Smith: Respect ND tradition on West Quad
By AMY SCHMIDT

In an effort to keep the campus a residential area, developers will strive to make the new "West Quad" respectful of Notre Dame’s rich tradition, according to Michael Smith, director of facilities engineering.

-Smith addressed the Campus Life Council (CLC) yesterday at the last meeting of the 1994-1995 school year, focusing on the development of recreational and residential plans for the area south of the South Dining Hall.

"We wanted to be sure that we had a good understanding of the history of Notre Dame," he said.

The most recent plans feature a West Quad comprised of four dorms that will be built along the edge of a green space, which the Smith said has a capacity of about 250 students. The green space, which Smith said has a capacity of about 250 students, will look more like the Main Quad, with an open area.

Rapagnani named OUC/media leader
By LIZ FORAN

Dr. Rapagnani joins Notre Dame as its first national chair of Theology, and supervises all of its academic programs related to his research.

In 1982-83 he was a research associate at the von Karman Institute for Fluid Dynamics in Belgium. He has authored a number of technical journal articles and technical reports related to his research. Rapagnani holds a bachelor's degree from the University of Kansas and a master's degree from the University of Missouri, both in mathematical engineering, and a doctorate in applied sciences from the Universite Libre de Bruxelles in Belgium. He will begin his appointment at Notre Dame on May 1.

In 1986-87 he served as president of the University of Colorado Boulder and interviewer at the highest level to the college's Annual Fund. Cunneen, author, editor, and teacher, will be awarded a doctorate of letters. In 1950, Cunneen co-founded Cross Currents, a well-known international religious quarterly. She has written four books, each of which explores the positive implications of the women's religious experience. These include "A Feminist Religion: Catholic," "A Contemporary Meditation on the Everday God," "Mother Church: What's the Experience of Women Is Teacing Her" and the just completed "In Search of Mary." Cunneen is an honors graduate of the University of Notre Dame. She earned her master of arts in literature from Fordham.

Security works to solve incidents at The Eck and Courtney Lane
By LIZ FORAN

Security urges extreme caution in area, the site of four robberies and four joggers.

The walk back home to your off-campus apartment is all that far, but you wasted too much time in LaFortune and now it's dark outside.

You could call your roommate for a ride or take a sprint down Courtney Lane.

According to Rex Rakow, director of Notre Dame Security, it would be unwise to take that jog home alone.

The number of criminal assaults and robberies has been unusually high this school year for the area near The Eck, according to Rakow. "This area has a number of businesses and apartments, and they are the things that contribute to a lot of foot traffic," he said.

One jogger was robbed in the parking lot in front of LeMans Hall, where a man...
A new breed of campus security

In a valiant effort to curb increasing criminal activities here at Notre Dame, Campus Security has been employing an array of exotic methods of surveillance and crime prevention. In the footsteps of such great universities as Miami University, security has been beefing up its new fleet of storm troopers to cut down on stolen backpacks in South Dining Hall, suspicious activity on the lakes and, well, the ever so shabby multiple fruit or pesty squirrels.

This new elite fighting force capable of almost any feat will be securing the campus for vagrants roaming the campus in search of carrion. Before, we have thought of them merely as indigents or interlopers reliant on a plague this campus. They will be able, eventually, perhaps within five months, to apprehend perpetrators of the evils that plague this campus. They will also begin to pull a fast one in front of the squirrels.

The Obser\'s new force of squirrels will, I think about it: a virtual army of small woodland creatures protecting the entire campus. Who would suspect that those cute furry friends are actually strong, lean units of raw power and guerrilla training just waiting to spring into action?

I realize that the squirrels on campus have been a source of criticism and, yes, have even been the butt of many a cruel joke, but that is what made this plan by Campus Security so manically brilliant. The squirrels, when trained, will be able to chase down and apprehend perpetrators of the evils that plague this campus. They will be able, through this new system of very effective communica- tion, to identify to police any suspicious loiterers. They will even be issued their own fatigues, acting all cocky," said Mary Condor, worker at East Gate.

Training for this elite fighting force will begin soon. Many squirrels have already enrolled in this new program in order to repay the campus for its kindness. To become a member of this crew, applicants must understand the following extract.

"When we got to the scene, there was still debris falling from the air," said Steve Pruett, a homebuilder who was working nearby. "The oblique fax sent to the office of a Texas congressman the morning of the Oklahom a City blast. "I received the fax before the bombing," said a Texas state witness.

Oil firms gain in working with EPA

By MATTHEW LOUGHRAN
News Writer

Oil companies have got to find a way to challenge the environmental movement in America in a positive way, according to William Douglas Ford, the Executive Vice-President of American Oil Co. (Amoco).

Ford, a 1966 graduate of Notre Dame, spoke yesterday in DeBartolo Hall, said that trying to find a way to create a product in a market limited and regulated by sensationalist media and an ignorant public is a challenge to oil companies. Ford said that the oil companies started with the release of "Silent Spring," a novel about environmental catastrophe in 1962. The media type of this book set off a string of legislation resulting in the creation of the Environmental Protection Agency (EPA) and Earth Day in 1970, the same year that Amoco began producing unleaded gasoline, according to Ford. The legislation continued every year from then on to produce stronger limits on the emissions of pollution by refineries. It has recently brought forth the Clean Air Act of 1990, the most expensive and limiting of all. Estimates by the EPA put the cost of current regulation at about $90 billion dollars. It has been projected that this cost will balloon to two hundred billion by the year 2000.

Ford stated that many of these expensive regulations are not necessary, and he cited recent Amoco efforts as proof. "We tried a joint project with the EPA at a refinery in Yorktown, Virginia. We were able to drop costs because of site specific changes and scientifically valid alternatives," he said. Among the changes that are enacted are ethanol and compressed natural gas. Regulations by the EPA have forced many states to institute alternative fuel laws. Among these is a law which requires ethanol to be used in heavy smog areas, according to Ford.

Ford said, "Ethanol increases smog creating chemicals," said Ford, "and we have research to back this up." Thus he indicates that the most efficient alternate source is compressed natural gas.

Another problem the industry faces is the supply of misinformation. "Often the media overhypes things because villains and victims make good stories," he said. Ford also cited the fact that, "only about five percent of the population has the scientific knowledge to understand the data." These problems have forced the environmental movement more power at the expense of the oil companies who also have to deal with unregulated competition in the Middle East. Ford said the best way for regulations to be met at a low cost to taxpayers and oil companies is for the oil companies to work in cooperation with the EPA to find new, scientifically valid ways to rid the world of pollution."

drove up behind them. Two men jumped out of the car and took money from them.

The individuals involved in that robbery were not apprehended.

However, the three incidents occurring last fall in the same area were solved when Security arrested two suspects on November 7, 1994, who confessed to all three robberies during police questioning.

The robberies were all similar in nature, involving male students walking alone in the area, with matching descriptions of the suspects by the victims.

Bakow did stress that students should still be extremely cautious when in the area, and to avoid walking in the vicinity if possible.

“We would ask that students walk in groups or get a ride,” he said, “or call Safe Walk and have them walk you to the edge of campus.”

“If you see a car with its engine idling or people standing around suspiciously, you might want to go a different route,” he added.

SUMMER HELP WANTED

Alumni parents of 4 year old autistic girl in a suburb of N.Y.C. are looking for an undergraduate or graduate student to assist them with their daughter’s therapy this summer. We will provide training, airfare, room & board and $200 weekly salary. You will work with our daughter 3 hrs a day & assist in family outings 3 hrs a day. Weekends are yours.

Candidates should be patient, diligent, enthusiastic & love children.

If interested, please contact Ann DeChiera (914) 241-9238.

informs feel.

“We are also trying to keep vehicles out of it,” he said. “This is intended to be a pedestrian zone.”

Although there will be an effort to decrease cars on campus, plans are underway for an increase in parking space to accommodate the new quad.

According to Smith, 300 additional parking spaces will be added to existing lots.

Smith also mentioned the possibility of a new “hospitality” area on the West Quad. He said that this may include a new bookstore/visitor center and a hotel/conference center.

There is also speculation that The Morris Inn will be renovated for graduate student housing, according to Smith.

Smith said that the development of the new quad was a main concern for the University.

“Two years ago, Father Malloy issued a college for the year 2000, and all the needs and wants have been collected,” Smith said. “Expansion made a lot of sense.”

The CLC also addressed the issue of on-campus dance space. Locations that have been investigated include The Knights of Columbus building which may be available, and

Bomb death toll to pass 200

By DAN SEWELL
Associated Press

OKLAHOMA CITY

Searchers found the body of a Marine today, still in uniform and sitting at his desk in the ruined federal office building, and the White House said it feared the death toll might possibly top 200.

The hunt for more suspects in the bombing stalled as two leads that investigators were chasing overnight didn't pan out. White House chief of staff Leon Panetta, speaking at The Associated Press annual meeting in New Orleans today, said it was possible the final toll might surpass 200. He said he based that on a report from federal emergency officials that 150 to 160 people were still missing and presumed to be "still within the building." It might be Saturday before all bodies were pulled out of the rubble, he said. Hopes of reaching the wreckage of a second-floor day care center were pushed back yet another day until Tuesday. Hansen said it would take workers with chain saws and jackhammers at least that long to remove a three-story high pile of rubble panned on the area where the center had been. As the nation observed a day of mourning on Sunday, there was more bad news. Besides those killed in the bombing, another person, nurse Rebecca Anderson, 37, died Sunday from head injuries suffered trying to help after the blast. More than 400 were injured in the bombing.

Start Your Career in Sales!

Business to business inside sales offers top compensation and opportunities. As a leader in the telecommunications industry, we are dedicated to complete customer and employee satisfaction. Join a team of professionals. Earn top dollars and benefits, plus get the training and experience you need to succeed.

As I sat in room 401 Le Mans Hall, I felt a part of the folklore tradition at Saint Mary's. It occurred to me that there may be some truth to the haunting legends of this nineteenth-century dorm. This goes beyond late night tales of trick-or-treating gone bad, with eccentric spirits and ghosts from the past. This is a story of two residents' personal encounters with a ghost.

The denim-clad ghost of Le Mans lives on, with a pale complexion, dark circles under his eyes, and dirty light hair cut under his ears, and dirty light hair cut in a bowl shape. He has only been seen in a "milky" form, after midnight. I must clarify, no official documentation of this man exists on college records.

The legend of the man in white is a tale of cultural inheritance. A tale of the past, brought in as a possible explanation for the present. With the banging that frequently occurs in room 401, this character has now gained recognition by some as a permanent resident of Le Mans Hall.

Hypothetically speaking, let's say the banging is an act of this man. Overall, his haunting form appears to be relatively harmless. Neither Bransfield nor Corcoran have been possessed. The ghost has not taken control of their actions—so far there has been no sign of either going into convulsions, showing extraordinary strength, or yelling excessive curses. The only harm done has been a loss of sleep. Plus, Bransfield and Corcoran can prevent the noise by going to bed at separate times before midnight.

The ghost of Le Mans is part of fourth floor culture, woven into the hall's folklore history. Looking beyond the belief of ghosts, it's important to note what this legend tells us about the women of Saint Mary's. It shows the women have a sense of history, that they're concerned with holding on to the identity of a dorm that is over a century old. The ghost keeps folklore tradition alive, which is not an easy trick.

Next year I will live on the fourth floor in Le Mans. Perhaps I will have the privilege of encountering the man in denim overalls. This would enable me to experience the richness of Le Mans folklore legend not as fiction, but as fact.
Seventy years of Morrissey tradition reveals a strong sense of family

By PETE RUBINAS
Assistant Academic Editor

What makes your dorm the place that it is? Is it the structure itself? Or the number of people living in the dorm? Is it the rectory and hall staff? Or the friendly and hard-working housekeepers?

After seventy years of experience, the men of Morrissey Manor would tell you that a dorm is all of the above and much more. Few dorms on campus can claim a life as long as Morrissey’s. And as the dorm celebrates its seventieth birthday this year, the entire campus can take a glimpse into the character that makes the Manor the place that it is. This character arises from the combination of the building, traditions, and residents.

Built in 1925 as a dorm for sophomores, Morrissey Manor was one of three buildings referred to as the “Gold Coast” at the time. Morrissey, like Howard Hall and Lyons Hall, was very, uniquely architecturally. According to rector Joe Ross, CSC, this unique architecture is one of the many things that makes the Manor the dorm that it is.

Morrissey’s Gothic design includes a square tower rising through the center of the building, with a copper cross in one corner, a trait the dorm shares with the law school building. The balcony above the front entrance is much like that of a medieval manor, and a Latin inscription above the balcony proclaims that the Manor is a house of God. In addition, the east and west exteriors of the building sport copper-framed windows, and the stonework on the tower and chapel walls proclaims the Christian nature of the dorm with carvings of fish, pelicans, crosses, and the sacred heart of Jesus.

Named after Reverend Andrew L. Morrissey, CSC, President of the University at the turn of the century, the hall is alive with character inside and out. Some of the older traditions include the Breakfast Club, Film Fest, and Christmas SYR. Every football season, the residents of Morrissey gather for cereal and song at Breakfast Club on the morning of the first home game. The Christmas SYR is undoubtedly Morrissey’s premier social event every year.

Some of the newer traditions unique to Morrissey Manor include the Polar Run and Morrissey Unplugged. The Polar Run, a mile dash around campus in February wearing only shorts, was begun several years ago to raise money for the Beeher/Nephi scholarship fund. This year, the residents of Morrissey ran to raise money for the newly endowed Henni Memorial Scholarship Fund. Morrissey Unplugged, an evening of music by mostly Morrissey performers, occurs at least once a semester. This past weekend marked the first year it was held outside.

Dorm President Dominic Tucci explains, “Traditions we have here in the Manor are what makes living here great. The rooms are small and there is no air conditioning, but we are comfortable here. Morrissey is a place where an individual can feel at home.”

A tradition of service also exists in Morrissey. The dorm has a long-standing relationship with St. Hedwig’s Outreach Center, a place for children on the west side of South Bend. Morrissey men visit the center every Monday and Thursday to provide support for the kids there.

Morrissey Manor also chooses to do service on their own or after they are required to. Tyrell Farmer, a senior resident of Morrissey, is planning on teaching in the South next year as part of the Alliance for Catholic Education program. This spirit of service that exists in Morrissey seems to improve the spiritual life of most residents of the dorm.

While the buildings and traditions certainly have a lot to do with the identity of the dorm, the people of Morrissey are what really makes the place unique. Morrissey men are all about community. Morrissey men are all about family. 330 men come together every year and form a family of fun, a family of support, but most of all, a family of God.

Never was this more apparent than over Christmas break when 1994 graduate Joe Clausen, a former resident of Morrissey, died from injuries suffered in a train accident. The word about his death spread quickly, and soon Joe was in everyone’s thoughts and prayers, even those residents who had not known him well. This spirit of community will continue as a family and honor Joe with the dedication of a bench and tree in his name in front of the dorm.

The Morrissey community has been blessed with strong and caring leaders over the years. During the 1960s, Morrissey was often perceived as the center of the anti-war movement on campus, with rectors Father Bortell, Father Burrell, and Father Gerber leading the way. Father Bob Felton, Father Tom Cerey, and Father Joe Ross, c.s.c., now a missionary in Haiti, spent time as able leaders of the Manor in the past. Father Joe Ross is currently rector of Morrissey, a position for which he has proven himself exceptionally well. Father Pat Gaffney of the Anthropology department is a welcome addition to the dorm as a priest in residence.

Morrissey is proud of the diversity of its residents, respect for others is stressed in the dorm’s unique living agreement “Life in the Manor.” This includes respect for all races, religions, and orientations at all times.

Perhaps sophomore Angela Cataldo sums it up best when she says, “While Morrissey has a strong sense of community, it is not an exclusive family. The people who live in Morrissey readily accept anyone as a ‘Morrisseyan.’”

Indeed, Morrissey’s diversity, many different people brought together into one community, is one of the many keys to the character it possesses.

Forget the stories about haunted towers and rats in the basement. Morrissey is obviously a place where a community of believers live together, study together, and compete together. What is important to the men who live in Morrissey is the camaraderie that won this year’s Fisher Regatta last year’s Interhall Football championship. And what is being a dormer at the Dame is all about.

So, next time you look at your dorm, think about the many things that give your dorm character. Think about the traditions, the people who will come before you, and the people who will come for years after you to inhabit the place you now call home.

Seventy years of Morrissey tradition reveals a strong sense of family at ND

By JOHN GALVIN
Assistant Medical Writer

Have you ever had a sore throat, swollen joints, irritability, constipation, fatigue, headache, athlete’s foot or just a itch? Well, chances are, you’ve had some sort of yeast infection. But don’t worry, yeast is our friend.

Yeast occurs naturally in our bodies. In balance with the rest of our internal flora and fauna, strictly speaking, yeast are a member of the plants known as fungi or molds. Given the right conditions for replication, yeast has the dangerous risk of explosive growth (like when bread rises). A mildly acidic environment can trigger such an outbreak. Slightly acidic places include the mouth, throat, foot, skin, vagina, and the medical condition is called Thrush. An infection on the foot is called athlete’s foot, and a genital infection is called a yeast infection.

Genital infection is the most common case of infection. Specifically, the vulvar and vaginal environment is a preferred area for yeast replication. The symptoms which signal an infection include itchy and painful discharge. For women with recurrent yeast infection, the symptoms tend to flare at the same time during each menstrual cycle. Some women have burning urination and fever, may have a fever, or may experience other vaginal problems. So, don’t diagnose it yourself, go to a provider or Health Services and get a culture.

If you suspect any kind of infection, immediately act to protect yourself and others. If diagnosed with a genital or oral infection, it is essential to notify those with whom you have intimate contact. If untreated, yeast infection is very treatable. Most cases will disappear with over-the-counter topical ointment or medication.

Here are effective measures you can take to prevent yourself from an infection or a recurrence of infection:

- Use natural oils for sexual intercourse (Astroglide).
- Use latex or cotton underwear, and do not wear panty hoses, tight or other tight fitting clothes.

Dietary changes also help prevent a recurrence of yeast infections.

- Drink enough cranberry juice every day. (acidifies system).
- Drink a lot of unsweetened liquids (herbal tea, juice, water...etc).
- Be sure to take your supplements.

For further information, please make an appointment with Health Services (ND: 1-866056C: 5349).

Lenny Wilkens wasn't invited to try out for the Olympics in 1960. In 1988, he was too old to play. In 1996, he was the MVP in the NIT, but was invited to try out for the Olympics.

"It was a big disappointment," the former UW basketball player said. "Every youngster in college would have loved to be on the Olympic team. I just thought much about it later." Wilkens will spend the next two days in completing his staff and selecting the players for the '96 Games, but said that no one in his state committee that picked the six players for the USA Basketball's seniors national team committee will "make the final determination."

"We're committed to selecting the best team," Newt said. "It probably will be all NBA players. But it will truly be open to every player in the league." Magic Johnson, the former NBA star who played on the 1972 gold medal team, highly recommend he had HIV, has said he would love to be on the 1996 team as well.

ing higher teams this year than the past two years (when they have made the field). Plus, we played one of the toughest schedules in the country. It seemed like every week we were up against a ranked team."

Because today's scheduled season finale with Western Michigan was canceled and the MCC tourney was played in the fall, the Irish will not have any further opportunities to prove themselves. That may hurt.

"There are a lot of good teams this year who had great years," Louderback noted. "A lot will depend on the conference tournaments, especially the Big Ten and SEC. Those teams will have more chances to get good wins."

So far this year, we're winning.

"We will practice all this week," Louderback confirmed. "The kids come out next Tuesday but we are confident."

WOMEN'S TENNIS

Despite loss, NCAA hopes alive

By TIM SHERMAN
Associate Sport Editor

Second chances don't come along very often in the world of athletics. Usually, it's do or die.

Fortunately for the Irish women's tennis squad, such was not the case on Sunday. Notre Dame died, but the quirky thing is, they may still have life.

In a match that probably would have secured an automatic bid to the NCAA Tournament, the Irish fell to 25th ranked Indiana in Bloomington by a rather lopsided 6-3 count.

"We just didn't play very well," Irish coach Jay Louderback said. "We struggled, especially in our singles play."

Notre Dame won just two of the six singles matches against regional rival Indiana. Junior All-American Wendy Crabtree sided 6-3 count.

"We really dug ourselves a hole with our poor play in the singles," Louderback noted. "I'm just glad we played better in the doubles."

Even the improvement was not enough though, as just the team of Crabtree and classmate Junior Holyn Lord combined with Wendy Crabtree to earn a 6-4, 6-2 win at number one doubles in Sunday's match against Indiana.

McCarney 6-4, 6-2. Despite the tough loss, Notre Dame's journey hopes are still very much a possibility.

With their 14-10 record and a half as much because the competition is better."

"I think we have a definite chance at one of those bids," Louderback said. "We have a better record in terms of beat-

Irish net last MCC championship

By B.J. HOOD
Sports Writer

The short-handed Notre Dame men's tennis team claimed its seventh MCC championship over the weekend. Despite the absence of five key players, the Irish won five of the six singles matches and one of the three doubles matches.

"I think everyone came together," Jakub Pietrowski said. "We had some guys missing, and we went out and got the job done."

At number one singles, Milos Sprouse defeated Northern Illinois Sunu Thomas 6-4, 6-3 to claim the title. After defeating Butler's Nathan Schaffner, John Jay O'Brien was named by Marty Engel of Northern Illinois in the number two match, 6-1, 6-2.

Jakub Pietrowski defeated Northern Illinois' Peter Berka 6-2, 6-3 for the number three singles title. At number four singles, Steve Flanagan was victorious over Wisconsin-Green Bay's Willie Cakans 6-7, 6-1, 6-3.

Ron Menciass had a great weekend at number five singles, with two 6-0, 6-0 victories. Andy Chimura claimed the number six singles title with a victory over Mark McGrew of Northern Illinois 6-2, 6-3.

The tandem of Sprouse and Pietrowski won number one doubles. Freshmen Danny Rothchild and Christian Jordan won third place for the Irish at number two doubles, and junior Marco Magnano and freshmen Vijay Freeman also took third at number three doubles.

The final standings of the ten teams had Notre Dame at number one, followed by Northern Illinois, Butler, and Wisconsin Green Bay.

Sprouse, Pietrowski, Flanagan, Menciass, and Chimura were named to the All-MCCT team. On being named to the team, Pietrowski said, "It was a great honor. It will be my only chance to play in the MCC, because of the move to the Big East."

Pietrowski said he feels everyone is playing well and focusing on regions that take place the first weekend of May, which will be the next action for the Irish. "Everyone just needs to try to play their best. On any given day, any team can win."

BOOKSTORE BASKETBALL

Intensity up as field goes down

By DOMINIC AMOROSA
Sports Writer

In NCAA Basketball, teams compete all season to reach a tournament referred to as March Madness. At Notre Dame, Bookstore Basketball teams play three or four games to reach the round of 64. Now, games are played with referees in front of hostile crowds. The large crowds become attracted to watching the basketball as The O'Malley 29'ers think they are going to get sweeter with anymore funny business.

A 558 team field has dwindled down to sixty four. The winners of these games will advance to the round of 32 and be guaranteed a seed next year if three players remain on the team. However, many of the ranked teams are senior dominated and play for the moment.

Some of these teams rely on size and strength, while others walk the ball up court balled down to sixty four. The large bid.

"I think everyone came to -gether," Jakub Pietrowski said. "We had some guys missing, and we went out and got the job done."

At number one singles, Milos Sprouse defeated Northern Illinois Sunu Thomas 6-4, 6-3 to claim the title. After defeating Butler's Nathan Schaffner, John Jay O'Brien was named by Marty Engel of Northern Illinois in the number two match, 6-1, 6-2.

DOS KLOSKAS' Bertrand Berry explodes to the hoop for a dunk against Mike Wigon and Lee Walker of the VoodooFreaks in yesterday's Bookstore action.

"We managed to get the ball inside in the second half and that was the difference in the game," said KLOSKAS' Pete Coleman. "They took us out of our game and played real well."

In another sixty four game, Ezekiel 25:17, led by quarterback Ron Powlin defeated Pass the Reemuts 21-13. Powlin and Steve Missicle paced the win with 5 points each.

The marathon game of the day occurred at the Bookstore courts as The O'Malley '99ers sild by Five the Hard Way 30-28.

All of the remaining teams will need to utilize every weapon in their arsenal in order to survive the round of sixty four and continue on the road to Stepan.
