A general feeling of direction and cooperation emerged last night from a meeting of members of the Saint Mary's community concerning the future of an expanded service center at the College.

The group was defined as a Christian community of caring persons committed to living Gospel values concerned about others and ready to communicate openly. It is headed by Sister Rose Anne Schultz, vice president for mission at Saint Mary's.

Schultz organized the meeting to clarify the facts, perceptions, and assumptions surrounding the present service organization, SpeS Unica Resource and Volunteer Center (SURV), and the various proposals for an expanded center.

"I fully support the idea for an expanded service center because it also fulfills our mission," Schultz said.

An independent student proposal was presented to the Board of Governance (BGS) and College President William Hickey. The idea was spring called for an expanded service center consisting of new staff, positions, and activities including the Sisters of the Holy Cross, Saint Mary's, and expanded service opportunities for Saint Mary's students.

The proposal resulted in a meeting last spring between four students involved with the proposal and Hickey. "He (Hickey) spoke about the potential for office space," SURV coordinator Leslie McGill said. "He mentioned that he would appoint someone to head it over the summer."

Hickey appointed Schultz to head the investigation for an expanded service center; however, several parts of the Saint Mary's campus were present at last night's meeting to develop ways in which to work together most effectively.

The meeting is the first step in laying out the groundwork for the expanded center. Space needs, the functional differences between the current SURV and the expanded SURV, and the function of the independent student proposal were addressed.

I am concerned that the College needs to make a public commitment to it (the expanded SURV)," said Kelly O'Neill, a resident assistant in Farley.

"It is not better or worse. It is different," said Ed Delgado, a fourth year graduate student in its 20th year, the Journal of Management effective 1995.

Vecchio has been a frequent contributor to a variety of academic journals, including the "male-dominated Catholic religion." Vecchio has been a frequent contributor to a variety of academic journals, including the "male-dominated Catholic religion."
It's time to learn from our mistakes

The campus was shocked one year ago when one of our family was taken away, hit by a car on Douglas Road. As most know, a Notre Dame student named John Rita was indicted for drunk driving and hit-and-run. Most of the community also know that last Tuesday, John Rita found Rita not guilty of drunk driving and hung on the other count. The trial was a trying experience, especially for those who knew Marla well. With Edward Imbus at the heart of the Kozlowski trial, News Coop Editor feeling on-track and unlikely. I feel, only two things remain to be accomplished: to help and support those with such immense sadness on their faces to cope with their sorrow, and to learn from this tragic time to make sure that it never happens again.

Several people and organizations have parts in play in stopping accidents like these: The South Bend Police Department is responsible for making sure that their machine in test sobriety is operational and accurate at all time. The lesson here is simple: get the machine repaired, and do so with all due speed, as well as telling the truth whole by admitting to drinking three beers that fall, but a defective Intoxilizer cannot possibly be expected to give results beyond a reasonable doubt.

• The Notre Dame Security-Police Department is responsible for making sure that their machine to test sobriety is operational and accurate at all time. The lesson here is simple: get the machine repaired, and do so with all due speed, as well as telling the truth whole by admitting to drinking three beers that fall, but a defective Intoxilizer cannot possibly be expected to give results beyond a reasonable doubt.

• The Student Government of Notre Dame must broaden and publicize their services. In order to protect the majority group, the must broaden and publicize their services. I posed to protect us must make sure they can address the issue of graduate students driving drunk, and now.

• The students of Notre Dame must assume the responsibility to not put themselves in the position of driver. They ought to be reassured that their alcohol detecting device is functioning. The guilty belong in jail, and those supposed to assume that role must make sure they can fulfill their mission.

45 die in Philippine quake, fearful villagers flee tidal waves

CALAPAN, Philippines

Hundreds of people fled coastal villages of oats General Mills used to make Cheerios, Lucky Charms and other popular cereals. A US District Court jury found George Foggy guilty of one count of food adulteration, one count of misusing pesticides and 11 counts of mail fraud. The $55,319 in extra profits by billing General Mills for Reldan, according to the grand jury indictment. General Mills will not lose more than $140 million because of the unapproved pesticide. The company halted shipments in June of 50 million boxes of cereal made with the oats. The government said the pesticide

Beauty queen goes on trial for assault

LEWISBURG, W.Va.

Tracy Lippard, a statuesque blonde from Virginia, is being tried for the sexual assault of a basketball player. She is accused of two songs on stage. Then, with pistol, butcher knife and lighter fluid, the beauty queen drove 250 miles in an alleged mission to snuff out her romantic rival. The attempt in February was foiled by her target's father. Ed Weikle, a former Secret Service agent who put her in a headlock and wrestled her to the ground, police said. Lippard, a 23-year-old dentist's daughter with a dazzling smile, goes on trial Wednesday on attempted murder charges. Defense attorney Paul Detch says his client is innocent. He refused to elaborate and declined to allow Lippard to be interviewed. Lippard had asked to use the telephone and Weikle offered her a glass of water while they waited for the phone to be free, police said. Weikle led Lippard into the kitchen, where she pulled out the pulls and struck him twice in the head, the prosecutor said. "Although I hadn't been in that situation for 20 years, it didn't take long at all," said Weikle, 51. "I twisted her around and put her in a headlock. Police, however, said Scott was a "Don Juan" and Lippard his "blood-sugar girlfriend." Lippard had a "blow-out argument" 11 days before the attack, police said. Lippard faces up to 39 years in prison if convicted of all charges.

Democrat barely wins governorship

Baltimore

Parris Glendening won the governor's race by a paper-thin margin Tuesday after a weeklong count of absentee ballots, keeping the Democrats in power and lifting another Kennedy to elective office. His Republican opponent, Ellen Saurbrey, refused to concede. The 5,405 vote margin amounted to 0.11 percent of the more than 1.4 million votes cast. His lieutenant governor is Kathleen Kennedy Townsend, the eldest daughter of the late Sen. Robert Kennedy, a lawyer, she ran unsuccessfully for Congress in 1986. Gov. William Donald Schaefer, 63, was barred by law from seeking a third consecutive term.

In lieu of jail, Indian teens banished

More involvement with homeless planned

By PEGGY LENCZEWSKI
New Writer

The Saint Mary's Residence Hall Association (RHA) discussed becoming more involved with South Bend's Center for the Homeless last night.

"The Center for the Homeless in holding a Christmas Luncheon on December 1, at which different groups can purchase tables or seats for a fee.

All funds will go to the Center for the Homeless. Lou Holtz will be featured among the guest speakers at the luncheon.

RHA discussed purchasing an eight-seat table, and also discussed whether it would be better for the individual residence halls to purchase seats and tables.

According to RHA member Jennifer Farley, this luncheon represents a good way for the women of Saint Mary's to become more involved with the Center. Farley continued, "The Center has been there for six years; Notre Dame rents the building which houses the Center for a dollar a year. Despite the close ties with the university, "there are not many Saint Mary's interns for the center," said Farley. "The center feeds out of Notre Dame, Regina Hall will be holding its Center, the Recycling Committee is holding a Christmas Luncheon fundraiser to increase the awareness of the Center for the Homeless on the Saint Mary's campus because, according to Farley, "Saint Mary's should be as much a part of that community as Notre Dame is."

RHA also discussed the likelihood of beginning a recycling program. Because South Bend does not offer an accessible recycling program, RHA advisor Colette Holtz suggested that a Saint Mary's student who is also a resident of South Bend personally ask Mayor Joe Kernan, mayor of South Bend, when South Bend will begin a recycling program.

Recycling Committee Head Kim Fleming hopes to "get something rolling by Christmas, so a program will be fully implemented by next semester."

The Recycling Committee is currently researching its options outside of South Bend in order to draft a letter of petition "to the best source of funding," according to Fleming. RHA is currently organizing activities for Little Sibs weekend, which will be held the first weekend in February. Regina Hall will be holding its first SRF on Friday, December 2.

Reform for Russian science

By MARTHA MOYLAN
New Writer

The field of scientific education is undergoing rapid changes in Russia. Helen Kuznetsova, the coordinator of international studies at Perm University in Perm, Russia, told an audience at Saint Mary's Carroll Auditorium last night.

Kuznetsova said that Russian students are emphasized at an early age in Russian schools. Classes in chemistry and physics begin as early as fifth grade. Kuznetsova stated that Russia is proud of her science students, although there are many problems with financial backing.

Economic problems have caused laboratory and research budgets to nearly vanish, thus causing Russian scientists to leave for other countries to do their research. Despite these problems, however, Kuznetsova claimed to be "... optimistic that [Russia] will overcome her problems [in science] because of their good system of education."

According to Kuznetsova, students must attend eleven years of school beginning at ages six or seven. After passing exams in chemistry, physics, mathematics, literature, foreign language, and others, students can choose to find a job or continue their education in a technical school or university.

There are a series of compulsory exams that must be passed in order to enter any institution of higher learning, but there are no tuition or fees. Students are, however, charged with a fee for missing lectures.

Kuznetsova stated that life in Russia is "... difficult to describe because it changes every day."

Kuznetsova spoke in a lecture entitled "Life and Education in Russia 1994." The talk was sponsored by Saint Mary's College Center for Academic Innovation and the Departments of Chemistry and Physics.

Faith groups encouraged

By BRAD PRENDERGAST
Assistant News Editor

Sign-ups for Communities ND will begin November 28 and run through December 20, said Kate Barrett, director of religious education for Campus Ministry, at the Hall Presidents' Council meeting last night.

Open to all undergraduates, the organization consists of small groups of people who meet once every two weeks to discuss their faith, regardless of whether or not they are Catholic. According to Barrett, Communities ND offers students the opportunity to meet people as well. "We hope that the Communities become places where people can make good friends and establish relationships with both men and women," she said.

Communities ND began in January 1993 with nearly 200 students participating, and 200 more signed up the following year.

"Small faith communities are becoming more and more of a critical element of the Church across the United States and around the world," the most recent newsletter of the program said.

Communities ND kicks off every year with a Rally Day in mid-January. At the Rally Day, students meet with their groups and have their first community meeting. This year's Rally Day will be held Saturday, January 21, 1995.

The Communities, usually consisting of 8-10 men and women all of the same class year, meet for about an hour or two weekly.

The groups are entirely led by the students, who decide meeting times and lead the discussions.

Oh, how precious

Hope you had a great B-Day
Love, Peggy and Jen

They set a standard for discourse," said Ross. "What is particularly degrading is what they say about the collective group, and what they make us believe about ourselves," he added.
Ross has an understanding with his hall staff and hall council to ensure that comments regarding women and homosexuals and comments glorifying the use of alcohol do not appear in print.
"If I was on staff, I had to say this is not going to happen," he said. "It takes being vocal," said O'Neill. "If individuals sit back and laugh at such comments, if they do nothing, then they are not letting people know that there is a problem.
It is good to sit back and laugh at yourself, but there is a certain trust among friends that they are not going to share in wider venues, according to El-Ganzouri. "How can you trust that everyone does not think that way about women?" she asked.
When thinking about gender relations, Delgado said he questioned how to reach out to people who hold these views. "How are we reaching out? How do we get them to participate? Are we pushing them away?"
"The miscommunication and misunderstanding is coming from both sides," added Hungeling. He pointed to Farley Hall canceling its formal with Carroll Hall as an example of the miscommunication on campus.
An entire dorm should not be indicted because of the actions of one man, stated a Carroll Hall resident.

Homeless man beaten mistakenly by police
by Richard Cole
Associated Press
SAN FRANCISCO
A homeless man shot while struggling with a crazed gun­
man shouted a warning to ar­
viving officers, only to be shot
later by police who mistook
him for a suspect, he said
Tuesday.
"The officer put his foot on my
throat — he kept grinding my
face into the concrete," said
Robert Pinckney, pointing to
about 20 stitches.
"I told him, 'I'm not the sus­
p ect, I'm the victim."' They just
told me to shut up." The real
gu a n, a drifter named Vic Lee Bou twell, was killed by police Sunday after a 25-minute shootout during which he killed a police officer and wounded another police­
man, Pinckney and a para­
medic. He fired an estimated 100 rounds from an assault rifle and three automatic pis­
tols.
Pinckney was taken to San Francisco General Hospital to undergo surgery.
Officer Howard Weatherby, a police spokesman, said the de­
partment could not comment because the case was under inves­
tigation. For a while Sunday, police thought there were two gun­
men. Pinckney, 35, said he was about to have a beer with a friend when he heard shots and ran around a corner, where he saw Boutwell.
"I actually went up and asked him if he was OK because I was hearing pops, pops, and I want­
ed to know if he was the vic­
tim," Pinckney said Tuesday
from his hospital bed. Boutwell asked Pinckney and his friend to help move a per­
son from one car to the other, but when Pinckney looked in the vehicle, he saw only belts and clips of ammunition. Boutwell ordered him to move it and pulled out a gun. Pinckney's friend ran.
"I struggled with him with the 45 — it hit the ground and then I started to turn," Pinckney said. "I saw the muzz­
le of a rifle and that's when he hit me in the leg.
Boutwell ducked between two parked cars only a few feet from Boutwell. "He didn't say nothing. He just started shooting off the weapons," Pinckney said. "I could hear him loading and un­
loading his weapons. I kept praying, 'Hey, police, take this guy out'."
He said he tried to warn the first officer to arrive, James Gallard, who was shot to death.
"I told him, 'Watch out, he's got guns,'" Pinckney said.
"Later on I could hear this meowing down the street. I guess it was him".
As Pinckney looked out from between the car, he took another bullet to the arm.
When the shooting finally ended, Pinckney said he screamed for help, but in the dark, officers thought he was a suspect. He was handcuffed and pushed face down on the pavement, which was strewn with glass.
The arm wound may have caused nerve damage and Pinckney needs more surgery before it can be determined if he'll walk normally.

Scientists working on the frontiers of gene therapy have come up with a possible strategy for repairing the damage of heart attacks by transforming useless scar tissue into healthy muscle.

The approach — outlined Tuesday at a meeting of the American Heart Association — is still untested, but it is one of many or more ways in development to cure heart trouble by regulating the body's genes.

Some of these strategies are moving rapidly from lab animals to people. Experts predict some of them will be tried on heart patients within a year or two.

There has been tremendous progress in this approach in just two years. The roadblocks that stand in the way have been identified," said Dr. R. Sanders Williams of the University of Texas Southwestern Medical Center in Dallas.

More than 40 reports on gene therapy are being presented at this week's heart meeting.

One of the more creative strategies was outlined by Dr. Laurence Kedes of the University of California, Los Angeles. About six years ago, scientists discovered a gene called My D that can turn almost any cell in the body into a muscle cell.

Working with dogs and rats, Kedes transferred this gene into scar tissue that forms when a heart attack kills heart muscle. He found that the gene indeed transformed some of this tissue into muscle cells.

When these cells will actually work like normal heart muscle remains to be seen, however.

The cells made so far are skeletal muscle, not heart muscle, and Kedes is unsure whether it will conduct electricity and beat like the muscle it is meant to replace.

Until these hurdles can be worked out, Kedes said, "this is far removed from potential human application."

The form of gene therapy that is probably closest to human use is intended to overcome one of the greatest shortcomings of cardiology — the failure of angioplasty.

More than 300,000 Americans undergo this procedure annually, which involves inflating a balloon to open clogged heart arteries. However, the arteries close shut again within a few months in about 40 percent of patients. 

One way to improve this is to speed the rate at which the arteries can grow back to give drug and other chemicals access to damaged sections of the heart.

Doctors have identified a gene that can turn off muscle growth in animals, and use it to test the idea that such a gene might stop arteries from getting clogged after angioplasty.

"There are many hurdles in this, but this is a start," Kedes said.

In any case, gene therapy offers the potential to produce new muscle cells in the spot damaged by heart attack, said an official who, which doctors say could undo the dead and dying muscle in a single year, involve temporarily progr -amming these muscle cells to divide and grow.

Clinton pledges free trade

By JEFFREY HOFFMAN
Associated Press

Talking free trade is easy, makes good headlines and bears no price tag. Working out the details of market-opening agreements that help boost American exports is likely to prove far more difficult.

President Clinton and Asian leaders, concluding a summit of the 18-member Asia-Pacific Economic Cooperation forum in Jakarta, pledged on Tuesday to eliminate all barriers to commerce among Pacific Rim nations by 2020. That would create the world's largest free-trade area and make NAFTA look puny.

APEC — a loose grouping of nations ranging from economic behemoths like the United States and Japan to newly industrialized Taiwan to impoverished Papua New Guinea — accounts for 40 percent of the world's population, over half of Asia's trade and one-fourth of global trade.

For the United States, anything less is a grand-American access to the region's vibrant markets is a plus. China is growing 10 percent a year and new nations are booming.
Reynolds asks Irish parliament for peace

By ROBERT BARR
Associated Press

DUBLIN
Prime Minister Albert Reynolds pleaded Tuesday for his government's life, urging lawmakers not to jeopardize a historic chance to achieve peace in Northern Ireland.

The government's fate will be decided Wednesday when Reynolds' coalition partners vote on whether to withdraw from the 2-year-old coalition with the prime minister's Fianna Fail party.

In a speech to parliament on Tuesday, Reynolds said the governing coalition should not be allowed to founder after attaining the biggest achievement in Northern Ireland in a quarter-century - the IRA's Sept. 1 truce.

"I believe the national interest requires continuity at this time," he said in a speech to the Dail, the lower house of parliament, broadcast nationwide on radio and television.

"In particular, it is my profound conviction that we have to give the fragile Northern peace process the best possible chance of permanent consolidation.

Reynolds said it would be "a great pity if a government that is achieving rapid economic progress, that has achieved the biggest breakthrough in Northern Ireland in over 25 years, and that has a fine legislative program, should be placed in jeopardy over misunderstandings surrounding a single judicial appointment."

The coalition crisis developed over Reynolds' appointment of a conservative, Attorney General Harry Whelan, as president of the high court. The alliance of the two major party leaders and four other parties in the Labor Party, who walked out of a Cabinet meeting on Friday, leading an opposition party to propose a no-confidence vote.

If the Labor Party doesn't back Reynolds in Wednesday's vote, Ireland could face national elections, or a scramble to form a new government with other parties.

Whelan was criticized for not extraditing a priest charged with sexually abusing children. For seven months, Whelan's office took no action on the request from Northern Ireland for the Rev. Brennan Smyth, accused of molesting children for more than 20 years.

Smyth returned voluntarily to Northern Ireland last year, where he was convicted and is serving a four-year sentence. Reynolds admitted that the attorney general's office had failed badly in not responding to the extradition request. But he said Whelan was not personally responsible for the failure and defended Whelan's appointment to the senior judicial post.

Croatian government and NATO officials met Tuesday to discuss a possible air response to Croatian Serb interference in Bosnia. NATO should have "full measures," he told the Vecernje Milovanovic, in charge of the Bosnian assault, shrugged off any NATO threat.

"We are ready for a NATO air strike," he told the Vecernje Novosti daily in Belgrade, Yugoslavia. "We have already prepared a proper response for everyone, including NATO. ... Personally, I think that the safe areas no longer exist." Spencer said a possible U.N. radio 11 people were killed and 26 wounded in Bosnian government forces in the Bihac region on Monday.

Croatian government and NATO forces in the Bihac region were fighting for control of the Grabze plateau, high ground northwest of Bihac city.

Bosnian Serb Milovanovic, a U.N. spokesman, said close-range fighting was not spilling off the plateau into government-held territory that has been declared a safe area by the United Nations.

"It is unclear who actually is ahead of the game up there at the moment," he said. "There's quite a heavy fighting going on ... We can't get close to it.

Spicer said there was no indication government forces were retreating, although previous

The Notre Dame Science Quarterly is interested in publishing student papers dealing with topics of current scientific interest. We are looking for well-documented research presentations that contain some visual aids. If you think you would like to contribute a piece, be advised that the deadline for submissions for this semester's issue is Friday, November 18. Papers should be in Microsoft Word format. A disk and a hard copy may be left in the NDSQ mailbox in the Physics Department of the NDSQ office, 238 NSH.

A Notre Dame Science Quarterly staff is being formed.

All students interested in working closely with our journal should leave their name and number with the current editor - William Lorie, 631-5757. Also, Juniors in the College of Science who wish to put their managerial skills and creativity to work as editors of the NDSQ should submit a letter demonstrating their interest and qualifications for this position to either of the addresses above no later than Tuesday, November 22. Publication experience a plus but not a requirement.

Please speak to or leave a message for William at the NDSQ office if you have any questions about either matter.

If you see news happening, call The Observer 631-5323

NATO has launched air strikes on Bosnian Serb targets five times because of violations involving U.N.-declared "safe areas" or attacks on U.N. personnel. The alliance wants to extend its mandate, currently limited to Bosnia, to cover shelling from Croatian Serb land into Bosnia.

Risley said NATO and Croatian officials discussed the "immediate extension of close air support" to Croatian-held areas held by Serbs. Close air support can include air strikes.

"We would like to see NATO have the ability to respond by full means to surbs (cross-border) attacks, should they occur," Risley said in Sarajevo.

Bosnian Serb Gen. Manojlo Milovanovic, in charge of the Bosnian Serb forces, shrugged off any NATO threat.

"We are ready for a NATO air strike," he told the Vecernje Novosti daily in Belgrade, Yugoslavia. "We have already prepared a proper response for everyone, including NATO. ... Personally I think that the safe areas no longer exist."

NATO reports said Bosnian Serb forces had regained most of the territory taken by government troops in a recent offensive. Bosnian army sources and U.N. reports obtained by The Associated Press indicated government forces still maintained key defense positions.

Alja Izetbegovic, Bosnia's Muslim president, was quoted by state radio Tuesday as expressing confidence his troops could hold out.

The land terrain stands between the government forces and Bihac city, which the U.N. says the government is still in control.

Letters to the Editor

'Letters to a Lonely God' may ask the impossible

Christian forgiveness and American justice don't mix

Dear Editor:

Upon reading Father Robert Griffin's column "Letters to a Lonely God," we agree with his point that it is important for the Notre Dame community to offer forgiveness to John Rita. However, we are disappointed that Father Griffin fails to acknowledge that John Rita needs to take responsibility for his actions.

John Rita testified under oath that all he recalls saying as he sat on his bed after the accident was that whatever happened, he was going to take responsibility. I have since been trying to forgive John Rita for his actions, but I am unable to do so. I believe that he needs to take responsibility for his actions in order to move on from this tragedy.

The Observer is the student newspaper published by the students of the University of Notre Dame and Saint Mary's College. Its aim is not to reflect the politics of the administration of either institution. The paper is intended to be an accurate and objective as possible. Unpaid editorial opinions are the opinions of the majority of the Editors-in-Chief, Managing Editor, News Editors, Viewpoint Editor, Accent Editor, Sports Editor, and Saint Mary's Editor. Correspondence letters and inside columns present the views of the members, and are necessary those of The Observer. Vortex opinion is available to all members of the Notre Dame/Saint Mary's community and to all students. The free expression of varying opinions is encouraged.

Letters to the Editor are welcomed and will be published on a space-available basis. All letters should be signed and will be printed with the writer's name and college. Letters should be limited to 250 words. The Accent/Saint Mary's News/Photo Office: 631-5323. The Accent/Saint Mary's News/Photo Office: 631-4542. Business Office: 631-5313. Mr. Bob: You're not being fair. I'm SURE municipalities work too hard for their money. It's not their fault they have the difficult task of trying to make ends meet.

SURE. I'M THE ONE IN DEBT AND YOU'RE FEEDING MY FIRE!

Garry Trudea

Quote of the Day

"Life is not being hrad that the man has just waxed the floor."
Oleana brings home alumnahome

By PATTI CARSON
Saint Mary’s Accent Editor

She is talented. She is brilliant. Today, she is a successful producer. But she was not always so. She was just like us—a Saint Mary’s College student majoring in Jewish Culture and minor in English. But now she is back. Now, she is a producer and an accomplished story of the Notre Dame and Saint Mary’s Community.

She is Peggy Hill Rosenkranz, producer of tonight’s production of Oleanna. Rosenkranz, class of 1961, said that Saint Mary’s instilled in her a new confidence after graduating from the college from a underprivileged background at the age of 17.

Her father, with whom Rosenkranz was especially close, passed away when she was 12-years-old. Her mother struggled to make ends meet. Rosenkranz rose above her difficult economic situation and earned a scholarship to Saint Mary’s. The students were “warm, welcoming,” and supported, Rosenkranz said.

A boost in confidence came from the academic experience Rosenkranz received at Saint Mary’s. She said that she felt “unique,” but that is now comparable to today’s Harvard University program. She said that her major enabled her to participate in conversations of all kinds on campus.

During her years at Saint Mary’s, Rosenkranz loved the theatre, but she pursued a different career instead. Rosenkranz attended the Fordham School of Law and worked as a lawyer for several years.

She credits upon the birth of her first child at which time she became active in producing. One of the groups with which Rosenkranz is affiliated is the Fordham University Cultural Commission of Southampton, decided to produce the revival of “Fally’s Folly,” and the rest is history.

“Now one can be a producer who is free of heart,” Rosenkranz said. What draws her to producing the type of play she has chosen is the controversial and puzzling performances. “If the play is important, then it should live,” she said.

If Rosenkranz sees a type of play she believes in, she then pursues it. This is why she is not especially drawn to light comedies. She prefers not only on critical or controversial topics.

What is her favorite part of producing? She likes choosing a project and doing the groundwork and making the decisions. She enjoys “music and wonderful play” and saying “I believe in this,” then tackling it.

So what are those of us with secret or even prominent ambitions like Rosenkranz to do? What should we do at this point in our lives? “If you’re absolutely driven to do a specific thing, then do it,” she said. Rosenkranz said that if she is passionate about their goal, then they should pursue it.

Otherwise, students should choose a more direct and functional career path and pursue their talents or hobbies on the side, Rosenkranz suggested. Perhaps the time will make students grow deeper in their interest for their hobby and later they can pursue it further.

Rosenkranz gives this same advice to her two grown children. Nicholas is currently a 23-year-old Yale graduate working in New York. Stephanie, an 18-year-old sophomore at Kenyon College, is studying English.

Tonight, Rosenkranz will be available to talk with the audience after the performance will be outstanding. The audience’s dilemma arises from this conflict in the script as Carol’s character becomes much more aggressive in Act II. It is not clear whether John’s actions constitute harassment. According to the play’s revisions, what is necessary is Carol’s political correctness into issues, complicating the question it doesn’t answer.

Since past productions have left audience divided, producer Peggy Hill Rosenkranz, a Saint Mary’s alumna, will join the actors after the production for discussion with the audience.

“It will be a way for patrons to air their concerns about the play and the presentation,” said Patti Valentino, Saint Mary’s Director of Public Relations.

In an attempt to shed some light on some of Oleanna’s complications, the discussion, “Oleanna: Hard Knocks or Just Desserts,” will involve questions about the hard-to-delineate harassment and the way political correctness can confuse the issue of untreated sexual harassment.

Friday, fall 1994 Saint Mary’s Shannon Executive Scholar, is an attorney who has turned to the stage to concentrate on productions that involve timely and controversial social issues. Her New York Off-Broadway credits include Jelly’s Last Jam, Marvin's Room, and Raft of the Medusa.

Tickets are still available for $18 for adults, $15 for senior citizens and $8 for Saint Mary’s and Notre Dame students.

The O’Laughlin box office is open from 9 a.m. to 5 p.m.

AUBURN, Ala. — Auburn's is down right tough when anything goes wrong, as if it has a right to be in possession of its enforcement winning streak.

"Have we lost a game?" defensive coordinator John Hayes asked with an icy glaze. "Has anybody ever been able to beat us?"

"I think if that streak was confidence into national championship, nothing would make Petrullic happen."

Unless someone shows him a good Italian restaurant in Portland.

If it ain't over 'til it's over, the fact is: Aubn's 20-game wining streak is over. It ended last Saturday in a 23-23 tie against a mediocre Georgia team.

When Walker wasn't in a state of denial, it quickly became apparent he was still ran<br>
Eugene, Ore.

Watching his Oregon teammate upset Southern Cal with him seven weeks ago, Danny O'Neil decided it was time to give up the role of quarterback.

"I was trying to be the offense earlier in the year, thinking I had to perform for us to win," O'Neil said. "Then when I saw us win at USC with me out, I thought I really didn't need to be the hero each week. I'm just letting it happen."

And what a happening it's been. Oregon has won five in a row to climb to No. 12 in the national rankings, its highest since 1964.

A victory Saturday at Oregon State will clinch the Ducks' first Rose Bowl appearance in 37 years.

Oregon and O'Neil seemed headed nowhere three games into this season. The Ducks were 1-2 and the losses, to Hawaii and Utah, were ugly. Although Oregon did come back to beat Iowa, O'Neil was far off the form of his junior season in 1993, when he threw for a school-record 3,224 yards and 32 touchdowns.

To make matters worse, he came down with an infected finger and missed the game at Southern Cal.

Backup Tony Graziani led the Ducks to a stunning 22-7 upset, their first victory over the Trojans in Los Angeles since 1971. That game looms large in Oregon and Southern Cal both from 7-1 in the Pac-10, Oregon will go to

On Tuesday, he was solid again.

When O'Neil was supposed to sit out the Washington State game, but had to play when Graziani was injured and wound up throwing 17 straight incompletions in a 21-7 loss.

The next week, he was solid in a 23-7 victory over Cal.

But the fans still boosed the four-year starter at every opportunity, labeling him the quarterback who couldn't come through in the clutch, who had never brought a team from behind in the second half. Then came the upsets over Washington and Arizona, when O'Neil rallied the Ducks on consecutive weekends.

He completed all four passes on a 98-yard scoring drive that put Oregon ahead for good against Washington and passed 15 yards to Josh Wilcox for the only touchdown in the 10-9 win over Arizona.

Still, most of the attention went to Oregon's "Gang Green" defense, and the offense noticed.

Erickson to be more open to pro pitches
By Steven wine

the new group dedicated to bringing great activities that don't center around alcohol to our wonderful students, will be hosting a fun, exciting night of Flip Side Western Dancing for the members of the ND/SMC community next Friday night at one of the area's finest facilities. (It's off campus, so it's better than Stepan.) We will be meeting at the Library Circle at 6:00 this Friday, November 18. Upon our arrival, we'll first get a quick lesson; then we'll be unleashed upon the other patrons of this establishment.

Erickson was merely reiterating a remark he made in August, but his latest comments nonetheless are likely to fuel speculation, because he and Florida Gators coach Steve Spurrier reportedly lead the NFL expansion Carolina Panthers' wish list.

The 47-year-old Erickson's future was the primary topic at his weekly news conference. He spent 10 minutes answering questions about speculation that he'll jump to the NFL.

"It's something I've heard since I've been here," said senior quarterback Frank Costa, who listened to the news conference. "This is probably the most serious he's talked about it."
Michigan finds new fab five

By HARRY ATKINS
Associated Press

EAST LANSING, Mich.
The members of the Michigan State basketball team have a good feeling about this year. It goes beyond the fact that star guard Shawn Respert decided to hold off becoming an NBA millionaire for a year and it runs deeper than the emotional fact that this will be coach Jud Heathcote's 19th and final season with the Spartans.

It's a bedrock feeling that they have a chance to be a very good team this year. The Spartans, who open with an exhibition Thursday night against the Polish National Team, are ranked No. 20 in the AP preseason poll.

Heathcote, who usually downplays his team's chances, admits that with Respert back for his senior year, the Spartans have a good shot at the Big Ten title.

"It's not how good you are on paper," Heathcote said. "It's how good you play on the court."

The players want to win a title for the coach.

"He's going to go out a winner," vowed Respert, who's hoping for a stellar season to boost his stock in next year's National Basketball Association draft.

Respert said the Spartans have a chance to be one of the top teams in the country and knowing that, they worked harder than ever before in the offseason.

And it's not just all for Heathcote.

"I've been here four years and I haven't got me a title," said Respert, who ranked No. 2 in the Big Ten in scoring last season with 24.2 points a game. Respert said he'll keep shooting, but he's going to do more on defense.

"I don't think I lacked the skill, it's more a question of a lack ofurgency to apply it," he said with a chuckle.

Along with the Big Ten title, the win in East Lansing has his eyes on the league scoring championship and the No. 1 spot on Michigan State's all-time scoring list. He is sixth with 1,815 points. NBA star Steve Smith has the top spot with 2,263.

Lyons looks for right combination

By MICHAEL DAY

Juvenile Writer

Bradshaw to Swann.
Montana to Rice.
Marrion to Clayton.
Byrd to Layden.

Heading into Sunday's title game against Off-Campus, Lyons' lethal tandem of quarterback Julie Byrd and receiver Jenny Layden has emerged as Interhall football's version of that season.

The tandem's improvement since the season opener can be traced to an increase in experience and to the confidence the duo has gained over the eight game season.

"I am able to anticipate where Jenny is going to be," said Byrd. "After playing together all year, we are definitely on the same wavelength."

Layden added, "We complement each other well. We've learned how each other plays. That's the big thing."

Both athletes credit the play of the offensive line for their role in helping the team reach the finals. The unit consists of Suzanne Adams, Kristin Hargrove, Heather Broering, and Lisa Novak.

"The line doesn't receive the recognition, but they have had a great year," said Layden. "We wouldn't be in the finals if it wasn't for them."

While Layden, Byrd, and the line compose one of Interhall's strongest offenses, the defense has been equally dominating this season.

Lineemen Susan Barnidge and Christy Blakley, cornerback Maureen Hill, and linebackers Angie Fister and Mary O'Shangnessy lead a unit that has recorded two consecutive shutouts in the playoffs.

"The defense has been absolutely incredible," said Byrd. "They have prevented teams from scoring inside the 5-yard line. They just have been a dominant force this season."

The Lyons coaching staff, consisting of Kevin Kuwik, Andy Brant, Jim Mullen, and Kevin Klau, has also had a significant role in the team's success this year. The group has committed their time and provided leadership from the first practice to this week's preparations for Off Campus.

"They have inspired us to play our best," said Byrd. "They have been very dedicated to the team. We wouldn't be where we are without the help of the coaches."

The league's best passing tandem. An intimidating defense. One of dorm football's most dedicated coaching staffs. Lyons hopes these three ingredients will combine to spell an Interhall title on Sunday.

Women's Basketball

Irish women top Australian team

By K.C. GOYER Sports Writer

The Australian National Team came a long way to play against the Fighting Irish last night, but did not get far. After five minutes of play, the Irish were trailing 10-7. That's when sophomore Jeanne Augustine got into the game and her team never looked back. The turnaround was led by Kathryn Gaither as the Irish continued for sixteen unanswered points. The half ended with the score at Notre Dame 40, Australian Institute 28.

In the second half, Beth Morgan's MVP, combined with strong performances of the bench to clinch the win.

"One of our strengths is our depth," Coach Muffet McGraw said, "our bench played really well.

Rossane Bohman led the team in points, coming off the bench to score thirteen inside the paint. The freshmen showed impressive poise in their first collegiate contest. Rookie Moille Pierick started the game and the season right by sinking her first shot and the team's first basket thirty seconds after tip off. Total dam­ages at the buzzer were Notre Dame 84, Australia 65.

The Australian Institute played full court press on most of the game, allowing Notre Dame to work on breaking a press.

Foul trouble emerged in the second half as four players racked up five fouls each. Although Bohman fouled out for the Irish.

"We need to work on defense," McGraw said, "and not fouling.

Each of our players has problems," Holtz concluded Tuesday.

Oklahoma City

For the past 45 years, when college basketball coaches have needed to schedule preseason games they’ve dialed up Glen Sergeant.

Known simply as Serge, he is the man behind the Marathon Oil team that plays exhibitions against colleges across the country. Working out of his home studio, he sets up a phone bill of $6,000-$8,000 per year talking to coaches who want to schedule a game, or with players wanting to play.

This year he has three teams running nationwide to give college coaches an indication of where their teams need to improve.

"We went 8-0 in the Big East last year," said Sergeant, who

seemingly can talk forever. "At the Big East meetings when they said that they got kicked by Sarge, it was immediately unanimous that they wanted to play us again. Those kind of people, they want to come in and give 'em a heck of a ball game."

Marathon Oil, which is no longer affiliated with the oil company but uses the name with the company's permission, is part of a bustling business. About ten domestic teams such as Athletes in Action, Good Samaritan and High Five America, along with an increasing number of foreign teams make the rounds each November in gyms throughout the country.

It’s a win-win situation for both sides.

The coaches need something other than practice sessions to gauge their teams. The foreign teams love the idea of visiting the United States for three weeks or so. The players on teams such as Marathon or High Five America or Oklahoma City-based Conoco have a chance to earn a few extra bucks and keep their names alive in basketball circles.

Conoco coach Gary Vick said some players can make close to $1,000 per week playing for traveling teams. "Most guys are going to make $100 a game, it’s not a bad expense."

For many, the chance to get a shot with a team overseas makes it worth the time.

"I’ve been overseas 48 times with this team in the last 15 years and made a lot of contacts," Sergeant said, "I went to France one year with nine guys and my wife, and came home with my wife. The rest got jobs.

The Irish have battled through the players. They have gained valuable experiences and have stepped up in the conference tournament. The team looks stronger than ever.

"We came back and won the conference and got into the NCAA tournament," Berticelli said. "We’ve got two of them now."

Of the three preseason goals, now there is only one left—the Final Four.

College Basketball

Exhibition teams lead long seasons

By OWEN CANFIELD Associate Press

Winconsin-Green Bay. But through it all the team never quit.

"I never had a game where I was frustrated, and I don't think I didn't try," Berticelli said. "The team hung in there during the difficult times. We reinforced the benefits of mistakes, but they’ve given the Irish one-hundred percent. I have tremendous respect for this young team.

From these times of frustration and bad luck the Irish have not only developed as soccer players, but as people."

"How you deal with adversity makes you better," Berticelli explained. "Soccer is like life. In soccer you set goals, in soccer you score them. You expect an easy one, but it doesn’t always happen that way."

Football

The fearless leader of the Irish defense will miss the last home game of his career. Notre Dame captain Justin Goheen, the team's second leading tackler from his inside linebacker position, suffered a rotator cuff injury in last week's game against Florida State. The senior will not be available to play in this weekend's game against the Air Force Academy.

Justin Goheen will miss this football game," Irish coach Lou Holtz said at his weekly press conference Tuesday. "I have no idea when Justin will be back. Certainly we'll miss him."

Inserted in Goheen's place at inside linebacker will be sophomore Lyron Cobbins, who has recorded 24 tackles so far this year.

Holtz also named Renaldo Wynn (foot), Shawn Wooden (back), and Alon Maiden (foot) as questionable for Saturday's contest. Wynn and Wooden have been starters for most of the year, while Maiden has seen a substantial amount of time on the defensive line this year.

On a brighter note for the Irish, seniors Lee Becton and Ray Zellars will start together in the backfield for the first time since the Purdue game. This will hopefully rekindle a spark that the Irish running game has missed.

And it will be needed to beat an improved Falcon defense.

"The difference between this year's Air Force team and those of the past is their defense," Holtz said. "They are giving up only 100 yards a game rushing, and they are very, very quick."

Almost as quick as the Air Force offense, which is averaging 30.4 points scored a game, and orchestrating a 40-23 upset over No. 12 Utah last week.

The Falcons have not lost since the third week of the season.

"The Air Force team was down for the couple of years that we didn't play them," Holtz...
