Book thieves nabbed in stakeout
Security rapidly coordinates tips from diverse sources

By KELLEY TUTHILL
Assistant News Editor

Notre Dame Security arrested two individuals Wednesday and charged them with class D felony for bookbag theft. According to Phil Johnson, assistant director of Security, the investigation began after someone from a local bookstore called Security saying that they believed that someone had sold the store potentially stolen books. The store gave a description of the people and their car.

Investigators from Security had a stakeout on Douglas Road near the Notre Dame Federal Credit Union where they thought the car might pass, said Johnson.

Security sighted a car meeting the description and eventually stopped the car off of South Bend Avenue at the 1100 Block of E. Dury Street, said Chuck Hurley, assistant director of Security.

At the same time Father David Burrill, professor of philosophy/theology, told Security he saw a bookbag thrown from a car traveling east on Douglas Road away from Highway 31, said Hurley. Burrill described the car to Security and turned in the bookbag. Security was able to make an arrest based on Burrill's description of the car, said Johnson.

Joseph Anthony Husband, 21, and Lisa Husband, 28, both residents of South Bend, were charged with class D felony, he said.

The bookbag belonged to a store called Security saying that they believed that someone had sold the store potentially stolen books.

Aftershocks shake N. California

Associated Press

SAN FRANCISCO-- Three strong aftershocks rattled a jittery Northern California on Thursday, and rescuers who turned to much of downtown after the 7.1 earthquake Northern California on Tuesday at Candlestick Park in San Francisco.

Many people left work early to watch the third game of the World Series, scheduled to start at 5:30 p.m., and 60,000 people already were across the bay in San Francisco at Candlestick Park when the quake struck at 5:04 p.m.

The World Series will resume Tuesday at Candlestick Park in San Francisco.

San Francisco donations will be collected at game

Donations for the San Francisco earthquake victims will be collected by Red Cross volunteers at the ND/USC game Saturday.

Volunteers with collection cans will be stationed at the entrance gates and in the parking lot, and will have Red Cross symbols on their clothing to identify them. In general, organizations are not permitted to collect money at Notre Dame football games.

"It's an exception to the rule," said D.K. Bell, a Red Cross employee. "This is a unique situation, that they're allowing us to collect. Because we're playing Southern Cal, and because of the earthquake, it's appropriate.

Donations for the San Francisco earthquake victims will be collected by Red Cross volunteers at the ND/USC game Saturday.

Volunteers with collection cans will be stationed at the entrance gates and in the parking lot, and will have Red Cross symbols on their clothing to identify them. In general, organizations are not permitted to collect money at Notre Dame football games.

"It's an exception to the rule," said D.K. Bell, a Red Cross employee. "This is a unique situation, that they're allowing us to collect. Because we're playing Southern Cal, and because of the earthquake, it's appropriate."
Football tradition and spirit is common ground to many

The spirit of Notre Dame is alive and well in South Bend today as a particular fan realizes a dream and millions of fans prepare to watch the ND-USC game tomorrow.

Tomorrow, a special fan will be at Notre Dame Stadium cheering on the Irish as they beat USC. His name is Sully Sullivan and his trip is the culmination of a lifelong dream. Since Sullivan was a boy he has dreamed of seeing ND play at Notre Dame Stadium, especially against USC.

He said his first encounter with Notre Dame was in the early 1940's when he was six or seven. Sullivan was at a train station with his father when the Notre Dame team stopped on route to Southern California. He said the players looked around and autographed his football. His love affair with the University began that day and tomorrow will show it.

Since that day Sullivan followed the team over the years in the newspapers, on the radio and on TV. He also met a former USC football player while in the service. For several years the player got Sullivan tickets for the ND-USC game right in the middle of the SC student section. He said he wore all his ND attire and cheered his lungs out, much to the dismay of the fans around him. He loved going to the games, but really wanted to come to Notre Dame.

This year Sullivan met a man who ultimately made his dream a reality. While vacationing in the Caribbean he met a woman and got tickets to the Husky game. He also met a 1972-3 ND football player, and his wife. Szatko's wife noticed Sullivan as he was wearing an array of ND clothing. During the vacation the couple talked and Sullivan said he told Szatko about his dream and his inability to get ND tickets.

A month ago Sullivan said he received an envelope with tickets in them, but soon discovered that they were void. Two weeks later he received another set of void tickets. Finally he received the real things. He got two tickets to see ND play USC.

Sullivan said that he has a list of feats he would like to accomplish in his lifetime and this was one thing he really wanted to come to Notre Dame.

In 1947: Hollywood came under scrutiny as the House Committee on Un-American Activities opened hearings in Washington into alleged communist infiltration in the movie industry.

In 1944: The sale of alcoholic beverages will be prohibited in Cary for the 12-hour period while polls are open in the Nov. 4 referendum on casino gambling, the Alcoholic Beverage Commission said today. Indiana law prohibits alcohol sales during primary and general elections, and the commission said it believes the Legislature intended the same prohibition to apply to special elections.

Speaker urges resolving racial differences in business

By BRADLEY GALKO
Staff Reporter

Resolving racial differences in the United States will be the means of keeping America economically competitive in the world market, said Ronald Homer, president and chief executive officer of Boston Bank of Commerce.

Homer, a 1968 graduate of Notre Dame, spoke to a small crowd in the Montgomery Theater Thursday in the Alumni Association's annual Distinguished Alumni Lecture.

"How we reconcile the issue of race in our country and how we begin to integrate all of the people into our society," said Homer, "is really going to be the test of whether we can survive as a country."

"I don't think we'll be able to compete, going forward with other countries," he added, "if we do not have all of the people in this country highly productive, all well motivated, and all pulling on the same oar."

To illustrate this, Homer compared the United States to Japan where the work force is highly homogeneous.

While comparing the upper and lower halves of the Japanese work force, he cited the similar backgrounds, few barriers, small wage gap, and high motivation of the lower half of the Japanese work force, in contrast to America's minority-dominated lower half, as an integral factor as to why Japan is more competitive than the U.S. in world markets.

On racial inequalities he said, "We (blacks) will not break through the ceiling of a lot of major corporations, until the broader community accepts our whole community."

"We're going to have to use the media and the tools that we use to sell people soap (goods)," he added, "to turn that and say we're going to sell this population black, hispanic, Asian, poor, on the fact that they can get into America... that there's a way to get in."

"It's a matter of attitude, then putting the resources in place," he said. "We're not on the same team. It seems we're trying to knock each other out."

In addition to being a 1968 graduate of the University, Homer is treasurer of the Black Alumni of Notre Dame and a member of the advisory council for the University's College of Business Administration. Chief Executive of Boston Bank of Commerce since 1983, his leadership has helped the bank grow at an average rate of 35 percent per year. Its deposits have increased from $11 million to $31 million, and its assets have grown from $11 million to more than $58 million, a press release said.

Homer, who earned an MBA from the University of Rochester in 1971, says Boston Banks' assets are now around $78 million accumulated "primarily in lending money in urban environments."

He says he entered banking over his "concern over black economic development."
Earthquake rumbles north China

Associated Press

BEIJING — A severe earthquake rumbled across rural northern China early Thursday, knocking flat about 8,000 homes, killing at least 29 people and injuring 14, according to Xinhua News Agency and other official reports.

Xinhua said in a brief report that aftershocks continued.

The quake was centered about 135 miles west of Beijing on the border of Shanxi and Hebei provinces and struck less than 24 hours after a massive earthquake hit the San Francisco area, but State Seismological Bureau officials said there was no evidence the tremors were linked.

Residents of Beijing felt the tremors, but no reports of damage surfaced and the bureau said there was no need to take safety measures in the capital.

The epicenter was near Datong, famous for its Yungang Grottoes that hold thousands of Buddhist paintings and statues dating to the 5th century. Whether any caves were damaged was not reported. Efforts to reach Datong by telephone failed.

The Seismological Bureau said an initial quake hit at 10:57 p.m. Wednesday (10:57 a.m. EDT) and measured 5.7 on the Richter scale. At least four others registering 5 or above hit in the next six hours, including a quake of 6 on the scale at about 1 a.m. Thursday (11 p.m. EDT Wednesday).

An aftershock measuring 3.1 hit at 6:29 p.m. EDT Thursday, Xinhua said. More than 300 lesser aftershocks were recorded.

Nearly 24 hours after the first of a series of quakes almost no details were available from the government or official media about extent of damage.

China's prime time national news program gave extensive time on Thursday to Premier Li Peng inspecting a stadium and a continuing campaign against pornography, but failed to mention the killer earthquake that was felt in Beijing.

It takes days for the details of many major disasters to be reported, and many, particularly industrial accidents, are still ignored by the official press.

The region affected by the Wednesday/Thursday quakes is a dry, windswept farming area, where wheat and other grains are grown and where most homes are built one-story high of unfired clay bricks, vulnerable to collapse in an strong quake.

Shanxi also is China's main coal-producing province and mines pack the stark land.

Xinhua earlier quoted Seismological Bureau sources as reporting another earthquake early Thursday in China's far west region of Xinjiang and Gansu. However, bureau officials later said they had not confirmed any tremors in the sparsely populated desert area.

Earthquakes are frequent in China. Last month one hit southwest Sichuan province, injuring 24 people and destroying 4,000 homes. Five earthquakes with magnitudes registering up to 6.7 on the Richter scale hit western Sichuan in June and July, killing 11 people.

China's worst earthquake in recent history leveled Tangshan in the northeast in 1976, with a magnitude estimated at up to 8.2. The official count listed 240,000 dead, but unofficial estimates put the toll at three times that.

57 killed in Soviet military plane crash on Thursday

Associated Press

MOSCOW — A military transport plane carrying paratroopers to keep order in the ethnically torn southern republic of Azerbaijan lost an engine and crashed in the Caspian Sea, killing all 57 aboard, officials said Tuesday.

The left engine of the Iljuishin-76 plane caught fire minutes after it took off from an unidentified airport in the Azerbaijan province of the Caucasus Military District, Izvestia said.

"The fire spread so fast that within three minutes, the engine fell off, but the fire did not stop," the newspaper reported, quoting Col. Gen. Pankin. He said Cmdr. Kalinov, 48, had tried to fly the crippled plane back to the airport.

A few miles from his goal, "the Iljuishin careened sharply to the left and fell" into shallow water less than a mile from shore, the newspaper said.

Tass did not say more precisely where or when the crash occurred. It said the huge transport plane carried a crew of seven as well as 50 passengers.

Interior Minister Vadim Bakatkin told a news conference that rescuers initially believed some of those on board might have survived.

"It was during the night so rescue work was very difficult," he said.

Workers recovered parts of the engines and fuselage from the water, he said. Specialists were searching for the plane's "black box," Izvestia said, using the Western term for an aircraft voice and data recorder that might shed light on the reason for the crash.

The I-76 has four turbofan engines. Its wings are mounted atop the fuselage and are 150 feet long, according to Jane's All the World's Aircraft.

Izvestia said the defense ministry expressed its deep condolences to the families of the dead.

Troops have been patrolling Azerbaijan and neighboring Armenia in the last year to prevent more violence between residents angry over the disintegration of Nagorno-Karabakh.

More than 100 people have died in fighting about 8,000 homes, killing at least 29 people and injuring 14, according to Xinhua News Agency and other official reports.

"There were indebted to the people in the South Bend and Notre Dame community who come to Security with information immediately," said Johnson.

"The right choice was there when I needed it. I made that choice, and now I'm a physician. My alma mater may be just right for you. It's your choice."

College student dies in frat hazing incident

Associated Press

ATLANTA—A Morehouse College sophomore died in what school officials said appears to have been a hazing incident in the nation's oldest black fraternity, and school officials said they may expel the members involved.

Medical examiners have not determined the cause of death of Joel Harris, 18, of New York, but they said he appeared to suffer from a heart condition.

School officials said the college had suspended the Alpha Phi Alpha chapter's charter.

The fraternity's president, Gregory Burrell, could not immediately be reached for comment Thursday. The fraternity chapter does not have a house, and he said the 110,000-member fraternity knew of Harris' history of heart trouble.

"At first they thought he was faking it, but then when they realized he wasn't faking, they called 911," Willis said. "Next thing they knew, they looked around and the fellow was lying on the floor." Willis said that according to the potential pledges, the fraternity brothers knew of Harris' history of heart trouble.

"Joel wasn't really picked on," Willis said. "They (pledges) said they didn't see Joel get hit."

Rescue efforts, who were pushed and shoved around" when they failed to correctly answer questions about the fraternity.

"Joel wasn't really picked on," Willis said, "They (pledges) said they didn't see Joel get hit."

The 15-month program entails:

- immediate (June 1990) employment in the Chicago office of a sponsoring accounting firm.
- an accelerated course of study in business and accounting — a growth industry — at Chicago's DePaul University.

Successful completion of the DePaul Professional MSA program results in:

- A Master of Science in Accountancy degree from DePaul University
- Full-time business and accounting experience with a major accounting firm
- Eligibility to sit for the CPA Examination in Illinois
- Broad career opportunities, and advancement, in professional accounting with your sponsoring firm.

Participation is restricted to candidates sponsored by participating accounting firms.

The Professional MSA Program begins mid-June, 1990.

Opening:

TUESDAY 10AM 7PM

DATE: Wednesday, November 1
TIME: 10am & 11am group sessions
LOCATION: Please contact your Career Placement Office for this information.

Are all students, all years, all majors welcome!
Inflation rises modestly in Sept.

Associated Press

WASHINGTON — Consumer prices rose an unexpectedly modest 0.2 percent in September, the government said Thursday, soothing frazzled financial markets, which took the report as an indication the Federal Reserve Board has room to lower interest rates.

Inflation, which had been raging at a 6.7 percent annual rate from January through May, has now subsided to a 4.4 percent rate for the first nine months of the year, the same as in both 1988 and 1987 and well under the Bush administration’s 1989 inflation projection of 5 percent.

Michael Boskin, chief economic adviser at the White House, called the report “good economic news.”

“We're delighted to be able to say that, while we’re always on guard to make sure that inflation remains under control, the concern earlier in the year that inflation was getting out of control appears to have been unfounded,” he said.

The seasonally adjusted increase in the Labor Department’s Consumer Price Index follows an unexpected gain in July and June, and similarly modest 0.2 percent rises in July and June.

Although private economists said inflation was likely to pick up in the fourth quarter, jittery stock and bond markets rallied on Thursday’s news, interpreting it as a sign the Federal Reserve will cut interest rates lower.

By midafternoon, the Dow Jones industrial average had risen more than 49 points.

Because of the stock market turmoil, Federal Reserve Chairman Alan Greenspan, in a letter to the Senate Banking Committee last week, hinted that the central bank could lower its benchmark short-term rate at itsOct. 31 meeting.

By midafternoon, the Dow Jones industrial average had risen more than 49 points.

Analysts predicted another 0.2 percent rise in inflation in October, leaving the year-over-year inflation rate at 3.7 percent.

“Under these circumstances, there is no question that interest rates will fall,” said economist William MacReynolds of the U.S. Chamber of Commerce.

In an effort to contain inflation, the Fed has been using high interest rates to slow the economy. Although wholesale-price inflation shot up 0.9 percent in September, other statistics for the month portray a sluggish economy with weak statistics for the month portray a sluggish economy with weakness in the labor market.

Analysts were surprised by the September inflation data.

They had been expecting higher crude oil costs to ripple through to gasoline pumps, pushing up prices overall by about 0.4 percent.

Fuel oil prices dropped 0.2 percent last month after declining 0.9 percent in August.

“We've seen something of an upside rally spurred by Friday the 13th,” one analyst said.

The rise was concentrated in the price of jet fuel.

Although the Labor Department said the consumer price index rose 0.9 percent in August, consumers watched a 1.2 percent increase for overnight loans.

For overnight loans.

Analysts predicted another 0.2 percent rise in inflation in October, leaving the year-over-year inflation rate at 3.7 percent.

Soviets make airlift as Kabul is heavily shelled

Associated Press

KABUL, Afghanistan—Rockets slammed into the capital's airport and civilian flights were halted Thursday as the Soviet Union was reported to be undertaking the largest airlift since its military withdrawal eight months ago.

The government said shelling in Kabul killed 12 people and wounded 35, though two doctors at a hospital that monitors casualties said they did not know of any victims.

The U.S.-backed guerrillas also shelled a strategic town near the Pakistan border, killing nine people, the government said.

Diplomatic sources in Kabul and Islamabad, Pakistan, said it was the largest Soviet airlift since February, when Soviet troops ended their nine-year intervention in Afghanistan.

Diplomats in Kabul said Soviet-built Antonov-12 transport planes were flying continuously into the airport, dropping off weapons and food for soldiers.

They said the planes were also flying night missions.

Two soldiers said all commercial traffic was shut down for most of the afternoon but Soviet transport planes were operating despite the shelling.

Witnesses said at least five rockets hit the airport grounds, but there were no immediate casualty or damage reports there.

U.S. Rep. Don Ritter, R-Pa., estimated Moscow has increased its aid to $440 million this month. The previous figure had been $250 million to $300 million a month. U.S. aid to the guerrillas has been estimated at $500 to $600 million a year.

An Asian diplomat said the airlift, expected to continue into next week, demonstrated the Kremlin's commitment to the government of President Najib.

Many people underestimated their resolve after they picked up and left," he said. "But they cannot afford to lose Afghanistan, especially with all their problems in Eastern Europe."

Guerrillas have been firing rockets and artillery from the mountains surrounding Khost, where most of the fighting has occurred.

They said the planes were also operating despite the shelling.

Khost is 100 miles southeast of the capital and about 25 miles west of the border with Pakistan, where most of the guerrillas are based.

Dessouza said he had spoken to his family since the earthquake.

"It's kind of a scary scene," he said. "My dad works about five minutes away from that bridge that collapsed."

He said that although he knows many people from the San Francisco Bay area, he has not heard of any of them having been injured in the earthquake.

Today's assignment is quite simple. And quite rewarding. Just study the remarkable features of the Smith Corona XD 5600 and compare them with other typewriters.

After all, how many comparably priced typewriters give you word processing capabilities like Display and Memory, so you can edit, revise and make your work letter perfect. And try and find the Spell-Right® 50,000 word Electronic Dictionary or the exclusive fumble-free Correcting Cassette on anything but a Smith Corona typewriter.

Though we've packed all these features into a portable that weighs under 14 pounds, we've been able to keep the cost equally lightweight.

The versatile Smith Corona XD 5600. It makes buying a typewriter the easiest assignment you'll ever have.
Workers on I-880 cut through the rubble with 'bravery'

Associated Press

OAKLAND, Calif.—Thereek of gasoline dripping from flattened cars and trucks mingled Thursday with the aroma from eucalyptus trees splintered by tons of concrete crashing to the streets below.

On the railing of the flattened upper deck of Interstate 880, markers of fluorescent green, pink and orange spray paint point the way to crushed cars and shattered bodies.

The code is crisp and clear: the letters 1DOA signified a car 43 feet away. Here and there, blood spattered the highway's underside.

The group will discuss student rights in and outside of the classroom, concerning media freedom; and things like the right to contract speakers or program events appropriate to learning, said Kinkopf.

He said that some problems exist currently because schools may restrict events deemed unnecessary or immoral, while the events may be useful in a student's education and freedom to learn.

Other issues N.A.S.C.C.U. discusses in the future may be the role of won in the church, co-ed housing, fraternities and sororities, federal funding for Catholic colleges, and abortion.

The group's structure is not completely determined. Kinkopf, and it is still in the process of working out the final details. He said it likely will be comprised of national officers for public relations and finances, and regional officers with similar duties.

An executive committee of the group will have a meeting in November to work out its finalized structure, and will work out an official first draft of its stance on academic freedom. N.A.S.C.C.U. will then send out the draft to Catholic colleges across the country, said Kinkopf.

The potential for real influence is great," said Kinkopf. "We can react in a united way because we (the members of N.A.S.C.C.U.) all have something in common," he said.

"It has had somewhat of a snowball effect, as more schools hear about the groups more want to join and be a part of it to give their students a voice," Kinkopf said.
Everything is in a constant state of evolution. Life evolves. The Earth evolves. Business evolves. Today's business world has evolved past the Lotus 1-2-3 spreadsheet and into the Microsoft Excel® spreadsheet run on a Macintosh computer.

Like the Macintosh, Excel uses the best of both the evolutionary and the revolutionary. Like pull-down menus, sorting capabilities and font selections. Excel lets you make it the way you want it. Excel is what you make it.

Mac Is What You Make It
Honor Code violators breach inherent trust

Dear Editor,

I have just finished reading with interest Jason Carroll's column entitled, "Honor Code serves University in Notre Only," in the Oct. 17 Observer. Please let me emphasize that what I say here is my opinion and should not be implied to reflect the opinion of the university or my colleagues on the faculty. My original essay, such practices imply an expectation of trust. To vilify the accuser in the classroom, but don't expect my previous essay. He suggests that my essay encourages the students to cheat. The aspect became the focus of my statements troubles me. He states: "(meaning my) statement obviously implies that reporting a student destroys trust." This is not obvious to me. Just because I make no assumption about my students' cheating does not mean that I will hesitate to report a possible honor offense. To refuse to set about arranging traps for potential honor offenses does not mean that I would not find such actions acceptable. Certainly I would assume my responsibility as a member of this academic community, and follow the system that was currently in existence.

In my opinion, I would not be the one whose action breached the trust between classmates. To prepare seating plans during examinations, having a prepared seating plan during exams, having provosts available during examinations and the like. Personally, I feel that such practices imply an expectation on the teacher's part that cheating may occur. As I said in my earlier essay, such practices may return the level of trust assumed to exist between the teacher and the students. I never enter a classroom, or an examination room, assuming someone is going to cheat or attempt to cheat.

Mr. Carroll's interpretation of my statements troubles me. He states: "(meaning my) statement obviously implies that reporting a student destroys trust." This is not obvious to me. Just because I make no assumption about my students' cheating does not mean that I will hesitate to report a possible honor offense. To refuse to set about arranging traps for potential honor offenses does not mean that I would not find such actions acceptable. Certainly I would assume my responsibility as a member of this academic community, and follow the system that was currently in existence. In my opinion, I would not be the one whose action breached the trust between students and teacher. The student, having committed the honor violation, has breached the trust inherent in the system. In other words, I, as a teacher will not set myself up as a student's adversary in the classroom, but don't expect me to condone inappropriate behavior.

This brings us to Mr. Carroll's second point concerning my previous essay. He suggests that my essay encourages the students to cheat. He states: "(meaning me) does not show how the Honor Code can destroy the trust between the students, and therefore weaken the Notre Dame family, while the administration is merely spewing rhetoric about cheaters who will graciously thank the 'nares for their moral conviction." This passage brings up another type of trust, that between classmates. Mr. Carroll appears to believe that the person violating the trust between classmates is the one who brings forward an accusation. On this I emphatically disagree. The student who commits an honor offense has violated the trust that exists between colleagues. To prepare an accusation of such a person should not cause a student to be ostracized. It is the offender who misrepresents his or her ability on an exam, or plagiarizes the work of others, or steals someone else's work and claim that it is his or her own. How can this person continue to be worthy of another's trust? To vilify the accuser in such a situation is ridiculous.

My opinions on academic honor were formed during my experience teaching at the University of Virginia. Abiding by the Honor System was a serious responsibility that most members of the community took very seriously. Accusers were never ostracized for participation in the honor system. Great care was exercised to ensure that the proceedings were contained completely. If I recall anyone on that campus living in fear of a possible accusation. The trust between students was implied, and any honor offense was recognized as a violation of that trust. I have not been fully involved in the development and implementation of Notre Dame's honor system. But I do know that the system was implemented in part because of student comments. When I first started teaching here five years ago, students would regularly complain about academic cheating on this campus. They felt that their grades may "blew the curve," their grades tended to suffer.

As I see it, the administration has implemented an honor system hoping to reduce such complaints. There may be some problems in the existing system—possibly including those mentioned by Mr. Carroll. He feels that there is no room for students to interpret possible violations before bringing an accusation. That may be, I don't purport to be an expert on Notre Dame's current system. But at Virginia, we had a concept called "reprehensibility." A possible honor offense should only be brought to accusation if the accuser felt that action was reprehensible. That is, the offense, if found to be true, warranted expulsion of the offender from the university community. Perhaps such wording could be suggested in adjusting the current honor system.

If Mr. Carroll and other students consider the current system flawed, I hope that they will not summarily dismiss it. In the end, an honor system only works if students support it. Rather than dismantling the current system, let's perceive major flaws in the Honor Code should actively participate in attempts to reform it.

About Mr. Carroll's comment that the honor system at Notre Dame is a marketing ploy. I don't thing anybody ever attempted the University of Virginia because it has the Honor System, but many of its alumni become providers of their alma mater as they witness the disarray at other schools. I hope that these comments clarify my position on the honor system.

Assistant Professor of Management
Oct. 17, 1989
Ntie and political obstacles. Continuously, it is naive to think that in this present day and age, people just aren't racist anymore. We must realize that hatred and discrimination simply disappeared with the end of the Civil Rights Movement of the 60's. Justice and inequality cannot be written off as a thing of the past. It is not, as it was an issue 20 or even 100 years ago. The importance of cultural awareness cannot be stressed enough. It's time for us to wise up.

Yes, it is sad to admit that our world is filled with malice. Moral, economic wrongs and the like are all that plague us. Most everyone, black Americans included. Oh, everyone knows about the civil rights movement and knows about the injustices that go on in America. Everyone doesn't know or does not care about what's right here, right in our own community, we have a serious problem that needs to be acknowledged.

Black students on this campus are fighting a battle of the wits against not only one another, but with an imaginary enemy. In the recent black strike, it is hard to test the time. It is one that has survived integration and the efforts of several thousand ath­letes, professionals and perf­omers. It is one that has even survived the vast achievements of people of African origin. For our campus and ultimately dangerous enemy is for people to constantly face in their lives.

We seem to want to close our eyes on this campus. It's easier that way. On the other hand, one cannot help but see that certain things just aren't right. And when we come to these realizations, we must stand up for what is right and do what we can to combat these in­fringements on human rights.

Black students, if they didn't already know, found out recently that they cannot escape racism. Not even on the cam­puses of prestigious institutions such as Notre Dame. There have been con­sent incidents with certain fac­ulty members. If we are to truly enjoy the "Year of the Family," we must be able to recognize and deal with indi­vidual family members. We must realize that the whole community is affected when any group is unjustly wronged. When racially derogatory statements are made, be it in a classroom, on the quads, or even in a seemingly "innocent" ethnic joke, we all suffer a test of time. It is one that has never missed a home game in the history of Notre Dame. The Notre Dame Band is a tradition. So remember that you are the people lead­ers of the Notre Dame Band. As band members speak softly and carry big sticks. One of their many jobs is to preserve and follow the band tradition. The Notre Dame Band is the priest's of Holy Cross The Notre Dame Band is the priest's of Holy Cross. The Notre Dame Band is the priest's of Holy Cross. The Notre Dame Band is the priest's of Holy Cross. The Notre Dame Band is the priest's of Holy Cross.

However, the narrator never refers to Jim as "Nigger Jim." It is the charac­ters who play the name of "Jim." It is the character who are the beneficiaries of several hundred years of free black labor!

Finally, the poor black athlete must always get a hard knock. To return to the black athlete, I wish we had more minority students. They, as well as the athletes, are the beneficiaries of several hundred years of free black labor. The university never missed a home game in the history of Notre Dame. The Notre Dame Band is the priest's of Holy Cross The Notre Dame Band is the priest's of Holy Cross. The Notre Dame Band is the priest's of Holy Cross. The first set of 28 questions asked "Who wrote the following?" from a list of authors. The questions were on American and British literature, including works by various authors such as Samuel Taylor Coleridge, William Shakespeare, and William Faulkner. The answers were provided in a multiple-choice format with options ranging from authors like Shakespeare and Coleridge to more contemporary authors like Faulkner.

The next set of 28 questions were also multiple-choice and focused on "What work is about?" with a list of titles such as "The Waste Land," "War and Peace," and "The Republic." Again, the answers were provided in a multiple-choice format.

The final set of 31 questions asked "What is the standard U.S. measurement for..." with options including "for gold bars," "for society," and "for defying religious laws." These questions were also in multiple-choice format.

The last page contained answers to the test questions, indicating the correct answers for each question. The page also included a section labeled "Further Reading," with a list of recommended readings such as "The Iliad," "The Odyssey," and "The Aeneid."
Responsibility: Johnson faces more than defenses

By KEN TYSIAC
Sports Writer

For Irish tri-captain Anthony Johnson, Notre Dame is not an institution where football is his first and only priority. He has to concern himself with conquering the rigorous academic load as well, but then again, so do his teammates, because he forces them to respect the Irish offensive attack, because he forces teams to respect the Irish rushing game between the tackles, making it easy for his speedier teammates to bounce to the outside when they carry the ball.

Johnson also plays a pivotal role as a leader on the Irish defense. "Ever since I started playing for Notre Dame, he's been the kind of guy who is right there for you when you get frustrated," says Watters. "You listen to him because he's been through it all before. We're like a family in the backfield. 'We're like a machine that just keeps moving.'"

Johnson's leadership is going to be crucial this Saturday for the Irish as they face a USC squad which ranks first in the country against the run. The Trojans return all eleven of the defensive starters who held the Irish to only 253 total yards last year. "Most importantly, we have to be physical," says Johnson. "When USC knocks us down, we're going to have to come back and hit them harder than they hit us."

There's now way around being physical if we are going to win this weekend," Watters agrees. "We'll have to make it a physical ballgame, play hard, and not make any turnovers," he says.

The physical aspect of the Irish football team has carried its toll on Johnson this year. Injuries have depleted the backfield to the point where Johnson is forced to play the majority of the game without getting a breather. "This new role of playing the whole game is tough on me," admits Johnson. "I want to do the best I can in all of these areas, and I try to improve myself so I can have a successful life in the future. I especially want to take advantage of the academics while I have the chance."

"That's more of a pressure to just be a good person," Johnson continues, "and I try to improve myself so I can have a successful life in the future. I especially want to take advantage of the academics while I have the chance."

The physical aspect of the Irish football team has carried its toll on Johnson this year. Injuries have depleted the backfield to the point where Johnson is forced to play the majority of the game without getting a breather. "This new role of playing the whole game is tough on me," admits Johnson. "It puts a lot of pressure on me, but Ryan Mihalko has provided some help recently and we've been working Rodney Culver in to give us some speed, so the younger guys are helping out more now."

Obviously, with Johnson logging so much playing time, there is concern for his health. He has had trouble with ankle injuries in the past, and those who follow the Irish see A/J/page 4.

**The Game...**

By THERESA KELLY
Sports Editor

They won't be wearing green. That you can count on.

"We might wear white," Irish head coach Lou Holtz said. "Because we've been on the road so much. If we do, please excuse us. It's not intentional."

After playing seven of its last eight games away from home, the Irish are returning to Notre Dame Stadium, but the schedule doesn't get any easier.

The Irish are protecting their 18-game winning streak, aiming for another national championship. Southern Cal is looking to average last season's 27-10 loss, when the teams, ranked one and two, battled in Los Angeles. The Trojans also are trying to break another streak, they've lost six in a row to Notre Dame.

But those streaks mean nothing when the teams step on the field, because this year, the Trojans are better than last, according to Holtz, and have improved considerably since a season-opening loss to Illinois.

They won't be wearing green. "Because we've been on the road so much. If we do, please excuse us. It's not intentional."

After playing seven of its last eight games away from home, the Irish are returning to Notre Dame Stadium, but the schedule doesn't get any easier.

The Irish are protecting their 18-game winning streak, aiming for another national championship. Southern Cal is looking to average last season's 27-10 loss, when the teams, ranked one and two, battled in Los Angeles. The Trojans also are trying to break another streak, they've lost six in a row to Notre Dame.

But those streaks mean nothing when the teams step on the field, because this year, the Trojans are better than last, according to Holtz, and have improved considerably since a season-opening loss to Illinois.

**USC defense vs. Notre Dame offense**

USC's strength is its defense. The Trojans return 10 starters from last year's defense, which shut down the Irish offense for most of the game.

"They're just outstanding on defense," Holtz said. "The same defense that stopped us last year is back, and they're better this year. I know they would be good this year because they have four players who were all-Americans. I have never had a football team dominate an offense the way theirs did ours."

They haven't disappointed Trojan head coach Larry Smith either. "The defense will be the strength of our team, Smith predicted before the season. "It'll be experienced, talented and deep."

The Trojan numbers back him up on that, especially against the run. In six games, the defense has not allowed rushing touchdown, and has given up 1.4 yards per carry. How will the Irish, who rely on the run and average 259 yards per game, deal with a squad that gives up an average of 37 per game on the ground?

"I don't think anyone can run the football against USC," Holtz said. "We do have some problems on our team, such as our ability to throw the football on a consistent basis. In fairness to our team, we don't throw the ball a great deal, but we're going to have to throw the ball against Southern Cal."

When the Irish do try to run, they'll look primarily to tailback Ricky Watters, who has 319 yards on 60 carries this season. Watters has been improving steadily and has his best game of the season at Air Force, with 96 yards on 11 carries.

Watters is joined by fullback Anthony Johnson, who leads the Irish with eight touchdowns. Quarterback Tony Rice has been a solid passer, ranking fifth for the Irish, with 436 yards on 82 carries.

The Irish running game benefited last weekend by the presence of flanker Raghib Ismail. At the tailback spot, but Holtz won't make that a permanent move.

"We can't afford to throw him there," Holtz said. "You'll see him there some, maybe he'll have eight or 10 carries in a game. But he won't be there consistently."

The kickoff and punt returns have been a significant part of Notre Dame's scoring. He has four touchdowns, two on kickoff returns and one on a punt return. His other score was on a run from the kickoff spot.

Rice will be on the spot as the Irish look to pass more. His 9-of-13 passing last week raised his numbers to 44-673 (.656) for 738 yards, two touchdowns and three interceptions.

The Trojan defense is led by three 1988 All-Americans: tackle Tim Ryan and safeties Mark Carrier and Cleveland Colter. Ryan will go head-to-head with Notre Dame's Tim Ryan, an offensive guard.

"A couple of our kids were kidding our Timmy Ryan," Holtz said, saying why don't you get them and they got him?"

Both Ryan's have been impressive in their own fields, but the Trojan's Ryan will keep the other's hands full, having accumulated six sacks among his 44 tackles on the season.

Carrier has 46 tackles and five interceptions on the season, and Colter has added 29 tackles in a defense that doesn't let many runners get to the secondary.

Linebacker Delmar Cheiley leads USC with 60 total tackles.

The top defensive back in the

**USC quarterback Todd Marinovich**

**Notre Dame defense vs. USC offense**

On offense, the visiting Trojans bring a balanced attack, averaging 237 yards per game rushing and 218 per game passing.

"Defensively, they have an awful lot of explosive weapons," Holtz said. "Todd Marinovich has come along very well, which is not surprising. He's very intelligent, has the right touch, and really gets the ball to the right people. They have five fine receivers, particularly (Ushni) Jackson. He's one of the finest receivers in the country."

Marinovich, the freshman quarterback, is in a completely different mold from Rice. The left-handed Marinovich is strictly a passer, hitting 104-of-169 (.615) with three interceptions and nine touchdowns.

He has negative rushing yardage on the season.

His top target is Jackson, the split end. Jackson has 414 yards on 27 receptions this season, good for three touchdowns.

"There is one exception to all that. I don't think I've ever seen a corner back play as well in the first six football games as Todd Lyght."

Lyght leads the Irish with five interceptions, and he also has 27 tackles to his credit. Not Bolcar and Donn Grimm lead the team in tackles, with 52 and 53, respectively.

On the ground, the Trojans battle an Irish defense that has allowed only 106 yards per game. Ervins leads the way for the Trojans with 671 yards on 126 carries, good for 112 yards per game and four touchdowns.

**In two years as the USC coach, Smith has won two Pac-10 titles and posted a 23-8 record. He is looking to break a six-game Trojan losing streak against ND.**

**Larry Smith**

**Toddi Marinovich**

With some game experience under his belt, the 6-4, 210-pound Marinovich has improved, hitting 104-of-169 passes (62 percent), for 1216 yards and nine touchdowns.

**Ricky Ervins**

Ervins leads the Trojan ground game with 671 yards on 126 carries, good for a 5.2 yards per carry average. He has scored four touchdowns and has a 111.8 yards per game average.

**Leroy Holt**

Second on the team in rushing with 359 yards, Holt averages 6.0 yards per carry. He is also a key receiver, pulling down 14 passes for 156 yards.

**Tim Ryan**

The 5-10, 260-pound senior is a key factor in the Trojan rushing defense, which allows only 1.4 yards per carry. Ervins has forced three fumbles this season.

"I'm not sure we can get those things resolved in such a short time. It's a combination of things, where one time it's this guy and one time it's that, and you see a different offense each week."

"There is one exception to all that. I don't think I've ever seen a corner back play as well in the first six football games as Todd Lyght."

Lyght leads the Irish with five interceptions, and he also has 27 tackles to his credit. Not Bolcar and Donn Grimm lead the team in tackles, with 52 and 53, respectively.

On the ground, the Trojans battle an Irish defense that has allowed only 106 yards per game. Ervins leads the way for the Trojans with 671 yards on 126 carries, good for 112 yards per game and four touchdowns.

USC split end John Jackson—known as J.J.—has more in common with famous Los Angeles athlete named Bo than just sharing the same last name. Consider this:

J.J. knows football.
The 5-10, 180-pound senior has set 3 Trojan records this year and is within striking distance of another. A 1989 Pac-10 first team candidate—Jackson is USC's all-time receiver with 128 catches, also caught a USC record-tying 11 catches in one game. He is a Washington State, and he was on the receiving end of an 87-yard TD pass vs. Ohio State. USC's longest pass play ever. With 27 catches for 414 yards this year, he needs 107 yards to become USC's career yardage leader (Randy Simon is No. 1 at 2,015). J.J. also has caught a pass in 31 straight games and could break Simmon's Pac-10 record.

J.J. knows baseball.
"If I can play one sport and do well, that will be great," says John, "I enjoy football and baseball equally," says John, "I was the leading scorer in high school in 1974. Now wonder J.J. knows so much.

J.J. knows hockey.
"Well, I enjoy football and baseball equally," says John, "I was the leading scorer in high school in 1974. Now wonder J.J. knows so much.

J.J. knows football.

continued from page 1

off the Irish realize that if he went down with an injury this week he would be replaced immediately with Braxton Banks out for the season.

But those who worry about Johnson’s health are wasting their time. At this point in the season almost nothing could keep Johnson out of the Notre Dame lineup.

Anthony is the kind of guy that can play with adversity and play with pain,” says Watters. “He’s a very, very physical person. He’s really tough and he knows what it takes to win. He has injured his ankle in the past and still played for us. I don’t think the wear and tear will slow him down at all as the season progresses.”

After the season is over, there is a very good possibility that Johnson could be playing in the National Football League. Johnson is one of the most understated fullbacks in the country, and it is likely he will be chosen in the first round of the NFL Draft this spring.

“I would be honored to get a shot in the NFL,” says Johnson. “I’d really like the opportunity to play professional football for a few years, but if it doesn’t work out, I know I’ll also have the basic education to work with.”

He also has a good family life and pleasant memories of at least one infamous National Championship football season. And it’s possible that some day Johnson will return to Notre Dame Stadium to watch yet another Johnson slip on a gold helmet.

“Two to three months old and weighs over 15 pounds already. That’s really big. Maybe he’ll be the next Chris Zorich,” jokes Joseph.

As soon as Taylor gains 255 pounds, he will probably be the next Zorich. Until then, Lou Holtz can be content knowing he has one Johnson to lead his team.

A.D.

continued from page 3

Still, the Irish had some breathing room.

But as fast as you can say, “Oh no, not him again,” Anthony Davis took the opening kickoff two yards deep in the endzone and raced 102 yards for the touchdown that put the top-ranked team right back in the game. In the first quarter, those scores came on a pair of kickoff returns, one by Davis and two long TD passes from Haden to Shelton to put the finishing touches on a 55-24 shellacking.

Mike McKay really must have inspired his team at halftime. The second-half score was USC 49, Notre Dame 0.

“We needed a catalyst, and we got it in his ‘kickoff return’ said McKay of his team’s endzone barrage.

Mike had most of his reserves in the fourth quarter, and they had success moving the ball the nation’s top-ranked defense. A Haden to Shelton Digg 16-yard scoring pass made it 48-24. Haden finished with 254 yards in the air while Davis ran the Trojans with 61 rushing yards in 18 carries.

Phillips intercepted Clements early in the fourth period and dashed 58 yards to the put the finishing touches on a 55-24 shellacking.

Peerless Prognosticators

Each week, the observer sports staff, a random student picked by the sports department and a well-known figure in the Notre Dame community come up with the scores of the week’s major college football games. Records are compiled as to how each person and the aggregated group did. In other words, it isn’t enough to pick the winner of a game. The person must pick the winner and give the underdog points.

Earthquake raises questions about evil

When I woke up the morning after the earthquake, I noticed how useless my religious faith was in giving me any kind of handle in so great a tragedy. I think viewing, God couldn't have been more out of the picture.

Father Robert Griffin
Letters to a Lonely God

ture if He didn't exist. "Out of the picture," it's not, in the sense that I wasn't praying for the victims as well as the survivors, but "out of the picture" in the sense that it seems naive to try to hang the blame on Him.

It seemed like the sheerest fantasy to imagine that the great Uncaused Cause had a date marked down on His calendar when He would knock down the first domino in a lengthy row of dominos, causing the ripple effect that would topple all the dominos, one after another, finally until the last domino would fall, causing the land to shift in a subterranean way the communist soldiers in our young ears. This is the answer that was given so beautifully at Lockerbie, "He's there on the cross, between the other two sufferers."

To tell the truth, as a preacher's talk, it sounds pretty good, and I believe that answer could be powerful, especially at a funeral, when everyone is grieving. "Nearer, my God, to Thee!" I suppose one of the reasons they give funerals is so that everyone can express his grief and get the ice out of their hearts. A funeral, actually, is a safe place for a sensitive session, held to help the survivors in need of grief therapy.

Later, of course, I've been on the campaign trail, trying to turn the private revelations out of town for making God Him- self part of the problem of suffering, which when they do insist that He's threatening to chastise us. My point of view is as Arthur Farrer said, "We do not begin with the assurance that everything is under the hand of Almighty Providence. We begin from a world touched with glory and shorn through with agony, and so we begin the God of the glory to deliver us from the wicked flesh. The region begins with the God of salvation, and we do not ask him to save us from the fury of God, we ask him to save us from our enemy and his. Whether we personally force the evils or is not a side issue. If we do per- sonally them as Satan, we are at least clear that we do not iden- tify them with God."

The trouble with blaming Sa- tan for anything is that it is so anthropomorphic. I'm not sure if he exists as a fallen archangel, God's ancient enemy. The division of the world between the powers of good and evil seems oversimplified and mythological.

Still, the Catholic Church has never doubted the existence of a personal Satan. A few years ago, the Presbyterians solemnly assemblled and affirmed their belief in the existence of a personal Satan, for they said, "There is a spirit of evil operating in the world, which should be called to be intelligent and cunning."

But, to assure religious people for exists—and you really can't know, except perhaps to your own satisfaction—how difficult it would be to prove that the devil exists as a per- son!

Yet, as the Presbyterians ar- rived, even when you count in all the ways you can for all the evil that you see there is still a large body of people who attribute the maledictions whose origins or source we cannot account for. There is a mischievous presence which goes around like a roaring lion—"the Scripture says of Satan, seeking whom he may devour."

Tom Dooley said that he never took much stock in the devil, but found the Chris- tian children in Southeast Asia without the representation of a personal Satan, seeking whom he may devour."

Heisman race has no frontrunner

By STEVE MEGARGEE
Associate Sports Editor

Midway through the college football season, two Notre Dame players and no frontrunners are included in the unofficial list of Heisman Trophy candidates.

A random sampling of Heisman voters, asked who their favorite candidate was at this point, indicated that Irish quarterback Tony Rice still has a great chance of winning the award, given annually to the top player in the country.

Heisman voters, asked who stepped out in big games so far this season, agreed that if there are two Thompsons in the Big Ten, it's only because Dowis and Harris stepped up to the list.

Once Harris' West Virginia team tied Pitt and lost to Virginia Tech, Ware stepped to the forefront with his impressive statistical performances. The momentum of Ware, and perhaps Dowis, ended when their respective teams lost last weekend.

Now these four quarterbacks appear locked at the top of the list, while voters wait for some player to break out of the pack.

"I think they should give it to Barry Sanders again," joked the Dallas Morning News' Ivan Maisel, who likes Ware the most right now. "I don't think there is a favorite right now." In fact, the only voters who seemed fairly certain about their selections were Midwestern reporters who liked Indiana's Anthony Thompson.

"He deserves it based on what he's accomplished in four years," said Charly Hallman of the St. Paul Pioneer Press Dispatch. "What he's done has been based on his individual talent; Tony Rice succeeds with team efforts."

"I think what he's done has been based on his individual talent; Tony Rice succeeds with team efforts."

Mon. Fri. 9 - 5
Three years ago, Notre Dame had no women's varsity soccer team. Now, the young program is on the brink of national prominence.

The Irish, 12-6 and riding a 10-game winning streak, head to Charlottesville, Va., to compete in the Virginia Classic against national powers Virginia, Duke and Stanford.

That, they go on to compete in the Midwestern Collegiate Conference Tournament in Cincinnati. Although it is highly doubtful that the Irish will gain an NCAA tournament bid, next week's tournament in Cincinnati is on the brink of national prominence.

Three years ago, Notre Dame women's soccer program was on the way to becoming prominent on the national level.

"Women's soccer is the fastest growing sport in America," Grace said. "The 1994 World Cup is here in the United States and we as a soccer community see it catching fire at that point."
Tennis

continued from page 24

placing at USC this year," says Trojan skipper Dick Leach who has piloted the NCAA Championships in every year of his career and a No. 10 team ranking in the 1989 season final poll. "There is a trend in tennis now with most of the top American high school players like Michael Chang and Pete Sampras-turning professional instead of going to college. I would rather recruit a top tennis player who had the potential to win a national title in an unproven and inexperienced American player, one who wouldn't be able to compete at this level."

For Notre Dame, competing at this level is a realistic goal but there's much to be feared of anyone. They will compete with Walter Dobhans, who will assume the No. 1 position in D'Lucia's absence and at least four freshmen.

"It is pretty unheard of playing that many freshmen," said Bayliss. "But with our top crop rank nationally in the junior ranks. The cream of the crop is Chuck Coleman of Lake Wylie, S.C., who should play in the top half of the singles lineup this season. Coleman was one of the 1989 Top 15 collegiate tennis recruits. He also captured two national doubles championships in 1989, including the Olympic Festival title."

"Chuck is a very strong player," said Bayliss. "His style of play is very adaptable and he has good leadership quality." And can Bayliss & Co. pull off their secret weapon? The Irish tennis program to another level? There are eight freshmen on the Irish roster of which seven were ranked nationally in the junior ranks. The cream of the crop is Chuck Coleman of Lake Wylie, S.C., who should play in the top half of the singles lineup this season. Coleman was one of the 1989 Top 15 collegiate tennis recruits. He also captured two national doubles championships in 1989, including the Olympic Festival title.

"Chuck is a very strong player," said Bayliss. "His style of play is very adaptable and he has good leadership quality." And can Bayliss & Co. pull off what would undoubtedly shake the foundations of the collegiate tennis world? "I am not presumptuous but I think we can make it competitive," says Bayliss. "All in all we will be ready for the match."

Notre Dame's No. 1 player, Dave D'Lucia, lost in the first round of the Volvo All-American Championships to the No. 10 player in collegiate tennis, John Stimson of Alabama, 4-6, 6-3, 4-6.

D'Lucia who is ranked No. 26 in college tennis, now moves to the consolation bracket where he will compete against Jeff Gross of Kansas, a 1989 All-American, this morning.

ND runners face weekend tests

Irish men look to avoid another upset at hands of USC

By MARY GARINO
Sports Writer

"We just want to be ready for USC," O'Connor stated. "They beat us last year out there and we'd like to return the favor."

Another reason for Notre Dame to be prepared for the Trojans is Fredson Mayiek, the top runner on the USC team and the winner of last year's dual meet with Notre Dame. Mayiek, a native of Kenya, eventually went on to qualify for the NCAA Championships after placing third in the qualifying meet for his district.

Challenging Mayiek for the lead will be Irish runners O'Connor, Tom O'Rourke and Ryan Cahill. Piane is happy to report that his three top runners are healthy again after battling illnesses at the beginning of the year.

Junior runner Pat Kearns is also expected to make a contribution to the Irish effort. Kearns, an Arts and Letters major, sat out all of last season after a hernia operation. This year, Kearns has been battling back and has become one of the top runners for Notre Dame, including a 17th place finish at the Notre Dame Invitational two weeks ago.

"The Notre Dame Invitational helped to build my confidence," Kearns said. "I'm excited about last year, and I was injured again over the summer, so I've had a tough time getting going. The race made me feel more confident, and I've been coming along fairly well."

The USC meet will be the last home meet for the Kerrans and the rest of the Irish and the last regular season meet before the championship races that start at the end of this month and continue through the middle of November. Notre Dame hopes to use the USC meet to prepare them for these important races.

"A really good performance will give us impetus for the rest of the year," Piane stated. "Our whole year has been built toward November."

The meet will begin at 11 a.m., even if there is snow on the ground. Piane says that the course will be marked with flags if necessary, but the race will be run.

Depleted women's squad to face MCC foe Marquette

By TRICIA GROHMAN
Sports Writer

The Notre Dame women's cross country team has high hopes for victory in its dual meet against Midwestern Collegiate Conference rival Marquette Saturday at 10:30 a.m. at Burke Memorial Golf Course.

Irish, who competed against Marquette Sept. 29 at the National Catholic League, hopes to repeat their successful past performance. At the National Catholic League, the Irish placed fifth with a score of 112 while the Marquette Warriors took 13th with 309.

"We beat them pretty soundly last year," senior and team captain Wendy Murray said. "I sat out last two weeks ago. It's been our goal all year.""

"Of course the loss could affect our overall performance, but we've been running quite well as a group lately and I think we still have a very good chance of winning," said team co-captain and junior Renee Kaptur.

"A really good performance will give us impetus for the rest of the year," Piane stated. "Our whole year has been built toward November."

The 12th-ranked Notre Dame men's cross country team will get its shot at a USC team also as the Irish host the Trojan runners at the Burke Memorial Golf Course on Saturday morning.

The Irish have had two weeks since their last meet to prepare for USC, who upset the Irish last year in California. Notre Dame went into the meet ranked 12th in the nation but came away with a disappointing defeat by a score of 21-34. Irish head coach Joe Piane says that last year's loss is reason enough to be wary of the Trojans tomorrow.

"We ended up ninth in the country last year, but USC beat us, so that speaks for itself," Piane said. "They aren't unranked at the moment but they are a good team."

Irish captain Mike O'Connor says that the Irish are looking to repay the Trojans for last year.

Sy Shortsman, Platter

Men more people have survived cancer than ever before, living in the City of Los Angeles. We are winning.
The Bears scored 63 points in the two losses — a total that not long ago would have led to four straight victories for Chicago.

Because of injuries, William "The Refrigerator" Perry had to be pressed into full-time service, with rookie Tony Woods filling in at the other defensive end. Perry's role was to have been spelling Hampton and McMichael to keep the veterans fresh.

The Bears have talent to expand Chicago streak to three.

Browns have talent to expand Chicago streak to three.

Associated Press

LAKE FOREST, Ill. — They've lost two straight and there is very real danger of making it three.

They are next-to-last in defense in the NFL, ahead of only the 1-5 New York Jets.

Can this really be the Chicago Bears?

The same Bears who have not lost three straight since Mike Ditka became coach in 1982?

The same Bears who have

Hockey

continued from page 24

over 2,200 minutes on the ice. Madison will get some help from veteran defensemen Markovitz and Leber—both seniors who have been familiar faces in the Irish lineup for three years.

They will be called upon to take a Sophomore Robert Copeland, Kevin Patrick, Bill Hoelzel and Scott Vickman all saw action last year and freshmen Eric Gregoire and Dan Sawyer will be coming up in the ranks behind them.

The Irish are counting on forwards Kuehl and Guay to carry much of the load in the scoring department.

Kuehl, the team's senior captain from Edina, Minn., led the team in power-play goals last year by tallying eight and he finished second in goals scored with 19 and third in assists with 16.

Guay, like Kuehl, recorded two game-winning goals last season and will be expected to shoulder more offensive responsibilities while helping a corps of forwards turning with youth come into its own.

Juniors John Glha, Bill Lerman, Craig Kleis and Chris Olson will be expected to pick up the pace defensively while sophomores David Bankoske, Mike Curry and Pat Arnold will also help contribute to the front of the team's scoring.

Notre Dame is hoping freshmen Sterling Black, Dan Marvin and Curtis Janicke prove to have a nose for the net as well.

Schafer has had his players on an arduous weightlifting program in the off season in hopes of preparing his squad for its hard-hitting opponents.

"I definitely think the weight training is going to allow us to do more corner to corner on the ice," Schafer said.

"We've been preparing for this season for so long and we're a little stronger and a little faster now, so I think we've decided what kind of team we want to be."

"So far positive attitude has been the key and that will have to be a constant win or lose. I want to see the same attitude on Feb. 18 that I saw at Sept. 18 and if I do I think we'll have been successful."

The Irish will get their first chance to prove how far their attitude will take them during October Break as they clash a powerful squad from the Rochester Institute of Technology on Oct. 26 and 27 in the confines of the Joyce AOC.

October break is thankfully upon us at Notre Dame. While most students flock to their various homes across the country however, certain Irish varsity squads will remain together in preparation for upcoming games at home and abroad. The Irish men’s soccer team is among them, with a road game at the Air Force Academy on Tuesday and a home date with Bowling Green next Sunday.

The team will leave for Colorado Springs Saturday. Although the Irish will have two full days before Tuesday’s match, they will not be “vacationing” in the true sense of the word. Head coach Dennis Grace wants to practice hard in those two days, in part to familiarize and condition his players to playing in the high atmosphere and “thin air” characteristic of the area. Coach Grace also knows that Air Force is an excellent team, a hungry team.

“Air Force is an outstanding team athletically. Their kids are fit and always ready to play,” said Grace in assessing Tuesday’s foe. “They’re disciplined, typical of any academy team. We’d definitely have our hands full if we’re not ready to play.”

Indeed, Air Force was a preseason Top 20 team in the Soccer News poll. Also, the Falcons return six starters and overall, eighteen lettermen. This will be the first meeting ever between the two teams.

The game means little to Notre Dame in terms of conference standing. The soccer team has already clinched the North Division MGC title. They are 5-0-1 in the division, the only undefeated team. The Irish are a young team and thus bound to some inconsistency, but hey, people forget that four of our losses are to four of the current top six ranked teams in the country (1, 2, 4, 6),” said Grace, whose team stands at 7-5-3. “There’s no shame in that if you’re not perfect blooded, but we’re all right. If people don’t realize that we’re only 5-0-1 in the conference we can be a harbinger of future playoff results. The Irish seem to have found some team unity. They have definitely gained valuable experience playing against high caliber teams. That trend continues with this week’s matches.

The experience is particularly crucial for a team as young as the Irish. Hopefully the soccer team will show enough seasoning to make some noise in the MGC and NCAA playoffs. It is certainly not out of the realm of possibility standing. The soccer team ‘s as a whole. Both are certain not out of the realm of possibility standing. The soccer team ‘s as a whole. Both are

The other game over fall break takes place next Sunday at Krause Stadium against Bowling Green. The Falcons are well coached and, according to Grace, typically upset a lot of teams.

They did just that to Grace’s 1986 squad at Bowling Green 3-1. The Irish had better not relax too much over the break, because the Falcons will be ready to play.

This last stretch of regular season games (three in all, if the Loyola game is played) could be a barometer of future playoff results. The Irish seem to have found some team unity. They have definitely gained valuable experience playing against high caliber teams. That trend continues with this week’s matches.

Aunese still inspires unbeaten Buffaloes

Associated Press

BOULDER, Colo.—They shouted his name after every huddle, wear his number on their wristbands and stare at the haunting picture taped to his old locker; the one of him being hoisted on their shoulders after the spring game.

“I know the Buffalos will be really strong,” said Auriol. “But Kelly and I should be well-prepared.”

The fencing teams will both begin their regular season schedule following the break, as they travel to Penn State in early November.

While most students will be taking time off to relax and enjoy the week-long break, the work for these three athletes will not take a time out.

“I feel like we’ve been working over us,” sophomore Darian Hagan, who replaced Aunese this year, said. “If we don’t play well, we feel we’re letting them down.”

That has yet to happen. Inspired by Aunese, who died of cancer Sept. 23, Colorado is off to a 6-0 start that has triggered talk of a national championship. If the Buffaloes beat Kansas on Saturday, they’ll be 7-0 for the first time in 22 years.

ND tennis faces challenge in No. 11 USC

By BOB MITCHELL
Sports Writer

The biggest challenge in the history of Notre Dame tennis takes place today under the friendly shelter of Eck Tennis Pavilion at 6 p.m. This year's No. 11 collegiate team and a traditional tennis power, the Trojans of USC, march into their first Midwestern dual match ever and are waiting in tandem with Notre Dame's unranked and aspiring squad.

"It is a honor, a challenge and a responsibility," said Irish head coach Bob Rayliss. "It means a lot to us. USC is in a position to which we aspire. In twenty years, we would like to have people speak of Notre Dame tennis in the same terms as the speak of USC tennis today."

The match will be the first dual match of the 1989-1990 season for both squads. Although there is a sharp contrast in the history of the two programs, both of the current squads do have some similarities. Both are young and inexperienced at the collegiate level, yet both are talented.

The Trojan roster boasts two juniors, two sophomores and five freshmen. Although they are not without experience in important matches. The USC squad is full of top international players that have somehow found a home in Los Angeles.

One rather large difference between the two squads is that USC will have their No. 1 player and the Irish will not. Notre Dame's No.1 player, Dave DiLucia, is currently playing in the Volvo All-American Championships in Athens, Ga. DiLucia is not expected to return in time for the match. USC's No.1 player Byron Black was scheduled to play at the Volvo but cited academic responsibilities and declined the invitation.
