Associated Press

WARSAW, Poland - Negotiations early Thursday failed to bring a settlement to a strike by thousands of workers at one of Poland's biggest steel mills, and strikers said management was threatening police intervention.

Strikers at the sprawling Lenin steel mill outside Krakow in southern Poland issued a statement declaring: "The economic situation of authorities of the Polish People's Republic has led millions of workers and their families to the limits of poverty ... Our faith in party reforms is exhausted."

Solidarity chairman Lech Walesa, earlier urged nationwide "pressure on the authorities" to bring about reforms.

The strike was the biggest industrial action in Poland since the 1981 crackdown on the now-outlawed Solidarity trade union movement, and it posed the sharpest challenge yet to government economic reform policies.

Another strike was that student discussions in concernments about threats to the new postions.

The position of associate dean was created in 1981.

Saint Mary's has named Patrick White, head of the English department at Pfeiffer College in Misenheimer, North Carolina, to be the associate dean of faculty beginning in the fall, said Dorothy Feigl, vice president and dean of faculty at Saint Mary's.

White's primary responsibilities will be faculty development and curriculum development, said Feigl.

"The initial emphasis of the position is to foster effective programs to open up opportunities for faculty to create new teaching programs," said Feigl. White expressed excitement about the new position.

"It is a great opportunity for the students and faculty of Saint Mary's," said White. "It's an honor to be asked to help create a great institution even better."

White has a lot of new ideas for the upcoming year.

"I'd like to encourage faculty and students to work together in a coordinated effort to improve the teaching and learning environment," said White.

**Dukakis, Bush look forward to debate**

Associated Press

Pennsylvania - George Bush, the apparent Republican presidential nominee, and his likely Democratic opponent Michael Dukakis set a combative tone for the campaign Wednesday, with Dukakis saying Bush has "some explaining to do" on the Iran-Contra affair.

"Let him fire away," Bush challenged.

Both said they looked forward to debates.

The other Democrat still in the race, Jesse Jackson, looked gamely ahead to the next round of primaries in Ohio and Indiana. Despite Dukakis' huge victory in Pennsylvania on Tuesday and growing delegate lead, Jackson said the race wasn't over.

"I keep struggling against the odds, and I've always struggled against the odds and succeeded," Jackson said on ABC-TV. "This campaign will remain alive. It will go right down to the wire in California and New Jersey on June 7." Bush locked up the Republican nomination, passing the required 1,139-delegate mark with an easy win in Pennsylvania against a field that had long since withered.

He lunched privately with President Reagan, who indicated the time was nearing for a formal endorsement of his vice president.

Both Bush and Dukakis said they would continue their primary-campaign efforts. But they were already providing a preview of the fall general election campaign with a long-distance debate on foreign policy and other issues through network TV interviews.

Dukakis, the Massachusetts governor, opened fire on Bush's role in the Iran-Contra affair. Bush has suggested he would be a better choice as president because he has foreign policy experience that Dukakis lacks.

The governor said, "All we know is that he sat there and did nothing while we engaged in one of the worst and one of the most misguided adventures in the history of American foreign policy," a reference to the arms-for-hostages dealing directed by White House officials.

"I can't imagine what they were thinking of when they proceeded to do business with a terrorist nation," Dukakis added. "There's somebody in the administration, including the vice president, who's got some explaining to do."

Bush said he would ask Dukakis in debate what he would do about hostages in the Middle East. "Do you really care when a man like Buckley is being tortured to death?" he said he would ask, a reference to William Buckley, the CIA official who died after being taken hostage in Lebanon.

Jackson, campaigning in Ohio, took on both men on an issue he has tried to bring to the forefront of the campaign.

"I challenge Mike Dukakis and George Bush to define South Africa as a terrorist state that conducts and sponsors terrorism," he said.

Talk in both parties was of vice presidential nominees.

Jackson appeared to indicate that conservative Sen. Sam Nunn of Georgia, supported for the ticket by many Democratic leaders, might not be acceptable. He mentioned no names and framed his comments in terms of a running mate for himself, making what seemed to be a reference to Nunn's opposition to some civil rights legislation and to the Equal Rights Amendment.

Man charged after wife's body found buried in concrete

Associated Press

DAYTON, Ohio - A single count of murder was filed Wednes- day against a newspaper employee whose wife's body was found buried in concrete in the newspaper building, five months after he reported her missing to police.

Dennis Langer, first assis- tant Montgomery County pros- ecutor, said before Sinks was charged after the death of Judy Sinks was ruled a homicide. Coroner James Davis said Mrs. Sinks died last Nov. 19 from hanging.

Dean of White.

rience, he will be able to com- various departments."

eight years ago, but was killed only briefly, said Feigl. "The college is for- merly a woman's college, so we are all feminists," she said. "We felt this is the ideal time to reestablish the position."

This also gives Mr. White a lot of freedom in establishing his role as dean."

A committee of four, includ- ing two faculty members, a fac- ulty administrator, and Feigl, headed the search for the new faculty member. From a large pool of applicants, who responded to an advertisement in the Chronicle of Higher Edu- cation, the committee nar- rowed the choice to two candi- dates. These candidates were invited to the college where they met with administrators, faculty and students. Recommend-ations from these meetings resulted in the hiring of White. "White's background makes him compatible with a small liberal arts college," said Feigl. "Because of his wide range of academic expe- rience, he will be able to com- municate well with faculty of various departments."

White is a graduate of the University of Chicago with a degree in English. He has an M.A. and a Ph.D. in English from the University of Iowa.

City workers found Mrs. Sinks' decomposed body Tues- day night after using pick axes and sledge hammers to break up a concreteпедestal measuring about 2 feet high by 3 to 4 feet wide. It had been poured on the seventh floor of the Dayton Newspapers Inc. build- ing last November to support a water purifying unit for an air condi- tioner.

Davis said Mrs. Sinks, 44, also a newspaper employee, died from "ligature strangula- tion." She was hanged. "He said a rope had been wrapped around her neck several times,

Douglas Franklin, Dayton Newspapers human resources manager, said police told him Monday they believed a body might be hidden on the seventh floor of the building. They said an unnamed informant re- ported another newspaper em- ployee, Kenneth Rice, who had worked under Sinks, had helped Sinks take a 55-gallon drum to the seventh-floor utility room Nov. 20.

Douglas Franklin, Dayton Newspapers human resources manager, said police told him Monday they believed a body might be hidden on the seventh floor of the building. They said an unnamed informant re- ported another newspaper em- ployee, Kenneth Rice, who had worked under Sinks, had helped Sinks take a 55-gallon drum to the seventh-floor utility room Nov. 20, Franklin said. "It had dirt and chunks of concrete inside," Franklin said.

"They began to believe they didn't have anything. But five minutes later, we started to get a smell," Franklin said. Searchers uncovered the body of a waste watch, then a human wrist and bits of clothing, he said.

"At that point, everything stopped and they sealed the scene," Rice said. Sinks asked him Nov. 20 to help dispose of what Sinks said was a barrel of as- bestos. Rice agreed and said they drove in a company truck to pick up the blue plastic barrel from Sinks' garage.

"He told me he had asbestos in the barrel. It was heavy, I don't know, 70 or 80 pounds, and it took two men to handle it," Rice said.

"I was told of un- loading the barrel in the build- ing before moving it by elevator and dolly to the air- conditioning room."

"We're going to request the highest possible bond," Langer said.

Music, sweet music
Freshman Ryan Mihalko discovers the technique of making long papers seem just a little bit shorter with the aid of upbeat music. Headphones are necessary.

Orbital debris, junk littering space

**Associated Press**

WASHINGTON — Satellites and spent rockets are exploding unaccountably in orbit, littering space with dangerous chunks of shrapnel and forcing designers to add tons of shielding to protect the proposed U.S. space station and its crew.

More than 90 satellites to date "have blown up or broken up for unknown reasons," and the shards represent more than half of the 7,000 pieces of space debris being tracked by the U.S. Space Command, said Don Kessler, project scientist for debris studies at NASA's Johnson Space Center.

"These explosions have occurred everywhere, from one day after launch to three years," Kessler said in a telephone interview. He said he doubts the cause is collisions with meteoroids or the testing of secret anti-satellite weapons.

Space station planners "are faced with a considerable design problem," he said and are adding 2,000 pounds to the shielding of each of the six modules occupied by astronauts.

"The debris gets most severe at 500-600 miles," Kessler said, "but usually unmanned spacecraft are at that altitude and don't require the same level of safety as a crew." The space shuttle generally operates at altitudes of 150 to 300 miles.

"When I first started working in this area, very few people knew how their spacecraft were breaking up, including the designers," Kessler said. "The Space Command knew they were breaking up, but never took the time to identify why."

The explosions of satellites or rockets often aren't detected for a year or more after they occur, Kessler said. He said officials have long believed that French-made Ariane rockets explode in space but they are in orbits difficult to track with ground radar.

But, he said, "in 1986 they launched into an orbit that's easily detected and blew up after nine months."

---

Garvey continued from page 1

area. The lieutenant who was in charge of the operation was transferred to an area in the north of the country where the fighting is ferocious and has a very high casualty rate for officers."

Garvey noted that the villagers felt safe from the military during his Notre Dame group's visit.

"Pilar's murder, I think, is kind of an icon of what goes on all the time. We did not realize we were a sign of hope, not only because we brought a Catholic priest to baptize their children, but because we brought a level of international attention... on the people of Santa Cruz craved," he said. This year, the Notre Dame group visited Santa Cruz in order to form a sister community relationship between the village and university. But that is not what the villagers wanted.

"The people of Santa Cruz were very specific in telling us that they did not want money or things to directly come to them," said group member and senior Dan Stroub.

"They knew about a village who had a similar sister relationship, who became soft, for the struggle they were involved in. They did not want this to happen in Santa Cruz, but to give our support to the group CRIPDES, the nongovernmental human rights commission. They want us to use Santa Cruz as a window for looking at all of El Salvador. So, we will have more of a community, rather than a financial relationship with Santa Cruz," he said.

Carol Stuart, a group member and government graduate student, said she was overwhelmed that the villagers did not want all of the Notre Dame group's financial support. "If ever a place needs financial assistance, this is it," she said, adding that Santa Cruz has no electricity, sewage, or water. "They told us that there were places in El Salvador even worse off than that. They blew my mind."

The villagers will accept money to transport their sick to better medical care in Santa Cruz like they did last year. "One of the most important things is medical assistance," she said. The villagers "are forming an association which has been keinen.

"The Santa Cruz community has asked us not to ever give them a place in El Salvador. When we come back here, they get international attention," noted Stroub. "It is then less likely that the government troops are going to go in there and blow up the village or occupy Santa Cruz like they did last year. That means that possibly U.S. aid will be cut off from the country. Human rights is an alienation of U.S. aid to El Salvador."

"The Santa Cruz community was formed by refugees just over two years ago when they refused to be further displaced by the military and settled in an abandoned village, said Stuart.

**Contra judge accuses Reagan of withholding classified documents**

Associated Press

WASHINGTON - The Iran-Contra trial judge accused the Reagan administration Wednesday of intentionally holding back classified documents needed by the defense, and warned that charges would be dismissed if the stonewalling continues.

U.S. district Judge Gerhard Gesell blamed the dilemma not on independent counsel Lawrence Walsh, but on an interdepartmental task force that has control over hundreds of thousands of secret documents that may be needed in the case.

"A stone wall is being built up between this court and the trial," Gesell said at the end of a day-long pre-trial hearing.

Noting that Walsh has tried to get the documents for the defense, the judge said: "The responsibility lies with the attorney general and the White House. I want to find out promptly what is taking place and what is going to take place."

Gesell said the case has encountered a serious obstacle because of the administration’s "intentional withholding of documents necessary for the defense."

He also has said the case cannot go to trial unless the administration declassifies relevant documents that may be introduced as evidence.

White House and Justice Department officials could not be reached immediately for comment.

Gesell said, "We cannot satisfy the maximum desires of the interdepartmental committee" and added he was not interested in trying to summarize "contents of masses of documents."

Gesell has ordered Walsh to make up to 300,000 pages of classified documents available to the defendants.
Guerrillas killed on Israeli border

Associated Press

JERUSALEM - Palestinian guerrillas crossed Israel's heavily guarded border from Lebanon for the second day in a row Wednesday and wounded a truck driver before soldiers caught them in a ravine and killed them, the army said.

No Israeli army casualties were reported.

Israeli officials said the increase in cross-border raids appeared connected with nearly five months of violence in the occupied West Bank and Gaza Strip.

Newspapers on the two dead guerrillas showed they planned to take hostages and try to exchange them for Arab prisoners held in Israeli jails, using U.S. Ambassador Thomas Pickering as a negotiator, Israel radio reported.

Unidentified elements in northern Is­rael were put on alert during a three-hour search for the guer­illas by foot patrols and helicopters. Roads were closed and men were told to stand guard with guns. Women and children were ordered to stay indoors.

On Tuesday, three guerrillas crossed the border at the same spot. They and two soldiers were killed when an army patrol found them.

A 14-year-old Palestinian girl died Wednesday of wounds suf­fered the day before when Is­raeli soldiers opened fire during an Arab protest in the occupied West Bank, the army and hospital officials said.

Her death brought to at least 174 the number of Palestinians killed since a rebellion began Dec. 8 among the 1.5 million Palestinians in the West Bank and Gaza, which Israel has oc­cupied since the 1967 war. An Israeli soldier and a Jewish set­ter also have been killed.

The guerrillas crossed the border unnoticed, and it was the truck driver who alerted troops after running away from the assailants, said the source, speaking on condition of anonymity.

Two Pasquerilla West residents resort to studying indoors as Wednesday's weather did not cooperate with temperatures suitable for outdoor edification.

Reagan assures Canada U.S. is moving to stop acid rain

Associated Press

WASHINGTON - President Reagan told Canadian Prime Minister Brian Mulroney on Wednesday to "make no mis­take, we are moving" against environmental pollution, but Mulroney demanded more ac­tion to stop U.S. acid rain from "killing our lakes, polluting our cities.

A senior U.S. official told reporters Mulroney gave Reagan "some private ideas" on how they might reach agree­ment on the issue. The official, who spoke on condition of anonymity, could offer no details on those ideas.

At a welcoming ceremony on the South Lawn of the White House, Reagan told the Canadian leader, "More can be done to protect our environ­ment when science clearly points the way. Make no mis­take, we are moving."

The U.S. government con­tends that more needs to be done in developing clean coal technology before targets and timetables can be set for reduc­ing coal-fired power plant emis­sions to this country "dumping garbage" on its northern neigh­bor.

Asked about this as the two leaders posed for pho­tographers before their meeting in the Oval Office, Mulroney said, "I think it's very clear that acid rain has that effect on the envi­ronment in the eastern United States and Canada, yes. I think that's a normal fact."

Mulroney pleaded before a joint meeting of Congress for what he acknowledged would be expensive programs to clean up U.S. emissions, which he said caused half the acid rain that has killed 15,000 Canadian lakes and threatened or damaged 300,000 more.

"Half of our acid rain comes across the border, directly from the United States, falling upon our forests, killing our lakes, polluting our cities," Mul­roney told Congress.

"It is despoiling your envi­ronment as inexorably as ours," he said. "It is damaging your environment from Mich­igan to Maine, and threatens marine life on the Eastern Seabord."

He said Canadian acid rain wafting to the United States will be halved by his govern­ment's programs. "We ask nothing more than this from you.

"We invite the administra­tion, and the leadership of Congress, to conclude an ac­cord whereby we agree on a schedule and targets for reduc­ing acid rain that crosses our border," he said. "The cost of reducing acid rain is substan­tial, but the cost of inaction is greater still.

"We invite the administra­tion, and the leadership of Congress, to conclude an ac­cord whereby we agree on a schedule and targets for reduc­ing acid rain that crosses our border," he said. "The cost of reducing acid rain is substan­tial, but the cost of inaction is greater still.

Palestinians suffer undue repression

This article is written because an article, printed in the Viewpoint column on April 20 by Billy Lerman, called to my attention many grave misunderstandings on the situation in Palestine today and in the past, which I would like to address. I would like to address specifically the issues raised in Mr. Lerman’s article because they seem most representative of the general public who have had little exposure to the problems in Palestine.

Michele Burkart

The Observer

Doonesbury

 guest column

The belief that the Israelis are the cause of the Palestinian’s anguish is not a myth. It is a fact. Prior to Israeli occupation, the Palestinians suffered no discrimination on the basis of their ethnicity, nor fear of arrest for not having their ID cards with them, and no fear that they may be shot for trying to gather to demonstrate their political beliefs. For centuries the Palestinian peacefully inhabited the region of Palestine with no more than the regular problems of anarchy. Their problems and continue today for those in refugee camps and in the state of Israel. The formation of the Israeli state in 1948, problems of annihilation. Their problems peaceably inhabited the region of no fear that they may be shot for trying to have their ID cards with them, and no discrimination on the basis of their homeland under the fear of death or repression and with the hope that the world and their Arab allies would bring about the changes that are needed for their survival as a nationality.

There is no question that the Jews have a right to a homeland, but there is no reason that their right should over-shadow the Palestinians. They are deprived of many basic human rights and can be held in prison without contact with their families or with the outside world. Palestinians are not given the right to gather in a political demonstration—since December 1967 over 200 Palestinians have been killed with live ammunition while trying to exercise their basic right as residents in a so-called democracy. Is this “autonomy”? Autonomy is understood as self-determination under the overall control of a “superior” body. The Palestinians have no such rights and are not even given the rights of the Jewish residents of Israel.

Another point that was raised was that of “the Palestinians in the occupied territories are there because of their political value in tailoring world opinion against Israel.” Those brave enough to stay in Palestine under Israeli occupation did so out of a love of the land whose ancestors had cul...
Focus on new aspects of academics

TAMMY ETTEN
accent writer

Last May, the college appointed a new college fellow, Tammy Ettten, chosen from each department in the college to act as Collegiate TeachersScholars, and selected a group as Collegiate Mentors. These professors would ideally help create "more meaningful contact outside of the classroom, ...not just at preregistration," said Swartz. One way the office hopes to achieve this is by constructing two areas in O'Shaughnessy Hall as faculty-student areas. O'Shaughnessy is not as comforting as far as faculty and student interaction between classes," Swartz said. "We're going to remodel the great hall into a coffee shop for faculty and students," a job which he said should begin this summer.

Swartz also said that plans are being made to move the Office of the College Fellow which is currently on the third floor of O'Shaughnessy. Its vacant space will become a faculty-student lounge. The office will move down the hall.

The office has other areas it wants to address, such as "extending the classrooms" by offering more discussions before and after lectures, performances and office hours.

According to Swartz, this semester the office has sponsored peer-performance and post-performance discussions of "Amadeus" to help undergraduates worthy of class to identify the weakness in their work. This is part of an experiment to bring academics into the dorms. The idea could possibly be extended in a few years to bring a "sophomore year abroad at home," Swartz said, which would have both under- and upperclassman living in and attending classes in the same building.

The office is also trying to integrate the honors programs with the college at large by making honors activities open to all students. This year, the

Doug Kinsey and Sigmund Abelles Art Exhibits were examples of this integration. Although the "honors" designation has previously been given to a student after entering Notre Dame, the college will now "enrich that grade with people appointed after their freshman year," Swartz said. These appointments would be "to students who show intellectually promise," he said.

The office also offers services to professors. It recently held workshops on teaching techniques, honestly in the Notre Dame classroom, leading discussion groups, and contracting with the students through use of a syllabus.

"The office shows our commitment to the undergraduates," said Swartz. "We're spending a lot of bucks...to make that easier to happen."

Fehlner receives Fellowship

THOMAS FEHLNER
professor of chemistry

Thomas Fehlner, Notre Dame professor of chemistry was awarded a Guggenheim Fellowship for studies in thin film deposition. The Foundation grants funds to help fellows carry out a block of time free from other duties, during which to pursue their own scholarly creative work. Fehlner will conduct his research at the University of Wisconsin and will visit universities in Germany and England.

The 1988 Committee of Selection chose 262 artists, scholars, and scientists from among 3,205 applicants, totaling $6,343,000.

The committee selected because of distinguished achievements in the past and exceptional promise for future accomplishment. Fehlner will spend his sabbatical year learning more about the process of film making.

Having taught at Notre Dame since 1964, Fehlner greatly enjoys his work. "The most enjoyable aspect of my job is meeting new students, I've taught many non-chemistry majors and have had the opportunity to meet a broad cross-section of undergraduates," said Fehlner.

A large number of factors have shaped the path that has led Fehlner to study the field of inorganic chemistry. "I have been influenced by my interests, my successes, and the funding I've received," said Fehlner. He believes that a scientist's job is two-fold. First, publishing one's research is necessary to provide insight into the mysteries of life. Second, and just as important, is one's responsibility to educate the students.

"My job is to put ideas in the bank. The library is the bank people can go to when they need to find answers to problems. It is also my job to provide educated people for the future," said Fehlner.

This organic chemist believes that research is necessary for the life of his discipline. He respects the freedom he has in university research. He said, "The important aspect of university research is that one is not restrained by anything but oneself." Fundamental research is necessary to generate new ideas and developments. "To make progress and push back the frontiers of knowledge, we need the freedom to go where our noses lead us," said Fehlner.

Yet, Fehlner believes that research cannot be the end all. "We can't forget about the students or eventually chemistry will die," he said. He hopes his students will be satisfaction because they will be the scientists of tomorrow.

Delay effective for Oils

ANN SEIFERT
accelent writer

So far this year, only a few albums have really stood out for me. One of these albums is definitely Diesel & Dust by Midnight Oil. This group is Australian, and this entire album has a carefree traveling tone that just never stops. Every song seems complete, which may be a result of the fact that this is Midnight Oil's first album in three years.

A large number of factors have shaped the path that has led Fehlner to study the field of inorganic chemistry. "I have been influenced by my interests, my successes, and the funding I've received," said Fehlner. He believes that a scientist's job is two-fold. First, publishing one's research is necessary to provide insight into the mysteries of life. Second, and just as important, is one's responsibility to educate the students. "My job is to put ideas in the bank. The library is the bank people can go to when they need to find answers to problems. It is also my job to provide educated people for the future," said Fehlner.

This organic chemist believes that research is necessary for the life of his discipline. He respects the freedom he has in university research. He said, "The important aspect of university research is that one is not restrained by anything but oneself." Fundamental research is necessary to generate new ideas and developments. "To make progress and push back the frontiers of knowledge, we need the freedom to go where our noses lead us," said Fehlner.

Yet, Fehlner believes that research cannot be the end all. "We can't forget about the students or eventually chemistry will die," he said. He hopes his students will be satisfied because they will be the scientists of tomorrow.

For Midnight Oil, this album definitely has something in common with their other albums in diesel and dust. There is a sense of adventure throughout the album, from the music to the lyrics. The guitar riffs are catchy and the vocals are powerful. The album is a great listen from start to finish, and I highly recommend it to anyone who enjoys a good rock album.

**Ryan just misses no-hitter**

Associated Press

**HOUSTON** - Houston's 41-year-old Nolan Ryan came between two outs of what would have been the sixth no-hitter of his record-breaking career Wednesday night, then settled for a no-decision as the Astros beat the Philadelphia's Phillies 3-2 on Craig Reynolds' bases-loaded grounder in the 10th.

Ryan lost his no-hitter bid when Mike Schmidt singled with one out in the ninth and blew his chance for a perfect game when Lance Parrish doubled home two unearned runs with two out.

In the Houston 10th, Glenn Davis singled with one out off reliever Kent Tekulve, 0-2, and went to third on Kevin Bass hit and run single. Alan Ashby was intentionally walked to load the bases and Reynolds batted for Chuck Jackson.

**Ryan continued from page 16**

Ryan just missed his first shutout in four years as the Montreal Expos beat the Cin cinatti Reds 1-0 Wednesday night.

Peres, 3-2, struck out six and walked one. Mario Soto, 1-1, gave up six hits in seven innings, struck out five and walked two.

The Expos scored in the third inning when Tim Raines led off with a triple and, after Mitch Webster walked, Hubie Brooks singled up the middle.

Mets 5, Braves 2

**ATLANTA** - Keith Hernan dez tied the game with a two-run home run, Lenny Dykstra walked with the bases loaded and Mookie Wilson added a two-run single in a five-run ninth inning that rallied the New York Mets over the At lanta Braves 5-3.

Ryan led 2-0 into the ninth when Tim Raines led off with a triple and, after Mitch Webster walked, Hubie Brooks singled up the middle.

Mets 5, Braves 2

**ATLANTA** - Keith Hernan dez tied the game with a two-run home run, Lenny Dykstra walked with the bases loaded and Mookie Wilson added a two-run single in a five-run ninth inning that rallied the New York Mets over the Atlanta Braves 5-3 Wednesday night.

The Braves led 2-0 as Zane Smith scattered four hits over seven innings, but Sutter pitched a hitless eighth.

But Sutter left for a pinch hitter after an out and, after a wild pitch, Saladino hit into a double play.

The victory went to David Cone, 3-0, with one perfect inning of relief. Roger McDowell got the first save, allowing one hic, in the ninth.

**Cardinals 2, Padres 1**

**SAN DIEGO** - Tom Brunansky's first career National League home run and seven saves of the season by Ray Sosa, the scoring single for the St. Louis Cardinals beat San Diego 2-1 Wednesday night, and wrapped the Padres' four-game winning streak.

Brunansky hit a solo homer off Dave Dravecky in the fifth and drove in a run with his second single.

**The Detroit Red Wings** beat the St. Louis Blues 4-3 Wednesday night to earn a spot in the Campbell Conference finals for the second straight year.

Associated Press

**Detroit** - It felt great to help the team win," Kennedy said.

"Everybody played real well and it was a great victory."
Minnesota releases Carlton

Associated Press

MINNEAPOLIS - Steve Carlton, the winningest active pitcher in the major leagues entering this season, was released Wednesday by the Minnesota Twins.

Carlton, 43, the only pitcher in baseball history to win four Cy Young Awards, was 9-1 this year with an earned run average of 16.76. He has a career record of 339-244.

In 9-2-3 innings this season, the left-hander allowed 36 hits, 18 earned runs and five home runs.

Carlton is among baseball's all-time leaders in victories, strikeouts (4,136), games (254), starts (709) and innings pitched (22). With 379 career wins, he is one of the stars of the game.

During the second half of his 23-year major-league career, "Lefty" of his release Wednesday with the St. Louis Cardinals in 1965 and was up for good by 1966. A 1972 trade that sent him to the Philadelphia Phillies for Rick Wise proved to be one of the more lopsided deals ever.

Carlton broke into the majors with the St. Louis Cardinals in 1965 and was up for good by 1966. A 1972 trade that sent Carlton to the Philadelphia Phillies for Rick Wise proved to be one of the more lopsided deals ever.

Carlton went on to win his four Cy Youngs with the Phillies and helped Philadelphia to five National League East titles, two NL pennants and one championship.

"Dick is the best all-around captain that I have ever had in my 16 years of coaching at Notre Dame," commented O'Sullivan. "He is one of the few who didn't just take from the program. He gave as well, and is leaving so much behind."

Such a quality is indeed rare in a sport like golf in which so much emphasis is placed on individual performances.

However, Connelly has proven his true worth both on the golf course and combined as well in the classroom. He currently holds a 3.1 GPA as an accounting major, with his 77 stroke average.

Carlton to the Philadelphia Phillies for Rick Wise proved to be one of the more lopsided deals ever.

However, Connelly has proven his true worth both on the golf course and combined as well in the classroom. He currently holds a 3.1 GPA as an accounting major, with his 77 stroke average.

Carlton's release came a week after the Twins cut 37-year-old left-hander Tippy Martinez. The Twins' pitching staff, ranked last in the American League, still includes 45-year-old Joe Niekro, 37-year-old Bert Blyleven and reliever project Charlie Lea.

MacPhail said he didn't know of any other teams interested in Carlton.

Carlton holds numerous career records, including:

Most consecutive starting assignments (344);
Most strikeouts in a game by a left-handed pitcher (19) and by a losing pitcher (19);
Most balks in a season (11), a record sure to fall in this balk-filled campaign;
Most years and consecutive NL seasons with 100 or more strikeouts (18);
Most NL strikeouts (4,990);
Most NL walks issued (1,717).

Carlton is among baseball's all-time leaders in victories, strikeouts (4,136), games (254), starts (709) and innings pitched (22). With 379 career wins, he is one of the stars of the game.

The Saint Mary's varsity athletes were honored last night at the annual sports banquet.

Athlete of the Year went to senior basketball star Tammy Radke whose jersey was retired at the end of the season in Saint Mary's history for this to happen. Radke was also named Most Valuable Player and received the President's Award.

Coach of the Year was Debra Laverie who coaches the tennis team. The team is heading to the Nationals in May and have a 24-4 record.

Patty Battfield received Most Valuable Player for the soccer team. Senior Hallfield and sophomore Mollie Meehan also were chosen Indiana Choice College Athlete for their play this season.

In volleyball, Margaret Feddeman was selected Most Valuable Player. Kim Recessi received the Coaches Award and Mary Macienarm was the Most Improved Athlete.

Softball pitcher Michelle Pinter was chosen Most Valuable Player. Laura Sokolowski captured Coaches Award with her versatile skills. Recessi also received most Improved Athlete in softball.

Jennifer Veselik was the swimmers most valuable player. Jeannette O'Neil received the same honors on the track team.

Women's tennis tops WMU

By FRANK PASTOR Sports Writer

The Notre Dame women's tennis team closed out its season with a 6-3 victory over Western Michigan Wednesday in a match marked by three defaults.

The Irish finished at 12-14 for the spring and compiled a 14-14 record throughout the 1987-88 season. This year's schedule featured the most competitive opposition Notre Dame has faced to date.

"We didn't reach our .500 goal, but numbers don't mean everything," said Irish coach Michele Gelfman. "In terms of the development of the team, I think the girls held up under the upgraded schedule."

Western Michigan (11-12) who had defeated Notre Dame 6-3 in last season's meeting between the two teams and holds a 7-4-1 series edge, defaulted matches at number-four and number-six singles, and number-three and number-four doubles.

"We were up 2-0 before the match even began," said Gelfman, "because Western Michigan relinquished the number-four and number-six singles matches due to injuries."

Freshman Oce Cahill, currently ranked 3rd among Division I players in the Volvo/TCCA rankings and third in the Midwest region, defeated Sonya Garshnek 6-1, 6-0 at number-one singles to extend her record to 38-10. She easily eclipsed the Notre Dame single-season record for most victories in a season, previously held by Susie Panama at 34.

At number-two singles, Michele Dasso fell to Kathleen Meyer 4-6, 2-6. Alice Lobner outscored Stephanie Schulte 6-2, 6-4 at number-three. Fourth-seeded Kim Pacella won by default over Jennifer Reaull until trailing in the match 6-7, 9-7. Natalie Big beat Kathy Spray 6-2, 6-1 at number-five, and Cathy Bradshaw was awarded a victory at number-six in another defaulted match.

With the match already in hand, Gelfman decided to give her girls some home playing time in doubles. Jacqueline Uhl and Anne Marie Degea teamed up at number-one where they were defeated by Garshnek and Mandi's, 6-1, 6-0. Maura Weidner and Patricia O'Brien filled in at number-two, dropping their match 3-6, 6-4, 7-5. Schulte and Keworthy were 3-6, 2-6 at number-three doubles, but Messier and Bradshaw won by a 6-0, 6-2 default. Gelfman hopes that this match will catapult Notre Dame to continued success next year when the Irish join the Midwestern Collegiate Conference.

"Moving into next year, we know what we need to do to get the rankings as a team," says Gelfman.

Streak stands at 20 as O's fall to Twins

Associated Press

MINNEAPOLIS - The winless Baltimore Orioles tied an American League record with their 30th straight loss Wednesday night, falling to the Minnesota Twins 7-6 when their two-run rally in the ninth inning ended as Fred Lynn grounded out.

Baltimore players stood in stunned silence in the eighth inning when Kent Hrbek and Tim Laudner broke a 4-4 tie with leadoff homers in the eighth against reliever Bill Scherrer, 0-1. A walk, balk and throwing error by pitcher Doug Sisk added another run, along with insult.

Royals 3, Yankees 1

NEW YORK - Kevin Seitzer singled home Kurt Stillwell with the tie-breaking run in the 11th inning Wednesday night as Kansas City beat New York 3-1 for the Royals' first victory in Yankee Stadium since 1986. Stillwell led off the 11th with a walk, moved to second on Willie Wilson's sacrifice, and scored on Seitzer's single to center.

Angels 4, Tigers 3

DETROIT - Jack Howell drove in two runs and Willie Fraser survived seven walks as the California Angels beat the Detroit Tigers 4-3 Wednesday night.

Howell tripled to score a run in the second inning and doubled to drive in another in the sixth as the Angels snapped a four-game losing streak.

Detroit starter Doyle Alexander, 2-2, allowed nine hits while walking one and striking out six.

Brewers 4, Rangers 3

ARLINGTON - Juan Nieves allowed seven hits in 7 1-3 innings and Dale Sveum had a two-run homer as the Milwaukee Brewers beat the Texas Rangers 4-3 Wednesday night.

Nieves, 2-2, had first-inning control problems, walking three, but allowed only one run. Dan Plesac pitched the last two innings for his third save.

Athletics 5, Blue Jays 3

TORONTO - Don Baylor's run-scoring single snapped a sixth-inning tie and Dave Henderson homered as the Oakland Athletics defeated the Toronto Blue Jays 5-3 Wednesday night.

With the score 3-3, Henderson doubled down the right-field line with two outs against starter Mike Flanagan, 2-1, and Baylor singled to left to put the Athletics ahead.

Curt Young, 1-6, allowed six hits in six innings. Gene Nelson pitched 1 1-3, Eric Plunk one inning, and Rick Honeycutt got the last two outs for his second save.

Billy Ripken tosses dirt in disgust, a common sight for the Orioles who are now 0-20.

WHAT'S A DEGREE GOOD FOR?

( ) PRE-APPROVED CREDIT FROM FORD CREDIT

( ) $400 CASH BONUS FROM FORD

( ) ALL OF THE ABOVE AT

Your Ford Force Dealer

At Your Ford Force Dealer your degree is worth a lot. If you've graduated, or will graduate, with a Bachelor's or advanced degree between October 1, 1987 and January 31, 1989, you may qualify for $400 from Ford and pre-approved credit from Ford Motor Credit Company. To qualify for pre-approved credit, you need: (1) verifiable employment beginning within 120 days after your vehicle purchase; (2) a salary sufficient to cover normal living expenses plus a car payment; and (3) if you have a credit record, it must indicate payment made as agreed.

The $400 from Ford is yours whether you finance or not. Keep it or apply it to the purchase or lease of an eligible Ford or Mercury vehicle. For all the details, contact us or call Program Headquarters, toll free, at 1-800-321-1536. But hurry. This limited time offer is only available between March 1 and December 31, 1988. Take advantage of the Ford/Mercury College Graduate Purchase Program now.

ND track sends eight NCAAhopefuls to Penn Invite

By PETE GEGEN
Sports Writer

Led by NCAA qualifier Dan Garrett, eight members of the Notre Dame track team visit Philadelphia tonight to compete in the Penn Invitational. This group has already qualified for the NCAA Outdoor Championship in June in the 1000 meter run, winning that race at Stanford with a school-record time of 2:33.52. At Penn, Garrett has his sights on more than just improving his time.

"He has a shot at qualifying for the Olympic trials," said Irish head coach John Olstead, explaining the strategy for the Penn Invitational. "We'll also be trying to qualify some other runners for the NCAA's."

Heading the list for possible NCAA qualifiers are sophomores Mike O'Connor in the 5000 and junior Ron Markoe in the 10,000-meter run. Both have already qualified for the IC4A's, as have the other five team members competing in the 10,000-meter run. including senior Tom Mick in the hammer throw, freshman Ryan Mihalko in the javelin, sophomore Glenn Watson in the 110-meter high hurdles, and freshmen John Cole and Jeff Smith in the high and long jumps, respectively. Smith needs to advance centimeters to his longest jump to qualify for the NCAA's.

A total of 6000 athletes will be participating in this three-day meet.

Though originally scheduled to participate in the Drake relays at Des Moines, Iowa, the Irish switched to the Penn meet for recruiting and visibility purposes.

"This is the first time in several decades we've gone to Penn," said Piane. "Traditionally we've gone to Drake because the IC4A's are on the East Coast. But this year we added the meet at the Naval Academy and this one to give us more exposure on the East Coast."

Traditionally Piane has recruited most of his distance runners from the East Coast, including Garrett, O'Connor and Markoe (all from New York state).

The rest of the Irish track squad will travel to Muncie Saturday for the Ball State Invitational.

Following a week off for exams, the team will try to qualify more members for the IC4A's at the Illinois Twilight Invitational. Piane said that those who have already qualified will compete in different events. Garrett and the other seniors will not make the trip because of graduation.

The team returns to Philadelphia May 15 for the IC4A's. In addition to the eight members participating at the Penn meet, the following athletes have qualified for the IC4A's: Yan Searcy and Rich Culp in the 100, Robert Harris in the 200, David Varth in the 400, Mike Ragan in the 1000, Rick Muller in the steeplechase, Chris Compen in the hurdles, and Tim Smith in the discus and the 1600-meter relay team.

Lacrosse team tops Spartans behind McQuillan's 22 saves

By PETE LAFLUEUR
Sports Writer

Senior goalie Matt McQuillan had 22 saves as the Notre Dame lacrosse team beat Michigan State 10-7 at Loftus Sports Center Wednesday.

The Irish avenged losses to the Spartans the past two seasons and moved their record to 11-3. In addition, they took a step closer to the Great Lakes Lacrosse Association title, which will be decided Saturday when the Irish host Ohio State.

According to senior tri-captain John McNicholas, the victory over Michigan State is particularly satisfying for the departing seniors.

"This is obviously one of the best wins of my career here, especially since they beat us the last two years," McNicholas said. "It hasn't been very often that we've had to prove ourselves in an underdog position, but it feels great to be on a team that rises to the occasion in a key game."

Irish head coach Rich O'Leary said the game was primarily won on emotion.

"The team today was the most emotional I've seen them in a long time," said O'Leary, "and an assist."

Although the Irish offense continually pressured the Spartan defense, the Irish defense was also strong.

"The guys never stopped hustling and they didn't look back the whole game," McNicholas said. "It's not so much about winning a game and the defense totally died."

McQuillan led the relentless Irish attack with three goals and three assists. Sophomore attack Brian McHugh had a goal and three assists while McNicholas added three goals and an assist.

The Irish offense was completely pressured the Spartan defense, with McQuillan said the offensive attack was made possible because of the Irish defense.

"You usually hear about an offense putting pressure on defense, but our defense really took it to their offense and won the game," McNicholas said. "It was a dominating goal and the defense totally died."

The lacrosse team defeated Michigan State 10-7 Wednesday. Pete LaFlure has the details at left.
