A new child care facility is needed at Notre Dame to meet the demands of students, faculty and staff, said graduate student Joseph Ness to the Observer last night.

Although many use the University-supported Early Childhood Development Center (ECDC) located at Saint Mary's College, space is limited and expensive.

Groups like the subcommittee on child care at Notre Dame and quality of life committee are addressing the need for an additional day care facility on Notre Dame campus. According to Sister Kathleen Cannon, chair of the subcommittee, Ness said that another day care option on campus is necessary because it is "good Catholic social policy to support families." Cannon said that it is in the University's Catholic heritage to build family strength.

Construction of a new center at Notre Dame would cost $1.5 million, much of which would come from fundraisers.

President George Bush and Democratic candidate Gov. Bill Clinton, defeated President George Bush, in a mock presidential debate held last night.

The attacks grew more intense about the Bush administration.

The price of day care at the present ECDC is approximately $75 per week per child, but the committee is discussing a "sliding fee" program that would determine tuition based on family income.

The University offers a 35 percent "scholarship" for graduate students of Notre Dame whose children are enrolled at the center. While there is scholarship money available for the staff of Saint Mary's children at the Center, there are insufficient funds to offer a tuition reduction to the staff of Notre Dame.

A graduate student family found an ideal mother's helper by advertising in the South Bend Tribune. South Bend's reputation in child care is full of tragedy due to careless neglect.

To ease economic hardship associated with defense conversion, Clinton proposes to reinvest the money saved into job-producing public programs, to train military personnel for civilian professions and to offer tax incentives to businesses to hire people from the military and defense-related industries.

Bush's plan would provide $7.1 billion in assistance to help defense workers and communities affected by the cuts, create new career opportunities in teaching for former defense workers and expand the GI Bill educational opportunities and options for early retirement from the Defense Department. Economically, Clinton's plan seems more effective because it focuses on creating new jobs in specific and needed areas such as infrastructure, according to Charles Wilbur, ND professor of economics.

"By rebuilding the infrastructure in the U.S., jobs will be created and people displaced from the military cuts may be absorbed that way," he said. "Bush expects the growth of the economy, expanding already existing businesses, to produce jobs for these people. That's difficult to expect when we're in a recession."

However, Clinton's enormous defense cuts could pose serious problems for national defense, according to Darcy Campbell of the Bend Tribune.
A least the knights knew what to do

Chivalry is dead, at least in America, and perhaps it is a good thing.

That once so reverberated gallopping of the knight's lance, yesteryear, fallen victim to changing social norms of our day, submitting to the will of the female in the form of the man opening a door for her, and the fact the armour is definitely no longer in fashion, has already disappeared.

What woman has not dreamt of being the Disney princess swept off her feet into the arms of her chain-mailed man? What man does not yearn to test his masculinity by just once trying on a suit of armour?

Alas, despite our wildest dreams, suit armour is out of mass production and one cannot park a horse in D-2 without a permit.

The still-evolving place of women in society is obviously freeing, and changing, them.

Although blame cannot be placed on a particular sex for failed marriages, since women have restarted the engines of upward mobility, they, their independence, the notion of "family" has changed in life, reflected in TV, from June and Ward Cleaver to Murphy Brown.

As a result of this, and other culturally regressed notions, it can be expected that more and more people will forgo formal marriage for common-law marriage. With over fifty percent of marriages failing, serious monogamy will some day be the norm.

This may, some, the "old fashioned," that hope for something different. Dan Quayle may just be an amiable incompetent, but his Murphy Brown comment was just his affirmation of what he knows as "traditional," and no offense to single mothers, but is it acceptable for women to ask men on dates; men are not "socially obliged" to pay for said dates, and women are freed of the oppression of having to go where she is taken.

Men neither need open doors for women, a task they can obviously complete themselves, nor are women required to play the role of sweet and docile. And, thank God, men do not have to do "that the jacket over the puddle" routine.

How should men treat women in the this age, according to feminism?

Should a woman feel patronized if a man opens a door for her? Is he being nice or saying "I'm a man and I think, although not necessarily as a man as a man to open this door for you?" Should a woman go out of her way to open a door for herself, to say "I don't need a masculine figure to open this door."

Opening a door shouldn't be so confusing, but this is the grey area men are facing today; however, women have to do the great warfare/family balancing act, which can be far from easy.

We breathe the one who speaks of chivalry in the face of the era of political correctness. Sad too, is the person who drops the ball while suggesting as much.

Although chivalry is dead, let us hope we can weather the storms of confusion that sex relations in this decade without losing our sanity.

The views expressed in the Inside Column are those of the author and not necessarily those of the Observer.

Minority engineering sets up new mentoring program

By BEVIN KOVALIK
News Writer

The Minority Engineering Program has implemented a mentoring program which will match minority engineering students with a faculty member who will guide each student in his or her field of interest, according to Joy Vann, program director.

Engineers have not been a field in which minority students participate, on any level, Vann said. “The mentoring program will be set up to help minority students take advantage and to maximize the opportunities already available to them.”

“The purpose of the program is to increase the retention of minority students and their overall experience in the engineering program, and to encourage minority students to take a look at graduate schools,” she said.

Vann added that the program will also aid minority students in getting their degree in either engineering, architecture, or geological science.

The faculty mentors will also help students feel like more of a part of the college and help them through the hurdles which they need to meet, she said.

The Minority Engineering Program will have an initial meeting today at 4 p.m. in room 118 Delbarton to introduce the participants to the purpose of the mentoring program and the semester agenda, according to Vann.

Speaking at the meeting will be Sheila Scott, promoting program consultant from Eastern Michigan University, who will give a presentation to the mentors and student proteges on an effective and beneficial mentoring relationship Vann said.

“Presently we have thirty-three minority participants who will each be linked with faculty members in their respective fields,” she said. Two professionals from the community who work for Bendix Automotive will also participate as mentors, she added.

Upperclassmen are looking forward to the program because they will be working with professors they know, Vann said, but the freshman have been a bit hesitant because the program is something new.

A similar campus-wide minority program was attempted two years ago but proved unsuccessful not because of a lack of participation, but because the program was not followed up by the Minority Student Affairs Office, according to Vann.

Happy 2nd Birthday to the “Real Boss” at Papa John’s!

Help us celebrate Grant’s Birthday today.

Call between 6:30 and 8:30 and wish Grant a happy birthday and receive FREE extra cheese. Stop by Papa John’s between 6:30 and 8:30 and have a FREE piece of pizza and birthday cake with us.

SMC hosts annual career fair today

By KIM ST. CLAIR
News Writer

Saint Mary’s College is hosting their annual career fair today, Showcase of Careers ’92, in Le Mans Hall lobby from 3 to 5 p.m.

The Showcase offers students a chance to discover full-time, part-time and summer jobs, internships, and volunteer opportunities from 65 organizations in corporate, government, education, non-profit, volunteer, and graduate school settings.

A few organizations that will be present are: Leo Burnett Advertising, the FBI, Eastman Kodak, AT&T, and Northwestern University’s Medill School of Journalism.

“Our students are very well prepared to conduct job searches,” said Roberts.

Bill Cash, director of Institutional Research at Saint Mary’s, said 78 percent to 83 percent of graduates are employed within one year of graduation, while 16 percent to 20 percent attend graduate school. Of those employed, 92 percent to 96 percent are employed by December, according to a survey conducted of 1988-1991 graduates 9-12 months after graduation.

The Showcase of Careers ’92 is sponsored by Student Government Association; Senior, Junior and Sophomore Class Councils; and the Counseling and Career Development Center. Everyone is invited to participate, and resumes will be accepted.
Human error causes nuclear plant shutdown

TOKYO (AP) — A mistaken flip of a switch by a nuclear power plant worker caused a reactor's cooling pumps to fail, a government official said Wednesday, but an emergency system took over and prevented a nuclear meltdown.

The automatic activation of the emergency cooling system prevented radiation from being released by the plant in Fukushima prefecture, 70 miles northeast of Tokyo.

Local officials sharply criticized the Tokyo Electric Power Co., the plant's owner, for not notifying residents for hours about the emergency shutdown of the 18-year-old reactor.

"The case is very serious because it triggered the emergency core cooling system," said Jinzaburo Taka, a physicist who heads the Japanese Citizens' Nuclear Information Center, an anti-nuclear group.

It was the first shutdown using the emergency system since Japan's worst nuclear accident, at Minamis in western Japan in February 1991, when a small amount of radioactivity was released into the atmosphere.

Tuesday's accident, at the number 2 reactor of Fukushima Nuclear Plant No. 1, involved a military force is no longer needed with the threat of the Soviet Union and communism gone, but stressed the need to maintain a strong military and continue to develop defense technologies in case emergencies arise.

"We don't need as large a military as before," he said.
Beauchamp praises University for commitment to community service

By PAUL PEARSON
Associate News Editor

Notre Dame would not be where it is today without its involvement with local community service projects, Executive Vice President Father E. William Beauchamp said Wednesday. During a President's Luncheon for local business leaders, Beauchamp praised the University's "ongoing commitment to serve the community and prepare our students to wholeheartedly and enthusiastically do so in the decades ahead."

Beauchamp called Notre Dame's partnership with the local community "something that is integral to this University" and something which can be traced back throughout Notre Dame's 150-year history. As one example of this partnership, Beauchamp cited South Bend's Center for the Homeless, which ND established in 1952 in cooperation with the city. "The result of this joint effort," Beauchamp said, "is the creation of a center which is recognized around this country as a model program."

Beauchamp also mentioned the Center for Social Concerns (CSC) and its programs such as Urban Plunge, Best Buddies and the Neighborhood Study Help Program. Programs such as these "are life experiences that will always remain with the young men and women who have been fortunate enough to go out into the community and be a part of them," he said.

Through the CSC, "the flame of a commitment to serve others for a lifetime is kindled in our students," Beauchamp said.

The University involves itself in such service programs because the Notre Dame community is part of a larger community in Michigan," Beauchamp said. "They are an acknowledgement that what happens in Michigan happens to us, that all of us share in the joys and sorrows, the palms and tragedies—the people—who form the fiber of this community."

Student Government committee to present education report to Board of Trustees

By EMILY HAGE
News Writer

The Student Government Standing Committee for Undergraduate Education will present their report, "Upbuilding the Mission: Teaching and Research at a National Catholic University," to the Board of Trustees today.

The aim of this report is to address students' concerns for the quality of undergraduate education and to review the faculty, administration, and Student Government to find ways to improve them. The report follows last February's report, "Back to Basics."

Robert Bleil, director of the speakers bureau of the committee, said that the committee is optimistic. "We've become much more pointed in our resolutions," said Bleil. "I believe that the ideas that we've presented in the report are workable ideas."

The committee's report says that Notre Dame is a Catholic institution for undergraduate education first. "Undergraduate excellence must be protected and graduate studies and research must be promoted, but neither at the cost of the other," the report says.

The report says that to achieve its goals, the undergraduate program needs enough regular faculty to teach, especially in University requirements. Research began when the Legal Department of the 1990-91 Student Government alerted the University to its large class sizes and decreasing class availability. After examining student, faculty, and University reports, the committee found:

• "the need for structured teaching incentives."
• "the need for the improvement of academic life both in and out of the classroom."
• "the need for a serious examination of the undergraduate academic program."

The report says that undergraduate students are also responsible for the quality of their education at Notre Dame. They should take advantage of faculty members' office hours, advisors, and the Hall Fellows Program.

The report also says that the University, also, should encourage such programs as the Hall Fellows Program.

The committee made several recommendations:

• "A Center for Excellence in Teaching should be established at Notre Dame" where faculty members and graduate students could learn to improve their teaching skills. It would have a full-time director who holds a Ph.D. and has classroom teaching experience.
• "A university-wide program for aiding graduate students with teaching methods should be established for short term needs."
• "Departments should encourage teaching and mentor relationships with their first full-time academic appointments."

The ND chemistry department has received a $25,000 grant to support Keller's research, which focuses on controlling chemical reactions by breaking bonds of molecules. This work is unique because three lasers, instead of one, are used to break specific bonds of the chemical bond. Keller has been granted $25,000 by the National Science Foundation to study how the reactions occur. He is also working with a group of scientists from the University of California who are studying the reactions occurring in a number of different molecules. The Camille and Henry Dreyfus Foundation is dedicated to the "advancement of the sciences of chemistry and chemical engineering and related sciences as a means of improving human relations and circumstances around the world."

The Camille and Henry Dreyfus Foundation was established in 1946 by Irene Camille Dreyfus as a memorial to her brother, Henry Dreyfus. It is a private, non-profit corporation that awards grants to scientists working on problems of national importance.

The University should encourage College Fellow Programs in each college. • The University should not resort to the use of gates. The committee defines gates as institutional barriers that limit the number of students allowed to each discipline of the University. Today, departments have no sure means of knowing how many students they will be teaching the following year. A university-wide program for aiding graduate students with teaching methods should be established for short term needs.

Exceeding Expectations

It's a big decision, choosing where to begin your career. There are many reasons to join Deloitte & Touche — our clients, our dedication to quality, our professional development opportunities, our people. People who enjoy what they do. Our mission is simple: to consistently exceed the expectations of our clients and our people.

With 10,500 people in more than 100 offices in the United States, and through our global organization, Deloitte Touche Tohmatsu International, we offer clients worldwide an outstanding and diverse portfolio of services. For you, this means unlimited opportunities to grow, professionally and personally. So why not join a firm that will exceed your expectations?

Congratulations to the following graduates from the Class of '92 who have recently joined Deloitte & Touche:

- Nancy Arena
- Stacey Durante
- Tim Gray
- Terrance O'Connell

- Barbara Bryn
- John Evans III
- Nancy Kasmel
- Jennifer Shimp

- Noemi Bueser
- Gary Faucher
- Mark May
- Jim Panacek

- Greg Cooper
- Scott Frigon
- Todd Miller
- Greg Ritacco
- Peter Slawkowski
- Michael Smith

In addition, Adrienne Speyer and Kimberlee Steel are first from the Class of '93 to accept an offer of employment after graduation. Welcome Adrienne and Kim!

The above professionals are joining our offices in Chicago, Cincinnati, Indianapolis, Kansas City, Los Angeles, Minneapolis, New York, Parsippany, Pittsburgh, Seattle, and Washington, D.C.

We Listen. We Deliver.

Deloitte Touche Tohmatsu International

Deloitte & Touche is an equal opportunity firm. We recruit, employ, train, compensate, and promote without regard to race, creed, color, national origin, age, sex, veteran status, or irrelevant handicaps.
Congress to release JFK classified files

WASHINGTON (AP) — Congress sent President Bush legislation Wednesday to release to the public virtually all of the government's classified files on the assassination of President Kennedy.

The secret material — held by Congress, federal agencies, libraries and archives — contains everything from top-secret photographs and top-secret intelligence reports to newspaper clippings and tax returns.

On a voice vote, the House yielded to the Senate version of the legislation and gave up its demand for a court-appointed commission to review documents that officials insist on keeping secret.

Both the Senate and the Bush administration demanded that the five commission members be picked by the president with the approval of the Senate, rather than through the U.S. Court of Appeals for the District of Columbia.

Family leave veto sustained

WASHINGTON (AP) — The House on Wednesday easily sustained President Bush's veto of a bill requiring many businesses to give their workers time off in family emergencies.

Democrats pledged to redouble efforts to make "family leave" a major issue in the campaign for the White House.

But, he added, winning a turf fight over the issue was not worth risking the loss of a chance to get the bills opened.

The legislation created a renewed public interest in the assassination created by Oliver Stone's 1991 film "JFK," which portrayed an elaborate conspiracy surrounding the shooting. Stone was one of the chief lobbying forces behind the bill.

A presidentially appointed commission chaired by the late Supreme Court Chief Justice Earl Warren concluded in 1964 that the killing was the act of lone gunman Lee Harvey Oswald.

ARLINGTON, Va. (AP) —

NEW YORK (AP) — Live from New York, it's the 1992 presidential campaign, brought to you by Harry, Joan and Katie. This was American politics during one extraordinary half-hour Wednesday: President Bush, Bill Clinton and Ross Perot appearing in simultaneous, interview sessions on the three network television morning shows.

Not everyone likes it, but this is the new political soapbox. The morning shows, along with their traditional political forums such as "Larry King Live" and Rush Limbaugh's radio call-in show, have been the settings for some of the most important moments of the 1992 campaign.

At no time has that been truer than this week, when Bush is appearing three days on ABC's "Good Morning America" and Clinton is matching him with three network appearances on NBC's "Today." In addition, Clinton is hitting "Good Morning America" and "CBS This Morning" and Perot is appearing on "CBS This Morning," "Larry King Live." And late Wednesday, CNN announced that Bush would appear in a special Sunday edition of King's show to be taped at the White House.

So, flipping from station to station at 7:45 a.m. Wednesday, there was Joan Lunden interviewing Bush on "Good Morning America," Katie Couric in a taped interview with Clinton on "Today" and Harry Smith with Perot on CBS.

Some critics complain that the candidates are shunning exposure on political journalism in favor of generalists who juggle politics with many other, lighter topics.

There also has been a report — denied by his campaign — that Bush has a list of least favored broadcast journalists he avoids.

In a speech to broadcast executives in San Antonio last week, Leslie Stahl, a correspondent for CBS's "60 Minutes," said she was told Bush had blacklisted Dan Rather of CBS, Peter Jennings and George Will of ABC and Tim Russert and Bryant Gumbel of NBC.

Stahl said Tuesday that had she heard about the list from Don Hewitt, the executive producer of "60 Minutes." Hewitt confirmed that he had told her, but wouldn't divulge his own source.

But whether or not there is such a list may be moot. It is clear that Bush in particular, and all the candidates to some extent, have been careful about appearing where, and by whom, they will be interviewed.

Jack Bickley, executive producer of "Good Morning America," said it took about a dozen telephone discussions with Bush campaign officials over several months before the president would agree to appear on the show. The "Today" show has tried in vain for about a year to get Bush to appear, according to its executive producer, Jeff Zucker.

None of this has necessarily meant that voters are seeing less of the candidates. What is new is where they are turning than this week, when Bush is appearing three days on ABC's "Good Morning America." and Clinton is matching him with three network appearances on NBC's "Today." In addition, Clinton is hitting "Good Morning America" and "CBS This Morning" and Perot is appearing on "CBS This Morning," "Larry King Live." And late Wednesday, CNN announced that Bush would appear in a special Sunday edition of King's show to be taped at the White House.

The Future of Business

Last week, I sat next to the newsmaker in LaPorte's Student Center and looked at which section people turned to first. I noticed a few picked up a newspaper. Not surprisingly, most of them went to the first page or the sports section first. Not one person that I saw turned to the business page. It is unfortunate that most Americans don't realize how important business is, whether it be the president's local policy or the status of the local steel mill. When the presidential candidates emphasize investment or discuss the North American Free Trade Agreement, sadly enough only a small minority of the people understand that business is the heartbeat of every society's infrastructure. In terms of supporting our personal and community. If you have any suggestions on how to improve the business page, please don't hesitate to call or write us.

As of next week the business page will be running on Tuesdays and Fridays. Fridays we will feature a guest column by students studying business or professors in the business school, or education related articles of interest by interested students or organizations like The Heritage Foundation or the Brookings Institute or Industry Policy Review.

Each day, we will run business news briefs from Ford's worldwide CFC phaseout program, according to industry activity and trading volume leaders among the New York Stock Exchange and NASDAQ. We will also plan to track Dow Jones over each week.

The Observer plans to increase its coverage of campus business news, also. With so many campus business clubs and societies, it would be a great benefit to our readers to inform them of these activities.

All these ideas are the result of input from The Observer staff and others in the surrounding community. If you have any suggestions on how we could further improve the business page do not hesitate to call or write us.

BUSINESS BRIEFS

Ford Motor Co. to reduce CFC's

DEARBORN, Mich. — Ford Motor Co. plans to cut 90 percent or 7 million pounds — of the chlorofluorocarbons that are used in worldwide manufacturing processes by the end of 1992, the automaker announced Tuesday. Ford also announced Tuesday that it will re-engineer its car and truck air conditioning systems to operate on a CFC-free refrigerant so that all new 1994 models will have CFC-free air conditioning systems. The company's new Mark V, scheduled to debut in December, will use a CFC-free air conditioning system. Ford's worldwide CFC phaseout program was brought praise from the Environmental Protection Agency, which awarded Ford its 1992 Stratospheric Ozone Protection Award on Tuesday.

Sneakers houses jumps in August

WASHINGTON — Housing sales jumped 10.4 percent in August, to a seasonally adjusted annual rate of 1.24 million, the first increase in three months. But the forecast that new home sales would level off and cited a 1.6 percent decline in applications for building permits. The lower rates also reflect sales of previously owned homes in August. They fell 2.4 percent, to a seasonally adjusted annual rate of 3.34 million, the fourth straight month of decline, according to the National Association of Realtors. The Realtors attributed the decline to "consumer uneasiness" over the persistent economic sluggishness. Regionally, sales plunged 19.5 percent in the West, to a 140,000 seasonally adjusted annual rate.

United Auto Workers accepts settlement in Michigan G&W

LANSING, Mich. (AP) — Workers at a Grand Rapids, Mich., plant that makes the outer body of the Grand Am, GM's entry-level model, went back on the job today, a day after voting to settle a four-day walkout. GM spokeswoman Linda Cook said all the plant's first-shift employees had rejoined work and that "we are building cars right now." Cook said workers had reported to work, and GM also expected other shift employees to report for regular duty today.

United Auto Workers Local 602 voted 60 percent to 40 percent Tuesday night to return to the line today, ending the second walkout this month against the No. 1 automaker. But, as he agreed, UAW members at the plant will vote Dec. 1 on a key issue in the dispute — whether to break all at once, GM proposes. "We don't consider that GM's going to win," said Jim Sickles, a UAW International representative. Sickles said 2,383 workers voted.

The move allows the 7,200 workers to return to their jobs. That includes about 4,200 striking workers who returned to work to protest UAW members at the Lansing chassis plant that completes assembly of the popular Pontiac Grand Am.

GM's desire to have all workers take breaks at the same time sparked the strike. The breaks would have let GM eliminate the jobs of 300 to 350 plant employees during their rotating breaks. But GM said through a spokesman, "They are without question the most important business is, which section people turned to first. I noticed a few picked up a newspaper. Not surprisingly, most of them went to the first page or the sports section first. Not one person that I saw turned to the business page. It is unfortunate that most Americans don't realize how important business is, whether it be the president's local policy or the status of the local steel mill. DEARBORN, Mich. — Ford Motor Co. plans to cut 90 percent or 7 million pounds — of the chlorofluorocarbons that are used in worldwide manufacturing processes by the end of 1992, the automaker announced Tuesday. Ford also announced Tuesday that it will re-engineer its car and truck air conditioning systems to operate on a CFC-free refrigerant so that all new 1994 models will have CFC-free air conditioning systems. The company's new Mark V, scheduled to debut in December, will use a CFC-free air conditioning system. Ford's worldwide CFC phaseout program was brought praise from the Environmental Protection Agency, which awarded Ford its 1992 Stratospheric Ozone Protection Award on Tuesday.

Sneakers houses jumps in August

WASHINGTON — Housing sales jumped 10.4 percent in August, to a seasonally adjusted annual rate of 1.24 million, the first increase in three months. But the forecast that new home sales would level off and cited a 1.6 percent decline in applications for building permits. The lower rates also reflect sales of previously owned homes in August. They fell 2.4 percent, to a seasonally adjusted annual rate of 3.34 million, the fourth straight month of decline, according to the National Association of Realtors. The Realtors attributed the decline to "consumer uneasiness" over the persistent economic sluggishness. Regionally, sales plunged 19.5 percent in the West, to a 140,000 seasonally adjusted annual rate.

United Auto Workers accepts settlement in Michigan G&W

LANSING, Mich. (AP) — Workers at a Grand Rapids, Mich., plant that makes the outer body of the Grand Am, GM's entry-level model, went back on the job today, a day after voting to settle a four-day walkout. GM spokeswoman Linda Cook said all the plant's first-shift employees had rejoined work and that "we are building cars right now." Cook said workers had reported to work, and GM also expected other shift employees to report for regular duty today.

United Auto Workers Local 602 voted 60 percent to 40 percent Tuesday night to return to the line today, ending the second walkout this month against the No. 1 automaker. But, as he agreed, UAW members at the plant will vote Dec. 1 on a key issue in the dispute — whether to break all at once, GM proposes. "We don't consider that GM's going to win," said Jim Sickles, a UAW International representative. Sickles said 2,383 workers voted.

The move allows the 7,200 workers to return to their jobs. That includes about 4,200 striking workers who returned to work to protest UAW members at the Lansing chassis plant that completes assembly of the popular Pontiac Grand Am.

GM's desire to have all workers take breaks at the same time sparked the strike. The breaks would have let GM eliminate the jobs of 300 to 350 plant employees during their rotating breaks. But GM said through a spokesman, "They are without question the most
Pro-lifers’ actions rather mild

The uncivil behavior of some pro-lifers during Gov. Clinton’s Notre Dame speech has aroused justified disapproval if the alleged behavior occurred.

Nevertheless, those who believe a little intemperate heckling impeaches the pro-life position might want to reconsider lest the same standard force them to reject other, more politically correct views.

First, the pro-lifers’ ex-cuses were negligible compared to the war on free speech. For instance, last spring the administration in Berkeley to deliver their prescribed pro-life lecture, virtually prevented from doing so.

Demonstrators in death masks heckled and screamed at her throughout her remarks, rendering most of her comments unintelligible.

A similar fate awaited her both at the University of Minnesota when the Hubert Humphrey Institute brought her to campus as a guest lecturer, and then again at the University of Washington.

Moreover, organized left-wing lobbying on many campuses has repeatedly resulted in the revocation of their invitation to speak.

In the face of Lawson’s calls to the governor and other state officials, the university administration backed down.

Nevertheless, that the University of Illinois and other universities administrations at Hamilton College and Georgetown have rewarded leftist threats of violence with official attempts to prohibit conservative speakers on campus-in the name of security—should appal civil libertarians of every political stripe.

Finally, support of the choice to keep the unborn happy instead of far more serious poses American philosophy.

For instance, last spring prominent pro-life activist Joe Scheidler was to speak at Illinois. But when he began his remarks, shrieking and chanting students threw objects at him, such as spitballs, at least one charged the podium.

Only minutes into his remarks, nervous university administrators had security remove Scheidler from what had become an angry, frenzied mob.

The overwhelming evidence, then, is that when it comes to assaults on free speech, pro-lifers (and others holding politically incorrect views) are vileness sinners, and more often sinned against than sinning.

Mona Walsh Holland is a University of Notre Dame law student.
The result of those troubled years is that today 65 percent of Americans believe that their political leaders are corrupt and that there is no favorable majority party, only two seriously flawed parties.

Volunteer fair projects
service after college

By MELISSA COMER
Assistant Accent Editor

The football field is not the only place where some of America's greatest college rivalries are meeting this week. Tomorrow evening the Catholic will take on the Convicts in an entirely different forum.

Lifetime Television's game show "Shop 'Til You Drop," hosted by Pat Finn, is featuring "College Shopper's Bowl Week" all this week. Pitting traditional rivals such as Ohio State and University of Michigan and Harvard and University of Pennsylvania, the game show brings together teams from across the country.

The game, scheduled to air tomorrow evening, features a rivalry which is close to the hearts of many Notre Dame fans. Notre Dame students Tom Lear, class of '92, and Jeannie Shin, a junior who is currently studying in London, meet the University of Miami's team to earn the top prize ranging from toaster to a trip to Paris.

Last year, Lifetime Television came to South Bend to audition students for the show. According to Tom Lear, an advertisement in The Observer offering a free trip to Hollywood brought one of the largest turnouts from any school to try out. The twelve students who were chosen were one of twenty-five couples who auditioned for a spot on the program.

For the first part of the show, the students were asked to produce a video. Lear and Shin were able to work with a particular interest in trying out. Lear, nicknamed "TV Tom," responded, "I've always wanted to be on a game show. I figured why not try it?"

At the auditions held in the Gipper Lounge of the local Holiday Inn, the students took a quiz testing their consumer knowledge. Given only the product name, auditioners were asked to determine what the product actually was.

Next, the students were asked to perform a few stunts similar to those that they would have to do on the show. It seems their sheer enthusiasm won them a spot on the program.

According to Roemer, the personal contact with re-
tards the fair annually, using student body.

Since its inception, the fair has become a magnet for recruiters in volunteer programs throughout the country.

According to Mary Ann Roemer, director of senior pro-
grams at the C.S.C., approximately 150 to 200 seniors from Notre Dame decide to pursue volunteer work after graduation each year.

"I have a feeling even more people do service work on their own," said Roemer. For those choosing to make use of contacts through the University, however, the Center can open hundreds of channels for national and international service opportunities.

Roemer, who organizes the post-graduate fair each spring and the volunteer send-off each May, believes that many students at the University tend to-ward service work after college because they have been ex-
posed to it by their families, high schools, and clubs at Notre Dame.

She considers the post-
graduate fair a shopping stone for implementing service work into long-term plans: "It's a great way to begin to really integrate service into your life," she affirmed.

College students throughout the country have continuously found something attractive in the prospect of service work, but recruiters consider Notre Dame a unique and unusual place to attract volunteers, Roemer concluded.

"The primary purpose of the Center (for Social Concerns) is to help people integrate justice and faith in their lives," she said. Consequently, Notre Dame students often have experience in service projects from their undergraduate involvement with the Center. Recruiters, in turn, have found that students from the University have been very committed to their causes.

All students, regardless of year and experiences, are en-
couraged to explore the possi-
bilities at tonight's volunteer fair. "I really want them to feel welcome," said Roemer of the students.

Over 400 people have at-
tended the fair annually, using the personal contact with re-
cruiters to find out more spe-
cific information about interest-
ling programs.

Domestic service programs at the post-graduate fair tradi-
tionally last for one year, while programs outside the United States—which usually involve substantial language and cul-
tural adjustments—span over a period of 18 months or more.

According to Roemer, the most popular programs consist-
tly have been those oriented towards teaching. Students who feel attracted to these pro-
grams but have not majored in education in their undergrad-
uate years should not feel dis-
souraged.

"A few programs are really competitive," said Roemer, but most of the teaching programs do not require certification prior to application; the will and commitment of volunteers is often the crucial factor in re-
cruiters' decision to accept post-grads.

Holy Cross Associates, spon-
dored by the Holy Cross prints of Notre Dame, draws the ma-
jority of its volunteers from Notre Dame and other Holy Cross-affiliated universities in the country.

The HCA programs consist of one-year positions at a variety of service-related organizations in cities across the United States. Volunteers for these programs live in a community and regard their year of service as a faith-strengthening expe-
rience.

Mary Sue Twohy, a volunteer for the Red Cloud Volunteer Program on the Pine Ridge Reservation in South Dakota, worked as a coach and teacher for high school students.

In a recent article, Twohy ad-
viced college seniors. "As you prepare your post-graduate plan, in the midst of a recession that is not hiring many people, the task of finding volunteer experi-
cence. I have found it an adven-
turous time to take a hard look at life from a different per-
spective and to open my heart in ways unimaginable.

The fair will take place tonight from 7 p.m. to 10 p.m. in the large classroom at the Center for Social Concerns.

CAMPUS MINISTRY...

Staff members of campus ministry have been discussing ways in which we might be of assistance and service to gay and lesbian members of the Notre Dame community. All of us who have been part of these conversations agree that there is a significant pastoral need which continues to exist on our campus. I believe there are three dimensions to our concern.

First, it is important for us to express clearly the teaching of the Catholic Church in this area of sexual ethics. Secondly, we know harm is done to gay and lesbian people to be denounced as behavior which is inappropriate and contrary to the teaching of Christ. And finally, we want to find ways we can extend an open and sensitive welcome to gay and lesbian students.

It is important for us to develop a pastoral policy that is compatible with the teaching of the Catholic Church. The position of the Church is straightforward. All men and women are called to live chaste lives, whether we are heterosexual or homosexual, and celibacy is required of all who are not married. By the way we live out our commitments, we can help one another if our lives are strong and consistent statements of what we believe.

Most people commit themselves to marriage and family life. A growing number of Christians live their lives as single people. Still others commit themselves to service of God's people through a life of permanent and consecrated celibacy in the priesthood and religious life.

For all of us, regardless of our state of life, genital activity can take place only in the context of marriage, under circumstances which respect the rights and responsibilities of both partners whose love for each other is open to the possibility of creating new life.

Each of us is a unique, extraordinary and distinctive individual, called to life by a loving God, heirs of the reign proclaimed by Jesus Christ, and called to live in love. In the words of Paul, we are in Christ, neither slave nor free, neither gentile nor Jew, but one in the love of Christ.

There are a lot of reasons why people engage in harassment, but it is not usually directed at someone who is different from us. From a faith perspective, harassment of gays and lesbians, or anyone else, whether intentional or thoughtless, whether through cruel jokes or in idle conversation, is simply unacceptable. Negative judgments we pass on others and always make the reason of inexcusable ignorance or inadmissible intolerance. The pain we cause is obviously harmful to the other person, whether that is our intention or not. Overcoming this prejudice is not an easy step to take, but it is an essential one if we are to call ourselves Christian.

Finally, a word to the gay and lesbian members of our campus community, and to those who are uncertain about their sexual orientation. Campus ministry wants to be a place where you can find assistance and understanding. We should be and want to be a place where students can find a friendly and compassionate welcome and assistance based on the respect each of us can claim because of our inestimable worth in God's eyes. We will assure you of a conversation that is confidential, personal, and nonjudgemental.

Some in our community have had deep self-understanding for years; others are dealing with many questions and uncertainties about their orientation. We are ready to help you with whatever feelings you may be experiencing, including fears of rejection or even of being harmed by others, a sense of loneliness or guilt, or questions about your relationship to God.

We want to help you discover ways in which you can live out the Christian commitment to which each of us is called. We want to help you to discover in your own life the love of Jesus Christ, which has established countless men and women of every condition and situation throughout history to find reassurance and consolation and hope.

If desirable and appropriate, we will bring you into contact with other people struggling with the same questions and searching for the same sense of peace and self acceptance.

Richard V. Warner, C.S.C.
Director, Campus Ministry

Maddux gets 20th victory

CHICAGO (AP) — Greg Maddux no longer has to wonder what it would feel like to be a 20-game winner.

Maddux, who had come close twice before, finally did it Wednesday by scattering seven hits to lead the Chicago Cubs to a 6-0 victory over the Pittsburgh Pirates.

That question was getting old, and now I don’t have to think about it anymore,” Maddux said. “It was a good day. We needed the win badly. The defense was good game. The defense was good. The defense was good. The defense was good.”

Maddux, who had come close in 1984 and 1985, pitched his 20th victory Sunday. Maddux (20-11) tossed his sixth career no-hitter in five-plus innings.

Maddux's career and Maddux's season. The Pirates are off Thursday.

Purdue's Conley impressive in first start

WEST LAFAYETTE, Ind. (AP) — Bart Conley was too good to keep on Purdue's bench.

"When the season began, I figured since I only weighed about 210 they'd probably be redshirting me," said the 6-foot-4 freshman left-hander from Cincinnati.

"Not a chance. His performance in preseason drills was impressive, and last week he made his first collegiate start against Notre Dame. "Bart Conley is going to be a good one. He looks like one of the freshmen who can eventually turn our program around," said coach Jim Colletto.

Conley, whose father, John, played on Purdue's 1967 Rose Bowl team, showed why he should become a fixture in the Boilermakers' lineup for the rest of his career. He led the team with 16 tackles, including nine solos and two for losses.

The performance was especially impressive for a freshman making his first start because it came at Notre Dame Stadium against one of the nation's top teams, Colletto said.

"This program is definitely on the upswing," said Conley, who was redshirted in 1988. "This program is definitely on the upswing." He’s the kind of guy that we like to have."

"He’s going to get a lot bigger. He’s going to get a lot bigger. He’s got a lot of potential for playing. He’s kind of a wise guy type of guy, that’s what you like in a left-hander," Colletto said. "He’s a smart guy. He does a good job at school. He hustles, he plays. He’s the kind of guy that we like to have."

Conley, who found it a little unsettling to make his first start at Notre Dame, said his ability to get to the ball is his main asset.

"That was unreal. I can’t really explain the feeling I had there. Having grown up in Cincinnati, I know all about the Irish program," he said. "I was nervous but once the game began, that was all behind me."

Like his teammates, Conley has felt peaks and valleys as Purdue opened with a 41-14 upset of then-nationally ranked California before being upset 33-29 by Toledo of the Mid-American Conference and then being overpowered by Notre Dame 48-0.

"This program is definitely on the upswing," said Conley, who hopes to help the Boilermakers post their first winning season since 1984 this year. "The season is starting over again with the Big Ten season. We go to open with a victory and go from there. We all feel we can be a part of restoring success in football here."
Lankford leads Cards sweep

ST. LOUIS (AP) — Ray Lankford singled in the winning run with one out in the 11th inning as St. Louis beat Montreal 3-2 to complete a three-game sweep.

It was the second straight extra-inning game for the Cardinals and their 26th of the season, one short of the league record shared by the 1942 Boston Braves and the 1967 Los Angeles Dodgers.

Stan Royer led off the 11th with a single off Jeff Fassero (8-7) and pinch-runner Bernard Gilkey advanced on a sacrifice. Ozzie Smith was intentionally walked before Lankford's hit scored Gilkey without a play.

Bryn Smith (4-2) worked two scoreless innings for the victory.

Astros 5, Padres 4

HOUSTON — Eric Anthony hit a pair of two-run homers as Houston beat San Diego in its final at-bat for the season-consecutive game.

Anthony, who leads the Astros with 19 homers, cut San Diego's consecutive game.

Astros scored in the first inning on Will Clark's sacrifice fly.

RecSports is taking entries for campus badminton, interhall volleyball and co-rec basketball. Due October 7.

Viola's no-hit bid squelched

TORONTO (AP) — Frank Viola took a no-hitter into the ninth inning before allowing a single to Devon White, and the Boston Red Sox stoked the Toronto Blue Jays' pennant drive with a 1-0 victory Wednesday night.

Viola (13-12) was pitching by his awe request with only three days' rest against David Cone and the division-leading Blue Jays, who began the night with a 2-1/2-game lead over Milwaukee in the AL East.

The Brewers, who had five games left, played later at Seattle, and Toronto's magic number for its second straight division title remained at three.

Viola struck out five and walked three in his sixth complete game of the season. John Valentin hit an opposite-field homer in the fourth off Cone (4-3).

Cowboys form plan of attack

IRVING, Texas (AP) — It's a brain-twister the Dallas Cowboys have never solved. How do you beat Randall Cunningham? The search is on at Valley Ranch for a solution. In five days the Cowboys have to find an answer for the Philadelphia Eagles perplexing and canny Cunningham, 7-0 against the Cowboys.

The Cowboys have tried a "spy" with someone shadowing Cunningham's every move. They've blitzed linebackers. They've tried a three-man rush. Nothing has worked for long.

Dallas coach Jimmy Johnson said on Wednesday that the addition of Herschel Walker at running back has made Cunningham even more dangerous in Monday Night Football's showdown of undefeated NFC East clubs at Veterans Stadium. But he quickly added "the real key to the team is Cunningham."

Walker gives the Eagles a consistent running game. Yet, Randall Cunningham is still the focal point. In fact, Herschel helps their offensive line because the defense can't tee off on Randall expecting him to throw. Johnson, naturally, wouldn't disclose the Cowboys defensive scheme but it will be an intricate mix because the team has had two weeks to figure out a defensive chess game to stop Cunningham. "His scrambling can really get to a defense," Johnson said. "You have him stopped then he gets away." Asked if he would try the "spy" route Johnson said we've got to keep changing our defense up. We can't use any one thing and be totally effective against a great player like Cunningham. We'll try a bunch of different looks to keep him off balance.

Cowboys have completed 1,394 yards worth of passes for 11 touchdowns against the Cowboys. The Dallas players are worried about Cunningham's improvisations. "He came up with a lot of really good base plays and formations," said defensive tackle Far Bolt. "I've seen him do it to us."

For the quickest I've ever seen," said Dallas defensive tackle Russell Maryland. "He's still backing quickier," Johnson also said it was an unhappy day for him when Wentz went to Philadelphia as a free agent. "I was not a happy coach when he signed with the Eagles," Johnson said. "I had hoped he would go to the AFC. He helps their football team. Philadelphia was already a top

John Johnson is working on a plan to contain Randall Cunningham.

Beach ready to step in for departed Jackson

Beach, who has a reputation as a strong blocking tight end and was a starter, and will be there day with the Miami Dolphins.

The move was made after the Dolphins cut two tight ends, Kie Wiedemann and Keith Jackson, who had been with the team for most of the season. Beach was signed as an emergency replacement after the Dolphins made a surprise decision to cut Wiedemann and Jackson.

Beach said that he was not too surprised by the decision, as the Dolphins needed to make room for players who were signed to new contracts.

"I was ready for it," Beach said. "I knew that the NFL was a tough league to make, and I knew that I had to keep working hard to stay in shape and improve my game."

Riley, McWilliams claim MCC awards

Special to The Observer

Notre Dame's top two runners at this weekend's National Catholic Invitational, sophomore Sarah Riley and junior Mike McWilliams, were named MCC Players of the Week in men's and women's cross country.

Riley edged Loyola junior Julie Keller, the defending MCC champion, and led the Irish to the team title. Riley completed the five-kilometer course in 17:56.9, less than two seconds ahead of runner-up Keller. After the two leaders, the next five runners were from Notre Dame as the Irish tallied 19 points to finish ahead of runner-up St. Thomas, who had 99.

Riley played a pivotal role on the team as a freshman a year ago, but has blossomed this season after a rigorous summer of training. Riley also led the Irish harriers in their first dual meet of the year against Georgetown. Along with last year's top runner, Eva Flood, and Stefanie Jensen, Becky Affieri and Emily Hustted, Riley gives the Irish's impressive sophomore class.

All-America McWilliams also led the sixth-ranked Irish men's team, the National Catholics title. McWilliams finished fifth in the five-mile kilometer, less than two seconds ahead of teammate Nate Ruder.

The Irish captured the top four spots in both races and added a ninth-place finish for 19 points, far ahead of the 61-point effort by runner-up Marquette.

McWilliams is one of the nation's best collegiate cross-country runners, as he is a two-time All-American and was just the eighth American finisher at last year's NCAA meet in Tuscaloosa, Alabama. He has led the Irish in both meets this season and figures to pace the squad all year as the Irish will face last year's disappointing NCAA squad and regain the form that led them to a third-place finish at the NCAA's last year.

McWilliams and senior All-American John Coyle comprise the core of this year's team.

Women's interhall heats up

BY HEATHER WILEY
Sports Writer

Breen-Phillips' and Walsh's interhall football teams renewed their rivalry on Sunday, with BP managing a close win over Walsh 12-0 with two big plays, one in their second drive of the game, and the second coming late in the half. "BP had a really good defense and they just sort of shut down our offense completely. It was a close game," said Walsh captain Laura LaVigne. Walsh's defense was tough as well, allowing BP little yardage with the exception of the two scoring drives.

The next set of interhall football games will be played on Sunday, October 4. Walsh will play Pughen at 7 p.m. BP's game will be at 9 p.m. against Lyon.

Siegfried 19, PE 13

Siegfried, leaders in both national championships in the balance, but the biggest reward of all is for the victor of the coaching battle. But, the biggest reward of all makes the right decisions and always makes the right choices.

The Blades of grass which seem to settle

BUT, as we all know too well, that
defense doesn't assure a victory (see Michigan State).

So neither coach should get the opportunity to build on their immense reputations Saturday. Holtz and Walsh spoke of each other coaching may be foreign to some. But the stories of Walsh's ingenious wizard is well-documented in this area, his ability to find controlled short passing schemes.

Both field generals. Walsh will pace the offense completely. It was a close game of their lives and still be out-fronting the five-mile course on the Burke Stadium.

In their first regatta of the season, both the men's and women's varsity crew teams placed at the Head of the Ohio in Pittsburgh last weekend.

The women's lightweight four placed second behind Miami of Ohio, in an impressive show of hard work and determination. But even that might not have been enough if it hadn't been for coxswain Tricia Star.

"We probably would not have medaled without the help of her intensity," said stroke Tricia Cody. "She kept us going."

Meanwhile, with more than forty crews competing, including M.I.T. Brown and several Canadian crews, the women's lightweight eight rowed their way into second place behind Ohio State University, placing third. "It was more intense than our opponents," said Stroke Tricia Cody. "The Ohio served as a litmus test for the whole team," said Breen-Phillips' captain and coxswain Mike Kelly.

The mens' lightweight eight rowed a clear indication of what we can achieve this weekend. Both the men's lightweight four and eight teams' placings last weekend were needed starts and stepping-stones, and made a clear indication of what we can achieve this weekend. Both the men's lightweight four and eight teams' placings last weekend were needed starts and stepping-stones, and made a clear indication of what we can achieve this weekend.
