VIEWPOINT: Welcome to the freshmen

The Class of 1992 comes to campus

1,830 enter ND from largest pool of applicants yet

By SARAH VOGT
Staff Reporter

Superlatives abound for the Notre Dame class of 1992, which will have the most minority students, and will be the most selective of any class in the history of the University.

This year the pool of 9,635 applicants for 1,830 spots was the University's biggest ever. The number of applicants has increased twenty percent over last year's record breaking high, said Kevin Rooney, director of undergraduate admissions.

Associate Director of Admissions Pat Leonardo offered some explanations for the increased applicant pool. "The transfer of authority between Hesburgh and Malloy has attracted a lot of national exposure," Leonardo said.

Another reason may be the improved academic reputation that Notre Dame has earned recently. Leonardo also speculates that the admission office's more aggressive recruiting tactics have helped increase the number of applicants.

"Also, the national press surrounding the Heisman trophy winner and Notre Dame's improved sports facilities have not hurt admissions," Leonardo said.

One recent trend is an increased percentage of minority applicants. The class of 1992 has the highest percentage of minority students ever at 13 percent. This year 25 or 30 more children of alumni were admitted than last year, pushing the "alumni kid" total percentage over last year's 25 percent, according to Rooney.

Rooney said that the applicant pool has stayed steady the last few years at 64 percent men and 36 percent women. After two more freshman classes, this ratio the population of women on campus will have changed from 27 to 36 percent of the entire student population. This year's freshman class consists of 865 women and 1145 men.

Saint Mary's welcomes 500 new women

By MIMI TUOHY
Assistant Saint Mary's Editor

Four years of hard work, determination, and enjoyment began Thursday as the Saint Mary's class of 1992 arrived on campus for the first time.

These 500 young women represent 34 states and four foreign countries, including Bolivia, Ireland, Vietnam and the Philippines, according to Mary Pat Nolan, associate director of admissions.

"This year's incoming class is very talented. Most were very involved in community activities while in high school and are eager to get involved here at Saint Mary's. We have definitely chosen a group of qualified young women," said Nolan.

This feeling is exemplified by the fact that almost ten percent of the freshmen have been named as Presidential Scholars, an honor granted to a certain number of superb high school seniors across the country.

"Saint Mary's College has a lot going for it. The incoming students are aware of the quality of the programs that exist, and the heritage and tradition of the college. They all want to be a part of the community and we are glad that they are here," Nolan said.

In order to welcome them appropriately, the Orientation '88 Committee, the faculty, staff and administration have organized academic, social and religious events focusing on the concerns of the new students.

The social event this evening, the Beach Party at 6 p.m. on the Library Green, will allow the students families to get acquainted before the academic year is officially opened Sunday at a liturgical service at 9:30 a.m. in Angela Athletic Facility.

Orientation Chairperson Sue Suchy believes that this weekend has a great impact on the general attitude of the incoming freshman class. "This is a

Don't get used to it

A nice day is in store, with partly sunny skies and high of 60 degrees today and tomorrow. Lows in the low 60s tonight.

&
The Challenger is ready, say elated engineers more than 2 1/2 years after a flawed booster rocket joint doomed the Challenger, the redesigned part is "the safest thing on the space shuttle" and elated engineers say the craft is ready to launch. Meanwhile, technicians at Cape Canaveral, Fla., bolted a clamp over a gas leak on the Discovery and applied a sealing compound today as they worked to clear one of the last remaining hurdles to liftoff.

Nasa spokeswoman Pat Phillips said the compound would have to set for several hours, then workers would run pressure checks to recheck to determine how well the seal worked. -Associated Press

Jack the Ripper still cannot be identified from lost-long photographs and documents recovered by police. Never­theless, thousands of documents released Thursday helped fill in historical gaps and included a chilling letter, written in neat script and red ink, said to be from the Ripper, according to police. The yellowed Ripper letter taunts the police for failing to catch him. "I keep hearing the police say the seal worked. I think we killed the Ripper," it read. Dellow said part of the evidence, a set of photographs of the Ripper's victims, was taken to police last year by the family of a deceased policeman. It was not known how they came into his pos­session, he said. -Associated Press

Marching Band Registration is taking place TODAY at Washington Hall. All interested students should stop by as soon as possible. Daily rehearsals are scheduled in preparation for final auditions on Wednesday, Aug. 24.

The Observer Of Interest: Some down-to-earth tips for starry-eyed freshmen

Here you are, a starry-eyed (teary-eyed, per­haps) freshman, full of visions of the Golden Dome and of the Grotto at night and the an­ticipation of our first football game. And after the parents leave and you spend that first night without much to do except miss home and hometown honeys and food cooked by Mom or Dad instead of anonymous dining hall cooks, you'll get depressed. Don't worry, it goes away. Just to tide you over the "freshman hump," here's some practical advice:

Major decision: But it's not really a major decision, since you can switch colleges until your junior year and can switch majors until the seventh day of your senior year. Just re­member that Engineering has the largest num­ber of freshmen and the smallest number of seniors. At least, that's what some senior told me my freshman year.

Miami: Jimmy Johnson is Satan incarnate. Miami players wear their IQ's on their jerseys. Find an upperclassman who went to see in live last year 24-0 or three years ago 58-7 to tell you about Miami fans - we can't print words like that here. This is the same team that said on national television last year that they couldn't wait for October 15th to roll around. This is the year. Have faith.

Chinese food: You have yet to find a decent Chinese food joint in South Bend. If you do, please let me know.

Michaels:® Screw Your Roommate dances, which you probably read about in the admissions booklets. What they didn't tell you is that the administration is phasing these out with a requirement of 70 percent attendance twice a week before the event. Then they will tell us next year that it is our own fault that there is no social life on campus. Two morals to this story: 1) Go to SYR while you still can, and 2) find some other way to meet members of the opposite sex.

Parents: Don't rejoice. You haven't gotten rid of them. You have instead traded them in on a new set, living in the Golden Dome and the student center. Your new parents are aut­horitarian parents, which psychologists will tell you are the ones that kind of us. Off campus is not an option as a freshman, so deal with par­ents as best you can. I would recommend the

Construction work should settle down

By MARK MC LAUGHLIN
News Editor

The sounds of saws and jackhammers should be dying down this fall as several construction projects on the Notre Dame campus are completed.

The construction is "largely the result of the fund drive. A lot of the money raised has been put into much needed buildings on campus," said Dedrick. The Strategic Movement campaign has attempted to raise $300 million, much of which has been earmarked for buildings.

Removal of the scaffolding on the Golden Dome of the Administration Building will start next week, said Dedrick. "They’re finished with the gilding pretty much except for the bottom three feet of the dome," he added.

The upper levels of the scaffolding will be removed while the gilding is finished.

The North Dining Hall construction, which started last fall, will be finished by early October. Dining capacity will be increased to over 1700 total, an improvement from last year’s capacity of 1500, Dedrick said.

For dining hall details, see page 5

Siegfried Hall and Knott Hall

Sneak preview

Year-end campaign has attempted to raise $300 million, much of which has been earmarked for buildings.

An earth retention system around the new addition is new in place. "Earth retainers are tricky," said Dedrick. "They have to be placed just so, or the existing building will settle or crack." Cracks appeared last year after similar additions to the LaFortune Student Center, but these were the result of shrinkage and not settling, said Dedrick.

Foundations for the addition will be in place before this winter, and the building will be completed by next September, Dedrick added.

Dedrick said the use of the addition for 1989 fall classes was a "touch and go" proposition.

The Crypt underneath Sacred Heart Church has been reopened after extensive renovations. "It’s worth a trip for the parents to go see it," said Dedrick. "It’s really beautiful!"

Air conditioning has also been installed in Sacred Heart Church.

"I’ve been here ten years and the rate of construction’s been pretty steady, but it’s been higher lately," said Dedrick.

No freshmen in study lounges

By MARK MC LAUGHLIN
News Editor

No freshmen will be forced into temporary housing this year, as has been the case in past years, said Director of Student Residences Evelyn Reinebold.

"It’s a very good feeling" to have all the freshmen housed, said Reinebold. This is the first year in 17 years that no freshmen have been forced to live in temporary converted study halls while awaiting dormitory rooms.

"One of the factors is that we didn’t close Holy Cross Hall," said Reinebold. Holy Cross Hall, a men’s dormitory housing 222 students, was slated to be closed last year, but the University decided to keep it open, according to Reinebold.

Good estimates of the number of incoming students also helped the housing situation. "Admissions kept their numbers relatively stable," said Reinebold. Another factor was the class size, which increased only slightly from last year.

In past years, some freshmen have been housed in study lounges for the entire first semester.
Frosh
continued from page 1

Last year's conversion of Howard Hall into a women's dorm and the newly opened Siegfried Hall and Knott Hall will help to accommodate these extra women.

One characteristic of this freshman class is its geographic diversity. Students come from every state and many foreign countries. The top five states represented continue to be Illinois, Ohio, Pennsylvania, New York, and Indiana.

Although the official statistics cannot be completed until after registration, Rooney said that the average SAT score for the class of 1992 is in the low 1300's. The average freshman was in the top 5 percent of his high school class.

"The hardest part of my job is to have to say no to so many qualified students," said Rooney.

Dining renovations on track

By MARK MCLAUGHLIN
News Editor

The renovations and additions to North Dining Hall will be completed on schedule, according to Donald Dedrick, director of the physical plant. Most of the dining hall will be open for its first meal Sunday night for dinner, said Director of Food Services William Hickey. The remainder of the facilities will be opened in mid-October.

“We had two main areas of improvement: the decor and the serveuries,” said Hickey. “Everything is so different it will blow the socks off people,” he added.

“The serveuries have been gutted,” said Hickey. “The lines have been changed to a total scramble system, with different lines for hot food, deli, food, desserts, and cereals. We have totally new tile and new equipment.”

“It’s a completely different operation than it was before,” Hickey added.

In the dining area, a two-level dining area, new skylights, and completely new furniture have been added, said Dedrick. “One of our goals was to improve the dining ambiance.” Dedrick said. “It should be overall a more pleasant dining experience.”

Dining hall capacity has been increased by 500, said Hickey.

New in North Dining Hall are the Blue Room and the Gold Room. These rooms are student dining rooms at the north and south ends of the dining hall, said Hickey. They will be part of the regular dining area, but they also can be reserved by student groups and organizations during off rush hours, he added.

The ‘A’, ‘B’, ‘C’, ‘D’, and ‘E’ lines will be open Sunday, as well as the Blue Room. The southernmost ‘F’ line, the Gold Room, and the south entrance to the dining hall will be closed until October, said Hickey.

The closed section represents about 300 seats, said Dedrick.

Hickey said the closed area should not be a problem. “We can deal with any type of problem like that,” said Hickey. “I don’t think we’ll have to extend hours unless there are problems feeding people.”

But Hickey said there probably won’t be any problems with the new facility. “I think North Dining Hall will speak for itself,” said Hickey.

“People will be really surprised.”

SMC welcomes 43 transfers

By MIMI TUOHY
Assistant Saint Mary’s Editor

The incoming Freshmen aren’t the only people being honored at Saint Mary’s College this weekend. Forty-three transfer students are also being welcomed at various events planned throughout the weekend.

An informal luncheon welcoming transfer and day students was held yesterday in Stapleton Lounge to allow students to meet with administrators and staff.

“The Transfer/Day Student Luncheon and the transfer academic briefing allow these students to meet each other and discuss concerns of theirs which may be quite different from those of the freshmen,” said Mary Ellen Smith, director of student activities.

President William Hickey addressed the transfer students in a short speech.

“Although you don’t have as much time here as the freshmen, I encourage you to get involved and become acquainted with the resources available at Saint Mary’s,” he said.

Transfer Chairperson Donna Ryan told the new students of her own experiences. “I remember meeting the other transfers and feeling welcome at orientation even though I wasn’t a freshman. I hope that this year’s transfers feel the same way.”

Meg Ryan (no relation), a junior transfer from Spring Hill College in Spring Hill, Ala., said she feels welcome.

“Everyone has been so nice this weekend that I feel like I know them already.”

Your parents, or yourself.

Try win a Sony Discman.

to look at a Macintosh today, here’s another:

Right now, you have three chances to win one of Sony’s Discman™ CD players—including the exciting Sony Pocket Discman, which also plays the new 3-inch CDs. And even if you miss out on the CD player, you may still win one of 15 Apple T-shirts. No strings attached—just fill out a registration form at the location listed below.

So come in and get your hands on a Macintosh.

If not for yourself, do it for your folks.

The power to be your best.

Enter: August 22nd-September 9th

By JANET HEROLD
News Staff

The newest dorms on campus are finally open, after more
than a year of construction. Knott and Siegfried Halls are
set this weekend to welcome their first residents.

Knott and Siegfried may look like their neighbors, but they
are "not a mirror image of the Pasquerillas. The chapels rep­
resent major structural changes, there's more common
space, more cubic space," said Knott Rector Janice Poorman.

"Everybody is very pleased with both of the new dorms and
are very glad to be here," said Poorman. Many of the dorms
residents are transfer students of all types who have been
given on-campus housing since there will be no women in study
lounges this year, Poorman said.

Both new halls each have a capacity for 238 residents, the
same as Pasquerilla West, according to the Office of Student
Advisory Council last year, Stamile was also a mem­
ber of a team that represented Notre Dame at a national con­
ference on honor codes at Princeton University, she said.

"People in our class (of 1991) were needed to learn about the
honor code, to get student rep­
resentation," Stamile said. "(The Honor Code committee)
has been run by faculty. That's not what the Honor Code is
about," she said.

Stamile's role as chair will be to work with the committee in
designing an Honor Code sys­
tem that will serve the situation
at Notre Dame, Williams said.

Stamile said she accepted the
appointment because "it's im­
portant to find something that
will not theoretically work, but
will realistically work, for Notre
Dame."

"In theory, I like the Honor Code; I agree with its prin­
ciples," Stamile said. "But lots
of students don't agree with it,
and I can empathize with them.
I'm a student here, too, and I
feel much like them.""People are confused about the Honor Code," she said.

"There's a need for a lot of edu­
cation." The Honor Code began its
four year trial period in Janu­
airey of 1988. Stamile said she
feels that, without enough edu­
cation about the Honor Code,
the response to it has not been
completely positive.

The response hasn't been
totally negative, but if people
don't understand (the Honor
Code) they can't support it," she said. "And negative
responses are usually alot louder than positive responses." Stamile said she believes an
education under the Honor Code system is very different
from one under the past aca­
demic system. "It's something
that can be carried on to later
life," she said. "It offers a moral
education as well (as an academic one)."

It is too early to tell whether
the Honor Code at Notre Dame
is here to stay, according to
Stamile. "If students believe in
the Honor Code, it's wonder­
ful," she said. "If they don't
believe in it then there is no
need for it."

Sophomore to chair Honor Code Committee

By KENDRA MORKILL
Assistant News Editor

While serving on the Fresh­
man Advisory Council last
year, Stamile was also a mem­
ber of a team that represented Notre Dame at a national con­
ference on honor codes at
Princeton University, she said.

"People in our class (of 1991) were needed to learn about the
honor code, to get student rep­
resentation," Stamile said. "(The Honor Code committee)
has been run by faculty. That's not what the Honor Code is
about," she said.

Williams contacted Stamile
during the summer, asking her
if she would accept the role of
chair, she said.

Stamile's appointment
marks a very important recog­
nition of the maturity and abilities of our students," Wil­
liams said in his letter.

"People are confused about
the honor code, to get student rep­
resentation," Stamile said. "(The Honor Code committee)
has been run by faculty. That's not what the Honor Code is
about," she said.

Stamile's role as chair will be to work with the committee in
designing an Honor Code sys­
tem that will serve the situation
at Notre Dame, Williams said.

Stamile said she accepted the
appointment because "it's im­
portant to find something that
will not theoretically work, but
will realistically work, for Notre
Dame."

"In theory, I like the Honor Code; I agree with its prin­
ciples," Stamile said. "But lots
of students don't agree with it,
and I can empathize with them.
I'm a student here, too, and I
feel much like them."
Back to school is one stop at County Market. Whether you're packing up and heading to one of our neighborhood colleges like Notre Dame, IU, Bethel, Southwestern Michigan, Lake Michigan Catholic or going to High School, you'll need plenty of supplies. We take care of our hometown students by keeping well-stocked with paper, pencils, plenty of snacks and quick-fix lunches with savings that deserve an "A+".
News Editor

>>SSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSSS;

ning is over. Notre Dame's newest freshmen have arrived and the Orientation Committee is pulling out all the stops to welcome them.

A variety of social events, including a quad party and a "Graffiti Dance" on the Stepan basketball courts, have been scheduled. Events have also been planned by all 26 dorms.

Anne Freitag and Amy Rochon, Orientation Committee co-chairmen, are both looking forward to this weekend's events. "I'm really excited about it," Rochon said. "We started working on it six months ago. All summer we couldn't wait for it to get here."

About 1,750 students campus-wide are involved with the Orientation Committee this weekend, Freitag said. Students will be posted at the gates and in the halls to greet and assist the incoming freshmen. Whatever the weather, it won't rain on their parade. "We have alternate locations. If it rains, at least we're covered. At least it won't be too hot," Freitag said.

This year, the committee established a new Hospitality Room in LaFortune Student Center to provide freshmen and their families with information and refreshments.

Open today from 9 a.m. to 5 p.m. and Sunday from 2 to 5 p.m., the Hospitality Room offers campus information and cookies and lemonade.

"A lot of transfer students have been coming through too. It's really for any new students," Rochon said.

Various events designed to help acquaint freshmen with campus and each other will be held throughout the weekend.

On Sunday night at 9 p.m., Talent Unlimited, a private entertainment group, will present a variety show on the stepon basketball courts with the help of attending freshmen.

From then until 1 a.m., the Class of '92 will have something to really write home about — a "Graffiti Dance." Music will be provided by "The Left."

"I think it's going to be a lot of fun. The culmination of six months of work is right here. Everybody is all psyched up and gang b o ," she said. "That's what makes it all worthwhile, seeing them have a good time."

Even after this weekend, Freitag and Rochon will continue to assist freshmen. Working with Dean Emil Hofman in Freshman Year of Studies, they will be responsible for social programming during this semester.

"We just had so much fun during our freshman orientation that we wanted to share in it this year," Freitag said.

"I think it's going to be a lot of fun. The culmination of six months of work is right here. Everybody is all psyched up and gang b o ," she said. "That's what makes it all worthwhile, seeing them have a good time."

Assistant Saint Mary's Editor

Saint Mary's student government boards have set goals for the coming year, stressing unity as a primary goal for the entire student body. Student government at Saint Mary's is guided by Student Body President Julie Parrish, who also heads the Board of Governance. Lisa Hill, vice presidents, committee chairmen and Student Activities Board, will continue to work on programming with emphasis that we wanted to share in it this year," Freitag said.

"I'm really excited about it," Rochon said. "We started working on it six months ago. All summer we couldn't wait for it to get here."

"They're going to be good events," Freitag said. "It's really for any new students."

"I think it's going to be a lot of fun. The culmination of six months of work is right here. Everybody is all psyched up and gang b o ," she said. "That's what makes it all worthwhile, seeing them have a good time."

The Student Activities Board will plan college activities, movie series, co-sponsor events with other groups on campus and will coordinate larger events on campus, such as the Beer Gardens in October and a proposed Casino Night in February. "Having worked with previous student governments, I think I can say this will be a good year. Julie Parrish has good experience and will provide productive leadership for the group," said Student Activities Director Mary Ellen Smith.

"Student Activities Board has great ideas with emphasis placed on programming with diversity," Smith said. "Watching orientation, the group looks very dedicated and ambitious. I think they will be exciting to watch," heads the Programming Board.

Christy Wolfe, vice president for academic affairs and college relations, directs the Student Academic Council. Julie Wagner and Shannon McGowan are responsible for the Student Activities Board.

"I've very happy with our orientation," she said Parrish. "Everyone on the boards has good ideas, strong points and initiative. I'm impressed with the unity the group has and with the enthusiasm. As in years past, we see 'approachability' as a significant problem," she said.

"Students rarely seek out the student government representatives to air a problem or con­flict," Parrish said. "We want all the members of student government to be visible and to ob­tain the input of the student body. To only have the opinions of the student government members is to ignore the needs and opinions of the whole student body."

Microcomputer Lab Consultants

User Services in the Office of University Computing is seeking applicants for positions as assistant consultants in its campus microcomputer labs. All students with microcomputer hardware and software experience (especially IBM, Zenith, other PC compatible and Apple Macintosh) are encouraged to apply. Interested persons should fill out an application form in the Office of University Computing Library (room 3 of the Computing Center/Maltz Building) between the hours of 8:00-12:00 and 1:00-5:00 Monday through Friday. Interviews will be conducted beginning 8/26 so please respond as soon as possible.

How best to create the ND experience

Tomorrow most of you freshmen will walk on campus for the first time, after a tearful embrace, say good-bye. The initial shock of the separation will numb you for some time, but soon the realization that you are alone will slap you in the face. Alone? Not really, but your mind will insist otherwise. Your roommate(s), sectionmates, classmates, the J.A.C.C., and the Student Center will stand a bit distant, acquaintances just beginning to cross into the realm of friendship. What now?

Matt Slaughter
and another thing

Don’t worry. Your fears will all soon dissipate as the flurry of activities which met you this orientation weekend continues unabated; you won’t have time to worry. Time will quicken its pace. In no time at all you’ll be standing on the floor of the J.A.C.C. not to be dismissed with a diploma.

Before you rush headlong into your four years here under the Dome I’d like to offer you, at the risk of sounding trite, a singular piece of advice. Actually the thought is not mine, nor is it particularly striking. Nonetheless it merits repeating as you begin to chart your course. I refer to Aristotle, the great Greek philosopher, and his prescription ‘All things in moderation; nothing to excess.’

This principle fills volumes to you if you listen. What it urges of you is, as you proceed throughout your Notre Dame experience, to maintain a balance among your activities. Do not limit yourself, for narrowness of activities begets narrowness of mind, the outcome antithetical to the university experience. In the abstract this sounds good and fine and easy but beware. The person with this proper balance may unfortunately be the exception, not the rule. The powers that be will often pull you too far toward narrowness. Resist. The above is not to say you must prepare some master plan which allocates your every waking minute. It is to warn you the price of diminishing returns. It should rest in the back of your mind, a truism to which you can periodically refer in an attempt to make order out of your daily chaos.

Start with academics, your more or less primary concern here at Notre Dame. Balance your academic activities with your non-academic ones, taking time out to smell the proverbial roses. Balance too the components of these two halves. Academically, regardless of the major you eventually settle upon, try to obtain a true liberal education. Take courses from as many disciplines as you can, and try to see the general view of whatever interests you for no other reason than that it interests you. Aero-space engineers should take poetry courses. Broaden your education and it will become all the more enjoyable.

The above is not to say you must cover all the bases. An important part of this process will be the interaction you will have with your professors. Take the time to get to know them well. They care deeply about you, as a person and as a student. Give them the chance to challenge you intellectually and to guide you academically. They are your mentors, and you will find that learning from them extends far beyond the doors of the classroom.

Saint Mary’s has many clubs and organizations for every interest. There are varsity and intramural sports, the campus newspaper, a student magazine, and student government. We encourage you to get involved and to enjoy developing what will become some of the most special and treasured friendships of your life. We realize that the transition to college is not easy. But we want you to know that we are here to help you through it. Counselors, faculty, administrators, and Sisters alike, we want you to succeed and to get over the hurdle. Seek us out, if you need us.

As you begin your first year at Saint Mary’s I challenge you to take advantage of the wonderful opportunities available to you. Persevere. Take strides forward and grow as a total person. Soon these few short years will be past. Let them be well spent so that when you leave, you will set out with confidence to contribute toward making our world a better place.

Dr. William A. Hickey
President
Saint Mary’s College

Malloy welcomes the Class of 1992

Dear Class of 1992:

Welcome to Notre Dame! It's finally here, your first day of Freshman Orientation and the beginning of four years you've probably been looking forward to for a long time. On behalf of the Freshman Orientation Committee, we welcome you to campus.

In gaining admission to the University, each of you has been recognized as a fine student and a well rounded individual. Just as it is an honor for you to become a part of the Notre Dame community, it is a great honor for us to welcome you as the newest members of the Notre Dame family.

To aid you in becoming familiar with both your new surroundings and your new classmates, we have coordinated and put together an exciting learning environment. Soon I hope you will call it home.

You have already distinguished yourselves in high school for your academic achievement and your leadership role. I hope that you can build on this foundation and bring to Notre Dame the richness of your talent, energy, and enthusiasm. This is a tradition of excellence in our place, but every generation needs to take on new challenges in the present.

I pray that Notre Dame may become a special place for you as it has been for me and so many other graduates of the past. I look forward to meeting you personally.

Father Edward Malloy
University of Notre Dame
August 18, 1988

You are about to begin what we hope will be a truly blessed time for you, and we are busy getting ready for you, and we are busy getting ready for you, and we are busy getting ready for you, and we are busy getting ready for you, and we are busy getting ready for you.

I pray that Notre Dame may become a beautiful campus and a stimulating environment to its students and a rich and varied community for all who are associated with it. May all who enter Notre Dame through its gates discover. Find guidance from your professors, rectors, and administrators. Moderation will come to you naturally. And do not forget to respect others’ balances. Given that your life will be evolving continuously, clearly others will differ from yours. This diversity will prove to be an asset, not a liability, indeed for a university strives.

The next four years have much to offer you, and I hope you will get your fill. Members of the Notre Dame family usually leave quite satiated. And try as you will to heed Aristotle’s words. Use the University to its fullest by sampling all of what it offers. You will emerge a better person both in your mind and in the minds of others.

Matt Slaughter is a junior economics major and is the Viewpoint editor.
Spea English? Good. But now you gotta learn a whole new language. We call it "Domenglish." That's "Domer English." Good. But you might start saying things around here long enough and you'll end up with a little more to say. You'll probably hear some students engage in jello tosses, mud fights in the pits and Cap'n Crunch eating contests on days like Friday night, until Saturday morning. Who knows? Exciting Bookstore Finals rock Stepan.

As for the student union, you'll find that guarantee you'll get lost at least as many times as you enter. Benders: Notre Dame and Saint Mary's students. These two South Bend natives. They're going to give a lot of flak for this. In this instance, Muster is usually not a compliment.

Blowoff: Means both really easy and free as a bird when you should. It's not a good idea to blow a final, even if it's a blowoff course.

Bogus: Word applied to any unconvincing or misleading statements, ranging from administrative conditions, to policy changes, to the availability of pickup quizes.

Bookstore: This is a two-part definition. 1. The facility on South Quad where you can buy books to bogus prices. 2. The Basketball Tournament of all time, the one you're been practicing for your entire life. The world's "tallest" and largest basketball tournament. This is held every spring, and spectators and participants view the net results at the end of An Tostal. Trare: Theodore M. Hesburgh Library. So called because Domenglish stresses the second syllable of any word. Also called the Teddy Trare. Cute, huh?

Bunny: Something really easy. A course with no tests and no papers is a bunny. Also see "blowoff."

CCE: The Center for Continuing Education. The name sounds like the CSC and the ACC, but don't be confused. This one's next to the Post Office. CSC: The Center for Social Concerns. If you're concerned about your social life, don't come here. This is a place for social issues, not socializing. Between the Trare and Siegfried Hall.

CHEG: Short for Chemical Engineer. Also known as the "geek." Similar to CHEG's, only worse. You'll find most of its permanently wired.

Dogbook: Remember those pictures you saw in a white back? Well, they're all in here! Not the best way to choose a date. Believe us. Dames: Name given to Notre Dame students, especially women. Usually positive to say "I'm a Damer." But derogatory when others call you this. Also describes attitude and lifestyle of students and graduates.

Emil: Short for Emil T. Hofman, dean of Freshman Year of Studies and retired chemistry professor. The word Emil simply means freshman chemistry to most upperclassmen. Also a word for a traditional Hofman chemistry quiz. Freshmen need fear no Emil. Ethanol: A pungent, gas-wrenching odor emitted from a local plant. Most often fills the air in the morning, but can foul it on to show up around mealtime.

God Quad: Name given to Main Quad because it is home to Sacred Heart Church. I.T.T.I.: This stands for "Home Town Honey." Enough said.

Hoosier: A person from Indiana. Often used derogatorily. "An awkward, unhandy or unskilled person." Or "To loaf on or cheat a job," according to Webster's Third New International Dictionary. We did not make this up.

Mod Quad: Easternmost and newest quad on campus, as in "modern." Home to the "Six Pack" and the 'Trare. By the way, contains the highest percentage of women on campus.

North Quad: Location needs no explanation. Site of North Dining Hall and six social fraternities. Favorite place for sunbath- ers and sad looking social outcasts. O.C.: This stands for "Off Campus." When you hear "Party O.C." this is where you go.

Passion Pit: This describes any lounge of any hall after 3 a.m. This can be an awkward place to be by yourself. The Pit: This is not different from a passion pit. Actually The Pit lead to the development in a passion pit if things work out. This is the basement of the 'Trare where you go for study breaks or to study, depending on whether or not you really want to study. But it's the perfect place to meet that person you keep staring at on 2nd floor.

Psych: You can either psyche someone out or be psyched. You can always be psyched about something or at least get psyched about something. We hope that you're getting psyched about this year.

Parletties: gen-1-1-2-1. This means midnight Monday through Thursday, 12:30 a.m. on Fridays and Saturdays. But that depends on your R.A. Seriously, folks, watch them.

The Rock: The Rockne Memorial Building, renovated on South Quad. If you live on the Mod Quad you're going to hate P.E. January.

South Quad: The oldest quad on campus and the one you should be ready for something different. Here are some recommended restaurants that are not too far from campus.

The Old Spaghetti Works: The Old Singer sewing ma- chine factory now houses this restaurant and a hotel. The homemade Italian dishes are great, the portions generous, and the prices moderate. Reserva- tions recommended. Located in downtown South Bend.

The Emporium: The menu features a little more variety with such dishes as shrimp tempura and seafood in excess. Moderate to expen- sive dinners. Reservations recommended. Located in downtown South Bend.

Introducing the new B.M.O.C.—the biggest Macintosh on campus: The Macintosh II computer. It's the perfect roommate for power hungry students who do high-speed computing, video processing, engineering or graphic design.

Made with an open configuration that allows for special-purpose boards, the Mac II is the fastest, best-performing Macintosh ever built. Yet with all its sophistication, it still has the same point-and-click simplicity that Macintosh has become famous for.

Which means, of course, the Macintosh II and you will be the perfect roommates: It cooks. And you clean up.

East meets West in the Summer Olympics for the first time since 1976, a battle of athletic skills on one of history's real battlegrounds: Korea.

Kept apart by politics, the world's two superpowers will meet Sept. 17 to Oct. 2 in a nation they themselves divided for politics sake.

This U.S. Soviet reunion in Seoul will be held in an uneasy political climate sharpened by threats of terrorism and a political atmosphere sharpened by East Germans not to be overlooked in Olympics.

East Germans not to be overlooked in Olympics

The East Germans' per capita gold medal rate is about 10 times greater than that of the Soviet Union or United States.

"Our top athletes take part in competition to show what our country is capable of," said Zimmermann, the world record holder.

In 1976, the United States won 34 gold medals and 94 total, compared with 49 gold and 125 total for the Soviets. The East Germans were third in total medals with 90 but ranked ahead of the United States with 40 gold.

The United States won 174 medals, including 83 gold, at the 1984 Los Angeles Olympics, but the Soviets boycotted those Games, as did the East Germans and most of the Soviet bloc, citing inadequate security.

There's no question we have better athletes than in '76," said Moran, but expectations of a 1984 repeat would be "out of whack" with reality.

"Our top athletes take part in competition to show what our country is capable of," said Zimmermann, the world record holder.

Meet the people of the Athletic Department

Brian Bouie - A former tight end on the Notre Dame football team, Bouie will coach the football team in its first year of varsity status. He served 13 years on the Irish football coaching staff.

In 1983, Bouie was named assistant athletic director, a position he will continue to hold.

Mike DeCicco - This 1989 Notre Dame alum doubles as coach of the national power men's fencing team and academic advisor for all Notre Dame athletes.

Much of the credit for the University's high graduation rate among its athletes belongs to DeCicco, who advises more than 500 Notre Dame athletes.

In 27 years as the Irish fencing coach, DeCicco has won national championships in 1977, 1986 and 1988.

Michele Gelfman - Starting her fourth season as women's tennis director for the Irish, Gelfman was the 1980 National Coach of the Year and has coached the Notre Dame women's team to a historic 1988 season.

Muffet McGraw - After compiling an 88-41 record in five seasons at Lehigh, McGraw is set to begin her second season as Notre Dame's women's basketball coach. In her first season at Notre Dame, an Irish squad that went 12-15 the previous year improved to 20-8. The season included a win over Duke for the first ever victory over a nationally ranked team, and the Irish captured an NCAA title and season tournament berth.

Pat Murphy - The second season Notre Dame baseball coach, Murphy saw his team finish first and realized last year when he was offered the Irish head coaching job.

Lou Holtz - In his second season as Notre Dame football coach last year, Holtz took a team coming off consecutive losing seasons into the Cotton Bowl as the Irish posted an 8-4 record. Before arriving at Notre Dame, the 31-year-old Holtz coached at West Virginia and the University of Alabama.

Joe Piane - Having eight years as the Notre Dame varsity lacrosse coach, O'Leary also is the assistant director of Notre Dame Athletics.

Mike DeCicco has coached the Notre Dame men's and women's volleyball and water polo (winning the NCAA Championship in 1976) at Stanford before coming to Notre Dame in 1984.

Joe Piane - Developed his third year holding the Men's Track and Cross Country coach as Notre Dame's men's track and cross country coach, Piane directed the Notre Dame track team to a 30-9 record in 1986.

Lou Holtz - In his second year as Notre Dame athletic director, Holtz's first year as athletic director saw the women's golf, men's tennis, and football teams all gain varsity status.

Before he was named athletic director, Rosenthal was in his second year as the University of Notre Dame basketball player, Rosenthal is in his second year as Notre Dame athletic director.

Rice Schaffer - A former player and assistant coach of the Notre Dame hockey team, Schaffer returned to South Bend last year and led the Irish hockey team to a best-ever 27-2-4 record.

Rich O'Leary - Having eight years as the Notre Dame varsity lacrosse coach, O'Leary also is the assistant director of Notre Dame Athletics.

Schafer coached men's and women's volleyball and water polo (winning the NCAA Championship in 1976) at Stanford before coming to Notre Dame in 1984.

Before he was named athletic director, Rosenthal was in his second year as the University of Notre Dame basketball player, Rosenthal is in his second year as Notre Dame athletic director.

Rosenthal saw the women's golf, men's tennis, and football teams all gain varsity status.

Before he was named athletic director, Rosenthal was in his second year as the University of Notre Dame basketball player, Rosenthal is in his second year as Notre Dame athletic director.

The freshmen reported to campus Aug. 8, a few days before the returning players came back. Besides the drills and orientation to the football program, Holtz said 10 hours is spent teaching study skills to the freshman class.

"They're an outstanding group of people," Holtz noted. "They are working hard to fit in with the rest of the freshman class."

**UNIVERSITY OFFER**

1/2 Off

**Special to The Observer**

From racquetball courts to golf courses, from skating rinks to swimming pools, the Notre Dame-Saint Mary's campus has the athletic facilities to meet the needs of any sports enthusiast.

The quads are available in the fall for intramural games and in the spring for various activities, and there are plenty of indoor athletic shelters worth a visit or two during the cold weather months. Here is a list of facilities available to students on both campuses:

**Edmund P. Joyce Athletic and Convocation Center** — The double-domed Joyce ACC, located east of the football stadium, contains more area than the Houston Astrodome. The South Dome houses the basketball arena used by both the men's and women's basketball teams, and the hockey team's home ice is located in the North Dome. The women's volleyball team, men's volleyball club and wrestling team have their home matches in the ACC's auxiliary gymnasiurn, also known as the "Pit."

The structure also includes basketball, handball, racquetball, squash, tennis and volleyball courts that usually are open to the public, though reservations are required for most of the tennis courts.

For those interested in Fighting Irish sports history, many Notre Dame awards and mementos are displayed outside the athletic department offices on the second floor.

**Raffs Aquatic Center** — This two-year-old natatorium, located at the east end of the JACC, features a 50-meter pool which usually is divided into three sections during recreational swimming times.

The diving section features three one-meter and two three-meter divingboards. The recreational swimming section is 25 yards in length and has boys' and girls' locker rooms and a large observation deck.

The final section is used for water basketball and water polo.

The Rolfs Center, home of the men's and women's swimming teams, also has new locker facilities and an observation deck that seats 380 spectators.

**NOTRE DAME FIGHTING IRISH FOOTBALL**

ántia Athletic Facility — Located north of McCandless Hall on the Saint Mary's campus, Angels includes bas­ketball, racquetball, volleyball and indoor tennis courts, and also has a carpeted jogging track around these courts.

Weight machines, fitness and gymnastic equipment also are housed in the facility, while more basketball and tennis courts are just outside the building.

The facility is open to all Saint Mary's and Notre Dame students who present a student ID. Reservations are needed for the racquetball courts.

**Eck Tennis Pavilion** — This indoor facility, completed last fall, is the home court for the men's and women's tennis teams. Located east of the outdoor Court A, tennis courts, the Eck is country-club quality, housing six laykold courts and an observation deck.

Court time can be reserved in 15-minute blocks by calling 239-6939. Fees are $1 for students, $2 for faculty and $4 for guests.

**Lofts Indoor Athletic Facility** — New facility east of Lake Kipke Field houses an artificial-turf football field (Meyo Field) a six lane, 300-plus meter track and an impressive varsity weight room.

The facility is used mostly for varsity team and band practices.

**Brockie Memorial Golf Course** — On the west end of the Notre Dame campus is the 18-hole, 6,200-yard, par 71 University golf course, which is open until late fall and reopens in early spring.

During the winter, the golf course will be open for cross country skiing on occasion.

**Kautze Rockne Memorial** — Located at the west end of South Quad, "The Rock" is the center for the Physical Education program. The brick structure contains basketball courts, handball racquetball courts, a weight room, a light apparatus room, a swimming pool and the golf pro shop.

Use of the Rockne Memorial is free to all students and faculty members upon presentation of a University identification card. Closing time is 11 p.m. daily.

**Stepan Center** — On the north end of campus are Stepan Center and the center's adjoining fields and basketball courts. Within Stepan Center are basketball and volleyball courts, open for recreational and league play.

Outside the domed Center, one can play basketball, foot­ball, rugby, soccer and softball. The outdoor basket­ball courts are outfitted with lights that allow students to play late into the night.

Many of the interhall sports are conducted in this area of campus.

**Regina Pool** — This small swimming pool is located in the middle of Regina Hall on the Saint Mary's campus.

**Bookstore Courts** — Notre Dame's own Bookstore Basket­ball, the world's largest basketball tournament, owes its name to the two courts. Availability depends on the week which use the courts as a parking lot.
Burke course improves its playing atmosphere

By MARTY STRASEN
Sports Editor

Student play always has been the top priority at Notre Dame's Burke Memorial Golf Course. That's not changing. But the course itself is on the move, as added funds and a little more attention should be providing students with better golfing and the school with more revenue from its 18-hole course in the near future.

"We're doing some things to make it more enjoyable," said Sally Derengoski, who took the post of director of operations last year.

Dale Getz began as course superintendent last year, and works with Derengoski on a daily basis under the authority of Dr. Tom Kelly of Non-Varsity Athletics. The Athletic Department began running the course two and a half years ago under former Athletic Director Gene Corrigan.

"Gene Corrigan decided we could make some major course improvements to accomplish two things," Derengoski said. "It gives the students a better golf course, and also makes the course a better revenue source. Hopefully we can attract more public golfers over the summer months, because public golfing is our main source of revenue."

An $80,000 project to rebuild all the tees and implement a computer controlled irrigation system was one of the first improvements.

"We started that a year ago," Getz noted. "There are 18 new tees in play this year, and automatic irrigation on the tees and greens. That's a big help. If you can't control water, you're going to have problems. Now we can do that by pushing a few buttons."

The irrigation system has been a savior during the dry summer months. Members of the Athletic Department who played the course over the summer said the course stayed in great shape.

"We also relandscaped the No. 1 tee," Getz added. "Most golf courses will tell you that the first tee is always in the worst shape, because that's where traffic backs up the most. We've redesigned it so traffic is filtered around the tee area instead of over it."

The sand traps were renovated over the summer, with new sand added and some enlargements made. Also in the works is the replacement of hundreds of trees which have been lost to disease over the years.

"Trees have been lost by the hundred without a major replanting," Getz said. "Last fall we planted 40 and 10 more in the spring. I'd like to plant 40-50 trees a year for at least five or 10 years. There are so many things you can do with trees to make the course more strategic. We hope to make it more challenging for the better golfer, without discouraging the novice or the student who hasn't played much by making it too difficult an experience. We feel we can make a course like that."

A bridge is also in progress, over an area on the seventh fairway which collects most of the course's water.

"It all starts with (University Vice President) Fr. (William) Beauchamp," Derengoski said. "He recognizes that, as a business venture, this is a great opportunity. And when you can provide the students with a better service, it's worth putting some money into."

The Pro Shop in Rockne Memorial also is being improved. The inventory has been increased "many times over," Derengoski said.

Student passes are another effort to attract more students to the course. Fall passes are available in the Pro Shop for $25 each.
**Irish continued from page 20**

Irish could provide instant contributions for the Irish. Notre Dame was a combined 1-43 at those two weight classes last year. The Irish will try to improve on a 1987 season that saw the team send a school-record six wrestlers to the NCAA Championships.

Men's tennis - With the addition of one of the country's top freshmen and a transfer from Austin Peay, Coach Bob Raylins says he has "three number-one players" on the Irish team. David Luica, a National Junior doubles champion, and Walter Dolhare, a former number-one singles player for Austin Peay, will challenge returning Brian Kalba for the top spot. This schedule will include several of the top teams in the nation, including Kentucky, Kansas and West Virginia.

**Women's tennis** - After having CeCe Cahill become Notre Dame's first-ever NCAA tournament participant last year, the Irish have signed three more nationally ranked players - Tracy Barton of Cincinnati, Ohio, Katie Clark of Park Ridge, Ill., and Kristie Donor of Tucson, Ariz. The freshmen will play their first collegiate matches in the fall, but the Irish are scheduled to post a longer spring schedule that includes eight schools from the NCAA's Big Ten Conference. The Irish will try to continue a dual match winning streak last year on its way to posting a 39-22 mark. Irish coach Pat Murphy is a long-time track man who was coming off its best season ever. The squad will be facing an upgraded schedule after recording its best record ever. The Irish have replaced the Daytonos and Villanova and will be playing teams like Boston College, Michigan, Western Michigan and R.P.I.

The Irish, who have scholarship players for the first time since the program was downgraded to club status for the first time in 1982, also will have a larger seating capacity for home games this season according to second year coach Ric Schaefer.

**Baseball** - Yet another team that is coming off its best season ever, the Irish recorded a school record 1-7-31 record. But Notre Dame was not invited to the NCAA Tournament, and the team's schedule was ciled as a possible reason. No selecting committee can say the same thing about this year's schedule. The Irish faced road tests against Akron, Indiana and Penn State. Notre Dame has 13 monogram winners returning from last year's squad. Notre Dame also will have a women's soccer team this fall, which will have its inaugural season after being granted varsity status last year.

**Golf** - This is another sport where the women's team will be enjoying its first season at the varsity level. Meanwhile, the men's team will try to continue a dual match winning streak that goes back to 1977. Hockey - One of many teams coming off its best season ever, the squad will be facing an upgraded schedule after recording its best record ever. The Irish have replaced the Daytonos and Villanova and will be playing teams like Boston College, Michigan, Western Michigan and R.P.I. The Irish, who have scholarship players for the first time since the program was downgraded to club status for the first time in 1982, also will have a larger seating capacity for home games this season according to second year coach Ric Schaefer.

The Irish have replaced the Daytonos and Villanova and will be playing teams like Boston College, Michigan, Western Michigan and R.P.I. The Irish, who have scholarship players for the first time since the program was downgraded to club status for the first time in 1982, also will have a larger seating capacity for home games this season according to second year coach Ric Schaefer.

**Baseball** - Yet another team that is coming off its best season ever, the Irish recorded a school record 1-7-31 record. But Notre Dame was not invited to the NCAA Tournament, and the team's schedule was ciled as a possible reason. No selecting committee can say the same thing about this year's schedule. The Irish faced road tests against Akron, Indiana and Penn State. Notre Dame has 13 monogram winners returning from last year's squad. Notre Dame also will have a women's soccer team this fall, which will have its inaugural season after being granted varsity status last year. Million for grabs in charity contest

Special to The Observer

Trustcorp Bank is sponsoring the tournament to benefit residents of Saint Joseph's Residential Services, a member of the Holy Cross Health System. Any non-professional golfer at least 13 years or older can attend qualifying sessions from 7 a.m. to 7 p.m. on Aug. 26-27 at Elbel,Erskine,Knollwood or Notre Dame's own Burke Memorial Golf Course.

At these qualifiers, each golfer will pay $1 per ball with no limit on the amount of balls one can buy. The sessions will be held at each course's practice green, whose average range is approximately 90 yards.

During the two days of qualifying, 10 players from each site for each day will be selected to the 170-yard hole-in-one shootout at the Elbel course on Aug. 28. If one of the 80 contestents sinks a hole-in-one, he or she will evenly split a one million dollar, 25-year annuity with Saint Joseph's Residential Services.

Aside from the potential million dollar top prize, numerous other awards will be made to the finalists coming closest to the pin. They include two Notre Dame season football tickets and three golf resort vacations by the Marriott Hotel and Executive Travel, including one that will allow the winner and a guest to not only see the 1989 U.S. Open at Oak Hill Country Club at Rochester, N.Y., but also play the course after the tournament.

There also will be a variety of golf equipment prizes. Trophies will be awarded to qualifiers who shoot an ace on Aug. 26 and Aug. 27.

"We're hopeful of establishing the Trustcorp Bank Million Dollar Hole-in-One Golf Contest as an annual affair because it makes everyone who participates a winner," said Jim Banney, the event's general chairman. "The prizes are substantial, with the real beneficiary being the patients we serve at Saint Joseph's eight residential care centers in South Bend."

Saint Joseph's Residential Services provides a network of services ranging from independent living facilities to skilled, long term nursing care. Special emphasis is placed on providing a continuum of service to the elderly and physically disabled. In addition, Saint Joseph's Residential Services is the largest provider of services for institutionalized mentally retarded and developmentally disabled persons in Saint Joseph County.

Supporting sponsors of the event include the Marriott Hotel, Executive Travel, Burger King, WSBT, WNDU-TV and Palen Webber.

Speed of freshman class impresses Holtz

Brown, Ismail 'rocketing' up the Irish depth chart

By MARTY STRASEN
Sports Editor

If Notre Dame head coach Lou Holtz has one problem evaluating the freshmen on his football team, it's trying to keep his eyes on them. These guys can run. And after more than a week of trying to bring them into focus on the practice field, Holtz is pleased with what he's been able to see from the class of 1992.

"The freshmen are an awful good group," Holtz said of the bunch many called the best recruiting class in Notre Dame history when it was announced in the winter. "It's difficult to tell who can make contribu­tions at this point, but several have a chance.

But speed is one thing you can evaluate early in the prac­tice schedule, and Holtz said five freshmen ran the 40-yard dash in under 4.5 seconds in drills. Split end Raghib "Rock­ie" Ismail from Wilkes Barre, Pa., was clocked at 4.28.

"That was on artificial turf and it wasn't timed electron­i­cally, so that's a bit deceiving," Holtz said. "But he's sure got some speed.

"They're not track men, either. They're football players with some speed. But they've also got a long way to go."

Ismail has made great prog­ress, up to this point, partly because two of the returning split ends are no longer returning. Bobby Carpenter and Peter Martin were declared academically ineligible and have withdrawn from the University.

That caused the coaching staff to move Ismail from tail­back to split end on the first day of practice, and the speedster already is running patterns with the first team.

"The speed doesn't mean anything if you can't catch the ball," said Ismail, who was used exclusively as a tailback at Meyers High School. "I still have to learn the little things, like the techniques that people tend to overlook."

While a player of Ismail's speed might be expected to return kicks, he actually is looking forward to working with another part of the special teams.

"I want to block punts, to tell you the truth. They put me at that position and I feel really comfortable with it."

Another freshman expected to earn his share of time is tight end Derek Brown from Merritt Island, Fla., who was named Parade Magazine's Offensive Player of the Year as a prep senior.

Brown, along with the second team, behind sopho­more Frank Jacobs.

"I'm just like the rest of the freshmen," Brown said. "I'm starting at the bottom and trying to work my way to the top. I've been working on the
