A human fetus, however, is not of us, and therefore we are able to dispose of it as I wish," said Sharon O'Brien, assistant secretary for post-secondary education programs. There also may be more scrutiny of administrators, colleges, universities and schools, as well as the quality of financial aid and other higher education programs. There also may be greater scrutiny of administrative and financial abilities of schools, as well as the quality of education offered, he said.

"We will not reinvent the wheel, but we believe we must create a more efficient, fairer and less confusing student aid delivery system, while continuing to maximize postsecondary access and choice for needy students," he said.

Haynes, speaking at a Christian Peacemaker Teams (CPT) conference, stressed that "we must go through with it if they believe the fact that, in supporting the pregnancy was begun with the specific intention of abortion for research, no payment may be received; there can be no change in abortive procedure in order to obtain more tissue, and the personnel performing research must be separate from personnel performing abortion."

Burtchaell and three of the twenty-one fellow panelists disagreed with the committee's findings and submitted a minority report based on three objections. These included the ethical objection that anyone connected with the purposeful destruction of a fetus cannot morally dispose of its remains, the fact that, in supporting the tissue for research, the government may actually encourage abortions; and the use of the tissue would present America as a country prepared to designate a victim group for the advancement of those in power.

In terms of the ethical objection, Burtchaell said that parents have a protective role and as such, "we cannot relieve one person's plight by the sale of another person's tissues." He added, "It is better."
Dances can ensure social success

Let's be absolutely realistic. Your social life here at ND has to be just as good as your last SYR. You may have noticed that random people still approach you at the dining hall, months after the Flanner Love in an Elevator theme dance, and ask, "Did I get inked like crazed geese to 'Strangers in the Night' in between the seventh and eighth floors?"

No? Oh.

At any rate, dances are an integral part of your education outside of the classroom. Unfortunately, these occasions are laden with potential for tragedy. For instance, with the proper way to respond to your date suddenly executes an intricate—and embarrassing—breakdance move? (Answer: Burst into tears.) Many of today's dancers are simply not practiced in the etiquette that necessarily accompanies such a wingding.

Ladies: how often have you accessorized the ultimate formal ensemble, only to arrive at the dance and catch your rhinestone buttons becoming gum out of your hair anymore. You have borrowed her festive earrings that look like Alice in Wonderland’s standard fare and you've trampled them under your high heels? Test yourself in this scenario.

You decide to really impress your date by wearing your blue taffeta with the sequined bodice that you got second hand. True story. You’re hook up with your roommate, do you offer her your flowers, since they are rightfully hers? Or do you remember that you have buried her festive earrings that look like Alice in Wonderland’s standard fare and you’ve trampled them under your high heels? Test yourself in this scenario.

Don’t panic. Rise to the occasion and dress for the moment. After all, your Frenz have been drilled. You impulsively (and drunkenly) embrace him in thanks, but then realize that your sequins have, nonetheless, worked their way onto his shirt. One move and your entire dress could unButton for the dance. Then, what? Do you stay? Do you depart? Do you leave so you all can stay? Do you stay? Do you depart? Do you leave so you all can stay?

The U.S. Department of Energy said Monday it plans to be on the lookout for an environmental organization’s challenge to a new plan that would divert water in the Southwest and Texas from irrigation to urban use. The agency’s goal is to ensure that future water supplies are adequate to meet the needs of the growing population.

The department, which operates the Hanford site near Richland, Wash., said it is preparing to conduct a public hearing on the proposal.

The hearing will be held Feb. 2 in Richland. The department has received more than 3,000 comments on the plan from the public.

The department is considering a plan to divert about 500,000 acre-feet of water annually from the Columbia River to the Snake River, which flows into the Columbia.

The proposal would allow water to be used for urban purposes in the region, including cities like Seattle, Portland, and Portland, Ore.

The department said it is considering the proposal because of concerns about the future water supply for the region.

The hearing will include testimony from the public and testimony from officials from the department.

The department also said it is considering other options for managing water in the region, including the possibility of building a new dam on the Columbia River.

The proposal was developed as part of the department’s efforts to manage the water supply in the region, which is facing increasing demands for water from growing populations and expanding industries.

The department said it is working with other agencies and stakeholders to develop a comprehensive plan for managing water in the region.

The hearing will be open to the public and will be held in Richland, Wash.

The department said it is considering a range of options for managing water in the region, including the possibility of building a new dam on the Columbia River.

Senate calls for a follow up
By PETER AMEND
News Writer

A Student Senate resolution calls for the Notre Dame administration to follow up on the recommendations from last spring's Student Government Report to the Board of Trustees on sexual assault.

The format of the resolution consisted of the actual recommendations from the report, followed by the Senate's suggestions for action. The resolution's main points were:

• that the university widely publicize its counseling services for victims of sexual assault and that immediate counseling be offered to victims of sexual assault.

• Senate's suggestion: Greater collaboration of existing counseling services and revision of du Lac concerning support for victims of sexual assault in order to lessen fear and to encourage changed implementation of Notre Dame Security.

• that education of sexual assault and rape be fostered through seminars or forums to educate students about healthy relationships and the University should publish any occurrences of sexual assault on campus.

• Senate's suggestion: Pastoral and privacy concerns for the victim are essential, yet total silence on such incidents leads to a false sense of security and the conception of acquaintance rape as a lesser or acceptable crime.

• Senate's suggestion: Pastoral and privacy concerns for the victim are essential, yet total silence on such incidents leads to a false sense of security and the conception of acquaintance rape as a lesser or acceptable crime.

• that support groups be offered to victims of sexual assault through University Health Services.

Senate's suggestion: The support groups should encourage others to feel comfortable about reporting such occurrences.

In other Senate news, the Senate approved the Student Union Board Music Commission's request for the Indigo Girls to perform in Stepan Center in February. This year's music survey of ND students reported that 60 percent of those surveyed would pay $12 to see the group. Ticket prices will be $10 for students.

In student business matters, the ND Video store was budgeted $12,000 for the opening of the store, with approximately $10,000 allocated for videocassettes. ND Video was able to spend less than the allocated amount due to the purchase of some of their videos from another video store which was going out of business.

Marty speaks of Christian unification at conference
By ALICIA REALE
News Writer

The problems concerning unification of Christian communities have been the cause of a positive interaction since the closing of the Second Vatican Council, said Martin Marty at the opening ceremonies of the 25th anniversary of Vatican II last night.

Marty, distinguished service professor at the University of Chicago Divinity School, gave a keynote address titled "Vatican II and Ecumenism," which concerned the ecumenical endeavors of the church in unifying the Christian community.

He described the council's efforts as "the passage over the hump of transition to new social conduct." According to Marty, one of the goals of the council was to achieve a recovery of unity since they believed that the existing division contra Christ, who has formed one church.

The world from post World War II until 1965 was "a world hungry for harmony and the Christian Church was not reflecting that ethos but giving answers to it," he said.

Marty said the branches of Christianity shared a mutual rejection before the council.

Father Richard McBrien, chair of the ND Theology department and conference chairperson, said from the Council of Trent in 1564 until 1962 the different sectors viewed one another in a negative light due to differences in theology. This held until Vatic­an II, which is widely believed to be the most religious event of the 20th century.

"The ecumenism we know the future, or we have found solutions along the way," he said.

"The notion of one visible church has lost its luster to many," said Marty.

Although the goal of unity between different churches has not yet been accomplished through common experiences, the inter-religious hatred of pre-council days is gone, according to Marty.

Through the web of affiliation Christians have not become one, but have a different relationship than before," said Marty. He said that this new and improving relationship is "a gift of the Holy Spirit, a gift of grace."

Vatican II brought together some 2300 Catholic bishops from around the world for four sessions during which they took 1540 votes and promulgated 16 decrees and declarations on Catholic doctrine, community and polity.
'Suicide machine' goes to court

PONTIAC, Mich. (AP) — A doctor who invented a device that a woman used to kill herself was charged with first-degree murder Monday by a prosecutor who said he didn't want his county to become a "suicide mecca."

Janet Adkins, 54, of Portland, Ore., died June 4 after being hooked to the device invented by Dr. Jack Kevorkian of Royal Oak. She had been diagnosed in June 1989 with Alzheimer's disease.

Kevorkian connected Adkins to an intravenous solution that would stop her heart, but she activated the switch that allowed it to flow into her veins.

A recently completed toxicology report identified the solution as the cause of death, Oakland County Prosecutor Richard Thompson told reporters in announcing the charges.

The autopsy also showed the woman suffered from Alzheimer's disease.

Kevorkian faced a court appearance on the charge.

"Dr. Kevorkian was the primary and legal cause of Janet Adkins' death. He cannot avoid his criminal culpability by the clever use of a switch," Thompson said. "He constructed the suicide machine for the sole purpose of causing death. He saw Janet Adkins for the sole purpose of causing her death."

The criminal charges were filed one day before a civil trial in Oakland County Circuit Court to determine whether Kevorkian could have his machine back. It was confiscated after the woman's death.

Thompson's recent statements that he would like to seek the death penalty for drug dealers, Michigan does not have the death penalty. "Yet he doesn't want terminally ill patients who seek a death with dignity to be able to make that personal decision."

"He would like this to be the execution capital of the world," Fieger said, referring to Thompson's recent statements that he would like to seek the death penalty for drug dealers. "It is an attempt by the prosecutor to institute criminal proceedings to obtain an advantage in a civil case."

Fieger also said he was outraged at the first-degree murder charge, which carries a possible life prison sentence on conviction.

"He would like this to be the execution capital of the world," Fieger said, referring to Thompson's recent statements that he would like to seek the death penalty for drug dealers. "Yet he doesn't want terminally ill patients who seek a death with dignity to be able to make that personal decision."

At his own news conference after Thompson's, Kevorkian referred all questions to Fieger. Ronald Adkins, the victim's husband, said he had no immediate comment about the charges.

The University of Notre Dame Department of Campus Ministry invites you to an

ADVENT LESSONS AND CAROLS

Sunday, 9 December
SACRED HEART CHURCH
7:15 PM

with the
The Notre Dame Liturgical Choirs and Brass

Works by Mendelssohn, Guerrero, Handel, Distler, Marz and Vittoria

By now, all members of the University Community have probably received prayer cards of preparation for Christmas and final exams.

Near the beginning of Lent, an additional 4 prayer cards will be given to you.

Extra sets of all these cards can be obtained through the Library Campus Ministry Office now, a set of eight cards for $2.00.

What a great idea for a small gift of love or for a Christmas stocking stuffer!

Also, a few copies of last year's cards-complete set of 8- are available for $2.00.

So, stop by the Library Campus Ministry Office now for your Christmas shopping!

Presiders at Sacred Heart Church:
Second Sunday of Advent

Saturday, December 8
5:00 PM- Rev. John Lahey, C.S.C.

Sunday, December 9
10:00 AM- Rev. Michael Buckley, S.J.
11:45 AM Rev. Thomas Gaughan, C.S.C.
Iraq insists the issue of Palestine must come first

(AP)—As the U.S. defense secretary sparred Monday with the chairman of the Senate Armed Service Committee over how best to drive Iraq from Kuwait, Iraq insisted a Palestinian homeland was the issue to be decided first.

President Bush, meanwhile, departed from a prepared text to assail Saddam Hussein.

"I realize the sacrifices that Saddam Hussein’s brutality has caused this nation,” Bush told lawmakers in Brazil on Monday. He estimated high oil prices resulting from the Persian Gulf crisis are costing Brazil $5 billion annually — a figure local experts said seemed excessive.

Bush, after winning U.N. authorization last week for a military strike against Iraq unless it quits Kuwait by Jan. 15, offered to send his secretary of state to Baghdad to negotiate.

Iraq agreed to talk. But Monday, Iraq again insisted the Palestinian people must have a homeland in the West Bank and Gaza, with Jerusalem as its capital, before any other Middle East peace questions can be discussed.

The United States has rejected any linkage of the Palestinian issue to Iraq’s withdrawal from Kuwait. Israel has occupied the West Bank and Gaza Strip since seizing control of the territories in the 1967 Middle East war.

Defense Secretary Dick Cheney told the Senate committee on Monday the administration was pessimistic about economic sanctions bringing an end to Iraq’s 4-month-old occupation of Kuwait.

"Given the nature of the regime, given Saddam Hussein’s brutality to his own people, his very tight control of that society, his ability to allocate resources for the military, their ability to produce their own food ... he can ride them out,” Cheney said.

"It is far better for us to deal with him now ... than it will be for us to deal with him five or 10 years from now, when ... Saddam has become an even more dangerous threat to the world,” military officials said, speaking on condition of anonymity.

Iraq test-fired Soviet-type Scud missiles — which could be used to carry chemical weapons — on Sunday, the U.S. military said. The military said the flight path was away from the U.S.-led multinational force in eastern Saudi Arabia.

A jetliner carrying boxing great Muhammad Ali and some former American and Canadian hostages returned to the Jordanian capital Monday shortly after taking off for New York. The plane turned around because of minor technical problems but resumed its flight about seven hours later, officials said.

Also Monday, the British Foreign Office reported Iraq has detained four more British men who had been hiding in Kuwait. The Foreign Office said there were 440 Britons hiding in Kuwait and an estimated 740 Britons in Iraq.

Saddam has prevented many foreigners from leaving both countries and says he will use detained Westerners as "human shields" against attack from the multinational force massed in the gulf. He has been freeing the hostages a few at a time.

The heightened alert reportedly went into effect early Thursday and was the highest alert since Iraq seized Kuwait on Aug. 2. But it was not a war scare. U.S. military officials said, speaking on condition of anonymity.

DO YOU THINK DART CAN BE IMPROVED? DO YOU WANT AND NEED MORE CLASSES?

NOW IS YOUR CHANCE TO BE HEARD. THE FOLLOWING ADMINISTRATORS WILL BE PRESENT FOR AN OPEN FORUM.

Fetal
continued from page 1
In terms of present numbers, only one half of one percent of the people suffering from diabetes would benefit from treatment derived from fetuses. Burtchell said, "It is a cost-benefit issue in that very few cases have made themselves known, and it is a concern to me that people are not being made aware of the potential benefits that can be gained from research on the fetal tissue at the right stage of maturation."

Burtchell said the numbers do not justify the research. Also, all animal, especially primates, research on the effect of hormone treatment has not been fully explored. These organisms are far from being matured before researchers consider human experiments. He related much of his argument images and to get to know who the Iraqi people really are.

According to Yassar Arafat, who spoke with a member of the CPT contingency, the embargos are not an effective political tool because Iraq is still able to get what they need. Garber, however, said they did encounter shortages of medications and insulin, but they were able to get in to, said DeLorenzo. "I don't think it's fair that we had to put in prerequisites and things that it may be necessary to determine why the natural abortion or miscarriage occurred.

The director of Health and Human Services did not accept the committee's recommendation to allow fetus research. There is presently a ban on using a voluntarily aborted fetus in research.

Garber continued from page 1
Continued from page 1
CHIPLESHED
continued from page 1
The government department, even though they do not plan to hire, to O'Brien, said O'Brien. "They said I could take political science as a course.

"I don't think it's fair that we had to put in prerequisites and things that it may be necessary to determine why the natural abortion or miscarriage occurred.

The director of Health and Human Services did not accept the committee's recommendation to allow fetus research. There is presently a ban on using a voluntarily aborted fetus in research.

Washington are probably even more so right now."

"It is critical that we do not make the same mistake that we did in Vietnam and alienate the service people who are merely executing orders," Garber said. "Our anger and frustration is not with them, but with the powers that be." The ND Gulf Crisis action group, co-sponsors of the lecture, will sponsor an anti-aggression rally this Friday at 12:15 at the Fieldhouse Mall.

continued from page 1
According to O'Brien, the number of courses to be offered are determined according to departmental files of the four fields in the department: American government, theory, international, and cooperative government. The fields get a certain amount of slots and try to together a schedule of course offerings for the next two years, she said.

The department offered 23 undergraduate courses last spring and 25 undergraduate courses this fall, according to O'Brien. "We tried to make the 300-level classes, which can only have at least six students, keep as many upper level division classes at a reduced level so students can be able to have faculty interaction," said O'Brien.

However, increasing class size would cause the discussion section to "become meaningless. If there are 40 or 50 students in a discussion section," said O'Brien.

In addition to the problems of accommodating majors, the government department has to form a requirement to the University. O'Brien said that the department made efforts to keep some classes open to majors only. "The other hand, we have an obligation to the University to offer some universe classes," said O'Brien.

Majors who need a class, but were closed out of a class, may approach O'Brien for assistance. "The students" come see me, and I try as much as possible to slide them in a class," she said. "However, they may not get all the classes they want.

There may be other classes students declare within the department, but the majors, like Parent, may not want the alternative. "They said I could take political science, but there was still possibly some room open, but due to the fact that it is the hardest core class, most government majors only want to take it as a junior or senior," he said. "So, I opted not to take it. Basically, that was the only requirement.

When she had trouble getting security beat
THURSDAY, NOV. 29
12:15 p.m. A resident of Pasquerilla East reported the theft of a wallet and keys from a wall of the first floor of the Hesburgh Library.
2:47 p.m. A university employee reported the theft of an envelope of money from her mailbox at the department of the Joyce ACC.
3:35 p.m. A resident of Stanford Hall reported that her backpack was stolen from the room of another student.
4:05 p.m. A resident of Grace Hall was excited to report an accident in the parking spaces behind Grace Hall. 4:55 p.m. An office of campus reported that his and his friend's wallets and an ID was stolen from their respective rooms at the Joyce ACC.
9:40 p.m. A resident of Savannah Hall reported that her wallet was stolen from her unlocked room.
10:30 p.m. An on-campus resident reported being caught at the main door by a student while he was hiding other material.
11:22 p.m. A resident of Lyons Hall reported vandalism to her automobile which was parked in the rear of the dorm.

SATURDAY, DEC. 1
2:46 a.m. A Notre Dame student was stopped for taking a sign from the Monfort Inn.
7:16 p.m. A resident of Monastery Hall reported his wallet was taken from his unlocked room.
8 p.m. An off-campus student reported that her Christmas presents were stolen from the back seat of her car while it was parked in the 803 parking lot.

FRIDAY, NOV. 30
10:35 a.m. A university employee reported vandalism to her auto while it was parked at North Dining Hall.
2:30 p.m. An on-campus resident reported that her backpack was taken from the rack at the front of South Dining Hall.
5:40 p.m. A resident of Brenn-Hall reported that her wallet had been taken from her unlocked room.
4:20 p.m. A resident of Krost Hall reported receiving daily harassing phone calls since returning from Thanksgiving break.
10:20 p.m. An on-campus resident reported being crashed at the main door by a student.

Lack of creative technology affects NASA in 'brain drain'

WASHINGTON (AP) — An American brain drain is in the making because of a poor atmosphere for creative technology and an aggressive engineering recruitment program by foreign companies, a NASA advisory committee was told Monday.

"Our members are asking themselves what future is there for the American aerospace worker," Leonard Ricks testified. "Unfortunately, many of our colleagues are concluding that there is no future and are leaving."

He spoke at the sixth and last hearing of the Advisory Committee on the Future of the U.S. Space Program, which is preparing to issue a final report on Dec. 17. The committee was set up in July by NASA administrator Richard Truly.

"Today there is a feeding frenzy over many of the technical difficulties that naturally occur in any complex scientific endeavor," he said. "Both the print and electronic media have appeared jubilant over flaws in the Hubble (Space Telescope) mirror, fuel leaks and other technical problems."

Canned hugs

Ruth Feinberg, president of Jewish Mother's Soup, Inc., displays her product at the International Jewish Festival in Chicago Friday.

"America is about pretty surfaces," says music publicist Bill Adler. "If it were simply about musical talent, Be Diddley would be a lot bigger than Elvis."

MTV generation emphasizes looking, not sounding, good

"It's totally preposterous. If you can't cut it, don't do it," Nash said of the semi-but-not-heard bands. "Lip-synching might be OK at the Ice Capades, when you're doing the march of the Teenage Mutant Ninja Turtles, but not at a rock 'n' roll show."

The importance of appearance in pop music is nothing new. The Beatles arrived in the United States with matching haircuts and wardrobe 26 years ago; the Sex Pistols arrived a generation later with clothes to match their attitudes.

But the MTV generation has placed a new emphasis on looks. The diminutive, baseball-capped Vas Kid K — the voice of Technotonik's "Pump Up The Jam" — was replaced in the video by lanky model Felly.

Martha Wash, who says she is the voice on Blackbox's hit single "Everybody Everybuddy," instead saw 6-foot model Katrina quel Quin on the cover of the 12-inch single.

"We have been told Katrin is part of the group, but in no way was she the only female voice," said Marilyn Lipsius, a BMG spokesperson. "Martha definitely sang on it, and nobody ever denied that."

Wash is suing RCA Records, BMG's parent company, over the record, says lawyer Steven Ames Brown. She has a similar suit pending against A&M Records alleging her vocals were ripped off by the group Sound Of Vision, "Tim Your One and Only," he said.

A spokesman for RCA said the company would have a response but never produced one. Wash said the Vanillies were lean, mean videogetic women behind the scenes.

"I'm sure a great part of Milli Vanilli's success is due to their looks. The diminutive, baseball-capped notronic's "Pump Up The Jam"..."

Pasin and Tombar use funds unwisely

Last week Student Body President Rob Pasin announced that Student Government was co-sponsoring a January trip to Washington D.C. to protest the nineteenth anniversary of the Roe v. Wade decision. At the end of a letter to the editor, Pasin wrote, "I urge you to participate in this important event."

It is admittedly a student leader's prerogative to urge his constituency to participate in a pro-life rally. However, we question the fact that student funds will be used to promote one side and one side only of such a controversial and divisive issue as abortion.

When Pasin was elected, he and Vice President Fred Tombar promised that their student body presidency would bring to campus a corporate-sponsored lecture series. As Tombar said, "...this would stimulate intellectual and political concerns here on campus." Thus far, their lecture series has been successful in promoting these goals. However, their decision to sponsor this trip contradicts the goals of the lecture series. Rather than promoting free-thinking political debates, Pasin and Tombar are using student money to encourage political activism for only one side of an important political issue like abortion.

This issue is relevant because up to $1,500 of funds from Student Government's Intellectual Life Committee's budget could be used for this trip if there is sufficient student interest. Student Government has agreed to pay for or four buses at a cost of $300 each. In addition, Student Government has agreed to pick up the publicity tab, estimated at $300, for the joint venture with the NIDSM Right to Life group.

Another concern is that Pasin and Tombar made the decision to co-sponsor the trip without consulting the Student Government cabinet. Prior to making such a controversial decision, they should have discussed the matter with their cabinet.

Pasin justifies this trip by saying that Student Government should encourage students to be politically active both on and off-campus. In addition, he believes that there is a lack of political activism on campus.

The fact that student body presidents and vice presidents in the past did not take stands on issues like abortion was not in the best interest of the student body.

Attackers of pornography who prescribe censorship overlook First Amendment

Dear Editor:

I am writing in response to Brother Courtney's article that decried what he called "pornography" and its supposed deleterious effects. (The Observer, Nov. 16)

Throughout his attack, Brother Courtney failed to define pornography, or obscenity. But if the government should have the power to censor such material, boundaries must be erected to guide government action and to prevent unwise censorship.

What is pornography? It is " Hustler" depictions of sodomy, " Penthouse" centerfolds, or suggestive advertising of Obsession products? Brother Courtney cripples his argument by including Justice Stewart's "I know it when I see it" explanation of pornography. This underscores the subjectivity of pornography and the ambiguity of law concerning the definition of pornography.

I agree with Brother Courtney that there is a division between hard and soft-core pornography. It is all pornography, and all adult pornography deserves First Amendment protection.

Pornography, or obscenity, is the political and sexual expression of a minority of people. This type of sexual stimuli depicts a different side of human sexuality, some consider it a "darker" side. The forbidden fruit consists of women as objects in as much as they are symbols of a totally unrealistic male sexual fantasy. Because the porn industry is run overwhelmingly by men, most pornographic material is naturally male-oriented.

Many argue that exposure to such material directly causes antisocial behavior and a rise in criminal activity. But the 1970 Commission on Obscenity and Pornography could not arrive at these same conclusions. Its members argued that there was no conclusive empirical evidence to suggest this causal relationship. In fact they argued that open access to such sexual materials could result in healthier sex lives. After two years and over two million dollars worth of research, the Commission recommended that society should deal with sexual matters more liberally and directly.

Nevertheless, Brother Courtney bases much of his essay on the 1986 Attorney General's Commission on Pornography, an unfortunate time for the Reagan presidency. This suppression of 'objective' evidence is a travesty of American freedom of speech and expression. The Attorney General and his ilk are a fervent supporter of freedom of speech and expression.

Pornography has been brought to our attention by the fervor of one group and $400,000 investigating the "magnified evil" of pornography. Its consultants and six of its eleven members were known to be vociferous anti-pornography crusaders. Tom Smith in "Public Opinion Quarterly" described the deceitful measures taken by the commission to formulate "appropriate" conclusions.

Thus, a stacked commission and distorted polling seriously flawed the report. Yet its acceptance by the federal government precipitated the formation of anti-pornography policies, and the National Obscenity Enforcement Unit.

As a result of the Meese Commission report and the "community standards" clause in Miller v. California, the landmark 1973 U.S. Supreme Court obscenity case, the First Amendment has received an inconsistent application. In the Paris Theater obscenity case, decided the same day as Miller, Justice Burger dissented:

it is hard to see how state ordered segmentation of our minds can ever be forestalled... Freedom of speech inadverently has been rendered a majoritarian issue.

I am offended by radical zealots like Rev. Donald Wildmon of the American Family Association increasing pressure to pass anti-pornography ordinances and media restrictions. I am offended by Brother Courtney's notoriety due to narrow conceipt of the First Amendment. What recourse do I have? I have the right as any American. I am not a libertarian idealist arguing the semantics of obscenity. I am a fervent supporter of freedom of speech and expression.

Pornography has been said to appeal to people's baser instincts. I think the same can be said for Brother Courtney's unashamed appeal to intolerance and repression. He writes that censorship may be unfortunate. I would like to alter that. Pornography may be unfortunate, but it is surely evil than the censorial nightmares of Brother Courtney and his ilk.

Students encouraged to conserve in SEA blackout

By Tara Verdonk

This week has been dubbed Energy Consumption Awareness Week by the Students for Environmental Action (SEA). Pre-Cycling campaign was sparked in order to raise awareness of how much electricity is being used through our dorms. The campaign will run from Nov. 28 to Dec. 3.

Letters

Conservation worth more than minor inconvenience

Dear Editor:
The Students for Environmental Action (SEA) Pre-Cycling campaign has been educating the student community on power consumption and awareness of how much electricity is being used through our dorms. The campaign will run from Nov. 28 to Dec. 3. The goal of the campaign is to help students become more aware of how much electricity they are using and to encourage them to conserve. The campaign involves a variety of activities, including placing stickers on appliances, posting signs in dorms, and conducting an educational campaign.

Cycling Campaign is launched

Cycling Campaign is launched, and it cannot be denied that one of the hallmarks of this campaign is its emphasis on reusing and recycling materials. The cycling campaign is designed to reduce our dependence on fossil fuels, and it has been met with enthusiasm by students and faculty alike. The campaign encourages students to ride bicycles to school and to use public transportation as much as possible. This is a great way to reduce our carbon footprint and to help the environment.

Dear Editor:
Announcements and public calls to the campus for the week have more than once been met with smiles and过后overed sarcastic comments such as, "They sure picked a good week for a campaign." However, any student can offer support to our efforts, even if they choose not to participate in the activities. By simply being aware of our energy consumption and taking steps to reduce it, everyone can contribute to the success of this campaign.

Environmental education is necessary

Environmental education is necessary to promote conservation and to help people understand the importance of protecting the environment. The SEA Pre-Cycling campaign is just one example of how students can educate themselves and others about the need for conservation. By becoming more aware of our energy consumption and taking steps to reduce it, we can all play a role in protecting the environment for future generations.

Conservation education is not enough

Conservation education is not enough to guarantee a sustainable future. While raising awareness of the issue is important, it is not enough to make real changes. We must also take action to address the root causes of environmental problems. This means reducing our consumption of natural resources, reducing waste, and finding ways to make our communities more sustainable.

Beauty of art truly in the eye of the beholder

Beauty of art truly in the eye of the beholder. Thank you for appreciating the beauty of different forms of art. Art is subjective and can be enjoyed by different people in different ways. Thank you for your thoughtful and insightful remarks.

Conservation education is not enough

Conservation education is not enough to guarantee a sustainable future. While raising awareness of the issue is important, it is not enough to make real changes. We must also take action to address the root causes of environmental problems. This means reducing our consumption of natural resources, reducing waste, and finding ways to make our communities more sustainable.

Exotic Birds’ unique style targets college students

By MEREDITH MCCULLOUGH

Exotic Birds are flocking to Notre Dame’s Stepan Center! I’m not talking about a bizarre breed of migrating creatures, or part of a touring exhibition of African birds, or even participants in Letterman’s stupid pet contest. The birds I refer to are a local Cleveland band that is their way to begin making a living and “The energy just sucks you up and off...” - The Cleveland Edition

Three weeks ago I was sickened by the sight of one of these killing machines hunched upon a trash can, feasting upon a discarded ice cream bar. It proudly crouched out, razor keen claws, feasting upon a discarded ice cream bar. It proudly crouched out, razor keen claws, feasting upon a discarded ice cream bar. It proudly crouched out, razor keen claws, feasting upon a discarded ice cream bar. It proudly crouched out, razor keen claws, feasting upon a discarded ice cream bar. It proudly crouched out, razor keen claws, feasting upon a discarded ice cream bar. It proudly crouched out, razor keen claws, feasting upon a discarded ice cream bar. It proudly crouched out, razor keen claws, feasting upon a discarded ice cream bar. It proudly crouched out, razor keen claws, feasting upon a discarded ice cream bar. It proudly crouched out, razor keen claws, feasting upon a discarded ice cream bar. It proudly crouched out, razor keen claws, feasting upon a discarded ice cream bar. It proudly crouched out, razor keen claws, feasting upon a discarded ice cream bar. It proudly crouched out, razor keen claws, feasting upon a discarded ice cream bar. It proudly crouched out, razor keen claws, feasting upon a discarded ice cream bar. It proudly crouched out, razor keen claws, feasting upon a discarded ice cream bar. It proudly crouched out, razor keen claws, feasting upon a discarded ice cream bar. It proudly crouched out, razor keen claws, feasting upon a discarded ice cream bar. It proudly crouched out, razor keen claws, feasting upon a discarded ice cream bar. It proudly crouched out, razor keen claws, feasting upon a discarded ice cream bar. It proudly crouched out, razor keen claws, feasting upon a discarded ice cream bar. It proudly crouched out, razor keen claws, feasting upon a discarded ice cream bar. It proudly crouched out, razor keen claws, feasting upon a discarded ice cream bar. It proudly crouched out, razor keen claws, feasting upon a discarded ice cream bar. It proudly crouched out, razor keen claws, feasting upon a discarded ice cream bar. It proudly crouched out, razor keen claws, feasting upon a discarded ice cream bar. It proudly crouched out, razor keen claws, feasting upon a discarded ice cream bar. It proudly crouched out, razor keen claws, feasting upon a discarded ice cream bar. It proudly crouched out, razor keen claws, feasting upon a discarded ice cream bar. It proudly crouched out, razor keen claws, feasting upon a discarded ice cream bar. It proudly crouched out, razor keen claws, feasting upon a discarded ice cream bar. It proudly crouched out, razor keen claws, feasting upon a discarded ice cream bar.

“Caddyshack.”

I hope I am wrong. Perhaps the truth. The armies of the apocalypse are gathering in the trees...I pray I am not too late.
The Observer Tuesday, December 4, 1990

There’s no time like showtime for Lakers’ Perkins

The Observer accepts classifieds every business day from 10 a.m. to 3:30 p.m. at the Home Office, 214 S. Main Street, or by telephone at 277-7685. Deadline for next-day classifieds is 3 p.m. All classifieds must be prepaid. The charge is $2.50 per character per day, including spaces.

Sam Perkins, shown here while he was a Dallas Maverick, has adjusted well to his new starting position with the Los Angeles Lakers.

INGLEWOOD, Calif. (AP) — Showtime is back. As the Los Angeles Lakers call their style of plays for Sam Perkins, it’s almost as if he were getting to be a dreary gem, until he went prime time.

Since he made his first career NBA start on Nov. 15, Perkins has completely changed his night game. At times, he seemed unrecognizable.

When the Forum crowd boomed, Perkins didn’t seem like the worst 250-pound center who left the Dallas Mavericks six weeks ago, a six-year, $18 million deal with the Lakers. Perkins said he can’t explain the change, other than coincidence. Since replacing A.C. Green as the starting power forward seven games ago, Perkins has settled in to a routine.

"I decided that I would start coming off the bench, but I guess with the losing we had, they made a change to see what would happen," he said. "I’m glad it worked. Then I would have been a dead end if I continued to come off the bench doing what I was doing. I probably would have been slowed up still." Perkins’ slow start coincided with the Lakers’ 1-4 start, their worst in 12 years.

The lessons to the Knicks and the Suns were during that run, and Perkins, whose $3 million salary is believed to be second on the team only to Johnson’s, was loathed. Perkins said he was obvious to the calculus.

"I didn’t even know before anyone told me about it," Perkins said. "It wouldn’t bother me. I couldn’t please 17,000 fans. This game is very basic and simple. I just bring my mentality to the game and work hard. All the other stuff and glare to the game is unimportant to me. If anything else happens within it, so be it. I bring no other pressures. It’s just my own job to coach the players, staff and players." Perkins played well in the season-opening loss at San Antonio, scoring 22 points and grabbing 10 rebounds. But then he scored in single digits in the next four games.

Perkins got his first start at Houston in place of worthy, who was arrested earlier this month on charges of soliciting prostitution. Perkins scored a season-high 29 in a 103-102 win.

"I decided that I would start when he got us a lot of power under," Dunleavy said, "and I guess it’s working now and they can be even more effective."

Oddly, Perkins’ dismissal came the day after the 5-8 Bucs ended the six-game losing streak that proved his undoing. The change is not because of Ray Perkins. It’s strictly that we haven’t had a winning season in four years. I’m not saying who’s at fault,” owner Hugh Culverhouse said. Just last month, Culverhouse said he would not let Perkins quit even if the team lost the rest of its games.

But Monday, Culverhouse, who lured Perkins from Alabama with a five-year contract worth $800,000 a year, said his 19-41 record since being hired four years ago just wasn’t good enough. Assistant head coach Richard Williamson was named coach the rest of the season.

“We will go forth and hope­fully know the best shooting ever the last three games,” Culverhouse said at a hastily called news conference at the team’s training complex. “We’ve had our ups and we’ve had our downs. Let’s hope we’re ready for a strong finish. Perkins, who was unavailable for comment, met with Culverhouse shortly before 1 p.m. EST, then broke the news to the players.

“T’he day a fter the 5-8 Bucs ended the six-g a m e losing streak,” Testaverde said. “You go out and win a game and you come back and there’s bad news.”

The Bucs squatted offensively during the losing streak, and Perkins’ relationship with Vinny Testaverde soured when the quarterback was benched for two games in favor of Chris Chudzinski during the losing streak and then threw for a season-high 351 yards against Atlanta on Sunday. The first two losses of the season, Testaverde said. You go out and win a strong come out of it,” he said, referring to this week’s open­date. “There’s no guarantee that w e’ll win, but in my opinion with the two weeks o f f we had a chance.”

Perkins also held the title of vice president-football opera­tions and was responsible for all personnel moves. He also served as his own offensive co­ordinator, a decision criticized by people who thought he was wearing too many hats.

He virtually rebuilt the team from scratch, beginning with the drafting of Testaverde as the No. 1 pick in 1987. Only five players remain from the squad that inherited at the end of the 1986 season.

Perkins’ first Tampa Bay team finished 4-11, including two victories, in 1986. The Bucs were 5-11 in 1988 and again in 1989.

Commemorative Mugs (while supplies last)
DALLAS (AP) — Texas coach David McWilliams and Miami coach Dennis Erickson, who escaped with cliff-hanger victories over the weekend, agreed Monday that the winner of their Cotton Bowl game should be strongly considered for the national title.

But that's if Colorado loses in the Orange Bowl.

"You've got to be lucky to win a national championship," Erickson said. "You have to have a decent schedule and win the right games."

He said the Hurricanes will have an excellent shot at winning the national title if Notre Dame upsets Colorado in the Orange Bowl and, of course, Miami defeats Texas.

"We've got to be a little lucky," Erickson said of the defending national champions who have two losses. "If Colorado gets beat, then I believe the winner of this game has got a chance."

Colorado beat Texas 29-22 in September, the Longhorns' only loss of the season.

"Dennis has more experience about this national championship talk than I do, but I believe the winner here has a good chance," McWilliams said. "Of course, you never know which way people are going to vote."

Erickson said "the way things turned out Texas and Miami will be the most exciting game in the country. It will be the best bowl game. We'll just fight it out and watch what happens in the Orange Bowl."

It will be Miami's first appearance in the Cotton Bowl.

McWilliams, bringing Texas to the Cotton Bowl for the first time since 1963, called the New Year's Day contest in Dallas "the best bowl around."

Texas outlasted Texas A&M 28-27 on Saturday while the Hurricanes edged San Diego State 30-28.

"I'm glad to be out of San Diego and away from WAC (Western Athletic Conference) teams," Erickson said. "Brigham Young beat us in the opener then we had to hang on. But I'm proud to be 9-2 and not 8-3. That's the bottom line. We didn't play well, but we got the victory."

Both coaches said there should be a better way of deciding a national champion but stopped short of endorsing a playoff.

"I've always been against it, but I've changed a little because the bowls are deciding on their teams so early," Erickson said. "The bowls may force a national playoff onto themselves."

McWilliams said "I've always liked the bowl setup."

He added "the bowl situation is getting a little chaotic, but a lot of people smarter than me haven't found a solution for the playoffs."

Both teams will arrive in Dallas on Dec. 26 to begin workouts.

Texas holds a 2-1 edge over Miami. Texas edged Miami 14-7 at Austin in 1981 in the last meeting. Texas opened the 1972 season with a 23-10 victory over Miami. The Hurricanes avenged the loss 20-15 a year later.

NEW ORLEANS (AP) — Forget about the national championship. So long to big television ratings. All that's left for the Sugar Bowl is a not very meaningful game between unranked Virginia and No. 10 Tennessee.

"We've had a fun ball game this year," executive director Mickey Holmes said Monday. "It'll be fun for the players, the staff members and the fans. That's really what bowl games are supposed to be about."

That's not to say Holmes and members of the Sugar Bowl selection committee planned to ignore ratings and rankings when they selected Virginia. Holmes admitted that the Sugar Bowl, which has produced 15 national champions, including Miami last year, wanted the top teams again this year.

"In early November it looked as if Auburn, which was No. 3, could move up to second, and Notre Dame was No. 1. We looked good then for the No. 1 and No. 2 teams in the country to play here," Holmes said.

A combination of top teams losing and schools demanding early commitments left many bowl games with matchups they find less than satisfactory, Holmes said.

"Schools were very aggressive about demanding commitments this year," he said. "When the first bowl made a deal, everyone felt they had to do the same thing. Then, when Washington won the Rose Bowl, you had ... many schools wanting to place their teams."

Although bowl bids could not be made officially until Nov. 24, Holmes said unofficially just about everything was sewn up before that.

Holmes attended a meeting of bowl representatives in Atlanta on Nov. 5. At that time, he said, a colleague gave him a list of pairings for 13 bowls.

"I said, 'Are these your guesses of what will happen,' and he said, 'These are done deals,' Holmes said.

A bid to the Sugar Bowl is prestigious and profitable. The bowl paid each team $3.25 million last year, just behind the Rose Bowl and Orange Bowl.

One spot automatically goes to the Southeastern Conference champion. Competition for the other spot is always intense, but this year it began much earlier than usual.

Holmes said the Sugar Bowl is pleased to have Virginia (8-3), which is expected to bring a big-spending crowd to New Orleans. But he admitted that the Cavaliers, who lost three of their last four games, would not have gotten a Sugar bid had the bowls waited until the 24th to pick their teams.

San Francisco defeats Giants in tough defensive battle 7-3

San Francisco (AP) — The NFL's most awaited game in years turned out to have little worth waiting for.

Unless you like defense.

With Charles Haley, Ronnie Lott and Darryl Pollard making big defensive plays and Joe Montana orchestrating one quick touchdown drive, the San Francisco 49ers beat the Giants 7-3 Monday night in the NFL's lowest-scoring game this season.

The only touchdown came with 3:30 left in the first half, on a 23-yard pass from Montana to John Taylor, the 100th of his career.

McGee, Gross, Pendleton benefit in winter deals

ROSEMONT, 111. (AP) — Willie McGee, Terry Pendleton and Kevin Gross fueled a flurry of free agents finding new places to play Monday as baseball's winter meetings again back up all that talk with a lot of action.

McGee, who won a weird National League batting title when his average was 22nd in the league, signed with the Chicago Cubs Monday, guaranteeing that baseball will have another of its own.

The Cardinals lost Ron Guidry to free agency last week and wound up the season in Oakland, agreed with the San Francisco Giants on a four-year, $13 million deal.

Pendleton, McGee's longtime teammate in St. Louis, also struck rich — a four-year, $9.8 million deal with the San Diego Padres, which returned to the World Series.

But the frenzy also included Devon White and the Blue Jays and Rich Gedman and the Expos.

The announcements about McGee, Pendleton and Gross came within 90 minutes of each other in the early evening, following a morning and afternoon devoted with discussions, but not much else. The frenzy followed Sunday's activity in which Toronto and California included a riddle made by Kevin Fagan before he could make the Giants a 3-0 lead.

The 10 points were the fewest in a game this season—the previous low was 14 in a shutout win by Ottawa against New England two weeks ago.

Montreal lost 12-29 for 152 yards.

Both teams started sluggishly, like boxers wary of dangerous opponents, as the defenses looked to duplicate every offensive move.

Each team threatened once in the first 22 minutes, the Giants reaching the San Francisco 30 before Haley dumped Meggett for a 4-yard loss; the 49ers missing when Mike Cofer's 43-yard field goal attempt was wide left.

Then the Giants got a couple of breaks—a 21-yard pass from Simms to Bavauro on which Haley fell down and a 11-yard pass deflected off Rodney Hampton to Steve Walker at the San Francisco 3. But Anderson was stuffed on two running plays and a Simms-to-Bavauro pass missed and the Giants had to settle for a 3-0 lead on Bahr's field goal with 2:26 left in the half.

But the closing minutes is prime time for Montana, who then went 4-for-14 for 33 yards.

On the second play after the kickoff, he hit Roger Craig in an empty middle for 31 yards. Two plays after that, he threw to Taylor in the end zone, laying the ball in low and perfect just out of the reach of Mark Collins.

San Francisco quarterback Joe Montana led the 49ers to a 7-3 victory over the New York Giants Monday night and it was 7-3 Giants at the half. New York got as far as the San Francisco 30 in the third quarter before Haley stripped the ball from Sims and Dave Waymer recovered.
Those erratic Redskins
Strange season has playoff pundits guessing

WASHINGTON (AP) — The toughest question facing Joe Gibbs this week is which Washington Redskins team he will be coaching.

Will it be the Redskins who dismantled the Miami Dolphins 42-20 on Sunday, routed New Orleans three weeks before and almost beat the New York Giants twice?

Or will the Chicago Bears face the Redskins who lost listlessly to Dallas two weeks ago and were blindsided before that by Philadelphia?

"We've been very erratic and that's not going to get it done," Gibbs said Monday. "We have a tendency to go berserk one way or another after every game, to trash ourselves or get euphoric. ... We've got a roller coaster going."

Despite their wildly erratic season, the Redskins' 7-5 record earned them a first-place tie with the Eagles in the NFC wild-card race.

Washington has not won two in a row since starting the season 3-1. They have alternated wins and losses and have alternated strong and bad efforts almost as predictably, leaving coaches scrambling to plug holes every other week.

"We're fighting for our life to get in the playoffs," Gibbs said. "We've not put two good games back to back. ... Our practices are the one thing we can do to change. We had excellent preparation before the Saints game. We couldn't practice before Dallas and we came back last week and had good preparation."

Their improvised win to knock the Dolphins out of first place in the AFC East left the Redskins once again in good shape for a playoff berth. Minnesota and Green Bay are tied for that spot at 6-6.

The Bears visit Washington Sunday after already clinching the NFC Central Division title. The Redskins are on the road the next two weeks against woeful New England and the Indianapolis Colts, who have been on their own roller-coaster this year.

The top wild-card team will get the home field the first week of the playoffs, while the No. 3 team will have to play on the roat against one of the division champions.

"We have to come out and play like this every week," said running back Earnest Byner, who rushed for three touchdowns and 157 yards on 32 carries against Miami.

"We can't wait for someone else to kick-start us. We're in control of our own destiny. We've got the talent. Now we've got to find the intensity to do it every week," he said.

The Dolphins ran into the best Washington team so far this season only 10 days after a 27-17 Thanksgiving Day loss in Dallas left the Redskins facing a steep drop in their once-high playoff chances.

"There's no mystery," said tight end Don Warren. "We took a lot of heat after the last game and guys got angry. It was justified, too."

Washington gained 467 yards against Miami's league-leading defense and their 222 yards on the grounds dropped the Dolphins from fourth in the league to 10th in rush defense. Mark Rypien fired three weeks after his return from a knee injury, completed 21 of 28 passes for three touchdowns and 245 yards in a big 8-8 yards a throw.

Knicks fire Jackson, hire MacLeod

NEW YORK (AP) — The struggling New York Knicks fired coach Stu Jackson today and replaced him with former Phoenix and Dallas coach John MacLeod.

"This decision was made in the best interests of the New York Knickerbockers," vice president and general manager Al Bianchi said.

"At this point in time, we felt a change was needed to improve the performance of the team," he said. "John MacLeod is a proven winner. His outstanding record speaks for itself."

Bianchi and MacLeod have a long relationship in basketball. The Knicks GM served as MacLeod's assistant coach for

It took Galileo 16 years to master the universe.
You have one night.

It seems unfair. The genius had all that time. While you have a few short hours to learn your sun spots from your satellites before the dreaded astronomy exam.

On the other hand, Vivarin gives you the definite advantage. It helps keep you awake and mentally alert for hours. Safely and conveniently. So even when the subject matters dull, your mind will stay razor sharp.

If Galileo had used Vivarin, maybe he could have mastered the solar system faster, too.

Revive with Vivarin!

INDIANAPOLIS—The earthquake forecasted for Indianapolis Monday may have been the only thing that could have saved the Notre Dame basketball team against Butler.

The Bulldogs (2-2) shook the Irish (3-1) throughout the first half, building a lead that reached as many as 23 points. Butler then weathered a second-half Notre Dame rally to record a 91-77 victory at Hinkle Fieldhouse.

The Bulldogs used a furious full-court press and timely three-point shooting to build a 22-12 lead with just under nine minutes gone in the game. The Irish came right back and when Joe Ross rebounded Elmer Bennett's missed free throw and dropped it in. With that, the Butler lead had been cut to a single point.

Bennett had a chance to give the Irish the lead on the ensuing possession, but he missed a short baseline jumper. The Bulldogs then ran off 12-unanswered points to build a 34-21 lead, a lead they would never relinquish.

"I have to give Butler credit," Irish coach Digger Phelps said. "They played very, very hard. They played very, very well. Their press did bother us. We didn't handle their pressure well. I think looking back to facing Iowa's press earlier with Timmy Singleton, we just went right through it. It seems with-out Singleton we have trouble with that type of defense right now.

Senior co-captain Singleton, who usually starts at point guard for the Irish, missed the game with back spasms. He injured himself in the first half of Notre Dame's 98-90 loss to Kentucky Saturday. Bennett moved from his usual shooting guard position to replace Singleton at the point.

The Bulldogs went into the lockerroom with a 49-34 half-time lead. The Irish switched to a zone defense in the second half, and that helped them cut Butler's advantage to 62-56 with 9:06 to play.

With 6:12 remaining, the Irish trailed by six, but they could get no closer as the Bulldogs made their free throws down the stretch. Butler was 36 of 43 on the night from the charity stripe.

"We had another chance to come back. I thought, when we cut it to six and could have cut it to four," Phelps said. "But then we had a couple of turnovers again, so it was the turnovers and the two three-point shots that Butler had against the zone. Our guards just didn't come out high enough on them, and that was the game. Butler deserved to win. We didn't play well.

The loss was the fifth straight for the Irish since they opened the season with wins at home over Fordham and Iowa in the NIT. The triumph was especially sweet for the Bulldogs, who had just returned from the West Coast the night before after losing 79-76 to Cal State Fullerton.

"This is important for our program," Bulldog coach Barry Collier. "We really have not been competitive at this level before.

The Bulldogs, who had lost their past 17 meetings between the two schools, were 8-24 last season.

Butler guard Darin Archbold led all scorers with 19 points, including a perfect 10 of 10 from the free-throw line. Junior guard Mike Hovis had 16 and John Karaffa 15 for the Bulldogs. Dar Wayne Singleton had 10 for the Irish with 18 points on 9-of-12 shooting from the field, while Bennett added 10 points and seven assists.

ND lacks composure, has no togetherness

INDIANAPOLIS—It was an unbelievable sight. The same Notre Dame basketball team that took tenth-ranked Indiana to the wire was losing to Butler last night in the first half, by 20 points.

This Irish team is capable of some good things, but none of them were seen on the court Monday night.

Said Butler's Darin Archbold, the junior guard for the Irish, missed the game with back spasms. He injured himself in the first half of Notre Dame's 98-90 loss to Kentucky Saturday. Bennett moved from his usual shooting guard position to replace Singleton at the point.

The Bulldogs went into the lockerroom with a 49-34 half-time lead. The Irish switched to a zone defense in the second half, and that helped them cut Butler's advantage to 62-56 with 9:06 to play.

Cordell, 5-year assistant for ND, named Head Coach at Kent State

KENT, Ohio (AP) — Pete Cordelli Jr., offensive coordinator for Notre Dame, Monday was named Kent State's new head football coach, replacing fired coach Dick Crum.

"We believe Pete Cordelli has the coaching values, philosophy and ability to make Kent's program very competitive again," school President Michael Schwartz said.

Cordelli said he was excited about the chance to work with the Golden Flashes of the Mid-American Conference.

"When you come to the campus, you can feel that the university is moving forward. You can also feel the commitment to the football program and to making it competitive again," Cordelli, 37, has been Notre Dame's assistant coach since 1986. He had coached seven bowl games, including Notre Dame's national championship title in 1988.

He also has coached at Arkansas and Minnesota, and was a University of Oklahoma assistant scout for the Dallas Cowboys from 1981-82.

Cordelli called the job at Kent State "a great opportunity" and had a three-year record of 7-27 with the Golden Flashes.

"We had another chance to come back. I thought, when we cut it to six and could have cut it to four," Phelps said. "But then we had a couple of turnovers again, so it was the turnovers and the two three-point shots that Butler had against the zone. Our guards just didn't come out high enough on them, and that was the game. Butler deserved to win. We didn't play well.
