Hesburgh joins AIDS council

By GERALDINE HAMILTON
News Writer

Father Theodore Hesburgh, president emeritus, has become a member of a twelve person advisory council for First AIDS, a fund raising project to benefit the National Association of People with AIDS (NAPWA). First AIDS will consist mainly of a nationwide telephone auction in November. The auction, conducted via a 900 number, will include one-of-a-kind experiences such as a game of one-on-one with an NBA star, a game of monopoly with a prominent real estate developer or a lunch date with an intriguing personality.

Hesburgh became involved in the project when a member of First AIDS approached him.

"They asked if I would help. I agreed to because people have been stomping on people with AIDS," Hesburgh said. "A stand needs to be made and I am willing to assist." The main goal of the First AIDS project is to make money to assist AIDS victims.

This is a good group of people associated with good actions and that will lead to the raising of money," said Hesburgh.

HPC to fund relief trip bus transportation

By BEVIN KOVALIK
News Writer

The Hall Presidents' Council (HPC) agreed to help fund the hurricane Andrew relief project in Miami over October break, according to Jason Cole, HPC co-chair.

Money made from "The Shirt" sales will be used to fund the hurricane project, he said, but the budget committee will meet to decide how much money will aid the hurricane project.

"HPC will fund $3500 as a base level and we may go up from there," Cole said.

Forty-seven students from Notre Dame and Saint Mary's will participate in the Miami relief project, and the fee per student will be $40, according to Cole.

Former New Mexico governor addresses Hispanic issues

By NICOLE MCGRATH
News Writer

Hispanics must overcome any obstacles they may face in order to succeed in their role in life, no matter what role it may be, according to former New Mexico Governor Tony Anaya.

One such obstacle occurred when Anaya and his staff became targeted in 13 FBI investigations and at least one CIA report for openly opposing the policies of former president Ronald Reagan's administration.

"I thought something was wrong with me but it is all part of the bigger picture," said Anaya. The bigger picture includes a flawed Constitution which is often being redefined and institutional racism, he said.

Currently there are about 450-500 Hispanic undergraduates and graduate students but there are no Hispanic faculty members at Notre Dame, according to Anaya.

"It is not a surprise and is the same story I hear all over the country," he said.

Although Anaya served as New Mexico's Attorney General and Governor, from 1983-1986, he stated that being a role model is "not the main aspect of my life."

"I would suggest being a role model be the by-product of your life and perhaps of happiness should you be a good model," said Anaya.

Students should prepare themselves with education and training, according to Anaya. That includes being able to recognize opportunities and acting on them.

When President Reagan made his 1985 state of the union address, the Democratic National Committee asked Anaya to be their spokesperson and respond nationally. Anaya turned them down and then unknown, Michael Dukakis, took the spot and began his presidential bid.

"I declined the offer not realizing that, as a Hispanic, I could have laid out my ideas for what the country needed," he said. Students have a responsibility to challenge themselves to get the best education they can at Notre Dame. Opening doors and beating down barricades are part of being a Hispanic role model, said Anaya.

"I wish I were twenty years younger because of the great upcoming potential," he stated. Although Hispanics have not reached the Fortune 500, they are becoming CEO's at places such as Coca-Cola. The Hispanic community will be the single-largest minority group by the year 2000, said Anaya.

Being able to do "one's best should also lead to Hispanics' see ANAYA / page 4

Commons owner may face possible $500,000 in fines

By JULIE BARRETT
Assistant News Editor

Pasquale Anastasio, owner of The Commons, faces suspension or loss of his liquor license and a maximum fine of $500 for each of the minors cited in Friday's S.U.D.S. raid if the case is brought before the Indiana Alcohol Beverage Commission (ABC), according to Sgt. Gregory Dotchley of the Indiana exculpe police.

Indiana exculpe police charged Anastasio for allowing minors in a tavern and allowing minors to battle, Dotchley said.

The case has been referred to the prosecutor of the ABC, who will decide whether to pursue charges, he said.

S.U.D.S. cited 100 individuals for minor in tavern violations, including seven for producing false identification, according to Sgt. Moon of S.U.D.S. Two were taken into custody.

Among Notre Dame students cited for minor in a tavern were Megan Junius, junior class treasurer, Scholastic Managing Editor Margaret Kenny and Sherry Vitale, Notre Dame tennis player.

Cited for producing false identification and minor in a tavern were Stacey Bowman of Campus View Apartments, Jenny Ford of Siegried Hall, Erik Hanson of Fainner Hall, Barbara Maloney of McCandless Hall, Sean O'Reilly of Grace Hall and Brian Welford of Dillon Hall.

Notre Dame students cited for minor in a tavern include Michael Lexly of Alumni Hall, Laurie Niemann of Badin Hall, Alfred Williams of Carroll Hall; Jason Anderson, Donald Bergan, Michael Ebiner, Edmund Galka, Gregg Gallagher, Kory Klem, James McMahon, Chris Monahan, Mark Namann, Gregory Nordhoff, Brandon Parker, among Notre Dame students.

Clinton isn't all he's wrapped up to be

Smooth talker wannabe's, take a lesson from Bill Clinton. His accomplishments in Arkansas over the last 12 years of governance include the deserved nickname "Slick Willie." I shouldn't even dignify Bill with a name there.

Most people in the U.S. know him only by sound bites and campaign promises on TV. They haven't been on the receiving end of his slick rhetoric...yet. The thought of Bill Clinton as president scares me.

His famous last words to the people of Arkansas were along the lines of "Read My Lips." Before the last campaign in Arkansas, we were promised that he would not run for president if we re-elected him governor. Funny, look where he is now.

Let's take a look at Billy-boy's track record.

Arkansas can boast having the largest city in the country as well as an accredited four-year college. That city is my home town, Fort Smith, pop. 70,000.

While she has the education governor done for education in the state of Arkansas? According to "State Rankings 1992: A Statistical View of the 50 United States," Bill hasn't done much. For 1991, Arkansas ranked 49th in the average salary for classroom teachers, $9,975 less than the national average.

The Teacher Testing program he set up when I was in sixth grade was bogus. The teachers themselves told us so. Incompetency lived.

Arkansas comes in tenth in school-age population as a percentage of total population in 1989, almost two percent above the national average, yet enrollment in elementary and secondary schools hits the bottom half!

Arkansas also ranks 43rd in percent increase in teacher salary from 1990-1991, 48th in per capita state and local government expenditures for education in 1990, and an unimpressive 47th in expenditures per pupil in public elementary and secondary schools in 1991. These are the growing years for higher education. I don't even want to touch on the two-year community college in Fort Smith.

All through my education in Arkansas, he was referred to by the teachers as "our beloved governor." Work-wise, there is decent opportunity, a percentage of total population in 1989, almost two percent above the national average, yet enrollment in elementary and secondary schools hits the bottom half!

But all of this is, for the most part, a lie.

What ever is Bill Clinton such a hot ticket in America? Is this the D 2000 election? Our beloved governor is hot.

So is Ford.

Ford.

Starmann: McDonald’s Corporation seeks 80 percent waste reduction within two years

By THERESA ALEMAN
News Writer

The goal of McDonald’s Corporation is to reduce waste by 80 percent over the next two years, according to Richard Starmann, senior vice president of the corporation.

“Environmental responsibility and good business are not contradictory,” said Starmann Tuesday as part of a two-day lecture series on “Business Leadership in the Environmental Crisis.”

He highlighted some of McDonald’s efforts to reduce waste in its thousands of restaurants, including packaging and waste reduction.

Starmann said McDonald’s change in packaging from polystyrene to quilted paper wrap is “good science, not just good headlines.”

McDonald’s is currently working with the Environmental Defense Fund to research and implement more recycling practices to reduce waste. In addition, since 34 percent of its waste is organic, the corporation is to reduce waste by 80 percent over the next two years, according to Richard Starmann, senior vice president of the corporation.

“The goal of McDonald’s Corporation is to reduce waste by 80 percent within two years,” said Starmann, who was part of a two-day lecture series on “Business Leadership in the Environmental Crisis.”

Starmann said McDonald’s is committed to reducing, reusing and recycling its waste while serving the fast food needs of its customers.

There are no easy solutions, but we are integrating permanent changes to become environmentally sound,” he said.

Attacks by the environmental media are unfair, he added.

“McDonald’s serves breakfast, lunch and dinner to 18 million people per day — that’s America twice a month. But there’s a downside to being leader of the pack,” he said.

“We at McDonald’s want to be sure we’re doing the right thing to protect the environment for the next generation,” said Starmann.

A Notre Dame student from Morrissey Hall was robbed at gunpoint at 1:10 a.m. Sunday morning while stopped in his car at the intersection of Notre Dame and South Bend Avenues, said Chuck Hurley, assistant director of Notre Dame Security.

The robber tapped a shotgun against the passenger-side window of the student’s car and demanded his money, Hurley said. The student gave the man the $2 he had, and the man fled the scene on his moped. The student was not injured.

The suspect is described as being a white male, 5’1” and 175 pounds, with brown hair and of medium build, wearing a dark jacket with gold sleeves, a white baseball cap and blue jeans.

Experimental aircraft crashes

WASHINGTON (AP) — The crash of an experimental V-22 tilt-rotor aircraft that claimed seven lives in July was caused by a combination of a flash fire, engine failure and a failed drive shaft, the Pentagon said Tuesday.

The crash occurred as the V-22 was making the transition from flying like an airplane to landing with its rotors tilted at a 60-degree angle, the Pentagon said in a statement.

The document did not make clear why the problems arose from a design flaw or some defect in a part or parts.

Congressional report casts doubt on Patriot missile claims

WASHINGTON (AP) — The strongest evidence indicates Patriots were inept at Desert Storm engagements. The Army said Tuesday it knocked out incoming Iraqi Scuds in only four cases, according to a General Accounting Office review released Tuesday.

The GAO, the investigative arm of Congress, said "about 9 percent of the Patriot's Operation Desert Storm engagements are supported by the strongest evidence that an engagement resulted in a warhead kill." Before the numbers were classified, the Pentagon had reported a total of 47 cases in which Patriots were fired to intercept Scuds in Saudi Arabia and Israel. The 9 percent figure would then represent four engagements.

The report noted that kill rate is only about one-third of the 25 percent success rate the Army now claims as supported by the strongest evidence, and is far below the Pentagon's earlier claims. The Army initially claimed that the Patriot achieved an 80 percent success rate in Saudi Arabia, and 50 percent in Israel. Those claims were later scaled back to 70 percent and 40 percent. The GAO report said the Army now reports there is at least some evidence to support a 52 percent combined success rate for the two countries.

GAO defined "the strongest evidence" as instances in which Scud debris or radar data indicated a Scud was destroyed or disabled after a Patriot was detonated near it. The Patriot is a surface-to-air missile guided by radar which was upgraded during the Gulf War in an effort to make it effective against short-range ballistic missiles.

Evidence that could offer a more complete evaluation of the Patriot's performance is unavailable because the missiles were operated under wartime conditions that were not conducive to gathering definitive information, the investigators said.

In a statement, the Army said while it disagrees with the GAO over what the information shows.

Two helicopters carrying sightseers over Niagara Falls collided Tuesday, and one crashed near the Niagara River. Witnesses said debris from the helicopters rained down landing gear of one helicopter, which straddle the U.S.-Canadian border.

A witness, Michael Folemsbee of Niagara Falls, said the landing gear of one helicopter sheared off the tail of the helicopter that crashed.

“Nothing very big, just a whole bunch of stuff,” Folemsbee said. One person on board — the pilot — was hurt.

The other helicopter "kept going but was obviously very shaky and wobbling around," Folemsbee said. One person on board was being treated for injuries.

The helicopter that crashed was a Hughes 500 belonging to Rainbow Helicopters Inc. in Niagara Falls, N.Y. It carried four people, said company manager Scott Hughes.

The pilot was identified as Ben Poprawski, 43, of Kendall, N.Y. The other victims — one man and two women — were not immediately identified.

Frits Wiarda, 31, a sightseer from Delft, the Netherlands, said he was standing by a railing overlooking the falls when "I heard a big bang."

"I looked up in the sky and I saw one helicopter flying away and the red one tumbling down," Wiarda said. "My first reaction was, 'Do I want to make a photograph?' And then I realized I was pretty close to it, so I started running away from it. And I looked up and there was debris everywhere."

The skies over the falls are often crowded with sightseeing planes and helicopters, raising concerns about air traffic safety.

"It's like Vietnam," said Kevin Merritt, who lives a half-mile from the crash site. "They're flying too many, too low."

A bill was introduced this month in Canada's House of Commons that would restrict helicopters and light aircraft flying lower than about 2,300 feet over the falls.

"Everything has stopped, and there was debris everywhere," said Kevin Merritt, who lives a half-mile from the crash site. "They're flying too many, too low."

Bush pushes string of Sunday night debates with Clinton

(AP) - President Bush on Tuesday proposed an unprecedented string of televised debates with Bill Clinton as he worked to develop a come-from-behind strategy in his race for re-election. Bush called for an initial debate Oct. 11, but Clinton said he was ready to go this weekend.

Bush said he would be "pleased to see" Ross Perot included in the debates which would stretch through the final weekend of the campaign, if the candidates agree to make a formal entry into the race in the meantime.

Clintons aides told Bush they should show up for previously scheduled debates on Oct. 4 and 15 — confrontations that the president has shunned because he disliked the format. The Democrats proposed letting a bipartisan debate commission decide the merits of the president's suggestion for a running series of weekly encounters.

"Let's start Sunday. I'm ready," said Clinton, noting that Bush's proposals would conflict with televised baseball play-offs and World Series games.

Bush said: "Let's get it on." But he was not ready to get started until Oct. 11.

Bush has been criticized repeatedly by Clinton for rejecting the commission's debate plans, and Clinton supporters have turned up at his rallies in chicken costumes to taunt him for not debating.

The president's proposal, couched as a challenge to Clinton, seemed a straightforward attempt to entice Clinton into a series of debates that would allow plenty of opportunity for mistakes. Such debates likely would overshadow events on the campaign trail.

With an audience measured in the tens of millions, nationally televised debates dwarf the impact of personal campaigning.

The president made his comments as the bipartisan Commission on Presidential Debates scrapped plans for the debate on Oct. 4 because Bush balked at its proposal for a single moderator. It was the third such cancellation, all of them because of the president's insistence that there be multiple questioners.

In any event, Bush said he favors two debates with a single moderator — as the commission and Clinton want — and the other two under the ground rules that were in effect in 1988, with three moderators posing questions to the candidates.

He said he also favors two debates between Vice President Dan Quayle and Clinton's running mate, Sen. Al Gore.

Bush, campaigning in Gore's home state, said, "If Gore-Clinton is serious about debating, he will accept this challenge." He added, "I think it is important that the voters have an opportunity to see and hear from the candidates themselves.

"So I have no doubt that there will be organizations willing to sponsor these debates."

If you thought college was expensive, try putting yourself through retirement.

T

Think about supporting yourself for twenty-five, thirty years or longer in retirement. It might be the greatest financial test you'll ever face. Fortunately, you have one valuable asset in your favor. Time.

Time to take advantage of tax deferral. Time for your money to grow.

But starting early is key. Consider this: if you put in $25 a month at age thirty, you can accumulate $34,358 by the time you reach age sixty-five. Wait ten years and you'd need to set aside $247 a month to reach the same goal.

At TIAA-CREF we can make it possible — with flexible retirement and tax-deferred annuity plans, a diverse portfolio of investment choices, and a record of personal service that spans 75 years.

Over a million people in education and research are already enrolled in America's largest retirement system. Find out how easy it is to join them. Call today and learn how simple it is to put yourself through retirement when you have time and TIAA-CREF on your side.

Ensuring the future for those who shape it.

Principles of Sound Retirement Investing

IF YOU THOUGHT COLLEGE WAS EXPENSIVE, TRY PUTTING YOURSELF THROUGH RETIREMENT.
Vegetarianism can help protect the environment

By ALISHA EISART and VINCENT HERMAN

A stigma placed on most vegetarians is that they are radical animal rights activists who, aside from abstaining from eating any animal products, will not use any products derived from animals, not even animal by-products used in cosmetics. While concern for the rights of animals is a legitimate concern for many vegetarians, there are other reasons to give up hamburgers and hot dogs abroad.

How can eliminating meat from your diet help the environment? First of all, if there are fewer meat eaters, then fewer animals are raised, and less land is needed for grazing. The effects of land consumption and over-grazing can be disastrous. For example, the United States consumes a large amount of beef produced in both Central and South America. Much of the land used to raise the cattle is obtained by burning tropical rain forests, an ecosystem essential for the existence of life on earth. As these forests rapidly disappear at the rate of 20,000 square kilometers a year, the world's most diverse animal and plant species are wiped out one by one.

In addition, the meat produced in both Central and South America is wasted. "For every three to five years before it is abandoned as wasteland there is no need for grazing," states Herbert Hulseberg, associate professor of forestry at the University of Notre Dame, also participated in the concluding panel. According to Hulseberg our treatment of the environment is the new threat following nuclear weapons. "We're in the process of getting rid of nuclear weapons every week, one can imagine the staggering amounts of natural resources consumed by the United States meat industry in a year's time. Fifty percent of all American crops are grown for the sole purpose of feeding cattle and poultry. To produce one serving of chicken and one cup of milk requires the sum total of 3.015 gallons of water. The extent of this consumption could be reduced if there were less demand for meat products.

Of course, the problem is not merely what these diverse animals have to do with animal products. Due to an inefficient digestive system, cow can produce as much waste as six humans. Overall they produce as much waste as six humans. Overall they produce 1.6 billion tons of waste every year. Cows also have a bad habit of belching, which contributes to the greenhouse effect, we overconsume beef to the extent that cattle raising is destroying our atmosphere as well. We have not only to curb our demand for beef but simply reducing your consumption of beef by a half can be expected to get 28.1 miles per gallon on average, a half percentage point higher than 1992 models.

The University of Notre Dame needs to continue playing a role in promoting a more environmentally sound world. The university can play a role in preventing the needless waste of earth's resources, as well as in decreasing our treatment of the environment. According to Hulseberg, the next 50 to 75 years are going to be the most important time we have seen," said Lorenz of the Izaak Walton League. "The children of today, are the future environmentalists, they are the natural resource we need to be caring for."

"The future generations are the greatest stakeholders in what we do today," concluded Noonan.

Udall speaks on environment, business

By KATHY RUTKOWSKI  Environment Writer

It is quite likely that the one issue that can bring the world together as we approach the aftermath of the Cold War is the environmental issue," according to Former Secretary of the Interior Stewart Udall. Udall said that the environmental movement is still unfinished, simply because it has happened so slowly. He states that "we in the environmental movement ought to be doing a better job of spreading the word about what we are fighting for and why we are doing it.""The next 50 to 75 years are going to be the most important time we have seen," said Lorenz of the Izaak Walton League. "The children of today, are the future environmentalists, they are the natural resource we need to be caring for."

"The future generations are the greatest stakeholders in what we do today," concluded Noonan.

New ETF agenda

By DIANNE SIMODYNES  Environment Writer

The Environmental Task Force has completed the review of environmental measures, has shortly revised its agenda, and now is memlors of the task force.

The task force, chaired by Thomas Mason, vice president of business affairs, did not meet over the summer, but will reconvene this semester to address new issues, including revisions in the smoking policy and the report on the natural areas around the campus.

The natural areas report determined six specific, undisputed habitats which should be considered as potential sites for University expansion. The areas are important not only because of their historical value but are also used by members of the NDOT, Mary's biology faculty for research and teaching. The project completed over the past year is the removal of asbestos from the computer/mah building, according to Mason.

Continuing programs this year include the recycling program, air and water quality testing, and the addition of natural gas as an alternate fuel in several university vehicles, according to Mason.

"The Environmental Task Force is the first project where the working relationship with students has been one hundred percent," said Mason.
Dear Editor:

In the past few days, in wake of the controversy surrounding the Irish Guard, I could not help but notice in your publication that the Guardsmen have no less than three times referred to the allegations and subsequent actions against them as blasphemy. Webster’s Dictionary defines blasphemy as: “the act of insulting or showing contempt or lack of reverence for God” or as “irreverence toward something sacred or inviolable.” One can only conclude that they would refer to these actions as blasphemy for one of two reasons.

Either they have extremely poor diction, which I find disturbing in students of such a university as Notre Dame, or they, in fact, regard themselves as Godlike, sacred, or inviolable.

If the reason for the reference to blasphemy by the Guardsmen is the latter, it reflects Webster’s other definition of blasphemy: “the act of claiming the attributes of deity.”

If this is the case, it is easy to see how the Guardsmen could have caused their own downfall.

Check the dictionary, Irish Guard... .

Dear Editor:

In regard to your Sept. 23 cover story about the suspension of the Irish Guard, I must thank you for revealing to me that God has been on campus since 1951, and not only that, but also that He has attended every football game for these last forty years.

I refer to the comments of Guard senior Chris Boone, who attributes the suspension of the Guard to, “rumors blasphemy, and other reports,” and who characterizes the accusation of forced drinking involving Guard members as “one of the many blasphemous rumors.”

Now, I do not know about your dictionary, but mine defines blasphemy as: “a contemptuous or profane utterance, or writing concerning God.” Boone’s comments thus seem to imply that the Irish Guard is, indeed, God, the Supreme Being, the Creator of heaven and earth and Ruler of the universe.

This in turn raises some serious questions. The Irish Guard is, after all, closely related to the band. Does this mean that the band shares in the Guard’s Divine status? Is it therefore heresy to state that the band sounded out of tune at one game or another?

I need to know the answer to these questions as soon as possible, as it appears that the state of my immortal soul hangs in the balance.

... ‘blasphemy’ might not apply here,

Dear Editor:

Upon reading Jon-Paul Hurt’s letter to the Observer on Sept. 17, I felt that it deserved response.

Jon-Paul Hurt, I respect your right to express your views toward alcohol and abuse, but when you start telling people how they should live their lives, I lose all that respect.

You state that “getting drunk (is) a stupid way to waste an evening.” For you, perhaps this is true, but for me and many others on campus it is not. I will be honest and admit that I drink and enjoy getting drunk. I don’t consider this wasting my life, and it is certainly not the “one and only means of having a good time.” I drink because I like to and I want to.

People drink because they like to drink, and if people want to get drunk at parties then I can only assume it is because they want to.

Simply choosing not to drink does not give you any right to go crusading against those who do. Your viewpoint toward alcohol is no more “right” than mine, and I take great offense when somebody tells me how I should live my life.

I am perfectly aware of the negative effects of alcohol, but that does not cause me to change my attitude about drinking. If you don’t approve of what goes on at parties, then stop going; but don’t expect people to change their lives just because you think they should.

Mr. Hurt, please live your life your own way, and stop telling others how to live theirs.

Just because someone acts differently does not mean that they act wrongly.

**BY JULIE WILKENS**

Assistant Accent Editor

---

Yes, it’s your wildest dream come true! It involves more violations similar to an urban plunge. Students should have the opportunity to risk poverty areas where most international students wouldn’t go. They would learn of the situation of the poor by visiting shanty towns, which are found outside of the city.

"I want to make it clear," he continued. "There is a difference between experimental learning and service. It would be presumptuous for students to go down and teach Chileans unless they’ve been there for at least a few semesters. If students want to do some service work, but are there, we have the contacts, but like at Notre Dame, it is strictly voluntary.”

The program itself is open to a wide range of majors. Because students will be integrated completely into the university, they must possess at least four semesters of college Spanish.

Fr. Scully emphasized some of the benefits of Pontifical Catholic University. "Even when you first arrive in Chile, you have the opportunity to undergo an orientation program by the Latin American Faculty of Social Science. This is a world famous Social Science and Humanities research organization. Its headquarters are located in Mexico, Ecuador, Argentina, and Santiago, Chile. They are a very big deal in Latin America!"

Students will also have access to very interesting political figures because of Notre Dame’s and the Holy Cross Order’s friends in the government. “All of Patricio Aylwin A’s children and grandchildren were educated at Holy Cross universities. And the next possible president, Eduardo Frey, is a Notre Dame graduate,” laughed Scully. “You become a part of their family, for better or for worse!”

A unique aspect of the Chile program is that students may choose to go for one or two semesters.

Dr. Michael Mellman, Johnson’s doctor and a Lakers team physician, said the 6-foot-9 superstar’s decision to play again would present “a new challenge” in treating an HIV-positive patient.

“There’s some good and some not so good,” Mellman said. “He’s a unique case. We’ve never done this before.”

**Cavanaugh hands Morrissey its first loss**

**BY KEVIN JANICKI**

Sports Writer

After beginning the season with two victories in mediocre performances, the Morrissey interhall soccer squad hoped to finally notch a win with a solid performance on Sunday afternoon against Cavanaugh.

But a strong Cavanaugh team, with a great deal of momentum proved too much for the Manor, winning 1-0 on a second half goal by captain Brian Magee. Morrissey struggled all afternoon trying to mark open men on their own third of the field, while a stagnant offense was unable to string passes together. The Manor did play well enough to fend off Cavanaugh attacks on goal for most of the game and even launched a few shots of their own, but with under fifteen minutes to play, Cavanaugh finally notched the goal to decide the game.

Mike Clancy took advantage of an errant Morrissey pass to send a ball from the left to forward Brian Magee on the right who punched the ball high into the net.

Cavanaugh improved its record to 3-0 and finishes its season this afternoon against Stanford A. Morrissey will take its 2-1 record into their final game on Sunday against Sorin.

Keenan 3, St. Ed’s 1

Mike Pugh, Thad Gassay, and freshman Lou Vricella scored goals as Keenan defeated St. Ed’s 3-1.

Dillon 2, Sorin 0

Despite a 20-5 advantage in shots taken, Sorin was shut out by Dillon 2-0. Brian Piper and Steve Hallissy did the scoring for Dillon which improved to a 2-0 record.

**Carroll 3, Grace B 1**

Carroll continued its winning streak by defeating Grace B 1-0. Rudy Christopher scored two goals for Carroll and Tom Leahy scored one.

**Flanner B 5, Stanford B 2**

Flanner B controlled Stanford B, winning 5-2. Shaun Tulley, Anthony Muehlberger, and Justin Malley each scored one goal and Greg Koenig added two for Flanner while Matt McCarey and Frank Cristuzzol scored for Stanford B. Flanner B finished the season 3-1. Stanford B ended up 0-4.

Lemieux close to record-setting deal

PITTSBURGH (AP) — Mario Lemieux, who has led the Pittsburgh Penguins to consecutive Stanley Cup titles, said Tuesday he is close to agreeing on a record-setting $42 million, seven-year deal.

But Lemieux’s agent, Tom Reich, said the deal was “still up in the air.”

“A lot of progress has been made,” Reich said, “but it’s a very complicated deal and it’s not finished. No one will have anything to say until a deal is finished.”

Lemieux made his comments over radio station CJMS in Montreal. Reich was disbelieving when informed of Lemieux’s remarks.

“Mario didn’t say that,” Reich stated. “No one’s going to say anything about this until it’s completed.”

And when will that be? Reich said he didn’t know.

There were expectations that the Penguins would announce the new contract on opening night next Tuesday when they host the Philadelphia Flyers.

The deal, which Reich has been negotiating throughout the summer with Penguins owner Howard Baldwin, would replace the final two seasons on Lemieux’s current contract, a five-year deal worth about $12 million. It includes payments for past services rendered to the Penguins’ franchise.

“My agent, Tom Reich, has negotiated an unprecedented agreement with the Penguins, one that should be signed soon,” Lemieux said. “We’re talking in the area of $42 million over seven years.”

Penguins spokesman Harry Sanders said the team hadn’t reached an agreement with Lemieux and had nothing to report.

Lemieux has 408 goals and 606 assists for 1,014 points in 517 regular-season games. He has 44 goals and 53 assists for 97 points in 69 playoff games.

Lemieux is fourth on the NHL salary list this season with an annual salary of $2,408,000, trailing Philadelphia Flyers rookie center Eric Lindros ($2.5 million), Los Angeles Kings center Wayne Gretzky ($3 million) and New York Rangers center Mark Messier ($2.7,850,000). The figures include deferred payments and signing bonuses, but exclude incentive bonuses.

Baldwin said during the summer he wanted to sign Lemieux to a long-term deal.

“His objective is to see he stays in Pittsburgh forever,” Baldwin said. “Let’s wait until It’s done.”

The Saint Mary’s volleyball team defeated Division II power Indianapolis Tuesday 15-11, 17-15, 8-15, 15-5.

The Irish volleyball can’t hold on against ISU

Irish setter Karen Hopkins whose 48 assists helped the Redbirds out-hit Notre Dame .281 to .091 for the match.

"Karen’s setting was excellent," said Morgan, whose team raised its record to 11-2, as Notre Dame fell to 12-2.

At times, we got down three or four points and the crowd got excited, which got us excited," said junior outside hitter Jan Madlock.

"Hitting 28 percent against a team like Notre Dame feels very good, especially since we broke down in passing in the second and third games."}

"Actually, Notre Dame had an opportunity to beat the Redbirds 3-0. The Irish led the first game 12-5 when sophomore Michelle Nyblin came off the bench to serve six unanswered points to get the Redbirds back in.

The Irish led 15-14 when Carla McQueen took over the service and finished out the game for Illinois State, ending with an ace for the winning point.

In games two and three, the Irish took leads of 7-0 and 5-1 before ISU got started. But the Redbird players believed the crowd of 1,102 helped them get back into the games.

“Even when we had big leads, we knew ISU would be there,” said Brown. “The parity around the nation is getting better and better. Any team that goes in and doesn’t play well is going to lose.”

Janelle Karn set a new Notre Dame career assist record. Her 32 assists, gives her 3054 for her career, 21 more than previous record-holder Taryn Collins.
Match Point

Magic Johnson is finally back where he belongs

He's back where he belongs. When the Los Angeles Lakers traveled to Honolulu next week to begin training camp, Magic Johnson will be along for the ride.

It's good news for the Lakers and for the fans, but most of all, for Magic.

"That court is where I belong, no matter what happens," he said Tuesday. "I'm playing again. Finally." That's the sentiment of his legion of fans worldwide.

No one has ever looked more comfortable on basketball court, more unbreakable off of it, but more important concerns had to be addressed before he returned to the rigors of an NBA season.

That kind of physical activity is unprecedented for someone who is HIV-positive and his doctors simply don't know what to expect. But since his retirement last November, Magic has been getting in shape by adding fifteen pounds of muscle and tons of hope for a successful return.

"There was no point good and some not so good," Lakers team doctor Michael Mullerman said. "He's going to listen to his body and we're going to listen to him."

Some people say that a strenuous basketball season could actually take his life, but he is never more alive than when he is on the basketball court. Take basketball away and he suffers.

His fans suffer too. They miss seeing him grab a rebound, turn and fire a bullet of a court-length bounce pass to a streaking James Worthy.

They miss seeing him take a pass in the three-point line in a big game Tuesday. Less than a year after retiring because he had contracted the AIDS virus, Johnson announced that he will play again this season for the Los Angeles Lakers and said it was only natural.

"That court is where I belong, no matter what happens," Johnson said, speaking in the same room where his bade his sad, shocking goodbye last Nov. 7.

Holtz was encouraged with the play of the Irish defense against Purdue. The Notre Dame coach said he was especially happy with the way the Irish stopped the Boilermakers on third down, but even the defense has room for improvement in consistency.

"Defensively, I was pleased with the way we played. Our tackling was much crisper," Holtz said. "Consistency-wise, we have a long way to go."

There is one area in the Irish which has been consistent in the last two games: a lack of fumbles. Notre Dame did not give up the ball on the ground against Michigan State or Purdue.

After opening the season with four consecutive games against Big Ten teams, Holtz said he was happy to come away from the Notre Dame quarterback Rick Mirer and the rest of the Irish offense is searching for consistency.

Purdue game with a win despite the rain. He's also thankful that Stanford is not a member of the Big Ten.

"I'm glad to be done with the Big Ten. It's a very difficult conference and a very physical conference. When you play four conference teams in a row, it is difficult if you don't belong to that conference," said Holtz.

"I'm feeling good and it's time to get prepared for the season," Johnson said. "I'm playing again," he beamed. "Yeeaaah. Finally."

Johnson probably won't play full time — 50-60 games is the starting point for this season — and he'll be checked and double-checked by doctors who admit they don't know just what the grind of professional basketball will do to a man with Johnson's medical condition.

But from the parquet floor of Boston Garden to the Roman pillars of the Fabulous Forum, he'll be back, wearing No. 32, flashing that big smile and playing the game as only Magic can.

"It's time to go back to work, it's time to have some fun," Johnson said. "I think the positives outweigh all the risks. That's not saying there are no risks, because life itself is a risk. But being out there, I won't be worried about that. If I was concerned about that, I'd still be retired."

The mood this time was decidedly different from that retirement announcement 327 days ago. This time, Johnson frequently laughed and joked with his wife and reporters, flashing his famous trademark smile.

"This is a lot more relaxed... better," said Johnson, showing the bulk of an added 15 pounds he gained through rigorous weight-training. "It was much tougher then, because I was having to say goodbye."

Johnson's wife, Cookie, said she was behind his decision to return "totally... 100 percent."

Since Johnson announced his retirement, there had been a steady stream of speculation and controversy about his future, mixed with his triumphant appearances in the NBA All-Star Game in February and the Olympics this summer. It was that success and the lack of additional medical problems that convinced Johnson to return.

"The true test for me was playing against the players in practice on the Olympic team and watching as I was just getting better and better, playing hard against them every day, going at it like it was a regular game," Johnson said.

"Also, getting back here, putting on 15 pounds, playing every day, as we did this morning with the guys at UCLA.

"I'm feeling good and it's time to get back to what I was doing." Johnson, 33, said there was never a time after the Olympics that he thought he wouldn't return, but waited to make the announcement because, "Now is the perfect time. It's only a week until training camp."

The Lakers report to Honolulu on Oct. 8 to begin preparations for the season. Their first game is Nov. 6 against the Los Angeles Clippers.

"I'm playing again," he beamed. "Yeeaaah. Finally."

Johnson probably won't play full time — 50-60 games is the starting point for this season — and he'll be checked and double-checked by doctors who admit they don't know just what the grind of professional basketball will do to a man with Johnson's medical condition.

But from the parquet floor of Boston Garden to the Roman pillars of the Fabulous Forum, he'll be back, wearing No. 32, flashing that big smile and playing the game as only Magic can.
