Outbreak feared
Measles revaccination advised

By SARA MARLEY
Senior Staff Reporter

Fears that a measles out­break similar to those in Chicago areas have been epidemic areas for several years, but this time it is much closer to home," said Carol Seager, director of University Health Services at the University of Notre Dame.

Chicago authorities began a door-to-door immunization project after deaths from the disease in the past several weeks.

Nearly 10 percent of the fresh­men class of 1988-89 came from Illinois, the highest number from any state. Those students are not yet available for this freshman class.

Eight percent of the freshmen in 1988 came from Indiana, which ranked second. Both groups traditionally rank among the top five home states of Notre Dame students.

Saint Mary's College sent a letter to all students after classes ended last spring urging them to check on their vacc­ination status before returning to school, according to Malloy's review of the April meeting of the congress appeared in the June 10 issue of the Catholic weekly, America. In the review, Malloy wrote that he expected the new draft to be substantially changed as a result of the April meeting.

Among those recommenda­tions were proposals that the document be more "positive, in­spirational and future-oriented," and that the "full autonomy" and "freedom of re­search and teaching" of Catholic universities be clearly affirmed.

Malloy will now review the new draft and then return to Rome in September to meet with the congregation. The 

The congregation hopes to consider a final draft of the document in October. The congregation will then present the document to Pope John Paul II, who is ultimately expected to issue the document as an "apostolic constitution," a form of papal lawmaking.

On August 24, Malloy was named to yet another commit­tee as Indiana Governor Evan Bayh chose him to serve on the steering committee of the Governor's Committee for a Drug-Free Indiana.

Elkhart, Ind. Mayor James Perron and 12 others will join Malloy and others on the commission that will meet in Elkhart.

The beginning of the summer

Malloy helps plan for a Notre Dame in Australia

By JOHN O'BRIEN

Malloy spent much of the summer attending to important matters.

Besides addressing commis­sion on Catholic education, or the way that science and technology are applied," according to Notre Dame economist, Stephen Saunders.

"Steve Saunders was just a wonderful, wonderful kid," said Father Thomas King, rector of Cavanaugh Hall.

"When I got to the hospital, Roach said, "the doctors had Steve listening to the Notre Dame Glee Club's 'Shake Down the Thunder' tape on a headset; they were trying to stimulate his brain. We all thought he was going to pull through; we were joking around, telling him about the Cubs."

"Steve Saunders was just a wonderful, wonderful kid," said King. "He was a tremendous student and always available to pitch in and help out around the new dorms," said Saunders' roommate, Brian Roach.

"Steve Saunders was just a wonderful, wonderful kid," said King. "He was a tremendous student and always available to pitch in and help out around the new dorms," said Saunders' roommate, Brian Roach.

Reports of Saunders' condition initially were optimistic, according to Notre Dame sophomore Shannon Roach, a friend of Saunders who visited him in the hospital.

At beginning or end, ND is a worthwhile experience.

"Gather ye rosebuds while ye may." This year is the beginning of the end for every student at Notre Dame and Saint Mary's. Eight and a half months from now, freshmen will have moved up and seniors will have moved on. It's funny that college students spend more time outside class than in. It doesn't make sense. Students go to school for four years to spend about a week in the classroom.

Fortunately, there's more to college life than lectures and labs five days a week and exams at the semester's end. There are parties, pep rallies and football games. There are rainy days and sunny days. There are Mondays and Fridays. There are mistakes to make and roadtrips to take. Every day is an opportunity to correct yesterday's mistakes.

College is where one learns how to live. The knowledge that life requires doesn't come from a textbook; it comes from living - and learning. A scholar's ability to handle success is tempered by his experience with failure. As anyone who witnessed the Notre Dame-Miami game last year can attest, victory is never sweeter than when it follows a bitter loss. Along the way, however, doubt can confound the plans. The shadow of uncertainty follows freshmen to college, it will fade as the freshmen become seniors, but comes back by graduation. After graduation, life won't be as nice as it was under the Dome. There are no idyllic quadrangles in the asphalt jungle. The confines suddenly aren't as friendly anymore.

Knowing this makes leaving very hard. The parting of friends at commencement is sad because it's an end. But it's also the beginning of a new phase, a new life. Life goes on; the sun will set and rise just as it always has. "Why should I care?" the student asks. I can help freshmen through the next four years, the same approach will get seniors through the next 40. Didn't that get them to this point?

Perhaps that's why parents believe in investing $50,000 in their son's or daughter's future. College isn't a waste of time, it's a way to get more out of time.

Everyone has heard that college years pass quickly. That's true. Four years is only a fraction of the average lifetime. Days only come one at a time. It's pointless to try to live otherwise. So, one should be careful to enjoy each day and make it one to remember. Appreciate the walk down the primrose path, and gather the rosebuds while they're still in bloom. But watch out for the thorns. It's funny that college students spend more money outside class than in. It doesn't make sense. Students go to school for four years to spend about a week in the classroom.

Here's what our satisfied subscribers are saying about us:

"We all enjoy reading The Observer throughout the school year. No other communication from the University keeps us as informed on a real current basis."

"The Observer keeps our family in St. Louis in touch with the daily world that our son is in on campus. It was impressive to see the eagerness with which ND students read The Observer at lunch."

"You continue to publish an excellent paper. As one who comes to campus twice a year to teach, it keeps me in touch with my audience."

"The Observer was a wonderful addition to our family last year and it kept us up-to-date on all the exciting events on campus. Thanks for doing such a fine job!"

"We love the sports coverage!"

Keep up with the Notre Dame/Saint Mary's community with an Observer subscription.

For $25 per semester or $40 per year you can be up-to-date on all the current news, sports, and issues affecting the Notre Dame and Saint Mary's communities. Send a check to The Observer, P.O. Box Q, Notre Dame, Indiana, 46556.
Construction gives campus a new look
By KELLEY TUTHILL
Senior Staff Reporter

Construction around campus is progressing on schedule and in some cases ahead of schedule.

Donald Dedrick, director of the physical plant, said the top priority right now is the completion of the new wing of Nieuwland Science Hall in time for classes next week. He said he would like classes to be conducted in the building with minimal disruptions.

The construction of the new $33 million DeBartolo quad, band building and ROTC building are underway, and interior restoration is taking place in Sacred Heart Church.

Construction crews are working on the underground utilities for the new DeBartolo quad located between Notre Dame Avenue and the stadium.

The steam tunnel to the Hesburgh Institute for International Peace Studies is under construction. Dedrick said the tunnel will eventually serve the new Edward J. DeBartolo Classroom Facility and any other buildings in the quad.

A tunnel containing storm and sanitary sewers, electric, telephone and computer capabilities was completed and sealed.

The foundation for the Hesburgh Institute was laid and the basement walls have been poured, according to Dedrick.

Two floors in the new ROTC building have been poured and presently the attic floor is being poured, said Dedrick. Some exterior masonry work has begun. This building is being built east of Juniper Road.

The band building, located next to the ROTC building, is almost enclosed, said Dedrick. He said that the construction is ahead of schedule. A storm sewer is being installed under Juniper Road that will take the rain water from the new quad to the St. Joseph’s Lake. The area in front of the Computing Center/ Mathematics Building was excavated to enable the construction of this tunnel.

Interior refurbishing continues in Sacred Heart Church, said Dedrick. The pews have been removed and scaffolding is in place inside. A new lighting and sound system will be installed. Dedrick added that the church will not be used this year.

Additional construction lies in the University’s future. Work on the Edward J. DeBartolo Classroom Facility will begin next year, Dedrick said.

For the second year in a row, no Notre Dame freshmen are being housed in temporary housing, according to the Office of Student Residences.

Last year, Director of Student Residences Evelyn Reinebold attributed this to the decision to keep Holy Cross Hall open and only a slight increase in class size.

Reinebold could not be reached for comment, but a spokesman for the Office of Student Residences confirmed that no freshmen are living in study lounges.

In 1987-88, the last year to have freshmen in temporary housing, 111 freshmen spent either part or all of their year in study lounges in Planner, Grace, Pasquerilla East, and Pasquerilla West.

According to Minni Owens, coordinator of housing for Saint Mary’s College, 9 freshmen are being housed in temporary housing.

"The rooms that these students are in, however," said Owens, "were built especially for temporary housing and are actually quite nice."
Indiana schools face immunization decision

Associated Press

HAMMOND, Ind. — Health workers will begin vaccinating Lake County schoolchildren against measles as soon as the Indiana Department of Health chooses which school to hit first, officials said Monday.

Nick Doffin, Lake County Health Department administrative assistant, said his office is working with state health officials to identify which schools have the greatest need.

"They need to know how many kids are in each school and the past history of each school," he said.

He could not estimate when the program would begin.

Because of the number of confirmed cases in Lake County, students there will be immunized before those in Porter County. To date, 43 cases have been confirmed in Lake County, with no confirmed or suspected cases in Porter County, according to health officials.

An official with the Indiana Board of Health was optimistic that the program would start soon.

"We're hoping to begin later this week," said spokesman David McCarty, "but it's too early to make a prediction."

Local health departments have expanded their clinic hours to handle the number of people coming in with pre-kindergarten children.

Health workers at the county level and in the three local offices in Hammond, East Chicago and Gary — administered measles vaccines to about 1,400 people over the weekend in a door-to-door campaign to residents of low-income housing projects, and at their offices.

"Students can always get the vaccinations at the Health Department," Seager said.

"We anticipate that recommendations of the American College Health Service, advising anyone vaccinated prior to 1980 to be revaccinated. The University expects to immunize all international students," said spokesman David McCarty.

Smog found on Neptune

Associated Press

PASADENA, Calif. -- Neptune's icy volcanic moon Triton is the coldest body ever measured in the solar system, NASA said Monday, and the planet itself has something in common with Los Angeles' smog.

The Voyager 2 space probe also discovered auroras vaguely like Earth's northern lights, common with Los Angeles: the planet itself has something in the solar system, "the coldest body we have seen," said Roger Yelle of the University of Arizona.

Scientists believe Pluto and its moon Charon are the second-coldest bodies in the solar system.

In another finding, the best close-up photo yet of another moon, 1989 N1, showed that Neptune's second-largest moon has a huge crater about half as wide as the lumpy-looking, 240-mile-wide satellite. That indicates that a big meteorite once smashed into 1989 N1, one of six moons discovered since June by Voyager, according to Bradford Smith, the leader of Voyager's photographic imaging team.

Voyager also sent back heat measurements to help scientists find liquid lakes or oceans on Triton, but the moon almost certainly is too cold to have any liquid.

Scientists believe Pluto and its moon Charon are the second-coldest bodies in the solar system.

"We plan to continue activities such as the Iceberg Debates, while hopefully improving some services," Johnson defended the theory, advanced by other scientists Sunday, that Triton has active volcanoes that erupt nitrogen ice particles 20 miles skyward.

"It isn't a crazy idea," he said. "It isn't a crazy idea."
Assistant U.S. Attorney Robert Stanley Powell said dur­

ing opening arguments evidence would show that Conrad, a technical engineer at Ferraloy, helped Hubbard make the bombs and that tools used to make the bombs belonged to Conrad.

"Four tools that were posi­tively identified came from that man's workshop, came from his house," Powell said, point­ing toward Conrad.

Powell said the evidence would show that Conrad ini­tially told federal agents he was not involved with the bomb in­

cident, but later told investiga­tors he had instructed Hubbard in how to make the devices.

"We can show proof beyond a rea­sonable doubt that Gerald Conrad is guilty of all 29 counts," Powell said.

Powell cautioned that much of the government's case was based on circumstantial ev­i­

dence.

"Don't expect somebody to come up and say they saw them making the devices," Powell said. "The nature of this type of crime is that people do these things in private. Jerry Conrad was part of a conspiracy to blow up Salem."

"Hubbard is scheduled to be tried when Conrad's case ends. Defense attorney Michael McDaniel of New Albany de­scribed Conrad as an honest, law-abiding citizen.

"He's the kind of person who was brought up to be respectful of law and order. He's never been in trouble with the law in his life," McDaniel said.

McDaniel said that Conrad, when he takes the stand later this week, will not dispute the fact that he told Hubbard vari­o­us things about making bombs. However, he will deny any involvement in a plot to blow up Salem.

"The evidence will show he knew how to make bombs," McDaniel said. "He is a sur­

vivalist. He wants to be self-sufficient in the event of a nu­

clear war. He wants to be able to sustain himself, his family."

In vitro baby reunion encourages parents

Associated Press

LOUISVILLE, Ky.--Although in vitro babies are no different than other infants, the effort and hope that precedes them makes them special, say par­
ents of the 21 children who gathered for their first "reunion" at a Louisville hospi­tal.

"Any one who can be encour­aged to do this needs to be en­

The children -- including the twins and one set of triplets -- who gathered at the hospital with their parents Sunday owe the existence of the new program.

"It's as normal as anybody else, but there's something spe­

cial about her," said Janice Estep of Clarksville, Ind., about

18-month-old Lori Marie, a blond bundle of energy in a blue tracksuit.

"I don't think they're any dif­

ferent than any other children," said Joe Smith, the twins' father.

"They're into everything, just like any other children. They just got here a little different.

That was the wonder of it all to Dr. Martin Vassan, direc­

tor of infertility pro­

grams.

The reunion session came a little more than 2 1/2 years after Louisville's first in-vitro babies - triplets - were born to Beverly and James Richardson of Louisville on Feb. 5, 1987.

The Richardson's were the first infants in the area to be born after being conceived "in vitro"; the associate professor's mother's eggs are combined with the father's sperm in a laboratory dish and then im­

planted in the mother's uterus, where the embryos develop normally.

Buttigieg, English; Alfred Redford, philosophy; David MacVittie, organization science; Robert Goets Jr., biological sciences; Douglas Kinsey, art, art history and design; Bill McDonald, finance and business economics; Patrick McManus, marketing; William Nichols, accountancy; J. Samuel John, sociology, John Van Engen, eng­

gineering and plant biology; J. Robert Wegs, accountancy.

New associate professors with tenure, previously asso­

ciate professors, are Kathleen Biddick, history; Jacqueline Brogan, English; Kevin Christiano, sociology, Angel Delgado-Gomez, modern and classical languages; Ken Emery Jr., Program of Liberal Liberal Arts; Frank Fraser Jr., biological sciences; Patrick Gaffney, anthropology; Jennifer Johnson, political science; Frank Kleuch, English; Vicki Martin, biological sciences; Martin McShane, chemistry; Maria Roberts, chemistry; Karen Rosen-Olivera, mathematics; John Rivera, accountancy, and John Wolfe, modern and classical languages.

Associate professors receiv­

ing tenure include: Craig Adcock, art, art history and de­

sign; Richard Rosewell, less­

school; Christopher Fox, English; and Mihir Sen, aerospace and mechanical engineering.

Saint Mary's promoted four faculty members to associate professor: Gerald Massengill, modern languages; Donald Milne, mathematics; John Shimners, humanistic studies; and Douglas Taylor, art.

Among special research fac­

ulty, Rodney Ganey in the Center for Visual Studies. Society, Stefan Klemm in physics and John Valenzuela in philosophy were promoted to associate professor.

Library faculty promotions include Michael Slinger in the Center for Contemporary Culture and Laura Fuderer in University Libraries special collections.

Special professional faculty promotions include: Richard Biddick, associate professor of art history; and Jill Lindenberg, assistant profes­sion­al in physical education.

Faculty members advanced to emeritus ranking are: Alfons Machart, associate professor of mathe­

matics; Robert Lofton, director of international studies; Robert Leader, art, art history and de­

sign; and Vincent McLaughlin in accountancy.

Edward Jerger, associate profes­sion­al in mechanical engineering; Tomoaki Asano, biological sciences; Michael Fairman, economics; and Vladeta Vuckovic, mathematics; Erwin Zeinner, Lobard Laboratory, Thomas Broden, law; and David Sparks, University Libraries.
Kermit, Miss Piggy and Henson join Disney crew

Associated Press

LAKE BUENA VISTA, Fla. (AP) - Miss Piggy and Kermit the Frog danced a jig with Mickey and Minnie Mouse as vices of their creator, Jim Henson.

The merger of the two kiddie entertainment giants will blend the colorful characters from "The Muppet Show" - the most widely seen TV program in the world with an estimated 235 million viewers in some 100 countries - into Disney's theme parks, movies, TV shows and retail merchandising products.

Henson also will create new characters for Disney. Henson and Walt Disney Co. Chairman Michael Eisner refused to disclose the purchase price, which reportedly was between $100 million and $150 million.

Big Bird, Oscar the Grouch and the Cookie Monster will be staying on "Sesame Street." Henson's creations for the children's series are not part of Disney's takeover of Henson Associates, Inc., and he'll keep working with that show.

The announcement came at the new Disney-MGM studios at Burbank.

Mickey and Minnie Mouse were performing their regular show when Miss Piggy and Kermit bounded onto the open-air stage. The four danced a jig and kissed each other on the cheek, to applause from several hundred spectators.

"I've loved Disney. I grew up on its movies... and I'm happy to have the Muppets at the parks," said the bearded Henson, who created Kermit in 1955 and followed that up with Miss Piggy, Animal, Fozzie Bear, Gonzo, Scooter, and others.

Henson and Eisner said few details have been worked out on Disney's plans for the Muppets. But work has begun on a new Muppet theater, to open next Memorial Day, featuring 3-D technology and Disney's "audioanimatronic" robots.

The Disney chairman said the acquisition would reinforce Disney's stable of personalities. "I have not discovered this in the public is getting tired of Disney characters," Eisner said.

Asked about criticism that the new Disney-MGM studios theme park did not have enough to offer children, Eisner acknowledged that the planners of the new Muppet show "will give us just a little bit more for the very little kids."

Analysts have said the park needed something to better compete with Universal Studios Florida, which will have two attractions geared to children when it opens May 1.

But Eisner and Henson publicist Susan Berry later said the Muppets would retain their family-oriented humor and not be for "adult humor." Disney's attractions are not going to change," she said.

"Miss Piggy, for instance - her humor is adult humor - is not going to change," she said.

Disney said the merger also would produce special Muppet attractions and rides for all other Disney them parks. And Disney promised an annual Muppet film and TV library, including "The Muppet Show," "Muppet Babies," and "Fraggle Rock."

Saunders

continued from page 1
dorm. He had a disarming smile and a wonderful, laid-back sense of humor... I never heard anyone in the dorm speak ill of him, and I never heard him speak ill of anyone else."

"Three things were really important to Steve: his faith, his family and his friends," said Jerry Jacobs, Saunders' roommate at Notre Dame. "The kid really had something special... it turned everyone on to him."

Saunders was valedictorian of his 1988 high school class as well as junior and senior class president and a recipient of the Daughters of the American Revolution Good Citizenship Award.

He is survived by his parents, Carl and Susan Saunders, as well as his brother, Mike, and sister, Emily.

A memorial mass for Saunders is tentatively scheduled for September 30 at 5 p.m. in the Sacred Heart Crypt. Rev. Edward Malloy is expected to preside at the service.

A Stephen B. Saunders memorial fund has been established. The money will be used to create a scholarship fund for an Iowa student who has been accepted at Notre Dame but needs financial aid. Technical information will be implemented in the fall of 1990. The fund has already exceeded $10,000.

"Steve lived his life - he lived it fully, and he lived it completely," said King. "He was just a really fine person - truly a Notre Dame man."

Malloy continued from page 1

saw Malloy deliver several speaking engagements, according to Dennis Moore, assistant director of Public Relations and Information.

He delivered commencement addresses at Gilmour Academy in Gates Mills, Ohio, Mooney High School in Rochester, N.Y., and at Carroll College, where he also received an honorary de­gree.

In June, he addressed the Alumni Association's closing dinner as well as the first annual dinner of the Black Alumni Association. He also addressed the editorial board of the Boston Globe.
PTL leader starts trial
Bakker to face 28 counts

Associated Press

CHA RLO TTE, N.C. - Jim Bakker's fraud and conspiracy trial opened Monday with a federal prosecutor accusing the TV evangelist of fleecing followers he considered "tacky" so that he could live in high style.

But Bakker's lawyer said in his opening argument that the founder of the PTL television ministry was "a creative, religious genius" who is unfairly accused.

Prosecutors say Bakker and other executives at the evangelical empire diverted for their own benefit at least $4 million of the $158 million they raised by selling "lifelong partnership" at the ministry's resort hotels.

If convicted of all 28 counts of fraud and conspiracy, Bakker could be sentenced to 120 years in prison and fined $5 million.

"Have a nice day" was all the 49-year-old evangelist said as he entered the courthouse.

Meanwhile, Bakker's wife, Tammy, carried on with their new broadcast from Orlando, Fla., asking viewers to pray for Bakker. She said she wanted to have the "Jim and Tammy Show" on the air so "Jim will have something to come home to."

Bakker quit PTL amid revelations about his 1980 sexual encounter with church secretary Jessica Hahn and a $265,000 payoff to her.

Outside the courthouse Monday, the opening of the trial was marked by reporters and spectators vying for seats in the small court, and two men carrying signs denouncing Bakker and several other broadcast evangelists.

"We just want people to know God isn't playing games. Anybody who reads the Bible knew that (PTL) wasn't right," said Bob Eckhardt of Columbia, S.C.
Lighten your load this semester by carrying an extra unit.

Even if you’re up to your eyebrows in homework, you needn’t carry the world on your shoulders.

Not with a Macintosh® computer on your desk.

Think of an assignment that weighs heavily on your mind right now—say, a term paper. With Macintosh, you can bring instant order to the jumble of notes, scribbles, quotes, and excerpts that’ll go into your paper. You can quickly draft an outline, change the order of topics, and jot down related ideas at will.

Then you start to write. You don’t like the way you phrased a paragraph? No problem—try something new, without erasing or retyping a word. Want to move the second page of your first draft to the tail end of your last draft? It only takes a few seconds.

With Macintosh, you can also have your paper proofread in a minute or two. And you can illustrate it with professional-looking drawings and graphs, even if you don’t know a T-square from a T-bird.

And here’s the clincher: You can learn to do all of these things—all of them—in less time than you might spend studying for a Monday morning quiz. Starting Sunday.

If you don’t believe it, stop by the location listed below and see Macintosh for yourself. You’ll wonder how you ever carried a semester without one.

The power to be your best.™

Dear Notre Dame Students:
I want to welcome you back to the campus for another academic year. I hope that for those of you who are returning this summer was a productive time. As you will soon discover, a number of building projects have been taken to the next level of completion. In addition, we are continuing the renovation of Sacred Heart and have continued our renovation of a number of the dormitories. Many visitors to the campus over the summer commented about how impressed they were with the natural beauty of our environment. It is something that we all have a responsibility to maintain.

This is the "Year of the Family." A number of activities are being planned under the auspices of the committee headed by Dr. Roland Smith. I hope that you will participate in a number of these events. They are an opportunity to both reflect upon our personal experiences of family and to look forward to the changing nature of the institution of the family in our society.

All of us in the administration look forward to a fruitful and cooperative year. You have elected outstanding leaders in student government at both the undergraduate and graduate levels. Working together I am confident that we can help develop an even better and more cohesive university community.

I encourage you to get to know your faculty in a personal way. They can be a tremendous resource as you explore the options in your life. We are proud of the high quality of faculty that we have been able to attract and consider them the most precious resource of the University.

Father Dave Tyson, Vice President of Student Affairs, and his staff are prepared to assist you in any way that they can. Many exciting programs and events are already being planned. I urge you to get involved. A proper balance of academic discipline and extra curricular activity will make a Notre Dame education much more enjoyable and rewarding.

I look forward to having the opportunity to speak with many of you during the course of the year. May God bless us all in this coming academic year.

Father Edward "Momb" Malloy
University President
August 28, 1989

Welcome back returning students

Dear Notre Dame Students:
I should like to take this opportunity to extend to you a warm welcome from all who work in the Division of Student Affairs.

We welcome back the sophomores, juniors, seniors, as well as the returning graduate and professional students. It is our hope that each of you will be able to achieve the academic, personal, and spiritual goals you have set for yourselves this academic year.

We extend a special welcome to our new students -- the freshmen, transfer and new graduate students. Though you begin studies at a variety of different levels, all of you have become part of a University community that is considered to be special to many that have preceded you here. I encourage you to take advantage of the multiple opportunities available to enhance your education here. Moreover, I invite you to avail yourselves of the variety of student services provided in our Division.

May God continue to bless us in our endeavors.

Father David T. Tyson
Vice President for Student Affairs
August 28, 1989

Dear Saint Mary's Students:
Welcome back! I hope the summer months provided you with an opportunity to recover from the rigors of the past academic year and also engaged you in new and exciting growing experiences of a different type. We are anxious to begin the 1989-90 academic year, which we hope will be a time of continued intellectual and personal growth for each of you.

It is our hope that the liberal education you are receiving at Saint Mary's will prepare you for a lifetime of learning. As you begin again your course work I encourage you to probe, question, search, and grow stretch your mind and take full advantage of the knowledge that is just waiting to be discovered. Accept the challenge and grasp the wonderful opportunities that are awaiting you--in the classroom, in worship, in recreation and athletics, and in our clubs and organizations.

Make this a time to persevere, a time to take strides forward, and a time to grow as a total person. Difficult as it is for you to believe on this beautiful August day, soon another year will be completed. Let it be well spent so that when you leave, you will leave with the knowledge that your presence and participation made a difference.

Good luck.

William A. Hickey
President
Saint Mary's College

DOONESBURY

MELL, THATS IT, BABY
YOU CAN CARRY ON ALL YOU WANT, BUT NOT MORE TUBE FORMS TODAY!

THOSE MORE TO LIVE THAN EXHAUSTED ARMS AND BANDS-HEAD TO INCREASING AS IT SOUNDS, THERE'S A WHOLE WORLD OUTSIDE OF TELEVISION, BABY. WELL, THERE'S CENTRAL PARK, THE MUSEUM OF NATURAL HISTORY, AND THE BRONX ZOO!

WHAT IF YOU SAY YOU WANT TO WATCH A CURRENT AFFAIRS SHOW, MELL, OKAY, BUT THAT'S IT!

NEVER THE FEDERAL EMPLOYEES FOR HOUSE BANDS-HEAD TO LOVE, BABY...

QUOTE OF THE DAY

"Don't be dismayed at goodbyes. A farewell is necessary before you can meet again. And meeting again, after moments or years of separation, is not to be taken lightly; many secrets have been left on the shelves of time...

"Illusions"
Richard Bach
New assignment for ‘Mission Impossible’

Imagine a group of James Bond. The imagine that group fighting for America against some of the world’s most creative and cruel villains. ABC has made this group of secret service super heroes a reality and, for them, it’s “Mission: Impossible.”

This new version of an older show with the same title airs on ABC Thursdays at 8:00 p.m. Peter Graves, the only cast member from the original series, reprises his role as James Phelps, director of a group know as IMF. Under Phelps’ jurisdiction are Nicholas (Thaao Penghlis), Grant (Phil Morris), Max (Tony Hamilton) and newcomer Shannon (Jane Badler). Just as each James Bond film open with a view down the barrel of a gun, each episode of “Mission: Impossible” begins as the group receives its assignment from a self-destructing compact disc. No holds at the local 7-Eleven will do for this group. Its assignments are far more intriguing and dangerous.

One episode pits James and his cohorts against a fellow agent gone awry. This man now deals in diamonds from Amsterdam and chemical weapons from Russia. Phelps makes a careful and unique plan that has “Mission: Impossible” written all over it.

When the voice on the CD warns this could be Phelps’ most dangerous mission, it isn’t kidding. In the course of the episode, Phelps’ plan fails, the enemy shoots Phelps, and an entire mill explodes killing hundreds of people.

Of course, “Mission: Impossible” never claims to be true to life. That’s the fun of it. Each week introduces viewers to exciting and interesting equipment: everything from a surveillance camera that can scan a person down to his bones for identification purposes to a hand-held, remote control fax machine. This group performs every task—probably even the capture of that darn 7-Eleven crook—with flair. The complex plots portrayed on the program bring out the incredible talent of the writers, actors, and special effects crew. Characters are constantly faking accents to protect their identities, and their makeup and costume jobs put Lana Turner’s face lifts to shame.

Viewers won’t find the meaning of life in “Mission: Impossible”; however, they will find it impossible to not become engrossed by this fast-paced nature of the program. At the root of all television programs is entertainment, and that’s precisely what this program is: enjoyable entertainment. This review will self-destruct in five seconds.

However, there’s another dimension, from within the abyss there lives a terrestrial life form that befriends the crew of “Deepcore.”

THE ABYSS

Bud Brigman (Ed Harris) prepares to make his descent into “The Abyss,” a two and one-half mile deep trench in the ocean floor, while his wife Lindsey (Mary Elizabeth Mastrantonio) and crew gather around him.

Special effects highlight new sci-fi drama

Bud Briggs’ project engineer, who is also his soon to be ex-wife Lindsey, played by Mary Elizabeth Mastrantonio. A four man team of Navy SEALS, supervised by Lt. Coffey, Michael Biehn, go down to “Deepcore” to coordinate the rescue mission. Tensions mount when Lindsey and the Navy SEALS come aboard “Deepcore.” Lindsey is a strong willed woman who doesn’t like to conform to the military’s orders. The struggle between the Navy’s wishes and those of the “Deepcore” crew provides much of the action in the movie. However, there’s another dimension, from within the abyss there lives a terrestrial life form that befriends the crew of “Deepcore.” Ultimately, the being from the abyss plays a pivotal role as Bud dives to depths over 25,000 feet below the Atlantic. Lindsey and Bud are drawn together as circumstances underwater make the past differences seem insignificant.

The photography in this movie is incredible. Forty percent of all live-action principal photography was shot underwater. The special effects were unique and added an extra to this otherwise standard action film.

“The Abyss” was filmed at the never-completed Cheroke Nuclear Power Station outside of Gaffney, South Carolina. Two specially constructed underwater filming tanks were used for “The Abyss.” One was a nuclear reactor containment building and can hold over seven million gallons of water. The other tank holds two and one-half million gallons of water. These tanks are the largest heated fresh-water filtered tanks in existence. All the dialogue was filmed underwater for a more realistic effect.

The movie is long—two hours and 20 minutes—and the ending was also a little ridiculous. But, the movie was exciting even though many parts were borrowed from other similar movies. The underwater setting was a refreshing break. For those who are sick of space movies and enjoy action, “The Abyss” is a recommended alternative.

NEW YORK—John McEnroe and Boris Becker played their best tennis in years at the U.S. Open on Monday but against Brad Gilbert, munching bananas and brownies to fight an energy-draining virus, couldn’t keep his streak alive.

Becker, bothered by blisters on both feet here last year when he lost in the second round, easily beat David Pate 6-1, 6-3, 6-1 in the first round of the $5.1 million championship.

Becker, who won his third Wimbledon in June, has never reached the U.S. Open finals.

McEnroe missed the French Open this year because of a back injury and hurt his shoulder in the Wimbledon semifinals, but had no problem beating Eric Winogradsky 6-1, 6-4.

McEnroe showed a powerful serve again, coupled with quick, fluid movement to the net, indicating he may be ready to win his first Grand Slam since capturing the U.S. Open in 1984.

“I think I can win,” said McEnroe, a four-time U.S. Open champion. “Before, at some of the major tournaments, I was thinking of just making a pretty good showing and wasn’t thinking that much about winning the tournament. Now I think that it’s a realistic possibility.”

Gilbert, a menace on the tennis courts the past month with three straight titles, and a dark horse to win here, once again picked the wrong time to get sick.

Gilbert, a menace on the tennis courts the past month with three straight titles, and a dark horse to win here, once again picked the wrong time to get sick.

He woke up with a stomach virus after an eating binge Sunday night with fellow pro Robert Seguso, and succumbed to cramps and fatigue as his streak ended against unseeded Todd Witsken.

The same ailment bit Gilbert seven years ago, and he hopes it will be another seven years before it happens again. “It’s God’s way of torturing you when you lose,” Gilbert said.

Gilbert shouted “Concentrate,” and asked himself dozens of questions on the court but couldn’t find the answers he needed as he fell 4-6, 7-6, 4-6, 5-3, 6-2, in a nearly four-hour match.

Gilbert, seeded eighth, was the only loser among the top seeds on a gray, rain-threatening first day at the Open.

Maddux leads Cubs past Astros, but Cardinals keep pace

Associated Press

Chicago—Greg Maddux pitched a six-hitter and Shawn Dunston hit a two-run double in Chicago’s four-run first as the Cubs beat the Houston Astros 6-1.

Maddux, 15-10, struck out four and walked two in his sixth complete game. Jose Cano made his major-league debut for Houston and gave up five runs and five hits in five innings.

José Ramírez reached second on a throwing error. Ryne Sandberg singled and Lloyd McClendon doubled in two runs and Rick Wrona hit a sacrifice fly. Houston scored an unearned run in the sixth when Rafael Ramirez reached second on a throwing error and scored on a single.

Cardinals 3, Reds 2

Pedro Guerrero’s two-out, two-run single capped a three-run eighth inning, giving St. Louis a 3-2 victory Monday over the Cincinnati Reds.

Guerrero drove in his 90th and 91st runs with a double and a run-scoring single, respectively, after Dorothy Manigault’s error. The third baseman botched the play and allowed Dunston to score the go-ahead run.

Mets 1, Dodgers 0

Frank Viola won baseball’s first-ever duel of three-hitter Monday by pitching a 1-0 shutout.

The loss was the fourth straight for Hershiser, 1-0, for whom the Dodgers have scored only four runs in that span.

Brewers 8, Blue Jays 2

Mats Oki won for the second time in three starts and the Brewers snapped a six-game losing streak and beat Toronto 8-2.

The loss was the fourth straight for Hershiser, 9-8, allowing four runs, one earned, and nine hits in 5 2-3 innings.

Red Sox 6, Tigers 3

Nick Essexky hit his 26th homer, a three-run shot in the first inning, and took over the American League RBI lead with 93 as the Red Sox beat the Tigers 6-3 Monday night for a five-game sweep.

Esksky’s three-run homer off Jeff Robinson, 3-4, in the first inning enabled him to pass Texas’ Ruben Sierra, who has 92 RBIs.

We will always need leaders

The Air Force is looking for pilots... navigators... missileers... engineers... managers... and more. Our positions are important. You can get one through Air Force ROTC.

As an Air Force ROTC cadet, you’ll be trained in leadership and management practices. You may also apply for our scholarship program that helps pay college expenses, plus $250 per academic month, tax free.

After graduation, you’ll have all the prestige and responsibility of an Air Force officer. You’ll discover a new world where you’ll be challenged to excel... and rewarded for your success. Let us give you the details today.

Congratulations to the GTE Academic All-Americans®

They are the leaders of the team. But what makes them even more special is their outstanding academic records. They are the GTE Academic All-Americans, selected by the College Sports Information Directors of America (CoSIDA) for being high achievers— in the game as well as the classroom. GTE is proud to be the official sponsor of this 37-year-old program and congratulates these student-athletes on their Academic All-American achievements.
NFL to suspend steroid users

Associated Press -
Approximately two dozen active NFL players tested positive for steroids in training camp and will be suspended for a month, the NFL said Monday.

The names of the players, who will miss the final exhibition game and the first three regular-season games, were sent to their teams and will be announced today.

The NFL was to have released the names Thursday, but the announcement was delayed when the Player's Union asked a federal judge to issue a temporary restraining order to stop the league from implementing the suspension plan.

U.S. District Judge Thomas Hogan, however, refused to grant the request, saying all players had been given ample notice. He also said the union failed to show how its members would face irreparable harm under the league's new plan, announced last March 21 by Commissioner Pete Rozelle.

By the time Hogan ruled, the league decided it was too late in the day to make the announcement and postponed it 24 hours.

NFL spokesman Joe Browne said the number of players involved "fewer than two dozen" currently under contract. However, he would not be specific.

Browne said an unspecified number of other players among the 2,300 tested at training camps had tested positive but had already been cut by their teams. Teams were required to get their rosters to 60 players by today and the regular-season limit of 47 by next Monday.

In seeking the temporary restraining order, the NFL Players Association called the accuracy of the testing procedures "highly questionable" and said that identifying and suspending a player for steroid use would stigmatize him.

Hogan acknowledges that a suspension "could be fatal to a marginal player" and called his decision "a close call."

But he said the union's lawyers had failed to prove that players who might be suspended would suffer irreparable harm and added that most legal questions relating to the NFL's steroid-testing program must be left to an arbitrator to decide.

The union said it based its argument on what it called "sloppy and unreliable" testing methods used by the NFL and its adviser, Dr. Forrest Tennant.

After failing in court, the union said it still hoped the league would reconsider the suspensions and releasing the names.

Peltier
continued from page 20

bating average, .406, RBI with 202, 60 doubles, 419 total bases and tied for the career mark in home runs with 28. His accomplishments earned him first-team All-American honors.

Peltier played an important role in Notre Dame's 1989 NCAA playoff bid. Prior to last season, the Irish had not been represented in that tournament since 1970.

Peltier sustained his shoulder injury when he was preparing to catch fly balls in center field before a game. Before he was looking, a coach hit a fly ball form the third base foul line, striking Peltier squarely on his collarbone.

The Rangers originally had planned to offer Peltier a spot on the 1991 spring training roster, but the date was moved up to the spring of 1990 due to his immediate success with the Copper Kings.

The $83,500 first prize from her 20th career victory lifted the LPGA World Championships.

"I wasn't that crazy about the course," King said, claiming throughout the tournament that the 6,107-yard Pinehills Resort course didn't suit her game.

She's having the kind of season where it didn't matter. King threatened to run away from the field Sunday before struggling with three bogeys in the middle of her round. She regained her composure and completed a round of 68 for a three-shot victory, her sixth this year.

King said the greens were too slow, the course was too hilly and there were too many blind spots. Still, she through it could be more difficult.

"I think we could do with a little tougher challenge," she said of the event that brings together an elite international field of 16. "It's a great resort course. For an open type or major type event, it's certainly not in that category. I recommend it highly if you want to go on vacation."

There is a possibility the world championship will leave the area next year if the LPGA schedules a regular tour event near Atlanta.

King's 13-under par 275 total gave her a three-shot victory over Pat Bradley and Patty Sheehan.

The $83,500 first prize from here 20th career victory lifted King's 1989 earnings to $609, 457 - a single-season LPGA Tour record. King said she had planned to play all six remaining official tour events this year, starting with the Rail Classic at Springfield, Ill. on Labor day weekend.

Despite site, King takes LPGA Worlds

Associated Press

BUFORD, Ga.—Betsy King would welcome a change of venue to defend her latest golf title - the LPGA World Championships.

The Notre Dame golf teams are hosting a golf tournament in September at the Burke Memorial Golf Course. The tournament will serve as an open tryout for the men's and women's varsity golf teams.

Irish golfers host campus tournament
Special to The Observer

Notre Dame's varsity men's and women's golf teams, in conjunction with the Burke Memorial Golf Course on campus, are hosting a golf tournament on two successive weekends, September 9 and 10, and 16 and 17.

The Notre Dame Campus Championship Golf Tournament is open to faculty, staff administration and students. The tournament is also an open tryout for the men's and women's varsity golf teams.

Entry forms and information are available at the Burke Pro Shop or the Starters Hut. The entry fee is $5, and entries must be received by 5 p.m., Monday, September 4.

You can save literally days of work between now and graduation. Simply by using an HP calculator. To keep you from endlessly retracing your steps, ours have built-in shortcuts. Such as the unique HP Solve function for creating your own formulas. Menus, labels and prompts. Program libraries. Algebraic or RPN models.

Better algorithms and chip design help you finish much faster and more accurately than their way. So, whether you're in engineering, business, finance, life or social sciences, we've got the best calculator for you. For as little as $49.95. Check it out at your campus bookstore or HP retailer.
Rose 'double-crossed' by Giamatti statement

Associated Press

CINCINNATI—Pete Rose feels double-crossed by A. Bartlett Giamatti because of the commissioner's public statement that he believes Rose bet on baseball.

But Giamatti disagreed Monday, saying the agreement he reached under which he banned Rose from baseball does not prohibit Giamatti's stated personal opinion that he thinks Rose bet on baseball.

Giamatti emphasized at a news conference Thursday in New York that the statement was his opinion, not an official finding of Major League Baseball.

"I am dumbfounded that he would say that," Rose told The Cincinnati Post in an interview published Monday. "Just 12 hours earlier, we signed that agreement in good faith, and there he was saying he thinks I bet on baseball.

"The only reason I signed that agreement was that it had no finding that I bet on baseball. We got what we wanted, and we didn't have to go another eight months and spend another three-quarters of a million dollars," Rose said during the interview at his suburban Cincinnati home.

Bartlett said Monday that Rose appears to have been misinformed about the agreement.

"I'm saddened to hear this view. I was very clear about the fact that I was not going to be constrained from saying what I thought was the case," Giamatti said by telephone from Edgartown, Mass. "I'm not going to change anything I said.

"The agreement was reached to acquiesce in their desire to avoid a hearing... In the absence of a hearing, there can be no formal finding. The document also says I have a formal basis for the sanction I imposed."

Giamatti said he based his personal belief on the 225-page report by baseball investigator John Dowd about Rose's alleged baseball betting.

Giamatti banned Rose from baseball for life, under an agreement stipulating that Rose did not admit having bet on baseball. The agreement allows Rose, whose five-year tenure as manager of the Cincinnati Reds ended Thursday, to apply in one year for reinstatement to baseball, but there are no guarantees his application will be accepted.

Rose told the newspaper he was considering a possible television appearance so he can tell his side of baseball's gambling allegations against him. Rose also said he would not rule out undergoing counseling for his gambling.

"I don't think I have a problem," he said. "But we're not ruling anything out."

Former Notre Dame shortstop Pat Pesavento now is turning double plays in the Detroit Tigers system. Pesavento has been drafted each of the past three years, turning down the previous two offers to return to Notre Dame.

**3 Purdue players get suspensions appealed**

Associated Press

WEST LAFAYETTE, Ind.—Three Purdue University football players who were suspended from school following a campus altercation are back on campus after they were cleared of wrongdoing by the campus appeals board.

Offensive lineman Scott Conover and Larry Taylor, along with tight end Kelly Turner, were suspended last week for participating in a campus altercation in which one person was arrested by West Lafayette police. The altercation involved members of the Purdue wrestling team at a campus party March 2.

Conover, Taylor and Turner were all suspended for the current fall semester.

Cornerback Steve Jackson and Safety Jarrett Scales were both suspended for the past summer session, but did not appeal. However, school officials said that the suspensions were also being removed from their records.

"Because all the appeals were upheld, the dean of students office made a decision to rescind the disciplinary action against the two players who were disciplined this summer," said Joe Bennet, vice president for university relations.

The sixth player, defensive back Tony Brown, was suspended for the entire 1989-90 school year. He was suspended from the team this month by Coach Fred Akers after being arrested by West Lafayette police on suspicion of battery, theft and trespass and has since left Purdue.

A nine-member panel consisting of four students, three faculty members and two staff members upheld the appeals. The make-up of the panel was the same for the Taylor and Turner hearings and the board decided to rule on Conover's appeal without holding a hearing, officials said.

The players, all black, through the local chapter of the NAACP had charged the University with racial discrimination in its decision to suspend them. The wrestlers were all white and no disciplinary action was taken against them.

**Murphy’s freshman class is intact**

By STEVE MEGARGEE  
Associate Sports Editor

None of Notre Dame's baseball recruits from last spring accepted professional offers. Coach Pat Murphy said Monday.

Two of Notre Dame's six freshman pitchers - Pat Leahy and Alan Walania - had been selected in May's professional draft. Both players decided to honor their previous commitments to attend Notre Dame.

Leahy, an All-American in high school from Yakima, Wash., was picked in the 15th round by the Toronto Blue Jays, and Walania, of Derby, Conn., went late in the draft.

Notre Dame's other freshman recruits include pitchers Eric Danapalis of St. Joe, Mich., Chad Hartvigson of Kirkland, Wash., Chris Michalak of Joliet, Ill., and David Sinnes of Miami, Fla., and outfielder Bobby Kurtz of Atlanta, Ga.

"You can't regulate the draft with how much they can affect college programs," said Murphy. "The draft's for potential pro players. All these guys are potential pro players, but all of them have a long way to go."

Junior outfielder Dan Peliter left Notre Dame after being selected by the Texas Rangers in the draft's third round, and senior shortstop Pat Pesavento went to Detroit in the 17th round.

Notre Dame graduates Erik Madsen and James Sass both signed contracts with professional clubs after finishing their Notre Dame careers last spring. Madsen, a pitcher, is in the Los Angeles Dodgers organization, while Sass is playing outfield for a Milwaukee Brewers minor league team.

Tickets will go on sale in about three weeks for the two-game series between Notre Dame and Southern California scheduled for Oct. 18-19 at Stanley Coveleski Stadium.

The Irish are preparing for a schedule that includes a season-opening series at Hawaii and the first annual Irish Baseball Classic, a tournament Notre Dame is hosting at the Seattle Kingdome over spring break.

Pre-season pollsters ignore Holtz, favor Irish to repeat

By STEVE MEGARGEE
Associate Sports Editor

Lou Holtz claims his team’s chances of defending its national title aren’t even worth considering, but most of the college football pre-season pollsters apparently beg to differ.

Notre Dame heads into Thursday’s Kickoff Classic against Virginia as the consensus selection to end the season as the national champion. The Irish are ranked first in the pre-season Associated Press poll, second in the National Football Foundation’s International poll and second, behind Michigan, in the Associated Press Top 25.

Of the college football publications, Don Heinrich, Playboyn, Sports and USA Today rank Notre Dame first. The Sporting News favors Nebraska, Athlon selects Southern California and Michigan has the backing of Street and Smith and Game Plan. In none of the polls are the Irish ranked lower than third.

Notre Dame would be the first in a back-to-back national titles since Alabama turned the trick under Paul “Bear” Bryant in 1977 and 1978. All the polls from periodicals, except for USA Today, were released before Notre Dame lost to Michigan State.

Don Heinrich, while acknowledging that everyone expected the Irish to be No. 1, indicated that there are reasons to believe the Irish can fulfill their potential this season.

“Notre Dame is a very, very good football team. They’ve got a lot of talent,” Heinrich said. “I think if they play up to their potential, anything is possible.”

By signing with a professional club, Peltier pleased the University of Iowa baseball coach Pat Murphy. “I’ve never heard of anything like it,” Murphy said.

Sixth-round pick of the Texas Rangers, Peltier accepted the first offer he received, and the decision was his alone. By signing with a professional club, Peltier has the chance to play professional baseball immediately and he also has the chance to play professional football.

Peltier was the fifth pick in the third round of the amateur draft and the Rangers’ second pick overall, but he refused the team’s initial signing offer.

When they raised their offer and included a signing bonus, Peltier accepted.

The Rangers will pay for his school expenses and eventually allow him to finish his studies at Notre Dame at the team’s expense.

“They’re treating him like a king out there,” said Taiwanese baseball coach Pat Murphy. “I’ve never heard of anything like it.”

By signing with a professional club, Peltier has the chance to play professional baseball immediately and he also has the chance to play professional football.

Peltier was the fifth pick in the third round of the amateur draft and the Rangers’ second pick overall, but he refused the team’s initial signing offer.

Scott Kowalkowski are listed a .446 average, a .783 slugging percentage, a .513 on-base percentage, 15 home runs, 93 RBI, 32 doubles, 115 hits and 202 total bases. He set Notre Dame career record in batting average, on-base average, slugging average, home runs, total bases. As the starting defensive ends for Thursday’s game.

To play five of its first six games on the road really puts a strain on the schedule, said Holtz. “That’s a lot of a team, let alone a team in transition.”

With the difficulties we’ve had, I’d say that might be a more difficult step than this football team can take.

In its pre-season rankings, Sport writer Mike Francesa states, “Normally I would never pick a team to repeat or pick a team that has to play three top 15 teams (Miami, Michigan, Penn State) on the road. But these aren’t ordinary circumstances. The Irish are that good.”

USA Today’s poll says, “Holtz and depth of talent more than offset losses of Stonebreaker, Brooks et al.”

Street and Smith counters by writing, “Michigan, which never backs off a challenge, has to visit UCLA the week after the Notre Dame game (Sept. 16). If it gets past those two — look out.”

The Sporting News, which ranks Notre Dame junior Todd Lyght as the top cornerback in the nation and quarterback Tony Rice as the Heisman Trophy favorite, says, “A schedule that poses just two true tests - at Colorado and a home date with Oklahoma - is (Nebraska’s) biggest plus.” The Sporting News also calls the Irish offensive line the fourth best in the country.
