Art experts discourage removal of art exhibit

By KATIE CAPUTO
News Writer

A panel of experts in art and philosophy discouraged the removal of Mark Kaplan’s sculptures from the Le Mans lawn at Saint Mary’s, saying that censorship is wrong and art should stimulate discussion.

"The work confronts us and we are forced to respond," said Father Austin Collins, sculptor and associate professor of art at Notre Dame. "Our artistic expression should be as broad as our educational pursuits."

About 100 people, both students and faculty, attended the discussion on censorship on college campuses, which resulted from the removal of Kaplan’s sculptures two weeks ago and "concern over the operation of censorship on the campus."

"This is a constructive and educational way of raising issues regarding censorship of the arts," said Bob Hohl, a reference librarian at the Cushing-Leighton Library. Informal discussions and concerns among faculty and students led to a formal meeting, according to Hohl.

Collins said that the intolerant attitude evident on the Saint Mary’s campus is "totally inappropriate in an academic environment."

By removing "something that is going to stimulate conversation," we are rejecting the opportunity to know and learn, said Ann Plamondon, chairperson of the department of philosophy at Saint Mary’s.

She discussed the female

ion’s eye view

Located in the bowls of Newland Hall is one of Notre Dame’s two nuclear particle accelerators. The other accelerator was an integral part of the original nuclear research in the 1940s and has since been decommissioned.

Panel addresses the future of news and new media trends

By JENNIFER HABRYCH
News Writer

A panel of four members of the media addressed the issues of news and the new trends in the media in a panel discussion yesterday at Saint Mary’s.

Included on the panel were...
I have seen the light. I used to hate South Bend. Notre Dame, a little xenophobic enclave of suburban America, made me feel as safe as Lawrence Powell during a routine traffic stop in Simi Valley. But the rust belt city south of campus scared the living corn out of me.

Crime was rampant, the weather rivaled that of Moscow, and the people of Michiana loved my school’s football team, but hated me and my roommates.

Those were the old days. Over the last month, I’ve come to a realization. South Bend is a great little town. And if Notre Dame and Saint Mary’s students would stick their necks out far enough to see the Society of St. John the Baptist building, they might also see a community which actually has a lot to offer.

Yesterday, I went to the library. But this library didn’t display a garish, 130-foot brown-on-brown mosaic of the Christian savior on its façade. Rather, it was sleek, chic and full of stuff you can’t find on campus.

The South Bend Public Library has a huge collection of records, tapes and compact discs, as well as video tapes. You can check them out for free if you have a library card. Their selection of newspapers makes the Hesburgh Library’s look like the coffee table in my living room.

Is your room under-decorated, or looking like a studio in Hight-Abbacy circa 1969, with old Jefferson Airplane black light posters papering the walls? Then take a trip to the library, and check out a painting for six weeks.

Puppy owner sues yard to save dogs
SAN ANTONIO — His home is flooded, his plumbing system destroyed and his yard is full of deep holes, but Aaron Gonzalez doesn’t mind. His puppies are safe.

Seven 2-week-old puppies fell down a 4-inch sewer trap line in Gonzalez’s yard Sunday morning. He discovered the canine catastrophe when the mother began behaving frantically. He even borrowed a neighbor’s shop vacuum and to suck three of the pups safely from the pipe. The couple went to bed about 2 a.m., planning to get a backhoe to try up the sewer line the next morning. But they couldn’t sleep because the trapped puppies “cried and cried,” and their whimpering mother refused to leave the hole, Gonzalez said. “It was ugly.”

Miss Tennessee is an Army Officer
MIAMI VALLEY, N.J. — Leah Halun traded her combat boots and fatigues for a half belt and a swimsuit, as the Army Reserve intelligence expert — don’t say spying, she dislikes the word — competes to become the 66th Miss America. Halun, Miss Tennessee and a second lieutenant, has been involved in undercover work and electronic warfare in Central America. She’s also expert at firing an .50-caliber rifle and holds the military’s highest marksmanship award.

Hotel rejects American AIDS patient
TOKYO — A Tokyo hotel refused to provide accommodations for an American AIDS sufferer who was in Japan to speak at a symposium on the disease, hotel officials said today. Organizers of the symposium, entitled “Living with AIDS,” requested reservations at the Hotel Toshi for Sean Duque, 38, who addressed the one-day event last Thursday. But the hotel rejected the request. “We don’t want AIDS patients to stay because our customers will feel uneasy. And we’re not equipped with hygiene measures,” said an official at the hotel, who spoke on condition of anonymity.

TO DAY AT A GLANCE

TODAY AT A GLANCE
The Balet Folklorico Azul y Oro will dance on the Fieldhouse Mall at 5 p.m. to celebrate Mexican Independence Day.

Science Placement Night will be at 7 p.m. in the auditorium of Hayes-Healy. Representatives from Hewitt Associates, the Ugojohn Company and Victoria Chemical will present career information. The event is sponsored by Career and Placement Services.

An alternative music program, Nocturne Tonight, will be hosted by Tony Leonardo, on 89.9 WSNF-FM at 12 p.m. To make requests, call 239-7342.

The Catholic Worker House is sponsoring a luncheon Thursday, September 17 at the Center for Social Concerns from 11:30 a.m. -1:30 p.m.

The Pre-professional Society, now known as Club Pre-Med, will hold its first meeting for all new and present members in the auditorium of Cushing Hall. For information call Paula at 283-4271.

An alternative music program, Nocturne Tonight, will be hosted by Tony Leonardo, on 89.9 WSNF-FM at 12 p.m. To make requests, call 239-7342.

The Catholic Worker House is sponsoring a luncheon Thursday, September 17 at the Center for Social Concerns from 11:30 a.m. -1:30 p.m.

The Pre-professional Society, now known as Club Pre-Med, will hold its first meeting for all new and present members in the auditorium of Cushing Hall. For information call Paula at 283-4271.

On this day in history
In 1966: William Grapo Durant formed the automotive company General Motors.
In 1927: German President Hindenburg denied that Germany was responsible for World War I.
In 1965: A military revolt erupted in Argentina against Juan Peron.
In 1966: The New Metropolitan Opera House opened in New York.
In 1974: President Ford offered conditional amnesty to draft evaders who agreed to work for two years in public service.
In 1987: Seventy nations signed an accord to save ozone layer.
Business conference to discuss income distribution inequality

BY BECKY BARNES
Assistant News Editor

The College of Business Administration will sponsor a conference September 17 and 18 addressing the growing inequality of income distribution in the U.S.

The panel discussion will focus on potential monetary, fiscal, educational and other public policy reforms," said Jeffrey Bergstrand, assistant professor of finance and one of the coordinators of the convention.

The conference is part of the Sesquicentennial Conference Series that has taken place since last October. According to Bergstrand, the topic was chosen because "there has been a good deal of attention associated with a growing inequality of the distribution of income in the 1980s."

The conference hopes to provide a "better understanding of the causes of the growing inequality of income distribution" and look for possible remedies, he continued.

Bergstrand hopes the conference will lead to a "sense of possible repercussions or implications for society of the growing inequality."

Notre Dame security reports suspicious person; vandalism

BY JULIE BARRETT
Assistant News Editor

A man approached two Notre Dame students bathing on the dock of St. Joseph beach Sunday claiming he was a photographer for The Observer and asked to take photographs of them, according to Phil Johnson, assistant director of Notre Dame Security.

The students became suspicious of the man and reported the incident Monday. There was no physical confrontation reported, Johnson said.

The suspect is described as being a white male, 5'10", between the ages of 30 and 35, with light brown hair and a mustache, Johnson said.

In a separate incident, 13 paintings were vandalized sometime this weekend in the basic painting room in Riley Hall of Art and Design.

Three of the paintings were ripped and 10 had paint smeared on them, Johnson said. There are no suspects at this time.

Johnson requested that anyone with information about these incidents notify Security.

And now for your future......

Kevin Keyes of Dean Witter Reynolds addresses a student on the post college job market at "Meet the Firms Night." It was held in the Monogram Room of the JACC on Monday night and was sponsored by the Finance Club.

HPC discusses taxi voucher program

By BEVIN KOVALIK
News Writer

A taxi voucher program was introduced last night to the Hall Presidents' Council.

The goal of the program, introduced last year by a group of seniors, is to prevent drinking and driving and to encourage safety by allowing students to charge a taxi and be billed later, according to Mark Pogue, coordinator of the Office of Drug and Alcohol Administration.

"This voucher system will be a safe option for students, but if this program is going to fly," he said, "it is going to have to be a student-run project."

Members of the organization Students Against Drunk Driving (SADD) will be helping to organize this project, he said.

More orders for "The Shirt" are being placed today, according to Steve Hank from Alumni Hall. So far the net profit is $100,000 and shirt sales have doubled the original estimate, he said.

The Lyons Hall volleyball tournament will be September 27 and teams comprised of six students can register for $10. September 21 in both dining halls during the lunch and dinner hours, said Wendy Holibos, coordinator.

Lyons Hall will donate all proceeds to the American Heart Association in memory of Karen Whitman, a Lyons resident who died of a heart attack over the summer.

Because there is a lack of places to host formals this year, Senior Bar will be available for non-alcoholic formals only, said Mary Gude, manager of the Senior Bar.

Senior Bar will also be incorporated into the Weekend Wheels project, she said. "This is a great service because it helps to reduce the liability of bars and gets students home safely," Gude said.

Russian unemployment figures expected to skyrocket in 1993

MOSCOW (AP) — Russian unemployment could jump next year to more than 6 million people next year as cuts in subsidies drive more businesses into bankruptcy, a senior official said in remarks published Tuesday.

In a sign of discontent, farmers picketed in cities across Russia on Tuesday, protesting that reforms have driven up the prices they must pay at a faster rate than prices they receive for their produce.

Inflation has skyrocketed since President Boris Yeltsin accelerated reform by freeing prices last January. But so far his government has balked at cutting subsidies to unprofitable state-owned businesses for fear of sinking them and throwing millions out of work.

Yeltsin vowed last week to fight hyperinflation by slashing subsidies. A wide-scale privatization program he promised to launch Oct. 1 is expected to cause bankruptcies and social hardship.

Economics Minister Andrei Nechayev said the number of people needing work next year could rise to about 7 million people, or 8 percent of the workforce — about the same as the U.S. rate.

Nechayev, quoted in the government's Rossiyskiye Vesti (Russian News), said about 5 million of the 7 million would be classified as unemployed. About 4.7 million will receive unemployment relief.

Under the old Soviet system, officials claimed that no one was unemployed. The number of people now registered as jobless is 248,000, the daily Moskovsky Komsomolets reported.

Authorities have said the real jobless figure may be twice as much as the official one.

Feature film to be shot on campus

A new feature film based on the true story of a 1975 Notre Dame football player will be shooting at the South Bend campus a little more than a year after the film "Rudy," recounts the experiences of a 1976 ND graduate Daniel "Rudy" Ruettiger, a walk-on football player who became a campus legend for his appearance in the final moments of the final home game of 1975, a victory over Georgia Tech.

A transfer student, Ruettiger had spent two years on the team's scout squad before playing in the last game of his collegiate career.

The film reunites director David Anspaugh and screenwriter Angelo Pizzo, who last worked together on the 1986 hit "Hoosiers.

On-campus South Bend filming of "Rudy" will take place from mid-October to mid-November. A Tri-Star Pictures production, the film will be the first theatrical release to be shot on the Notre Dame campus since "American" in 1940.

Ironically, the time to start saving for retirement is when it looks like you can least afford it.

Can't afford to save for retirement? The truth is, you can't afford not to.

When you realize that your retirement can last 20 to 30 years or more. You'll want to live at least as comfortably than you are now.

By starting to save now, you can take advantage of tax-deferral and give your money time to compound and grow.

Consider this: set aside just $100 each month beginning at age 30 and you can accumulate over $302,532* by the time you reach age 65. If you wait 10 years and you'll have to budget $137 each month to reach the same goal.

Even if you're not counting the years to retirement, you can count on TIAA-CREF to help you build the future you deserve— with flexible retirement and tax-deferred annuity plans, a diverse portfolio of investment choices, and a dedicated network of personal service that spans 75 years.

Over a million people in education and research put TIAA-CREF at the top of their list for retirement planning. Why not join them?

Call today and learn how simple it is to build a secure retirement. Call 1-800-842-2888. Ask for the observer hotline. Start planning your future. Call TIAA-CREF at 1800-842-2888.
College officials defend rising costs, despite study

WASHINGTON (AP) — College officials on Tuesday disputed a congressional study that blamed skyrocketing college tuition and fees for administrative bloat and costly academic research.

Richard Rosser, president of the National Association of Independent Colleges and Universities, said that the House Select Committee on Children, Youth and Families had provided an "incredibly simplistic" explanation for the skyrocketing costs of public collegiate education Monday.

Rosser, one of six higher education officials who met with reporters to discuss wide-ranging education issues, said officials "would welcome a meeting" with Rep. Patricia Schroeder, D-Colo. and the committee chairwoman.

Schroeder's committee released results of an investigation that found that tuition and fees rose by 141 percent at public four-year colleges and universities from 1980 to 1990, and by 12 percent for the 1991-92 school year. Inflation was 63.6 percent last year. Inflation was 63.6 percent in the 1980s, 3.2 percent last year.

Despite the increases, Schroeder said, the amount of teaching time went down and class size went up, with colleges increasing their use of graduate assistants to teach undergraduate courses. Schroeder attributed the changes to an increased emphasis on research.

Also, the investigation found that the number of academic-support professionals — such as financial aid counselors and coaches — grew by more than 60 percent between 1975 and 1985. Full-time faculty rose by 6 percent, while executive and administrative employees increased by 18 percent.

"I think what we have is a real distortion," said Rosser.

James Appleberry, president of the American Association of State Colleges and Universities said that over two years higher education lost $3.2 billion in purchasing power, mainly because of budget cuts and inflation.

Appleberry said that last year 22 state institutions began the year with less money appropriated than the year before, while 35 schools cut their budgets in mid-year. This year, 15 institutions had their budgets cut from the previous year, he said.

"We don't see any end in sight now," said Appleberry.

Peter Magrath, president of the National Association of State Universities and Land-Grant Colleges, acknowledged that "there is some interaction between research and teaching functions at a limited number of schools and universities, maybe 200.

Robert Rosenzweig, president of the Association of American Universities, said "we need a better way to evaluate teachers" but stressed that the use of teaching assistants is essential.

Endeavour astronauts' experiments yield 'really unexpected' observations

SPACE CENTER, Houston (AP) — Endeavour's astronauts today peered at tiny tadpoles hatched in space as they wriggled around in a flurry of motions that one scientist called "really unexpected."

The quarter-inch tadpoles hatched aboard the shuttle during the last two days from frog eggs fertilized on the ground before flight. They darted, swam rapidly in circles or floated, tails wriggling, inside two experimental flasks.

"They were swimming in backwards somersaults, forward somersaults. Some froze, some swam normally," Souza said. "We had a real hodgepodge of swimming behavior from these tad, and that was really unexpected."

Previous low-gravity tests had led scientists to expect the tadpoles to either remain still or do forward flips, Souza said. The tadpoles were expected to escape the shuttle's weightlessness as they hatched.

Candidates continue to bash opponents’ former records

SALT LAKE CITY (AP) — President Bush told a military group Tuesday that Bill Clinton’s draft record matters since any president “might have to decide if our sons and daughters should knock early on death’s door.” Clinton steered clear of the draft issue while telling the group he was ready to lead the military as commander in chief.

The candidates addressed the National Guard Association an hour apart in appearances that had been seen as a hard-fighting exchange on Clinton’s descriptions of how he avoided the Vietnam draft.

Bush spoke of “controversy swirling around the issue,” but his references were brief and, for the most part, indirect.

Aides said Clinton had prepared a response in case Bush attacked directly on the draft issue, as other Republicans have, but decided it was unnecessary after hearing Bush’s speech.

The Democrat emphasized the subject he considers at the center of the campaign: the economy. “National security begins with economic security,” he told the group.

Bush, speaking first, raised the draft issue even as he said it was not his intention to make a political assault.

“There’s been a lot of controversy swirling around about service to country and influence to avoid the military, and I’ve read a great deal of speculation that I was going to come out here and use this forum to attack Gov. Clinton,” he said.

“I didn’t come here to attack him,” Bush told the group. Still, “I want to tell you I feel very strongly about certain aspects of the controversy swirling around Gov. Clinton.”

Despite all our problems at home, we can never forget that we ask our presidents to lead the military — to hear the awful sound of death and send your sons and daughters in harm’s way,” he said.

Bush, a Navy flyer shot down in World War II, said, “Does that mean that we must hold our presidents to the highest standard?”

Clinton, who watched Bush’s speech on television before arriving at the hall, rearranged his schedule to be on hand to respond to Bush directly. But he ended up ignoring the president’s swipes.

“I will never allow a hollow army,” Clinton vowed. “We still must have the best-equipped and best-trained military to meet today’s threats,” he said, echoing Bush’s own remarks.

WASHINGTON (AP) — Business executive Ross Perot today said the economic strategies offered by both presidential candidates are not specific enough and urged them to present “hard plans that people can buy.”

“The thing they always underestimate is how smart the American people are,” Perot said. “The American people understand what’s going on. They understand shams and lies, and so for those plans are soft.”

The Dallas data processing billionaire who flirted spectacularly with making an independent run for the White House offered his assessment in an interview on ABC’s “Good Morning America.”

The interview came as a Washington Post-ABC News poll found one out of six voters saying they would cast their ballots for Perot even though he suspended his campaign in July. In the survey, it was Democrat Bill Clinton 45 percent, President Bush 33 percent and Perot 16 percent.

Without Perot as a choice, it was Clinton 54 percent and Bush 39 percent in the Sept. 9-13 telephone poll by ICR Survey Research. The error margin was plus or minus 4 percentage points.

“I don’t want to be negative, I do want to be constructive,” Perot said.

“They need to come down with hard plans that people will buy.”

He said he planned to present Bush last week “was soft, it was conceptual.” He said he could not tell if salary cuts for top government officials under Bush’s plan would include elected office holders. “That needs to be reworked,” he said.

“I think it is a mistake to say, read my lips and never, never,” Perot said.
**Superfund program failing to do its job**

By BECKY BARNES
Assistant News Editor

The federal Superfund program was enacted in 1980 to promote rapid and long-term cleanup of our nation’s worst hazardous waste sites. After 12 years, it has proven to be a dismal failure. Only 84 of the over 1,200 sites on the National Priorities List (NPR) have been completely cleaned up. Billions of public and private sector dollars have been spent. Nearly 20,000 potentially responsible parties (PRPs) have been ensnared in a maze of Superfund litigation. And hundreds of communities are struggling with the economic and environmental consequences of delayed cleanup and endless legal wrangling over Superfund sites within their borders.

Superfund has failed so terribly in part because it was crafted to solve what was thought to be a modest, relatively inexpensive problem. In fact, the scope and cost of hazardous waste cleanups vastly exceeds what anyone imagined. Yet, Superfund is still trying to raise cleanup funds through the system designed for the original problem.

Congress hoped to make individual “polluters” pay for cleanup and so gave EPA extraordinary powers to raise money by establishing individual liability on a site-by-site basis. The system has turned out to be completely inadequate and inappropriate.

Virtually everyone involved in the debate is deploring its waste and ineffectiveness, voicing what is painfully evident after twelve years: the program is broken and needs to be fixed.

Without question, Superfund is the upcoming, hot environmental issue. Raising it with our elected and would-be-elected officials during this campaign is timely and relevant to determining their ability to ensure that Superfund meets its cleanup goals quickly and cost-effectively.

### Controversy arises over Great Lakes’ water

**MARQUETTE, Mich. (AP) —** Long unused as a natural resource exploited for profit or export, Great Lakes water now claims government protection as the “gold of the next century.”

Michigan has 3,200 miles of shoreline, second of the five Great Lakes. Nicknamed the “Great Lakes state,” Michigan seems to be taking a leading role in the fight to protect this resource.

Indicative of the gold of the next century,” said Glenda Daniels, executive director of the environmental group Lake Michigan Federation. “We are already facing a job drain away from this region, and if water is going to control where people are, we want to bring jobs back here.”

“We don’t want to send our water away to support jobs somewhere else.”

The eight U.S. states bordering the Great Lakes — Michigan, Wisconsin, Minnesota, Iowa, Illinois, Ohio, New York, and Pennsylvania — signed the Great Lakes Charter in 1985. The agreement ensures the states will confer with one another before granting any requests for diverting Great Lakes water.

“By a year later, the United States bolstered that with the Water Resources Development Act. That requires the Integrated Watershed Management Act, which provides for the establishment and operation of state and local water resources agencies.”

“People feel any out-of-basin diversion is terribly in part because it was crafted to solve what was thought to be a modest, relatively inexpensive problem.”

Goggin said the Superfund program is deploring its waste and ineffectiveness, voicing what is painfully evident after twelve years: the program is broken and needs to be fixed.

LETTERS TO THE EDITOR

Information is provided about virus protection

Dear Editor:

The Sept. 9 story on a computer virus attack at the University of Notre Dame raised questions concerning virus protection available at Notre Dame.

The information provided below was compiled by calling the Information Resource Center at 239-8111.

Anti-virus programs are available which are specifically designed to detect and eliminate computer viruses. No anti-virus program can claim absolute protection from virus damage, as new viruses or strains (variations of previously discovered viruses) continue to appear on an almost daily basis.

The Office of University Computing has researched several of the leading anti-virus programs and currently recommends McAfee's VirusScan and Symantec's Norton AntiVirus for DOS computers and Disinfectant for Macintosh computers.

Both of these programs are available free of charge to students, through the Information Resource Center (IRC) in room 111 of the Computing Center/Math Building. If you own your own computer, we strongly encourage you to obtain one of these anti-virus programs.

It is important to stay current with the latest versions, to reduce the possibility of being infected by a new virus.

If you previously obtained either VirusScan or Disinfectant, you should check the version number of the program you are currently using, as both of these programs have been updated over the past summer. VirusScan is currently at version 95, and Disinfectant is at version 2.6.

To obtain either of these programs, bring a blank diskette to the IRC to find out how they can obtain the latest versions of these anti-virus programs.

All campus clusters administered by the Office of University Computing continually monitor diskettes used in the cluster for the presence of viruses.

If you are concerned that one of your diskettes may have been infected with a virus, you may visit any of the clusters and request that your disk be scanned for a virus.

This is actually a requirement to use any of these programs, as they are designed to protect your computer from a virus.

The group became offensive when Clinton began his speech, showed their views. Those persons who stood outside Stepan Center and displayed signs or distributed literature or discussed their views with others have my full respect and support for the exercise of their freedom to speak.

But those who, having entered the ball, sought to disrupt the candidate's speech merely "demonstrated" their complete lack of understanding of the true meaning of freedom of speech.

When anyone, minority of a people, seek to shout down, drown out, or silence other speakers through intimidation, heckling, or other tactics, we as a community should stand in condemnation. Such behavior is never the exercise of free speech, it is its suppression.

...but disruption of speech was intolerable

Dear Editor:

During Bill Clinton's speech Friday evening, a group of Notre Dame's Right to Life group was present.

They were rude, intolerant and immature. The result of their behavior was to turn me, and many other people, against the Right to Life group.

While waiting in line outside the speech, the Right to Life group distributed tasteful pamphlets welcoming Clinton and explaining their point of view.

The literature and posters demonstrated to all present that the Right to Life group is against Clinton's views on abortion. This should have been an adequate demonstration.

The group became offensive when Clinton began his speech, however. Throughout his speech, they yelled, boomed, and Often prevented both Clinton from speaking and the crowd from hearing.

Notre Dame is supposed to be a liberal arts school. An important part of that is being tolerant and listening to all the sides of an issue.

Not only did the Right to Life group turn deaf ears to Clinton's many other viewpoints on issues other than abortion, but they prevented the 2000 other students and staff present from listening to him.

I am well aware of the Right to Life's opinions; let me hear the presidential candidate's opinions, since I have the right to make an informed decision.

Many other people feel the way I do. They are all embarrassed by the behavior of the Right to Life group. They portrayed Notre Dame as rude children, not willing to listen or allowing opposing points of view.

Previously, I had felt ambivalent to both pro-life and pro-choice groups, but after this display I feel too embarrassed and disgusted to side with Notre Dame's Right to Life group.

Tesa brings 'Psychotic Supper' to South Bend

Heavy metal rock band, named after a scientist, performs tonight at the JACC

By ROLANDO DE AGUIAR
Music Critic

The last year has been a tough one for Tesla.

A band which claimed several major pop-rock successes since 1988 - suddenly disappeared on the radio, as new musical icons, fertilized by Nirvana and Lollapalooza, sprouted from the west coast.

But Tesla hasn't been forced to sell its equipment—yet. While Pearl Jam and Red Hot Chili Peppers are this season's talk among the masses, Tesla's Psychotic Supper has quietly reached the top 15 of the Billboard album chart and sold a mildly impressive 500,000 copies. The band's three previous albums were platinum sellers.

Tonight, Tesla will play in the South Bend dome of the JACC. The band comes to South Bend after shows in Noblesville and Evansville kicked off September.

The group's gimmicky reverence of scientist Nikola Tesla, inventor of the Tesla coil and, according to Tesla-sponsored propaganda, the radio, has grown quite old in the days since their first major album, Mechanical Resonance, gave the band national attention.

Tesla continues to acknowledge the work of the scientist, and their own astute acknowledgement of it, with at least one song per album. This trend is continued on Psychotic Supper.

The album's most megalomaniacal song, "Edison's Medicine," is a misdirected monologue about Nikola Tesla's devotion to science, despite the scarcity of material rewards for those in his profession.

Whether correct or not, the parallel Tesla likes to draw between itself and the man after which it is named are simply ridiculous, self-aggrandizing poses which parallel Spinal Tap more closely than Nikola Tesla.

But despite the laughs that can be drawn from Tesla's work, the band's core supporters remain willing to buy their product. Tesla is already well on its way to the same flavor-of-the-month obscurity into which Great White, Warrant, Winger, and Whitesnake fell.

Tesla's opening act, Firehouse, looks like it too, is headed down that road. After "Baby, Don't Treat Me Bad," the group vanished into the hair spray vortex created by Poison and Bon Jovi.

Hopefully, fans won't confuse Firehouse with the infinitely more talented FIREHUSE, the veteran Los Angeles trio led by virtuoso bassist Mike Watt, which signed a major-label contract last year.

Tesla's JACC concert is its third Indiana date on the current tour, which has recently bounced the band around the northeast quadrant of the United States. In addition to dates in Noblesville and Evansville, led, Tesla played Chicago's World Music Theater; the same venue catering to the U2 extravaganza this week.

Tickets for Tesla and special guest Firehouse are still on sale for $17.50 from the JACC box office.

Free agency beckons

Ozzie Smith may leave Cards

ST. LOUIS (AP) — As the days dwindle down to a precious few in the 1992 season, All-Star shortstop Ozzie Smith is looking forward to free agency and perhaps severing his ties with the St. Louis Cardinals after 11 seasons.

The Cardinals are expected to make Smith a contract offer for 1993 in the near future. But Smith's tired of waiting and would just as soon test the market to see what it will bear for a 37-year-old shortstop who can hit for average, steal bases, cover a lot of ground in the field and generally defy Father Time.

Smith wants a multiyear deal and the Cardinals, as they were last winter, are said to be interested only in taking it a season at a time.

"I never really wanted to test the market," Smith said. "But I think sometimes, as in this case, you're forced to do it.

"Having gone as far as we've gone now, why not? Why not find out what other people think of you?"

Smith already knows what the St. Louis fans think of him. Last month a "Save Ozzie" rally was held near Busch Stadium and hundreds of fans attended. A newspaper poll also indicated overwhelming support for signing Smith.

But with about three weeks to go in the season, Smith is still waiting for the Cardinals to make a move.

"I haven't heard anything," Smith said. "I'm just sitting at home, waiting by the phone."

If the Cardinals have anything in mind, they're not saying. General manager Dal Maxvill has been vocal about the Smith situation in the past, defending the Cardinals' decision to pick up Smith's option at $2 million for this season instead of giving Smith a two- or three-year deal because of Smith's age.

In spring training he said the GM's contract situation in August or September after it got a chance to watch him play for several months. And just last Friday he said this about Smith: "I'll be talking with Ozzie or his representative here in the near future."

Not anymore.

"You won't hear anything more from me about Ozzie until it's resolved," Maxvill said Monday. "No comment."

Actually, it would probably be wise for the Cardinals to wait until after the expansion draft in November to sign Smith. If they sign him now they would have to include him. as a player with 10 years major-league experience and five with the same team, on their 15-player protected list.

If he declares free agency this fall, the Cardinals would be free to protect someone else. Smith's agent, Debbie Ehlmian of St. Louis, said both parties have agreed to wait to announce any deal until after the draft.

"I haven't given that issue a whole lot of thought," Maxvill said, speaking of the team's free agents in general terms.

What to do?

"I don't know if they're going to do anything," Smith said. In the meantime, Smith is taking care of business. He may be 37, but he's finishing the season on a hot streak, going 14 for 29 in his last six games. He leads Cardinals regulars with a .301 average, is second in steals with 18 in only 45 attempts, and has made only seven errors.

The place to be for the "Class of '93" If you don't like crowds please don't come.  must be 21

Nets must match Detroit for Mills

AUBURN HILLS, Mich. (AP) — The Detroit Pistons continued a major roster shakeup with the signing of Terry Mills to an infer sheet on Tuesday.

Mills, a former Michigan star, is a restricted free agent with New Jersey, so the Nets have 15 days to match the Pistons' offer, reported to be $10 million over five years.

Willis Reed, the Nets vice president of basketball operations, has said the club would over five years.

"We've received the offer sheet," Nets senior vice president Jim Lampley said. "We are reviewing it to see what our options are."

But Billy McKinney, the Pistons director of player persona-

sion, has said he hoped the Detroit offer would be too high for the Nets to match.

"We aren't discussing the terms. But he won't have to worry about purchasing the latest Nintendo game," McKinney said. "But even if New Jersey does match this, it's just one of many moves we have on the drawing board. We intend to shake things up around here."

We have contingency plans if this falls through.

The way was cleared for the Pistons to make Mills an offer when Bill Laimbeer agreed to have his $1.9 million contract restructured by extending it one year. Laimbeer's cooperation was needed to free up more money under the NBA's salary cap of $14 million.

After trading Willis Reed, Bedford and John Salley, and cutting guard Charles Thomas, the Pistons were about $6,500,000 under the salary cap.

"This team has a winning tradition, and we're banking on that," McKinney said. "Laimbeer's offer is an example of the winning attitude around here."

Mills, 24, who averaged 9 points and 5.5 rebounds last season, is a low-post scorer, something the Pistons have lacked since the days of Bob Lanier.

"What Terry gives us is a guy who can score in the low post, something we haven't had in the last few years," McKinney said. "He also is a rebounder, a good passer, and a big guy who can also shoot a 17-footer when you need him to."

"Terry would get substantial minutes with the Pistons, and possibly be a starter there."

Detroit had worked to hope for a deal with a disgruntled haskeem Olajuwon of the Houston Rockets. But the Pistons' offer of Dennis Rodman and a first-round draft pick didn't compare with other offers the Rockets have on the table.

The Pistons also covet Stanley Roberts, the Orlando Magic's 7-foot center.

Big Ten schools under financial aid probe

CHICAGO (AP) — The NCAA will conduct its own probe of seven Big Ten schools that gave extra financial aid in non-revenue sports, delaying acceptance of the conference's report on the matter, the league said Tuesday.

"Our position is that we will cooperate fully with the NCAA," said Big Ten Commissioner Jim Delany. "We've shared all our information with the NCAA, and it is currently reviewing the situation."

The NCAA is concerned about some inconsistencies over reasons why the extra aid was paid by Illinois, Indiana, Iowa, Michigan, Minnesota, Purdue and Wisconsin, the Chicago Tribune reported in its Tuesday editions.

Michigan State, Northwestern, Ohio State were not in-

cluded in the probe.

Purdue coach apologizes for comments about Cal

WEST LAFAYETTE, Ind. (AP) — Purdue's interim athletic director apologized Tuesday to the University of California for the Boilermakers' reference to California football players arriving in straw hats and holding pieces of straw in their mouths.

The Purdue coaching staff used the supposed slight as a motivation for the Boilermakers, who beat the Golden Bears 41-14 on Saturday.

"No doubt there was a great deal of exaggeration involved in the whole affair," Purdue's John W. Hicks said in a letter to California athletic director Bob Beckrath.

"Apparently, one or two players may have had on cowboy hats (not straw)," Hicks wrote, "and a few may have been chewing stalks of grass. This news was passed along and grew and grew, until some believed these random events were a planned stunt at Purdue."

"Hearing these stories, our football staff used it as a motivation for the Boilermakers, I apologize for the whole affair," Hicks said.

Bockrath said he investigated the incident and found it was "a fabrication" that was "unfair to our institution and our players."

California coach Keith Gilbertson said he didn't hear anything about the incident until his father, a high school coach, called him after reading a story in a Seattle newspaper.

"I told my dad, the 'of coach,' that the straw hats never happened," Gilbertson said. "I really am offended by that. Touches. You do whatever you do to motivate your football team. If you've got to do that, well that's fine.

Purdue coach Jim Colletto said Tuesday that "a lot of this is my fault."

"Somebody ran in the locker room Friday afternoon and said he saw the California team get off the plane with straw hats on. I mentioned it, and as the story went from person to person it got worse."

MICHIGAN STATE LOTTERY TICKET WINNERS

are you interested in working on a committee for the Dome St. Mary's relations? we need you!

Winner may each purchase 2 tickets for $20 each each on Wednesday, Sept. 16 from 3-4:30 pm in Stepan Center.
COLLEGE STATION, Texas (AP) — "The Wrecking Crew," fifth-ranked Texas A&M's defensive unit, is off to another destructive start in dismantling opposing offenses.

Well, almost.

The Aggies struggled at times in their first two games, but the Tulsa Hurricane felt the full force of the Wrecking Crew last week. It hopes to give Missouri the same treatment on Saturday.

The rich history of the Aggies defense has started to work on the current crop of wreckers, headed by linebacker Marcus Buckley. "You hear about all the players who have been great players in the Wrecking Crew," Buckley said. "Just to be a part of that defense makes you play better."

Feeling the glare of former Wrecking Crew members pushing him on, Buckley played his best game of the season in a 19-9 victory over Tulsa. He had seven tackles — four behind the line — one sack, caused one fumble, recovered another and broke up a pass.

"We started kind of slowly against Stanford and we didn't play well at LSU, but against Tulsa we had to realize that we're the Wrecking Crew and we had to rise to the challenge," Buckley said.

Linebacking mate Steve Solari sees much room for improvement.

"I don't think we're as good as last year but the season has a long way to go," Solari said. "We haven't peaked, that's for sure. We need to just work more on techniques and running to the ball."

The Aggies will take a 3-0 record to Columbia, Mo. They are trying to open the season 4-0 for the first time since 1978.

The last time A&M held a No. 5 national ranking was Sept. 6, 1977 prior to a 41-3 loss to Michigan.

The Aggies led the nation in total defense last season for the third time. A repeat by the Aggies' lofty national rank.

"It helps them because the coaches coach better and the players play better," Slocum said. "They'll be saying, 'We'd better get ready for these guys. They're ranked No. 5 in the nation.'"

Nittany Lions' McDuffie sentenced to rehab stint

STATE COLLEGE, Pa. (AP) — A Penn State football player who admitted he took part in a brawl at an arts festival has been sentenced to rehabilitation for first-time, nonviolent offenders.

O.J. McDuffie, a wide receiver, was one of three Penn State players accused of joining in a fight that began early July 10.

He pleaded guilty Monday to two misdemeanors: disorderly conduct and failure to disperse after ordered by police.

McDuffie, senior wide receiver with fifth-year cornerback Mark Graham, 22, were accused of roles in the fracas during the Central Pennsylvania Festival of the Arts.

Police said McDuffie and Sayles interfered with officers who were trying to break up the fight, which involved 30 to 50 people.

Starting wide receiver Bobby Engram and Sayles were charged with felony burglary by State College police last month. Both waived their preliminary hearings and have been ordered to stand trial. No court date has been set.

Start your weekend off right!

Associate Sports Editor

"Perfection at Notre Dame is
taken for granted. If you fail to live up to perfection, people have a tendency to be
disappointed."

Notre Dame head coach Lou Holtz
thus summarized the reaction to the Irish's 17-17 tie with Michigan during his
weekly press conference ye

r
terday afternoon. He also talked about the
reasoning behind what happened.

"The changeover occurred quite
rapidly and suddenly we had
the ball with 1:05 to go," said Holtz. "The first thing that went through my
mind was that we don't want to
chart the ball, the second thing was how were they
going to play."

"We ran the draw pretty
well so we ran a draw to
Jerome Bettis and he picked up
right yards. We knew we
needed the first down so we
made the draw call to Reggie
Brooks and he got the first
down."

"This is where I made the
mistake and this is the only
place. I was aware of the rule
(the clock was running after
a penalty), but I did not
know the time. I just drew a
blank and I
can't tell you why I forgot
about the rule."

Holtz did not want to
punt the ball because of injuries
to both of the long snappers.
Senior Lance Johnson injured a
hand in last Wednesday's
practice, while sophomore
Mark Zatavaski suffered a
six-stitch wound in one hand
which prevented him from
snapping Saturday. Several
times during the Michigan
game, the snaps, according to
Holtz "rolled back like a
bowling ball" to punter Craig
Henrich.

While many people around
the campus have plenty to say
about the Irish's recent dip in
the polls, Holtz was uncon-
cerned with the issue.

"Was that the final poll? Are
they going to vote again?"

Holtz asked the reporters in
the room.

With respect to the rest of
the Michigan game, Holtz praised the play of
the Notre Dame defense in the
game, but was not pleased with the
time at which the Wolverines were able to
convert on third down.

"Defense was vastly
improved in many areas," said Holtz. "We stopped the run
better than anticipated and we
showed more enthusiasm.

"We knocked Elvis Grbac
down more than he has been
except for the Washington
game. I thought we put good
pressure on him."
