Dukakis: Victory in sight

Associated Press

Michael Dukakis said Wednes-
day that victory in the Democ-
ratic nomination battle is "visible, but not inevitable" after his impressive New
York win. Rival Jesse Jackson
promised the presidential con-
test will get "even more excit-
ing" as it moves to Pennsyl-
vania minus Albert Gore.

"When I look back at Iowa
now, there were many of us in this,
but now there are three. Bush, Dukakis, and
me," Jackson said after finish-
ing second in New York.

Democratic leaders across the
country talked of Dukakis as the party's likely standard-
bearer in the fall, while Repub-
lican nominee George Bush said he looked for-
ward to battling the Massachus-
sets governor in an "old-world liberal Democrat.

"New York... almost locks it
up for Dukakis, or comes close
to it," said Sen. John Glenn of
Ohio, who sought the 1984
nomination.

"It won't be a brokered
convention. It'll be a first-ballot
victory for Dukakis," said Demo-
cratic National Commit-
tee chairman Paul Kirk
cautiously, that Dukakis has not
locked up the nomination yet.

Quoting a baseball maxim,
Kirk said "Dukakis isn't over 'til it's
over.

But in contrast to earlier worries about a splintered con-
vention in Atlanta in July, Kirk said "it's a very wholesome
positive unifying convention." He lauded both candidates,
saying "these two who are
up there" had given "a real opportunity for
joining together to win.

"These two" that Kirk
cited as examples of a cen-
sable road to victory were Ford
Brown from Coffeyville, Okla.

The focus of the Democratic
campaign turned to Pennsylva-
nia, with 178 delegates at stake
next Tuesday.

Democratic National Com-
mittee chairman Paul Kirk

Boyfriendgirlfriend? Or are we just dating?
Kendra Morrill
Assistant News Editor

Love knows no bounds. It also knows no definitions, no explanations, no logical terms to describe it.

Everyday, at one time or another, try to describe whatever relationship he or she might be in, especially if it is a new and previously undefined relationship.

If you try to avoid description, good luck. "Friends" inevitably force some kind of definition or explanation by asking outright what the situation is. They don't understand that they are forcing you to define the undefined, explain the inexplicable, give shape to the intangible. They just don't realize they are making you state what you may have just concluded would avoid letting you into words.

So, in order not to give the "wrong" answer, the key is to memorize several "right" answers, depending on the situation, and to retool the answers as though you really analyzed your feelings and knew what you were talking about.

The questions and corresponding answers usually vary by degree of commitment/emotional attachment. Beginning with the least commitment:

- Are you dating?
  This is fairly easy to answer without committing yourself very much. After all, what is "dating"?"Maybe going to movies or parties together?" Meeting for dinner at the student center? Going to more than one SYR with the same person? You are fairly safe in saying "Yeah, I guess we're kind of dating." But to be really safe, stress that you also date other people.

- Are you seeing each other?
  This doesn't refer to sight, and it asks for a little more commitment than "dating" does. It implies that you are, temporarily at least, somewhat attached to whomever you are "seeing." It involves more of an emotional commitment than merely doing things together—it usually means you like to do things together. But again, to be safe you could add that you'd like to see other people, or that this is just a temporary arrangement.

- Are you going out?
  Again, this is a little stronger than "seeing each other." Commitment at some level is definitely implied. This person you're going out with can be construed as your boyfriendgirlfriend, which leads to...

- Are you, like, boyfriendgirlfriend?
  This must be asked with a giggle, with "like" always included, and with "boyfriendgirlfriend" pronounced as one word. It belongs in the same group as "Are you, like, going to the Mall?" and "Dude, like, check out my new skateboard." The best answer you could possibly give is an emphatic "no." Regardless of whether or not you are, like, boyfriendgirlfriend, this is a silly question and attaches a silly label to you.

New, to avoid giving a direct answer to any question but to still give some answer so as not to be asked again, you could always give a longer explanation: "Well, we're really good friends and we do a lot together and we like to spend time together and we have alot in common" is generally an effective explanation.

My favorite, for myself, is: "I'm in like." The only problem with this one occurs when you begin to pass the like-phase and enter into the serious commitment/emotional attachment phase. Then, you might have to say the Capital L word, as in "I'm in L..." Then, once you admit that to yourself, you will probably have to admit it to the person you're in L... with. That means saying "I L... you." If you've reached this phase, you're on your own. No form answers can guide you now.

Question: How do you reach over 12,000 people daily?

Iran mobilizes to face U.S.

Associated Press

NICOSIA, Cyprus - Iran began full mobilization Wednesday to confront the United States and Iraq, and it fired a missile into Kuwait that reportedly fell near a U.S.-run oilfield. Iran fired missiles into three Iranian cities.

The official Islamic Republic News Agency said Iranian forces killed or wounded 360 Iraqis and captured more than 250 in the Shemiran mountain region of Kurdistan in northern Iraq.

Iran claimed its forces were mopping up Iranian pockets of resistance in Iraq's southern Faw peninsula after recapturing the region two years after the Iranians overran it.

Iraq also said it would stop bombing Iranian cities beginning at midnight (4 p.m. EDT) as long as Iran did the same, the Iraqi News Agency reported.

There was no immediate response from Iran. Hundreds have been killed in the exchanges since Feb. 29 and two cease-fires lasted only a few days.

After the Iraqi announcement but before midnight, Iraq said it fired missiles into Tehran, Isfahan and Shiraz. Tehran radio reported a strike on Tehran and said civilians were killed.

The clashes with the U.S. navy and the unexpected Iraqi recapture of the Faw Peninsula in the first major Iraqi offensive in two years clearly have jolted the Iranians.

The radio said all volunteers, known as "basij," should report to bases throughout the country "and get ready for departure" to the battlefront. The broadcast made no mention of numbers, but Iranian leaders have claimed up to 5 million Iranians were trained in the last six months.

The U.S. navy sank an Iranian patrol boat, crippled two frigates and set two offshore oil platforms on fire Monday in the worst clashes with the Iranians since the Navy buildup in July last year to curb Iranian attacks on shipping.

Iranian TV showed a ceremony in the gulf port of Bushehr, where senior military officials lauded the bravery of the crew of the patrol boat Joshan, which was sunk by the U.S. navy. Iran has said 15 of the Joshan's crew were killed and 29 wounded.

The clashes prompted Lloyd's of London insurers to double their rates on ships traveling to the gulf.

Admissions and Financial Aid Departments.

"The students' reaction seemed to be really positive," said Rodgers. "There were some students who weren't actually considering Notre Dame who are considering Notre Dame now.

Although academic life was emphasized during the weekend, there were several social events, including a mixer, bowling night, and a dance in the Main Dining Room. An inter-denominational prayer service was offered in addition to Saturday evening Mass.

All of the visiting students stayed on campus with other minority students currently enrolled at Notre Dame. "I really believe the perceptions of the students about the professors and the school are the things that are really important," said Ken Durgang, director of minority student affairs.

Gandy described the students as, "very good students (and) very intelligent. They had well-prepared questions. It was obvious they were good thinkers."

"I think the main concern was probably where exactly a minority student fits in at Notre Dame, and what are the support groups and networks available to minority students for both academics and non-academics," said Gandy.

"I've had some phone calls from those students expressing their appreciation," said Gandy. "I've actually had some students who returned home crying, they actually didn't want to leave."

5:30 rule would have been "counterproductive," said Gernes. She added that she had heard complaints, but that there were no more complaints than usual. "No one's gotten hurt," said Gernes. "It's been orderly in the process."

But many students still expressed dissatisfaction with the process. "It's like the stock market," said junior Greg Kuzmian. "It's not a line, it's an orderly mess."
ND nets grants of more than $1M

Special to The Observer
Notre Dame received $1,961,695 in grants during March for the support of research and various programs. Research fund totaled $783,664, including:

$132,275 from the National Institutes of Health for research by Morton Fuchs, chairman and professor of biological sciences, on the reproductive physiology of Aedes mosquitoes.

$123,580 from Upjohn Co. for unrestricted research by Jacob Simansukovic, adjunct professor of chemistry, and Thomas Fedner, professor of chemistry.

$95,000 from the U.S. Department of Energy for research by John LoSecco, associate professor of physics, in non-accelerator high energy physics.

$61,650 from the National Science Foundation for studies of the theory of several complex variables by Wilhelm Stoll, professor of mathematics, and Pit-Mann Wong, professor of mathematics, and Pit-Mann Wong, professor of mathematics.

$55,000 from International Business Machines for research by J. Kerry Thomas, Nieuwland professor of science in the chemistry department, on photochemical mechanisms of photolithographic imaging systems.

$50,000 from the National Science Foundation for research by Frederick Goetz, associate professor of biological sciences, on evolution in fish.

$48,490 from Sandia National Labs for research SBR technology in biodegradation of wastes by Robert Irvine, professor of aerospace and academic excellence.

$40,000 from the National Science Foundation for research by Steven Buechler, associate professor of biology, on bacteriological activities of bacteria in liquid/Solid phase.

$35,000 from the National Science Foundation for research by Julia Knight, professor of psychology, on eigenvectors of complex laplacians.

$22,500 from the Occidental Chemical Corp. for research by Charles Kulpa, associate professor of biology, on interaction of isocyanates, on social integration of handicapped children.

$13,275 from the American Chemical Society for research by J. Kerry Thomas, professor of science, on photochemical mechanisms of photolithographic imaging systems.

$4,000 from the Association of Women In Science for faculty development by Nathan Hatch, associate dean of the College of Arts and Letters and director of the Institute for Scholarship in the Liberal Arts.

Stealth bomber is now visible to the public eye

Associated Press

WASHINGTON The Air Force, lifting a decade-long veil of secrecy, released pictures of its Stealth bomber on Wednesday and said the plane would make its first test flight this fall.

As disclosed in 1985 by former Sen. Barry Goldwater, R-Ariz., the new long-range strategic bomber resembles a big "flying wing," with no fuselage in the middle.

The Stealth bomber, officially designated the B-2, takes its nickname from the fact it is designed to fly without showing up on radar.

Sen. Sam Nunn, D-Ga., chairman of the Senate Armed Services Committee, predicted the bomber "will render obsolete billions of dollars of Soviet investment in their current air defense."

The Air Force said in a statement that it was beginning to lift its secrecy surrounding the plane because of the approach of the maiden flight sometime this fall.

Such details as performance characteristics, crew size and maximum payload remain classified, however, the Air Force said.

Indeed, some of the details about the plane's design — for example, the placement of the engine exhaust outlets — have been deliberately masked in the artist's rendering released Wednesday, service sources said.

The Air Force did acknowledge, though, that its cost estimate for the Stealth bomber program was now being revised.

"While the acquisition of 132 B-2 bombers was originally estimated to cost $36.6 billion in 1981 dollars, the Air Force is re-evaluating cost estimates for the program as a result of current and projected fiscal constraints," it said.

"When that process is completed later this year, the Air Force will release those updated figures."

Rep. Les Aspin, D-Wis., chairman of the House Armed Services Committee, just last month described as "probably unrealistic" the Air Force's original cost estimate for the B-2.

The flying wing design has long been the object of experimentation by Northrop. The company flew a propeller-driven version of such a plane, known as the XB-35, in 1946. A jet-powered version, the YB-49, first flew in late 1947 and was tested by the Air Force. But the service never purchased any of the planes and experimentation with the prototypes ended by the early 1950s.

The Stealth bomber, officially designated the B-2, takes its nickname from the fact it is designed to fly without showing up on radar.
Japanese-Americans may receive payments

Associated Press

WASHINGTON - The Senate voted Wednesday to give $20,000 tax-free payments to thousands of Japanese-Americans who were forced from their homes and sent to internment camps during World War II.

Final passage came on a 69-27 vote after an emotional debate in which senators recalled the sometimes-harsh treatment and financial losses suffered by about 120,000 Japanese-Americans who were interned after Japan attacked Pearl Harbor, Hawaii, on Dec. 7, 1941.

The bill would require the United States government to apologize for the mass roundups and would make each of the estimated 60,000 survivors eligible for $20,000 payments. A similar bill already has passed the House.

On votes of 67-30 and 61-35, the Senate defeated attempts to strip the bill of the payments, while retaining the apology. It then voted 96-4 to kill an amendment proposed by Sen. Jesse Helms, R-N.C., to withhold payments until Japan compensated American families for losses suffered at Pearl Harbor.

At one point, Sen. Spark Matsumoto, D-Hawaii, was brought to tears as he told of an elderly Japanese-American internee being killed by machine-gun fire when he strayed too close to a camp fence. But Sen. Malcolm Wallop, R-Wyo., argued that the internment "was not a dishonorable act, it was the option of a nation in the first days of a war." He added: "These payments acknowledge the unconstitutionally deprived of liberty...and the stigma of being deemed loyal."

Opponents, in addition to objections over the payments, complained about a statement in the bill that the internment "was caused by racial prejudice, war hysteria and a failure of political leadership."

The return of the king

Mentalist The Amazing Kreskin leads a seance to contact the spirit of Elvis Presley in a Nashville recording studio. About a dozen loyal fans later fell to their knees as Kreskin played "Love Me Tender."

ND, area researchers work on medical diagnostic tools

Special to The Observer

Researchers from the University of Notre Dame have joined colleagues from two Chicago-area universities in an interdisciplinary engineering research center that will work together to develop less expensive and less invasive medical diagnostic tools with equal or superior capabilities.

Participants in the center are the University of Notre Dame, the University of Illinois at Chicago, and Northwestern University. They will work together with faculty from several Chicago-area medical schools and teaching hospitals to advance the field of signal and image processing in medicine, according to Robert Gordon, vice president of advanced studies at Notre Dame.

The Engineering Research Center for Signal and Image Processing and Medical Applications (SIPMA) will have its primary facilities at UIC, he said. The multi-institutional organization of the center will provide its researchers with access to costly MRI (magnetic resonance imaging), CAT Scan, holography and other signal and image processing (SIP) equipment not otherwise available within a single institution.

According to Anthony Michel, dean-elect of Notre Dame's College of Engineering and Freimann professor of electrical engineering, Notre Dame's engineers bring to the effort strengths in signal and image processing and systems control. "These compliment very well the particular strengths of the other institutions," he said.

Michel is among the team of engineers from Notre Dame participating in the research center.

The main goal of the center is to develop equipment that will provide physicians and surgeons the clearest and clearest possible view or image of a section of the body, in three dimensions, with the ability to rotate and to change the viewing angle. It's also conceivable, Michel said, that the dosages of radiation or of dyes used with certain equipment may be reduced for otherwise comparable results, which will benefit the patient's well-being.

An example of SIPMA's goals can be seen in the research of Notre Dame's Ruyen Lan, professor of electrical engineering. Lan is studying how the processing of ultrasound images might be improved to provide a clear image. If ultrasound images could be improved, Liu said, this diagnostic tool might be used in place of more expensive and less portable CAT Scan equipment, which in the end will make diagnosis more accessible and affordable for the patient.

Other SIPMA research projects by Notre Dame engineers include studies to improve the sharing of medical information through computer networking by David Cohen, professor of electrical engineering; investigations into the satellite transmission of medical images by Daniel Costello, professor of electrical engineering; and research in discriminating between relevant and irrelevant information in medical signal and image data reduction.

SBP responds to criticism

Dear Editor:

Under normal circumstances, we would not respond to criticisms rooted in ignorance. However, because the Student Senate for the 1987-89 school year is comprised of new, energetic, intelligent and concerned students, we shall make a special exception by addressing Jeff Wood's letter of April 13 criticizing the Student Senate.

The discussion leading up to a decision whether or not to include seniors' responses in the survey questionnaire for the task force report on "The Whole Health Use and Abuse of Alcohol" and "Residentiality" was not made in spite of Dr. Murphy's recommendations but rather in light of them. His suggestion was that seniors not be included in the statistical tabulation for fear they may skew the results. Acknowledging this fact, we decided to include them in the survey, yet tabulate their results separately. Thus, we do not consider it "unintelligent, foolish, unreasonable, irrational or lacking in foresight" to make special efforts to collect the opinions of those students who have the most experience and insight into two issues every story that strikes the heart of residence life at Notre Dame, Alcohol and Residentiality.

We would like to invite you, as well as any member of the Notre Dame community, to attend the Senate meetings which are held on Mondays at 6:30 p.m. in the Notre Dame room of LaFortune, to discover that those people who you elected "truly do represent the people they say they do."

SMC election quirks addressed

Dear Editor:

We are writing in response to Miss Rucker's Viewpoint article concerning Saint Mary's elections. As it is true in any situation, there are two sides to every story. We as members of the 1987-88 student government would like to respond to the questions and statements submitted by Miss Rucker on Tuesday, April 12.

The 1987-88 student government has faced many challenging issues over the past year. including the NDSMC Gay and Lesbian Society, increased student involvement, library hours, AIDS, the Chili Project, date rape and the elections procedures. Anyone could have followed our progress by reading the paper or even asking a representative on student government.

As for the election in February 1988, the Reilly ticket submitted petitions for a recount and a revote using the correct procedures. Student government accepted these petitions and addressed them immediately. The discrepancy found during the recount did not affect the end result. After careful consideration, the Election Commissioner was not seated to the candidates and the Observer as a response to the quotient publication. It should be noted that the Election Commissioner cannot consider conducting a recount or a revote positively upon a candidate's request until the proper petitions have been officially submitted. The potential for a revote did not occur until 5:45 p.m. on Friday, February 26, just as the polls for the run-off election were about to close.

Members of student government do not believe that making an issue out of the election procedures was an embarrassment to the school or would make student government a "mockery." We believe that we dealt with the issue in an appropriate manner and handled it in such a way so that it would not have affected the other remaining candidates in a negative way.

The other problems that occurred because of the written form of the election procedures were brought to our attention and have been addressed. We have been discussing rewriting the Saint Mary's Student Government Constitution since January. Members of the Board of Governance, Programming Board and hall and class boards have been aware of this and had the opportunity to submit and voice their opinions as the representatives of the student body. This is their job, is it not? On March 23, 1988, the Board of Governance, as outlined in the constitution, unanimously adopted the amended constitution. This included over 20 amendments strictly concerning the electoral process. The fact that the 1987-88 student government promptly addressed and rectified the existing flaws in the system shows a desire to uphold the integrity and ideals of Saint Mary's College. We encourage all students to read the new constitution. It is not locked away in a box; it is open to all; it is YOUR constitution because ALL students are members of student government.

Miss Rucker, as a senior Government major, should recognize the democracy of her student government. Is it realistic to think that the President of the United States would call every citizen to ask his opinion on all issues? Does she believe this should be the case at Saint Mary's? As a student worker in the Student Activites office, Miss Rucker is well aware of who represents the student body and how the student government system works. Why did she wait until one month before her graduation to voice her words of wisdom?

Miss Rucker was also aware of and involved in the electoral process in the spring of 1987. If she felt the election procedure were such a great injustice to the members of the Saint Mary's student body, why didn't she attempt to discuss this with a representative on student government earlier? Why didn't she ever attend a Board of Governance meeting to voice her opinions? Why didn't she write a Viewpoint in The Observer prior to the elections so that we could have addressed the issue sooner and made the necessary changes? This is a "curious" thing.

During the upcoming hall elections, we hope students will see evidence of the changes made in the electoral process. The balloting and counting procedures have been corrected and will be efficient.

We also hope students will see how important their input is. We in student government cannot see all flaws; we need others to help us look at the current system, evaluate it and make improvements.

Finally, we stand by all the decisions made by the 1987-88 student government because we believe we have accepted challenges and upheld the ideals of our fine institution.

Quote of the Day

"It is the height of absurdity to sow little but weeds in the first half of the time and expect to harvest a valuable crop in the second half."

Percy Johnston
Remembering the spicfe of life

Mary Berger
Back to the Highlife

Back to another, one that is sometimes a little backwards, which we call home for four years.

I love this place as much as any other Domer. Going into my senior year, I envy the freshmen-to-be who will be arriving this fall, eyes and arms wide open to embrace all that we are and have here. At the same time, as I enter my last year of formal education, I envy the seniors who are about to embark on their new adventures: an adventure into the reality which has surrounded us throughout the last four years, but which we do not always live.

It was great to get away from campus this weekend. Just to get a breath of fresh air and be reminded of what else life is you would like to see. Life is made of the nouveau riche in their Gucci tennis wear making life afoul of the evening’s gala. And life is made of the poor people fudgling on the sidewalks with their belongings, watching the parades go by.

Life is made of those taxi drivers who take you to where you need to go in less time than you need, and those who drive blocks around your destination and drop you off with one minute to spare before your appointment.

Life is staying at the office until midnight and rising at the crack of dawn to complete a project because district managers don’t care that you have two other reports to complete for that day, and thus will not give you an extension.

Life is being a horse-and- carriage ride through downtown Chicago the spring evening and waiting over two hours just to get into the Hard Rock Cafe for a good hamburger.

Life is sidewalk musicians and street corner clowns who make you laugh. Life is women selling news on the street and grade school kids selling chocolate bars for their sports teams.

Life is the impatience that engulfs people as they wait for an elevator and then push to get a place in it, not letting the rider in front of them.

Life is being a tourist by day, but you let them help you with anything.

I watched as people scurried across the street, laden with groceries or briefcases, seemingly anxious to get home and get rid of those things.

Even though I lost quite a few valuable hours, I don’t think I could have spent on the government paper I ended up writing in the wee hours of Monday morning, my trip to Chicago renewed me. It is the spicfe of life, or so they say, and it’s truly amazing what a piece of pace can do for your outlook.

Alumnus produces ‘Two Moon Junction’

ZACK HUGHES

accept writer

Two Moon Junction’ is a new movie due for release in 500 theaters, in 25 cities by 20, April 29. What makes this movie a little different from others is that it was produced by a Notre Dame graduate, Donald P. Borchers. Borchers was born in Brooklyn, N.Y. With the help of a Navy ROTC scholarship paid for his own way and left Navy ROTC to the surprise of his commanding officer.

“I didn’t think I would be able to produce movies in the Navy,” said Borchers. Borchers graduated in December of 1977 because he had earned enough credits early but he is part of the class of 1978. While at Notre Dame, Borchers directed himself toward a producing career. He received a B.S. in Business Administration because, according to Borchers, “That’s what you need when you’re dealing with a lot.” At the same time Borchers took classes in cinematography, screenwriting, drama, writing, and directing so that he would know about every aspect of the industry.

“Producers don’t need to know every aspect of a career, but it helps if you know what an F-16 is,” he said.

During the summer of his sophomore year, Borchers got a job as a tour guide in Hawaii and Canada. He did not just show people the sights, he would, in stead, take complete care of the entire tour. He was responsible for every aspect of every tour.

According to Borchers, “It was a good guide that I first realized that I had a knack for directing and that I could do jobs done-like when a tour group would arrive and no rooms would be ready for them. That’s a producer, the guy who gets it done.”

With the knowledge that he could get things done, Borchers attended USC’s film school for awhile, and then took a job at Avco Embassy Pictures where he would handle hands-on experience. At Avco, he worked on 17 feature films for three years as an executive overseer of expenses.

Borchers then became an associate producer at Sandy Howard Productions. He also worked as the Senior Vice President of production and creative affairs at New World Pictures and founded his own company, Planet Productions Corporation. With his new company, Borchers put together the deals that created the movies, “Vamp,” “Tuff Turf,” “Children of the Corn,” and the controversial “Crimes of Passion.” The last movie almost received an X-rating.

As producer, Borchers oversees everything involved in a movie. Directors, salaries, in

vostors, and distribution are only a few of the many aspects with which Borchers must deal on each of his pictures. He does not try to be a real favor aspect of all this work, but said, “They’re all about even in my mind, each with good points and bad points.”

“Two Moon Junction” is Bor chers’ first movie that he is written and directed by Zalman King in 1976. “We got an R-rating on this movie, which is good,” said Borchers, “because we will make our own steamy sex scenes as did both ‘9½ Weeks’ and ‘Crimes of Passion.’ ”

The plot of the movie is pretty basic. A beautiful shrimp dinner star as April, the bethrothed southern belle, sorority queen who is drawn to Richard Tyson, a carnival ride operator. The relationship is completely over. Despite warnings against their liaison, they cannot keep their passions for one another quelled.

Although it has a relatively simple plot, the movie will be brought to life by the direction of Zalman King and the director of photography, Sandy Denny. Plummer played Robin Nellie’s video “C’est La Vie” which caused quite a stir.

Borchers had to get a green card for Plummer to work in this country after he convinced Plummer to do the movie. Plummer “loves having that kind of love for the camera,” said Borchers.

As such a motivator behind "Two Moon Junction", Borchers, the movie is bound to be a hit.

ANN SEIPERT

accept writer

A new album has recently been released by The Mighty Lemon Drops. The group, originally called the Sherbet Monsters, hails from London, where, in 1986, they created huge waves on the British underground scene. Since the group’s formation, national underground charts are compiled weekly, and it is a big deal to make the charts, especially if the group does not have an album out.

In 1986, their single, "Like An Angel" pushed The Mighty Lemon Drops to number one. Their sound built was then harder and inevitably more raw than their current sound. Now they sound like a slightly weaker version of Echo & The Bunnymen.

If I had to pick one adjective to describe this album it would be this boring. The redeeming factor of this World Without End is the first cut and released single "Inside Out." It’s catchy and clean, with a good drum beat. Paul Mort’s vocals come through really well in this bright pop song. It’s not too bad. The Mighty Lemon Drops can’t reach this height again on their new LP.

World Without End is the group’s third release.

The composition of the album is more typical of this LP. On this track, a drooping tempo is tempered by unmelodic lyrics and uninspired vocals by Mort. Just when the listener is ready to start the song, it’s turned on its head. It’s as if the band too, has realized that the song is going nowhere and just wants to win at the game, but doesn’t exactly know where to do it. Pretty weak.

The Mighty Lemon Drops create a sound which is at times fresh and upbeat. They don’t exactly imitate any new ground with this new album, so when you listen to it, don’t listen with high expectations or anything. Don’t get me wrong, I don’t hate The Mighty Lemon Drops. I just don’t like them.
Junior Mohan more than just par for the course

By CHRIS FILLIO
Sports Writer

The Notre Dame golf team will travel to East Lansing, Mich., this weekend to participate in the Spartan Invitational tournament at Forest Acres West Golf Course.

After a less than satisfying performance under adverse weather conditions at the Scarlet Course in Columbus, Ohio, this past weekend, the Irish linksters will seek to rebound.

Setting the pace for the Irish will be junior Pat Mohan. In his second year as a member of the Gold Team, the California native leads the team with a 77.8 stroke average.

"Pat has been a very consistent player this year for the team," said Irish head coach Noel O'Sullivan. "His course management and mental approach to the game is outstanding.

In the combined fall-spring season to date, Mohan has scored below 80 in fourteen out of the thirty-two rounds. He has also garnered the low round of the season, a 71 to open

Purdue Invitational in helping the Irish to a third-place finish. "At Purdue, it was the first time in a while that it all came together for us," said Mohan. "We're certainly capable of playing like that.

However, things did not always run so smoothly for Mohan. As a beginner at around age ten, Mohan had family support although he was the first in the family to really take a serious interest in the game. Upon entering high school, Mohan was forced to make an important decision.

"I had already started playing in golf tournaments at about age thirteen," said Mohan. "But when I got to high school, I had to choose between golf and baseball because in California they are both in the same season.

Mohan achieved numerous honors and distinctions throughout his golf career at Mission Viego High School. He earned all-league honors for all four years, lettering each year and captain the last two.

As a junior he was voted league MVP and subsequently followed that up by guiding the team to a league title his senior year with a 74 stroke average.

When it came time for choosing a college, Mohan was somewhat unsure.

"I had plans to play golf at Colorado, but I was also on the waiting list at Notre Dame," stated Mohan. "I finally got in here and fulfilled my lifelong dream.

For head coach O'Sullivan, it has been a dream come true as well. Freshman year was unkind to Mohan as he struggled on the links and failed to make the cut on the Irish squad. But that only served as a motive to work harder for Mohan. Last year he made the cut shot a season-low 73 on four separate occasions. In addition to this, Mohan added three medalist or runner-up performances in his first year with the Irish Gold Team.

"Pat's coolness and emotional stability makes him the player that he is," commented O'Sullivan. "He's a pure player, and definitely one of the best players skillwise that I've had on the team. The greatest part of his game is that he is able to visualize the shot beforehand, and he will hit the good shot under pressure. This is what makes him a step above the regular players.

Mohan has continued his consistent play this spring, turning in three medalist performances and finishing 13th overall at the Eastern Kentucky Invitational. Along with these honors, both Mohan and senior captain Dick Connelly are serious contenders for Academic All-Americans this year.

Lately Connelly and juniors Mohan and Doug Giorgio have provided solid play at the top three positions, while freshman Paul Nolla holds on to the fourth spot. This weekend for the Spartan Invitational, the call to travel as the fifth man went to sophomore Bobby Kloska. The Elkhart, Ind., native will hope to contribute from his fifth position which has been a problem area all year for the relatively young Irish team.

"Because of his perseverance and loyalty, he's a welcome addition to the Gold Team," said O'Sullivan. "Bobby Kloska has an excellent golfing background. He is very excited about this weekend. There will be a whole new chemistry this weekend at the Spartan.

A high finish in East Lansing could provide the spark the Irish need to rejuvenate themselves as they wind down regular season play. Once again, the Irish will look to Pat Mohan to score well as he has all season.

Braves

continued from page 16

ing autographs of all my heroes. I still look back and cherish these mementos on occasion. The names are standouts on anyone’s Hall of Famers: Jerry Reuss, Rick Mahler, Bill Nahun royalty, Mark Asselin, etc., the list goes on and on.

Second was the trip to Atlanta-Fulton County Stadium that I took last summer to watch the Braves lose to the Cardinals. In two short innings, I experienced memories that will last a lifetime: watching Dion James play a pretty mean game of dodgeball in centerfield, seeing Graig Nettles step to the plate three times with the bases loaded and two out, and accomplish the amazing task of getting no RBI, being astonished as to how knowledgeable the Fulton County crowd was (particularly one man behind me who yelled, “That’s why they’re in first place.”) after a Cardinal player homered, watching the Braves score that was on sale for $5 when I bought one suddenly go for $4. I bought one who yelled, “That’s why the Braves lose. I’m going to have a fun summer watching the Braves get manhandled and computing this year’s squad to other also-ran Atlanta squads of the past.

I realize that fans of pennant-winning teams could not imagine cheering for the Braves to lose, but you must understand that I’m used to summers in which winning teams could not imagine cheering for the Braves to win.

So relax, Orioles fans. It really does get fun after a while.
A prediction of the winners of the women's

As the Women's Bookstore Basketball tournament narrows down to the Sweet 16, speculation on who will win the coveted title begins to tease the fan's mind. Tournament play continued all week in the cold April weather at Saint Mary's. The teams who have made it to the Sweet 16 have both a combination of talent and luck. Kukla, Fran and Ollie has made it all the way to the Sweet 16 without playing one game. All the teams they were to play forfeited to them.

Other teams have had to struggle a little more to reach their positions. We Won Interhall looks to me like the team who will make it to the final four and has a good chance of winning the title. The team from Pasquerilla West won the interhall basketball tournament at Notre Dame this year and works well as a team since they have already played together in a tournament.

Another team who looks promising is Just Can't Get Enough. The team has the experience of Notre Dame basketball coach Muffet McGraw and other veteran players. Stable Shooters, who are all under 5’8”, has been having strong wins and have the advantage of two varsity athletes.

Tammey Radke and Julie Radke both play on the Saint Mary's basketball team and have helped the team pull together and brush-up on their technical skills. Give Me Your Address There could pull out a victory since the squad has a member of last year's championship team and two members from the runner-up team.

Kara England from last year's championship team joined Rochelle Holder and Carolyn Burke who won the championship in 1986 besides coming in second place last year. Almond Joy has had some decisive victories. Their fast-break have given them the advantage over many of their teams. The Supreme Court, Five Lymites and Yurtles and Turtles advanced by forfeits and might be a little slow in today's games. Whatnots Schinch had a tough game against This Why We Chose To Run Track but their victory proved they had the endurance to beat a tough team. The Sweet 16 field is a competitive bunch, and the final victor is usually as unpredictable as the South Bend weather.

We Won Interhall and This Too is my favorite since they have the confidence and the skill to come out ahead of a close race.
Sophomores continue to bolster ND lax attack

By PETE LaFLEUR
Sports Writer

The Notre Dame lacrosse team takes their 9-2 record on the road today as they travel to Ohio for games against possibly their easiest and toughest back-to-back opposition of the season.

The Irish play Wittenburg today in Springfield and then travel to Granville for a Saturday game against Ohio Wesleyan. Notre Dame routed Wittenburg 26-1 last year and holds a 7-0 series advantage over the Battling Bishops. The Irish are making a seven-game winning streak towards their first 10-win season. The team was denied that goal last Saturday when Denison snapped Notre Dame's seven-game winning streak with a 14-6 win.

To obtain that tenth victory the Irish will continue to rely on contributions from many players. Sophomores Brian McHugh and Mike Quigley are two players who could play a significant role in this weekend's games, according to head coach Rich O'Leary. Quigley shuttles in on the team's second midfield line and is one of only six players to have played in every quarter this year. He leads the team in ground balls with 46 and had a team-high 16 versus Kenyon. Quigley is seventh on the team in scoring with eight goals and three assists, but has been hindered by a .163 shooting percentage.

"Mike has contributed as much as any sophomore. He's been a threat on offense although his statistics don't show it," O'Leary said.

"Mike's a real stabilizing force in our midfield and we're just waiting for him to have a big game. He'll be one of the people we'll count on in the future." McHugh, meanwhile, is a starting attackman and is the team's second leading scorer with 18 goals, 11 assists and a .377 shooting percentage. He is also one of the team leaders in ground balls, with 35 for the season.

"Brian has been a real surprise considering that he had limited playing time last year. From the beginning he has showed a lot of maturity and confidence in working in the offense," O'Leary said.

"Brian complements (team scoring leader) John Olmstead very well and, although he's not the star, he still contributes a great deal to the team concept." Dave Carey, classmate of Quigley and McHugh, has been relied on more following an injury to starting creaseman Jeff Shay. Carey has started the last three games and is sixth on the team with seven goals, seven assists, and a .304 shooting percentage.

"We always joke around and call Dave the 'Ice Man.' But out there on the field he's really just a house of fire," McHugh said. "We really miss Jeff but Dave has done a great job filling in." O'Leary said the play of every player will be crucial because both games this week are important for the Irish, as they try to regroup from the Denison loss.

"The Wittenburg game will give us the opportunity to rebound after a shaky performance against Denison and we will likewise tune-up for the Wittenburg game," O'Leary said. "We hope to reverse our confidence by getting everyone to play and have them play well. It's always hard bouncing back from a loss after having so many straight wins." It gets significantly harder for the Irish on Saturday when they face the Battling Bishops. Ohio Wesleyan is the top-ranked team in Division III but is also among the most-feared teams nationwide, regardless of division. Wesleyan's only loss this season came to North Carolina, currently among the top three or four teams in the country. And O'Leary knows that the Irish will have to be at the top of their game to stay with the Bishops.

"The way it looks, Ohio Wesleyan probably has their best team ever. We have to go in hoping for the upset and we'll have to play our best," O'Leary said.

Stanley Cup-style defensive hockey can be expected to continue Thursday night when the Norris and Smythe Division NHL playoffs resume.
Detroit and St. Louis combined for just 41 shots as the Red Wings beat the Blues 5-4 in their Norris opener. And Edmonton's defense and penalty killing wore down Calgary 3-1 in the first game of the Smythe.

In Wednesday night's playoff action, Boston beat Montreal 4-3 in the Adams Division finals and New Jersey stopped Washington 5-2 in the Patrick.

Brown not worried about draft
Associated Press

SOUTH BEND, Ind. - Notre Dame's Tim Brown, the Heisman Trophy winner as the nation's top college football player last season, isn't overly concerned where he goes in Sunday's NFL draft.

"No reason to be nervous," said Brown. "I don't know what's going to happen, but the way I approach the whole situation is whatever happens can't be bad. You've just got to roll with the punches and wherever you end up you end up, and you don't worry about it."

The 6-foot, 195 pound wide receiver and punt returner knows he will not be the first man picked. The Atlanta Falcons already have used the No. 1 pick to sign Auburn linebacker Aundray Bruce to a four-year contract reportedly worth $3.5 million.
The Detroit Lions own the second pick but Brown isn't holding his breath while waiting to hear from them. Detroit's needs may dictate a trade down or the selection of Miami's Bennie Blades, the highest-rated defensive back.

Nor is Brown concerned that falling to No. 3 or even lower will diminish his market value.

It's Seamus Brennan Week!
Wish him a Happy 21st Birthday and a Happy Engagement!

ATTENTION JUNIORS! (Seniors-to-Be)

It's time to put your resumes together. Are they looking bare? Well, here's your chance to add some activities and have some fun at the same time. Such positions as "Newsletter Editor," "Advertising Coordinator," "Public Relations Director," and "Off-Campus Communications Liaison" are available. We are looking for enthusiastic people with new and creative ideas. If you are interested and have not received an application in the mail, please pick one up outside of the Junior Class Office. Please return all applications to your dorm executives (indicated on the application) or to the Junior Class Office by THIS Friday, April 22nd!

Tofu, Jam a fall in Round of 16

By BRIAN O'GARA
Sports Writer

And then there were eight.

BooKrooter Basketball XVII continued as eight teams advanced to the quarterfinals with victories yesterday. After a well-deserved respite today for An Tostal's Thursday at Social Mary's, BooKrooter action will continue on Friday at the BooKrooter courts as the field of title-chasers is now down to just eight.

Top seed Teggis White Lightning built up a big lead over Jimmy Swaggratt... and then held off a late surge to come away with a 21-12 win. Sean Cullinan again led Tequis in scoring with nine points while the Nannini brothers combined for nine more.

Second seed Lou's 2 Blind Men ousted the Kinkoids with little trouble, advancing to Friday's action with a 21-12 win. Jeff Peters and Tony Ronie combined for 13 points while zone-buster Lou Holtz found the seams in Kinkoids' zone defense and hit three straight 3's. Paul Gruber led Kinkoids with four points.

I'll Play Nice, but the third seed, defeated A Bad Dude, A Cool Buzz... 21-16 behind Bill Sullivan's eight points and four points from each point guard Al Martin and John Kennedy. Hahn's Funeral Home buried Corporate Raiders, 21-18, as guard Bruce Bondinghman directed the show for Hahn's, the fourth seed. Kevin Williams of Hahn's and Mike Smith of the Raiders both scored nine points.

Chip's Bar, the fifth seed, had little trouble with the Minnows, pulling out a 21-14 win. Steve Belles and Aaron Holland both finished with six points for the winners, who will face Hahn's in the next round.

A Builders almost took an early hike at the hands of upset-minded Put It In The Hole Again, Chief. Down 17-13 in the second half, A Builders went to Gary Vive on cable, and people all across the country could watch the Braves. Not that anyone did, mind you, but they did have the opportunity.

It was about this time that the Braves earned the moniker "America's Team." Let's be real. If I make a trip out to Walla Walla and head for the nearest sports bar I don't think I would see a bunch of people eating apple pie and cheering on the Braves (unless they were distant relatives of Dale Murphy himself). Anyone who has seen the empty seats at Fulton County Stadium knows they aren't even Atlanta's Team. But that's beside the point.

Fond memories of America's Team...the Braves

It's about that time again.

In just a couple of weeks, I will be returning to my hometown of Tallahassee, Fla., for another summer full of fun. For me, summer with my friends in good old Tallahassee means three things:

1) Watching too many lousy movies on the VCR (Has anyone seen Night of the Comet or Grease 2 lately?)
2) Wondering how we could possibly live in Florida when the nearest decent beach is almost two hours away.
3) And last, but certainly not least, is following Atlanta Braves baseball.

Yup, if it's starting to warm up here in South Bend, you know the empty seats at Atlanta Fulton County Stadium are getting hot. And while you may take a look at the current National League standings and think I'm in for a long summer, then you're missing out on the real beauty of following my beloved Braves.

True Braves fans know their team is bad. Heck, the Atlanta Braves were born bad. Except for a couple of inexplicable mistakes in 1969 and 1982, the Braves have been models of consistency for their ineptitude. Harold Baines drives in 90 runs every year; the Braves lose 96 games every year. And my friends and I have been there through it all. Before our Wigwam Warriors became "America's Team" on Super Station WTBS, and the Braves played on an Atlanta cable station named WTGC, we tuned in to watch Darrell Chaney, Mike Lam, Vic Correll, et al., bumble their way through the summer.

Eventually, WTBS started going nationwide on cable, and people all across the country could watch the Braves. Not that anyone did, mind you, but they did have the opportunity.

But now I needed a kick in the pants and realized, indeed they could... wondering if we still had grown accustomed to watching the Braves lose.

What made this moment memorable was collect...
