The Notre Dame chapter of Habitat for Humanity hopes to break ground this spring with the foundation for a house in the town of South Bend. The campus of the university has only just recently been cleared of this semester's first barometery. and already a group of students are looking forward to warmer climates for the recipients of their charitable home building efforts. It is not the buildings of Cancun or a house on the coast, be it east or west, that binds their anticipation.

On the contrary, Habitat for Humanity participants' plans are selfless when held up to these material views. Habitat for Humanity is an international organization that describes itself as "an ecumenical grass-roots ministry with the goal of eliminating poverty housing." The organization relies on volunteer labors and materials as well as monetary donations to accomplish their projects.

According to a brochure published by the St. Joseph County chapter of Habitat for Humanity, "[t]he typical Habitat family has an income too high to qualify for some assistance but too low for conventional home financing."

The tenants of Habitat housing accept the responsibility of repaying the cost of the house over a fixed period of time. These ideas are then relayed into a rotating fund for future houses. No interest is needed capital, Habitat for Humanity still plans to dig the foundation for the house as soon as the ground is broken.

How many "Ginsus come with that?"

There is nothing on TV again. That is, of course, nothing except for that rotten pasta maker infomercial that you've watched enough to know you'd call the stupid 1-900 number if you could just get the free bagel maker. Heck, if anything deserves its own infomercial, it's the bagel maker. And you know the poor victim that buys the pasta maker with its four easy installments of $29.95 and will look once when after it will spend the rest of its useless life delegated to the back of the top shelf of the refrigerator. It'll spend the rest of its useless life installments of $29.95 using it once where the box once sat. That is, of course, what's so great when Susan Sommers used it. That is, of course, the castles distinctive Gothic style, but with a "modern reinterpretation." The Royal Institute of British Architects, which had argued for the monarchy to abandon the past, reiterated Tuesday that "It would have been happy for us to have some contemporary design incorporated." Prince Charles, whose aversion to most modern architecture has been publicly bemoaned, and his father, Prince Philip, presided over the restoration commission, which considered six submissions by invited architects. John Tillman, in charge of the overall reconstruction at the castle less than an hour's drive from Buckingham Palace, said the $64 million project was to be completed by the spring of 1998. Under Downes' plans, there will be a new octagon-shaped ante-room, built on the site of the Private Chapel. Eight wooden columns, each carrying a box of 25 curry powders shaped like a giant plant, form the vault. The room will be lit by a roof lantern reminiscent of a Tiffany lamps. A New Private Chapel, on the site of the former Holbein Room, also has vaulted ceilings. The old Stuart Room will be used for a new exhibition, St. George's Hall, where the Knights of the Garter, Britain's oldest order of chivalry, traditionally will be restored to its original appearance.

Rushians shell Chechen positions

GROZNY, Russia

Russian troops unleashed fierce artillery barrages again on Chechen positions even while Chechen President said no more Russian POWs would be released unless a cease-fire was signed. From their positions near Grozny's railway station, the Russians let loose an all-night barrage on the southern part of the city with artillery launchers and mortars. The Chechens could only long for a truce. "I wish I had a sniper's rifle," said one rebel fighter, Magomed Abdrakhmanov, after sneaking behind Russian lines to harass enemy positions. "I could have cracked them in the nose."

Spain shocked by assassination

More Americans are undergoing organ transplants and living years to tell about it, says a report that examined survival rates at transplant hospitals. The 2,700-page report, released Tuesday by the United Network for Organ Sharing and Department of Health and Human Services, looked at organ transplants performed between 1987 and 1991. More than 50 percent of hospitals that perform transplants met or exceeded the national average in patient survival and the success of the transplant itself. The message: "Patients can receive a transplant safely anywhere in the country," said Dr. Margaret Allen.

Chaplains

Roman Catholic bishops from Germany and Poland acknowledged on Tuesday the guilt of Christians who had not resisted the Nazi extermination of Jews. Their admission came in statements commemorating the liberation of the Auschwitz death camp 50 years ago. President Clinton, meanwhile, has named write Elie Wiesel, the Nobel Peace laureate who survived Auschwitz, to represent him at ceremonies in Poland marking the anniversaries of the World Jewish Congress called the "one of the most prominent Jews has been upset by what they consider bungled Polish government planning of the event. The statements from the Catholic bishops were remarkable given the criticism of Christian behavior during the Holocaust is still rare from church leaders in Poland and Germany.
Student Activities’ workshop to help with gender relations

HPC announces dating seminar

By BRAD PRENDERGAST News Writer

Having trouble making your relationships work? Student Activities is sponsoring a Creative Dating Workshop on Monday where over 250

"Even though men and women rely on the bar scene, alcohol, movies, expensive dinners and sex as their most prevalent dating options, it doesn’t — and shouldn’t have to be that way," the release stated.

Advice on topics such as how to make a good first impression and how to date creatively on a limited budget will also be given.

"The whole idea is to get people to talk," Kimes said. "The night should be fun, entertaining, and informative."

The workshop, a ten-year old national program, has been conducted on over 150 college campuses, according to a press release.

its premise is that people tend to become mired in the same dating routines.

Speakers share views during Women's Week

By BECKY MAYERNIK
News Writer

As part of Women's Week at Saint Mary's, a discussion on "Women Seekers" was held last evening in Stapleton Lounge. Gail McEwen Elfrig, Stephanie Paulsell, and Pamela Corpron Parker were invited to Saint Mary's to share their stories of their experiences examining their own spirituality as women, and that carrying into the scholarly world.

Elfrig is a senior faculty mentor of the Lilly Fellow Program at Valparaiso University, while Paulsell and Parker are both fellows of the program. The Lilly Fellow program involves a two year post doctorate fellowship which encourages young scholars to excel both academically and spiritually.

The discussion focused on women seeking spiritual, mental, and intellectual development, as the three women shared their own stories of the powerful forces that pushed them to decide to attend graduate school and enter into each of their vocations.

Paulsell discussed how she decided to study the works of medieval women writers. "I wanted to look at how the people around me and their lives changed the world, and how their ideas of what kind of scholar and woman I wanted to be," she said.

She also stated how she eventually obtained her licensed ordination, which she fell into accidentally. She explained how her close friend was interested in having Paulsell perform her wedding ceremony, which was the start of her interest in ministry.

"This is a vocation that I would not have developed an interest in had I not been close to them. I loved so much," stated Paulsell. "I found myself in the position of doing ministry, and from there I discovered it."

"I felt that women were final­ly beginning to be in lite ra ry

history at this time. She explained to the group that this
to her life, as she would not have de­veloped this love if not for the situation she was in at the time.

"Success in anything has a lot
to do with persistence and dis­cipline and someone else in your life to give you the push," stated Parker.

"It's amazing how many

vocations came about by acci­dent, that it's almost as if it is all part of God's plan," stated Paulsell professor of Humanistic Studies at Saint Mary's.

The small group in attend­ance discussed the way in which the people surrounding us influence our lives and how often times we are led to things that we could never imagine ourselves doing.

Elfrig discussed the im­portance in her own life of attend­ing an all women's school and the students in attendance were encouraged to join in with their own experiences.

Although the environment of a Catholic Women's College is sometimes said to be unlike the real world, a member of the group stated, one can develop her values and learn to handle herself well in this type of a sit­uation and will therefore han­dle herself in any type of situa­tion.

According to Elfrig, what one wanted in life often doesn't come to young women naturally, as it usually takes a push by some­one close to them into the vocation meant for them.

committee, and each had the opportunity to meet with several

committee leaders. But after the extensive process, no can­didate emerged as acceptable to both the search Committee and then University President Father Theodore Hesburgh. In an interview yesterday, Malloy said he thinks this committee can avoid similar cir­cumstances.

"We're never going to find the perfect person for the job," said Malloy, "but I have great confidence that we will find the best person for the University at this time.

As a result of the impasse in the last search, the Academic Council recommended that the University president chair the search committee. Malloy thinks the current structure of the committee will facilitate the recommendation process.

"I believe that our process...as presently con­ceived meets or exceeds our peer standard for faculty consultation," he told the facul­ty. Malloy reached that conclu­sion after examining the provost searches of Rice, Stanford, Vanderbilt, Duke, and California-Berkeley.

The search committee will re­ceive and consider nominations for provost from the University's faculty and other sources. With this process is complete, Father Malloy will consult with the elected faculty members of the council con­cerning all serious candidates. He then will report the com­plete results to the search and consultations to the Provost's Board of Trustees, along with a personal recommendation. It is the responsibility of the trustees to elect the new provost.

O'Meara who originally agreed to a four year term in 1978, will step down as provost June 30, 1996, at age 68. He will remain on the faculty at Notre Dame as provost-emeriti­tus and Kenna professor of mathematics until 1998.

While no definite time table has been set, the search com­mittee has eighteen months in which to make a recommenda­tion. Malloy hopes to give a rec­ommendation to the Board of Trustees well before that time.

He anticipates that the commit­tee will begin its work in less than two weeks.

"The position of provost is a difficult job with multiple responsibilities. Our job is to do our very best to find the best person for the job," said Malloy.

UN needs criteria for intervention

By JENNIFER GIOVA
News Writer

The broad and complex spectrum of intervening in a sovereign state's domestic conflicts was the topic of a lecture given by Professor Stanley Hoffmann last evening.

Hoffmann states that individuals have a right to live in a state of their choice and it is this de-colonization which in turn increases state's sovereignty.

Increased sovereignty can have led to several long term trends in intervention including economic interdependence and self-interest intervention.

In addition, Hoffmann presented several short term trends including an increase in sovereignty and a right to democratic governments and fundamental human rights.

These often present a challenge to the current system of deciding if a foreign force should intervene.

Hoffmann claims that while it is sometimes wrong to intervene, non-intervention may be even worse, politically or morally. Either way, chaos or political upheaval may result.

The UN appears to lack consistency when it comes time to decide on issues of intervention.

Hoffmann states that there are major obstacles to intervention, including a gap between ethics and the law, a lack of definitions of key criteria, and a dilemma on the ethics of execution of intervention.

One reason for the problems and difficulties of humanitarian intervention is the absence of an impartial agency to determine which "grave injustices" should not be allowed.

Maxims need to be established in concrete terms which are enforceable.

Hoffmann states that the UN establish some general criteria explaining restrictions on intervention and when it is justified.

For more information, contact the Observer's staff photographer:

Professor Stanley Hoffman lectures on the complexity of humanitarian intervention yesterday evening.

Dole builds campaign team for presidential bid

Associated Press

WASHINGTON Senate Majority Leader Bob Dole filled two senior jobs in his nascent 1996 presidential campaign Tuesday, bringing in a long-time confidant as chief strategist and a senior Republican Party official as campaign manager.

William B. Lacy was named deputy campaign chairman; Scott Reed was appointed campaign manager.

Lacy was a senior aide in Dole's 1988 presidential effort and prior to that served as White House political director in 1985-86. Last year, he managed the successful Senate campaign of Tennessee Republican Fred Thompson.

Reed is currently executive director of the Republican National Committee and was a leading architect of the party's successful 1994 campaign strategy.

He worked in Jack Kemp's 1988 presidential campaign, and later served as Kemp's chief of staff at the Department of Housing and Urban Development.

In a statement, Dole said Lacy will be the campaign's principal strategist and Reed will manage campaign operations.

“Our goal is to give Americans the kind of leadership we need to retain in the federal government at home and reassure our interests abroad,” Dole said in a statement.

Earlier this month, Dole, of Kansas, formed a presidential exploratory committee to raise money. A formal campaign announcement is expected in late March or early April.

Phelps in 2004?

Associated Press

"South Bend, Ind. Former Notre Dame basketball coach Digger Phelps admits a presidential bid is "far fetched," but said he wants to get the attention of politicians who are not doing enough for children.

In an interview last week with the Phoenix (Ariz.) Journal, Phelps said he was "angling for 2004" and wanted "to teach the country." But Phelps said he just meant that he wants to get Americans working as a team to combat problems facing young people.

Phelps said he is frustrated that President Clinton has cut back on the Operation Weed and Seed program. That program, which Phelps worked on during the Bush administration, removes drugs and crime from neighborhoods and replaces them with things to improve the economic and social climate.

### University of Notre Dame
#### Summer Session 1995 Course List

The 1995 summer session will begin Monday, June 19 (enrollment), and end Wednesday, August 2 (final exams). Some courses — primarily in science, mathematics and languages — will begin and end before us after these dates. The summer session Bulletin will contain complete schedule information. The Bulletin will be available at the Summer Session Office (312 Main Building) beginning Friday, February 10.

Notre Dame continuing students — undergraduate and graduate students in residence during the spring semester of 1995 who are eligible to return in the fall — must use DART to register for summer courses and 2 add or drop courses through Friday, June 23. The DART PIN (personal identification number) for summer will be sent to all continuing students in early March. Course call numbers, along with all other course information, will be published in the summer session Bulletin.

Air Force officer and son rescued after nine days in snow

By ZEYNEP ALEMĐAR
Associated Press

ANKARA, Turkey

They heard the helicopters overhead but rescuers couldn't see them. In the cave where they had sought shelter from a blizzard, the Air Force officer and his 10-year-old son ate snow and tried to survive.

A day went by. Then another. And another.

After six nights in a freezing wilderness, Lt. Col. Michael Ronald Couillard summoned his last energy and skied out for help. It would be two agonizing nights before he would see his son again.

Couillard told his story Tuesday, when he and Matthew were rescued nine days after they became lost in a snowstorm while on a Boy Scout ski outing.

Couillard, a graduate of an Air Force survival course, decided Sunday the weather was good enough to try to find help. After about an hour and a half, he came across what looked like a village, he said in a statement from the U.S. Air Force.

It turned out to be an abandoned state forestry camp.

Couillard holed up in an unheated cottage, where he discovered some uncooked macaroni and sugar cubes left behind.

Two days later, woodcutters found the 37-year-old officer there, weak but still conscious.

"I started yelling when I heard some people near the cottage and finally they saw me," Couillard said from the hospital in footage shown on private Turkish TV.

Couillard was "very weak" but managed in broken Turkish to describe the location of the cave where he left his son, a forestry official, Yusel Gul, told the Anatolia news agency.

"Their reunion was a touching scene," Gul said.

Although the colonel left some of his clothes for his son to keep warm during his absence, it was apparently not sufficient.

"It was cold, I was hungry," the boy said on private Turkish TV.

The survivors' first meal in nine days was a typical Turkish breakfast — tea, bread, butter and jam. "The little boy kept repeating, 'Thank you,'" Gul said.

The father and son were taken to a hospital in Bolu, near the ski resort, 70 miles north of Ankara.

They were later flown by U.S. military plane to the Turkish air base at Incirlik, where the United States has a military hospital.

As they got into the ambulance in Bolu bound for the airport, Couillard was heard saying they ate snow to survive.

Fraud

ience, and "parents (sic) information." While not accusing this business of disreputable behaviour, as they have had no contact with it previously, Russo stated that "the Financial Aid Office has had experience with such organizations in the past, and are typically very suspect." The return given from such searches, according to Russo, are usually small or unusable by students, and not worth the fees charged.

Attempts to reach the Academic Financial Program and Marianne Robertson, the company's Financial Assistance Director, who signed the mailing, were unsuccessful.

It was just a summer job.
Now it's the rest of your life.

Remember when your biggest career concern was running out of paper cups? And when it was easy to handle any summer job because it was just a summer job?

Now you're graduating. You want a career that will challenge you every day and offer a variety of responsibilities. You want to work where the learning curve doesn't flatten out after a couple of years.

At Andersen Consulting, our challenges change daily, like the world in which we work. Our job is to help clients do what they do. Only better.

Come talk to us about a career with Andersen Consulting.

Andersen Consulting is an equal opportunity employer.

Andersen Consulting will be conducting both full time and summer intern interviews on February 6. Please see Career and Placement Services for details.

Let's rethink trade with China

Dear Editor,

Over the past several years, economists and political figures have been promoting the great economic liberalizations in the People's Republic of China and how it is the world's growth market for the next generation with over one billion consumers wanting the same kinds of goods and services that we have been having for half a century. It certainly does not appear that these experts have paid too much attention to the fact that these same experts have been complaining for half a century that the People's Republic of China and Japan are achieving the same levels of economic development as the United States and that the US is facing a trade deficit with both countries. The US has been having too much of these same types of goods and services being produced in the Far East while the US is consuming them and not manufacturing the same types of goods.

Our monthly trade deficit with Beijing is now more than one billion dollars. A few short years ago, before the Chinese market began to "open up" significantly, the monthly deficit was only a few hundred million, but it seems that increasing our trade with China mainly means purchasing an ever greater flood of cheap Chinese goods.

Evidence of this flood is everywhere. Nearly every cheap toy or stuffed animal one picks up in a store these days bears the "Made in China" label. The mention of large numbers of low-end electronic goods as well coffee cups, sneakers, and unrelated types of goods. Given US trade history with other East Asian nations such as Japan, Korea, Taiwan etc. this trade deficit is not only expected to get worse.

The reasons for this huge deficit are primarily China's closed market and its continued flaunting of international labor laws and regulatory laws. Following Japan's model, China has erected a complex series of visible and invisible barriers to foreign trade and they are achieving the same levels of success that Japan has enjoyed for the past two decades. Wages in China are absurdly low and the working conditions at most of its factories are deplorable and below the standards set by the I.L.F. These are besides China's notorious use of its political prisoners and other dubiously jailed persons to make many of the items that you find in stores across America. US corporations routinely lose over one billion dollars a year to Chinese pirating of US intellectual rights such as movies, CDs, and computer software.

Factories across China produce these goods by the millions with companies such as Disney, Microsoft and IBM being denied their royalties. Pirated video tapes are especially bad. Many of these are "camera copies" where someone stands in a movie theater with a video camera and tapes the movie. Sometimes on these you can't hear the dialogue because of noise from the audience.

President Clinton has recently threatened sanctions against Chinese goods if China does not begin to respect US intellectual property rights, but if our history of negotiations with Japan is any guide, China will make a few meaningless concessions at the last minute, Clinton will champion it as a major triumph and then everything will go back to business as usual. Then we can do this again in a few years when intellectual losses are costing us two or three times the current amount.

Some US companies have been successful in China in recent years, setting up factories and offices, but these haven't led to a major boom of US exports to China. On the contrary, many of these US factories in China have been shipping goods back to the US. President Clinton chose to ignore all of these facts when he renewed China's Most Favored Nation status last year, claiming it was in our national economic interests. I don't see how a burgeoning multi billion dollar deficit can be in our interest and it seems that our increase in trade with China has been decidedly one way.

Pro-life campaign needs new angle

Dear Editor,

This week marks 22 years of abortion on demand in the United States. For those of us who believe that all human beings should have the same rights, regardless of stage of development, that's 22 years too many. As such it's my duty to speak out, particularly to those who are most responsible for keeping abortion legal. Now there's n't much I can do about the Supreme Court. If they want to legislate their personal, political views from the bench, my objection isn't going to stop them. Nevertheless, pro-abortion groups and the media (usually these two groups are one and the same) have their minds made up.

So, let's see, who else is helping to convince thousands of undecided Americans that abortion should be legal? Let's face it. It's not pretty to hear, but all in the pro-life movement has probably done more to sway the American public in favor of abortion than any other group, save the media.

As such, I'd like to take this space to make a few suggestions:

• Put down the religion thing. Sure you get some people with this argument, but for every one you get, you lose three.
• Remember that basic biology, not theology, is behind your support of unborn children.
• Try to understand why people support abortion. You're likely to find that their support of abortion is based upon their perception of why pro-lifers oppose abortion.
• Try to understand that most of the American public is never going to be an activist on either side of the abortion debate. Nevertheless, it is important that we speak to these people, their opinions still count.
• Remember to speak to your audience. Your audience is those who are undecided about abortion, not pro- or anti-abortion.
• Try to come up with some phrases that sound good and summarize your arguments. The pro-abortion forces have a million of them. Couldn't the pro-life movement come up with at least a few?

In short, I believe the pro-life side has been dealt a winning hand in the abortion debate. I really hate to see them throw it away.

Mistaken identity creates bad credit rating

Kirsten Dunne

Last July I received word from Society National Bank of Ohio that I was ineligible for financial aid, the reason for which I had applied, the Law Access Loan. As I had received this loan the past two years with no problem, I was perplexed. I was not made aware of this loan at the end and in fact would cause in-adequately, this is a hasty judgment, shoddy by this theory, as I learned the hard way this past summer.

ND Hoops needs your support

Dear Editor:

This letter is in reference to the attitude of the student body at the University at Notre Dame toward basketball games. In two words: it stinks. For the first time in 15 years we fielded a competitive squad with a winning record, and the sad thing is, few seem to care.

Case in point, the Xavier game on Saturday. Although the arena was almost packed, and the team played extremely well in their victory over the 12-2 Musketeers, the majority of the game was played in utter silence. Unbelievably, there were occasions when the imitation of Xavier faithful drowned out the lethargic Irish fans.

As a Notre Dame fan, I think it should have been heading to the locker room while listening to a standing ovation. Instead, they trotted off to a half-filled stadium of lackadaisical fans whose cheering rivaled that of a soccer match. This is ridiculous, and the team should have been given a lot of credit for playing so well in front of their so-called home fans.

It is obvious that the Irish do not play with the flair of North Carolina or Kentucky, but it is also obvious that their heart and desire to win rivals that of any team.

Patriots are people, too

Dear Editor:

I received a letter this week from a close friend (Colonel Alfred Davis) who graduated from that other Catholic college in Boston. In his letter he was reminiscing about his career in the Corps and indicated that the highlight of his career was his last assignment. He was a Joint Task Force Commander sent to Rwanda with a simple mission: "stop as much death and suffering as possible."

It was the "toughest" assignment of his career. He told me that he felt he had made a difference but was not completely successful due to events and situations totally out of his control. Colonel Davis' command was responsible for reducing the weekly civilian death rate in the UN mission from SEVEN HUNDRED to yet he still felt that he had partially failed.

This story is only one of numerous examples concerning the U.S. Armed Forces (past and present) in which good, dedicated, and professional Catholic service members have not been allowed to serve their nation, but society as well, with much honor, and distinction, always displaying Catholic values.

I find Josh Zoryczak's article "more cannesy on campus" on December 8, 1994, outra-
By JENNIFER LEWIS and PATTI CARSON

As winter finally sets in and classes start at full speed, it is hard to imagine making plans for the summer, especially if those plans are in a foreign country. Yet, within the next couple of weeks the Notre Dame Council for International Business Development (NDCIBD) will be interviewing numerous council members to fill seventy international internship spots around the globe, with jobs starting as early as May.

Last year, the NDCIBD sent forty-five students to countries such as Poland, Russia, Honduras, London, Ireland, Lithuania and Estonia. According to two-year internship veteran, Mary Massey, the NDCIBD is more than just internships, but service oriented projects that take place throughout the entire year.

"The program's mission statement is helping create more global awareness at Notre Dame and Saint Mary's," Massey said. "Global awareness is of concentration for NDCIBD as it is responsible for hosting visitors, with over four hundred issues, educating students about other cultures, and creating panels for discussions."

Consisting of seven divisions, the NDCIBD members are encouraged to meet with one or more of the divisions on a weekly basis. The NDCIBD membership is not restricted to just business majors, in fact NDCIBD members invite all majors to join and eventually apply for a summer internship.

"We really encourage students from all different majors to get involved," Massey said. "Because there are many opportunities for people with different educational backgrounds to learn and teach others."

Massey's first internship was in Krakow, Poland, teaching English to University students. She stayed for four days, "It was very strange, during the same month I came off of finals and then got in five o'clock class and started teaching myself," Massey said.

I did a lot more than I originally planned. I ended up writing client reports for a consortium of firms.

Notre Dame Council of International Business Development (NDCIBD) member, Jerry Peters, traveled through out northern China while working with a small consulting firm; just another program arranged by NDCIBD.

Dillon Hall Senior Jose Yanes is another student who took advantage of the offered programs. He worked in Moscow, Russia for three months in the summer of 1993 and for six weeks in the summer of 1994. Yanes worked 30 to 40 hours a week for a private engineering firm.

Yanes said that he went to Russia partly to take advantage of such a great opportunity (working abroad) and partly because some of his family members come from Russia.

He expressed that the experience was a great opportunity. "It is such a different way of life in Russia," Yanes said. "You learn how to cope with what would seem in the United States to be a disaster, for example, in Russia, blackouts and transportation, especially in the winter."

As far as culture goes, the main thing Yanes noticed was a "look of hardship" on the faces of the older generations. "You could tell that they had been through a lot," he said.

Yanes talked only with his "home front family" every two or three weeks. "When I first arrived, a lot came to the phone," Yanes said as he often had to wait on a call. "Since I was calling Mexico and since Russia only has about 24 lines about, I had no choice but to go through the operator," he added.

Yanes spoke optimistically about the trips to Moscow, but if he had to change one thing he might have asked for more proficient in the Russian language before he went to Russia. "At first.

"Before I left, I only knew a few basic words. I picked the rest up on the job and on the street," Yanes said. "My main worry before I left was whether or not I would find the place I was supposed to work on the first day since I was not fluent in Russian," he added. But his supervisor pre-arranged everything and Yanes' worries dissolved.

"I definitely encourage students to take advantage of the opportunity to work abroad. It's a great experience," he said.

Not only can students learn more about their majors, they also complete an exercise in independence, to lean and adjust and adapt to a new culture, a new culture, complete with a new language and different social norms. It only seems to serve as a strengthening experience for the students.

NDCIBD is currently in the selection process of placing council members for the summer '95 international internship programs. According to Carrigan, there have been over seventy students interested. "If interested in learning more about the council or in becoming a member, please feel free to contact the council office at 631-9044."

"The council hands students the business programs, designed on an eight to nine week program, deal with large companies such as Microsoft, Waterford Crystal, Johnson and Johnson, Honeywell, and GE Consult. However, the majority of internships are with smaller firms.

"Students get a unique experience from smaller firms because they observe the with her companies' forty clients. During her interview she would ask questions such as how is our product meeting your needs, and how can we improve it? She would then write back to her project teams on systems for how the ideal changes the company would need to make for desired improvements.

"My main task was serving as a liaison between our Western and American clients and the Russians I worked with," McCullough said. "My job was to communicate to our clients, the difficulties the Russians faced in meeting with our clients, as well as explaining to my Russian colleagues Western Customer Service what our clients naturally expected."

"Many times I would meet American students traveling and they would ask me to go with them to the bars and disco-tech. However, it was more important for me to go back to the family and learn the language," McCullough commented.

McCullough during her stay, lived with a host family consisting of a host mother and a host brother of twenty-eight. "It broke my heart to leave them," McCullough said. "Every time the phone would ring, I would still call them on the phone once a month."

Kerrigan interned in yet another business program in Brussels, working for a political consulting group, Market Access Europe. In his five week span he learned about how the company, focused on regulations, monitored political trends, and lobbied the European union.

According to Kerrigan, he would put in ten to twelve hours a day largely by his own choice, because he found his work extremely interesting. "You could tell by his job was a run a trail, and thanks to his success there will be another internship this summer for twelve weeks."

"I did a lot more than I originally planned," Kerrigan said. "I ended up writing client reports for a consortium of US banks, international financial regulating, and financing of the European union budgets."

"I really came away from Europe with a better perspective on macro trends and a ton of independence," Kerrigan said.

"My main task was serving as a liaison between the Russian Men, who were learning to sell our programs. By February 13, NDCIBD will have placed over seventy students interested. If interested in learning more about the council or in becoming a member, please feel free to contact the council office at 631-9044."

"It's a great experience."
Hoosiers’ home rule ends at 50 games

By HANK LOWENKRON
Associated Press

BLOOMINGTON, Ind.

Indiana lost at home for the first time in nearly four years Tuesday night as Michigan defeated the Hoosiers 65-52, ending the nation’s longest current home winning streak at 50 all times.

Freshman Maco Banton came off the bench to record season-highs of 13 points and 10 rebounds for the Wolverines, who won their first time in seven visits. Michigan (11-7, 2- Big Ten) was the first team to beat Indiana in Assembly Hall since Iowa recorded a 80-79 triumph on Feb. 21, 1971.

Top-ranked Massachusetts now has the longest winning streak, 39 games.

Indiana (11-7, 2-3) fell behind 57-44 on a rebound basket by Maurice Taylor and was unable to mount a serious threat although Indiana didn’t have a field goal lead over the final six minutes.

Indiana managed to cut the deficit to 57-50 with 3:41 left on two free throws by Brian Evans, who finished with 16 points. Alan Henderson, who brought in a team-leading 24.1 average highs of 13 points and 10 rebounds for the Wolverines, scored 19 of his 21 points in the first half. Henderson finished 6-for-15 shooting, 4-for-10 from the arc, and 5-of-5 at the free-throw line.

Michigan then held off the charge as it made eight of 10 free throws in the final three minutes.

Bay Jackson also had 13 points for Michigan, which had a 44-27 rebound advantage.

Anderson Patterson of Indiana scored all 13 of his points in the second half.

Indiana went through two cold spells that proved fatal against a patient Michigan team. In the first half, Michigan fell behind for good when it went 6:38 without scoring. After Evans hit a 3-pointer to give Indiana a 9-5 lead, Michigan scored 14 straight points, including 10 straight from the field.

Henderson’s jumper with 9:10 left in the half started Indiana’s cold streak, which included six minutes and five turnovers.

In the second half, Indiana fell behind 81-31 as it was outscored 5-1 over a span of 4:43.

Canes corral coach, Butch Davis the pick

By STEVEN WINE  
Associated Press

MIAMI

Butch Davis is the new coach of the Miami Hurricanes.

The Dallas Cowboys' defensive coordinator was introduced as Dennis Erickson's successor at a news conference this afternoon. When Miami officials began their search two weeks ago for a new coach, athletic director Paul Dee expressed reservations about candidates with no head-coaching experience.

Davis falls into that category. But several college head coaches reportedly declined invitations to interview for the job. Two others — Colorado State's Sonny Lubick and Jim Tresel of Youngstown State — withdrew from consideration after being interviewed.

"I don't know how many people were interested or disinterested, and I don't really care," Davis said. "I wanted to be the head coach at the University of Miami. Whatever they thought was their business."

Davis, 43, does have experience as an assistant coach for the Hurricanes. He was Miami's defensive line coach under head coach Jimmy Johnson from 1984 to 1988, then followed Johnson to the Cowboys in 1989.

Davis became Dallas' defensive coordinator prior to last season, after Dave Wannstedt departed to become the Chicago Bears' head coach.

"I knew Butch when he was here before," said Ron Stone, a member of the university board of trustees who participated in the search for a coach. "He was an outstanding communicator, a fine recruiter of student-athletes and active among the booster organizations."
HOW TO KEEP PEOPLE'S HANDS OFF YOUR MONEY.

1. Carry only enough cash to last the day.
   Anyone who tries to borrow your last five spots isn't a friend, anyway.

2. Label your spare-change jar "beetle farm."
   Then, put your beetle farm in a jar labeled "spare change."

3. Mark up every space on checks.
   Don't leave room for someone to fill in their name and extra zeros.

4. Keep your wallet in your front pocket.
   It discourages pickpockets. So does wearing really tight pants.

5. Put your picture on your credit card.
   A Citibank Photocard is tough for anyone else to use, unless they look just like you.

WE'RE LOOKING OUT FOR YOU.
To apply, call 1-800-CITIBANK. © 1995 Citibank (South Dakota). N.A.
Chargers look to buck trend

By BARRY WILNER
Associated Press

MIAMI
A decade of NFC Super Bowl dominance means nothing to the San Diego Chargers. They didn't lose any of those games. They didn't even watch some of them. "That might be an AFC thing, but it ain't a Chargers thing," defensive end Chris Mims said. "When our season is over, there's no more football for me," Leslie O'Neal said. The Chargers can ignore history. They can argue that every year is different, every game is different, every team is different.

They can argue until they turn as blue as their uniforms, but there is no denying the NFC has won the last 10 Super Bowls. And the San Francisco 49ers, San Diego's opponents in Sunday's title game, won three of those 10 and four overall.

All of which contributes to the 49ers being 19-point favorites to continue the NFC run in which only two games were close. "The 49ers won four Super Bowls," Chargers linebacker David Griggs said. "The Chargers haven't won any. It's our first time here and every year for the past 10 years, the AFC has gotten stomped. So, of course, we're going to be the underdogs.

**Super Bowl Countdown**

**Castoffs playing big roles**

By DAVE GOLDBERG

MIAMI

Stan Brock will line up against Rickey Jackson on Sunday, just as he did almost every day for the past 14 years. With a slight difference.

When Brock and Jackson met this time, it will be for the San Diego Chargers and San Francisco 49ers in the Super Bowl rather than in practice with the New Orleans Saints, a late reward for a combined 29 years of NFL excellence without so much as a playoff victory.

They are symptomatic of some of the oddball species who will populate this game in the free agent era. Suddenly, the NFL's showcase game is filled with castoff Cardinals and heat-up Bucs, players who spent long careers losing games suddenly finding themselves at the pinnacle of pro football.

But football fate is random. For every Brock, Jackson, Leslie O'Neal, Harry Swayne or Tim McDonald, veterans who have had long careers on losing teams, there are guys like Gale Gilbert, the first player ever to appear at five straight Super Bowls, and rookies who show up for a year and find themselves in the big game.

"At least people are talking to me at this one," said Gilbert, who was the third-string quarterback for Buffalo the past four years and now has moved up to second-string with the Chargers.

"When I was with the Bills, I used to sit back in the corner and do crosswords." But it's the guys who have toiled long and hard without expectations who enjoy it the most.

"I certainly didn't get a helicopter ride up to the top of the mountain, I had to struggle my way up the back," says Swayne, San Diego's left tackle. He played his first four NFL seasons with Tampa Bay, the ultimate NFL backwater, before joining the Chargers as a Plan B free agent in 1991.

There are five ex-Bucs starting Sunday, topped by Steve Young, the San Francisco quarterback and league MVP who was traded from Tampa Bay in 1987 for only a second- and fourth-round choice. So well do ex-Bucs do elsewhere in the NFL that the media in central Florida picks an "Ex-Buc of the Week" to accentuate the futility of a team that's lost 10 or more games for 12 straight years.

There are a lot of candidates for "ex-Buc" this week, Young's fellow four starters for the Chargers — Swayne, defensive tackle Reuben Davis and Shawn Lee, and kicker John Carney. Davis is doubly distinguished. Not only did he play at Tampa Bay, but he stopped in Arizona with the Cardinals, whose history is nearly as dismal as the Bucs.

So these guys are happier than most people to be here.

"It's like we have to take a deep breath and realize we're here," said Brock, who spent his first 13 years with the Saints before signing with the Chargers a year ago when coach Jim Mora made it clear he was no longer needed.

The 36-year-old Brock took a major gamble to get here, signing with the 49ers for the minimum $162,000 and turning down a lot more to re-sign with the Saints. His reward: When the 49ers beat Dallas in the NFC title game, he collected a Super Bowl bonus of $858,000.

More important, he earned a shot at his first ring, worth more to him than cash.

But many longtime Chargers can think back on futility without having to think of another city.

"I remember 4-12 and 6-10, 6-10 and 10-10," said O'Neal, like Jackson a frequent Pro Bowler but never a Super Bowl. "After that, you don't know how much I appreciate this." Then there's McDonald, who signed with the 49ers after six years with the Cardinals, in Phoenix and St. Louis, making the Pro Bowl three times but never coming close to the playoffs. They were 32-63 while he was there.

"It got so I didn't know whether I was part of the solution or part of the problem," McDonald said. "It was one of those situations where losing began more losing.*

The observer is now accepting applications for:

**Editor-in-Chief**

Any undergraduate or graduate student at the University of Notre Dame or Saint Mary's College is encouraged to apply. The editor-in-chief is entirely responsible for the operation of The Observer. Applicants submit a long essay on their interest in journalism and possess solid management, public relations, and communications skills. Previous newspaper experience or a background in writing and editing, while helpful, are not required.

Applicants should submit a resume and five-page statement to Jake Peters by 4:00 p.m. January 27, 1995. For additional information about the position or application process, contact Peters at 631-4542 or stop by the office on the third floor of the LaFortune Student Center.
Zataveski honored

Special to the Observer

Notre Dame senior center Mark Zataveski was named to the Hitachi/CFA Scholar-Athlete Team yesterday. He was chosen because of his ability to successfully balance both athletics and academics over the course of the past year. Only twenty-three other football players from other members of the CFA were also chosen for this award.

A $1,000 contribution will be made to Zataveski’s alma mater Bishop McDevitt High School in Wyncote, Pennsylvania. Zataveski has received other similar awards in past years. He named to the GTE/CosIDA Academic All-American District IV Team in 1993 and 1994. He is also the recipient of a 1994 National Football Foundation and Hall of Fame Postgraduate Scholarship.

BALLET- Instruction based on traditional Russian technique. Introduction to all levels with students being instructed according to their level. Semester-long course that meets Tuesdays from 6:30-7:30 PM and Saturdays from 10:00 AM-noon in Rockne Rm. 301. The fee is $35.00 and you must register in advance at RecSports. A demonstration will be held on Sunday, January 29 at 12:30 PM in Rockne 301. Call RecSports at 1-6100 for more info.

X-COUNTRY BEGINNER SKI CLINICS - The clinics will be held on the Notre Dame Golf Course and the cost for each clinic is $5.00 with equipment rental available for $2.00 additional. The clinics are January 28 at 11:00 AM- deadline January 26, February 4 at 2:00 PM- deadline February 2. Register in advance at RecSports. For more info call 1-6100.

DOWNHILL SKI TRIP - RecSports is planning a downhill ski trip for Friday, January 27 at Swiss Valley. Bus leaves the library circle at 5:00 PM and returns at 11:00 PM. The cost is $27.00 if you need to rent skis and $18.00 if you do not. Beginner lessons available for free of charge. Register and pay in advance at RecSports. Deadline is January 25. For more info call RecSports at 1-6100.

CROSS-COUNTRY SKI RENTALS - Rentals are available to students, faculty, and staff. Rent skis, boots and poles. No reservations necessary. Check out 4:30-5:30 on Thursday and Friday and 11:00 AM- 2:00 PM on Saturday. Return 11:00 AM-3:00 PM on Friday and Sunday and 11:00 AM-2:00 PM on Saturday. For questions and more info call Golf Shop at 1-6432 or RecSports at 1-6100.

BENGAL BOUTS - training occurs daily at 4:00 PM at the JACC. Anyone interested should please contact Jeff Goddard at 2817-8041.

WOMEN’S LACROSSE - Mandatory meeting on Wednesday the 25th. Meeting will be held in Lafortune, 3rd floor, Foster Room at 8:00 PM. Bring dues and insurance forms. Any questions call Molly at 287-7535 or Erin at 4-2770.

NOVICE AND VARSITY CREW. There will be a meeting Wednesday night at 7:30 in 126 D'Artairolo.

CLIMBING WALL SCHEDULE - The Climbing Wall will be open for use beginning Sunday, January 22. The hours will be Sundays 2:00-5:00, and Tuesdays and Thursdays from 7:00-10:00. Blue Devils prove to be too much for Irish
Even attack overwelms Irish
By JASON KELLY

Duke may not be able to win in the ACC, but the Blue Devils proved Tuesday that they can win in the slightly less competitive JACC. Wireless in six straight Atlantic Coast Conference games, Duke took leave from the league last night and soothed its recent wounds with an 87-74 win over Notre Dame at the Joyce Center.

"I don't care if it's an ACC win or not," Duke center Cherokee Parks said. "A win is a win.

It was the first for intercollegiate coach Pete Gaudet, who will lead the Blue Devils for the rest of the season while head coach Mike Krzyzewski recovers from a back problem. Duke got a little problem off its back Tuesday, opening a 61-43 lead midway through the second half and holding off a late Irish rally to win its first game in three weeks.

"The phrase 'monkey on my back' took on new dimensions when Coach K signed off for the rest of the season. Gaudet said, Duke looked like the same struggling team in the first half, shooting just 45 percent from the field and 36 percent from the free throw line to absorb the Irish of a sloppy performance and keep the score knotted at 34.

Duke went on a 27-9 run in the first 10 minutes of the half, led by Parks, who scored nine of his game-high 29 during the stretch.

"They were more physical than us," said Notre Dame freshman Pat Garrity, a cow-ticked kid from Colorado who carried the Irish with a career-high 27 points and even drew a few comparisons to Parks.

After shooting a simmering 56 percent in the first half, the Irish shot just 43 percent in the final 20 minutes, scoring just three points during a crucial six-minute stretch when Duke opened its biggest lead at 42.

"For about four minutes we had no offense," Jason Williams said. "It just went stagnant."

Notre Dame found some offensive rhythm midway through the half, trimming the lead to five on Williams' breakout layup with just over six minutes left.

That burst awakened the JACC audience of 11,418. But they went back to sleep after a Parks jumper and a 3-pointer from Kenny Blakney that pushed the lead back to ten.

Notre Dame never threatened again.

Garrity proves his worth
By TIMOTHY SEYMOUR

For a few brief minutes in the second half last night, it seemed as if the veteran and the rookie would decide head-to-head who would leave the Joyce Center victorious.

The veteran was Duke center Cherokee Parks, a tested four-year starter who was struggling for the rest of the season while head coach Butch Davis had him on the bench.

The rookie suited up for the Irish, as freshman forward Pat Garrity took on the Blue Devil big man, attempting to bring consistency to an up and down squad.

Certainly their statistics were similar: 29 points, three 3-pointers, and seven rebounds for Parks, and 27 points, two 3-pointers, and eight boards for Garrity.

Unfortunately, Parks had more help as Duke won. For a time, though, it seemed as if the two might leave the rest behind and have it out themselves. Both big men with soft touches, they traded jump shots and post passes to keep their teams close.

Parks cracked first. Showing the frustration of a sub-standard season, he pounded the basket stanchion after missing a breakaway layup and proceeded to miss the ensuing free throw.

Meanwhile it was Garrity that exhibited poise, coolly knocking down the open shots and
