ND fan’s dream comes true at Rutgers weekend

By ALLISON KOENIG
News Writer

Eighteen-year-old Tim Whittle grew up watching Notre Dame football games with his grandfather. Since he was little, he has dreamed of actually attending a Notre Dame home game.

This past weekend, Tim’s wish came true. He flew out from his hometown of Baltimore to witness three days under the Golden Dome that will be especially remembered, not only by Tim and his accompanying family members, but by thousands of people across the country, due to the resignation of Coach Lou Holtz.

For Tim, the weekend was the fulfillment of a wish that has become ever stronger since this past Easter, when he was diagnosed with Chronic Myelogenous Leukemia. The Grant-A-Wish foundation organized Tim’s weekend at Notre Dame. “Grant-A-Wish is a full-service charity; we provide relief from the stress and burden of being critically ill,” said Communications Director Lorran Tran.

The Whittles became aware of the foundation through their social worker, Tim, who previously visited the University but had never seen a home game, knew immediately what his wish would be.

“They asked me which of the last two games I would like to attend this season, and I chose Rutgers,” said Tim. At the time, he had no idea that it would be such a historic game.

“I wish he (Holtz) wasn’t leaving, but it was going to happen eventually,” added Tim, reflecting the feelings of many Irish fans.

In addition to attending the game, Tim, accompanied by other members of his family, took part in the full football weekend experience. The family received a tour of the College Football Hall of Fame, lunch with the Rutgers team, room at the Marlott Hotel, and a gourmet breakfast at the Morris Inn.

“Going to the game was the best part of the weekend. The pep rally was also pretty cool, but the game was definitely my favorite part,” said Tim.

The weekend journey proved a much needed break from the painful leukemia treatment. Tim has been sitting out of college classes since early this fall when a new drug treatment altered his energy level and required rest rather than rigorous studying.

“(The visit to Notre Dame) was a great break. It can get kind of boring sitting around home,” said Tim. Grant-A-Wish provides

Bond Hall nearly complete

By MICHELLE KRUPA

The Corporation for National Service has awarded Notre Dame’s Alliance for Catholic Education (ACE) a grant of more than $645,000. This new award represents a $145,000 increase of over its 1995 grant. More than $495,000 of the grant will be issued to 105 ACE teachers in the form of education awards of $4,725 apiece.

ACE participants, many of whom are Notre Dame and Saint Mary’s graduates, make a two-year commitment to the program. They receive eight weeks of training during the summer and then teach full-time in parochial schools in nine southern states. Following the first year of teaching, ACE participants return for a second summer of training after which they work in South Bend public schools.

Dominic Amorosa, a member of ACE and in his first year of teaching, feels he was adequately prepared from the summer “crash course” he took part in. The teaching experience, however, has also been a learning process for him.

“You need to try new things and be ready to change,” said Tim, reflecting the feelings of many Irish fans.

Construction nearing completion on the newly refurbished Bond Hall. The project is scheduled to be finished sometime in December of this year.

The building first served as a library and was converted to serve the architecture community in 1963.

“Bright colors and classical architecture” best describe the newest facade of the building, according to Michael Smith, director of facilities engineering. Also, a new 15,000 square foot addition, including two stairways, an elevator, an auxiliary second floor, and a wheelchair lift was added to the original superstructure.

According to Job Superintendent Butch Lehman, the University gave explicit instructions about the purification of the structure. “They were very specific on the outside of the building. They

This is the last issue of The Observer before Thanksgiving break. The Observer will resume publication Tues., Dec. 3. Have a great break.

This banner will hang over the entrance to the Moreau Gallery at Saint Mary’s College until Friday. It was erected by the SMC Students for Social Justice in observance of the formation of the National Women’s Caucus in 1970 and the first National Women’s Conference in 1972.

This banner was carried out by Calumet Construction.

**ARMED ISLAMIC GROUP CLAIMS SIX IN PROTEST BOMBING**

A bomb exploded Monday near a hospital south of Algiers, killing one person and injuring 13, officials said, related to a referendum that would ban political parties based on religion or language.

On Sunday, a car bomb killed five people and injured 18. There was no claim of responsibility for either bombing. However, the Armed Islamic Group led by Antar Zouabri has threatened to break the neck of anyone who votes in this week's constitutional referendum.

Security has been reinforced on highways and near public buildings ahead of the vote. Besides banning political parties based on religion or language, the referendum would establish a Senate that is appointed one-third by the president and two-thirds by local officials.

SM C luncheon explores leadership qualities

human relationships that give meaning to questions that Sister Betty Smoyer described for the Improvement of Postsecondary Education, to discuss the spirituality of leadership.

Small groups of students, faculty and staff shared stories and reflected from a set of questions that Sister Betty Smoyer described as "geared to delving into the network of leadership."

Groups then discussed the ability of a leader to overcome differences and recognize the sense of togetherness within a group and to be a catalyst for growth. "As one takes on leadership there is a discovery of self-growth and self-confidence," said Professor Patrick White.

Groups then discussed the ability of a leader to overcome differences and recognize the sense of togetherness within a group and to be a catalyst for growth. "As one takes on leadership there is a discovery of self-growth and self-confidence," said Professor Patrick White.

Having explored the idea and qualities of leadership, the group then related these themes to the Saint Mary's College Mission Statement. The statement reads: "Engaging in all aspects of the college experience, students acquire the hallmarks of a liberally educated woman: keen self-knowledge, lively imagination, lifelong intellectual and cultural interests, and the ability to make socially responsible choices about the future."

The group also discussed how the qualities of a leader are cultivated and strengthened at Saint Mary's.

Saint Mary's students, faculty and administrators met yesterday to eat and to discuss the spirituality of leadership at the COLT luncheon held on the campus of Saint Mary's College.

Saint Mary's community, including students who will be staying on campus over the holiday break, are invited to attend.

The usual 5:15 p.m. Mass at the basilica will not take place on Thursday and Friday.

Three key qualities came through during the discussion: the importance of faith and passion, courage, open-mindedness, attentiveness, and the ability of a leader to be flexible and an increased sense of awareness. Group members said that they found that many leadership qualities are similar to individual meanings they found in their own lives: courage, open-mindedness, attentiveness, faith and passion.

The group also discussed what were called the ideas of "invitation and witness," or the ability of a leader to be flexible enough to endure all situations, whether good or bad, and invite those situations to become life-building experiences.

Yeltsin sees 'Russia's breakup' — Moscow

Boris Yeltsin's hard-line rivals today said they may try to impeach the president over his order to pull the last Russian troops out of Chechnya.

"We are witnessing the beginning of Russia's breakup," said Viktor Ilyukhin, a prominent Communist who chairs the Security Committee in the Duma, the lower house. "This is sufficient to initiate impeachment proceedings against the president," he told the Interfax news agency.

Yeltsin on Saturday ordered the last two Russian brigades out of the rebel republic by the end of January. His hard-line foes, once staunch critics of the war, now prefix outrage at what looks to many like a final admission of defeat. Parliament has scheduled a special session on Chechnya for Friday.

Yeltsin's withdrawal order paved the way for the signing Saturday of an accord on Russian-Chechen relations. Elections for a new local government in the mostly Muslim republic are set for Jan. 27.

The head of the Security Council, Ivan Rybakin, staunchly defended the deal but admitted it has critics even within the administration. He said the defense minister is in favor of the pullout, but the interior minister had doubts about it.

Col. Gen. Anatoly Shikiro, commander of Interior Ministry troops in Chechnya, was skeptical about whether the Chechens would really lay down their arms once Russian troops left.

Tipper tops X-mas tree — Washington

Decked out in an appropriately red tipper, Tipper Gore today rode in a hydraulic lift to top the National Christmas Tree with an 8-foot Colorado blue spruce.

The vice president and his wife rode to the top of the 40-foot Colorado blue spruce with John Betchkal, president of Pageant of Peace, Inc. The tree, on the Ellipse behind the White House, was partially decorated with gold garlands and hundreds of tiny lights.

Spanish American Archaeology meetings last year, it created a fair ruckus," said the society's membership director, who argued that the builders of the three complexes meant to put them on the line. "Yet his colleagues most certainly do.

When I presented this at the Society for American Archaeology meetings last year, it created a fair ruckus," said Lekson, an archaeology professor at the University of Colorado in Boulder.

When the people of New Mexico's Acoma Pueblo speak of their origins, they tell a tale of two eggs. Their ancestors, they say, were traveling southward with the parrot eggs, one bright blue and the other dull-colored. But when they reached Acoma, they had to choose between the two.

When the blue egg broke and crows flew out, the chief told those who had chosen it that they would have to stay at Acoma. The others continued southward, and nobody knows where they ended up.

Stephen Lekson thinks he might know where the people of the drab egg settled, and much more about the ancient history of the Southwest. A simple observation, so obvious that anybody could have seen it, has led him to construct a history for the original inhabitants of the region spanning 600 years and 400 miles.

Lekson argues that the three biggest archaeological sites in the Southwest—Charo Canyon, Aztec Ruins and Casas Grandes—represent three successive stages of the same political and social regime. That regime enjoyed control over the southwestern area necessary to build giant apartment-like complexes out of stone and adobe, and had access to luxury goods such as turquoise, brightly colored feathers, raffia caps, and shell jewelry, some of it coming from the Mexican coast, 1,000 miles away.

In research presented at this year's meeting of the Society for American Archaeology and an upcoming issue of Archaeology magazine, Lekson connects the Southwest's three biggest archaeological sites with an imaginary line 400 miles long. The line runs due south from Aztec Ruins, a giant complex near the Four Corners, to Casas Grandes, a similar complex 100 miles southeast of the Mexican border.

Once they see it, Lekson argues, nobody can deny that the builders of the three complexes meant to put them on that line. Yet his colleagues most certainly do.
Modern human suffer from ignorance of nature

Several weeks ago, I was watching a documentation for a NBC show, "The Mighty Oak," on ABC. One of the characters commented to a friend that a new shrub, presumably in a pot, had just been delivered to the front of their New York City apartment complex. The friend questioned marked disinterest, "Really, is it evergreen or deciduous?" The first speaker looks at the second askance and responds with some monotonously contextualized approximation to non-fact. This reaction struck me as somewhat odd. Curiosity as to the nature of the bush seems only normal and by the same reasoning, the reaction of the first speaker is not out of place. However, perhaps this situation is not as incongruous to the modern palate as it at first seemed to me. Mundane as it appears on the surface level, I believe this exchange reflects an underlying problem that has become part of the social current of our country.

A remarkable detachment from the surrounding natural world has developed in a large segment of American society, so much so that the popular media construes a very broad based question about a plant in one's own "front yard" as abnormal and indicative of social misfit-hood. The detachment can be seen all around us, as development swallows acres of forest and wetlands, new suburbs are planted with monocultures of foreign shrubs and chemical-snaked grass, and the native ecosystems of areas become alien arcas to their own inhabitants. A large portion of the population is no longer moved when they see stumped hills of their youths are no more, and this is a serious problem which clouds our environmental future.

Throughout human history, the first speaker's reaction to the second's question would have been considered ludicrous, maybe even bordering on madness. An intimate knowledge of the natural world was a necessary precursor to survival among hunter-gatherer cultures and almost as useful to the farmer. A child would know what was deciduous and what was evergreen and very much more at a young age or he would fail at the age of self-sufficiency. Today, no bloodroot breaks the cold soil; but the gatherer of the bloodroot once flourished does not strike the same chord of worry as it does in the gathering of the bloodroot. This empathy runs much deeper, and it if were more prevalent, the current state of decline of our environment probably would have never been reached.

The encyclopedic knowledge of the hunter for his environment fostered a respect for it at first. As it once seemed to me. Mundane as it appears on the surface level, I believe this exchange reflects an underlying problem that has become part of the social current of our country.

When the earth soiled and trampled by a man in his youth are developed, there is a sense of loss in that individual which might catalyze a dedication to environmental preservation. A re-arrangement in what we value and admire as a society, from the artificial to the natural, would definitely help assuage the pressure placed on the contemporary American environment by development.

While the empathy with the environment by necessity which was the hallmark of past human species may not feasibly be re-engendered, a land ethic in the tradition of Leopold may be possible and crucially important. Leopold suggested the extension of our morality from one rooted in our relations with other humans to one which included the relations between humans and the natural world; this could be an important step in slowing environmental decline.

The old order changeth, yielding place to new...
This can be scary to the average male, because it puts women at a disadvantage as they attack holiday shopping with the undeclared joys of giving. No, I'm not talking about that silly turkey-eating ritual. A whole day of stressing out about whether the Jell-O mold is holding its shape and which of six identical forks to eat with? Who needs the aggravation?

I'm referring to the day after Thanksgiving, of course, otherwise known to women as "the number one shopping day of the year" and to men as "Hell.

Not sure which category you fall under? Well, that's pretty scary and you might want to consider professional help, but just to be sure, take this handy dandy little pair:

1. At 8 a.m. the morning after turkey day, your first thought is: a) "Oh, my God! I'll never get a parking spot if I don't leave right now!" b) Why am I awake?

2. If you have plans to go anywhere near a mall on Friday, November 29, it's because: a) you have had an itemized Christmas shopping list prepared for weeks and have been waiting for the mega-odes to start on it. b) Your mom and sister need someone to drop them off at the door and carry their 46 packages for the better part of eight hours.

3. Your idea of a store that's too crowded to shop in is: a) when other less experienced shoppers need paramedic help after collapsing from suffocation, b) any store.

4. You're not sure what to buy your significant other for Christmas, so you: a) hit every store in three malls looking for inspiration, b) just forget about it altogether until December 24 at which point you decide that a half-dead poisetitia and a purple teddy bear from Santa would be a perfect expression of your feelings.

5. The day after Thanksgiving, you're giving thanks for: a) the inventor of credit cards, b) the fact that you just broke up with someone and therefore don't have to shop for a Christmas gift.

If you answered "a" to three or more of these questions, you strongly lean toward the feminine side of shopping. If you answered "b," you are generally a man, or could be a woman who had a traumatic shopping experience in early childhood. If you answered "c," you probably should stay away from any stores that otherwise meet the bottom line is that there's no escaping the overpowering lure of post-Thanksgiving shopping. It's bad enough if you don't feel the urge to strategically conquer the mall in one fell swoop, someone in your life undoubtedly will, so let's at least prepare you for your Friday morning fate.

In honor of the great American shopping holiday, here's a look at the survival guide that's just as useful. This week, we'll explain why the Web was created in the first place.

Dads are easy. Dads like anything. Especially from their little girls. Even if it's on Dad's own credit card. Seriously. Sweaters are always a safe bet, as long as they don't have anything like Santa and his reindeer embroidered on them. And let's not forget golf balls, which many fathers happily anticipate stacking up each Christmas and laying off the fees, though, because then Mom will find a reason to make him dress up and take her somewhere in the unknown joys of giving. Don't even try to purchase whatever it is he's been eyeing. Inevitably, you'll pick the wrong one or find that he bought it as a present to himself three weeks earlier.

Brothers: Obviously, this depends on your age. Buying your older married sibling a Sega might be terrific in his eyes, but his wife will want to kill you when he's more interested in Mental Kombat than in her. Flannel items work well for brothers of all ages, and can be found from the Baby Gap through Eddie Bauer's XXXL-Tall. Younger brothers will be pacified with CD's or any movie (no more than PG-12, of course,) featuring Isabella Rossellini, Terri Hatcher, or the last object of his choice.

Boyfriend/significant other/person you spend all time with but can't put a label on because you go to school with gender relations that make common sense look awkward. This is the hardest one, because if you face the catch-22 of gift giving— if you buy from the heart and ignore the price tags, what happens if he thinks you feel bad if he spends too much, so you end up buying him a three-sweater and tickets to a Bulls game and he gives you a gift-wrapped box of Pop-Tarts, personally, I love Pop-Tarts and the thought of sitting down and eating a hot plate of toaster pastries is very appealing. But since you probably aren't worried about what to buy for me, what should you do? If you aren't biggest putting the big bucks aside for creating a gift, I'm not. And chances are you should forget your phileas fobes to construct a birdhouse out of macaroni shells and call it "I built it."

With a fluffy plaid shirt of a sub-versal nature the Blue's Clues theme, how about beach seats to opening day at Wrigley Field? A completed photo album? Homemade cookies? This is a common area they can cook. My cooking would take the time of a guide to cooking by shopping by killing everyone on the list. On the point is, he'll love the gift but you took time to think about it, not because you want better hugs in your life.

By JASON HUGGINS

Ho, Ho, Hopeless?

With the ever-increasing influence of the World Wide Web in today's society, it is hard to believe the Web did not even exist until a few years ago. For the past three years, the "Web Site of the Week" has highlighted the sites that make the Web fun and useful. This week, we'll explain why the Web was created in the first place.

The Web-olution of the Internet

By JASON HUGGINS
World Wide Web Correspondent

The initial project proposal outlined a simple system of using networked hypertext documents and communicate among members in the high-energy physics community. There was no intention of adding sound or video, and the capability to it was not considered. But why is the Web so popular? First, the Web offers a very simple-to-use interface, illustrated list that made it easy for users to create and explore countless innovative applications on the Internet. It is probably this ease of use, as well as the popularity of many graphical interfaces to the Web that caused the Web to become so popular.

During 1991 Berners-Lee continued to speak on and evangelize the project, but the increased interest in the Web was slow. But why is the Web so popular? T he pain experienced with a headache can sometimes be
feeling. On the other hand, the pain sometimes felt by a
eadache can feel like a jackhammer incessantly pounding away at the skull.

Indeed, everyone suffers from headaches at one time or
another. This phenomena of head pain has many causes and the site, severity, and frequency of headaches varies from individua l to individual. You may or may not realize that brain tissue cannot actually ache. What's more is that pain cannot even occur in most of the skull and cannot occur in a large portion of the brain membrane.

In fact, only certain areas in the human head are pain-sensitive. Outside of the skull, the skin and tissue membranes surrounding the skull are sensitive. Furthermore, muscles and arteries in this area are sensitive to pain stimulation. In addition, the skull coating is extremely sensitive to tension and sinus cavities can be also stimulated by pain thus resulting in aches of the head.

Inside the skull, there are several regions which are pain sensitive. For example, the arteries, the venous sinuses, and their surrounding veins will react to pain. Pain can result in response to stimulation to parts of the brain's outer membrane at the base of the brain. Finally, cerebral arteries and cerebral nerves in this region of the head are pain sensitive.

An interesting note is that pain is pretty much the only sensation that can be produced by stimulating the structures listed above.
The cranial and cervical nerves inside of the skull send pain sensations to the central nervous system. Specifically, the cranial nerves send messages of dental or jaw pain to the central nervous system and the cervical nerves relay pain in the neck and the base of the head to the central nervous system.

Pain on the outside of the skull is caused by several stresses applied to various regions of the head. First, pain and a resulting headache can be caused by inflammation or tension of muscles in the head. Moreover, pain can be caused by inflammation or tension of muscles and an enlargement of the arteries in the scalp. Migraine headaches may be due to changes in the brain's blood vessels as a result of disturbances in serotonin which is produced by the cells in the brain. On the other hand, cluster headaches are more than likely the result of an interaction of the nerves and arteries of the head and a corresponding release of various brain chemical transmitters.

Tension headaches, which are the result of spasms con tractions of muscles and an enlargement of the arteries in the scalp, are an example of muscle contraction headaches. Whenever the head aches and the pain becomes severe in high or when you are present, an examination by your
physician is appropriate. A medical history and a physical examination usually are required.

If the physician does a headache severe, he may wish to do further testing. This may include a CT scan of the head which shows for structural or anatomical changes in the brain. In addition, X-rays of the upper spine may also be needed to see if this is the region where pain originates.

Unrelieved headache pain which lasts six months or more is a disabling condition and is considered chronic. Approximately 42 million Americans have chronic headaches, and migraine and tension headaches are two of the most common forms.

Physicians can help control chronic pain. Your physician will treat the headaches with medication and will also help you to develop a better understanding of your pain and the factors that make it worse.

STEELERS beat Dolphins, 24-17

By STEVEN WINE
Associated Press Writer

MIAMI — With the game on the line, Mike Tomczak connected on one more pass than Dan Marino.

Tomczak threw for 252 yards, including two touchdown passes to Ernie Mills with 2:10 remaining before the Miami Dolphins fell to 1-31-1 in their last two games against the Steelers.

Pittino scored Miami 73 yards in the final two minutes to the 7-yard line, but his pass to tight end Dave Hall with 25 seconds left fell incomplete in the end zone.

"It's very exhilarating," Tomczak said. "When we scored, I told teammates I'll never forget our last drive, I never forget this game"," Mansion said. "I'm not going to forget this game," said the Dolphins (6-6) after a game behind San Diego in their bid for a wild-card berth.

The Dolphins came down to us scoring with two minutes left," Mansion said. "We scored. The Steelers (9-3) increased their lead to three games over the AFC Central.

"That's a big win for our team, facing a team that's looking at this as their playoff game," Mansion said. "It's a tough football environment," Pittsburgh coach Bill Cowher said.

With the outcome, AFC West leader Denver (11-1) became the first team to clinch a post-season berth.

The Steelers' Jerome Bettis became the fifth player in NFL history with 1,000 rushing yards in the first half of the season. Bettis has scored 14 touchdowns this season and rushed for 1,001 yards, which is 194 rushing yards away from surpassing the team's record of 1,209 rushing yards set by Najeh Davenport in 2001.

Rookie quarterback Ben Roethlisberger threw for 217 yards and two touchdowns, and running back LeGarrette Blount rushed for 94 yards and a touchdown.

The Bears scored 10 points in the fourth quarter and held off the Packers for their second win in three games.

The Bears are now 5-2 in the NFC North and remain in control of the division standings.

Atlanta deals McMichael to New York for Byrd

By PAUL NEWBERRY
Associated Press Writer

The Atlanta Braves took the first step toward reducing their burgeoning payroll Monday, trading Greg McMichael to the New York Mets for Paul Byrd in an exchange of relievers. McMichael, after signing NL Cy Young Award winner John Smoltz to a $31 million, four-year contract last week.

"It's no secret when you sign someone to a contract like John Smoltz signed, it's going to have a great impact on your team," Atlanta general manager John Schuerholz said. "I've been saying all winter that we're likely to make major changes to our roster. This in and of itself is not going to offset the Smoltz signing."

The Braves reportedly had had talks with the Florida Marlins about a trade for first baseman Fred McGriff, who had 107 RBIs last season. McMichael, who will turn 30 next Tuesday, made $460,000 in 1996, but his salary figured to go up significantly since he was eligible for arbitration for the first time.

"I knew that a trade was one possible scenario with my change in position," he said. "So it's not a complete shock. But I'm down a little bit. It's hard when you've established your home and you enjoy being here year round. I've been thinking of my wife and kids and things like that."

McMichael had been a stalwart in the Braves bullpen over the past four seasons, compiling an 18-14 record with a 2.89 ERA and 44 saves. He led Atlanta with 19 saves in 1993 and 21 in '94, but he had been primarily used in middle relief the last two seasons.

In 1996, McMichael was 5-3 with a 3.22 ERA and two saves in 73 games as the set-up reliever for Mark Wohlers. But he added his usual outstanding play with 16 digs on the weekend which put her just seven behind Jessica Fiebelkon for second place on the Irish career list.

Briggs, who has piled in for Angie Harris, totaled 21 kills, while Leffers dominated the net with 10 blocks and nine kills in the final.

Over Thanksgiving weekend, coach Brown and company will travel to the University of Pacific for the Banker's Classic. The four-team tournament will feature teams that will all be in the big dance.

The Irish will do battle with the No. 11 Washington State Cougars and will then take on either the host Tigers (No. 13) or the South Florida Bulls who just dropped out of the polls.

The Cougars handed the powerhouse Stanford Cardinal one of their two losses on the year, while Pacific is the only squad who boasts a win over Long Beach State.

The Dominoes will definitely have their hands full as they are 0-9 against ranked foes this year.

"We're excited to play ranked teams again," Treadwell explained. "We've been playing in the Big East for so long. Since we haven't had that good a record against ranked opponents, were excited to get another chance."

Coach Brown also expressed how great an opportunity lies in California.

"We look at where we've been, the reasons why we struggled and where we are now, and we feel like we have come a long way. We played very well this past weekend and, if we play like that, we feel like we can play with any team in the country. It's taken some time and we've had some big obstacles to overcome. We're looking forward to the challenge."
Men finish ninth; Deeter third

Observer Staff Report

Notre Dame's men's cross country team ended its 1996 season with its second-consecutive top-10 finish at the NCAA cross country championship in Tuscon, Ariz. Junior Jason Rexing and senior Derek Selling finished 26th and 30th respectively, to earn All-America honors, leading the Irish to their ninth-place finish.

Freshman Joanna Deeter ran individually for Notre Dame's women's team and came away with the highest finish in Notre Dame women's cross country history with her third place finish, becoming an All-American in her first NCAA Championship race.

Stanford claimed both the men's and women's team titles, marking the first time since 1985 that one school claimed both titles when Wisconsin swept the titles. Arkansas' Gladchuk said, "I think the team has new leadership, it's just something that we have hurt the focus and clouded the overall issue."

Henning, the Eagles posted a 16-19-1 record, including a 5-7 overall finish, that before Providence's Marie McMahon edged Deeter out for second, passing Deeter in the final third of the race.

The third-place finish ties her lowest finish of the year, which came on the same course at the Arizona Invitational. Skieresz won the race with a time of 17:04, while McMahon finished in 17:20 with Deeter close behind at 17:24.

"For a freshman to come into her first NCAA race and do what she did is remarkable," said Notre Dame women's cross country coach Tim Connelly. 

She approached the race with such an incredible outlook, focusing on having fun and running the way she likes."

"My goal was just to go out there and have fun," said Deeter. "I didn't want to put any pressure on myself, just to have fun running which I always do, but of course I am happy with my finish."

The men's team continued its success in the 1990's with its fifth top-10 finish since 1990 as the Irish receive strong performances once again from their top-four runners. Rexing, a 1996 outdoor track All-American, was the top Notre Dame finisher as he has been for most of the season.

Selling becomes a two-time All-American for Notre Dame after his 27th place at the 1995 NCAA cross country championship and his 20th-place finish on Monday.

Seniors Matt Althoff and Joe Dunlop finished in 40th and 50th to round out the top four. Strong finishes from their top-four runners was the formula the Irish used to win the NCAA District IV meet on Saturday, November 16 to advance to the NCAA championships.

Henning resigns from B.C.

By JIMMY GOLEN
Associated Press Writer

Boston College coach Dan Henning resigned Monday, more a victim of two consecutive losing seasons than the gambling scandal that rocked the team.

"It has nothing to do with the gambling situation. Absolutely nothing. It has to do with football," athletic director Chet Gladchuk said. "Look at the statistics. Take a look at the record. Take a look at the program.

In three years under Henning, the Eagles posted a 16-19-1 record, including a 5-7 mark during a 1996 season that finished with 13 Eagles players serving suspensions for betting.

"This has been a difficult year," Henning said in a statement. "There have been a number of distractions that have hurt the focus and clouded the overall issue."

"I believe that someone else may be able to take a fresh approach that will benefit both Boston College and the players that are members of this football program."

Meeting with reporters in his office, Gladchuk said he scheduled a routine postseason discussion Monday at which the two stepped back to look at the overall progress of the football program.

During the meeting, Gladchuk said, the two decided together that Henning should resign. "We agreed that it would be better for the program and better for the university that we have new leadership," Gladchuk said. "I think the world of him. He is a quality person. It's just something that wasn't working right now. We agreed that was the case and that's how we decided to move on."

Gladchuk said he had not reached a conclusion about Henning's future heading into the meeting.

And he said he did not remember who first broached the issue of Henning, who has two years left on his five-year contract, resigning.

Cinderella continued from page 16
suffered a knee injury.
"The doctors have told us that Konstantin's knee is fine and will not require surgery," said Berticelli. "There's a good chance that he will be ready for Charlotte.
Also, starting sweeper Matt McNew, who missed the Greensboro game due to a severe case of the flu, will be back in the lineup on Sunday, according to Berticelli.
Having both starters will obviously be beneficial to Notre Dame, who is hoping to continue their improbable run at the title.
"We have a shot at being the 'Cinderella' of this tournament," said Berticelli. Don't get the ever-confident coach wrong though. He fully intends to keep winning.

"We are good enough," said Berticelli, "to get to the Final Four."
The Irish will have to beat a team, in Charlotte, that was ranked No. 2 in the country earlier in the season and remains one of strongest teams around if they do intend to advance that far in the bracket.
"To be successful," noted Berticelli, "you have to overcome adversity. I have a tremendous amount of confidence in these kids believing that they can win."
The seventh-year head coach has been able to encourage the players' faith in themselves and keep the season in perspective at the same time.
"We're not the best team in America," acknowledged Berticelli, "but you can win a national championship without being the best team in the country. You just have to be the best team on the field for ninety minutes in each game."

Men's INTERHALL FOOTBALL

Cocks final victims for Crime

By ADRIAN WILKERSON
Sports Writer

All the ghosts of the "old" Notre Dame Stadium have finally been laid to rest as the Off-Campus Crime defeated the Planner Gamecocks by a score of 6-0 in overtime.

The championship was a heated defensive contest from start to finish, as neither team could produce any sizable offensive effort in regulation time.

Off-Campus was the first team with a scoring opportunity in the game. However, a strong Planner defense denied the Crime from opening the game up early on. Planner could not cash in on the excellent field position handed to them after an Off-Campus punt, as the always impenetrable Off-Campus defensive line forced a fumble in Planner territory.

After a scoreless first half, each team had one great opportunity to score. Off-Campus picked off a Mike Daigler pass and drove deep into Planner territory. However, the goal line defensive setup by Planner prevented the Crime from scoring the touchdown. The opportunity to put points on the board was wasted when Off-Campus missed a field goal.

It was then Planner's opportunity to score a touchdown late in the game. Planner's offense, with a little help from some unsportsmanlike conduct penalties by Off-Campus, came alive. After several attempts to get the passing game going, Daigler connected, on a long bomb, with Bill Clancy to put the ball in Off-Campus territory. Along with several impressive rushes by running back Drew Klosterman, it seemed as if Planner could score the game-winning touchdown in regulation.

However, one thing stood in the way. The Off-Campus defense, which had been strong throughout the game, but seemed to be weakening during the Planner drive, found their second wind and effectively shut down any chance Planner had to punch the ball into the end zone. The end of regulation came and with it, a scoreless tie.

On the first play from scrimmage during the overtime, the Crime ran for a touchdown to score the first points of the game. With the missed extra point, the score stood 6-0 with Planner's possession remaining.

Daigler would attempt four times to put the ball into the end zone, and four times fell short, with two passes literally falling through the hands of the Planner receiving corps. This was all due to the tremendous effort put out by the Off-Campus defensive backfield. The final tally was 6-0.

For Off-Campus, this was the crowning moment in a dominating season that saw them go 4-0 in the regular season and dominate the playoffs. For Planner, it was an impressive final season that saw them go 3-1 and return to the finals for the second year in a row. It was a certainly a fitting end to a grand "old" stadium.

'Cinderella' Irish to face UNC-Charlotte Sunday

Berticelli hopes squad can maintain confidence, advance to 'Elite Eight'

By BRIAN REINTHALER
Sports Writer

When asked what he would say if someone told men's soccer coach Mike Berticelli, before the season, that his team would win four post-season games in a row, including three away wins against ranked opponents, after losing four of their final five contests in the regular season, he responded, "I would tell them they were wrong. I wouldn't think that we would lose four of our last five in the regular season."

That is the kind of confidence that the Irish are playing with at this point in time and the reason for it is the positive attitude displayed by their coach from the outset. This confidence did not just happen at the beginning of the season though. It came through a combination of Berticelli's experience and impressive team wins that made the team believe that they were among the elite in the country.

"Before the season, we were obviously hoping for big things," said sophomore Matt Johnson. "But I didn't think we would do as well as we have."

An example of the team's progress throughout the season was Johnson's attitude before the matchup with the 21-1 Spartans of Greensboro.

"We knew we could beat them," explained Johnson. "We knew that if we shut down two or three key players of theirs, we would win."

Berticelli was also able to make sure that the players avoided excess nervousness going into the match-up with the 21-1 Spartans of Greensboro.

"Don't go out there and worry about losing the game," said Berticelli in the locker room after the win. "We knew we could beat the m," explained Berticelli. "They have national team goalie who is very, very good and (as a group) they don't really have a weakness. They are much like us in that their goal scoring is dispersed among 12 or 13 guys."

Berticelli is clearly aware that the squad cannot afford a let-down on Sunday.

"We are going to approach this game the same way we have approached each game up until now," explained the coach. "We would be foolish to look past the next game. We are going to have to play to near flawless game every time out."

Berticelli also stressed the fundamentals that the team must remain focused on if they hope to extend their season yet again.

"Defensive organization is critical," commented Berticelli. "We have to concentrate on not breaking down in covering for one another. We have to remain organized."

The team will also have to prepare for the possibility that senior midfielder Konstantin Koloskov, who has scored a number of clutch goals in the post-season, will not be able to go on Sunday. Koloskov was involved in a collision with a Greensboro player in the first round and may be out for the second round.

Treadwell 'sets' good example

Wins help Irish gain needed momentum

By JOE CAVATO
Sports Writer

Heading into the Big East tournament this past weekend the Notre Dame volleyball team was hoping to establish some momentum before the season ends.

That is exactly what head coach Debbie Brown got as the Irish (21-9) clinched their second straight Big East Tournament and earned an automatic bid for the NCAA tournament with wins over Syracuse (15-9, 15-6, 15-2) and Pittsburgh (15-6, 15-6, 13-15, 15-10).

"They were the best back-to-back matches we played the entire season," commented the elated Brown. "Offensively we came a long way and it was real good to see a hot Pittsburgh (to) put a decent amount of pressure on us. We really had to respond to it and we came through it real well. So, I was real pleased with everything we did this weekend."

Sophomore middle blocker and tournament MVP, Lindsay Treadwell shared Brown's sentiments.

"We have been looking to improve a lot lately since we're going into the playoffs. We did play a lot more steady and we had one of our best hitting matches. As a team we played more aggressive and more together."

Setter Carey May led the attack, as she engineered .369 and .323 hitting percentages in a 3-0 win over Syracuse and a 3-1 win over the host Pittsburgh Panthers. The semifinal match saw Notre Dame's best hitting percentage since the first game of the year (.384 against Central Florida).

In Treadwell's MVP performance, she racked up 26 kills and just one error an incredible .610 hitting percentage. She also showed her back-court athleticism with 22 digs on the weekend. The middle blocker gives credit for much of her success to her teammates.

"I wouldn't say that I played exceptionally," said Treadwell. "As a team we played better. A middle hitter won't be successful unless her passers are successful and our setters and passers did a great job this weekend. Carey May did an awesome job mixing up the offense."

Treadwell was not the only winner who was honored this weekend, as three others picked up Big East awards. Junior hitter Jaimie Lee brought home the Player of the Year honors while captain Jenny Birkner was named to the all-Big East team and Mary Leyters was placed on the all-rookie team.

Lee has probably been the most important part of the squad as she was forced to play setter for over half the season when Carey May was on the shelf with a dislocated shoulder.

"I think she is very deserving of it," commented Brown. "She has obviously played a huge role for us this year, changing positions and coming back as a setter for us."
