DC-10 airliner bound for Paris missing with 170 on board

McFarlane defends U.S. Iran/Contra affair

By MATTHEW GALLAGHER
Senior Staff Reporter

Former Reagan Administration National Security Advisor Robert McFarlane said Thursday that the United States would press for a normal, peaceful relationship with Iran. McFarlane said Iran and France, which has a small fleet of nuclear-powered aircraft, is seeking to reach a settlement with the United States. McFarlane said Iran and France have made some progress toward that goal, but there is still work to be done. McFarlane said the United States is committed to pursuing a peaceful resolution to the Iran/Contra affair.

A State Department source in Washington, who spoke on condition of anonymity, said Mrs. Pugh was aboard the plane. The French news agency Agence France-Presse, quoting unidentified sources, said Chadian Planning Minister Mahamat Soumaila was also aboard, but that he later met with the International Monetary Fund in Washington. The report was not confirmed, and UTA did not immediately issue a passenger list.

The French news agency Agence France-Presse said the plane was on its way to Paris. The French navy dispatched a Navy communications satellite to search for the plane. The plane was reported to be over the border into Niger. It reported no unusual weather at the time.

The French navy dispatched a Dassault-Breguet Atlantic patrol aircraft from Dakar, Senegal, to join the search, the Defense Ministry said. The French Foreign Ministry formed a crisis team to maintain contact with the countries over which the plane could have flown. The French government said it is the responsibility of the United States to help them understand it.

WORLD BRIEFS

Cambodia's rulers decorated departing Vietnamese military as "heroes". The 1-year occupation was not only legal but also "humanitarian" because it stopped massacres by the Khmer Rouge. In a ceremony, authorities presented the Vietnamese troops with Cambodian military distinctions equal to those of the eight army, navy and air force units that are to be replaced Monday. The statement from the Vietnamese Communist Party for Religious Relations with Judaism was the first public declaration by the Roman Catholic Church hierarchy and clearly had the approval of Cardinal Hesse. The controversy has severely strained Catholic-Jewish relations and resulted in a highly unusual public appeal by Catholic cardinals. In its communiqué, the Vatican diplomatically but firmly rejected the position held by Poland's prime, Cardinal Josef Glemp, who has been accused of making anti-Semitic remarks recently and has called the proposed removal of the" ...scandal."

NATIONAL BRIEFS

President Bush, sharing a platform with House Speaker Tom Foley Tuesday night, testified that the University of Mississippi's Negro students would not be moved and that it would help to construct a new prayer center - the last time the nation's top public university would consider the question. "The University of Mississippi will remain in the public eye forever," the President said. "And it is up to the University to work toward the day when this university will be a symbol of the future... We need to create a more diverse society in America..."

The Vietnam War will be the subject of a political theme for the Democratic convention in July. "The Vietnam War should be on the agenda of this convention. The war is a test of our will..." President Bush said. "We need to send a clear message to the world..."

INDIANA BRIEFS

The Vatican press office said Tuesday that a convent on the site of the Auschwitz death camp that has offended Jewish groups would remain intact. The convent, run by the Poorclare nuns, includes a museum and a documentation center. The convent was established by the Vatican in 1985 to commemorate the memory of the victims of the Holocaust.

The University of Notre Dame announced Tuesday that it would establish a new center for the study of Catholic-Jewish relations. "The University of Notre Dame has a responsibility to promote understanding and mutual respect between Catholics and Jews," the University said in a statement. "This center will be a resource for the study of Catholic-Jewish relations and will provide a forum for the exchange of ideas and information." The center will be named after Father John F. Short, a former University president who was a prominent figure in Catholic-Jewish relations.

The University said that the center would be led by a director who would be appointed by the University's president. The director would be responsible for developing a curriculum and for securing funding for the center. The University also said that it would establish a fund to support research and travel for scholars who wish to study Catholic-Jewish relations.

The center will be housed in a building on the University's campus that was once the site of a convent. The convent was established by the Poorclare nuns in 1946, and it was donated to the University by the nuns in 1962. The convent was closed in 1972, and it has been used for various purposes since then.

The University said that the center would work closely with other institutions and organizations that are engaged in the study of Catholic-Jewish relations. The center would also sponsor conferences, workshops, and other events that are designed to promote understanding and mutual respect between Catholics and Jews.

The center will be funded by a combination of endowment and annual gifts. The University said that it would seek to raise $1 million a year for the center over the next five years.

The center will be directed by Father John F. Short, who is currently the University's president. Father Short has been a leader in Catholic-Jewish relations for many years, and he has served as president of the Catholic-Jewish Link and as a member of the Board of Directors of the American Jewish Congress.

The University said that it would establish a board of advisors to help guide the center's work. The board will be composed of leading scholars and experts in the field of Catholic-Jewish relations.

The University said that it would begin recruiting faculty members to the center in the fall of 2000. The University said that it would offer a range of positions, including faculty appointments, postdoctoral fellowships, and visiting professorships.

The University said that it would begin accepting applications for faculty positions in the fall of 2000. The University said that it would conduct a national search for candidates and that it would select the best applicants for the positions.

The University said that it would begin accepting applications for postdoctoral fellowships in the fall of 2000. The University said that it would offer fellowships to scholars who have recently completed their Ph.D. degrees and who wish to pursue research in Catholic-Jewish relations.

The University said that it would begin accepting applications for visiting professorships in the fall of 2000. The University said that it would offer professorships to leading scholars who wish to teach and conduct research at the University.

The University said that it would begin accepting applications for visiting fellowships in the fall of 2000. The University said that it would offer fellowships to scholars who wish to conduct research at the University.

The University said that it would begin accepting applications for teaching fellowships in the fall of 2000. The University said that it would offer fellowships to scholars who wish to teach at the University.

The University said that it would begin accepting applications for administrative fellowships in the fall of 2000. The University said that it would offer fellowships to scholars who wish to conduct administrative work at the University.

WEATHER

Mostly sunny and pleasant today, high in the 70s. Low tonight in the lower 50s. Party sunny and mild Thursday, High around 80.

ALMANAC

On September 20:

• In 1519: Portuguese naviga­tor Ferdinand Magellan set out from Spain on a voyage to find a western passage to the Indies. He died en route, but one of his ships eventually returned and claimed the passage for Portugal.

• In 1945: Civil Rights leader Martin Luther King Jr. was assassinated in Memphis, Tennessee.

• In 1962: A deranged black woman stabbed Martin Luther King Jr. in an attack at City College of New York.

NEW FLASH: ND GOES COED

"Unfortunately, change at Notre Dame is not excepted and not followed," said President Bush Tuesday night.

"Wishing for a better world, it is not an easy task," he said. "But we must work to create a world that is more just and more peaceful."...
McFarlane says U.S. contributed to evolution of global power

By MICHELLE DALL
News Editor

Robert McFarlane, who served as National Security Advisor under Ronald Reagan between 1983 and 1985, spoke about the changing distribution of global power at a lecture in Notre Dame Room on Wednesday, September 20, 1989. McFarlane said "represents one of the most important ideological changes in modern history." He used three second-world regions to illustrate the "profound evolution" of global power: China, the Soviet Union, and Eastern Europe.

"The world is collectively moving from a period in which international tensions threatened the possible annihilation of mankind to a time in which peaceful discourse between nations in solving their differences has become the norm," he said.

McFarlane attributed this trend toward peace to several factors, including communist leaders gradually coming to the realization that alternative systems of governance have yielded more prosperity than the U.S. system. He cited the "profound recognition that the U.S. system is better than theirs in regard to new ideas, new technologies and the welfare of its citizens," McFarlane said.

Furthermore, "(Communist) leaders have recognized the condition of their own countries is worrisome, and there is no feasible way to hide this fact from their citizens," he said.

The U.S. has also contributed to this increasing level of awareness, McFarlane said. "The United States has been influential due to a conscious set of policies designed to encourage change in the USSR," he said. One of these policies, in which McFarlane himself is involved, is an investment strategy, in which the United States would invest money in businesses in the USSR. The purpose of this strategy, McFarlane said, is to demonstrate to Soviet leaders that, unless they remain open to the possibility of U.S. investment in their country, they could go down in history as presiding over the inevitable decline of Soviet global power.

While McFarlane said he was generally optimistic about the prospects of success in China and Eastern Europe, he said his confidence did not extend to the Soviet Union. He cited internal opposition by party machinery and the government establishment in both Moscow itself and the individual re-organizations as obstacles to success.

"The Soviet state must appreciate the status quo," according to McFarlane. The people need some assurance that their standards of living will improve over the course of their lifetime, he said.

The inability of the government to establish a stable and reliable set of prices has under-mined economic reform in the area, he said. Another impediment to Soviet prosperity, according to McFarlane, is its Slavic history. In such a society, he explained, "Change constitutes a threat. These people's lives, through history, have largely been dictated by higher authorities... From the cradle to the grave, their decisions have basically been made for them. When they realize they may have to compete for jobs, organize themselves into primaries for voting and discover that not everyone will automatically be guaranteed housing and food, the system doesn't seem as attractive, he said.

McFarlane said he felt the possibilities for successful reform in both China and Eastern Europe were generally optimistic. China has developed a solid strategy to improve the nation's productivity through manufacturing, services, and most importantly, agriculture, McFarlane said.

The main problem in China, according to McFarlane, is corruption in the public sector. McFarlane said this was the primary contributing factor in the student protests in the region last spring.

McFarlane said that, although the Chinese Army may be able to maintain order in the country for a short period, reform will eventually triumph. He said this is largely because the Chinese economy will begin to suffer as foreign countries, protesting Chinese policies, divest from the area.

McFarlane predicted that, by the turn of the century, China will also have experienced a lower standard of living, as well as a more liberal administration. In Eastern Europe, the political reform pattern can work without a presidential mandate, McFarlane said.

McFarlane attributed this trend toward peace to several factors, including communist leaders gradually coming to the realization that alternative systems of governance have yielded more prosperity than the U.S. system. He cited the "profound recognition that the U.S. system is better than theirs in regard to new ideas, new technologies and the welfare of its citizens," McFarlane said. Furthermore, "(Communist) leaders have recognized the condition of their own countries is worrisome, and there is no feasible way to hide this fact from their citizens," he said.

Bostwick wins District One seat with 51% of vote

By SANDRA WIEGAND
Staff Reporter

Sophomore Lisa Bostwick won the new District One student senator Tuesday, receiving 51.38% of the votes. "I'm really excited. I was expecting to have a run-off election, thought I would be really close," Bostwick said.

The other candidates were Zachary Hughes and Joseph Lacher. The halls in District One include: Alumni, Holy Cross, Lewis, Keenan, Sorin, Stanford, and Walsh.

Bostwick received a total of 390 of the 759 votes cast.

"One thing I was not happy about was the low turnout of voters," she said. "I wish more people took an interest; there are a lot of issues for which much more student impact is possible," she said.

Bostwick's campaign platform included a plan for an all-tertine meal plan, and a plan for a security escort service on campus. The alternative meal plan would allow students to buy a lesser number of meals on campus. The present plan includes 27 meals per week, according to Bostwick, most students only eat 14 meals in the dining halls.

In her plan for a security escort service, Bostwick urged the hall presidents of male dorms to offer their services as security escorts, stressing that the plan cannot work without student support.

As a student senator, Bostwick plans on playing a strong role in the student government duties of providing a forum for student body discussion, helping students to obtain funding for activities, and serving as a medium between students and administration.

Hall Presidents discuss phone line and Irish Insanity

By ANGELA MCDONALD
Staff Reporter

Irish Insanity's promotion of student spirit, the HPC phone line and the Campus Challenge contest were the main topics of discussion at Tuesday's Hall Presidents' Council meeting. Irish Insanity urged people to wear blue to this Saturday's home game, and to take advantage of the free face painting that will be offered to students from 9 a.m. to 1 p.m. at the flag pole near the Law School Building. They also encouraged the students to support the football team by placing the posters that were distributed this week in the windows of their respective dorms.

Irish Insanity meets every Monday at 7:30 p.m. in the Montgomery Room of LaFerriere House.

The recent incidents of students being attacked on campus sparked the idea of HPC phone lines. This was created so that if an incident happened during the weekend, each of the hall presidents will be notified and they in turn will notify the residents of their hall.

Brian O'Gara, marketing assistant in the athletic department, discussed the campus challenge contest. The contest is geared to promote some of the sports that get little attention. "Some of our less recog-
Man who killed, boiled lover reveals locale of body parts

Associated Press

NEW YORK—A man accused of killing his girlfriend, then dismembering and boiling some of her remains, calmly told in investigators where to find a bucket filled with her body parts, detectives said Tuesday.

Daniel Rakowitz, 28, awaited arraignment later Tuesday on a charge of murdering Swiss dancer Monika Beerle, said police Sgt. John Clifford, a department spokesman.

The victim's remains, reduced to a skull and bones left in a five-gallon bucket, were found in the luggage claim of the Port Authority bus terminal and handed over to the medical examiner. No findings were expected before Wednesday.

Beerle, 26, came to New York last year from St. Gallen, Switzerland, to study with the Martha Graham School of Contemporary Dance and took up residence in east Greenwich Village.

Rakowitz, a short-order cook who drifted from job to job, moved in with Beerle about two months ago and they shared the apartment with another woman, said Deputy Chief Ronald Fenrich, commander of Manhattan detectives.

He declined to say where the other woman was or what she saw.

When Beerle decided to leave, Rakowitz attended a ball on Aug. 19, Rakowitz beat and stabbed her to death, then worked for the next week at disposing of the body, Fenrich said. He boiled the parts to separate flesh from bone and "flushed the skin down the toilet," Clifford said. Word of the grisly killing got around the neighborhood and eventually reached police, Fenrich said.

One of Rakowitz's neighbors said Rakowitz had bragged that he would kill his girlfriend. Each of the dorms decided on a designated night to attend a sporting event and will compete against other dorms to see who has the highest percentage of attendance. The three dorms with the highest percentage will win sporting goods equipment for their respective dorms.

dized sports have put out some excellent performances and this is a sports crazy campus, so we anticipate a lot of student sup-

ded in world tensions, McFarlane said.

The Reagan administration's historical legacy.

"Over time, I think that episode will not appear to be as serious a problem as in the present day.

The Reagan administration's two greatest contributions were its improvement of American economic and political relations in world tensions, McFarlane said.

"This change that is occurring away from a cold-war mentality, and where peaceful discourse be-

tween our countries can reach peace, has proven that things have gotten better, and the Reagan administration can take credit for that, although surely much of the credit can be taken on the Soviet side," McFarlane said.

The Reagan years will also be remembered for "fixing the economy. That, too, has made a big difference in our ability to lead internationally." The new Bush administration will have "perhaps the most talented collection of advisors in the foreign policy area that we have seen for a long, long time," McFarlane said.

McFarlane said "competence and experience makes a difference," and the Bush administration has the opportunity to make a substantial impact on foreign policy, although it is too early in his term to point to specific accomplishments.

McFarlane said speaking at a university was particularly appropriate for a former government official.

"We are privileged to live in a time of incredible change and evolution... in which the face and character of the future is going to vary in China, in Europe and in the Eastern Eu-

Hurricanes have history of threatening East Coast

Associated Press

Hurricanes that ravage the Caribbean tend to spin into the Gulf of Mexico or north into the Atlantic along the East Coast of the United States. Here is a list of some of the worst storms that, like Hugo, have threatened the Eastern seaboard:

Sept. 12-17, 1928 — Called the Lake Okeechobee hurricane, this storm killed 5,000 people in the Caribbean before moving into Florida. Lake Okeechobee, Florida's largest lake, whipped by 160 mph winds, overflowed into populated areas, killing 1,836 more people.

Sept. 21, 1938 — This fast-moving storm attacked with little warning, hitting Cape Hatteras, N.C., early in the morning. With winds clocked at more than 180 mph, it rampaged northward along the coast into New England, killing more than 600 people across seven states and destroying over 20,000 buildings.

Sept. 12-16, 1944 — When this storm struck North Carolina to New England, 46 people were killed on land, and some 350 drowned when the high winds and seas devastated waterfront shipping.

CAROL, Aug. 30, 1954 — This storm left a trail of 68 dead from Cape Hatteras to Quebec. Wind gusts of 135 mph ripped from Cape Hatteras to Quebec. At least 30 people were hung to signal Paul Revere's famous ride.

Hazel, Oct. 12-13, 1954 — Hazel hit North and South Carolina after killing hundreds in Haiti. A total of 347 people died, 95 of them in the United States.

DONNA: Sept. 4-12, 1960 — Hurricane Donna crossed the Florida Keys, savaged North Carolina, bounced back to sea, and then turned again to hit New York City with the strongest winds the city had ever experienced. Manhattan was inundated with 10-foot waves. An estimated 148 people died.

DAVID: Aug. 30-Sept. 13, 1969 — Traveling from the Dominican Republic to Florida up to eastern Canada, Hurricane David killed 1,280 people, 19 of them in the United States.

GLORIA: Sept. 16-27, 1985 — Gloria struck the mid-Atlantic coast, came ashore on Long Island, N.Y., and swept through New England to Canada. More than 300,000 people in the nation's most populated area were evacuated in preparation for what was billed as "the storm of the century." However, Gloria caused ashore at low tide with diminished winds, so damage was moderate and only two deaths were attributed to the storm.

HURRICANES HAVE HISTORY OF WARTIME SHIPPING.

Forty-three people died in the land, New York, and swept through 1979 — Traveling from the Mediterranean to Florida up to eastern Canada. Hurricane Gloria came ashore at low tide, then turned again to hit New York City with the strongest winds the city had ever experienced. Manhattan was inundated with 10-foot waves. An estimated 148 people died.

The new nine-bill package includes measures calling for a state constitutional amendment giving women the right to an abortion, restoring state-subsidized funding for all "medically necessary" abortions, and wiping out an existing law requiring rape and incest victims to file a police report before receiving subsidized abortions.

The centerpiece bill, sponsored by state Rep. Karen Bitter, says government should not interfere with "a woman's personal choice to commence, prevent or continue a pregnancy or have an abortion" before the fetus is viable.

The proposal mirrors existing law in saying an abortion on a viable fetus is allowed only if the mother's life or health is threatened by the pregnancy. Under the proposal, a fetus is considered viable if the woman's doctor rules there is "a reasonable likelihood of sustained survival ... outside the woman's uterus."

In an attempt to placate some abortion opponents, Bitter said the bill would also require doctors to ask teen-age patients to notify at least one parent before having an abortion.

We'll answer questions like:
What will I do on a typical day? Will you train me? Can I use my major in this job?
And maybe most importantly, you'll meet a bunch of folks, who this time last year were wondering about how they were going to get to the Fiesta Bowl and where they were going to spend Spring Break!
Students will call DART and they will be asked to enter their nine-digit student identification number, their four-digit PIN number, and the semester code, Winieur said. Next, students will enter the call number for each of their courses, said Winieur. He said the number will be held on in the Course Selection Booklet. The computer will tell the student immediately whether he or she got the class or not, said Winieur. "DART will eliminate the problem of not knowing what you’ve got until six weeks later," Winieur said.

The computer also calculates the student’s total credit hours and will not let students register for more than their college allows, Winieur said. If students are unable to register at the assigned time or want to add or drop a class, they may call back DART during the unrestricted call-back times—Monday-Friday 7 p.m. to 2 a.m. beginning the first day of registration and continuing through the first week of spring semester, said Winieur. Winieur said that students may not use the call-back option until after their scheduled time. According to Winieur, the computer will not allow a student access until their scheduled time.

Each day during the first week of registration the courses and sections which are closed, added or reopened will be published in The Observer; in the Register’s Office; in the department offices, said Winieur.

After registration both students and their advisors will receive a paper copy of the student’s schedule, said Winieur. "Anytime a student wants to see what courses they registered for, they can call up the system," he said.

Winieur said that he will ask students to write their final schedules on a form so that his office will have the schedules on paper in case any problems should arise.

He said that this will probably be the only semester that students have to make a hard copy as it is the first time the computer has been used for registration. Winieur stressed the importance of students attending the scheduled video presentation and reading the information in the Course Selection booklet as the system will be easier to use if students know how to use it correctly.

The DART system has several features that will require some changes in the way that courses are set up, said Winieur in a letter to department Chairmen.

The DART system will automatically cut off enrollment at the maximum set by the department, said Winieur. He said that Chairmen will not have the chance to review the class list as in the past.

In the letter Winieur said DART will automatically include the students into sections in multi-section courses. He said it will no longer be necessary to use checkmarking for multi-section courses.

Winieur said if Departments still want to maintain control over students who enroll in a course they may designate the class "Registration by Permission."

"I won’t approve a permission only course unless there is a good reason," said Winieur. He said he expects there will be less "permission only" courses than there were checkedmark classes in the past.

The letter also said that DART can automatically exclude any group of students from a course. For example, a class that requires a pre-requisite or is for seniors only. 'They won’t have to tell us how to make it (DART) better. We want feedback from those who have tried the system."

The system includes a feature that will be held Thursday at 4:30 p.m.

HAIR STYLISHING & SHAMPOOING

HAIR STYLISHING & SHAMPOOING

WEDNESDAY, SEPT 13 11:10 a.m.: An off campus student re­ported that her bicycle had been stolen. The bicycle was last seen in the front of the Earth Science Building sometime between 9 a.m. and 10 a.m. The victim's loss is es­timated to be $100.
6 p.m.: A Notre Dame resident re­ceived a report of a suspicious person in a car and appeared to be faking a limp. The victim was approached by a white male subject on noon. The suspect apparently tried to snatch the victim's briefcase.
5:01 p.m.: A Grace Hall resident re­ported the theft of his laundry from out­side his room sometime between 9/12 and 9/13. His loss is estimated to be $50.
THURSDAY, SEPT. 14 3:15 p.m.: A resident of Pasquaillia East re­ported the theft of cash from the victim sometime between 10 a.m. and 2 p.m. on 9/14.
4:45 p.m.: A South Bend resident re­ported the theft of his stereo system from his car sometime between 11 a.m. and 2 p.m. The victim's loss is es­timated to be $250.
5:30 p.m.: A Notre Dame Security re­port reported that his stolen car had been stolen from Notre Dame sometime on 9/11.
6:00 p.m.: A resident of the Village reported the theft of his bicycle from the victim's room sometime between 11 a.m. and 8 a.m. on 9/14. The victim's loss is es­timated to be $100.
7:45 a.m.: A Grace Hall resident re­ported the theft of his laundry from out­side his room sometime between 9:30 a.m. and 1 p.m. on 9/15. His loss is estimated to be $50.
SATURDAY, SEPT. 16 7:45 a.m.: Notre Dame Police re­port received a report from South Bend. The vehicle was located in the C-1 lot.
7:30 a.m.: A Fisher Hall resident re­ported the theft of his watch and cash from his unlocked room sometime be­tween 10:30 and 11:30 a.m. The victim's loss is es­timated to be $200.
SUNDAY, SEPT. 17 6:00 p.m.: A resident of Lyons Hall re­ported that her bicycle had been stolen. He is from the bike rack outside Lyons Hall sometime between 9/15 and 9/16. The victim's loss is es­timated to be $200.
9:00 p.m.: A Notre Dame resident re­ported the theft of his unlocked bicycle from the front of the victim's room. The victim's loss is es­timated to be $150.
$24,782 from the National Institutes of Health for a small molecule program adminis­tered by Thomas Kunkel, pro­fessor of chemistry.
$2,000 from the National Institutes of Health for a grant supplement administered by Samuel Brown, profes­sor of biology.

For instructional programs totalled $211,272 for a program in experimental parasitology and vector biology administered by Karijil Ral, professor of biological sciences.

Awards for service programs totalled $29,977 from private benefactors for programs of the Institute for Pastoral and Social Ministry, the Center for Social Concerns, and the Notre Dame Center for Pastoral Li­turgy.

Awards for other programs totalled $152,835, including:
-$90,744 from the National Science Foundation for a prod­uct research fellowship pro­gram administered by Charles Le, assistant vice president for ad­vanced studies.
-$6,420 from the National Endowment for the Humanities for a program on Pastas­can's Penses and faith, and the meaning of life admin­istered by Thomas Mears, as­sociate professor of philoso­phy.
-$31,165 from the U.S. De­partment of Agriculture for a Jacob Javitz fellowship pro­gram administered by Thomas Mears, as­sociate vice president for ad­vanced studies.
-$750 from the National En­dowment for the Humanities for a critical edition of Gram­mun's private notebooks adminis­tered by Joseph Buttigieg, as­sociate professor of English.

$250 from the National End­owment for the Humanities for a critical edition of Gram­mun's private notebooks adminis­tered by Joseph Buttigieg, as­sociate professor of English.

Supercomputing time from the National Endowment for the Humanities for a critical edition of Gram­mun's private notebooks adminis­tered by Joseph Buttigieg, as­sociate professor of English.

Shakespeare translation takes the streets

Recently it has been brought to my attention by a professor of English that Barron’s, the company that prints guidebooks to just about everything, has unveiled the latest marvel of the age: street English translations of Shakespeare’s major works. The translators, which push these latest captivations into the language of contemporary American vernacular, claim that Barron’s play translations, free of the “esoteric, archaic and arcane” language, are in use in a high percentage of American high schools in lieu of the real thing.

Ruminating over the logical conclusions of all this, I came upon an interesting thought: if the Barron’s guidebooks thus rendered “easy to digest” for the general public, play by play, why not make it even easier to digest by creating “regional” translations and combine all his plays and characters into one small volume? As a result, people would really be able to feel that the events themselves are “New Jersey” or “Brooklyn” or “Somewhere in New Jersey” and thus rendered “easy to digest” for the general public.

Glenn G. Fogarty

With No Apologies

The New York Metropolitan Area or Brooklyn accent. Feeling superbly qualified in the nuances of this dialect, I have set about writing, in hope of securing the wackiest from Barron’s, the greatest translation of them all. Shakespeare in Brooklyn and am rendering this excerpt to whet the appetites of those untold millions who have been waiting for something just like it.

Scene: Somewhere in Brooklyn. Enter Hamlet.

Hamlet: Is it to be, or is it ain’t? That’s what I’m askin’. Is it better to sit here like a Lady Macbeth on somethin’, or go down like to Prospect Park and mug those two little punks, Rosen and Gildenstein? What do I do, you know? This con-science stuff makes...

(Enter Macbeth)

Macbeth: Life ain’t nothin’ but a walkin’ shadow, a lousy actor who withers like the guy on Cheers...and he was John Travolta or some-thing. He’s just waitin’ in the wings, and then ya don’t hear of him no more. It’s a tale told by a guy from Bedford-Stuyvesant, check-fol with noise and stuff, signifyin’ nothin’

Hamlet: Yo, you in the plaid dress. Who in the hell are you? This is scrap! Let’s get out of here, ya know.

(Exeunt Hamlet, Macbeth, Ophelia)

Glenn G. Fogarty is a junior History/ALPA major and is a regular Viewpoint columnist.

LETTERS

SMMC students unfairly afflicted by vaccination problem

Dear Editor:

On Sept. 8, The Observer ran a front page headline concern­ ing the measles emergency and free immunizations offered at Notre Dame. Being a Saint Mary’s senior nursing student, I have never felt more com­ promised to write and express my frustration at the way this emergency was and is continuing to be taken care of.

Since the CDC determined that “more than 10,000 cases of measles have been reported (key word here) in the U.S. since January,” perhaps Health Services at Saint Mary’s might have slightly anticipated an outbreak. Granted, a notice was sent home to all students alerting us to have our measles vaccinations updated. That’s a step!

But my concern is for how the emergency is being handled now. Health Services offered free vaccinations last Monday for an hour and a half for 1800 women. When I proceeded to call for information, I was told that they were “Out...today and tomorrow, and you can’t go to Notre Dame either.” “Now it’s going to cost us $30.00 and we don’t know when we’ll have them—maybe sometime next week. First come, first serve.”

We are a community, or so I thought. Why can’t Notre Dame and Saint Mary’s Health Services work together on this issue? I don’t mind paying the extra $25.00 for the football tickets, but $30.00 because we have had an outbreak, but it’s only a matter of time.

We socialize, take classes, communicate, and have family over at Notre Dame. Instead of having more luck, let’s just prevent the spread by bringing in the vaccination times available and continuing to provide current, accurate information so rumors of quarantine won’t continue.

Or haven’t you heard the latest?

The movies don't give you any sense of the terror and the fatalism of combat. They certainly don't give you any sense of what it's like to kill another human being.'

WORLD W'A*R

THE 50th ANNIVERSARY

"We were moved around and moved in those big freight cars. They took us to Stalag 12A and Stalag 3A. Stalag 3A was close to the Polish border. And they actually marched us, and this was in the winter."

"They marched us by foot to Stalag 3B which was a little bit south of Berlin," said Saz. "I know it took many days. I don't know whether it was one week or two weeks... a lot of prisoners never made it."

Saz was still in Stalag 3B when President Franklin D. Roosevelt died. "That's when the German guards came in and announced to us that America's number one Jewish gangster had died. They called him Rosenfield instead of Roosevelt," he said.

Both Saz and Powers have vivid recollections of the end of the war in both the European and Pacific theaters. Saz and his fellow prisoners were liberated when the Russian tanks rolled into their camp. "They held us for a couple of weeks before they made contact with the American lines, and they treated us very well," said Saz. "They were very sympathetic."

"They finally did make contact to the American lines... I was under 90 pounds. The Germans barely fed us, and when we got to the American lines we were deloused and our clothes were burned."

Saz was taken to Camp Lucky Strike in Southern France before returning home. "They prepared to move us back to the States. The mood was certainly grim, but Saz was in even greater danger: he was Jewish."

"One of the first things I did was to destroy my dog tags because they have your religion on it," said Saz. "I claimed I was Presbyterian; I didn't even know what it meant."

"One of the people was a fellow from the Bronx. New York. Who unfortunately was also Jewish," he said. "They interrogated all of us, and we all went to prison camp together except for him. We never saw him again. Maybe he didn't throw away his dog tags— I don't know."

Red Sox 6, Blue Jays 3
The Boston Red Sox, unable to defeat Toronto at home since 1987, beat the first-place Blue Jays as Nick Esasky homered during a five-run third inning. Toronto had its three-game winning streak stopped and its lead in the American League East cut to two games over Baltimore. The Red Sox won their fourth straight and pulled to 8 1/2 back.

White Sox 4, Royals 2
Reliever Jeff Montgomerie's throwing error helped the Chicago White Sox rally for three runs in the ninth inning and beat Kansas City, dropping the Royals 3 1/2 games back in the American League West. Kansas City fell farther behind first-place Oakland, which beat Cleveland 4-2 in 10 innings. California won and stayed in second place, 2 1/2 games back.

Angels 6, Twins 3
Bert Blyleven pitched eight strong innings and the California Angels remained 2 1/2 games back in the American League West, beating the Minnesota Twins. Chili Davis hit a three-run homer as California won for the eighth time in 11 games and kept pace with first-place Oakland. The Twins were mathematically eliminated from the race.

Chili Davis hit a three-run homer as California won for the eighth time in 11 games and kept pace with first-place Oakland. The Twins were mathematically eliminated from the race.

Rangers 5, Mariners 2
Fred Manrique's two-run double in the eighth inning sent the Texas Rangers over the Seattle Mariners.

Where can Morgan's Audit-Plus Training Program lead you?
Each year we hire a small team of college graduates to participate in a unique management training program. Our program, Audit-Plus, offers a career path in either financial or general management at J.P. Morgan.
J.P. Morgan develops and executes complex financial transactions for the world's leading corporations and governments. Our business requires specialized support in areas such as risk analysis, control evaluation, accounting policies, and taxation. As an Audit-Plus trainee, your role will be vital in providing this essential management support.
To qualify, graduates with concentrations in accounting, finance, economics, or other business subjects should have at least two courses in accounting for the general management path and four courses for the financial management path. Please plan to attend our upcoming information session. Watch for the time and location on campus. Or contact Judith Lannin, Financial Recruiting, J.P. Morgan & Co. Incorporated, 23 Wall Street, New York, NY 10015.

Rugby team loses, ties Wolverines

The weekend in Ann Arbor was a huge success for the football team and the students who road-tripped to the University. For the Rugby Club, though, the weekend wasn't as good as they had hoped. A side finished in a 10-10 tie with the Wolverines while the B side lost 18-12. Michigan was supposed to put up three sides against the Irish, but they could only manage two teams.

Mike Kamradt
Club Corner

The A game started out promising for Notre Dame, but didn't end that way.

"We were disappointed in the quality of their team," said club president and A side starter Mike Smiggen. "We put some big hits on them early and we intimidated them."

Bob McGuire scored the first four points early in the match. An omen of bad things to come happened ten minutes into the match when starter Mike Smiggen was hurt and taken to the hospital. Later in the half Vic "Hardo" Pisani batted his way for a four point score. Shaun McNamara added the two point conversion kick to make the score 10-0.

The score was the same as the second 40 minute half got under way, but things soon turned around for the Irish. The main blow was delivered not by the Wolverine attack, but by injuries.

"We lost three more starters to injuries. With these key positions we didn't have the strength this weekend as they host Michigan and hope. The A side finished in a 10-10 tie with the Wolverines while the B side lost 18-12.

A few penalties swung the momentum in Michigan's favor and the Wolverines were able to scratch for the tie.

The B side lost a hard fought battle 18-12. Said McGuire, "It didn't put up a C side. Notre Dame played its B side in the first half and the C in the second. Smiggen was pleased with the second game.

"It was a good experience for our guys especially because they didn't have the first action in a real game for a lot of them. They just out-experienced us." Mike O'Connell scored for the B side in the first half.

The Rugby Club will have its first home match of the year this Sunday at Stepan Field at 2 p.m. The Irish will send three sides against top five rated Bowling Green.

Gain 99 yards on 16 rushes.

It's the physical strength of Michigan State that impresses Holtz. "I don't know of any team that's so strong year in and year out," said Holtz. "We know they'll control the line of scrimmage."

The Notre Dame lines may have something to say about that.

Backs
continued from page 16

Trumped for a total of 146 yards on 38 carries for a 3.8 average, including 80 yards on 20 carries against the much heralded Michigan defensive line. Not only is Johnson the Irish leading ground gainer but he is once again resuming the role of the go-to man on the goaline situations. Johnson has played over the touchdown line twice this season and is on the track to lead the Irish in touchdowns for the second straight season. Last year, Johnson plunged in 11 touchdowns for more than any other Irish player. But Johnson's duties do not end on the field.

"No doubt, he is the guy who has been in all the big games," gleamed Strong. "He is the workhorse of the team. He is a very mature person on and off the field."

There is little question about Johnson's importance to the 1989 squad. But what would happen if Johnson couldn't fulfill his duties during the season, the Irish coaching staff was looking to junior Ryan Mihalko to fill the second team slot upon hearing that Johnson was going to miss the game. Mihalko is not only an excellent athlete, but a very productive. Nobody has come through this backfield this year and said 'this is my job, this is my position.'

At the tailback position, Strong is faced with a pleasurably demanding dilemma. Strong has the privilege to call on the elusive Ricky Watters or the sure-footed Rodney Culver to fill the slot vacated by the talented Mark Green. At this point in the season, Watters is first on the Irish depth chart and deservedly so. In the Virginia Tech game, Watters was producing well, rushing for 82 yards on 16 carries and the Irish's two winning streaks on the line Saturday. Baring back to last year, the Irish have won 14 consecutive games for the sixth-longest winning string in school history. The record is a 21 game streak from 1946 to 1948.

The Irish also have won 12 home games in a row. The last time they lost at Notre Dame Stadium was a 24-19 decision in eventual national champion Penn State in the last home game of the 1986 season. Notre Dame has a 12-3 home record during the Holtz tenure.

BRIDGE PUZZLE

Join The Observer and help make a difference in your world!
Michigan State football coach George Perles has a pretty good idea about his kickoff strategy for this weekend.

After watching Notre Dame's Raghib "Rocket" Ismail score two touchdown returns in last Saturday's 24-19 Irish win over Michigan, the Spartan coach has all but made up his mind.

"The question arises, 'Are you going to kick it off to Rocket Ismail?' Of course I'm not," said Perles. "I've seen enough from that last game." Perles did agree with Michigan coach Bo Schembechler's decision to kick it off to Ismail again in the second half and the Wolverines had cut Notre Dame's lead to 17-13.

Schembechler remembered the Notre Dame kickoff 92 yards for another Irish score, and Schembechler has been criticized for not calling a squib kick in that situation.

"If you ask me would I have kicked it to him (Ismail) again like Bo did, I probably would have," said Perles. "I wouldn't think he had a magic wand and could do it every time."

Holz used Tuesday's press conference as an opportunity to praise the entire kickoff return team, which also includes Pat Eifers, Frank Jacobs, Anthony Johnson, Eric Jones, Scott Kowalkowski, Ryan Mihalko, Stan Smagala, Michael Smalls, Irv Smith and Shawn Smith.

"They really take pride in what they do," said Holz, "and if you have an outstanding returner, the rest of the football players are anxious to block him because they know there's a chance something good will happen." The Notre Dame-Michigan State contest will mark the homecoming of Jeff Pearson, the former Irish offensive guard who transferred to the East Lansing campus. Pearson started as a sophomore in 1987 on a senior-dominated offensive line that helped lead the Irish to an 8-4 record and Cotton Bowl appearance. He left for Michigan State the next year, citing personal reasons.

"There were two seniors on the second team that year, but he started for us," said Irish coach Lou Holtz. "I think that says it enough, when you start on a team that goes to the Cotton Bowl with four seniors on the line."

Forced to sit out the 1988 season as a transfer, Pearson came back at Michigan State. Perles calls the 6-foot-3, 265-pound junior the strongest player on his team. According to Perles, Pearson can bench-press up to 600 pounds.

Michigan State comes into this weekend as something of a mystery team. It's tough, to rate a squad when its only game has come against a team as weak as Miami of Ohio.

The Spartans' statistics certainly looked impressive in their 49-0 season-opening win. Starting tailback Blake Pear gained 130 yards on 18 carries, and reserve Scott Selzer came off the sidelines to
