An anonymous donation of $50,000, made by a 1979 Notre Dame alumnus, will fund the construction of a housing for a low-income family in the Watts community of Los Angeles later this summer. 

The donation, announced last week at the Notre Dame Alumni Association winter board meeting, was specifically designated by the donor to be used in Habitat for Humanity's 1995 Jimmy Carter Project, which is to take place June 18-24.

The annual project involves university students, church members, and business leaders, and includes private interviews with a 16-day, four-country trip to Latin America, sponsored by Notre Dame and called his time at the University the most important experience of his life.

Malloy was accompanied on the trip by Father Edward Malloy, president of the University, and Father James Malloy, director of the alumni community service.

In Panamá, Malloy delivered the letters to an activist group working in the country's capital.

In Mexico, Malloy met with Notre Dame and Saint Mary's College students participating in the University's international studies program there.

Malloy also visited Cuba, as did his colleague in Campinas. The school is run by the Kellogg Institute for International Studies and who received an honorary degree from the University in 1993.

Cardoso told Malloy he looks to the Kellogg Institute for help in analyzing the economic and social problems facing Brazil.

Malloy's Brazilian itinerary included a meeting with U.S. Ambassador Melvin Levitsky and a tour of the Notre Dame high school complex in Campinas. The school is run by the Holy Cross Brothers and is one of many examples of Holy Cross ministry in South America.

Malloy's stay in Chile took him to more Holy Cross establishments in Chile. He met with Notre Dame and Saint Mary's College students in Valparaiso and an orphanage administrated by the congregation.

In addition to the most recent trip, his itinerary in the past year has included visits to the Philippines, Singapore, Hong Kong, Taiwan, South Korea, Portugal, Israel and Iraq.

As with his Latin American visits, the primary focus of Malloy's world travel is the establishment of closer links between the University and international leaders in higher education, the Catholic Church, government and business.

In a significant number of instances these leaders have personal links to Notre Dame as alumni, parents of Notre Dame students or through scholarly, religious or business channels.

Malloy, Latin American leaders meet

Special to the Observer

Father Edward Malloy, president of the University of Notre Dame, last week returned from a 16-day, four-nation trip through Latin America that included private interviews with the presidents of Panama and Brazil and meetings there and in Chile and Mexico with numerous politicians, churchmen, and business leaders.

Malloy was accompanied on the trip by F a t h e r R i c h a r d W a r n e r , counselor to the president and director of campus ministry at Notre Dame, and William Sexton, vice president for University Relations.

In Panama, Malloy spent some five hours in conversation with President Ernesto Perez Balladares, who earned his bachelor's degree in finance and master's degree in economics from Notre Dame in 1967 and 69, respectively. Balladares said his country is facing a serious question of redistribution of wealth in Panama is a direct result of his trying to reduce the influence of Notre Dame and called his time at the University the most important six years of his life.

Mark G. McGrath, a Notre Dame alumnus and life insurance agent who was Archbishop of Panama from 1969-84, also took part in the discussion. Malloy was the recipient of two different honors while in Panama. First, the University Santa Maria La Antigua presented its most prestigious institutional award to him, then a delegation of Cubans who have fled their country and now are housed in a camp of Panama presented him with letters attesting to the human reasons for seeking political asylum in the U.S. and another refusal to be returned to Cuba.

Malloy delivered the letters to an activist group working in Cuba's behalf.

In Brazil, Malloy renewed ac- quaintance with President Fernando Enrique Cardoso, a scholar politician who is a former visiting scholar in Notre Dame's Kellogg Institute for International Studies and who received an honorary degree from the University in 1993.

Cardoso told Malloy he looks to the Kellogg Institute for help in analyzing the economic and social problems facing Brazil.

Malloy's Brazilian itinerary included a meeting with U.S. Ambassador Melvin Levitsky and a tour of the Notre Dame high school complex in Campinas. The school is run by the Holy Cross Brothers and is one of many examples of Holy Cross ministry in South America.

Malloy's stay in Chile took him to more Holy Cross establishments in Chile. He met with Notre Dame and Saint Mary's College students in Valparaiso and an orphanage administrated by the congregation.

In addition to the most recent trip, his itinerary in the past year has included visits to the Philippines, Singapore, Hong Kong, Taiwan, South Korea, Portugal, Israel and Iraq.

As with his Latin American visits, the primary focus of Malloy's world travel is the establishment of closer links between the University and international leaders in higher education, the Catholic Church, government and business.

In a significant number of instances these leaders have personal links to Notre Dame as alumni, parents of Notre Dame students or through scholarly, religious or business channels.

By JIM ABRAMS
Associated Press

WASHINGTON - The federal government must continue to provide a safety net for poor children and teen-age mothers as it codifies welfare re- sponsibilities to the states, Health and Human Services Secretary Donna Shalala said Sunday.

"But Sen. Phil Gramm of Texas, a leading Republican presidential aspirant, said the time has come for drastic action."

You can't change this mammoth system without hurting some people," he said.

The issue of who will be guaranteed protection under a revamped welfare system in is the top of the list of differences as the administration and Republicans stake out their positions on welfare reform.

Republicans emerging from a 5 1/2-hour "work session" on welfare reform with President Clinton on Saturday stressed that House GOP legislation that imposes tough restrictions on benefits is the only proposal on the table now.

But Shalala, appearing on CBS' "Face the Nation," said that Clinton has said gov- ernment should not be creating more poor American children.

"That's a national issue," she said. "It's a debate about val- ues, about how we take care of our children." Clinton has proposed cutting off welfare benefits to re- cipients after two years and giving states more flexibility in setting up welfare programs. The House Republican plan goes much further, giving states block grants and allowing them to reallocate the funds; denying cash welfare to unmarried mothers under 18, and denying aid to legal immigrants who have not lived in the U.S. five years.

Shalala said the president's proposal has not addressed serious questions about whether teen-age girls who have babies should be cut off any cash assistance.

She also took exception to the GOP proposal to cut off aid to unwed mothers until the fathers of their children are identified. Those women who play by the rules and cooperate should get transitional help, she said.

But the secretary did not totally reject the Republican plan on legal aliens. The administration wants the spon- sors of immigrants to bear a financial responsibility, she said. If that doesn't work, "we'll have to see," she said.

Rep. Clay Shaw, R-Fla., chair- man of the House Ways and Means Committee overseeing welfare reform, insisted the House legislation would make welfare reform "a reality" and that the states - guarantees that poor people will receive benefits - must be strong.

"Entitlements are gov- ernment on auto-pilot," Shaw said on CBS. "With the balanced budget amendment coming up, we're going to have to look at all entitlements." Shaw said the Republicans were working on some type of emergency fund that would come to the aid of states during economic downturns.

Sociologist to examine masculinity

By TOM MORAN

Sociologist and author Michael Kimmel will present a lecture on masculinity entitled "Clarence, William, Iron Mike, Magic and Us: Male-Female Relationships in the 1990s." The lecture will examine masculinity and sexual relations in modern times.

The lecture, to be presented at 4 p.m. in the Heishburg Library, is the first in a series entitled "Masculinity in the 1990s: The Social Construction of Being Male."

Kimmel, a sociology profes- sor at the State University of New York at Stony Brook and is also a spokesperson for the National Organization Against Sexism (NOMAS). His writings and lectures examine men's lives from a pro-feminist perspective.

Kimmel explores the various forms that masculinity can take in the modern world.

**Tobacco lawsuit nears trial following hearing**

**By LISA SHAPIRO**

**INDIANAPOLIS**

A liability lawsuit against to­

bacon companies over the can­

cer death of a smoker will be the first to go to trial since Congress grilled tobacco execu­

tives last spring on the dangers of cigarettes.

Michael Holland, an attorney for the man's family, said his case will include some information uncovered during the hearings to try to prove that cig­

eare makers had the ability to make cigarettes less addictive.

On his witness list is Dr. Victor DeNoble, a former re­

searcher for Philip Morris Inc. DeNoble testified at the congressional hearings in April that a study he wrote containing strong evidence nicotine was addictive was suppressed by his employer in 1983.

The surgeon general didn't determine nicotine was additive until 1985.

Historically, juries have sided with tobacco companies, agree­

ing the companies were not re­

sponsible for illness because smokers made conscious deci­

sions to smoke despite knowing the risks.

But anti-smoking advocates said public opinion has changed since the hearings and believe juries may now be more likely to find tobacco companies somewhat responsible for smoking-related illnesses.

"People now believe in a way they just never focused on before that these guys basically lie through their teeth to sell cigarettes," said Richard Day­

nard, a law professor at North­

easter University in Boston and chairman of the Tobacco Products Liability Project.

"I think that's going to make a big difference in jury atti­
dutes."

Richard Rogers, who was an Indianapolis attorney, began taking his father's cigarettes and butts left in ashtrays when he was 5 or 6 years old. By the sixth grade, he was smoking close to a pack a day. When he hit his mid-20s, he was up to three packs a day.

After hypnosis and drug ther­

apy, Rogers finally quit on June 24, 1986. Two months later, he was diagnosed with lung can­

cer.

With his wife, Yvonne Rogers, he filed a lawsuit in March 1987 against cigarette manu­

facturers and retailers, claim­

ing they caused his illness.

Seven months later, the 52­

year-old father of three died. His wife amended the lawsuit to include charges of wrongful death and asked for an unspecified amount in compen­

satory and punitive damages.

Nearly eight years after the lawsuit was filed, jury selection is to begin Tuesday in Marion County Superior Court.

The lawsuit accuses R.J. Reynolds Tobacco Co., Philip Morris, The American Tobacco Co. and Liggett Group Inc. of failing to warn Rogers of the addictive and harmful proper­

ties in cigarettes before 1969, the year the federal law requir­

ing labels on cigarette packages was strengthened.

**Scully speaks at WPO**

Opening statements begin in bombing trial

By LARRY NEUMEISTER

NEW YORK

The largest terrorism trial in U.S. history starts in earnest this week with opening statements and a warning by the judge that religion is not on trial.

Prosecutors will try to show that Sheikh Omar Abdel-Rahman and 11 other Muslims planned a "war of urban terrorism" in America that could have killed thousands of people.

Prosecutors will argue they plotted to blow up the World Trade Center, the United Nations, the FBI's New York headquarters, two tunnels and a bridge, and to kill Egyptian President Hosni Mubarak and other politicians and judges.

After 13 lawyers deliver their opening statements beginning Monday, U.S. District Judge Michael Mukasey will instruct the jury on evidence and witnesses, the rarely used Civil War-era charge used in the case. The trial's magnitude can be measured both by the number of defendants and the scope of what they allegedly plotted as well as the damage already wrought.

Mukasey told lawyers last week "we are trying to set the stage. The defendants are not accused of trying to overthrow the U.S. government, only of trying to overthrow the United States by terrorizing the American people."

Judge in that first trial, JSR, ruled that religious beliefs are not on trial.

"There is no religion on trial here," the judge said in a preliminary draft of his jury instructions.

Lawyers for Abdel-Rahman, charged with 75 counts of murder and racketeering, have argued that he has been prosecuted for his beliefs. If convicted, he could face life in prison.

The alleged plot's motive, prosecutors say, was to punish the United States for supporting Israel and Egypt and to weaken the nation's influence, easing the spread of the particular brand of strict Islam that Abdel-Rahman espouses.

The trial is the second chapter in the prosecution of a group allegedly responsible for the 1990 assassination of Rabbi Meir Kahane, founder of the militant Jewish Defense League, and the Feb. 26, 1993, World Trade Center bombing, in which six people were killed and hundreds injured.

Three followers of the teachings of Abdel-Rahman and a fourth man were convicted last year in the Trade Center bombing and were sentenced to life in prison without parole.

The judge is that first trial said the bomb was meant to topple the U.S. as a symbol of America's economic might, and kill tens of thousands of people.

One defendant in this trial, El Sayyid Nosair, was acquitted in the 1990 assassination of Kahane.

Kimmel

continued from page 1

"Masculinity is not biological," said Jane Aldous, professor of sociology, whose department co-sponsored the lecture. "It varies over the globe and in the United States."

Kimmel has written several books on the concept of the masculine in America, including "Manhood: The American Quest," and is working on another, "The Color of Our Independence: Men in America, 1776-1990, a Documentary History," presents evidence of two centuries of American men who have supported women's struggle for equality.

Kimmel's work has been featured in a great deal of print and broadcast media, and Kimmel himself has been a guest on several talk shows. He also runs a number of workshops for universities and corporations on such topics as date rape, sexual harassment, and the changing relationships between men and women.

The lecture series is sponsored by The Paul M. and Barbara Henriks Visiting Scholars Series; the American studies, anthropology, government and sociology departments; the gender studies program; Student Activities, and the Kroe Institute for International Peace Studies.

Female pilot ready to soar

By MARCIA DUNN

Associated Press

HOUSTON

The lesson came early in training for his piloting career: One slip and women who follow will suffer.

She learned that 17 years ago when a woman in her Air Force pilot-training class failed a check ride, a flight to check pilot proficiency. Because it was the first group of women at the base, everyone knew. Everyone talked. A woman failed a check ride.

"All of a sudden, I realized there is a lot of pressure on me. I can't afford to fail because I will be hurting chances for young women who want to come here some day," Collins says.

Collins never failed in the sky, she became the Air Force's second female test pilot. And this Thursday, she is scheduled to become the first woman to pilot a U.S. spacecraft.

The 36-year-old Air Force lieutenant colonel was second in command of space shuttle Discovery and its crew of six. If all goes well, she'll move over to the left seat — that of space shuttle commander — by the end of the decade, in training the final sea barrier.

Collins says the stress going into her first space flight than she did during her test pilot career as female military aviators were rare. After all, American women have been flying in space since 1983 as working passengers.

The first American woman in space, Sally Ride, used the shuttle robot arm to release and retrieve satellites. The first American woman to perform a space walk, Kathryn Sullivan, practiced techniques for refueling satellites, the country's second female spacewalker, Kathryn Thornton, helped fix the Hubble Space Telescope.

Collins will be a pioneering pilot on a pioneering flight — NASA's first trip to Russia's space station.

She will take with her reminders of the women who flew ahead.

A scarf that belonged to Amelia Earhart, a pilot's license that belongs to 1929 female flight endurance champ Beryl Markham and was signed by Orville Wright... items belonging to Women Airforce Service Pilots who ferried military aircraft in the United States during World War II and women who applied to NASA's Mercury program but were turned down because of their sex.

"This mission I believe — I know — has some significance to many people, women in particular," Collins says.

Collins knows the world will be watching her during the eight-day flight. She also knows: One slip and women who follow will suffer.

"In some ways, I appreciate the stress," she says. "I want to do better and I work harder."

As Collins sees it, the pressure of being the first female space shuttle pilot comes from outside NASA.

The curiosity is evident with all the letters and interview requests she receives.

Inside the space agency, Collins insists she's treated the same as the 33 other shuttle pilots, all men.

NASA flight director Phil Engelhardt says it's "completely invisible" to him that Collins is a woman because she performs her job as well as any pilot. In fact, he says, all of the female astronauts — 18 of NASA's 95 astronauts are women — carry the same workload as their male counterparts.

Collins will monitor Discovery's radar and other navigation systems and handle the crew checklist while commander James Wetherbee flies the shuttle to within 35 feet of the orbiting Mir station, a dress rehearsal for the first shuttle-Mir docking in June. She'll get a chance to fly Discovery at other times.

Everything Wetherbee can do Collins can do. Wetherbee made sure of that.

"We trained to be as one," says Wetherbee, a Navy commander who will be making his third space flight. "If anything happens to me, then she'll complete the mission."

**Tax slashing fever hits D.C.**

**By DAVE SKIDMORE**

WASHINGTON

Tax slashing fever has gripped the nation’s capital. Republicans and Democrats are falling over each other to offer voters appealing packages with a list of beneficiaries ranging from people with home offices to families with children in college.

House Republicans have more than a dozen tax breaks in their “Contract With America.” President Clinton has countered with his Middle-Class Bill of Rights. House Minority Leader Dick Gephardt, D-Mo., and Sen. Phil Gramm, R-Texas, also have tax-reduction proposals.

But even some advocates of the competing plans acknowledge what’s really needed is not a hodgepodge of new credits and exemptions but a sweeping overhaul of the current tax code. "We want a tax break and people all run to that. And then we worry somebody’s going to abuse it. And then we make it more complicated," Gephardt said. "It’s insane."

For the same reason, others advocate replacing the income tax for a value added tax. A form of national sales tax now used by most of the United States’ major trading partners. Typically, it’s levied at each stage of production and marketing. With such comprehensive tax reforms on the table, why bother with short-term fixes?

The answer from “real Americans” who have been testifying before the House Ways and Means Committee is quite simply — they need the relief.

Perry Moyer, owner of The Plum Garden, a Chinese restaurant in Mcleanry, Ill., hopes increasing the estate-tax exemption would make it easier for him to leave his business to his three children.

Dave Camp of Chesaning, Mich., says the GOP’s depreciation proposal would help him replace aging machinery on his family’s 500-acre corn, wheat and soybean farm.

Bobby Klapperich, a school secretary in San Anselmo, Calif., favors tax incentives for long-term care insurance, the type that allowed her to pay for a nursing home for her mother without sacrificing her children’s college education.

The stories demonstrate the political appeal of the agenda that propelled Republicans to their first House majority in 40 years.

The tax cut has a constituency of avid boosters. Some contract provisions are well known, such as a $500-a-child credit, expanded Individual Retirement Accounts and a 50 percent reduction in capital gains taxes on the profit from selling securities, real estate and other assets.

Others are not so well known, such as allowing losses on home sales to be deducted and expanding the deductibility of home office expenses.

Like the Republicans, Clinton wants to offer a $500 tax credit for children and extend eligibility for IRAs. He also would allow a $10,000-a-year deduction for tuition and training expenses.

Gephardt’s “working people’s tax break” — for two years only — would go to taxpayers regardless of whether they had children: up to $750 in married couples and up to $450 to single people.

Gramm would more than double the exemption for children, from $2,450 to $5,000.

All the plans sound good, but liberal policy analysts question whether they are worth the enormous cost.

Frankly speaking, given a $250 billion federal budget deficit, if there is one thing America needs, it’s a tax cut," said Barry P. Bosworth of the Brookings Institution.

The Treasury Department estimates the GOP contract’s cost at $250 billion over five years. Clinton’s proposal costs $60 billion over the same period.

Gephardt estimates the two-year cost of his plan at $66 billion.

Gramm says the five-year cost of his proposal is $124 billion.

Bosworth and others complain that the GOP contract is back-loaded. The IRA and depreciation proposals, for instance, will cost a lot more the first and third years than now in the first few years.

AS A NOTRE DAME GRADUATE JOINING COOPERS & LYBRAND YOU’LL RUB ELBOWS WITH VICE PRESIDENTS, SENIOR VICE PRESIDENTS, EXECUTIVE PRESIDENTS. EVEN PARTNERS. H.O.P.E YOUR ARMS ARE UP TO THE TASK.

This is the kind of exposure you can expect as an associate at Coopers & Lybrand. Here manage ment works as a team, exchanging expertise. Yet individual achievement is not only encouraged but rewarded. So your career can move as far as fast as you want it to.

**Moroccan example may cause cuts in aid**

**With WILLIAM C. MANN**

WASHINGTON

A former U.S. ambassador’s report of stalling tactics, thuggery and deceit by Moroccan officials bent on thwarting a U.N. peacekeeping operation is encouraging news to Republicans who want to cut back U.S. contributions to the world body.

Frank S. Ruddy, former deputy chairman of the U.N. operation in northwest Africa, said Congress last week that local U.N. administrators covered up problems with the Moroccan operation.

Ruddy said Moroccan officials forced U.N. airplanes to fly empty to show Moroccan sovereignty, tapped telephones of U.N. administrators, bested people who tried to register, even forced removal of the U.N. flag from the U.N. building where voters were to be registered. He likened the tactics to those of the Mafia.

"Both the Moroccans in Western Sahara and MINURSO (the U.N. operation) are out of control right now," Ruddy told a hearing on the Republicans’ National Security Revitalization Act.

The legislation, under scrutiny by at least three House committees, would restructure the formulas that determine U.S. contributions to peacekeeping and regular operations.

"We are a generous country," said Louisiana Rep. Bob Livingston, Republican chairman of the House Appropriations Committee. But in the face of widespread waste and mismanagement, he said, "we can’t keep writing checks every time there’s a good idea."

One of Congress’ leading defense experts, Sen. Sam Nunn, D-Ga., said Sunday that U.N. operations here be "carefully screened," but cutting peacekeeping funds could mean "the United States is going to have to do a lot more, and spend a lot more money in other places around the globe."

What we don’t want to do is to save some money on U.N. dues is to end up being responsible for these kinds of trouble spots ourselves," Nunn said on "Meet the Press."

The U.N. hierarchy was caught in many of the problems in Morocco, but Secretary-General Boutros Boutros-Ghali indicated he was unhappy with the local U.N. operation’s performance and worried it would worsen the United Nations’ image before the new conservative Republican majority in Congress, Ruddy said.

Last November, two weeks after the Republicans’ electoral sweep, Boutros-Ghali visited the Western Sahara U.N. operation, talked with local officials and toured MINURSO’s desert headquarters, Ruddy said.

"If you asked him about Western Sahara, he was a bit scared," Ruddy said. "He was well aware of the fiscal responsibility this Congress will demonstrate."

Boutros-Ghali spoke of ‘a new negative American attitude,’ Ruddy said.

Begun in September 1991 at a cost of $100,000 per day, MINURSO is monitored a cease-fire in the war between Morocco and Western Sahara guerrillas and to stage by the end of 1992 a referendum of voters that would be-Sahrawi Arab Democratic Republic in Western Sahara.

The current schedule calls for a vote in November, but Ruddy said a referendum will be impossible to conduct without U.S. support.

Even the June 1994 start of a voter-identification drive, by which residents of the Western Sahara would be cleared to vote on the referendum, was delayed 2 1/2 months, Ruddy said.

The reason: an argument over what to call representatives of the Organization of African Unity monitoring the process.

Hoping to defuse the conflict, Coopers & Lybrand, a professional services firm in San Anselmo, Calif., favors tax incentives for long-term care insurance as an instrument that allowed her to pay for a nursing home for her mother without sacrificing her children’s college education.

THE LEGEND, UNDER SCRUTINY BY AT LEAST THREE HOUSE COMMITTEES, WOULD RESTRUCTURE THE FORMULAS THAT DETERMINE U.S. CONTRIBUTIONS TO PEACEKEEPING AND REGULAR OPERATIONS.

"WE ARE A GENEROUS COUNTRY," SAID LOUISIANA REP. BOB LIVINGSTON, REPUBLICAN CHAIRMAN OF THE HOUSE APPROPRIATIONS COMMITTEE. BUT IN THE FACE OF WIDESPREAD WASTE AND MISMANAGEMENT, HE SAID, "WE CAN’T KEEP WRITING CHECKS EVERY TIME THERE’S A GOOD IDEA."

ONE OF CONGRESS’ LEADING DEFENSE EXERTS, SEN. SAM NUNN, D-GA., SAID SUNDAY THAT U.N. OPERATIONS HERE BE "CAREFULLY SCREENED," BUT CUTTING PEACEKEEPING FUNDS COULD MEAN "THE UNITED STATES IS GOING TO HAVE TO DO A LOT MORE, AND SPEND A LOT MORE MONEY IN OTHER PLACES AROUND THE GLOBE."

WHAT WE DON’T WANT TO DO IS TO SAVE SOME MONEY ON U.N. DUES IS TO END UP BEING RESPONSIBLE FOR THESE KINDS OF TROUBLE SPOTS OURSELVES," NUNN SAID ON "MEET THE PRESS."

THE U.N. HIERARCHY WAS Caught IN MANY OF THE PROBLEMS IN MOROCCO, BUT SECRETARY-GENERAL BOUTROS GHAHILI INDICATED HE WAS UNHAPPY WITH THE LOCAL U.N. OPERATION’S PERFORMANCE AND WORRIED IT WOULD WORSEN THE UNITED NATIONS’ IMAGE BEFORE THE NEW CONSERVATIVE REPUBLICAN MAJORITY IN CONGRESS, RUDDY SAID.

LAST NOVEMBER, TWO WEEKS AFTER THE REPUBLICANS’ ELECTORAL SWEEP, BOUTROS-GHALI VISITED THE WESTERN SAHARA U.N. OPERATION, TALKED WITH LOCAL OFFICIALS AND TOURED MINURSO’S DESERT HEADQUARTERS, RUDDY SAID.

"IF YOU ASKED HIM ABOUT WESTERN SAHARA, HE WAS A BIT SCARED," RUDDY SAID. "HE WAS WELL AWARE OF THE FISCAL RESPONSIBILITY THIS CONGRESS WILL DEMONSTRATE."

BOUTROS-GHALI SPoke OF ‘A NEW NEGATIVE AMERICAN ATTITUDE,’ RUDDY SAID.

BEGINNED IN SEPTEMBER 1991 AT A COST OF $100,000 PER DAY, MINURSO IS MONITORED A CEASE-FIRE IN THE WAR BETWEEN MOROCCO AND WESTERN SAHARA GUERRILLAS AND TO STAGE BY THE END OF 1992 A REFERENDUM OF VOTERS THAT WOULD BE-SAHRWAH ARAB DEMOCRATIC REPUBLIC IN WESTERN SAHARA.

THE CURRENT SCHEDULE CALLS FOR A VOTE IN NOVEMBER, BUT RUDDY SAID A REFERENDUM WILL BE IMPOSSIBLE TO CONDUCT WITHOUT U.S. SUPPORT.

EVEN THE JUNE 1994 START OF A VOTER-IDENTIFICATION DRIVE, BY WHICH RESIDENTS OF THE WESTERN SAHARA WOULD BE CLEARED TO VOTE ON THE REFERENDUM, WAS DELAYED 2 1/2 MONTHS, RUDDY SAID.

THE REASON: AN ARGUMENT OVER WHAT TO CALL REPRESENTATIVES OF THE ORGANIZATION OF AFRICAN UNITY MONITORING THE PROCESS.
U.S., China on brink of all-out trade war

By MARTIN CRUTSINGER
Associated Press

WASHINGTON

The United States and China moved closer to an all-out trade war Saturday, although U.S. officials said they hoped that one last negotiating effort would be made before a Feb. 4 deadline.

Officials in both countries said that nine days of talks aimed at halting the piracy of American computer software, music and movies ended Saturday that the discussions made before a Feb. 4 deadline.

The United States and China have agreed to suspend the collection of new tariffs on a limited number of products while the two countries continue trade negotiations.

The announcement came after the United States and China held talks in Beijing last week.

The two sides agreed to postpone further increases to tariffs on a select list of products until March 15, the United States Trade Representative's office said in a statement.

The suspension of tariffs was part of ongoing negotiations between the United States and China on intellectual property rights, technology transfer, and trade in services.

The United States and China have been engaged in ongoing trade negotiations since 2008, with a focus on reducing China's substantial trade surplus with the United States.

In recent weeks, the United States has threatened to impose tariffs on a range of Chinese products, including steel and aluminum, as it seeks to address what it sees as unfair trade practices.

China has retaliated by imposing tariffs on U.S. goods, including pork and fruit, in a tit-for-tat trade war.

The suspension of tariffs is intended to provide some breathing space for negotiations, according to the United States Trade Representative's office.

The two countries have agreed to continue negotiations on a range of issues, including intellectual property rights, technology transfer, and trade in services.

The United States has expressed concern about China's intellectual property rights regime, which it sees as inadequate to protect American innovation.

China has responded by saying that it will continue to improve its intellectual property rights protection, but has also criticized what it sees as an overemphasis on protection for foreign companies.

The United States has also raised concerns about China's technology transfer policies, which it says are designed to benefit Chinese companies at the expense of American firms.

China has responded by saying that it will continue to protect foreign companies, but has also said that it will not tolerate forced technology transfer.

The United States has also expressed concern about China's growing manufacturing sector, which it sees as exerting downward pressure on American wages and jobs.

China has responded by saying that it will continue to promote innovation and entrepreneurship in its economy, but has also said that it will not tolerate unfair trade practices.

Long lifespan astounds researchers

By BRIAN MURPHY

CAMPODIMELLE, Italy

One of the young bloods in the village put his face to the winter sun and breathed deep. "It's the air, I tell you," declared 77-year-old Pasquale Masella. His friend, who said he was 86, had other ideas. "The food," he insisted. Researchers are paying close attention to such debates while trying to pinpoint the roots of the remarkable longevity among residents in Campodimelle, a mountain top village about 70 miles southeast of Rome.

Although the focus of the studies vary — from lifestyle to blood pressure to genetic traits — the findings add up to one conclusion: The hamlet seems a near-ideal union of the classic Mediterranean diet and healthy bucolic living.

More than 10 percent of the 900 people in the village are between 75 and 99 years old, the age group that scientists describe as the least susceptible to age-related diseases. Less than 5 percent of Italians as a whole and about 85 percent of Americans are in the same age bracket.

The attitudes to longevity — and especially continued good health at advanced years — carry an added significance in many Western nations because more people are living long lives. "Campodimelle is not unique, but I believe it's about as close as you can get to the perfect environment for a long life," said Dr. Alessandro Menotti, a researcher in Rome who studied cholesterol levels in the village in the mid-1980s.

"Most people had a cholesterol reading around 100 — less than half the average level in most Western nations.

Another researcher, Dr. Petro Cugini, recently published a report on four years of monitoring the blood pressure of 94 elderly residents. The study, published in Chirurgia Internationale, found that both blood pressure and its deadly findings were unusually low — both key markers of good health.

"No one — even the oldest people — is inactive, and they're used to getting around by themselves. It was very, very impressive," said Cugini, who plans continue researching into how longevity is affected by lifestyle factors as well as eating habits and regular exercise.

He also plans studies into a possible genetic link to the long life and blood pressure in the village.

In Italy, as in many other countries, residents of similar age groups live very long lives. They lead a very active lifestyle. They are very healthy. Their lifestyle is very good. They eat very healthy. They never get older. They never get fat.

But the main forces guiding the long lives in Campodimelle appear to be the simple formula of good diet and exercise. Nearly everyone works in gardens or cares for chickens and other small animals. Walking is the only way to get around. The village, surrounded by medieval walls, is a warren of narrow streets, alleys and stone steps.

Iraq's diet exemplifies the Mediterranean cuisine: very little meat, mostly fish and butter, much pasta and raw vegetables; moderate amounts of wine. Unusual for Italy, few people in the village are heavy coffee drinkers.

"We should look at Campodimelle with respect. It should not be the exception, but the rule," said Fred Wulfften Palthe, a University of Minnesota professor who is using data from the village as part of a global study on blood pressure and diet.

All the laboratory analyses and record-keeping bemed the elders in Campodimelle, which means "field of honey" in the local dialect.

"I don't know why they are spending all this time," said Pasquale Pannozzo, 83. "The answer is easy. This is a perfect spot. No stress. Who would want to die?"

Like many villagers, Pannozzo emigrated to Canada to find work as a young man. He returned to Italy after seeing that he didn't want to spend his old age there.

"In the sixties, 82, looked out over the valley of olive groves and pine trees. 'Nearly everyone in my family live their 90s,' he said. "Nobody seems just people..."

"Hard work," said his uncle Pasquale Pannozzi, 83. "The answer is easy: This is a perfect spot. No stress. Who would want to die?"

Some see more opportunities for keeping busy.

"The village is spreading repu-
tation as a pocket of long and healthy lives is starting to draw tourists, mostly Italians but some Germans and others who stop by for a relax day."

The region's annual almanac devotes an entire chapter to the reports and newspaper clip-

ings about Campodimelle's elderly residents.

The village has a new large restaurant, La Longevità (The Longevity) that serves a local dish as its specialty: wild peas over nearly pasta made from semolina. And the owner of the coffee shop off the main piazza is planning to spruce up his place for tourists.

INTERESTED STUDENTS should attend a brief informational meeting for the 1995 staff on Friday, February 3, at 3:30 p.m. in 115 O'Shaughnessy

Positions are still available!

INTERESTED ESSAYS should be:

• less than 30 pages long
• written in English

Want to Publish?

Humanitas

The College of Arts and Letters

Undergraduate Journal

is seeking INTERESTING ESSAYS for the annual edition of the journal and INTERESTED STUDENTS for this year's staff.

INTERESTED STUDENTS should attend a brief informational meeting for the 1995 staff on Friday, February 3, at 3:30 p.m. in 115 O'Shaughnessy

Positions are still available!

INTERESTING ESSAYS should be:

• from the College of Arts and Letters
• written in English
• less than 30 pages long
• analytically oriented (No creative writing exercises or personal essays.)

PLEASE SUBMIT

1) Three copies of the essay WITHOUT your name anywhere on them

2) A cover sheet with:

• your name
• campus address
• campus phone number
• major (if any)
• title of the essay
• class for which the essay was written.

3) Please leave all materials in the Humanitas mailbox located in the English Department Office—356 O'Shaughnessy.
Muslim militants use suicide runs against Israel

By DONNA ABU-NASR

They may be educated or illiterate, poor or affluent. But they all share one thing in common: their readiness to turn themselves into human bombs to kill Israelis in the name of Allah.

It is not always clear what motivates these young men to strap explosives to their bodies and blow themselves up. Some want to avenge the killing of a relative or a friend, others act for purely religious or ideological reasons.

Last week's attack — a double suicide bombing that killed 21 Israelis — was an occasion for some Gaza youths to rejoice over the blow dealt to their enemy.

"Did you see how the Jews were crying on television?" said a 19-year-old laborer, his eyes sparkling with pride, but insisting his name not be published to avoid prosecution. "I want to become a martyr like that to see the Jews, to send them to hell."

Lacking a sophisticated arsenal, the militant Islamic Jihad and Hamas groups have turned suicide bombing into a weapon in their fight to kill the Israelis. The tactics have become a martyrdom for those willing to die for a cause.

Shiite Abdallah Shami, spiritual leader of Islamic Jihad, said religious belief is the key to the attacks.

"If it's faith that makes them long for martyrdom," Shami said in an interview before he was detained by Yasser Arafat's PLO police. "Others say the reasons are more complex."

"It's not easy to pinpoint one single reason. It's a mixture of religion, history and the right personality," said Samir Kouthe, a psychiatrist. He said many of Gaza's young people have lost hope in their future. They have little to look forward to and little to lose.

"Since the Six-Day War, the Egyptian-Israeli truce has ensured the Israelis an uninterrupted flow of oil. But the Palestinians receive a huge share of it," Shami said. "They choose to die for all kinds of personal reasons. Religious belief is just a minor component of the whole story."

A woman in her 60s, who was interviewed on the telephone, said her son was killed in one of the attacks.

"If he wants to become a martyr, let him do it. He wants a martyr's reward. Let him do it."

She added that his father, a Gazan, had died from complications stemming from a bullet injury.

Other relatives said they would prefer their loved ones to return home alive.

"I don't want my son to die," said a woman in her 40s. "I want him to live."

Some of the attacks are usually very bright, showing no signs of nervousness.

Ariel Merari, head of the political violence center at Tel Aviv University, said the most important factor is personality.

"The action is not just a matter of religious belief," he said. "It's a matter of personal motives."

One recent bomber who had a personal motive was Salah Abu-Rahim, who blew himself up in the West Bank town of Jericho last May, few parents spoke out against the risk their sons took in fighting the Israelis.

But there are signs of change. When mosque loudspeakers announced that Awaar Sukkar, 23, had died as a suicide bomber last Sunday, his father, Salah, Mohammed, and other relatives living in the Jerusalem neighborhood of Shajaia were far from response to queries from Security services.

The move drew immediate Palestinian protest.

On Nazar Street where Sukkar lived, at least six Palestinians have been killed since the Palestinian uprising began in 1987.

Two days before Sukker blew himself up, he spent more time with his family, took pictures with them and prayed a lot. His brother, Abd-Rahim, 18, said Sukkar was quite calm and showed no signs of nervousness.

Both Hamas and Islamic Jihad use schools, mosques, jails and especially tanks held for martyrs to spread the gospel about jihad, or holy war.

At wakes, fiery speeches extol the virtues of martyrdom and promise heavenly rewards in the hereafter to appeal to young people on Gaza's overpopulated streets.

"When Allah imposed jihad on us, he realized it would be hard for a person to relinquish this life for an unknown world," said Shami. "He made this path desirable by promising us paradise."

In paradise, the martyr can eat the most delicious food, the most luxurious fruits and the tenderest cuts of meat. It is portrayed as a world of castles, flowing rivers and lush fields.

The martyr also gets to sit on the right-hand side of God and enjoys the attentions of 72 nympha, Shami said.

"Jihad is the shortest path to the afterlife," he said.

Shami said a young man can apply for martyrdom to the Islamic Jihad's military wing. Islamic Jihad's intelligence officers then monitor the candidate closely to make sure he is not an Israeli agent and to check his background.

"The most faithful men are chosen," said Shami.
USC, Williams study college choice

By MARCY DINIUS
Campuses Editor

In a report published by economists at Williams college and the University of Southern California, researchers found that students are not choosing public institutions over private universities due to their inability to afford their higher costs, contrary to popular belief.

USC Professor Morton Schapiro says that "middle-income students to anybody else. There in institutions. The data show say that middle-income students are willing to teach to allow the hiring, women are still underrepresented in the nine tracks in the Stanford CIV program. Besides historians, will be able to consider teaching without the addition of several new courses, especially with freshmen not being able to design courses as are upperclassmen. Seaver stated that freshmen in larger classes tend to feel "anonymous and invisible" and that "we lose our smaller classes, there's not much justification for going to Stanford than earning.

Program director Seaver notes that the CIV program would have been able to provide the committee with a more complete picture of the course, since students benefit more from smaller classes compared to the course, which freshmen not being able to design and teach as are upperclassmen. Seaver states that freshmen in larger classes tend to feel "anonymous and invisible" and that "we lose our smaller classes, there's not much justification for going to Stanford than earning.

In response to a proposal urging the reevaluation of the culture, Ideas and Values program at Stanford University, several former faculty members are now considering abandoning the program. President Harry J. Hartrie's presentation system was designed in response to the work of the six authors in representing women faculty in the higher ranks. The study was inspired by research conducted by the American Council on Education, which showed that despite the growth of women-serving programs, women are still underrepresented in the nine tracks in the Stanford CIV program. Besides historians, will be able to consider teaching without the addition of several new courses, especially with freshmen not being able to design courses as are upperclassmen. Seaver states that freshmen in larger classes tend to feel "anonymous and invisible" and that "we lose our smaller classes, there's not much justification for going to Stanford than earning.

A 1992 study on gender distribution conducted by Professor Harry J. Hartley's Community College project at the University of Connecticut shows that despite an increase in the number of women entering college, women are still underrepresented in the nine tracks in the Stanford CIV program. Besides historians, will be able to consider teaching without the addition of several new courses, especially with freshmen not being able to design courses as are upperclassmen. Seaver states that freshmen in larger classes tend to feel "anonymous and invisible" and that "we lose our smaller classes, there's not much justification for going to Stanford than earning.

Final exams at the end of the 1993 Freshman Survey in 1993 and from $15,000 to $30,000 in 1993 show that despite the growth of women-serving programs, women are still underrepresented in the nine tracks in the Stanford CIV program. Besides historians, will be able to consider teaching without the addition of several new courses, especially with freshmen not being able to design courses as are upperclassmen. The development of a Mexico-United States project to build a $46 million, 50-meter diameter radio telescope was announced via video conference linking officials in Boston and Mexico City, publicizing the details of a partnership for building the world's largest and most sensitive millimeter-wave telescope in the next five years.

The Large Millimeter Wave Telescope (LMT) facility — or "Great Telescopio Millimétrico" — will be built in the U.S. and transported to a location in Mexico at a yet-to-be-determined site. Mexico will fund half of the project. "A Mexican site will provide a much better view than one on the continental U.S.," says professor William Irvine, UMass principal investigator of the LMT project.

The joint venture could provide American scientists with important new data about how the universe formed, and help create dozens of jobs for highly skilled American and Mexican technologists and engineers.

Invasion of the PC bandits

Just how far should inclusive language go?

The other day I returned to my room to find two of my section mates studying for an introductory theology exam or quiz or some other nefarious test of collective academic endeavor, I deposited my coat and book bag and was about to leave when I heard one of my students say "Isiah finished his ministry in 701 BCE." Intrigued by this inaccuracy I decided to ask the instructor if this in fact was his intent I inquired as to its significance. In response I was notified that his addition of the letter "E" to the standard abbreviations "BCE" and "CE" when referring to dates in their text stems from the fear that someone on this campus is trying to protect by implementing PC-calendar terminology of either institution. The presence of a crucifix in every classroom and, God forbid, the existence of a chapel in each dormitory is liable to have on this poor sensitive individual as just another victim of our domineering and imperialist Western Christian culture. Oh well, I for one have always enjoyed the irony inherent in the fact that even the most virtuous of atheists must at least subtly acknowledge the divine when they date a letter or refer to historical events.

I suppose that proponents of the PC-ization of the calendar could attempt to formulate the argument that their new terminology is more historically relevant. They might contend that "Common Era" is a more accurate description than is "The Year of Our Lord." Humm... I would again beg to differ; What is it exactly that lends any degree of community to the last two millenia of history that was not found in ancient times? Has some sort of political hegemony been achieved that could be characterized as having emerged as "Common" over the previous 2000 years. The rise of Christianity as the primary religion of the Occidental World is the only "common" characteristic to begin with the 1 CE. The simple fact is that if one chooses to utilize the birth of Jesus Christ as the reference point at the basis of the calendar - as opposed to, for example, the foundation of Rome, Muhammad's flight to Medina or the scientifically determined age of the Earth - one should acknowledge the event in question by name and not by a nebulous and entirely trumped up term. This is doubly true at a university dedicated to the teachings of and service to the man whose birth marked the beginning of this "Common Era."

Chris Kratovil is a sophomore government and international studies major living in Flanner Hall.
Beware: squirrel mutiny in progress

Has any one noticed the size of the squirrels lately? The once scrappy rodents have grown to the size of toaster ovens and are now emitting very threatening guttural sounds. I think they are talking to each other and plotting their take over of campus. In August they were all too small and wimpy to attempt an offensive as big as taking over a university of 8,000 students. But now the buck toothed critters, after spending all full eating dining hall waste and sunning themselves in the glow of the Nuclear Research center, are the dinner of the beavers.

What first brought to my attention the real threat squirrels pose to a tree strewn campus such as Notre Dame was a Chambers breakfast cereal commercial which showed a force of three squirrels storm the house of a man while he is eating breakfast. With the use of a large magnet, the squirrels pull the man to the ceiling trapping him many feet above the floor. Meanwhile, another squirrel stealthily makes its blazing seek and capture mission, nabbing the open box of cereal. This concerns me—if squirrels are able to be trained to do menial chores such as break into homes, what's next.

Just think what would happen if some squirrels got ahold of some old MacGyver episode, or even worse, an "A" Team episode. We're talking bombs made from a walnut shell, some parmesan.

Animals are able to be trained to do menial chores such as break into homes, what's next. Meanwhile, another creature to a tree strewn campus such as Notre Dame was a Chambers breakfast cereal commercial which showed a force of three squirrels storm the house of a man while he is eating breakfast. With the use of a large magnet, the squirrels pull the man to the ceiling trapping him many feet above the floor. Meanwhile, another squirrel stealthily makes its blazing seek and capture mission, nabbing the open box of cereal. This concerns me—if squirrels are able to be trained to do menial chores such as break into homes, what's next.

Now, squirrels are obviously not the most intelligent of God's creations, for example, they spend all full eating dining hall waste and sunning themselves in the glow of the Nuclear Research center, are the dinner of the beavers.

And such is the attitude. No one wants to acknowledge the fact that at this very moment a mobile ground force of 1,000 squirrels is raiding itself for the take over of this campus. Even in a day that visits the campus says, "Ohh, look at those cute little white squirrels, they're so friendly, they come up and eat out of your hand."

But don't you get it? That is what they want you to think. Sure they will eat out of your hand, but then they will turn right around and gouge it in your bloody stump.

Naive tourist: "Look guys there's the dome, but hold on... Look at all those adorable little white squirrels."

Squirrels: "We are not tame, we are just not afraid of us any longer."

Now, squirrels are obviously not the most intelligent of God's creations, for example, they spend all full eating dining hall waste and sunning themselves in the glow of the Nuclear Research center, are the dinner of the beavers.

But in reality they are cold and calculating. They scampor around all cute-like trying to attract tourists attention; when they complete that task they will run away and gnaw it to a bloody stump.

Every one that visits the campus says, "Ohhhh, look at da cute wittle squirrel. Here little wittle Maureen Zamarelli (left), a junior at Saint Mary's and her sister Theresa (right), a Saint Mary's sophomore, both have their real estate licenses by LESLIE FIELD

For the 1995-96 school year. But, according to Malloy they will not be used more towards the thwarting and capture of parietal parasites and vigilante bands of woodchuck thieves than the extermination of squirrels.

The biggest thing about the business is making people happy and forming friendships. I think they really look up to us.

The license was not easy to obtain. While many students were holding down jobs at various stores, camps and offices, Maureen and Theresa were learning how to measure rooms for listings and properly close on houses. They got up at 6 a.m., drove an hour to Cleveland, and attended classes at the Hondo­ros Career Centers until 8 p.m.

57 years ago, the Zamarelli's grandmother started a small real estate agency in Warren, Ohio called Zamarelli Real Estate. Over the years, it has grown into a large, leading agency with 26 real estate agents. More importantly, it has developed a reputation for making people feel secure and excited at the prospect of buying a new home. This is true not only for home buyers, but for the agents and especially for the Zamarelli sisters.

Once they had completed the 120 hours, they were able to take the test. Both passed due to their commitment to their classes and to the field of real estate of

"The biggest thing about the business is making people happy and forming friendships. I think they really look up to us," said Maureen. She had her first listings last summer with her dad. She also earned the six percent commission that went along with each listing that she sold. "It is stressful, but if you like working with people like we do, it's great!"

Their brother, Frank, obtained his real estate license when he was 18.

"Everyone has made a big deal of the fact that we are the youngest ones ever," said Theresa.

Both sisters also agreed that having their licenses while at Saint Mary's is giving them a great incentive to do well. "It has really helped us with my classes like accounting, too," said Theresa. This sort of real world application is a quality that Maureen and Theresa's father stresses.

"Our dad's main goal has always been to guide us in what he feels is a good direction so we always have something to fall back on."

And they undoubtedly will. With outgoing personalities and a love for the business, Maureen and Theresa will each become a classic success.

**Associated Press**

**FAYETTEVILLE, Ark.** Scotty Thurman's jumper with 1.6 seconds to play gave No. 9 Arkansas a 94-92 victory over No. 5 Kentucky Sunday, the Pagans' first win in the Southeastern Conference.

The game was the first for Arkansas since 1989-90 and its first loss in Walton Arena last Tuesday to Alabama. The Razorbacks, which appeared in trouble of dropping to 2-2 in their new building, but Thurman's jumper won the championship last season with a last minute-pointer against Duke, gave them the lead for good with 11 seconds left.

His jumper made it 92-92 and the last chance for Kentucky, Arkansas' defense recovered and there were four lead changes and four ties in that span. Kentucky had taken a 1-9 lead with two seconds to go on a rebound basket by Walter McCarthy.

Neither team led by more than five points over the final nine minutes and there were four lead changes and four ties in that span. Kentucky had taken a 1-9 lead with two seconds to go on a rebound basket by Walter McCarthy.

**Kentucky, as usual, lived with the 3-pointer, making 14-of-29, but its last of the game came with 8:02 to play.

Those were the last of Tony Delk's career-high 31 points which also was a record for an opponent in Walton Arena. Delk was fouled by 3-pointers and McCarty finished with 16 points.

Corey Williams had a season-high 28 points to lead the Razorbacks and Thurman finished with 22 points on 5-for-6 field goal shooting and 8-for-8 at the foul line. Reggie Geggri hit a shot from the foul line with 11.3 seconds left in the game to give the Razorbacks a 94-92 lead, their first since being up 10-9 1/2 minutes into the game. Geggri was able to get the shot off after Sheppard couldn't settle a steal on the other side of the midcourt.

The game was attended by an arena record 20,298.

No. 16 Wake Forest 63, Vanderbilt 51

**WINSTON-SALEM, N.C.** Tim Duncan scored two double figures in points and rebounds for the 10th time this season as No. 16 Wake Forest overcame a sluggish offense Sunday for a 63-51 victory over Vanderbilt.

Duncan scored 22 points and grabbed 14 rebounds. He's scored double figures in both categories three times this week, totaling 55 points, 45 rebounds and 13 blocked shots.

Both teams were playing for the second straight day. For the Demon Deacons (12-4), the game was a redemption after North Carolina beat them 62-61 Saturday on a game-winning shot. The Commodores were coming of a 68-68 tie at Louisiana State.

Vanderbilt (9-7) did grab 21 offensive rebounds, but shot 18-for-47 (39 percent), a day after shooting 30 percent.

Wake Forest has held 10 of 16 opponents to less than 39 percent shooting. The Commodore Deacons only got two field goals in the last 15 minutes, and one was Randolph Children's Hospital at the buzzer. They were 15-for-19 from the free-throw line.

In winning 13 of its last 14 meetings, Wake Forest made just one basket in the last eight minutes.

After falling behind 21-16 on Childress' 3-pointer, the Commodores scored seven straight points, tying the game on Frank Sekell's pointer with 6:07 left in the half.

Wake Forest went on a second-half run, again capped by a Commodores 3-pointer. It was the Demon Deacons' last basket of the half and helped them take a 30-25 lead at the break.

Duncan had eight points in the first six minutes of the second half. Vandertrip took his timeout with 4:17 to stop him, and did so by collapsing in the middle of the court to get the ball from going inside. The Commodores failed to make a field goal in just one field goal in a span of nearly 10 minutes.

Vanderbilt scored 16 points and grabbed 10 rebounds for Wake Forest, and Childress got 15. Randolph led the Commodores with 21 points and Seekar added 12.

No. 21 Georgia Tech 81, Florida St. 68

**Tallahasse, Fla.** Travis Beless scored 20 and No. 21 Georgia Tech emerged from a sloppy first half for an 81-68 victory Sunday over Florida State.

The Yellow Jackets (13-4, Atlantic Coast Conference) shot 50.8 percent and had five players in double figures.

Madden Maddox, starting in place of Jamey Photographer, who broke his hand in an auto accident— added 14 points.

Eddie Elisa had 15, Matt Harping had 13 and Drew Barney 10. Barney's 3-point basket with 13.1 remaining gave the Yellow Jackets a 72-63 lead that proved insurmountable for the Seminoles.

**HAPPY VALENTINE'S DAY**

**PRESIDENT'S DAY**

**TUESDAY TO ALABAMA.**

By JIM O'CONNELL

WINSTON-SALEM, N.C. Tim Duncan scored two double figures in points and rebounds for the 10th time this season as No. 16 Wake Forest overcame a sluggish offense Sunday for a 63-51 victory over Vanderbilt.

Duncan scored 22 points and grabbed 14 rebounds. He's scored double figures in both categories three times this week, totaling 55 points, 45 rebounds and 13 blocked shots.

Both teams were playing for the second straight day. For the Demon Deacons (12-4), the game was a redemption after North Carolina beat them 62-61 Saturday on a game-winning shot. The Commodores were coming of a 68-68 tie at Louisiana State.

Vanderbilt (9-7) did grab 21 offensive rebounds, but shot 18-for-47 (39 percent), a day after shooting 30 percent.

Wake Forest has held 10 of 16 opponents to less than 39 percent shooting. The Commodore Deacons only got two field goals in the last 15 minutes, and one was Randolph Children's Hospital at the buzzer. They were 15-for-19 from the free-throw line.

In winning 13 of its last 14 meetings, Wake Forest made just one basket in the last eight minutes.

After falling behind 21-16 on Childress' 3-pointer, the Commodores scored seven straight points, tying the game on Frank Sekell's pointer with 6:07 left in the half.

Wake Forest went on a second-half run, again capped by a Commodores 3-pointer. It was the Demon Deacons' last basket of the half and helped them take a 30-25 lead at the break.

Duncan had eight points in the first six minutes of the second half. Vandertrip took his timeout with 4:17 to stop him, and did so by collapsing in the middle of the court to get the ball from going inside. The Commodores failed to make a field goal in just one field goal in a span of nearly 10 minutes.

Vanderbilt scored 16 points and grabbed 10 rebounds for Wake Forest, and Childress got 15. Randolph led the Commodores with 21 points and Seekar added 12.
Young Floyd grabs Senior Skins title

By KEN PETERS
Associated Press

KOHALA COAST, Hawaii — Raymond Floyd missed three birdie tries as the stakes and the tension mounted Sunday in the Senior Skins Game, then rolled in an 8-foot-at-No. 17 to win the richest hole — $290,000 — in skins history.

The birdie put for more than a quarter-million dollars came after Arnold Palmer had missed the 17th hole and gave Floyd, 240,000 total, including a prize money carryover at No. 7, the first day.

Palmer, who had won two of the past three Senior Skins, could not make the money putts this time, including his birdie try at No. 17. Trevino, coming back from November neck surgery, was not at full strength and had to compensate with lower club selections to make up for his lack of distance.

Floyd also led the first day of the Senior Skins tournament, with $130,000. His $420,000 total, including the event over the Mauna Lani Resort course by winning 14 skins.

Nicklaus won the other four skins and $120,000, including $40,000 by sinking a putt for an eagle-3 at the final hole. He won two holes, including a prize money carryover at No. 7, the first day.

The golfers grew more serious and intense while considering more money piled up as the first seven holes Sunday were tied. The pressure showed on the greens.

Floyd missed a 20-foot birdie try at No. 11, with $60,000 at stake. He missed a 10-foot try at No. 14, with $170,000 up for grabs. Then at No. 16, he could not make the 4-foot birdie putt that would have won him $250,000.

He made up for all that on the next hole. Trevino was away and left his 24-foot-putt at No. 17. Nicklaus rolled his ball dead on line, but it stopped 4 inches short of the hole. Palmer, setting up his putt once, then stopping and backing off to set up a shot again, hit his putt off-line to the right.

Floyd, meanwhile, played a little break to the right, rolled the ball at precisely the proper pace and it dropped into the center of the hole.

Floyd and Trevino had halved No. 10 with birdies Sunday. Nicklaus and Palmer bidded No. 13, and the other holes leading to the drama at No. 17 were tied with pars.

The Penguins stayed perfect, Flyers earn draw

By DAVID GINSBURG

The Penguins have adjusted quite nicely to life without Mario Lemieux.

While it seemed certain that the Pittsburgh Penguins would surely miss his offensive prowess, such has not been the case — not yet, anyway.

"The guys who were expected to score have been doing the scoring for us," coach Ed Johnston said. "The guys we've got have blended in very well for us and we have become a closer-knit club."

Lemieux decided in August to take a medical leave of absence and sit out the entire season. While it seemed certain that the Penguins would sorely miss his offensive prowess, such has not been the case — not yet, anyway.

"The guys who were expected to score have been doing the scoring for us," coach Ed Johnston said. "The guys we've got have blended in very well for us and we have become a closer-knit club."

Jagr has five goals and a team-best nine points for the league's most prolific offense (23 goals). The 22-year-old forward has scored in 14 straight games dating back to last season.

He has not carried the weight alone. Stevens has four goals, while Francois and John Cullen have points in every game.

The Penguins have endured stretches without Lemieux before, but this time is different because they know he won't be back to work his magic.

"It's a great opportunity for the forwards," said defenseman Larry Murphy. "They've played well in the past, but we've always been looking for Mario to come through the door. Now they know they're going to get ice time if they play well because we aren't going to see Mario this year.

Pittsburgh also had to deal with the absense goaltender Tom Barrasso, who underwent surgery on his right wrist on Jan. 20. He hasn't been missed, either, because Ken Wregget improved to 5-0 by stopping 30 shots Sunday.

"We understand what Mario and Tom mean to the team and we know they're not going to be there, but we also understand what we have to do to fill the void," Jagr said.

The only shot that eluded Wregget was a power-play goal by rookie Jason Allison with 9:01 remaining.

"I'm not putting any extra pressure on myself," Wregget said. "I know what I can do and I know what the guys can do."

The Capitals' power play went 1-for-8, falling twice in a 5-on-3 situation, and is just 4-for-35 this season. Washington played the final two periods without leading scorer Joe Juneau, who aggravated a hip flexor.

"We were very erratic," coach Jim Schoenfeld said. "More than that, we made some mental mistakes that cost us and had some guys who didn't show up to play. When that happens, there's no way we can win."

Capitals defenseeman Sylvain Cote said Washington probably didn't expect the Penguins to be so good without Lemieux.

"I don't think we took Pittsburgh's offense seriously," he said. "I thought we weren't as aggressive as we should have been.

Pittsburgh scored on its first shot against Washington goaltender Olaf Kolzig. Cullen threaded a pass between two defenders at the blue line to the streaking Stevens, who turned the breakaway into his fourth goal at 2:20.

Jagr then converted a 5-on-3, scoring on the rebound of a blast by Murphy at 4:06. Francis made it three goals in four Pittsburgh shots when he beat Kolzig from the right circle.

"Down 3-0 that quickly, it's tough mentally to come back from that," Kolzig said.

It became 4-0 at 5:20 of the second period when Jagr sent a centering pass to Luc Robitaille, who deked Kolzig before scoring on the glove-side.

Flyers 2, Canadiens 2

Ron Hextall made 30 saves — including six in overtime — and Bob DiMaio's goal early in the third period enabled the Philadelphia Flyers to tie the Montreal Canadiens 2-2 Sunday.

DiMaio, replacing flu-sticken center Eric Lindros, tipped Mikhail Renberg's pass over goaltender Patrick Roy's shoulder to tie the game with 17:55 remaining.

Dimitri Yushkevich also scored for Philadelphia.

Mike Keane and Brian Savage scored 41 seconds apart late in the second period for Montreal.

The Canadians outshot the Flyers 32-15, including 6-0 in overtime, but Hextall was solid in goal.

The Canadiens were two men short when Yushkevich drilled a point shot off defenseeman Eric Desjardins and past Roy at 11:17 of the middle period.

PENGUINS STAY PERFECT, FLYERS EARN DRAW

By DAVID GINSBURG

The Penguins have adjusted quite nicely to life without Mario Lemieux.

While it seemed certain that the Pittsburgh Penguins would sorely miss his offensive prowess, such has not been the case — not yet, anyway.

"The guys who were expected to score have been doing the scoring for us," coach Ed Johnston said. "The guys we've got have blended in very well for us and we have become a closer-knit club."

Jagr has five goals and a team-best nine points for the league's most prolific offense (23 goals). The 22-year-old forward has scored in 14 straight games dating back to last season.

Mike Keane and Brian Savage scored 41 seconds apart late in the second period for Montreal.

The Canadians outshot the Flyers 32-15, including 6-0 in overtime, but Hextall was solid in goal.

The Canadiens were two men short when Yushkevich drilled a point shot off defenseeman Eric Desjardins and past Roy at 11:17 of the middle period.
Bulls, Pippen rout Warriors

By RICK GANO
Associated Press

CHICAGO
Scottie Pippen returned from a one-game suspension to score 27 points, and B.J. Armstrong had 16 in the first quarter Sunday as the Chicago Bulls started quickly and ous the Golden State Warriors 116-94.

Pippen was suspended and fined for throwing a chair across the United Center floor last week after he'd been ejected from a game against San Antonio.

But Sunday he was in complete control against the outmanned Warriors. He didn't bicker; he just played, making 9-of-13 shots, collecting 11 rebounds and handing out eight assists.

Armstrong hit his first five shots before a seven-assist quarter as the Bulls bolted to a 33-13 lead after one period. Armstrong finished the game with 19 points.

Golden State, losing for the 12th time in 14 games, played without Chris Mullin, Ronny Seikaly and Ricky Pierce, all out with injuries.

Tim Hardaway led the Warriors with 15 points and Latrell Sprewell, bothered by a sprained right foot, had 13.

The Bulls built the lead to 69-39 at the half. Pippen scored 11 of his 19 first-half points in the second quarter and finished the half with nine rebounds and seven assists.

Chicago, which has still won only three of its last nine games, had 58 percent in the opening half to only 32 percent for the Warriors.

The lead balloononed to 102-65 with one quarter to play. The Bulls led by as many as 39 points. Pippen was removed from the game with 2:48 to play in the third and didn't return.
Young shines as 49ers win fifth Bowl

By DAVE GOLDBERG
Associated Press

MIAMI

Steve Young hugging the Super Bowl trophy as if it was the most precious thing in the world to him. It is.

Young obliterated the shadow of Joe Montana that had haunted him for five years with a record-breaking touchdown pass as the San Francisco 49ers overwhelmed Dallas 49-26 Sunday, becoming the first team ever to win five Super Bowls.

Then he finally released the emotion that he's bottled up all this time.

"All along I felt like I was playing well but I never had this game to fall back on," said Young, a two-time league MVP, but labled a "loser" because he had short the last two years when they lost to Dallas in the NFC title game.

"I don't really think he is truly the greatest quarterback of all time," said Deion Sanders, who brought to the Niners the in-your-face attitude and finally got the Super ring they were after.

"We knew we were gonna kick their butts but we couldn't say anything," Sanders said. "They never had a chance to beat us. The real Super Bowl was last weekend against Dallas."

But Sanders wasn't the show.

Young was.

He's a great one. He's one of the legends," said San Diego linebucker Junior Seau.

His six TD passes broke the Super Bowl record of five set five years ago by Montana, who led San Francisco to its four titles. Jerry Rice, playing with the flu and a shoulder separation, caught three of them and Ricky Watters caught two more and ran 9 yards for a third score.

"This is something you'll never forget," Rice told Young as the quarterback cradled the Vince Lombardi Trophy after the game.

You agreed.

"You can't describe the feeling. That's why football is the ultimate team game," he said.

"When you get there, you share it with the other guys. It's geometric - 50 times 50 - the situation you feel for.

Young, the unanimous MVP, finished 24-for-36 for 321 yards with no interception. He also was the game's leading rusher with 49 yards on five carries before leaving with 5:39 left.

That overshadowed all kinds of achievements, including the record-tying three TDs by Young and downhill to the record set by linebucker Ken Norton, who after winning two titles with Dallas signed with the 49ers as a free agent, and became the first player ever to play in three straight Super Bowl winners.

It took exactly 44 minutes and 55 seconds for San Francisco to demoralize the Chargers, playing in the Super Bowl for the first time.

Touchdown passes by Young of 44 yards to Rice and 31 yards to Watters did the trick.

But more important to Young, it was a smacking certification in his exorcism of Montana's ghost. More important to the 49ers, it completed their single-minded mission of winning the Super Bowl after losing the NFC title game three of the last four years.

Young demonstrated his vision, after his fifth TD, a 15-yarder to Rice, he celebrated, lying on the ground with his arms spread wide as Rice trottled into the end zone.

But these two were only part of what may be the best offense ever.

"That's the best offense you're ever gonna see," Seau said. "They give you a lot of mixtures of run and pass but that passing game is one in 1,000." "They're the best I've ever seen," said San Francisco coach Bobby Ross.

And the three TDs each by Rice and Watters were another reminder - the only other players to score three touchdowns in a Super Bowl were both 49ers - Rice in 1990 and Roger Craig in 1985.

Rice, who twice received intravenous fluids before the game for flu-like symptoms and then played most of the game with a slightly separated shoul­der, caught 10 passes for 149 yards, and administered the quick shock - splitting the San Francisco secondary for the first TD just 1:24 into the game. He also caught second-half TD passes of 15 and 7 yards.

"Jerry Rice with one arm is better than anyone else with two arms," Young said.

But it was the quick TD that probably squelched any thoughts the Chargers, 18-point underdogs, might have had of an upset.

"We've scored quick like that all year," Young said. "That's one of our strong points."

Like most teams in their first Super Bowl, they clearly had the jitters.

They dropped passes, took silly penalties, missed tackles and generally did what most AFC teams have done over the past 11 years - lose big. Only two of the 11 straight AFC wins have been close. The average margin in the first 10 was 38-15. Coincidentally, that was the score by which the 49ers beat the Chargers on Dec. 11 in a regular-season game in San Diego.

"I don't know whether we were understudied or what," Ross said.

"The highlight for the second half was when they were down 42-10," Andre Coleman's 98-yard kickoff return for a score with 3:01 left in the third period after Young connected with Rice for a 15-yard TD.

Then the Chargers set a record of their own when Stan Humphries threw to Mark Seay for a two-point conversion, the first ever in the Super Bowl in the first season the NFL has gone to the two-pointer.

San Francisco wanted to send a message to San Diego and it sent that message quickly.

A sellout crowd that sat through the middle, Young hit him in the end zone and it was 21-7 just 1:58 into the second quarter.

The Chargers went nowhere on their next possession and did the Niners, probably because Rice was in the locker room getting a sprained shoul­der treated.

But he returned on the next series after one of the Chargers' silly mistakes - a roughness call on rookie Isaac Davis - set them back to the 9.

Then Adam Walker deflected Bryan Wagner's punt, the 49ers took the ball at the San Diego 49 and they methodically marched to the end zone, the touchdown coming on an 8-yard pass to the 2. It was one of the 49ers' favorite plays, one perfectly deflected by Roger Craig, and the Chargers misplayed it - covering Watters with a linebucker, David Griggs.

Then came another series that demonstrated the difference between the teams.

San Diego moved smartly, Humphries finding Mark Seay for 17 yards and Eric Bienemy for 33 more to put the ball on the 13. But they scored touchdowns only 43 percent of the time they got inside the 20 this year and this was another failure - three straight incompletes and John Carney's 31-yard field goal that made it 28-10.
All-around effort destroys UWM

Senior captain reaches 1000th point plateau

By K.C. COYER
Sports Writer

The Notre Dame women's basketball team had a roll call scoring effort Friday night as every player contributed to the 98-50 win over the University of Wisconsin-Milwaukee.

First on the list was senior co-captain Letitia Bowen. The game started at 7:00 pm Friday night with Coach McGraw presenting Bowen with the game ball with which she became Notre Dame's all time leading rebounder.

Four minutes later, The whistle blew for the jump ball to start the game, and Bowen was just 5 points shy of the 1000 point milestone in her career. By 7:06 pm, she was the 10th player in the history of Notre Dame women's basketball to accumulate 4 digits.

Bowen hit two free throws immediately after the tip. The next trip down the floor, Bowen was 8-9 from the foul line, 3 steals, and 6 rebounds.

Fellow co-captain Carey Poor put her name on the ball every time it went up as she grabbed a game high 11 rebounds. Poor also contributed 7 points.

Wisconsin Milwaukee never got a chance as the Irish went on a 9-0 run early to set up a comfortable 18-5 lead. Notre Dame outscored the Panthers 49-25 both halves of the game.

The Irish full court press was their deadly weapon as they stole the ball 23 times in comparison to their opponent's 4.

"We wanted to key on the transition game," McGraw said. "This was a chance for us to run it."

Katryna Gaither, a 6'3" sophomore, owned the key on defense rejecting 4 shots and picking off the high lob 4 times as well. Gaither was also 3-3 from the foul line and finish the game with 16 points.

Post players had a fine showing in the game as Rosanne Bohman came off the bench to score 10 points and Kelly Heath had an even effort with 4 points, 2 assists, and 2 steals.

Beth Morgan, a 6'0" guard from Bloomington, IN, was the leading scorer of the night with 18 points. Morgan has scored double digits in 17 of the last 18 games.

Mollie Peirick kept her accuracy streak alive, hitting 4 of 5 shots and 1-1 from the free throw line.

"The team did a great job of making sure everybody scored," Coach McGraw said, "It was a good team effort."

Skid

continued from page 20

mountable 3-0 advantage.

Following an FSU goal, Brinkins contributed his second score of the evening, and Lorenz added a goal with just nine seconds remaining to wrap up Notre Dame's finest period of the season.

There were still 40 minutes to play, but with the Irish leading 1-1 and with the momentum on their side, the Bulldogs went out with a whimper.

Notre Dame kept up the intensity throughout the game, and a demoralized, frustrated Ferris State squad could manage just one goal the rest of the way.

Sophomore right wing Tim Harbors scored his team leading 16th goal of the season off assists from Ling and junior left wing Chris Bales. Lorenz added his second goal and third point of the night with 10:40 remaining to put the exclamation point on the 7-2 Irish victory.

After such a strong effort by the Irish offense, it is easy to overlook an equally impressive performance by the defensive unit. FSU was able to convert just one of their nine power play opportunities, and freshman goaltender Matt Eisele, who seems to improve with every game, recorded 44 saves on the evening.

"It was nice to see the guys finally rewarded for their efforts," said head coach Ric Schafer following the game. Maybe there is a light at the end of the tunnel.
Irish

continued from page 18

"The key to winning is experienced guards," O'Brien said. "Right now, we're deficient in that area."

Notre Dame's guards have grown up. Led by junior's built-hawking defense, the Irish forced 18 Boston Eagles' miscues and committed just seven. The Irish scored 18 points off turnovers, while Boston College managed just four.

"They're that short point guard," Notre Dame coach John MacLeod said. "I'd like to think our defense was responsible for some of their problems. In the first half, we were particularly aggressive."

Notre Dame went 16 of those 18 points off turnovers in the first half, leading by as much as 11 before Boston College cut the lead to seven at halftime. The margin hovered between five and nine for almost the entire second half, with Hoover hitting the go-ahead basket late.

Twice he hit three pointers to deflate second-half rallies. Twice he hit 3-pointers to deflect second-half rallies. "It felt like we were taking an awful lot of threes," said Hoover, who finished 6-for-15 from behind the arc, "but you have to in a game like this."

Boston College was mixing zone defense, trying to neutralize Notre Dame's leading scorer Pat Garrity. That plan worked, holding Garrity to just five points, but it opened up the outside for Hoover.

"We won when our leading scorer shot just 1-for-7, so we were able to pick up the slack in other areas," MacLeod said. "They gave us a lot of different looks (defensively). We had the chance to cave in but we didn't."

WHAT NEXT?: After successful laser surgery to correct a heart abnormality, junior guard Keith Kurkowski is now fighting the flu and strep throat.

His heart condition, known as Wolff-Parkinson-White Syndrome, was discovered about two weeks ago and he underwent surgery last Tuesday. He was expected to join the team only a week to 10 days after the operation, but the illness sidelined him a little longer.

"He's having a heck of a time," MacLeod said. "He needs a break."

Weekend provides pair of wins

By ANGELA OLSEN
Sports Writer

Despite having to compete in two dual meets and a double dual in one weekend, the Saint Mary's swim team managed to come away with a pair of wins.

The Belles kicked off their weekend with a win on Friday night against the University of Chicago. Saint Mary's coach Greg Janson pointed to the his team's depth as a big factor in the Belles' 132-102 victory.

Last year the University of Chicago defeated Saint Mary's by two points. "The difference between this year and last," said Janson, "was our improved depth and a few more quality swimmers."

Saturday morning the Belles traveled to Kalamazoo College for a dual meet. The Belles were soundly defeated by the talented Kalamazoo team.

The Belles arrived back at Saint Mary's with an hour to spare before returning to Rolfs Aquatic Center to host a double dual against IBC and DePaul.

The Belles were defeated 136-91 by DePaul, but beat IBC. "We were tired but people were still able to pull out some good times," said Janson. "(Freshman) Courtney Merris and (junior) Natalie Cheeseman swam well the entire weekend."

Are you interested in a position on the Notre Dame campus this summer (June 26 to August 5) as a Youth Coordinator for the NCAA National Youth Sports Program? The position provides room and board on campus, three hours of academic credit, and a tuition stipend of $1200. Each coordinator will be in charge of a group of twenty 10-16 year-old kids from economically disadvantaged backgrounds in our local community. These 10 positions are part of Notre Dame's overall Summer Service Program. Call Sue Cunningham at 1-7867.

big east

continued from page 20

East," said Danya Abrams, the Eagles high man with 26."They have a few big men who can score, a nice offense, and they are scrappy. Really, what more can you ask for from a team?"

Granted, this game may not be the best measuring stick for future successes as it was a home contest against a club that is winless in eight league match-ups.

On the other hand, the Eagles, over the past few years, have been a upper tier team in the league that has recruited very well and have a bit more respect in the country after last season NCAA run. They look to be a team that will be a factor in upcoming Big East races.

The Irish are hoping to be right there with them.

"I'm looking forward to next season," senior guard Ryan Hoover said. "It makes no sense to play against cupcakes. I want to play against the top teams. That is how you improve."

Notre Dame can definitely improve upon Saturday's effort, but at least they started a Big East leader on the right foot - and the right side of the scoreboard.

Eagles get a taste of new east

Turnovers, experience give rival BC a look at soon-to-be conference foe

By JASON KELLY
Associate Sports Editor

One of Notre Dame's new neighbors visited Saturday bearing gifts. Boston College welcomed the Irish to the Big East early, offering 18 turnovers as a house-warming present that Notre Dame translated into a 74-68 win.

It won't always be that easy. Boston College represents the bottom of the Big East, but for this year at least, Notre Dame can brag about a perfect record against conference competition. "They're seemingly more ready to play in this league than we are," Boston College coach Jim O'Brien joked, "and we've been in it since it started."

As for the more immediate concerns, the Irish improved to 12-7 behind 20 points from Ryan Bowen, who rolled in a leaner as the shot clock expired with 1:27 left, giving Notre Dame a 69-63 lead.

Without that basket, Boston College could have trimmed the lead to two after trailing by nine just four minutes earlier.

"We put ourselves in a position to win, but we were never able to come up with the big basket or the big stop," O'Brien said. "Turnovers told a big part of the story, as they often do in games involving Notre Dame. This time, though, it was the opponent consistently coughing up the ball."

Without touted freshman point guard Chris Herren, who injured his wrist early this season, the Boston College backcourt resembles, well, some Irish teams of the recent past.

Losing skid halted

By MICHAEL DAY
Sports Writer

There just might be a light at the end of the tunnel for the Notre Dame hockey team after all. And it's possible that one may not even need an electron microscope to see it.

Indeed, things finally fell into place for the Irish on Saturday night, as they thoroughly dominated Ferris State on their way to snapping a five game losing streak with a 7-2 victory.

Junior Brett Bruninks and sophomore Terry Lorenz led the way with two goals apiece, but it was a complete team effort that got the job done before 2257 fans at Ewigleben Ice Arena in Big Rapids, Michigan.

"We definitely came out ready to play," said Lorenz. "We were due to have a big game, and fortunately, everybody played well from start to finish."

After falling behind early in a 6-3 loss to Lake Superior State on Friday, Notre Dame was determined to jump out to a quick start against the Bulldogs. And that's exactly what they did.

Just 34 seconds into the game, the Irish took advantage of some sloppy FSU play at the defensive end to go up 1-0. Lorenz found freshman Kyle Andrusiak wide open on the right side, and Andrusiak subsequently slid the puck past Bulldog goaltender Rich Nagy for his seventh goal of the year.

Andrusiak's goal set the tone for Notre Dame. With 16:35 remaining in the first period, the Irish struck again, as Bruninks sent Nagy to the showers with his eighth goal of the season to put the Irish up 2-0.

New goaltender, same result. Freshman Jeff Blashill replaced Nagy only to be greeted by junior center Jamie Ling's tenth goal and 34th point of the year. Defenseman Garry Grubker and left wing Jamie Moreshed had credited with assists on the play that gave the Irish an insurance lead.

Bowen tops century mark

The senior captain sets a milestone as the Irish destroy the Panthers of UWM
