Students witness the devastation

By JOHN LUCAS
Associate News Editor

Notre Dame students visiting homes for fall break received a first-hand look at the destruction and horror of the California fires as many returned to neighboring communities and evacuation zones.

Although few residents in the affected area have been injured, huge amounts of destruction have been inflicted by the rampant wildfires.

"It's scary," Notre Dame junior John Hayes said. "People are really in the mercy of the wind."

Junior John Vandermore joined the relief forces working to clean up the disaster. He worked at a home in his summer job last Thursday and Friday, driving an ambulance around the Newport Beach and the ragged Laguna area.

Although he answered routine calls that were not fire related, Vandermore relieved other drivers who had been working 24-hour shifts, battling the flames.

"When the firemen got hurt, they went up and got them," he said. "It was real bad conditions.

The Guide, a student publication, will be complete and will be distributed today and tomorrow in an effort to aid students in course selection before darting.

"We want to be here to catch the embers, that's the only real threat right now. Keep everything wet, and if you see an ember you get on it fast. That's all you can do. It's pretty scary," said Chase.

The California Highway Patrol reported people desperate to get to their homes abandoned cars on the highway and walked past a roadblock.

A 45-mile stretch of Pacific Coast Highway remained closed today as two main fronts of the fire continued to burn.

The western flank burned near Pepperdine University, which is 10 miles to the east of the fire threatened Pacific Palisades. The famed Getty Art Museum was within a few miles of the fire, so the safety of the museum is still hinged on fickle winds, fire officials cautioned.

"We're just trying to contain the fire related, Vandermore said. "We're not comparable. According to the necessary information, we evaluated some courses.

Although several residents in the area were injured, huge amounts of destruction have been inflicted by the rampant wildfires.

"It's scary," Notre Dame journalism major John Hayes said. "People are really in the mercy of the wind."

Slang, cliches
add spice to pop culture

Have you ever wondered about slang? I mean, how did all those words and phrases get started? Is there a small office adjacent to the Pentagon called the "Slang Committee" whose job it is to create new words and new meanings for them? I wonder about it sometimes.

Where would the United States be if we never heard the words "cool" and "like"? Those two words alone are probably used five times in every sentence we utter.

I doubt that America was the first country ever to bombard its language with slang, but I also doubt that any other country does it more freely. Perhaps it's because as far as we know, it is the most prevalent nation in the world's media, the American artists, actors, and writers do a fabulous job of injecting their interpretations and creations of slang into the mainstream.

Even more interesting than slang itself is all the different shapes it takes and different ways it is used. There are cliches, inside jokes, and words used in normal conversation that, taken literally, don't really mean anything.

It's not difficult to understand the development of inside jokes or other made-up words; they tend to spread only normally to spread across the entire nation. Cliches, on the other hand, are truly a puzzle.

Think "happy as a clam" for example. First of all, did some guy actually swim down into the ocean to look at a big ugly clam and think, "Wow, he's happy?" and then, how did he spread that message all over the United States? Did he write an article about it in USA Today? I didn't see any commercials advertising it, did you?

There are others just as fascinating.

Where did they get "you drive me up the wall," "barking up the wrong tree," and "drunk as a skunk?" Stopping and imagining each of them, we discover that there are far more than we do today. By far the most interesting are the ones that are not only not spoken and understood, but are in effect, a dead language.

For example, "Where would the water go?" "The water would wear the rocks away."

Although the most common slang terms are probably invented to replace words that are too heavy or readily understood, there is another class that is much more creative. This is the slang that comes from a desire to add more terms to the language. It's a new form of art that is being created, I believe, to express a new form of thought.

Regardless of their origin or popularity, the slang terms are definitely one of the most colorful expressions of American culture. Is that sad? Really don't think so. Hey, the quicker it is that expressions of American culture. Is that sad? I doubt that any other country does it more frequently than we do today. By far the most interesting are the ones that are not only not spoken and understood, but are in effect, a dead language.

Elton John upset over false diet report

Elton John was upset and angry over a false newspaper report that he lived on a bizarre diet, spitting out chowed food rather than swallowing it, his manager told a jury. "The article disturbed him deeply," John's lawyer said. During a trial on the rock's libel complaint against the Sunday Mirror, the tabloid admitted the story wasn't true, but it said it didn't know that last December when it printed it under the headline: "Elton's diet of death," John's lawyer said. He told the High Court on Monday that he spent 16 years fighting the eating disorder bulimia and addiction to drugs and alcohol. He said he was hospitalized in 1990 and later joined Alcoholics Anonymous, Narcotics Anonymous, Overeaters Anonymous, and Bulimics Anonymous.

World at a glance

Tegucigalpa, Honduras

Heavy flooding kept more than 15,000 people from going to work Wednesday to homes swapped by three to four minutes. About 10 people have died and 263 are missing, authorities said.

Tornadoes wrecked over bodies from swollen rivers along the Atlantic coast. "The flooded are not only preliminary because our rescue brigades are still finding bodies in the rivers," said Ramon Santos, a government authority who provided the toll.

President Rafael Callejas announced preparations a day earlier to declare a state of emergency in an 8,000-square-mile area in the northern Atlantic provinces of Yoro and Colon. After flying Tuesday over the hardest-hit areas, he said experts were estimating damages would exceed $60 million.

The Red Cross appealed for international assistance for thousands who remained sheltered in churches and after their homes were destroyed and mudslide cut the main Atlantic coastal highway, cutting off whole towns.

Sanitoto said civil defense officials were worried about 150 isolated hamlets and towns that have gone one four days without safe drinking water.

We fear there could be a surge of epidemics among the victims," he said. The nearly 700 people were called for work began before dawn on Sunday as a series of storms and high winds lashed the coastal provinces, leveling mudslides that toppled more than 1,000 homes.

The storm also destroyed vast plantations of rice, bananas, cacao, sugarcane and coffee plantations.

Vice President Roberto Lozano said some of the biggest losses were in the farming valleys of Aguac and Leon, where Chiquita Brands operates large banana plantations.

"The situation is calamitous. And the problem with the drinking water is the most serious affecting the victims and is our immediate priority," said Lozano.

Train carrying hazardous materials details

Ten tanker cars from a freight train carrying hazardous materials detailed Wednesday, rattling houses and forcing the evacuation of thousands of residents and three elementary schools. No injuries were reported. Said Jefferson County Police spokeswoman Wendy Peters. Between 2,400 and 2,800 people were evacuated within a mile of the wreck in suburban Louisville, said Eric Evans, chief of the Pleasure Ridge Fire Department. Two overturned tankers carrying chlorine had small leaks, which were sealed by evening. Evans said. Chlorozone is highly flammable and gives off toxic smoke if itburns. In all, six cars overturned, four remained upright, and 14 cars remained on the track. None of the other cars was leaking. Peters said. Authorities, however, said they were concerned about an empty tanker containing calcium carbide residue that was unstable and could explode. Emergency workers placed plastic over the tanker to keep out mist.

In the United States, the most commonly used slang terms are probably derived from the English language. There are many varieties of slang that are specific to certain groups of people, such as musicians, athletes, and actors. Some of these slang terms are well-known and widely used, while others are more obscure and are only used by a small group of people. Additionally, slang is often used to express a new form of thought that is not easily expressed in standard language. This is particularly true of the slang that comes from a desire to add more terms to the language. It's a new form of art that is being created, I believe, to express a new form of thought.

Regardless of their origin or popularity, slang terms are definitely one of the most colorful expressions of American culture. Is that sad? Really don't think so. Hey, the quicker it is that expressions of American culture. Is that sad? I doubt that any other country does it more frequently than we do today. By far the most interesting are the ones that are not only not spoken and understood, but are in effect, a dead language.

ND broadens its service opportunities

By SUZY FRY
Assistant News Editor

Though still in its tentative stages, Notre Dame's effort to respond to President Bill Clinton's National and Community Service Trust Act has made significant progress, especially in the areas of program endorsement and community-university interaction.

Recently, the Center for Social Concerns established a National and Community Service Steering Committee at the request of University President Father Malloy. The goal of the committee, as co-chairs Father Don McNeill and junior Kellie Abbott explained at yesterday's steering committee meeting, is to create an atmosphere of mutual benefits and collaboration between Notre Dame and the surrounding communities, as well as providing financial support to students interested in volunteering via the National and Community Service Act.

The bill, as Clinton signed into law on Sept. 21, "will address the nation's education, human, public safety and environmental problems" while simultaneously "fostering civic responsibility and providing an educational opportunity for those who make a substantial commitment to service."

The program will allow individuals over 17 years old to earn up to $4,725 a year toward higher education or job training in exchange for up to two years of community service. Full-time college students will also be able to apply for gradual reductions in their Stafford loans.

In addition, non-profit organizations, including universities, may be eligible for development grants that may allow for the expansion of already-existing service programs. In response to this legislation, Notre Dame has taken steps to establish itself as a pilot program for other universities and institutions, said Jay Bradenberger, NCS educational programming co-chair.

"Washington is very interested in any ideas that Notre Dame has to offer," he said.

While Washington has yet to approve the appropriations and the regulations for legislation, Notre Dame should see effects of the program as early as next summer and fall, said McNeill.

According to Maureen Skurz, NCS project coordinator, "the service projects associated with CSC will be enhanced by the added funding and exposure from Clinton's plan. We're not going to try to re-invent the wheel by establishing new programs and methods of service."

"The idea of philanthropy is not a new concept to most Notre Dame students. However, with a national program, ND will realize that it is not just the ND student who participates but it will be all sorts of people from all over—each offering their own ideas and learning from the diversity of others," said education programming co-chair Jennifer Gueerin.

"The center is by no means a remedial center, according to Thomas. "We do not want a negative stigma associated with the center," Thomas said. "Everyone should come to the writing center, even good writers have room for improvement." Students are encouraged to work on any type of writing at the center. Term papers, compositions and personal statements for graduate school are common among older students, while freshmen tend to work on "W" papers.

 Fires

continued from page 1

gruesome, because a lot of the houses got burned real sudden-
ly.

Sophomore Jennifer Allen was giving a presentation on Notre Dame for Santa Margarita High School in Laguna Beach, when the word came to evacuate. The college night was proceeding normally when suddenly everyone were told that fires were moving rapidly toward the area.

"The winds were so unpredictable, there was no way to know when the fires were coming," she added.

Residents in the area had no warning of the evacuations and little opportunity to gather their belongings, according to Allen.

"All they (Laguna residents) had time for was to grab their checkbooks and important papers-most people were given about 30 seconds notice," she said. The fires have been caused by a combination of factors, all coming together at a bad time, according to Farmer, a Santa Barbara resident.

Although the famed "Santa Ana" winds have been a factor, the combination of dry ground and combustible bushes have added to the speed of the destruc-
tion. The rapid spread of the fires are also probably due to the presence of sumac, a native bush that contains a form of oil, he said.

"When sumac catches fire, it almost explodes," Farmer said. "It's like when you put gas on the grill- it just goes crazy."

In addition to the scorching wind, raging fires are depleting the water supply, Farmer said.

"The dilemma is that you have all kinds of people who have been told for all these years that if there is a fire to wet down their roof, but if people go out and wet down their roof, they deprive the water supply, and even more impor-
tant, the pressure," Farmer said.

"When the fire fighters have to go fight the big flames, they don't have much to work with."

Although the fires around Laguna caused tremendous destruc-
tion, they were also beautiful sight to watch, according to Allen.

"At sunset, you could see through all of the smoke, and everywhere you just saw a really dark red," she said. "It was almost like something from Dante's Inferno."

Junior Jack Hogan watched the fires come over the hills from the top of his home in Balboa Island, a community near Newport Beach.

"I was planning on going to a movie, but this (the fires) was more exciting than seeing a movie; we just sat there and watched it come over the hills," Hogan said. "We sat there in awe."

Analysis

continued from page 1

success hinges on the instruc-
tors' attitudes to the project, which may change after the initial publication.

Other minor weaknesses in the Guide are related to format. For example, the current issue only has the instructor's name on the actual evaluation, and students simply have to page through the book to find the name of the instructor they are researching.

An index of the featured courses and professors would simplify this process.

Also, formal course titles are not included in the Guide. The number of the course is not sufficient, and future compilations would be easier to use if the evaluation had the number as well as the course title on it.

The next Guide publication is already underway, and stu-
dents interested in working on the project should contact stu-
dent government.

Russia willing to use its nuclear weapons

By LARRY RYCKMAN

Abandoning a long-standing Soviet policy, Russia now is ready to launch nuclear mis-

siles in a first strike if its or its allies are attacked with conven-
tional weapons, a top official said Wednesday.

The United States and other Western powers have repeated-
edly refused to rule out a first strike, arguing that such a pledge would diminish the de-
territorial value of their nuclear arsenals and limit their military options.

The new Russian policy is part of a military doctrine ap-

proved by President Boris Yeltsin on Tuesday. The docu-

tment had been demanded by the military as payment for its support in his fight with par-

liament last month.

The 23-page doctrine states that Russia's military mission is

primarily defensive and that no nation is considered a potential enemy.

It also allows the military to intervene in domestic crises "to protect the constitutional sys-

Castellino analyzes science ethics

By TONY POTTINGER News Writer

Identical siblings born years apart. Humans bred for the sole purpose of restocking org—
apart. Humans bred for the purpose of developing genetically superior beef, he said. The cloning of the human embryo represents not so much a scientific advancement as a move with "tremendous ethical ramifications," according to Castellino. As a result, "whole new disciplines will have to be defined in molecular biology. There are no ethical or legal precedents for all of this," said Castellino.

At Notre Dame for example, all research work with recombinant DNA must go through a review board before the University will sign a grant, according to Castellino. "All of what was once science fiction before it was understood is now actually happening. Natural selection has been manipulated by science," said Castellino.

Student Enrique Bernardo addressed the topic saying, "We can think of anything in science and develop it, but we should still be bound by our moral conscience." Castellino continued, "there is need for a balanced decision in these cases," although he says there were both situations in which he would condone and condemn doctor-assisted suicide.

Breen-Phillips sophomore Sheila Molineau spoke of her disagreement with Kervorkian's actions. "In diseases in which advancements are happening everyday such as AIDS, a cure could be found the day after a patient used Kervorkian's services." "Despite rapid advancements," Castellino concluded the conversation, "science cannot do the impossible. It can only accelerate what is possible."

International travel will now be covered under the Graduate Student Union travel grant fund. In order to facilitate this change and to distribute these more evenly among a greater number of people, the maximum possible amount allocated per trip will be lowered from $1,000 to $500. The lifetime cap will remain at $1000, the group decided at last night's meeting. In order to give the organization more stability, President Rita Santos suggested the creation of an ad-hoc GSU long range planning committee. Members of the committee will clarify the goals of the GSU and its sub-committees and will make budgetary recommendations in the council at the end of the year. They discussed the possibility of holding an event or compiling a publication "highlighting research and scholarship at Notre Dame" at the end of next semester and brought before the organization by Joe Manak of the Intellectual Life Committee. The group voted in favor of this idea.

On the role the Women's Resource Committee will take in the Notre Dame community was further clarified. We are "committed to empowering the center" but are also looking to be active in the community in additional ways," chairwoman Linda Chalk said.

In other business:
• GSU allocated resources again this year to help fund Common Sense. Common Sense was started by graduate students and has always been funded by the GSU.
• There will be a party for graduate students this Friday at 9 p.m. at Wilson Commons.
• Printing costs for the University are "way over budget", said Chairman of the Computing and Informational Services Committee Pat Sain. If costs were not reduced, the University will charge per page printed, according to Sain.
• There was an error in the e-mail account number published in this week's newsletter. The correct e-mail account is ngsu@nd.edu for the organization.
Clinton sends NAFTA to Hill

By TOM RAUM
Associated Press

WASHINGTON
After months of haggling and some last-minute modifications, President Clinton sent Congress the final version of legislation to put in force the North American Free Trade Agreement.

The bill was sent to Capitol Hill this week from Mexico and the United States reached agreement at 4 a.m. on new side deals designed to protect U.S. sugar, citrus and vegetable producers, administration officials said.

Even so, Clinton conceded he still lacks the votes for the pact — which would lower tariffs and other trade barriers among the United States, Mexico and Canada — but predicted he would when the House acts on Nov. 17.

"We don't have them today, but we're getting there," he said.

Congressional committees have already worked with the administration in shaping the final measure and the legislation cannot be amended further.

Officials said privately that Clinton still appears about 40 votes short — even with some of the 11th-hour sweeteners.

The new items — designed almost exclusively to woo undecided lawmakers — included help for businesses ranging from appliance manufacturers to broom makers to a $10 million authorization to build a trade study center in Texas.

The pact scheduled to go into effect Jan. 1 and be phased in over 15 years, would create the world's largest economic market, with 363 million people and a combined domestic product of $6.3 trillion.

Former Italian envoy to be subpoenaed

By MARCY GORDON
Associated Press

WASHINGTON
Italy's former ambassador to the United States — caught up in a corruption scandal — is expected to be subpoenaed by a House committee regarding U.S. aid to Iraq's Saddam Hussein channeled through a major Italian bank.

Rep. Henry Gonzalez, D-Texas, chairman of the House Banking Committee, plans to ask the panel members Thursday for permission to subpoena the former ambassador, Rinaldo Petrignani, and six others associated with the Banca Nazionale del Lavoro.

"Documents reveal that Petrignani asked (U.S. government) officials for "damage control" when it came to federal prosecutors' investigation of Banca Nazionale del Lavoro," Gonzalez said in a statement.

Gonzalez plans to ask Petrignani for details of his meetings with former attorney general Dick Thornburgh and other Bush administration officials, said a banking committee spokesman, who asked not to be identified by name.

BNL, which is owned by the Italian government, is one of that country's largest banks. In a politically charged fraud case, U.S. prosecutors accused its Atlanta Ga., office of funneling $5.5 billion in unauthorized loans to Iraq. Some of the loans allegedly were used to build up Saddam's military and nuclear arsenals in the years preceding the Gulf War.

Gonzalez wants Petrignani, who now practices law in Washington, and the others to testify at a committee hearing next Tuesday.

Stefano Ronca, press counselor at the Italian Embassy, said he believed the former ambassador is not in Washington. Recent statements by Petrignani pledging his cooperation indicate that he "soon will put himself at the disposal" of Italian authorities, Ronca said.

A U.S. government source, who spoke on condition of anonymity, also said Petrignani was expected to return voluntarily to Italy in response to the arrest warrant.

Diabetes blocked in mice, may aid humans

By MALCOLM RITTER
Associated Press

NEW YORK
Scientists have blocked the most severe form of diabetes by heading off a destructive mistake in the immune system of mice, a step that might lead to prevention in people.

Researchers had known that human Type I diabetes occurs when pancreas cells that produce insulin are attacked by the body's own immune system.

"We don't have them today, but we're getting there," he said.

Diabetes, or Type I diabetes, is an autoimmune disease. It is the most severe form of the disease. Scientists are pursuing several strategies to prevent it by suppressing the immune system attack.

The work is presented in Thursday's issue of the journal Nature.

One study was by Daniel Kaufman and colleagues at the University of California, Los Angeles. The other was by Roland Tisch, Dr. Hugh McDevitt and colleagues at the Stanford University Medical Center.

The researchers said the work suggested such treatments may be useful for developing Type I diabetes. But "there's a long way between now and then," McDevitt said.

When ND is not supposed to win, they perform at their best

Dear Editor:

I found the column by Viewpoint editor Rolando De Aquiar to be quite amusing. In it, Rolando boldly claims that the Florida State Seminoles are in the country. Also, FSU has dominated every opponent so far this year.

Three Seminole opponents he uses as examples of this schedule are Miami, Florida, and Notre Dame. Hey, Rolando. Take a close look at those three teams. Florida State has only played one of them. They've achieved their lofty status so far by beating the likes of Wake Duke, Kansas, and Georgia Tech.

Granted, Notre Dame's schedule this year has not been what has in the past, but good teams bulldoze through weaker opponents, as the Seminole and the Irish have done so far this year.

The major test for FSU this year was Miami, and they passed. However, if anyone watched the game, as Rolando obviously didn't, Miami played FSU toe to toe for all 60 minutes, proving to the world that the almighty Seminoles are indeed human.

I can't tell you who will win The Game, but, rest assured, Rolando, you give the Irish far less credit than they deserve.

I'm going to be a hell of a game. Count on it.

BRAD SHERIDAN
Senior
Zahm Hall

DOONESBURY

Hey, Babe, would you like to go to the game tonight? I heard there's going to be a whole lot of action.

No kidding! That's great! We'll have to make sure we get there early to get a good seat.

I'm looking forward to it. I can't wait to see the game.

Well, it's going to be a good game. I hope we can get there on time.

The ink of a scholar is more sacred than the blood of the martyr.

Ticket policy dumps' on students

Dear Editor,

I, like many others, decided to travel home over fall break. Being the nice person I am, I allowed the person next door to use my ticket and I.D. for the USC game. I did not take any money for them since it was a one game penalty and I was happy to discover that my friend, and got punished. I signed a contract stating that if my tickets were ever confiscated and for those games the booklets were returned with no penalty.

Finally, I even offered to stand my I.D. again, the hierarchy could kick me out of this school. No. After all this, I left grumbling about this.

Many things aggravate me about this. First, I was doing a favor for my friend, and got punished. I just figured everyone else was leaving for home and allowing friends to use tickets.

Second, I see each day at least one-hundred advertisement for students selling their tickets in the Observer. If the ticket department is so concerned with non-students getting into games, why don't they find these people who are advertising, bust down their doors, and take their tickets.

And one thing more: the Ticket Office should make the alumni and teachers sign their tickets and show their driver's licenses before entering the school. I constantly hear of teachers and alumni selling tickets for obscene amounts. Finally, and this is the on thing that upsets me the most, is something the woman at the ticket counter told me. She said for the all previous games, only around ten booklets were confiscated and for those games the booklets were returned but not the ones from this Florida State game. The woman's answer was that because about 100 booklets were taken this time.

Who cares? What did you people expect? It's no coincidence that 100 booklets were taken during fall break. Right? Why were people let off the hook before Florida State, the tickets could only be returned by paying $162. Why would tickets from previous games be returned but not the ones from the USC weekend? The woman's answer was that because about 100 booklets were taken this time.

I can't tell you who will win The Game, but, rest assured, Rolando, you give the Irish far less credit than they deserve.

When ND is not supposed to win, they perform at their best

I can't tell you who will win The Game, but, rest assured, Rolando, you give the Irish far less credit than they deserve.

Face off against the mighty Hurricanes, defending national champions. Does 31-30 ring a bell?

Furthermore, I present exhibit B: the 1990 Miami game. The much-maligned Irish defense was supposed to get burned for somewhere around 80 to 90 points and get embarrassed on national television and at home. I don't need to point out the score of that one.

I can't tell you who will win The Game, but, rest assured, Rolando, you give the Irish far less credit than they deserve.

There's going to be a hell of a game. Count on it.
Forget NCAA crown glory, let's store our treasures in heaven

Notre Dame has the reputation in a University with a higher ethical standard. Is this really so? Often we seem to forget our highest mission, in the golden excitement of autumn. It is so easy to ignore the higher things for the pursuit of gridiron glory.

Was it recruiting our Lord in mind when he sent his apostles into the hedges and under the secret police? This is listening? Think of the poor Haitian people la pse back into oblivion. I, Farrington, can be the protected from the cold by the light of Army television? Who? Why not put in prac- tion now, when the world is listening? Think of the poor people of Haiti, reduced to pauperism in the hope of outing the warlords. Must not we, as a Christian nation, do what we can show to the witch-doctors the folly of our ways? Haiti is the only republic in the world founded by slaves, and kept free for less many years by Haitian valor. Are we to let these people lapse back into utter misery?

Are we a Christian university, or an athletic one? Would we be willing to set aside its lucrative contest with Florida State it would send our cricketers overseas? Why not put in practice now, when the world is listening? Think of the poor people of Haiti, reduced to pauperism in the hope of outing the warlords. Must not we, as a Christian nation, do what we can show to the witch-doctors the folly of our ways? Haiti is the only republic in the world founded by slaves, and kept free for less many years by Haitian valor. Are we to let these people lapse back into utter misery?
South Bend sound of XYZ Affair

By MATT CARBONE
Assistant Writer

Among the racks of CDs at Tracks, not too far from Poul Jam's platinum-selling "Vs.," lies an album with a special Notre Dame connection and slightly fewer copies sold. It is the full-length, self-titled CD released by Notre Dame campus band XYZ Affair. XYZ's affinity for patrons of Bridge's and Senior Bar, is now in its fourth year of playing on and around campus.

The band is composed of three natives of South Bend, lead singer Todd Rozycki, guitarist Scott Gruszynski and bass guitarist Anton Rivera, and drummer Derrick Fluhme, who hail from South Bend.

Rozycki, Gruszynski and Rivera have been friends with each other since the sixth grade, and have been playing together as XYZ Affair since their freshman year at Saint Joseph High School.

Fluhme, in a scene early reminiscences of Spin Etal, is the band's fourth drummer in eight years, and has been playing with XYZ Affair for two years.

The personal tastes and influences of XYZ Affair are in a word, eclectic. Rivera and Rozycki list U2 and Rush among their influences, as does Gruszynski, who also shares a jazz background with Fluhme. Added to all of this is Fluhme's love of the "old classics" - glam rockers Kiss, Motley Crue and Def Leppard. Rozycki described the band's music as "strongly emotional - heavy metal meeting U2." Fluhme said that they play music that people will like, "but it still has some kick. I think we have the band with the most power - the other bands on campus are wimps."

"We are not grunge," said Gruszynski, "which is basically everything else out there today."

These varying styles are evident in the self-titled CD, which contains eight original songs composed by the band. Once the band had several originals written and rehearsed, they went into the studio. After four eight-hour days of recording, the final product, now on sale at Tracks, was complete.

"We challenge ourselves with our originals," said Gruszynski. "Fluhme has a simple 3-chord song, we make songs with a more technical complexity."

The music for all of the songs are composed by Rivera and Gruszynski, with all lyrics written by Rozycki.

Rozycki described the band's creative process in composing their music. "Scott Gruszynski and Anton [Rivera] come up with riffs that work. Then we start to jam as a band. After that, I structure the lyrics around the mood I get from the music."

Anyone who has seen the band perform at Bridge's, Senior Bar or at various Dillon Hall functions (Fluhme is a senior Dillonite, while Rivera and Gruszynski are former residents) knows that they are talented. "We are not grunge," said Gruszynski, "which is basically everything else out there today."

O’Neal signs autograph deal

Associated Press

ORLANDO

Shaquille O’Neal, perhaps the NBA’s most marketable player, added another aspect to his endorsement package Wednesday, giving exclusive rights to his autograph to Score Board Inc.

Score Board Inc., parent company of Classic Trading Cards, also received rights to produce memorabilia and collectibles bearing the likeness of the Orlando Magic center in its five-year agreement.

Terms of the deal were not disclosed, but O’Neal is believed to have received a small fee up front plus a percentage of the sales on merchandise.

The products include oversized trading cards, coins, medallions, comic books, kits, watches and a variety of other items.

The agreement also gives Hallmark Greeting Cards Co. the rights to produce greeting cards bearing O’Neal’s likeness.

The company is producing Christmas, birthday and announcement cards that will go on the market soon, according to Ken Goldin, executive vice president of Score Board.

“We believe this is the most far-reaching agreement of its kind,” Goldin said.

Holyfield vows not to make same mistake

By TIM DAHLBERG

LAS VEGAS

Evander Holyfield figures he threw 23 years of ring experience and a heavyweight championship away in a desperate attempt to knock Riddick Bowe out the first time they met.

He vows not to make the same mistake again Saturday night when the two return to the ring to fight for the heavyweight titles now held by Bowe.

“Just didn’t fight a smart fight and rely on my experience that time,” Holyfield said. “I went out there and forgot everything because I wanted to knock this man out.”

If the 31-year-old former champion is a year older since losing a unanimous decision and the heavyweight titles to Bowe last Nov. 13, he also claims to be a much wiser fighter than the one who tried to trade punches toe-to-toe with a man five years younger and 30 pounds heavier.

It was a strategy Holyfield thought would show the world he was a legitimate heavyweight champion, not a beefed-up cruiserweight who failed to impress the critics in the two years he held the title.

But it failed miserably when Bowe took advantage of his inside punching power to pummel Holyfield across the ring, knocking him down in the 11th round and sending him to his first loss in 29 pro fights.

“I fought with a lot of heart and courage but it wasn’t a thinking fight,” Holyfield said.

“It was the type of fight that excited fans, but it was not the type of fight I should have fought.”

Holyfield said he put pressure on himself to knock out Bowe, following criticism of his three title defenses against 40-something fighters George Foreman and Larry Holmes, and journeyman Bert Cooper.

Though the fights made him tens of millions of dollars, they didn’t get him the type of respect he was seeking as heavyweight champion.

“I wanted to go out there and impress myself but mostly impress the media, so I went for a sensational knockout,” Holyfield said. “I thought this was a way to silence everybody, by knocking out a guy that is bigger and younger and stranger.”

Holyfield and Bowe appeared at the final pre-fight press conference Wednesday, where the former champion predicted he would regain the crown Saturday night.

“It’s a promise, I will be the champion,” Holyfield said.

The Nevada State Athletic Commission, meanwhile, ruled that the fight would take place in a 20-foot ring, the same as the first bout. Bowe’s camp had asked for an 18-foot ring, while Holyfield’s countered with a 22-foot request.

“As long as I can get my hands on him, it doesn’t matter,” Bowe said.

Holyfield, who briefly retired after the first fight, said watching tapes of the loss convinced him that he could beat Bowe if he fought a smart, patient fight and stayed away from the middle of the ring.

He was further encouraged in his only fight since the loss, a 12-round decision over Alex Stewart in June that had fans boooing and fight observers unimpressed.

“The fans booed, but I wouldn’t let them draw me into a toe-to-toe exchange,” Holyfield said.
Tired of getting homework?  
Then give some!

N.D. and S.M.C. Seniors:  
Be teachers in the Southeastern United States!

Participants will discover:

1.) A challenging teaching experience in poor Catholic schools.
2.) Teacher training, professional development, and the opportunity for a masters in education.
3.) An opportunity for spiritual development.
4.) A communal living environment.
5.) A stipend, insurance, and a one year, renewable teaching contract.

There will be an information meeting on Thursday, Nov. 4, at 6:30 pm in the Notre Dame Room on the Second Floor of Labortune. If you are unable to attend or have any questions please contact either Fr. Tim Scully, CSC (1-7052) or Sean McGraw (257-9524).

Reds fill two holes with trade

By JOE KAY
AP Sport Writer

CINCINNATI
The Cincinnati Reds had three holes when the season ended: starting pitching, second base and third base. General manager Jim Bowden thinks he's taken care of the first two with one trade. He hopes the third area — third base — will take care of itself.

The Reds acquired a starting pitcher and second baseman on Tuesday night by sending pitcher Bobby Ayala and catcher Dan Wilson to Seattle for Erik Hanson and Bret Boone. Hanson, 28, becomes the club's No. 3 starter. Boone, 24, filled the gap left by second baseman Big Roberts' departure as a free agent.

The Reds gave up the best catcher in their farm system and an inconsistent young pitcher because there was no one in the organization ready to replace departed starter Tim Belcher or Roberts.

"We worked very hard on this deal," Bowden said Wednesday, after returning from the general managers' meeting in Florida. "There were six or seven we were working on. This deal was one that was on and off again several different times."

"We never added the third player they wanted. We just decided we were going to hold out or go in a different direction. Finally, they came back and agreed to the deal."

Maddux earns second Cy Young award

By BEN WALKER
Associated Press

NEW YORK
The best way for Greg Maddux to show the Atlanta Braves he was worth the big money was to win a second straight Cy Young Award.

And Maddux did just that Wednesday, joining Sandy Koufax as the only National Leaguers to win the honor in successive seasons.

Maddux was 20-10 with a major league-leading 2.36 ERA in his first season for Atlanta, and became the first pitcher to win the award in consecutive years with different teams. He went 20-11 with a 2.18 ERA in 1992 for the Chicago Cubs, then signed a five-year, $28 million free-agent contract with the Braves.

"You change teams and you want to make a good first impression," Maddux said. "I feel like I've done that... I didn't really change anything in the way I pitched. I pretty much tried to do the same things that have always worked in the past."

Maddux received 22 of the 28 first-place votes in balloting by the Baseball Writers Association of America. He easily outdistanced San Francisco's Bill Swift and John Burkett and Braves teammate Tom Glavine — all with more victories but higher ERAs.

"I am surprised," Maddux said from his home in Las Vegas. "I think the most important stat is games won..." Glav and Swift and Burkett all won more than I did."

No pitcher was named on all 28 ballots. Jack McDowell won the AL's Cy Young winner Tuesday and was the only pitcher listed on every ballot. Koufax won the award in 1965-66 with the Los Angeles Dodgers, when only one Cy Young was presented. Koufax also won in 1963.

"I don't consider myself to be half the pitcher he was," Maddux said. "But I think I still have six or seven or 10 years left."

Beginning in 1967, a winner in each league was selected. Since then, Roger Clemens in 1986-87, Jim Palmer and Tommy John have been repeat winners in the AL. The only other pitcher to win the award for different teams was Gaylord Perry — in 1972 with Cleveland and 1978 with San Diego.

Maddux, 27, is the top winner with 107 victories. He has won three straight Gold Gloves and has been one of the best hitting pitchers in baseball. He also is a good baserunner, as he showed this season when he dodged Pittsburgh catcher Don Slaught to score a run.

Maddux, just 7-8 a week before the All-Star break, won 13 of his last 15 decisions in leading the Braves' surge to their third straight NL West championship. The right-hander made 36 starts and pitched 267 innings, led the league with eight complete games and was third with 197 strikeouts.

"I don't really think about where I rank overall," Maddux said. "I'm sure some day I'll think about those things."

Maddux won his first start of the playoffs against Philadelphia, but lost Game 6 when the Phillies clinched the pennant. Maddux gave up five earned runs in 5 2-3 innings in that loss, although he was hit in the right leg by a line drive in the first inning and never got into a groove.

"I still have a lot to accomplish," Maddux said. "I still want to pitch in a World Series."

Maddux finished with 119 points in the voting. Swift, who was 21-8 with a 2.82 ERA, got two first-place votes and was second with 61 points. Glavine, who won the Cy Young in 1991 and was runner-up in 1992, was 22-6 with a 3.20 ERA. He got four first-place votes and had 49 points.

"I tried not to get too caught up in the competition stuff because I don't want to be rooting against my teammates," Maddux said. "But I think the fact that we're all competitive and try to outdo each other makes us each pitch better."

Burkett, 22-7 with a 3.65 ERA, got nine points. Jose Rijo of Cincinnati was fifth.

When Maddux signed with the Braves, he joined a rotation that already included Glavine, John Smoltz and Steve Avery.
Trailblazers look to erase last year’s disappointment

The Portland Trail Blazers, with Clyde Drexler healthy and reasonably happy and a new supporting cast of frencourt players, are looking to erase the disappointment of last season when the NBA opens Friday night.

Drexler put his contract differences aside until the end of the season to concentrate on the team following a troubled year in which he missed 33 games because of hamstring and knee problems. Drexler, coming off a season in which he was second to Michael Jordan in the 1992 MVP voting, averaged just 19.9 points last season, his lowest since 1985-86.

"He’s just much stronger and he doesn’t seem to have any effects at all from the problems he had last year," Portland coach Rick Adelman said.

Drexler’s health was a big factor in the Blazers’ disappointing finish. The team won 51 regular-season games but, with Drexler below form, was eliminated by San Antonio in the first round of the playoffs. In the previous three seasons, Portland advanced to the NBA Finals twice and the Western Conference finals three times.

The Blazers open their season Friday night at Los Angeles against the Clippers, one of the maximum number of 13 NBA games on opening night. Only the Seattle SuperSonics, who start their season Saturday against the Lakers, Charlotte, Minnesota at Detroit, New York at Denver and the Seattle SuperSonics, who start their season Saturday against the Lakers and Denver at Sacramento.

The playoffs, along with Drexler’s pre-season contract squabble, left veteran forward Buck Williams wondering whether management appreciates its veteran players.

"I don’t know where the other players stand, but I just don’t feel too attached at this point," Williams said. "I’ll go out and play as hard as I can and hopefully, at a given point in the season, things will turn around and I can feel that same family feeling I felt the first three years."

Despite his concerns, Williams, the heart of the Blazers’ defense, remains the team’s starting power forward. "We have to have Buck Williams on this team," Adelman said. "Hopefully we’ve added some guys who are going to take some pressure off him over the course of a long season, but when it comes down to it, he’s one of the guys you have to have on the floor."

The departure of Duckworth and the arrival of Dudley, whose strengths are defense and rebounding, have the Blazers hoping to run more this season.

"I think it’s going to be more exciting," said Cliff Robinson, who last season won the NBA Sixth Man award for his play off the bench at all three front-line positions. "We’ll be able to get up and down the floor more and really defend, and get back to the type of things that we’ve done in the past. Dudley’s weakness is on offense — in the pre-season, he shot 28 percent from the field and 58 percent from the free-throw line — while Grant was obtained for his shooting ability. He averaged 18.2 points for the Bullets last season.

"We can be a good shooting team at times, but it’s not something that’s going to be there night after night for us," Adelman said. "The defensive end, the ball movement and the player movement, that has to be there night after night."

For the seventh straight year, Drexler and Terry Porter will be Portland’s starting guards. Rod Strickland, who spent much of the season working on his outside shot, will come off the bench in a three-guard rotation.

The Portland Blazors' defense and rebounding, have the Blazers hoping to run more this season. The Clippers — Portland’s opening night opponent — made few offseason changes, but it wasn’t for lack of trying.

A deal that would have sent unhappy forward Kevin Duckworth to the Washington Bullets for forward Harvey Grant, then traded swingman Mario Elie to Houston to open a salary slot that allowed them to sign free agent center Chris Dudley.

The changes, along with Drexler’s pre-season contract squabble, left veteran forward Buck Williams wondering whether management appreciates its veteran players.

"Buck Williams believes some of the Trailblazers off-season moves showed a general disregard for veteran players from the Portland franchise."
Soccer

oral contests in a short period
of time. Berticelli feels con­
dent that his team will stay
focused. "They know they have to win
two games to make the
NCAA," said the coach. "We
have to take it one game at a
time."

The Irish last joined the
group of 32 elite teams in the
NCAA tournament in 1988. The
team, coached by Dennis
Grace, downed Saint Louis 2-0
to win the Midwest Regional
Conference tournament,
but lost to Southern
Methodist in the first round of
the NCAA tournament 2-0.

Berticelli last coached a team
in the tournament in 1989,
when Old Dominion, under his
command, took the Sun Belt
Conference title and a No. 19
ranking to Wake Forest, where
the Demon Deacons downed
the Monarchs 2-1. The Irish
have lost to Evansville in the
past two MGC tournaments.

Notre Dame will enter the
tournament having won seven
of their last eight games.

including six shutouts.
"We’re getting better every
time we play," said Berticelli.

The Irish defense has turned
their level of play up a notch
during the last month, allowing
only three opponents to score
in ten games in October.
Leading the defensive front will
be juniors Chris Dean, Dan
Whitley, freshman Brian
Engesser, and goalies Brett
Bader, who now holds the
record for career shutouts with
25.

The Irish midfielders will
need to make a substantial con­
tribution as well, as much of
the conference games were
won because of aggressive and
physical play when going for
loose balls.

“Our midfield hasn’t been
scoring as much as we want it
to, but we’ve been settling
ourselves," said Jason Fox.

“ar long as we win, that’s fine."

Fox, juniors Jean Joseph and
Kevin Adkisson, and senior
captain Mike Palmer will hope
to keep the ball in the opposing
end of the field to keep pres­
sure off Bader and the Irish
defense. The job of scoring
will rest on the shoulders of Lanza
and Oates, as it has all season.

and Oates, as it has all season.

CAMPUS MINISTRY...

...CONSIDERATIONS

The Centenary of the death of Fr. Sorin

Last Sunday, while little children all over America went trick or treating
at carefully selected and supervised locations, here at Notre Dame we
celebrated the centenary of the death of Father Edward F. Sorin, C.S.C.,
the founder of the University of Notre Dame and the second Superior
General of the Congregation of Holy Cross. On the occasion of this
special anniversary, Fr. William Beauchamp, C.S.C., Executive Vice
President of the University, offered a powerful presentation of the vision
and challenge of Fr. Sorin to the community gathered for Eucharist in
the Basilica of the Sacred Heart of Jesus, exactly one hundred years after
the Patriarch’s death.

Fr. Sorin came from France to America as a young man. His hope was
to offer faith and service to a struggling new world. Accompanied by
five young Holy Cross brothers, he carried the charge to start a school
in the prairie and to preach about the goodness of life when it is centered
on the truth and values of Jesus Christ. Fr. Sorin’s special personal
devotion was to Mary, the Mother of Jesus. In his sermon Fr. Beauchamp
reminded the worshippers of the picture of young Fr. Sorin and the five
Brothers arriving at the shore of the lake and he quoted from Sorin’s
reflections about that moment. “The first arrival on the spot now called
by the blessed name of Notre Dame du Lac, however severe upon
human delicacy, made on the newcomers an impression which time
never obliterate, a deep and unspotted covering of snow was then
spread over land and water and forcibly brought to their minds the
spotless Virgin, who seemed already to take possession of these premises,
and to claim the homage, not alone of the site itself but also of every
human soul that should ever breathe upon it. At that moment, one
most memorable to me, a special consecration was made to the Blessed
Mother of Jesus, not only of the Institution that was to be founded
there. A humble offering was presented to her of its modest origin and
its destiny, of its future trials and labors, its successes and its joys.”

Dedicated to its founding vision, the school slowly prospered, with more
students and faculty, more land and new buildings. Years later in his old
age, Sorin would be challenged again when he witnessed his school
nearly burnt to the ground in 1879. Summoning the community
to greater courage and commitment, the elderly Sorin again led the school
in a new act of faith, rebuilding what had been destroyed and topping
the Main Building with a statue of the Blessed Mother, "so everyone will
know why we have succeeded." In writing about this new construction,
he said, “We must bring upon these new foundations the richest blessings
of heaven, that the grand edifice we contemplate erecting, may remain

for ages to come, a monument to Catholicity. One thing is necessary,
never lay down deep in our hearts the foundations of a new spiritual
structure. In other words, we must humble ourselves before God for He
gives grace only to the humble. The magnitude of our undertaking
without anything like adequate means forces upon us a plain
acknowledgement of our complete dependence upon God’s mercy,
without which would simply be folly to look for any ultimate success.”

Fr. Beauchamp reminded last Sunday’s community, "That we who
follow in the footsteps of Father Sorin and the holy Cross Brothers who
arrived upon these hallowed grounds over 150 years ago, hold in trust
his dream, his commitment, his dedication, his faith." This modern
day administrator echoed the words of the founder when he prayed “that we
will never allow our pride or our successes to prevent us from
recognizing our total dependence upon God for all that we are and all
that we hope to be." Throughout the month of November, the Church
invites us to draw deeply from the spiritual richness of our past,
remembering the dead, and to be united with the great men and women
who have gone before us, having lived and died in the service of faith.
At Notre Dame such practice is our custom, and perhaps the only
guarantee of the blessing of our future.

Tom McDermott, C.S.C.

Associated Press

Despite leading the nation, Auburn's Terry Daniel was as obscure as most punters. Then along came Jackie Sherrill.

"Everywhere I go, they say, 'Hey Helium, how you doing?' and 'What's up Helium?'" Daniel said with a grin. "Even at our last game against Arkansas ... coach (Danny) Ford came up and said, 'Let me see that ball. Let me check it out.'"

Daniel, who grew up in the small east Alabama town of Valley, is reveling in the attention his punting has received. The Associated Press said he was the toughest part of their schedule.

"It was kind of a compliment," he said. "It was like, 'He's got to be doing something with those balls to kick like that.'"

Since then, newspapers around the country have conducted their own tests to determine if helium balls travel farther than those filled with just plain old air. Sports Illustrated even came to campus to conduct its own tongue-in-cheek experiment with Daniel and an Auburn physicist.

"I've enjoyed it," Daniel said. "I would like to thank Jackie Sherrill for making the accusation. He's kind of made me real popular overnight."

For SI, Daniel put two balls — one filled with helium, the other loaded with air — 10 times each. The helium ball had an average distance of 57.7 yards with a hang time of 4.66 seconds; the air ball went an average of 59.8 yards with a hang time of 4.93 seconds.

"Giving Jackie his best case — that the ball went an average of 59.8 yards with a hang time of 4.93 seconds."

The balls were confiscated and sent to the Southeastern Conference office. The verdict: Daniel has used nothing but air to lead the nation with a 48.3-yard average.

"It was kind of a compliment," he said. "It was like, 'He's got to be doing something with those balls to kick like that.'"

Daniel's success can probably be traced to his family tree. His grandfather was a punter. So was his father, who earned all-state honors at a Georgia high school. At 6-foot-1, 230 pounds, Daniel certainly has the size to be a top-notch punter.

"I think it's all hereditary," he said. "I remember when I was 8 years old, I entered this punt, pass and kick contest back in Valley. I won it because I was able to punt the ball 31 yards. I think I kicked it off the tee 10 yards and I threw it only 11 yards."

Daniel walked on at Alabama but never got a chance to play. So he transferred to Auburn, where he came out of nowhere last season to win the punting job and wound up 17th in the nation with a 42.6-yard average.

This season, he has been even longer. Daniel can recall only two bad punts — one for 35 yards, the other for 37 — in a game against Vanderbilt when he was ill.

"I had been sick all night the night before and all during the day before the game," he recalled. "I just had this weak feeling. The field was damp and wet and I think all those factors just caused a mental block."

Daniel has an outside shot to break Reggie Roby's record for best punting average in a season. Roby, now with the Washington Redskins, averaged 49.9 yards for Iowa in 1981.

With three games remaining, and figuring he will punt about 15 more times, Daniel would need to average around 53.7 yards to break Roby's record.

If he doesn't get it this year, there's always 1994 — if Daniel decides to return for his senior season.

Auburn's Daniel leads nation despite helium accusation

By PAUL NEWBERRY
Associated Press

AUBURN, Ala.

No. 8 Tigers. Sherrill did concede that everything he asked for an investigation.

"Everywhere I go, they say, 'Hey Helium, how you doing?' and 'What's up Helium?'" Daniel said with a grin. "Even at our last game against Arkansas ... coach (Danny) Ford came up and said, 'Let me see that ball. Let me check it out.'"

SUB: Crazy stuff and more!
NCAA tournament bid on the line for men's soccer

By MIKE NORBUT
Sports Writer

It's do or die time for the Irish.

The No. 22 Notre Dame men's soccer team cannot afford to look back now, as they begin their run for the national championship. The 11-2-2 Irish will vie for an NCAA tournament bid this weekend when they put their 5-1-3 Midwestern Collegiate Conference record and season championship on the line at the MCC tournament this weekend in Indianapolis, IN.

"Every game is like an NCAA tournament game," said Irish head coach Mike Berticelli, who said four Notre Dame players on the tournament's 11-seed list, "I'm hoping Butler wins," said midfield sophomore Justin Fox, who is one of four Notre Dame players to start in all 18 games so far this season. ""We have so much to play for against them.""

The Bulldogs handed the Irish a 4-2 loss in Notre Dame's home opener on September 10. Notre Dame played possibly its worst game of the season after defeating No. 20 Rutgers and winning the Metro Classic Classic a week before.

The Irish played at Xavier on October 8. The Irish were a bit flat, but they still outshot the Muskateers 15-10 in their 1-0 victory. Bill Lanza scored the game-winner with 6:28 to play in the first half and goalie Bert Bader had five saves in the shootout victory.

Irish rugby club talking as if this year is their year

By JENNY MARTEN
Senior Sports Writer

The members of the team are talking about this year as their year. Although they might sound a little like some other Irish athletes, the members of the Notre Dame Rugby Club are in a class all by themselves.

After a highly successful fall break, the Irish head into the round of 16 of the Midwest Finals for the fourth straight year this weekend. Notre Dame is the only team in the Midwest that can claim this record.

The finals in the Midwest are always competitive," said Rugby club president Mike McGowan. "We're glad to be there, but we're not happy yet."

Last weekend, the Irish hosted the first round of the Midwest Tournament and started with a 29-5 romp over Bowling Green in the first game. Dan Drew, Marty Bucaricano, Jim Ludwig and Matt Reintjes all scored tries for the Irish while Pat Blandford scored three points on a rare drop kick goal in the win. Bowling Green, traditionally one of the better teams in the Midwest, has become a big Irish rival in recent years.

Wisconsin-Southern's Point was the next victim of the rejuvenated Irish last weekend. In the championship game, the Irish jumped to a 27-0 halftime lead with tries from Reintjes, Matt Meko, and Blandford. Jamie Hill added points with two penalties. WSP came on strong in the second half cutting the deficit to 27-24, but the Irish held on for the victory.

The win propelled the Irish into the round of 16 in the nationwide tournament and earned the team a berth in the next round at Bowling Green State this weekend. Notre Dame plays the winner of the Penn State-Miami of Ohio game on Saturday for a chance to meet the winner of the Ohio State-Wisconsin-Madison game in the championships on Sunday. If the Irish win both games, they will advance to Final Four in the Spring.

Also over break, the current Irish team defeated the former players in the annual Alumni game.
