Notre Dame given $33 mil. Money will build new quad

By KELLEY TUTHILL
Senior Staff Reporter

Notre Dame has been given $33 million, the 18th largest gift to higher education, for construction of a new quadrangle on the area which is presently Green field and parking lots.

Edward DeBartolo of Youngstown, Ohio is donating the $16 million Edward J. DeBartolo Classroom facility and the $14 million Marie P. DeBartolo Center for the Performing Arts. The performing arts building is named after his wife who passed away in 1987.

The DeBartolo gift is the largest in the history of Notre Dame. Previously the $12 million donated by Mrs. Joan Kroc for the Institute for International Peace Studies was the largest gift from an individual.

The gift was announced at a press conference Thursday. DeBartolo, chairman and chief executive officer of the Edward J. DeBartolo Corporation, his son Edward DeBartolo, Jr., president and chief administrative officer of the corporation; Donald Keough, chairman of Notre Dame's trustees and president and chief operating officer of The Coca-Cola Company, and University President Father Edward Malloy were present to answer questions about the new quad.

This is a historic moment and a historic occasion in the life of the University," said Keough. "It is historical because the fruits of this extraordinary generosity, two major buildings anchoring the new academic quadrangle, will be completed as we celebrate our sesquicentennial in the year 1992." Malloy said the classroom

Major construction will transform look of ND campus

By NATASHA WILSON
Senior Staff Reporter

When students return in August they will discover several new features on Notre Dame's campus, including the beginnings of two new quads. In the works are a band practice facility and a ROTC building on the new east mall and a complex for the Hesburgh Institute for International Peace Studies, the Edward J. DeBartolo Classroom Facility and the Marie P. DeBartolo Center for the Performing Arts on the new south academic mall.

The University presented the Casteel, a construction company to finish the construction company to finish the building by the time the students return in the fall and University officials expect the construction company to finish the rehearsal hall by March 1990.

"Construction has gone smoothly so far. But, there's a lot of interior finishing for acoustical effects for that building which will take a long time to complete," said Donald Dedrick, director of the physical plant.

In addition to the 226 members of the Marching Band, the Koons Rehearsal Hall will house the 66-member Concert Band, three smaller variety bands, two jazz bands and woodwind, brass and ensemble bands.

Koons, a 1965 alumnus of Notre Dame, has donated $3.5 million to cover the total budget for the band building project.

The Coming of the Quad
The $33 million DeBartolo Quadrangle to be completed by 1992

EDWARD J. DeBARTOLO CLASSROOM FACILITY
Cost: $16 million
Size: 130,000 sq. ft.
Features: Classrooms, seminar rooms, lecture halls, audio-visual and computer equipment
To be completed: early 1992

MARIE P. DeBARTOLO CENTER FOR THE PERFORMING ARTS
Cost: $14 million
Size: Unavailable
Features: Auditorium seating for over 800, musical and theatrical study areas
Under construction, not part of the DeBartolo gift

Oliver North convicted on three counts, could go to jail

Associated Press

WASHINGTON: Oliver North, the Marine at the center of the Reagan administration's secret effort to arm the Nicaraguan Contras, was convicted Thursday of shredding documents and two other charges in the Iran-Contra affair. He was acquitted on nine other counts.

North said he would appeal the jury's decision: "We're absolutely confident of the final outcome. As a Marine, I was taught to fight and fight hard for as long as it takes to prevail."

"We will continue this battle ... and we will be fully vindicated," he told reporters in a statement at his lawyer's office. He did not take questions.

The verdict without any show of emotion. But a congressional supporter described him as "absolutely elated" at the jury's decision.

North faces up to 10 years in prison on the convictions, accepted the verdict.

The verdict without any show of emotion. But a congressional supporter described him as "absolutely elated" at the jury's decision.

After judge and jury had left the room, North walked to a railing separating him from his wife, Betsy, and kissed her lightly on the cheek. Mrs. North had been sitting in the front row with a clergyman.

It was the first trial born of the scandal that marred the last two years of Ronald Reagan's presidency and raised questions about then-President George Bush's involvement in the administration's clandestine effort to arm the Contras.

Even as the jury was returning its verdict, Bush told reporters at the White House that he did not participate in any arrangement to expedite aid to other countries in exchange for their support for the Contras. The White House said Bush would have no comment on the verdict.

In Los Angeles, former President Reagan also declined comment.

North's defense was that he had been a good soldier loyally carrying out what he knew his commander-in-chief, the president, wanted.

"The principle that no man is above the law has been vindicated," said prosecutor John Keker, who refused to answer question.

Final Issue
This is the last regular issue of The Observer for the 1988-89 academic year. Good luck on finals, and have a really nice summer.
WORLD BRIEFS

A U.S. military helicopter crashed and exploded in southern France after it hit a high-tension power line on a training flight, killing all five Marines aboard, officials said Thursday. The UH-1 Huey had been flying about 200 feet and then crashed into a mountain stream and exploded at about 9:45 p.m. Wednesday west of Nîmes. The crash occurred near the village of Nice. The crash was from the amphibious assault ship Guadalcanal, in port in Toulon, and was assigned to Marine Medium Helicopter Squadron 263, Detachment 4, from the New River, N.C., Marine Corps Air Station. The pilots were using night-vision goggles, but military officials said there was no reason to suspect the goggles played a role in the crash. Marine officials in Washington, however, said the goggles did not permit pilots to see power lines.

Two West German doctors were kidnapped Thursday in the southern Lebanese port city of Sidon, according to a Moslem militia official in the area. The men were doing humanitarian work in Lebanon. He said the two, a man and a woman, were seized "by unknown gunmen between 7 p.m. and 9 p.m. just beyond the Sinite Bridge" on the southern edge of Sidon, 25 miles north of Beirut. The men were taking part in a humanitarian mission to provide medical help to those held hostage in Lebanon to 17. The woman doctor would become the hostage in Lebanon to 23.

The kidnappers said they would free the men only if the United Nations or the Red Cross would confirm the abduction. If the kidnappings are confirmed, they said, they would kill the two.

They said the goggles do not permit pilots to see power lines. The crash was from the amphibious assault ship Guadalcanal, in port in Toulon, and was assigned to Marine Medium Helicopter Squadron 263, Detachment 4, from the New River, N.C., Marine Corps Air Station. The pilots were using night-vision goggles, but military officials said there was no reason to suspect the goggles played a role in the crash. Marine officials in Washington, however, said the goggles did not permit pilots to see power lines.

Young women who take birth control pills for more than four years run a significantly increased risk of breast cancer, according to a major British study published Friday. The researchers said the findings underscore the need to follow up on the 43 percent increase in the risk of breast cancer after four years of pill use and a 74 percent increase after eight years. They called on doctors to warn patients of the possible risks of breast cancer before they prescribe contraceptive pills, but they did not advocate avoiding oral contraceptives.

INDIANA BRIEFS

An Indiana iron foundry had an accidental death rate more than five times as high as the annual average for the most dangerous occupation in the United States, federal health officials reported Thursday. The U.S. Centers for Disease Control in Atlanta said in its weekly report Thursday that six workers at the foundry were killed over the 12 years between 1974-1986, an unusually high rate for a work force of about 250 employees. According to the CDC, that corresponds to an annual mortality rate of 197 deaths per 100,000 workers, compared to 36 deaths per 100,000 workers per year in mining—the most hazardous occupation. The rate of deaths in general manufacturing every year is 4.2 deaths per 100,000 workers, according to the CDC.

CAMPUS BRIEFS

The National Conference on Medjugorje, sponsored by the National Catholic Office for Youth, will be held May 5-8 at the Joyce A.C.C. Up to 8,000 people are expected. It is the first national conference on the alleged apparitions of the Virgin Mary, first reported by children in the Yugoslavian village on June 25, 1981.

Observer classifieds will lift above Notre Dame

They say Brown University is the hardest school in the country to get into and the easiest to graduate from. Notre Dame could learn a lot from this leader among Ivies in the courses they offer their students.

After three years at Notre Dame the good courses seem harder and harder to find. At Brown the students produce a semestery review of courses called the Critical Review to help the students choose their courses. The Review offers comments made by students on the various courses offered.

As I was paging through the Review, I realized why Brown is such a better school. It was not because they offer students a choice of two topics. They may either go to South America and do a report on drug production or they may fly to Napa Valley and study methods of wine making.

For the class's midterm the students have a choice of one of two topics. They may either go to South America and do a report on drug production or they may fly to Napa Valley and study methods of wine making.

The class's mandatory final will be a trip to France to experience philosophy and wine first hand. Students will be required to do a reflective piece on the trip.

I'm sure you will agree that these types of courses are sadly lacking at Notre Dame. Per-
Panamanians run from an opposition rally after shots were fired into the air to disperse the crowd. Tens of thousands had gathered for the close of the Democratic Opposition Alliance (ADO) campaign, whose leaders had already charged the government with fraud. Several people were injured by club-wielding panamanians.

Foul play feared in Panama elections

Associated Press

Panama City, Panama - The opposition closed its presidential campaign with some supporters predicting victory in Sunday's vote over the handpicked candidate of Gen. Manuel Noriega or bloodshed.

"Count the votes or count the dead," read one of the opposition coalition's signs Wednesday at a rally attended by 100,000 flag-waving people on Via España in downtown Panama City.

President Bush, opposition candidates and others predict that Noriega, the Defense Forces chief and Panama's de facto ruler, will steal the elections. The government promises clean elections.

Opposition presidential candidate Guillermo ENDARA said that if the public will is denied through vote-rigging, "Panamanians will march in defense of liberty."

Never again, ENDARA said in reference to Noriega, "will the will of one man be above the will of the Panamanian people."

The opposition candidates say there is no hope of democracy in Panama as long as Noriega, indicted in Florida last year on charges of drug smuggling and money laundering, remains in power. Noriega has denied the charges.

Opposition supporters snaked through the crowd Wednesday night with a black coffin pasted with a smiling picture of Noriega and a pineapple attached atop. "Pineapple face," a derogatory name the opposition uses for Noriega, refers to his rough complexion.

The pro-government coalition closes its presidential campaign tonight with a rally. Its ticket is headed by Carlos Duque Jaen, a close business associate of Noriega.

The central issue of the campaign has been Noriega, and not Panama's protracted economic and social problems.

The opposition contends government workers, representing about 20 percent of the labor force, are being pressured by Noriega forces to attend the rally tonight and that the government will truck thousands into the capital to swell the ranks.

Morris given one of seven fellowships

Special to The Observer

Thomas Morris, associate professor of philosophy at the University of Notre Dame, has been selected as a Howard University of Notre Dame, has been selected as a Howard Foundation Fellow of the 1989-90 academic year. He is one of seven fellows selected nationally from nominated applicants.

The George A. and Eliza Gardner Howard Foundation is administered by Brown University. Established in 1952, its mission is "to aid the personal development of promising individuals at the crucial middle stages of their careers." A specialist in philosophy of religion, Morris is best known for his book "The Logic of God: The Concept of God," which has made him a leading apologist for the incarnation of Jesus Christ. He has seven other volumes as well, including "Faith, Reason and the Meaning of Life." He hopes, as a culmination of this research, to write a ninth book, entitled "Faith, Reason and the Meaning of Life."

As a result of being awarded this fellowship, Professor Morris will not be teaching classes at Notre Dame next year.
Correction
In the second part of the series on tenure which appeared in The Observer Thursday, a section of the story was accidentally omitted. The following paragraphs should be inserted following "an added pressure to excel in re-search."

"At a University, scholar­­ship and teaching are impor­tant," he said. "Because we are a Catholic university, we must be a representative in the university world, thus we have an obligation to do both."

He disagreed with the adage that one must "publish or perish." "I'd say it's more 'publish and teach, or perish,'" he joked.

Martin said that teaching and research are stressed but that "we're told that re­search is the main thing. They are constantly ad­ressing your research po­tential.

Evidence of the impor­tance of research to a fac­­ulty member's career is seen in a practice common to many academic depart­­ments. In these depart­­ments, junior faculty are given a year off from teaching.

"I think it's an excellent idea," said Martin. "If the University is willing to give someone a year off to better their dossier, it's excellent."

Martin did concede that giving a faculty member a year off prevents them from teaching.

"I had many of my stu­dents complain to me about a lack of courses to take. If five professors go on leave next year, there'll be even less," she said.

However, Martin said that the dean of the College of Science had provided funds to bring outside teachers in last year to make up the dif­ference. "If that's done again this year, I'm in favor of the idea," she said.

Wanted to head Campus Ministry
Father Richard Warner, counselor to the president at the University, has been asked to assume responsibility for the Office of Campus Ministry, ef­­fective July 1.

Rev. Andre Leveille an­­nounced earlier that he was stepping down from the posi­tion of director of campus ministry, and he will return to the University in another capacity following a sabbatical break.

Warner will include campus ministry among his other duties, which relate to the Cath­olic dimension of the Univer­sity, including its relationship to the Church and to other Cath­olic colleges and universities, as well as the role of its found­ing religious community, the Congregation of Holy Cross.

Father Malloy said that put­­ting campus ministry under Warner signified its importance in the overall life of the Univer­sity, and he said the change had been approved by the officers of the University. Warner remains a member of the offi­cers group and will report to Malloy as his counselor and to Father David Tysen, vice pres­ident of student affairs, as director of campus ministry.

Warner will continue to chair the Task Force on Evangeliza­tion Pastoral Ministry and So­­cial Values. He said a new po­sition of associate director would be added to the campus ministry staff and that further expansion of personnel and programs would await the report of the task force.

Warner, a trustee emeritus of the University, served as provincial superior of the In­di­ana Province of Holy Cross from 1973 to 1988. He assumed his counselor's position in Au­gust 1988.

End-of-year work swamps comp labs

By JOHN O'BRIEN
Senior Staff Reporter

The long waits and big crowds at campus computer labs are only a result of a pre-finals week rush, said Donald Spicer, associate provost for university computing.

Students have reported waits at the 24-hour LaFortune computing lab of up to two hours.

"I was at LaFortune Wednesday night at 1:30 am and I still had to wait for an hour," said freshman Blair O'Connor.

Jannotta said that there has been a period of peak usage for the last 10 days.

Dana Jannotta, an employee of the LaFortune lab, said that the average wait over the last week has reached up to "an hour to an hour and a half."

"The university is aiming for a ratio of one computer for every 20 students," said Spicer.

McCormick to receive two honorary degrees

Special to The Observer

Father Richard McCormick, John A. O'Brien Professor of Christian Ethics at the University of Notre Dame, will receive two honorary degrees this May. On May 20, at the commencement exercises of the University of San Francisco, McCormick will receive a doctorate of humane letters. On May 27, another doctorate of humane letters will be awarded to McCormick during the commencement exercises of his alma mater, Loyola University in Chicago.

McCormick, widely regarded as America's foremost Catholic bioethicist, entered the Society of Jesus in 1940 and was graduated from Loyola University five years later. He obtained a master's degree from Loyola in 1950, and in 1953 he was ordained to the priesthood. In 1957, he obtained a doctoral degree from the Gregorian University in Rome. Before joining Notre Dame's faculty in 1966, McCormick had been, since 1973, Rose F. Kennedy Professor of Christian Ethics at Georgetown University's Kennedy Center for Bioethics. For the previous sixteen years, he had been a professor of moral theology at the Jesuit School of Theology in Chicago.

Shuttle launches with probe

Associated Press

CAPE CANAVERAL, Fla. - Atlantis found a hole in the clouds and thundered into orbit Thursday, sailing 184 miles above Earth where five astronauts prepared to propel NASA's state-of-the-art Magellan probe on a mapping journey to Venus.

Scientists hoped the $550 million project would open a new "golden age" for an American planetary program dormant for a decade.

In a spectacular start, the winged spaceplane vaulted away from its seaside launch pad at 2:47 p.m. EDT, after being delayed a cliff-hanging 59 minutes by shifting clouds and winds that had threatened a second postponement in six days.

The astronauts quickly turned to remotely checking Magellan before its scheduled release later Thursday into an independent orbit.

building will contain state-of-the-art computer and audiovisual equipment as well as classrooms of various sizes. “Now we have the opportunity not only to bring to the campus performing groups of various kinds, but also to attract an even stronger faculty,” said Malloy. He also said that the performing arts center will be “cultural center” for the Michiana community.

DeBartolo, Sr., said he had been approached by University President Emeritus Father Theodore Hesburgh and Father Edward Joyce about a donations in the past. Jokingly, he said, “they never quite gave us the snow job that Father Malloy gave us.”

“We hope that the thousands of students who follow us will benefit from the enhancement of the quality of educational opportunities at Notre Dame,” said DeBartolo. DeBartolo and his son graduated from the University and his daughter, Marie, graduated from Saint Mary’s.

Build

continued from page 1

The single-story facility spanning 25,000 gross square feet will contain a main rehearsal room with a band shell and a sheet music library and offices for band directors and student officers.

Casteel began construction of the ROTC building in February and has already laid the foundations and most of the foundation walls. Dedrick said that the construction company will probably begin in early June, and cars will no longer be allowed to take a right at the post office on Derr Road, said Malloy. The traffic will instead go around the perimeter of the campus, behind the stadium, according to Malloy.

The other buildings on the quad will include the Hesburgh Center for International Studies, which has already been funded, said Malloy. He also said the University has been in discussions with friends of the University about the possible buildings.

is currently on schedule and should be completed by April 1990, he noted. The new building faced in limestone and Notre Dame brick will replace the 1943 pink building near St. Mary’s Lake as the home of the Notre Dame Air Force, Army and Navy ROTC programs.

Frank Pasquarella will underwrite the $5.75 million cost of the ROTC building. Pasquarella previously donated the two female residence halls which bear his name. The University will open bids soon for the peace studies center and construction for the University Avenue will begin in early June, said Dedrick.

“The complex is sort of a village concept. Visiting fellows and professors will be able to attend conferences and reside conveniently all in the same location,” he said. The complex, consisting of three buildings connected by inside corridors, will be located on Notre Dame Avenue.

Joan Kroc, the widow of the founder of the McDonald’s hamburger chain, is donating $4 million to cover the total cost of the complex.

“Once all the priorities have been committed, Keogh said the performing arts center and a new classroom building were top priorities. Now that the funds have been committed, Keogh said the library and scholarship funds will take top priority. The ‘Strategic Moment’ campaign has a long way to go, according to Keogh, and they are currently seeking alumni support.

The new wing on Neuiland Science Hall will be ready for occupation in three months, said Dedrick. The three floor addition will consist of physics classrooms and labs, faculty offices and research space. The wing’s basement will eventually house the University Administration Computer, said Dedrick.

In addition to the construction projects the University will also expand the underground utilities this summer to accommodate the new buildings.

Joan Kroc, the widow of the founder of the McDonald’s hamburger chain, is donating $4 million to cover the total cost of the complex.

“Once all the priorities have been committed, Keogh said the performing arts center and a new classroom building were top priorities. Now that the funds have been committed, Keogh said the library and scholarship funds will take top priority. The ‘Strategic Moment’ campaign has a long way to go, according to Keogh, and they are currently seeking alumni support.

The new wing on Neuiland Science Hall will be ready for occupation in three months, said Dedrick. The three floor addition will consist of physics classrooms and labs, faculty offices and research space. The wing’s basement will eventually house the University Administration Computer, said Dedrick.

In addition to the construction projects the University will also expand the underground utilities this summer to accommodate the new buildings.
DeBartolo family has close ND ties

By FLORENTE HOELKER
Senior Staff Reporter

Edward J. DeBartolo, the contributor of $33 million to the University for the construction of a new academic quad, is a graduate of the Notre Dame class of 1932.

DeBartolo, who presented the gift Thursday morning, graduated from the University with a degree in civil engineering. He then proceeded, over the next forty years, to build a corporation which controls over 8 million square feet of retail space and which is worth over $1 billion.

His business, the Edward J. DeBartolo Corporation, is headquartered in Youngstown, Ohio. DeBartolo serves as the chairman and chief executive officer of the corporation.

Youngstown, which is DeBar­tolo's hometown, also served as the site of DeBartolo's first shopping mall.

The DeBartolo Corporation is reputed to be the world's largest developer and manager of shopping malls.

The corporation directs the development of the 14 department and specialty stores which comprise the Higbee Company in partnership with Dillard De­partment Stores, Inc.

The firm is also involved in the further development of the Cincinnati-based Allied Federated Department Stores, Inc. which includes Bloomingdale's, The Bon, Goldsmith's, Lazarus, and Maas Brothers, among others.

The DeBartolo family, in­cluding Edward J. DeBartolo Jr., who serves as the president and chief administrative offi­cer in his father's corporation,

is one of the top investors in sports enterprises. The firm operates two thoroughbred horse racing facilities, owns the NHL Pittsburgh Penguins, and owns the San Francisco 49ers.

Edward J. DeBartolo Jr. is a 1968 Notre Dame graduate, and has served in his present posi­tion since 1979.

DeBartolo Sr.'s wife, Mrs. Marie Patricia DeBartolo, died in August 1987 of a respiratory ailment.
Surgeon General Koop plans July retirement

WASHINGTON: Dr. C. Everett Koop, whose campaigns against smoking and AIDS marked an often-controversial seven years as surgeon general, told President Bush today he will leave office in July.

Koop, in a brief letter to the White House, said he had told Bush in February that he would not serve out his full second term, which ends in November. The surgeon general said he will leave July 12.

Feeding the poor
Michael Noone, Boxing Club President (middle, with envelope) presents a check for $15,000 to Father James Ferguson as Andy Panelli (left) and Walt Rogers watch. The check represents the proceeds from the 1989 Bengal Bouts and is said to be enough money to feed 4000 people for a week in drought-stricken Bangladesh.

Ohio State president to visit ND

By NATHAN FITZGERALD
Staff Reporter

Dr. Edward Jennings, president of Ohio State University, will make his first visit to Notre Dame to meet with University President Father Edward Malloy and Notre Dame’s College of Business Administration faculty on May 24.

“The purpose of the visit is two-fold,” said Assistant Professor of accountancy Donald Tidrick. “He’s going to be the guest of honor at Michiana’s banquet, and also, it’s an opportunity for Ohio State University to meet with University of Michigan, and in its fourth printing, and continues to teach finance courses at Notre Dame family who will be receiving his Ph.D. from the University of Michigan.

Although Jennings’ visit comes between semesters for Notre Dame, Tidrick said that anyone interested from the Notre Dame family who will be in the area on May 24 would be welcome.

Jennings began his career in 1969, as an assistant professor of finance at the University of Iowa. Not long after, he earned the position of vice president for finance and university services. In 1979, he became president of the University of Wyoming, only ten years after receiving his Ph.D. from the University of Michigan. and in 1981, Jennings became the tenth president of Ohio State.

Jennings is co-author of a finance textbook, “Fundamentals of Investments,” which is in its fourth printing, and continues to touch with students.

After meeting with Malloy, Jennings will speak to members of the College of Business Administration faculty on “Issues in Higher Education in the 21st Century.” Following a campus tour, he will attend a reception at and two-fold,” said Assistant Professor of accountancy Donald Tidrick. “He’s going to be the guest of honor at Michiana’s Ohio State alumni club spring banquet, and also, it’s an opportunity for Ohio State University and Notre Dame to get to know each other as institutions.”

Jennings is co-author of a finance textbook, “Fundamentals of Investments,” which is in its fourth printing, and continues to teach finance courses at Notre Dame family who will be receiving his Ph.D. from the University of Michigan.

Although Jennings’ visit comes between semesters for Notre Dame, Tidrick said that anyone interested from the Notre Dame family who will be in the area on May 24 would be welcome.
LETTERS

Student network seeks to eradicate apartheid

Dear Editor:

As a co-corporator of the Notre Dame Anti-Apartheid Network, I would like to clarify the purpose of the Notre Dame chapter. Unlike Amy Eckert's claim in her May 3 letter to the editor, our goal goes beyond asking the University of Notre Dame to divest from its holdings in companies operating in South Africa. We do believe "Apartheid to be morally wrong," and we do "feel investing in a nation which practices apartheid is morally wrong and inherently contradictory to Notre Dame's values," however, if the University of Notre Dame divests tomorrow we will still be here. As long as South Africa practices a system of apartheid, we will be here.

Our main goal is to end apartheid. Divestment and disinvestment are simply tools that we believe should be used toward that end. Awareness of the plight of four-fifths of all South Africans is the first step towards dismantling apartheid. Apartheid Awareness Week was a very positive step towards educating the people of Notre Dame. Yes, there are many other issues that need to be discussed, and the network supports raising awareness in general.

Fundraiser makes tuition increase superfluous

Dear Editor:

Currently the fundraiser, "Notre Dame: A Strategic Moment," has collected $339.7 million. The bulk of the funding is supposed going to help improve the undergraduate program through greater endowments of scholarships. This is great news - Notre Dame is moving ahead. Also moving ahead, however, is the rise of tuition - to the tune of 9.6 percent for the 1989-90 school year. Of course, in comparison to Notre Dame's Catholic institutional counterparts throughout the United States, Notre Dame ranks 29 out of 35 in tuition price.

Why does Notre Dame need to raise its tuition just because "other Catholic universities' tutions are even higher?" $339.7 million is a great sum of money, especially when considering that the figure is likely to accelerate substantially throughout the year and a half remaining for the fundraiser. We are told that the fundraising from "A Strategic Moment" will aid the Institute for Pastoral Social Ministry, the university's graduate program, endowed professorships, the upgrading of various physical facilities, and the mission to establish Notre Dame as a great research university. Where will the money raised by next year's tuition hike go? From the looks of it all, Notre Dame seems to be asking for what it doesn't need.

Misleading report perpetuates myths about rape

Dear Editor:

In response to the May 3 article "Security shows major crimes down in '88-89" by Kelly Tuthill:

Where is the logic in finding relief in that "there has been no campus rape reported in three years?" Has not an incredible leap in assumption been made by Rex Rakow, director of security, in deeming '88-89 a "good school year" on the premise that no news is good news?

The under-reporting of rape and related sexual offenses in a nation-wide dilemma. The latest report is that assaults affect one out of four female college students. The network supports raising awareness in general.

Reflections on the effectiveness of the year of diversity

CINDY PETRITES  
Assistant Writer

If 1980-81 has been a year of events, then surely this has been the event of the year. More than the Miami Game, the 1988 Presidential election, the Olympic Games, the Evening Sports Illustrated controversy, the Year of Cultural Diversity has been an event ranging from the 1988 Presidential election year at Notre Dame, touching the lives of its students, faculty, administration and alumni in areas from academia to entertainment.

"It has been a great success," said Notre Dame university president, Father Edward 'Moek' Malloy. "It went beyond what we'd envisioned when we undertook the project." Part of the plan was the creation of The Year of Cultural Diversity theme to create and run a series of ongoing programs. The Year of Cultural Diversity was originally the product of a Special Committee on Minority Students appointed by the Provost in 1986 to advise on strategies for enhancing all aspects of the presence of minority undergraduate and graduate students.

After University officials submitted this report last May, Malloy responded with a comprehensive plan designed "to create a minority community enriched by increased minority presence among students, faculty and administration." Part of the plan was the creation of The Year of Cultural Diversity with its goal: "to raise the level of consciousness of all members of our Notre Dame community to the importance of minorities in American life and culture," through a series of ongoing pastoral, academic and social programs.

Empowered by university funds, Associate Administrator Father Oliver Williams, faculty, staff and students made up a committee on The Year of Cultural Diversity and organized a list of 79 speakers and events that defined the performance of the Ballet Folklorico And y Oro to celebrate Mexican Independance Day, to the Hispanic Show this time of the Purdue football game, to the weeklong Aeta-sponsored seminar on Strength through Diversity.

"The two single most important aspects of the year were, first, the wide variety of speakers, programs, events and activities that were offered and, second, the fact that we began the process showing how greater diversity in the make-up of the student body and faculty could contribute to the quality of education here at Notre Dame," remarked Malloy. Other highlights of the year included the Miriam Makeba and Hugh Masekela concert which attracted more than 2,000 students to listen to the South African singer and trumpeter. Another particularly successful event was the evening of prayer and song with Sister Thea Bowman in Knot Hall chapel entitled, "Black Spirituality: We've Come This Far By Faith." Through this program, according to Father Malloy, "many students came to appreciate black spirituality in a way they never knew otherwise." Maria Fuentes and Robert Bartolo, members of the Student Planning Committee, thought the Cultural Diversity Forum at Theodore's on the theme, "Cultural Diversity: Past, Present, and Future," was particularly successful. "A lot of things were aired out and more discussion was opened up," Fuentes observed.

Another highlight in the year was the Night of Spirituals held at Sacred Heart Church in which the Notre Dame Glee Club, Chorale, Folk Choir and Spiritus joined in the required curriculum to each other. Not only did the class encourage cultural diversity through the choice of topics, but also in the spontaneous response of students in the class to each other. "There is no better way to encourage diversity than to become friends," Malloy said.

Increasing awareness through friendship is one area where clubs came into play in the Year of Cultural Diversity. Though many of the clubs organized activities independently, several were encouraged by the Year of Cultural Diversity theme to increase the number of activities they held. Said Japan Club co-president Todd Tilton, "This year we have been more active than we've ever been." International Student Organization president Peter Pacheco also felt that publicizing this year as the Year of Cultural Diversity made it easier for the clubs to reach larger numbers of the Notre Dame population. "We've made a lot of people stand back and realize that their way of doing things is not the only way.

Durgens also felt that introducing multiculturalism into the required curriculum would be an effective way to increase awareness on a broad scale. "To hit a lot of people, you have to hit the curriculum," Durgens remarked.

One academic aspect of the Year of Cultural Diversity pursued by some professors was the introduction of themes of cultural diversity into the Freshman Seminar classes. Malloy, who himself taught two sections of Freshman Seminar on the topics of cultural and religious diversity, found that students responded well to the topics introduced. Not only did the class encourage cultural diversity through the choice of topics, but also in the spontaneous response of students in the class to each other.

"There is no better way to encourage diversity than to become friends," Malloy said.

Increasing awareness through diversity is one area where clubs came into play in the Year of Cultural Diversity. Though many of the clubs organized activities independently, several were encouraged by the Year of Cultural Diversity theme to increase the number of activities they held. Said Japan Club co-president Todd Tilton, "This year we have been more active than we've ever been." International Student Organization president Peter Pacheco also felt that publicizing this year as the Year of Cultural Diversity made it easier for the clubs to reach larger numbers of the Notre Dame population. "We've made a lot of people stand back and realize that their way of doing things is not the only way.

Though the Year of Cultural Diversity is drawing to a close, club members and other students, faculty and administration will continue the ongoing struggle of increasing awareness and appreciation of the minority student population. The Administration will continue raising funds, giving priority to minority recruitment of faculty and students, and according to Williams, will appoint an ongoing committee to monitor progress toward multiculturalism goals. "The Year of Cultural Diversity was an important step forward," said Williams, "but many remain to be taken."
ABOVE The golden dome received a new coat of gold leaf over the summer. Students returned to campus in August with the scaffolding still up, but it was down before too long.

BELOW The interior and exterior of Sacred Heart Church received a facelift. Here, two workers replace a part of the stained glass which was cleaned to brighten it.

BELOW RIGHT The trees on campus show off the colors of fall. The natural beauty of the campus provided the perfect backdrop for home football games.
The Marine Corps took a group of Notre Dame students flying over campus in the spring.

Notre Dame won its 8th national championship in football. The victory over West Virginia 34-21 in the Fiesta Bowl capped off an undefeated season, which included victory's over USC, Michigan and Miami.

Then-Vice President George Bush visited campus less than one week before his victory over Gov. Michael Dukakis in the presidential election. In his speech in Stepan Center, Bush highlighted the "great divide" between himself and his opponent.
Notre Dame student will visit Tutu in May

JOE BUCOLO
Assistant Writer

Sarahl Voigt
Assistant Writer

Many students read articles and editorials that analyze the just and moral outrage through discussions and demonstrations on campus. Student will take his curiosity about the apartheid movement and his concern for the black South Africans one step further this summer.

Mike Schadek, a junior from Grace Hall, will experience the ramifications of apartheid as he spends two weeks working with Archbishop Tutu.

How did Schadek get invited to the court of an individual that the South African government despises for his non-violent assault against apartheid? The answer is simple. Schadek wrote a one page letter to the archbishop expressing his desire to learn more about apartheid.

Schadek wrote the letter completely on his own initiative. He explains, "I wanted to go one step beyond reading and being informed. The letter was an attempt to do that."

He continues, "I wanted to speak to him (Archbishop Tutu) about his views on sanctions. As a church representative he’s been a very effective spokesperson for non-violent means to end apartheid."

What does Schadek hope to gain from his brief two week stay in South Africa? "I hope to become a more effective advocate and spokesperson for divestment."

Schadek, a regular Viewpoint columnist and the chairperson for the College Democrats, hopes to share his first hand experience with apartheid with other students when he gets back to campus next fall.

"The topic of apartheid, unfortunately is somewhat like a fad. It is only periodically in the news so people are only occasionally confronted with the situation in South Africa. However, it is one of the great tragedies of our time because its evils go on every day." How did Schadek make the travel arrangements to visit one of the most politically volatile countries in the world? That answer is a little more complicated. Schadek applied for a Visa so that he could go to South Africa in March of 1988. His Visa was denied without explanation.

When Schadek was in London last semester he reapplied for a Visa through the South African Embassy in London. When he still had not received his Visa last month he almost gave up hope.

"Then I opened my mailbox two weeks ago and the Visa was there. I couldn’t believe it," said Schadek.

"I assume that I had so much trouble because the South African government finds it suspicious that an American student wants to spend time with Archbishop Tutu."

The Administration, Grace Hall, Student Government, and the Office of Campus Ministry all contributed money to pay for Schadek’s $1600 airfare. “The fact that these groups have sponsored me in this venture says a lot about our campus. They have helped me follow through on this opportunity of a lifetime."
For God, country and Notre Dame?

Unless you say it fast, the phrase, "God, Country, and Notre Dame," seems to end anti-climactically. It's as though you were to say, "The Father, the Son, and John Paul II"—the Pope would be the first to tell you he doesn't belong in a lineup with the Persons of the Trinity. To the disgust of his critics, the loyal Donor will declare his allegiance to his Alma Mater as though it were one of the circling stars he must set his course by as he starts out on the journey lasting a lifetime in the direction, he hopes, of the Enchanted Isles.

In the direction, he hopes, of the journey lasting a lifetime clinging stars he must set his sights on the distant horizons he envisions to his Alma Mater as the Enchanted Isles.

You could define human beings as creatures endowed with a matchless capacity for infinite wonder. Man must have held his breath in the presence of this unspoiled continent. But was unspoiled America, the new Eden, really "the last and greatest of all human dreams?" Finding that he had no more worlds left to conquer, no new frontiers to reach, didn't man set his sights on the distant galaxies, which he hopes to explore as a space-traveller? Following the pathway of the sun in its westward course, adventurers have explored the planet until they finally overtook the sun rising out of the east to begin its new day.

So, in further search for adventure, they began the excursions to the tops of high mountains, and to the floors of the seven seas. Curiosity will always keep human beings restless to become sight-seers discovering the worlds that lie on the far side of the visible universe, looking for something commensurate to their capacity to wonder.

Is there nothing wonderful about God, country, or Notre Dame? To find out that there is wouldn't surprise me, though you may feel I'm flying off toward a different orbit when I say that the great adventure of them all is love—and love songs, you may have noticed, are often extraverent with imagery borrowed from the astonishing things man has seen as a hitchhiker in the cosmos.

It's not easy to write poetry without rhyme, or play tennis without a net. It's not possible to be a lover moping by yourself in a vacuum. That's why we need a religion, a country, and an affiliation to a community like a club, lodge, or school.

The Church, which serves as a frame to the portrait of the Artist as a young God, enjoys only a reflected glory, which Christ confers upon it, to give it dignity and authenticity. But as Faulkner wrote, at the dingdong of doom, mankind will prevail, and Kilroy will be there, and the Church will be there after him, to read the Gospel at Kilroy's funeral.

I'm sorry for the Church's sins, politics, tunnel-vision, and foot-dragging, and for the flawed humanity of its leaders. The Church and its human element are in constant need for forgiveness from God and man alike, but would not the world be poorer without the Church's kind of truth? Oddly enough the Church often gives us the truth we use when we set out to prove that the Church is wrong. Doesn't the Church bring sinners in need of redemption face to face with something commensurate with their capacity for love?

Doesn't this country of ours bring Americans face to face with something commensurate with their capacity of hope? Maybe it's hard—if you're the member of a minority group—to believe in hope. The poverty among us is a scandal, and the drugs are a tragedy, but we have an American dream, and hope is the thing dreams are made of. "I hear America singing, the varied carols I hear," wrote Whitman.

Even when Lincoln died, the "sweetest, wisest soul of all my days and land," the carols continued: "I saw the battle corpses... and the white skeletons of young men... the debris of all the slain soldiers of the war... The living remain'd and suffer'd... and the mother suffer'd... And the child..." During the Vietnam era, I used to read this Civil War poem, and understood it as an elegy, and not as a dirge for a country whose dream has died.

Notre Dame's miracle is not a miracle that Sorin, Rockne, or the C.S.C.'s can take credit for. What good would the halls of ivy be if it were not for the students coming here like an army every year, from homes where love does not hide its face, and faith in God is alive and strong? Notre Dame is the miracle that Sorin, Rockne, and the rest are in debt for, to parents who cared enough to give their kids the very best.

Students come here to live and learn with other students as privileged and blessed as themselves. In the exchange of friendships that goes on, they learn to have faith in themselves and in their own kind of goodness. Notre Dame is far from perfect, but students remember it as a kinder, gentler place than the real world is, where the prevailing law is the survival of the fittest.

God, country, and Notre Dame isn't suitable only as a cheer at a pep rally, though the cynics may tell you that. Don't feel brain-washed if the mention of God, country, and Notre Dame suits together your mind like faith, hope, and love. Don't feel that if you've wasted your youth, if you leave here believing faith, hope, and love are a tragedy, you've wasted the greatest lessons taught at Notre Dame; and that of these three, love is the greatest.

Father Robert Griffin

The conference. That does not mean that the Irish will be seeded first in the playoffs, however, as they are currently in second place in the East. Notre Dame Head Coach Pat Murphy claims his troops will beat Detroit in the clutch, and that prediction will come to fruition this weekend when the Irish play four games against the Titans at Detroit. Last time the two teams met at Coveleski, the Titans took three of four from the Irish. The Irish lead the MCC in both hitting and pitching. Detroit and Evansville are both 37 points off the pace of Notre Dame’s 326 team batting average, and no team comes close to the 2.32 ERA team of the Irish.

ND leads MCC honor roll

Irish baseball hosts tourney

ND tries to earn first berth in NCAA playoffs since 1970

By SCOTT BRUTOCOA

Sports Writer

Not many people will say that the Midwestern Collegiate Conference is the cream of the collegiate baseball crop, but certain MCC players have been catching national attention recently. There is Evansville’s Andy Benes, the number-one pick last year in last June’s draft. Benes, pitching for San Diego’s class AA affiliate in Wichita, Kan., has four wins and a 2.64 ERA with 55 strikeouts in the early going of his first minor league season.

Then there is Notre Dame’s Dan Pellier, who will be drafted this June. Pellier has a .436 batting average and must decide whether or not to skip his senior year at Notre Dame and pursue a professional career one year early.

There are other notables.

Brewers stop Twins as Viola takes another loss

Associated Press

MINNEAPOLIS—Winless Frank Viola suffered his fifth consecutive setback as the Milwaukee Brewers beat the slumping Minnesota Twins 3-2 Thursday night on RBI singles by Gary Sheffield and Robin Yount and Dan Plesac took over for his Cy Young Award winner when he was lifted Thursday morning.

Viola, last year's American League Cy Young Award winner when he was 24-7 with a 2.64 ERA, allowed eight hits and lowered his ERA to 4.84. He suffered his fifth consecutive set-back of the season as the Brewers beat the Minnesota its 11th loss in 12 games.

New York Mets 3, Reds 2

Cubs 4, Padres 0

Mets, 3, Reds 2

NEW YORK—Howard Johnson homered off reliever Rob Dibble with one out in the 10th inning Thursday night, leading New York past Cincinnati 3-2 for the Mets' ninth victory in their last 11 games.

Dibble, 3-1, replaced Norm Charlton to start the 10th, struck out Mookie Wilson and then allowed Johnson's fifth home run of the season, a drive over the rightfield wall.

It was the first loss for the Reds in five extra-inning games and the first victory for New York in three this season.

Astros 5, Expos 4

MONTREAL—Bill Doran hit a home run with one out in the 10th inning to give the Houston Astros a 5-4 victory over the Montreal Expos on Thursday night.

Reliever Joe Hesketh, 3-1, struck out Rafael Ramirez to start the 10th, but Doran hit a 3-2 pitch into the left-field bleachers.

It continued a rough week for Hesketh, who allowed nine runs in 1 2-3 innings in his previous outing against the Reds Monday night.

Danny Darwin, 3-1, who pitched scoreless ninth, got the victory and Dave Smith retired the side in the 10th scoreless ninth, got the victory and Dave Smith retired the side in the 10th.

Angels 3, Blue Jays 2

TORONTO—Lance Parrish led off the 10th inning with a double and eventually scored on Dave Bichette's sacrifice fly as the California Angels rallied to defeat the Toronto Blue Jays 3-2 Thursday night.

Toronto's Junior Felix became the 53rd player in major league history to hit a home run in his first at-bat with a third-inning shot off Kirk McCaskill.

Tampa Bay Rays 3, Chicago Cubs 2

Kline
continued from page 24
long ball?"

Kline replied, "I guess he could, son. It was that little
gle tered how does that guy stay
round one that gave him trou­
ble." At this point, Kline was far
from retirement. He had quite
a battle with the University in
trying to keep the baseball pro­
gram alive. After the glory
years in the 1950s, the Irish
advanced to NCAA post-season
play only twice in the following
decade. One of the few high
points of that period came with
Kline's induction into the Col­
ge Baseball Hall of Fame.

continued from page 24

"He took his books on every
road trip," said Lennon. "You
always had kind of an aca­
demic atmosphere around the
bus."

"I could hit fungoes up until
I was 80," said Kline. "I felt
good, and I was in shape then.
These 90s are pretty tough."

Kline injured his hand at last
October's Notre Dame-Miami
exhibition baseball game, when he fell down the stairs at South Bend's new Coveleski
Stadium. Kline prefers to talk
about how the Irish beat the
powerful Miami team.

"I thought they were going
to get licked," said Kline. "This
Pat Murphy is doing a great
job."

But it's not quite the same
without the crusty veteran
pitcher hitting pre-game infield
practice.

"They're what kept me here.
They went to bat for me." Kline
managed to coach the
Irish for five more seasons,
which consisted of few high­
lights for his mediocre 1980s
teams but several milestones
for the coach.

In 1972, Kline became only
the sixth collegiate coach to
win 500 games. Four of the five
previous coaches to reach that
plateau had worked in Arizona
or California, where the teams
played 50-game schedules as
opposed to Notre Dame's 30
or 30-game slates.

"I've never taken anything
seriously in my life except for
the kids," Kline said as his
career neared an end.

"They're what kept me here.
It wasn't the lure of gold. A lot
of friends take the (m of
poverty. Well, I did too, only I
was allowed to wear a
necktie."

Notre Dame honored the
former coach and professor
with a "Jake Kline Day" on
May 6, 1976, the year after Tom
Kelly finally replaced Kline as
the Irish baseball coach. On
that day, the University
renamed the old Carter Field
as "Jake Kline Field," marking
the first time that Notre Dame
had named an athletic complex
after a living person.

Kline continues to follow the
Notre Dame Athletic Depart­
ment and regularly attends the
baseball team's annual alumni
game, but age finally is taking
its toll. Kline wears a hearing
aid and uses a walker to move
around. The apartment he
shares with his wife— the
former Edith Mae Hamilton.
They will celebrate their 65th
anniversary in June.

If Kline had coached just a
few more years, his prediction
may have come true. Rev. Ed­
ward "Moose" Krause, who con­
sistently scored in the 90s on
Kline's quizzes, became Uni­
versity president in 1987.

Kline kept his position with
the math department until
1979. At 75, he decided to con­
centrate solely on baseball.

"A lot of professors wundered
how does that guy stay
around," said Kline. "You're
supposed to retire when you're
60 or 65."

"The kids," Kline said as his
seriously in my life except for
the kids," Kline said as his
seriously in my life except for
the kids," Kline said as his
seriously in my life except for
the kids," Kline said as his

Markezich set on NCAA title
ND track team will stay busy long after school year ends

By KEN TYSIAC
Sports Writer

A single runner will cross the finish line at Brigham Young University ahead of the pack in the 10,000 meters June 2 to claim an NCAA championship.

Ron Markezich hopes to be the athlete who makes that dream come true. Earlier this year in Tennessee, Markezich set the Notre Dame record in the 10,000, finishing with a time of 28:44. That time is faster than last year's winning time in the NCAA's.

"Ron has as good a shot (to win this race) as anybody in the country," says Irish track coach Joe Piane. "Ronny is very fit, and winning the NCAA championship is his goal."

Ron's main competition will come from defending champion John Schere of Michigan and Harry Green of Texas, who has run an even better time this year. Schere is a lot faster than Markezich. The Irish star is not at all intimidated by these opponents, and has formed a plan for success.

"I plan to go out in the first half of the race and stay with everyone in the pack," said Markezich. "Later on in the race I'll just start hammering, and I'll try to drop some people."

The NCAAs will culminate a very rewarding season for the Notre Dame track team, which will be very busy in the next few weeks. The Irish will travel to Indianapolis this weekend for the National Invitational meet, kicking off a hectic month of May.

This meet will be on the campus of Indiana University ahead of the pack in the 10,000 meters June 2 to claim an NCAA championship. So far, Markezich is the only Notre Dame athlete to qualify, but a 110-meter hurdler by the name of Glenn Watson would like to join Ron on the trip to BYU.

"I need to run the perfect race," Watson said about his chances of qualifying. "I need to run against good competition, have good weather and not make any mistakes."

An excellent opportunity for the perfect race will come this Saturday in Indianapolis, which boasts one of the fastest tracks in the country.

ND softball ends year at 31-23

By MARY GARINO
Sports Writer

The Notre Dame softball team ended its first varsity season. The Irish scored the most home runs of any team in the nation.

Earlier in the season, the Crusaders and the Irish had split a pair of one-run games, so yesterday's contest promised to be close. It lived up to that billing, as Valpo won by a 3-2 score.

"Our kids played hard up to the final out," said Irish coach Brian Boulais. "We had some uncomfortable moments, but we couldn't capitalize on all of them. We're disappointed to lose 3-2, but we couldn't capitalize on all of them. We're competitive with them."

Valpo pitcher Lori Pajakowski outdueled Notre Dame's Missy Linn to take her second victory over the Irish this season. The last time Linn and Pajakowski faced each other, Linn was scoreless for seven innings until the Crusaders scored a run off Linn in the bottom of the eighth. Pajakowski got on the scoreboards first Thursday with two runs, three hits and a walk of the fourth inning. The Irish fought back with a run of their own in the seventh.

ND baseball looks to Detroit after tie with 'Cats

After playing seven innings on a muddy Northwestern field, the Notre Dame baseball team settled for a 5-5 tie with the Wildcats on Thursday. Notre Dame (27-13-1) scored first with a three-run fourth inning. Irish pitcher Joe Binkiewicz, in his first start of the year, threw three shutout innings.

However, the Irish still led 5-2 before Northwestern (19-25-1) rallied for three runs off Notre Dame reliever Tony Livorsi in the seventh.

Now the Irish will be looking to close out the regular season with strong showings against Dayton and Dayton.

The team has eight remaining games, all with MCC East teams. This weekend, the Irish are at Detroit for two doubleheaders, and next weekend (May 13-14) the team will close out the regular season with four games against Dayton at Jake Kline Field.

By the regular season comes post-season play, and the Irish will play host to the MCC tournament. All games will be played at the stadium during the period of May 17-20, and the winner of the tournament receives an automatic bid to the NCAA tournament.

ND baseball looks to Detroit after tie with 'Cats

Editor's Note: This is the last of a two-part series on Kline's baseball career.

Jake Kline, who coached the Notre Dame baseball team from 1970 to 1975.

Jake Kline enjoyed the most success in his coaching career during the 1970s, which saw the Irish become regular participants in the NCAA playoffs.

Beginning in 1966, Notre Dame advanced to the NCAA's for five consecutive seasons. The first game Notre Dame went to the College World Series in Omaha, Neb., in 1967, placing fourth in the nation.

"We always played the top teams," said Chuck Lennon, who worked with Kline as a player and assistant coach. "Yet Jake Kline consistently won with two scholarships.

March of that was due to Kline's keen eye for talent. His ability to see athletic potential helped Kline decide which athletes playing football or basketball for Notre Dame might make good baseball players.
