Salvadoran rebel attacks leave 39 dead
Associated Press

SAN SALVADOR, El Sal­vador— Leftist rebels attacked government forces in scattered raids in nine provinces Tuesday and military officials said 39 soldiers and guerrillas were killed. The rebels have agreed to peace talks and a communiqué said Tuesday’s actions were in response to government repression.

The communiqué, broadcast on the rebels’ clandestine radio station, called the attacks a “Halt the repression!” offensive and said it was ordered because of the arrest of dozens of unionists.

Military officials said guerril­las attacked targets in nine of El Salvador’s 14 provinces. They listed the casualties as 26 guerrillas and 13 soldiers killed and 18 soldiers, 15 guerrillas and 6 civilians wounded.

It was the broadest rebel off­ensive since May 10 when the guerrillas attacked positions in 10 provinces. And it was the first series of coordinated at­tacks by the guerrillas since government and rebel representa­tives held preliminary peace talks in Mexico City Sept. 13-15.

An 11-day cease-fire declared unilaterally by the rebels ended Sunday. The rebel communiqué spoke of the “fascist brutality” of the rightist government of Presi­dent Alfredo Cristiani, referring to accusations by detainees that they were tortured and raped last week at National Police headquarters.

Cristiani’s government has denied the allegations of brutality.

Shevardnadze calls for cutting of chemical weapons
Associated Press

UNITED NATIONS—Soviet Foreign Minister Eduard Shevardnadze on Tuesday accepted President Bush’s call for deep reductions of chemical arms and challenged the United States to go further and faster.

Shevardnadze said the Soviet Union “will radically reduce or completely destroy” its chemi­cal weapons, halt nuclear tests and stop making weapons-grade plutonium and uranium — all if Washington reciproc­ates.

Shevardnadze, speaking to the U.N. General Assembly, said the two governments have nar­rowed their differences and he predicted that by the U.S.-So­viet summit next spring or summer, “We may have passed the last turn on the road” to­ward a treaty reducing strateg­ic arms by 50 percent.

There was a quick response from the White House. Bush said, “I am very pleased with the way things are going. The reaction from the Soviets to our proposals yesterday has been positive so now the goal is get past moving and try to work out these agreements.”

White House Press Secretary Marlin Fitzwater called Shevard­nadze’s statement “a very constructive response. Our ul­timate objective is total elimi­nation of chemical weapons. And it appears that both na­tions are now ready to act.”

Shevardnadze also said that if NATO countries agree to start talks on tactical nuclear weapons, the Soviet Union will respond by further unilateral cuts in its tactical nuclear mis­siles in Europe.

He repeated his government’s call for a nuclear test ban and said Moscow was considering extending a 1963 treaty to cover underground nuclear ex­plosions.

Secretary of State James Baker later praised Shevard­nadze’s nearly hour-long ad­dress as “a good speech, an in­teresting speech.” He called it “very responsive to the Presi­dent’s statement” on chemical weapons.

But Viktor Karpov, the Soviet Union’s chief arms control ex­pert, told reporters, “Our ul­timate objective is total elim­ination of chemical weapons. And it appears that both na­tions are now ready to act.”

Shevardnadze praised the Bush administration’s “very responsive to the Presi­dent’s statement” on chemical weapons.

Shevardnadze praised the U.S. and Soviet dialogue and said progress had been made in re­cent talks.

“These talks have demon­strated the increasing aware­ness by both sides of the need to cooperate for the benefit of mankind and the growing con­fidence that such cooperation is possible.”

Agreement to hold a summit meeting next year, he said, “shows that we have moved quite far ahead in solving a number of major bilateral and international problems.”

But he said extraordinary ef­forts at the highest level will be needed to conclude an agree­ment.

300 prison inmates riot in gang-related fighting
Associated Press

CHESTER, Ill.— Gang-related fighting broke out among more than 300 prison inmates Tues­day, and guards fired shots to break it up, officials said. One inmate was killed and four others were wounded.

Altogether, more than 20 people were injured in the dis­turbing at the maximum-se­curity Menard Correctional Center, including two guards, prison authorities said.

The disturbance began in the dining hall and spread into the South Cellhouse and the West Cellhouse of the century-old prison, said Illinois Department of Corrections Director Michael Lane.

“The disturbance certainly was gang-related, and consid­ering the nature of the gangs here, it had definite racial over­tones,” Lane said.

Lane said 21 inmates were injured, and eight were hospi­talized, most with stab wounds. One inmate was killed, said Lane, who arrived at the scene shortly after the fight broke out around noon.

Two staff members also suf­fered injuries, he said.

Eric Freeburg, spokesman for Chester Memorial Hospital, said later that nine inmates were brought to the hospital. Four had gunshot wounds, he said.

Lane said guards fired as many as 50 shots in breaking up the disturbance, which in­volved from 300 to 325 of the 700 Menard inmates who were out of their cells at the time.

Many of the shots were warn­ing shots fired into the air, Lane said. He would not specify whether guards fired directly at inmates. But prison spokesman Nic Howell said the slain inmate was found with a .22-caliber handgun and was killed by gunfire.

For more information about PRISON's page, please see PRISON / page 4
China's Communist Party leader Jiang Zemin took a hard line Tuesday at his first news conference, insisting that those arrested in the spring democracy movement were criminals and refusing to rule out more executions. Asked by a reporter if the "Tiananmen Square" incident was a rebellion opposing the Communist Party, he said, "I don't believe it was a tragedy." Tiananmen was characterized by a government crackdown.

Soviet Union agreed on a plan to test balancing systems for the two rival superpowers, but the two sides appear to have been caught off guard by the Soviet unilaterality.

Cancer researchers have identified precise abnormalities in an anti-cancer gene linked to lung cancer, raising the possibility of early diagnosis and better treatment for the 150,000 people who get lung cancer each year. During the last several years, researchers have found indirect evidence that defects in at least six genes can contribute to the formation of lung cancer. A new study has pinpointed precise chemical changes that should be useful for identifying people at high risk of getting lung cancer, or for predicting how deadly a particular case of lung cancer will be, said the author of the study's findings, Dr. John Minna of the National Cancer Institute-Navy Medical Oncology Branch in Bethesda, Md.

Most students on campus eat at least two meals a day. Those meals are usually a time to socialize with friends and catch up on the latest gossip, and so should be a good time. But lately, the service, or lack thereof, has been making the meals almost a chore.

North Dining Hall was rebuilt and re-engineered, I thought, with the purpose of reducing the lines that used to extend out the door, and making the dining experience more pleasurable for the students. Since we have been in session this semester, I have yet to experience a truly pleasurable meal.

The problem first and foremost, is the state of the salad bar. It is an excellent idea, and if it were filled with its respective fixings, a student could make a meal out of that alone.

But many times I have had to hunt through the dining rooms to find a tray of lettuce, or green peppers that are not soft to the point of being able to squish them through my teeth. I have waited an hour for a tray of ketchup, or that little ridiculous paper cover I always have to hunt for. I have watched a dining hall worker take inventory of the salad bar, take away empty trays, and never come back. Do they get lost in the back somewhere? Do they make the kitchen themselves?

Those rare times when the fixings are available, they are usually on the borderline of inedible. Call me a picky eater, but I don't know of too many other people who could enjoy eating the heart of a head of lettuce, and I do not think the students do, either. It is brown. It makes one wonder if any worker looks at what is being thrown into those trays. If they did, I highly doubt that in fact they would make it into the dining room. It also makes me wonder exactly why those items sit out. Is there a reason for this?

The salad bar is not the only aspect being neglected. Many a night there has been only chocolate milk. No skim. No 2 percent. Only whole milk. If a person were to have run out of all other types of milk, someone just is not filling them up. Many times there has been only市onated water in the pop machines. Many times there is no ice. There is a reason for this? Lines are still rampant in the dining hall as well. Granted, everyone who has a class that lets out at 12:00 immediately goes to lunch, lines are bound to be long. But what about when the lines form with students just starting at empty food trays behind the glass? I find it hard to believe that no food is cooked in advance.

The University has spent a lot of money on re-building NDB to better serve the students, and yet the students are suffering. It is not right for the students to dislike going to their meals. From what I have heard from friends at other schools, our food is better than most. It is the service that is causing the dislike.

Two years ago, in the old NDIH, no problems like this occurred, except for the lines. The salad bar was always in fine condition — we never wanted for any combination of any sort. In fact, one worker had the sole job of tending to the salad bar. It leaves me wishing for the ugly interior and long lines for the sake of better service.

The students, or their parents, are spending over $1,500 per semester on room and board. And that figure includes meat. We should get what our money's worth.

Is it a matter of being understaffed? Is it a matter of being uncaring? Whichever it is, it must be rectified. The University has been running a dining hall for many years now. It should know how to run one correctly.
Reagan, Bush to be issued subpoenas

Associated Press

WASHINGTON—John Poindexter will subpoena Ronald Reagan and President Bush in an attempt to obtain their diaries and notes, the former national security adviser said in court papers released Tuesday.

Facing a criminal trial next year in the Iran-Contra scandal, Poindexter said he needs the records for his defense.

"Former President Reagan believes that his diaries and notes are 'personal records,"' Poindexter said in the papers filed late Monday and made available Tuesday.

"President Reagan's 'personal' diaries and notes remain in the former president's possession and were not transferred to the National Archives" when he left the White House, the court papers said.

Poindexter's lawyers said in court Sept. 6 that Reagan's notes will reflect that he authorized some activities for which the national security adviser was indicted in the Iran-Contra scandal.

Poindexter said vice presidential records at the national archives have yet to be processed and that to date no personal diary from Bush's tenure as vice president has been discovered.

Poindexter's lawyers also say he regularly briefed Bush on aspects of the Iran-Contra affair following meetings which the vice president missed.

Poindexter said he intends to serve "subpoenas on the former president and former vice president personally."' The Associated Press

Poindexter asked that U.S. District Court Judge Harold Greene set a pre-trial return date for subpoenas of presidential and vice presidential records and personal records of Reagan and Bush.

The former national security adviser is charged with one count of conspiracy, two counts of obstructing Congress and two counts of making false statements in the Iran-Contra affair.

The Presidential Records Act says diaries, journals or other personal notes of the president which aren't prepared in the White House, the court papers said.

Poindexter's lawyers said in court Sept. 6 that Reagan's notes will reflect that he authorized some activities for which the national security adviser was indicted in the Iran-Contra scandal.

Poindexter said vice presidential records at the national archives have yet to be processed and that to date no personal diary from Bush's tenure as vice president has been discovered.

U.S. invites Soviets to inspect SDI

WASHINGTON—The chief U.S. negotiator to the superpower Defense and Space Talks in Geneva says Tuesday he hopes the Soviets will accept an invitation to visit two U.S. research sites.

"I would be hopeful... that we could work out the arrangement in the coming round so that the trip could take place in the coming months," Ambassador Henry Cooper told reporters at a Pentagon briefing.

The negotiator discussed the invitation extended by Secretary of State James Baker in his talks with the Soviet Foreign Minister Eduard Shevardnadze in Washington.

Cooper said he intends to press ahead with the offer in the new round of Geneva talks, which begin Friday.

Cooper said that Shevardnadze had reacted positively to Baker's invitation, but that he could not characterize the Soviet reaction as an acceptance.

Keane named to APQC board of directors

Special to The Observer

John Keane, North professor of strategic management and Global Organizations at the Graduate School of Management, has been named to the board of directors of the American Productivity and Quality Center (APQC). The board, with members from government, business administration, research and other governmental organizations, is the highest governing body of the Center.

APQC's research efforts were a 1986 study of the use of employee involvement and flexible pay strategies to improve productivity and a 1988 study, funded by the U.S. Department of Labor, to assess more accurately the cost of substance abuse in the workplace.

Keane assumed the Gillen deanship at Notre Dame in January 1989 after serving as director of the U.S. Bureau of Labor Statistics. APQC founder C. Jack Mendell, USC professor of strategy and corporate management, said, "I'm very pleased with this appointment. John Keane is a leading businessman in the area of productivity and quality. He has made many contributions to APQC and I have no doubt that he will make many more."
Time to launch assault on massive weaponry

By Matt Janchar

"Shun the Gun!"

In 1968, this chant, and several others like it, echoed across the White House lawn and into President Lyndon B. Johnson's Office of American Youth every morning. A generation of Americans voiced their objection to the violence and destruction of the Vietnam conflict with words and protests across the nation. Today, sixty years later, those echoes seem to have been awakened in Washington and in many of the nation's major urban centers. We are again affiliated with the disease of violence and destruction. However, this disease does not plague Americans from the generation of miles across the Pacific as it did in the 1960s. It is the disease of assault rifles, gang warfare and drug executions. It is the disease of Stealth bombers, paint guns, and national posturing.

We live now in a society that looks at weaponry with admiration instead of disgust. Our Department of Defense proudly displayed an airplane literally worth more than its weight in gold—Pay-by-the-clip assault of yesterday, and then move on to the causes of today and their effects on tomorrow. We only contrast the past with the present in an attempt to see the present more clearly. It could be successfully argued that the turbulence of the 80's is not turbu­lence of the 60's. It is the disease of assault rifles, gun warfare and drug executions. It is the disease of Seattle, Ypsilanti, Stockton, Louisville, or Ysidro, Stockton, or Louisville twenty years from now? Probably not. These specific incidents will merit little commemoration in the twenty­anniversary of the incident. Will we remember San Ysidro, Stockton, or Louisville twenty years from now? Probably not. These specific incidents will merit little commemoration in 2010. Since the Vietnam Era, America's respect of the gun has been heightened, along with its insensibility to the violence of the gun. The turbulence of the 60's is not expressed with words or chants; it is expressed with bullets.

In our attempt to end the af­liction of ultra­violence, it is imperative that we not impede our progress in the fight against the violence of our political system. The plague of drug and gang violence and the senseless af­liction of assault rifle massacre cannot be labeled as ill­natured assault or even NRA platforms.

The generation of the 1960's refused to live by the sword for fear they would die by it. The generation of the 1980's has chosen to draw that sword, and blood has begun to spill.

Matt Janchar is a student in the Freshmen Year of Studies.

McFarlane’s speech illustrates need for new thinking

Dear Editor:

After hearing Robert McFar­lane speak, I feel compelled to respond to some of the things he said and provide an optional solution.

First, with respect to SDI, he claimed, using Agreed Statement D to the ABM Treaty of 1972, as his basis, that the treaty allowed discussion about the development and deployment of futuristic technologies. He neglected to say, and the legislative and diplomatic history is very clear on this, that this only applied to fixed­land based systems, not to space­based, air­based, sea­based, or mobile­land­based systems—advanced development and testing of these other types is still prohibited under the ABM Treaty. His attempt to reinterpret the ABM Treaty flies in the face of logic and history.

Second, and this is some­thing that anybody at Notre Dame or any other intellectual community, regardless of political stripe, would outraged about) at the reception after his talk. McFarlane stated that there should be restrictions on academic freedom. This type of remark, however, should not be surprising in light of his in­volvement in the decidedly un­democratic, secret Iran­Contra operations.

The context in which this re­mark was made was also indicative of his operating framework. He berated the Soviet Union for repression and intervention in other countries. This is true. Stalinism was a he­reditary period in Soviet history, as were the invasions of Hungary and Czechoslovakia. However, he and others who condemn the Soviet Union with such moral indignation seem to forget similar acts committed by the United States.

They forget our multidifu­nous invasions of Nicaraguan history: the part the U.S. played in the overthrow of the constitutionally elected Arbenz government in Guatemala in 1954; how the U.S. ruined the economy of Chile, and then helped to overthrow Salvador Allende in 1973; or the role the U.S. played in installing and supporting the brutal regime of the Shah of Iran for 30 years.

The list goes on, but McFarlane and others ignore this part of U.S. history because it undermines their claims to the moral high ground. His restrictions on academic freedom would pre­vent discussion on these issues. Finally, talking about moral­ity, McFarlane claimed that SDI is moral because it puts lever­age on the Soviet Union to agree to reduce the number of nuclear weapons to a more manageable level. Regardless of whether this is the main intent behind SDI—I maintain it is not, and it certainly was not former President Reagan’s ini­tial concept—his goal of going down to a lower level of nuclear weapons is immoral.

Since the only possible use for these weapons is the mass de­struction of human life, the only moral position is that all nuclear weapons should be abol­ished. However, it is clear, nei­ther McFarlane nor the current administration, nor almost anybody else in decision­making positions want this to happen.

EVERY MAN'S NIGHTMARE  
BLACK MAN'S REALITY

Two South Africas

By Mike Schadek

Just a 15 minute ride from the splendors of Cape Town, the Crossroads is a shantytown of 55,000 people stricken with extreme poverty.

"There are two South Africa: one for the whites and one for the blacks."

When I received my first glimpse of how the vast majority of South Africans live, I couldn't believe my eyes. I thought I had an understanding of what the townships were like.

I was absolutely wrong. After a 15 minute ride from Bishopscourt, I stepped out of the car in Crossroads, a black shantytown comprised of about 55,000 people. I became physically ill at the sight. It was poverty unlike anything I have ever seen, and I couldn't believe any government could allow people to live in such conditions. The people live in whatever they can find, and garbage litters the narrow paths between the shanties. It was simply an unexplainable sight and one I shall never forget. As we were leaving Crossroads and got on the highway into Cape Town, I looked back for a final glimpse of the shanties. Such a view was impossible because the government had erected huge mounds of earth on the side of the highway to obstruct sight of the Crossroads. "Out of sight, out of mind," replied my guide, and we headed back to the white areas of Cape Town.

Mike Schadek is a senior government major. This is the first article in a series on South Africa.

The Observer / Laura Stanton
Smith Corona presents three products that can help make schoolwork academic. The Smith Corona PWP 2000 Personal Word Processor is in a class by itself. It’s so compact it can fit in the most compact dorm room. Yet, thanks to features like a built-in disk drive, 100,000 character DataDisk capacity, and a crystal clear display, it makes it easy to transform B5 into A5.

For those who prefer an electronic typewriter, the Smith Corona XD-4600 is the typewriter of preference. With its 16 character display and approximately 7,000 characters of editable memory, you can have the convenience of word processing features with the simplicity of a typewriter.

Of course, the pocket-size Spell-Right “300P” also comes with impeccable references. In this case, a built-in electronic dictionary, a thesaurus, a calculator, even a collection of challenging word games.

So if you’re thinking Magna Cum Laude at the end of this year, don’t forget to think Smith Corona. It’s the only typewriter of its kind that deserves your attention.

Wednesday-Friday
Hey, hey, holy mackerel: Cubs clinch NL East title

Associated Press

MONTREAL — The Chicago Cubs clinched their second National League East championship in six seasons, beating Montreal 3-2 Tuesday night with an unearned run in the eighth inning after second-place St. Louis already lost.

The Cubs took advantage of the Cardinals’ 4-1 defeat in Pittsburgh and became the first team to guarantee a spot in the playoffs and to clinch sole possession of first place St. Louis already lost.

The Cubs brought up a new team with different expectations.

“We’ll have to play the best we have played all year,” stated Lambert. “Since we are not set to scout them before the match, it will be less of Purdue’s performance and more of our own that determines the outcome.”

Notre Dame comes into the match with a 2-8 record while Purdue enters the contest at 5-6. Although the Irish haven’t won a lot of matches, Lambert insists that they are competitive and able to compete with anyone.

“Our record is very deceiving,” said Lambert, “but we are making progress every day through competitive practices. Our goal is to play better than the match before, and so far we have done that.”

The Boilermakers will be led by outside hitter Debbie McDonald and setter Kelly Niedoba. Both are formidable forces at the net and should challenge the young Irish front row. According to Lambert, blocking is the key to stopping the Purdue tandem.

“If we do a better job blocking,” said Lambert, “we probably will come away with a win.”

The Irish attack will include senior outside hitter Kathy Cunningham and freshmen Alicia Turner and Jessica Fiebelkorn. All have performed well in the early season and are expected to continue their style of play in the future. Junior Amy White, who could make the jump from setter to outside hitter, will be a catalyst for the Irish as senior Taryn Collins will assume the setting job.

“Jennifer Slosar and Tracy Shelton are both expected to contribute greatly in the match.”

History is not on the side of the Irish, but home court advantage is. Notre Dame has a great chance to put a mark in the win column against the Boilermakers in front of a supportive home crowd.

“We can’t continue to play two linebackers,” said Lambert. “We’ve got to find out if (freshmen) are ready to make a contribution to this team. We have no other option or we’ll be a basket case by the end of the season.”

Purdue enters the contest at 5-6. Although the Irish haven’t played well in the early season and are expected to continue their style of play in the future, the Boilermakers will be a catalyst for the Irish as senior Taryn Collins will assume the setting job.

“Our experience is a problem right now,” stated Lambert. “As we play more I expect great things from our younger players—they are excellent athletes.”

Notre Dame’s four turnovers were not the only thing that had Lou Holtz concerned after the 21-13 season. Depth problems at linebacker and in the offensive backfield are of major concern.

“We can’t continue to play two linebackers,” said Lambert. “We’ve got to find out if (freshmen) are ready to make a contribution to this team. We have no other option or we’ll be a basket case by the end of the season.”

Irish look for young players to step in and contribute

Notre Dame’s four turnovers were not the only thing that had Lou Holtz concerned after the 21-13 Irish victory over Michigan State last weekend. Depth problems at linebacker and in the offensive backfield have the Fighting Irish coach wondering how his team can survive the 12-game regular season.

“Last year we got better as the season went on,” said Holtz. “One of the reasons was we could play a lot of different people. Right now we don’t have that depth.”

“We’ve got to find out if (freshmen) are ready to make a contribution to this team. We have no other option or we’ll be a basket case by the end of the season.”

Holtz’s pre-game pessimism rarely is taken too seriously. In his three-plus years at Notre Dame, Holtz has made a habit of spending the week discussing the weaknesses of his team then watching the Irish feast on opponents every Saturday.

This time, Holtz doesn’t seem to be blowing smoke. A look at the Irish depth chart shows just how precarious Notre Dame’s situation has become in certain areas, particularly at linebacker and running back.

Ned Rolfe and Donn Grimm have played nearly every down at linebacker each of the past two games. “We can’t continue to play two linebackers,” said Holtz. “We have to play more people even if it costs us dearly.”

After sophomore Michael Small, the reserves at linebacker were freshmen Brian Ratigan, Nick Smith and Randy Scranna - all freshmen. In the offensive backfield, Ricky Walters is the only completely healthy running back with any kind of college experience.

Rodney Culver missed most of the Michigan State game after suffering a hip pointer during a second-quarter fumble, but he should be ready for the Purdue game. Anthony Johnson has nagging aches that are an inevitable result of playing almost every down at fullback.

With the early-season loss of Kenny Spears to injury, Brian Ratigan, Nick Smith and Randy Scranna - all freshmen. In the offensive backfield, Ricky Walters is the only completely healthy running back with any kind of college experience.

Rodney Culver missed most of the Michigan State game after suffering a hip pointer during a second-quarter fumble, but he should be ready for the Purdue game. Anthony Johnson has nagging aches that are an inevitable result of playing almost every down at fullback.
