.

The building was built in the remarkably short time of 16 months and was completed on January 15, 1943, at an approximate cost of $83 million. It consolidated 17 buildings of the War Department.

OASD (PA)
The rush of adrenaline. The surge of excitement. The flash of inspiration. Familiar feelings to talented DP professionals at The Travelers. And to the promising graduates who'll join us this year.

You've discovered these feelings in your academic work. Recognized them in the elegance of advanced technology. And now you can share in them at The Travelers, where the support is stronger, the environment more sophisticated and the applications more challenging.

As a distinguished Computer Science or MIS graduate, you now have a difficult decision to make about your future. That's why we created ACCENT. A fast-paced, competitive program. Offering technical and management training through a diverse range of assignments leading to key professional positions.

All in one of the most advanced DP environments in the financial services industry — including the largest IMS shop, 18 IBM mainframes and a 36,000 terminal SNA network.

But our commitment to staying on the cutting edge of DP technology doesn't stop there. We've recently installed 13,000 IBM PCs, integrated the latest 4th generation languages, and we're developing our future leaders with ACCENT.

If you have a degree in computer science, MIS or a related discipline, high academic achievement, exposure to hardware and software, and some programming experience, you have the right credentials for ACCENT.

If you're a highly-motivated person, an independent worker, and an innovative thinker, you have the right chemistry for ACCENT.

Now make the right move. To The Travelers ACCENT program. Where you'll find varied and valuable learning experiences. A supportive human environment and a sophisticated technical one. And where you'll find plenty of opportunities to help move you ahead.

You'll also receive a competitive salary, complete benefits and even an IBM PC AT to take home with you. Plus generous relocation assistance to our Hartford, Connecticut home office.

So, if you're a bright and talented computer-oriented major, join The Travelers. Where the accent is on you and the inspiration is shared by all.

Find out more about signing up for The Travelers interview schedule. Recruiters will be on campus Friday, February 27. Or, send your resume to: Priscilla Pellett, 30-CR, The Travelers Companies, One Tower Square, Hartford, CT 06183-7060.

Munchy Co. gets approval but won't resume operations

By JEFF HEILERT
Business Writer

After two months of negotia-
tion with the University admin-
istration, the three founding
members of the Munchy
Company have received Uni-
versity approval to continue
operation. But the long delay
has made the venture un-
profitable, according to the
founders.

The Munchy Company is an
on-campus delivery service
which provides a wide range of
snack foods, according to
Robert Very, one of the
founders.

Very said the problems the
company encountered, which
began after only a week of op-
eration, stemmed from the
dorm rectors who felt that the
Munchy Company was compet-
ing with their own food sales.

The administration sent a sur-
vey to the rectors who voted
unanimously to end the com-
pany's competition with dorm
food sales, according to Very.
At this point, John Goldrick,
associate vice president for
residence life, requested a
written proposal from the
Munchy Company explaining
their entire plan of operation,
said Very.

The three members of the
Munchy Company then carried
on discussions with the admin-
istration regarding their plan.

The day before Christmas
break, the company received a
letter from Goldrick which
stated that approval was
granted to the Munchy Compa-
nic, said Very, but ten restric-
tions were listed.

These restrictions included that the Munchy Company had
to have an office outside of
their residence hall, send let-
ters to all distributors explain-
ing that the Munchy Company is
not a University enterprise,
and acquire two insurance
policies to cover inventory
and liabilities. Frank Angelle, also
a company founder, said these
insurance costs amounted to
about $60 per month.

After receiving this
restricted approval, the found-
ning members decided against
operating this semester.

"After making all the initial in-
vestments, the Munchy Com-
pany would begin making
money at about the time we
graduate," said Very.

Therefore, the three
founders said they are looking
for a group of younger students either this
year or next year.

Office space is still available
in LaFortune Student Center
for the company to use, if it is
started up again by potential
buyers. According to the
Munchy Company, the buyers
would be able to begin opera-
tion in about a week.

Angelle said, "Phone order-
ing is the big market area for
the future. Customers enjoy the
convenience of delivery."

The purchase price of the
Munchy Company is negoti-
able, but the original members
want a percentage of the profits
in the future. Very said, "We
still want to be part of the com-
pany; it is just unfortunate that
we are seniors."

The Observer
The Observer is now recruiting
for the following positions.

Computers don't solve everything

The last few years have been filled with a
talk about how great computers are.
They've been compared with everything
from geniuses to Men of the Year. INC.
Magazine, on the other hand, has made a list
of what the miracle machines can't do for you:

- A computer can't always do broad
problems that are poorly defined. The user has
to understand exactly what problem he wants
devise to solve.
- A computer can't save money by elim-
ninating workers. "The cost of automation is
rarely offset by reduced payroll expenses," said
Tom Christo, a New Hampshire attor-
ney. Instead, computers can create new
ways of doing things, such as moving out
invoices and payments more quickly.
- A computer won't clean up errors made
by hand. This goes back to the GIGO rule.
If you put Garbage In, then you're going to
get Garbage Out. "Computers are fast and
accurate," said Richard Raysman, another
lawyer. "But if you give them bad informa-
tion, they'll get you into trouble much faster
than a manual system will."

ON CAMPUS • IN TOWN • ACROSS THE USA
The Notre Dame Credit Union has joined the CIRRUS national
network of 24-hour teller machines.

ON CAMPUS
- On campus, at the ATM located at the Bus Stop
- When you travel, at over 10,000 CIRRUS ATM locations
- Right here in town, at any financial institution with a CIRRUS
machine.

RÉSUMÉS
Adworks, the Notre Dame Advertising Network, is introducing
a new résumé service
for students on campus!

- professionally typeset résumés
- printed on top-quality paper
- next-day service
- matching stationery available
- incredible prices

Takes Big East lead

Pitt edges Syracuse, 63-61

Associated Press
PITTSBURGH-Charles Smith made two foul shots with eight seconds to play Monday night to give No. 10 Pittsburgh a 63-61 victory over No. 9 Syracuse and sole possession of first place in the Big East Conference.

Jerome Lane, the nation's leading rebounder, muscled his way to 21 points, 16 in the second half, and 14 rebounds as the Panthers, 20-4, won their seventh consecutive game despite trailing by as many as seven points. Pitt, 9-2 in the Big East, defeated Syracuse for the second time in two weeks. The Panthers won 84-70 in Syracuse on Jan. 26. Syracuse, 19-4 overall and 8-3 in the Big East, got 19 points from 6-foot-10 center Tony Seikaly and 16 from Sherman Douglas.

Temple 73, Penn St. 70
STATE COLLEGE, Pa. - Mike Vreeswyk made two free throws with 13 seconds left in overtime to help No. 6 Temple beat Penn State 73-70 Monday night and remain undefeated in the Atlantic 10 Conference.

Vreeswyk's 3-point field goal with 18 seconds left in regulation tied the game at 61-61 and Penn State's Wes Jones missed a shot with three seconds left to force the overtime.

Vreeswyk's free throws with 13 seconds to play gave Temple a 72-68 lead that sealed the victory.

Nate Blackwell led Temple with 21 points, while Vreeswyk added 18.

Temple improved to 24-2 overall and 13-0 in the conference, while Penn State dropped to 11-10 and 5-8.

Auburn, behind acrobatic jumpers such as this one by Chris Morris, defeated Florida last night, 84-70.

ARMY RESERVE OFFICERS' TRAINING CORPS

USE YOUR COLLEGE DEGREE TO GO PLACES

• Whatever your personal and professional goals, you can probably get there faster in the NAVY. Our various officer programs offer international scope and world-recognized prestige.

• Navy leadership and executive management training go hand-in-hand to prepare you for an exciting role as a Naval Officer.

• Upward Mobility is more than just a promise; it's a reality. Promotions come regularly as your experience and knowledge increase. Many of today's leaders in business, government and the professions have successfully completed a career as a Naval Officer.

Your options and opportunities are as varied and challenging as your interests.

• Naval Officers are:

  • Aviators who fly F-14 TOMCATS
  • Engineers on Nuclear Submarines
  • Computer Specialists
  • Doctors
  • Business Managers
  • Procurement and Fiscal Managers
  • Civil Engineers
  • Lawyers
  • Meteorologists and much more

• Naval Officers receive pay and allowances worthy of a professional and, thanks to extra benefits such as free dental and medical care, savings and annuity, and exchange privileges, you keep more of what you earn.

• 30 days paid vacation each year allows you to enjoy some of the fringe benefits and travel opportunities available through the Navy.

• All of this is just a part of the story; only a Naval Officer who has experienced it for himself can tell you what it's really like.

Naval Officers will be on campus February 18-19. Sign up at the Placement Office to talk with them personally about your future goals or call ahead for more information.

All-Star sub Chambers winds up game MVP

Associated Press

SEATTLE--In the beginning, Pat Riley didn't have to worry about his starting lineup as coach of the West squad for the 37th NBA All-Star game.

Until Houston's Ralph Sampson injured his knee last week, and NBA Commissioner David Stern chose the Seattle SuperSonics' Tom Chambers to fill in.

So Riley was faced with starting one of the original reserve players, or Chambers the only All-Star from the game's host city.

He chose Chambers.

The upshot was a delighted Kingdome--a game-high 34 points for Chambers and recognition as the game's Most Valuable Player.

"Starting Tom was a great coaching move," Riley jokingly said after the West beat the East, 154-149 in overtime Sunday. "I didn't want to be booed in front of 40,000 fans before the game started."

"I could have done things differently, but Tom showed for himself and for the Sonics today," added the Los Angeles Lakers coach.

The 6-foot-10 Chambers hit 13 of 25 field goal attempts, including two of three 3-pointers. He had 27 of his points after halftime. He also pulled down four rebounds and had two assists.

The only players to score more points in an all-star game were Wilt Chamberlain, who had 42 in 1962 and Rick Barry with 38 in 1967. Chambers' 34 tied George Gervin in 1980 and Julius Erving, who played his final All-Star contest Sunday, in 1984.

"Today I'm the best in the world," Chambers said. "It's unfathomable, me, Tom Chambers, can be that. It means everything. It's just a tremendous thrill. I'm as excited as I can be."

He also gave credit to Dallas' Rolando Blackman, who sent the game into overtime with a pair of free throws with no time left in regulation play and was runner-up for the MVP award.

In the overtime, Blackman and Chambers each scored four points as the West won for only the second time in eight games.

"My award wouldn't have been possible if Rolando had missed one of those free throws," Chambers said.

Blackman returned the compliment: "He's a great player," he said of Chambers. "He's a devastating type player who can blow out a game for you."

They did, including one wild stretch in the fourth quarter when the teams combined for 13 points in 1 minute, 9 seconds.

"Everything was happening so fast. It was like we were in a whirl," Johnson said.

Chambers' performance may help erase a reputation for being a one-dimensional player interested only in scoring. On three occasions Sunday, he was on the floor scrambling for loose balls.

"I hope this brings me a little bit of respect," said Chambers, now in his sixth NBA season. "I also hope it gives the Seattle SuperSonics a little bit of respect, too."

Chambers credited Johnson, who had 13 assists, for directing the West's comeback victory.

In voting by a national sports panel, Chambers had eight votes and Blackman six. Moses Malone of Washington had one.

"It's always been my dream to play on the same team with Magic Johnson," Chambers said. "It was everything that I dreamed of."

Grace defeats Dillon, 3-1, grabs Blue Division lead

Sports Writer

With a little less than a month left in the Interhall hockey season, only two teams still remain unbeaten and untied.

Defending Interhall champion Grace is now 3-0-1 after defeating a tough Dillon squad last Thursday night at the ACC rink. Later that night, Pangborn (2-0-1) beat Sorin, 6-0, in a game that was suspended in the second-half due to a bench-clearing incident (see related story, page 1).

But in the Grace-Dillon contest, after a fairly evenly played first-half which saw no scoring, Grace turned it up a notch in the final period to register a 3-1 victory.

Grace had a power-play opportunity in the first-half, but could not cash in. Several scoring chances by Dillon also came up empty, due in part to the goaltending play of Grace's Gary Davis.

"Gary was able to stop several of their scoring opportunities which was a big lift for our guys," said Grace captain Jim Rataczak.

Grace's Drew Spearsd got the game's first goal early in the second period. Spearsd was in front of Dillon's goal when he kicked home a loose puck that had rebounded off Dillon's goalie, who stopped a Steve Bishop, who looks like a houdini on ice at times, made some impressive coast-to-coast rushes that nearly produced scores. His stick handling and skating abilities were a beauti-

Grace had the third goal for Grace was scored by Rataczak, scoring off a rebound. But Dillon avoided the shutout when Frank Gianor scored on a power-play. Gianor took a pass from behind the Grace goal and shot it past Davis.

"It was a tough game as expected and seems to be that way every year," said Rataczak.

Rataczak knows his club is in good position for making the playoffs, but cautioned that they still have a few hurdles to surmount.

In the Blue League, Grace is currently atop the standings, followed closely by Off Campus (3-1). Off Campus, which has posted earlier victories against Carroll Keenan and Cavanaugh Howard by respective 10-1 and 9-0 whippings and a loss to Morrissey. The remaining Gold favorites (Alumni and Pangborn) are to win the Blue League.

**Women’s Soccer Club finds shelter indoors**

In between its fall season and spring outdoor tournament, the Women’s Soccer Club will start its winter indoor season this week.

The Irish will get an early look at big time competition this Sunday at Saint Mary’s when the Belles host the fourth annual Women’s Indoor Soccer Invitational. Michigan State, Indiana, Illinois and Maquette will compete in the tournament with Notre Dame and Saint Mary’s.

“Michigan State has gone dry this year, and they’ve always been really good,” said Club President Jamie Havercamp. “Marquette won our outdoor tournament last year, and Indiana and Illinois are there again.”

Notre Dame faces Indiana at 9 a.m., and will then play Michigan State at 1 p.m. The championship is scheduled for 3 p.m., with Notre Dame getting the double header.

Air force sweeps series as injuries plague Irish

By PETE SKIKO
Sports Writer

When it rains, it really seems to pour for the Notre Dame hockey team.

The Irish limped out of Colorado Springs after dropping a two-game set to the Falcons of Air Force, but not before losing several players indefinitely because of injuries in the opening game on Friday night.

In that game, which the Irish lost 4-3 in overtime, those who were counted among the injured or ailing included sophomores Tom Smith (knee), Roy Benmish (walking pneumonia) and Matt Hanzel (leg muscle pull), and juniors Tom Mooney (hand), Mike McNellis (leg) and Lance Pet- ten (hip pointer).

Head Coach Lefty Smith cited the gutty play of the remaining healthy Irish players as the factor which kept Notre Dame close on Friday and within striking distance most of the way on Saturday.

"For a while I was thinking of going out on the ice," said Smith, reflecting the desperation his team faced.

"Friday night, we started out flat but played well for the final two periods. We really hung in quite well, considering our lack of numbers, but it would have been nice to have pulled the thing out.

"Notre Dame led 3-1 for much of the third period on Friday, but Air Force tied the score with 45 seconds remaining in the regulation, and won the game with a minute and a half left in overtime.

"We picked up a couple of the dumb penalties in the late going," said Smith, "and they killed us on the power play. But I'll tell you, our goalie (freshman) Lance Madison really kept us in the game when we didn't play well overall in the first period.

"Saturday it was like the walking wounded out there. We were down to three lines and four defensemen. When you fly to places like Colorado, you're limited to how many kids you can take. That really hurt us, and we ended up having a real tough night. But again, I liked the fact that we stayed intense and were aggressive throughout. We kept our poise even though things were a bit disor- ganized.

The final on Saturday was 6-1. The two losses dropped Notre Dame's overall record to 8-14, and the team now looks for- ward to conference action over the next two weeks. The up- coming games are of vital impor- tance to Notre Dame's po- sition in the ACHA standings.

"We've got Michigan-Dearborn and Lake Forest both on the road," said Smith. "Lake Forest just swept a pair from Kent State (another con- ference foe) so if we can finish strong, we could conceivably come out on top of the heap.

"The Irish take on the Wolves of Michigan-Dearborn this weekend.

Indiana center Dean Garrett finds his team caught between Nevada-Las Vegas and North Carolina for the top three spots in this week's AP Top Twenty poll.

By TERRY LYNCH
Sports Writer

About the biggest thing the Notre Dame fencing teams had to worry about in Columbus, Ohio this past weekend was fin- ding a way back home.

Oh, the usual things hap- pened in the meet. The men beat everybody in sight. So did the women, except for a little scare from the Temple squad.

The winning streaks continue, now reaching 69 straight meets for the men and 38 for the wo- men.

The real problem was getting away from the wilds of Colum- bus. The teams were nearly stranded by transportation and weather problems in the middle of Ohio Sunday night, and didn't roll into South Bend until 1 a.m.

Other than that, the story remains the same for two of the highest college fencing teams in the nation.

In the closest of the meet, the weekend, the women's team fought back from a 3-1 deficit to claim a 9-7 victory over the Temple Owls. Temple, consid- ered by many to be the best team in the East, was without the services of their top fencer, Denise Dobesh. That suited the Irish just fine, because they were without the services of all- American Molly Sullivan, who was in Germany participating in the Senior World Cup.

"Temple was a very good test for us," said Head Coach Yves Auriol. "Beating them was a very good sign. We are finally coming together as a team.

The big dramatics in the Temple meet came from fresh- man Anne Barreda, who came off of a close 3-2 but only to be forced to fence again on another strip. Temple subbed in a fresh fencer, but Barreda, who was visibly tired from her previous meet, fended well enough to claim another 3-2 win.

Kristin Kalcomek provided the big spark for the Irish, pos- sing a 19-2 record this weekend.

The Sophomore from Portland, Ore., raised her season record to 33-6 and now leads the team in wins.

Fencers win again...and again...

UNLV remains on top; Duke moves to 15th

Associated Press

Nevada-Las Vegas, which has used the three-point goal to go over the 100-point mark 11 times this season, remained No. 1 for the second straight week in the Associated Press college basketball poll.

The next seven spots in the rankings released Monday also were the same as last week: Indiana, North Carolina, Iowa, DePaul, Temple, Purdue and Oklahoma.

Nevada-Las Vegas, 23-1, at- tracted the largest number of first-place votes and 1,382 points from the nation- wide panel of sports writers and broadcasters. The poll in- cludes games through Sunday.

The Runnin' Rebels won both its games last week, defeating Utah State 113-78 and San Jose State 87-64 to stay unbeaten in the Pacific Coast Athletic As- sociation after 11 games.

Indiana, 19-2, and leader in the Big Ten Conference with a 16-1 mark, landed 10 first-place ballots and 1,215 points. The Hoosiers scored conference tri- umphs over Michigan State 84- 80 and Michigan 83-67 on Sun- day.

North Carolina, which got the other four No. 1 votes and 1,194 points, beat North Carolina State 96-79 and Virginia 74-78 in overtime Sunday to boost its record to 20-2 and keep the lead

in the Atlantic Coast Confer- ence.

Iowa received 1,086 points after making its record 21-2 with wins over Minnesota and Akron.

DePaul, the lone ranked in- dependent, moved to 25-3 with victories over North Carolina State and Dayton and received 967 points. Temple, 23-2, un- beaten in the Atlantic 10 with victories over Massachusetts, Rhode Island and St. Joseph's last week, got 963 points.

Purdue, 18-3, a winner over Wisconsin and Northwestern, received 969 points. Oklahoma, 19-3, which posted Big Eight tri- umphs over Nebraska and Mis- souri last week, landed 867 points.

Syracuse, 19-3, one of five ranked Big East teams, ad- vanced two places into the No. 9 spot with 667 points after pos- ing conference victories over Seton Hall and Connecticut. Pittsburgh, 19-4, became No. 10 with 590 points, up three places from a week ago, scoring Big East wins over Villanova and Providence.

Illinois headed the Second Ten, followed by Clemson, Georgetown, Alabama, Duke, St. John's, Kansas, Texas Christian, Florida and Provi- dence.
