Members find students' actions 'irresponsible'

By TIM LOGAN

Campus leaders criticized student behavior in Monday morning's disturbance at Monday afternoon's Campus Life Council meeting, passing a resolution calling the burning of lots, couches, du Lac and other common areas "irresponsible, dangerous and totally unreflective of the greater Notre Dame community."

Members passed the resolution after discussing possible courses of action and several different aspects of the problem. Mostly, however, CLC members expressed surprise at the evening's events.

"It's shocking to see what students do when they're put in that situation," said student body president Michael Cervone. "I was angry when safety was compromised."

By student body vice president Michael Palumbo. "It would've been nice if they could've policed themselves, but I guess they're not at that level yet."

In a prepared statement, student body president Micah Murphy said the problems were caused by a minority of people present, and that most of the crowd, estimated between 800 and 1,000, was composed of students drawn outside by the blackout and the commotion.

"It appears that the vast majority of the students were drawn outside either by curiosity or inability to work," Murphy said. "However, some of the actions that followed the blackout were irresponsible and unreflective of the greater student body."

Council members generally expressed extreme disappointment with the behavior of some students during and after the blackout, which began at approximately 1 a.m. Monday when an Indiana

Students react

By ERICA THESING

As the campus regrouped after the student-started fires of Monday morning, reactions to student behavior were mixed.

People failed to realize how dangerous their actions could have been, said Kevin Kiefer, a resident assistant in Keenan Hall who helped extinguish fires in North Quad. Kiefer emphasized that he was not upset by students running around the quads and participating in behavior that would not harm anyone, but he was angry when safety was compromised.

"It appears that the vast majority of people present, most of the people here, were continual disgruntled a lot of the time," said Cynthia Haus, Village manager. "There's a feeling of [neglect] because we're not in view, kind of an out-of-sight, out-of-mind thing."

The apartments, off Douglas Road and a mile north of the Golden Dome, are home to 536 people, 84 percent of whom are from abroad. The 107 apartments in the Village house 82 married couples with children. The College Street Apartment complex, a block north of the Village, houses married couples without children for $377 to $398 per month. The two-room, one-bedroom apartments hold 24 couples, although only 21 currently reside.

Many families said they were drawn to Notre Dame's housing because of its affordability, proximity to campus, safety and community. According to a response letter University president Father Edward Malloy wrote one resident, the base rent at the Village is on average $250 below the area market rate.

Families living at the University Village say they dedicate time to building a community. (From left) Etienne Feay, Andrea Feay, Tanya Bollenbach, Katerina Bollenbach, Bjarni Thoroddss and Thorrodur Bjarnason talk and play in a courtyard's sandbox.

Village families live off the beaten path

By M. SHANNON RYAN

Married residents build community, face hardships

After Raina Bhati tells her 16-year-old daughter and 14-year-old son goodnight, she and her husband unfold the futon on the floor of their University Village apartment, changing their small living room into an overnight bedroom.

Like the 81 other families who live in Notre Dame's married student housing units, the Bhatis pay about $400 per month in rent and utilities for a living room, kitchen, bathroom and the two bedrooms. Raina lets her children, Maha and Kartikaya, use.

"The Bhatis, who moved to the Village from India six years ago, don't let themselves dwell on their tight quarters.

"We try not to think of the small space. We have too many other things to think about," said Bhati, a non-student resident whose husband is a humanities graduate student. "We live on the smallest stipend. We try to make it nice and comfortable. I would think [Notre Dame] could give more facilities for [married] students since it is a family-oriented university."

Village Life

More than the street and patch of trees that divide the Village from the rest of the campus keep the administration blind to residents' needs, many said. The Village and the Cripe Street apartments were built in 1963 to provide housing for students with families — men, women and children whom one resident called "beyond doubt, the poorest members of the Notre Dame family."

"A lot of the people here are continually disgruntled a lot of the time," said Cynthia Haus, Village manager. "There's a feeling of [neglect] because we're not in view, kind of an out-of-sight, out-of-mind thing."

The apartments, off Douglas Road and a mile north of the Golden Dome, are home to 536 people, 84 percent of whom are from abroad. The 107 apartments in the Village house 82 married couples with children. Twenty-five families have two or more children. Of the 316 people in the Village, 111 are children, and 12 of those are newborns. Some families of six, often including four school-aged children of both genders and their parents, share the two-bedroom apartment.

The Cripe Street Apartment complex, a block north of the Village, houses married couples without children for $377 to $398 per month. The two-room, one-bedroom apartments hold 24 couples, although only 21 currently reside.

Many families said they were drawn to Notre Dame's housing because of its affordability, proximity to campus, safety and community. According to a response letter University president Father Edward Malloy wrote one resident, the base rent at the Village is on average $250 below the area market rate.
An Ode to Adrian

I know the end of this semester and the spend of your unforgettable years leave this University for good, and there is one Fisher Hall senior who I would like to thank for his presence during the past year or two on West Coast.

Coast neck to another

This one's for Adrian Washington! For those who don't know Adrian Washington, an excellent example of human gratitude, you are certainly missing out. Right now, he lives right across the hall from me. Though we live in rooms right next to each other, we almost always meet on the quad where the token white people hang out during this year. Adrian (also called "Dre") by some, has taught me a little about life. love, enlightenment and happiness.

One of my earliest memories of Adrian is of the time he tried to take up vampire hunting after I showed him how. Even though he wasn't very good at it, he kept trying. I recall fond memories of helping him through Castlevania as he tried to hack away at numerous enemies. He never was able to confront the dark priest Shaff or his father Dracul, but maybe we'll try again once finals are over.

While fighting undead forces was not his forte, Adrian was still undaunted by other challenges. Adrian has tried his hand at playing football, but like myself, he was not successful. Both of us were rivaled for the position of football skills, but we both still had better fare of the undead than most. I remember with fondness how he once got massacred in the game field. (My exploits were also less than exemplary.)

Adrian Washington was even helpful during those times when I felt most desperate: finding the right route to the game field. Despite my many campus contacts, on more than one occasion, it was almost impossible for me to find a date. Yet, when I was in need, the section pim was there to help me! With his vast wisdom in procuring females, always, he gave me food for thought and often helped me find a date. Of course, I didn't always heed his advice, instead relying on my own resources. Though I have no regrets, I can only wonder what would have happened if I actually did take Sage Woodruff's suggestions.

Yet, Adrian Washington's greatest gift to me is yet to be mentioned. He once came down the Thunder Creek brand, with a new flask of a questionable libation. It was marked as Thunder Creek brand, but we knew it by another name. He gave me a sip of this new elixir, and to my surprise I was taken by the power of the potion. I found it was better than any I had tried, and now, I only partake of it. Adrian had a great impact on my college career. I only hope I can find another. And perhaps he leaves this place. I'm not sure it's possible.

San Luis Obispo, Calif.

Police have identified the remains of missing California Poly State University student Rachel Newhouse, said Officer Ambra Brandt.

California Poly State University Sheriff's Deputies identified both remains about 4 p.m. Saturday.

Authorities will not disclose the condition of the remains — identified through dental records — until forensic testing has been completed.

"I have mixed feelings. I'm immensely sad, and at the same time very relieved," said San Luis Obispo Police Capt. Bart Topham, who leads the investigation for the police.

Topham would not comment if the remains were buried or found inside Krebs' residence, but said more specifics will be available at a news conference this morning.

"We're training a bit of a profession­al and objective, but this is not your normal case," said Topham, whose team of investigators conducted several thousand people about the cases.

"You can't conduct this kind of case in public," Topham will be joined at Monday's press conference by State Attorney General Bill Lockyer, the San Luis Obispo County district attorney Gerry Shea, Krebs' parole officers, FBI agents, county Sheriff's officials and county city investigators, along with other law enforcement agents.

Newhouse's remains before 4 p.m. Friday and discovered Crawford's remains later Friday afternoon, police said.

Newhouse has not been charged for the killings of Newhouse and Crawford, but Topham said police plan to file charges against her.

He was apprehended locally on March 20 after authorities identified possession of a simulated firearm and violation of alcohol restrictions — and now sits in county jail.

Newhouse, a 20-year-old Cal Poly student, disappeared Nov. 12, 1999, after walking home alone from Tottila Flats restaurant in San Luis Obispo.

Crawford, a 20-year-old Cuesta College student, was abducted from her Branch Street apartment March 12.

President ends sweatshop negotiations

TUCSON, Ariz.

University of Arizona President Peter Likins Sunday terminated negotiations with student protesters camped out in his office for more than 100 hours, pledging to commit the university to a revised fair-labor resolution.

After exchanging proposals that veered for five days, Likins said "the game has changed" and asserted he will no longer negotiate with the protesters.

"They can stay in the lobby of the seventh floor of the Administration Building until Christmas," he said. "I gave them what they asked for, and that made me realize this was a process of escalation." Avery Kohler, a representative for the University of Arizona's Students Against Sweatshops, said Likins' decision to stop exchanging resolutions with activists is "a negotiation tactic." "Whatever else is the case, we're in negotiations — that was known implicitly from the start," he said.

Students march for convicted killer

HAIRSONBURG, Va.

More than 10,000 people came together in Philadelphia Saturday to show their support for convicted killer Wesley Cook, known to his supporters as Mumia Abu-Jamal. About 18 James Madison University students, including nine from the JMU chapter of Amnesty International, drove for five-and-a-half hours to attend the Millions for Mumia March, said sophomore Rachel Barker, president of the JMU chapter of Amnesty. Mumia was convicted in 1982 of killing Daniel Faulkner, a Philadelphia police officer on Dec. 9, 1981, according to the Grinell Coalition: Who is Mumia Abu-Jamal Web site. Mumia has made statements that he believes the new trial at a hearing in 1995 and failed. Both cases were presided over by Judge Albert J. Thomas, who has presided over more cases that have resulted in death penalty than any judge in the United States.

Board outlines renovations, campus improvements

By COLLEEN MccARTHY
Santa Mary’s Editor

The Saint Mary’s Board of Trustees approved the proposals by Peri’orma Consulting to renovate campus facilities in order to improve student services and recreation spaces. Plans include renovating areas such as the first floor of Le Mans Hall, Angela Athletic Facility and the Noble Family Dining Hall.

The board decided that the overall goal is to reinvest in existing facilities although this may include some new construction,” College President Marlon Eldred said. “The goal is to use existing buildings as much as possible.”

Peri’orma presented the plan to the Board of Trustees last weekend. The result of information gathered by the company during 1998 and 1999, the plan included facets of three previous suggestions presented to the College in March community.

“The Board of Trustees generally approved what Peri’orma had proposed but they made some minor changes,” Eldred said. More possible campus improvements approved by the board include the addition of a swimming pool and better recreational facilities to Angela Athletic Facility.

Haggler College Center will be renovated to house administrative offices, despite one “Peri’orma suggestion that suggested moving the offices to Holy Cross Hall.

“We definitely listened to all the comments that came back, and the overwhelming response was that the administrative offices should not be moved to Holy Cross Hall,” Eldred said.

Renovations to the Noble Family Dining Hall will include the addition of space for campus facilities including a bookstore, travel agency, post office and a general store.

Although there had been a push for the construction of a student center, Eldred said the board decided that creating a single building as a student center went against its objectives.

“There are two reasons the reasoning shifted regarding dispersing the space throughout campus,” she said. “The decision doesn’t diminish the student center kind of space. Rather, it enhances student space by having it throughout campus.”

Besides the first floor of Le Mans Hall, social space will be preserved in Angela Athletic Facility and the dining hall. Some additional food service facilities might be added to Angela and Le Mans.

“You have to try to picture the first floor of LeMans in an entirely different way,” Eldred said.

Stacy Davis, student representative to the Board of Trustees, shared Eldred’s sentiments.

Students were behind the concept of a new student center, but I think Peri’orma took our needs into account in their suggestion,” Davis said. “The concern rather than putting all not necessarily to have to be confined to one building but combined throughout campus.”

The board also adopted Peri’orma’s suggestion to create apartment-style housing on campus.

At the moment, the plan would be to build two buildings at the corner of Madeleva and Holy Cross drive with 100 or so beds configured into apartment-style space, Eldred said.

The two buildings will be built in two phases to accommodate growing enrollment, she said.

The accepted changes will be incorporated into a report to be presented to the Administrative Council next week and at a College-wide community meeting on May 4.

Mariah Eldred, president, Saint Mary’s College

The Saint Mary’s Editor has added the following to the text:

“"These are the major directions we are going with campus improvements, but things can always change as in any project,” Eldred said. "The Peri’orma process has been very good and inclusive. I think the administration and Peri’orma have been very responsive to all feedback. Any process like this means a lot of work and we are coming up with the best plan for the future of Saint Mary’s.”

The board also approved a five percent increase in tuition, room and board.

The increase will raise tuition to $16,994, board to $2,456 and room costs will range from $2,400 to $4,600.

“The tuition increase is an $810 increase, and we were happy to be able to keep it under $1,700,” Eldred said.

Call MATT CLARK at 634-2174 for a helping hand.
A student threw a couch into a bonfire outside Fisher Hall on Monday morning. The blaze was one of six reported Monday night. Students from the quads following a power outage.

Reaction

continued from page 1

"When I saw someone on the fourth floor of Zahm (Hall) throw firecrackers at the crowd, I became irate," he said. "I think that bothers me is that this could have been a lot worse."

Aider said that if the power outage and subsequent fires had occurred on a Saturday night when students were intoxicated, the damage may have been much worse.

Rex Rakow, director of Notre Dame Security/Police, agreed that the situation could have progressed to something more serious. He explained that students did not consider the dangers associated with the fires they were lighting, such as the location of gas lines. He said that the wind could have easily carried debris and started fires elsewhere.

"I was quite surprised at our students, that they would be part of this. I thought at other schools maybe, but not here. It was pretty stupid and juvenile," Rakow said. "I thought that it was a low moment in what I viewed as our student behavior over the years."

The four people working SafeWalk Monday morning also witnessed students compromising safety, said Adrian Cuellar, SafeWakd coordinator. Cuellar, who was among the four working Monday, said that he was disappointed with the student behavior.

"Initially I thought it was something harmless, but in terms of the fires, I thought it was ridiculous," he said. "In a nutshell, I was really disappointed."

Cuellar witnessed students throwing bottles, rocking police cars, racing golf carts and obstructing fire trucks. He said that some students were upset with the fire trucks for failing to slow down as they approached the crowds, but he added that the students didn't leave the Fire Department with any choice.

"The students didn't really give them any option," he said. "It was getting out of hand."

One student who took part in the fire lighting said that he and his friends were looking for something more fun than the fireworks they watched other students light.

"I had been planning on burning my loaf in the quad for quite a while and this was the perfect chance ... I wish I had lit a couch on fire. I'm a little bit jealous of the South Quadthers," he said. "I thought that it was a low moment, this was their first fire, but only one cop."

Green and her friends returned inside to investigate the noise they heard from inside their dorms.

"We saw the couch on fire and we were shocked," said freshman Stacie Green. "I thought it was pretty funny because there were all these students around, but only one cop."

Green and her friends returned inside for a while, but went back out when they noticed a fire behind Alumni Hall.

Flyn said that Security officers were threatening arrests, but many students ignored them.

"People just stayed there and as soon as you heard there was another fire somewhere, people just took off running," she said.

Sophomore Danny Flynn was working a Spanish composition in the LaFortune Student Center computer lab when the power went out. Uncertain about what was happening, he left LaFortune for his dorm, Sorin Hall.

"I proceeded over to Sorin where there were great cheers and jeers were coming," he said. "I thought 'Whatever this is, it's going to be fun.'"

Flyn, who rode the quads for about an hour and a half, said that some of the activity was out of hand.

"It was in the spirit of fun but some people got carried away," he said. "Once the fire got going people started running around for anything to put in. That's when the clothes started coming off."

Hull rectors and residence assistants were the first to respond to the crowds. Flynn said. He notified that students dumped water and other substances on the students when officers responded to the fire behind Sorin Hall.

Littleton remembers slain teacher

Associated Press

LITTLETON, Colo. — Remembering him as a friend and a hero, a town overflowed as 2,500 people said goodbye today to William "Dave" Sanders, the Columbine High School teacher and coach who died while trying to save students' lives during last week's rampage.

One by one, his students — past and present — walked to the front of the school cafeteria and reached into the open book to Healy's 1981 photo album taken in 1981. "I just want to thank him for saving my life," she said. "Mr. Sanders, I thank you." 

Sanders, 47, was the only teacher to die in the rampage, in which 12 students and a teacher were also slain, and the two shooters committed suicide.

When gunfire and explosions echoed around the school cafeteria, Sanders jumped on tables, shouting for students to get out. He ran through the halls, herding students to safety.

"I truly believed he saved my life and many other people's," said Lindsay Dowling, one of Sanders' busi­ness class students, who was in the school cafeteria last Tuesday when she heard Sanders yelling for people to get down.

"He impacted so many of our students," one former student said.

Sanders was on the track team, said Sanders. "I think he was up there playing basketball." 

"I'm not going to make it. Tell my girls I love them," he shouted to his wife and three daughters from his wife's office.

"He was a really exceptional coach," said Laurel Salerno, who also was in the cafeteria, didn't even wait for his shouts. She said the second she saw the serious expression on the usually good-natured teacher, "I ducked underneath the table."

Littleton residents hug each other daily as they visit the makeshift memorial built in Clement Park to remember those who died in the Columbine High School shooting April 20. Thirteen students and one teacher died following a shooting by two gunmen in the school compound. The two gunmen committed suicide during their rampage, police said. 

YUGOSLAVIA

Red Cross visits American captives

Associated Press

BELGRADE

Nearly a month after Yugoslav forces captured three U.S. soldiers along a disputed border, the Red Cross was allowed to see the men Monday, but chances of their release anytime soon were considered slim.

Weary officials cited "political reasons." A Yugoslav leader, meanwhile, as evidence of the first crack in President Milosevic's regime since the NATO air campaign in Kosovo began March 24 and the European Union tightened economic sanctions and halted fuel shipments to Yugoslavia but left the touchy issue of enforcing it with an Adriatic naval blockade to be worked out by NATO.

International Committee of the Red Cross (ICRC) Chief Cornelie Sommeraug said the ICRC "gave no information about the captured soldiers' condition but said a Red Cross doctor and a delegate would pay another visit to them Tuesday. After meeting Milosevic, though, he expressed pessimism that they would be freed before the war ends."

"International humanitarian law says prisoners of war would be liberated at the end of active hostilities," he added, "but we are not at this point at the moment." 

Sommeraug said the ICRC would work to reorganize its mission in Kosovo after receiving security assurances from Milosevic.

"I was able to talk to them only a few minutes," Sommeraug said. "We looked into each other's eyes and shook hands very warmly." 

Sommeraug said "it was not possible to have a full fledged ICRC visit in accord with the provisions of the Geneva Convention" but that he had given the men information about families and papers to write back. Sommeraug also said the ICRC would work to reorganize its mission in Kosovo after receiving security assurances from Milosevic.

White House spokesman Joe Lockhart said Monday's meeting came "25 days late" and represented a "bare minimum" of what international law requires in terms of access to war captives. He said the three "appear to be in good condition."

Those held captive are Staff Sgt. Andrew Ramirez, 24, of Los Angeles; Spc. Steven Gonzales, 21, of Huntsville, Texas; and Staff Sgt. Christopher Stowe, 25, of Smillie Creek, Mich.

When told the Red Cross would consider seeing the soldiers' father, Jim Stone of Avoca, Mich., said, "Yippee! That's absolutely wonderful news."
**Housing**

continued from page 1

"It looked the safest and the cheapest here," said Andrea Federman, the SGA (Student Government Association) representative. "Plus, the Midwest has a cheaper cost-of-living index, which helps. There were other children, which was really important to me, too."

When graduate student Claudia Vincentes was moving from Brazil, living at Cripe Street was the easiest option for him from Brazil, living at Gripe Street. "You don't have the connections," which was really important to me, living in the Village, which helps.

"They really helped us, telling us where to get groceries or how to get our driver's license. The University sets you up."

"The Village neighborhood is an added bonus for those adjusting to new surroundings. When Bjarnason walks around Notre Dame's campus, he said he can't help but wonder where the University's priorities stand. "Malloy's tone is the letter that will cost us the most," he said, "but then you look at the intricacies of sidewalks around campus. It's an absolute wonderland. You can see the mixture of architecture, family and Catholic values and the needs of families, and of students, and what they do for us."

Bjarnason pointed out that the five to 10 percent annual rent increases are jumps unsmoothed by the slower stipend increases estimated at about 2.5 percent. "Most graduate students rely on the stipends, which are set according to factors like families' needs and students' levels of study, to pay rent, utilities and to buy food and clothing."

"The idea of students being parents doesn't click [with administrators]. The idea of how graduate students don't click, said Bjarnason. International families could especially benefit equal stipends and rent. Many do not qualify for work visas and because none is available to answer questions from international families often go without health care. "There's no way of doing it; it's too expensive," said Kachmara, who, like other residents, receives $500 per academic year from the University to use in the Village into campus life may be a self-supporting place. "Sometimes you need a sitter and they're going to have to give up some of their freedoms."

"University has spent approximately $1.3 million on the Village. The weekly meetings, birthday parties, four computers and a printer in the center's lab. "In the time I have lived at the University Village, I have noticed positive changes in how much more the University administers to the residents, recognizing the united voice of the Village residents," said Frey, a resident of two years. "They probably due to efforts from both sides."

- Representatives from Zeneca pharmaceuticals and other pharmaceutical companies will answer questions anyone may have about breast cancer and the products available to treat and prevent it.
- Representatives from St. Joseph and Memorial Hospital specializing in breast cancer will be available to answer questions about breast cancer research and development.
Morgan disputes Cahill’s ‘Irish’

By MAUREEN SMITHE

The Irish do not deserve as much credit as they are given in Tom Cahill’s highly acclaimed book "How the Irish Saved Civilization," said philosophy professor Dermot Moran in a lecture presented by the Snite Museum of Art on Monday.

"Not in the sense that they gave insights that were available in classical arts—-they were curators," Moran said. "The question is what was conserved by the Irish, not saved." Moran considered the book to be "well written," he observed that Cahill pays no attention to the growth of the Byzantine empire, he said there are echoes of Roman pottery and coins have been found, but there is no evidence of any real military, legal or political Roman occupation, Moran observed.

The introduction and flourish of Christianity on the island during the Dark Ages is an area of extreme importance, according to both Moran and Cahill.

"It is quite extraordinary that it took so quietly. There is no real explanation as to why Christianity took hold," Moran said.

A missionary movement, Irish monasticism valued literacy and learning, Moran explained to the audience. "The figure of the learned, wise person is something that Celtic culture recognized and encouraged," he said. This may be why the Irish are credited with saving certain aspects of civilization.

"One of Cahill’s points that I think is accurate is that the Irish church developed without a martyrology, which was a feature of Latin Christianity," he said. "The Irish developed a martyrology of their own which consisted of exiles. Groups bound by kinship and marriage saw isolation as death."

This exile led to a hermit movement in the sixth and seventh centuries, Moran said. "Monks would set sail without maps or provisions and go wherever it was that God would bring them — it tested their faith, and as a result the missionaries were set up," Moran said.

The missionaries were where many aspects of civilization were conserved, according to Moran. There, the Irish produced the first treatises on the responsibility of rulers, collected canon law and preserved the knowledge of Greek and Latin languages when they were nearly lost on the continent, he said.

"We have to piece together the importance of Irish contributions from their presence in the background — as teachers and copyists of books, for example," Moran said. Without a doubt, according to Moran, who is visiting from University College Dublin, "the Irish did save the Celtic heritage."

Philosophy professor Dermot Moran discusses the contribution of the Irish in his lecture on the Tom Cahill novel "How the Irish Saved Civilization."

Project to promote breast cancer awareness

By ERIN PIGOTTE

While many Notre Dame students frantically write papers and cram for tests, students in professor Chuck Lennon’s management class focus on a project to raise breast cancer awareness through a Notre Dame baseball game.

"It’s really exciting," said student Bridget Monahan. "We’re actually doing something. We’re not just regurgitating facts and information."

"Our project for the class is to put on this baseball game," said student Tom O’Hagan.

Tonight at 7 p.m. in the Eck Baseball Stadium, Notre Dame will play the University of Illinois-Chicago in the first Breast Cancer Awareness Baseball Game.

The class is divided up into different sections: planning, organization, leading, evaluation, controlling and event team," said O’Hagan.

Each group focused on their specific responsibilities while collaborating with other groups to ensure coordination of the entire project. Although the class develops important management skills, the service aspect of the course is one of several service-learning courses offered by the University, said Lennon.

"When we started the class (Lennox) said that we were going to do this for breast cancer," said Monahan. "It just hits you. Maybe you don’t think about breast cancer or you don’t know someone in your life someone you know will have it."

"One of the main purposes of the game, which is the only Notre Dame baseball game of the year free to the public, is to raise breast cancer awareness."

"We hope to raise an awareness that cancer, especially breast cancer, can be cured if detected early," said Lennon.

Ribbons will be handed out at the gate and the game will also feature a variety of educational opportunities.

"We have doctors and nurses from Memorial and St. Joseph’s hospitals," Monahan said. "We’re going to have a bunch of booths for information."

The booths, which will be open before and during the game, will also host representatives from Zeneca pharmaceuticals which is developing a new breast cancer treatment drug.

In addition to the serious purpose of breast cancer education, the event promises entertainment as well.

The fans will be able to watch the successful Irish baseball team which is currently leading the Big East conference.

The baseball team has been an integral part of the event. Three players — Jeff Felker, Ben Cooke and Danny Tamayo — are members of Lennon’s class.

"The baseball team has been very supportive of the project," said O’Hagan. "Anything we want to do, (coach Paul Mainieri) has been willing to help."

The students were evaluated on the purpose of each section of the course, however, today’s game will reflect the success of the semester-long effort.

"The attendance at the game (Lennox) said that we were going to do this for breast cancer," said O’Hagan. "We have doctors and nurses from Memorial and St. Joseph’s hospitals." The coth will be free.

The first 200 fans will receive free T-shirts, with a breast cancer awareness message and an airplane ticket to be given away during the game. Although there is no admission charge, donations will be accepted for Notre Dame sponsorship for the Avon cancer survivor walk.

The course will be offered again next semester, culminating in a breast cancer awareness women’s basketball game on December 1.
WANTED
For Bookstore 2000

Replacement point guard for Moreau Seminary team, #28 seed Nunc Dimitiss. Must be able to move the ball up the court and have excellent outside shot. Frequent Mass attendance a plus. Will team with manic priest-guard named Doyle. For tryout, contact:

Fr. Jim King, C.S.C. or Fr. Bill Wack, C.S.C.

Children suffer most in Kosovo

By ERICA THESING
Associate News Editor

The sanctions regime is a direct consequence of the Kosovo crisis by the United Nations. The international community has been divided over the issue of the embargo, with some countries arguing that it is economic sanctions against Serbia and九江 that are actually causing the suffering of the people of Kosovo. Others believe that the sanctions are a way of putting pressure on Serbia to end the conflict.

The situation in Kosovo is dire, with thousands of people displaced from their homes and living in makeshift camps. The United Nations has been working to provide humanitarian aid to the affected population, but the situation remains challenging.

The UN High Commissioner for Refugees, Sadako Ogata, has called for increased humanitarian assistance to those in need. She warned that the situation could deteriorate further if the international community does not come together to address the crisis.

Meanwhile, the United Nations has announced a new round of sanctions against Serbia, targeting its financial assets and trade embargo. The move is seen as a way of increasing the pressure on Serbia to end the conflict and allow the return of refugees to their homes.

However, many observers remain skeptical of the effectiveness of these sanctions, calling for a more comprehensive approach that addresses the root causes of the crisis. The international community must work together to find a lasting solution to the Kosovo conflict and ensure the safety and well-being of all those affected.

The pro-life movement often receives the label "anti-abortion" as both insiders and outsiders misunderstand its objectives. Wholesomely, it seeks to defend all life. I admit for a time I called myself a pro-life-but later, thoroughly thought about abortion. Issues like capital punishment, euthanasia or physician-assisted suicide never crossed my mind. Until last year.

John Linn

My father spent two months in a hospital before passing away in 1998 after suffering his fourth heart attack. During that time, doctors told us that he had little chance of recovery, if any. Several of my parents and uncles considered "letting him go" by authorizing a physician to give him so much morphine that he would never be able to breathe, not fully understanding the grave implications of such a course. This would have been a painless death, but my parents said no, that it was wrong to do anything to cause him to die. Not only would we assist in killing him, but we would lose those last days on earth with his loving family and those last moments spent in reconciliatory prayer with God. Instead of letting him go, my father asked that no extraordinary measures be taken to keep him alive artificially. He did not want to live simply by the power of a respirator, but he wanted to be fed, cared for and respected as a living person. He was treated according to these wishes, and he died perfectly conscious and peaceful.

What's this got to do with the pro-life movement? Well, letting my grandfather live was not an act of euthanasia, a mercy killing. What's wrong with a mercy killing? Doesn't it just hasten the inevitable, giving someone who's going to die anyway the chance to die sooner? Isn't it better to help the elderly or terminally ill person to die than to allow them to live in loneliness and at great financial expense? I mean, the dying person is about as valuable as the person would be dead, right?

Of course not. None of these are good enough reasons to administer a dose of morphine or Versed so large that its sole effect is to relax the chest muscles, preventing a person from taking a breath. Nor do any of these warrant a dose of potassium strong enough to stop the heart or, in the worst possible case, a suffocating pillow over the face. One can certainly understand that these measures are morally reprehensible and should never occur.

Unfortunately, euthanasia appears in other forms. Sometimes, physicians may remove the nourishment of feeding tubes and intravenous fluids from a patient, effectively starving the person. Again, most will agree that starvation is not a proper way of "helping" someone, even if the intent is to hasten death.

Yet, the phrase "hastening death" sits the moral juices as well. Doctors and family members hasten death for several reasons—money, loneliness and convenience for all parties involved—that aren't quite morally sound. Euthanizing a person to save money on hospital bills implies that the savings are more valuable than the life of the patient, the loved one. Hastening death in order to save the dying person and his family from suffering human emotions above the sacred value of life itself. Euthanasia reduces human life to nourishment, robbing someone—someone who is loved, who is wanted, who is in need—of his natural right to live and die with dignity. It also impedes the natural progression of life by failing to recognize that dying is itself a part of life. The time that we speak of as "the last moments" is the presence of dying, not as a part of life than birth or growth. The growing trend in society to write off these last moments of a person's life poses a threat to all who are not perfect, who cannot take care of themselves and who need special attention.

In order to overcome this increasingly common inclination to hasten death, a compromise must be developed, one that allows a person to finish life naturally yet comfortably so that he or she might enjoy those ever important final days without pain and without suffering. For there will be cases in which a person in extreme pain has little chance of recovery, and these must be handled in a way that not only appeases the individual's needs but satisfies the family as well.

Pro-lifers support the practice of palliative care, as a solution which does not aim at hopelessly efforts to cure an incurable person but, rather, efforts to ease suffering in a moderated fashion. A patient receives pain medications like morphine in a dose that alleviates discomfort while allowing the individual to remain lucid and alert. Through this form of treatment, all are satisfied. The patient is comfortable and can interact with those around. The family can talk with their dying grandparent with the assurance that he or she is at peace. The doctor can find solace in the limitations of medicine. By forgoing futile treatments that may cause further suffering, a person is allowed to rest at ease with their family a formal time, a gift more valuable than life on a respirator.

The value of such care cannot be overstated. If palliative care is not practiced and euthanasia grows more common, the quality of care administered to the dying will plummet, most notably among those with a decent chance of recovery.

My father administered palliative care to my dying grandfather. He did not euthanize him by knocking him out with medications that would render him lifeless and unconscious, at the same time, he did not turn to drastic measures in a desperate attempt to prolong his life. Instead, my grandfather lived his last weeks in peace, feeling little pain but knowing a great deal of love. One of the last things he wrote on his clipboard at the hospital was a word of thanks for allowing him to live in peace and to die in peace... to receive the sacraments one last time... to hold his wife's hand one last time... to hold his new granddaughter for the first and last time. I have never witnessed such an incredible outpouring of love and compassion to another person as that one. As I sat at his bedside, I thanked God for the gift of life in my grandfather. I had never loved him as much as I did in those precious moments. The practice of euthanasia should be resisted precisely because it would have robbed my grandfather and my family and the society of those last moments.

John Linn is co-president of ND Right to Life who believes that all truth comes from Real Genius. For all those who don't understand what he's talking about, see the movie.

The views expressed in this column are those of the author and not necessarily those of The Observer.

"No one won the last war, and no one will win the next." — Eleanor Roosevelt
There are three ways — intellectual, rhetorical, and ecumenical — that Mr. Novak avoids accountability to Catholic social doctrine. His response to my columns even hints at the notion that my primary concern is not Mr. Novak’s intellectual misrepresentation of my writings as if they were orthodox. To put it in Mr. Novak’s terms, the onus is on me to prove meaningful and effective accountability to Catholic social doctrine.

Sarcasm: “Most men and women of the political left, rather than the political right, presuppose the existence of collective rights as one of the most important universals in human society. The existence of collective rights is unconnected with any larger moral vision... The political right, on the other hand, is more interested in the protection of individual rights than collective rights.”

Novak often relies on what can only be described as the “category error.” Novak misleads the reader by using the following text: “If one points these facts out, Novak will be able to reduce the market economy (under capitalism) to a mere mechanical, automatic, and impersonal system of exchange...”

In fact, I dealt with the difference between economic rights (e.g., the right to work and the right to pursue economic advantage) and political rights, and the claim that they have the same meaning in Novak’s work. Novak’s fudging, once more, of John Paul II’s clear distinction between economic and political rights is thin, the texts “do not bear the weight” that those who affirm them apply to them. Novak’s response is a mere pretext, a desperate attempt to deflect the weight of the evidence against his argument.

George Weigel’s distinction between sexual doctrine (required) and social doctrine (optional): to say that they are “essentially different” is, in the end, to say that we do not have to take them seriously as rights — that is, to claim that they are not real or valid. If they are not real or valid, then Novak’s attacks on them are completely unjustified.

Novak’s response to my columns is an act of, to use Novak’s term, the “old heresy.” Mr. Novak is a Heresiarch. His dissension is not an act of personal integrity or intellectual honesty. His dissension is an act of the same kind as the dissent of the “left,” the dissension that was not wrong until church teaching (optional) was set aside.

Novak’s dissent then? First, distinctions. Novak’s claim that the two kinds of rights are “essentially different” is, in the end, to say that we do not have to take them seriously as rights — that is, to claim that they are not real or valid. If they are not real or valid, then Novak’s attacks on them are completely unjustified.

1998-99 ~ The Before the A Year

In the beginning ...

The new semester brought four major changes in the social structure of the community.

After a year of renovation, South Dining Hall opened with a puzzle-like organization, but still gained praise. By extending its dinner hours to 9 p.m., it certainly accommodates students whose late-night eating tendencies didn't work with the old 7 p.m. dinner deadline.

The south side of South Dining Hall includes Beckers, a 24-hour restaurant specializing in smoothies and sandwiches. Along with LaForte's new Burger King franchise, these establishments provide the campus with a greater variety of non-meal plan opportunities.

To pay for those visits to Beckers or Burger King, the meal plan was also reformed to include Flex-14, giving students 200 buckaroos per semester to use at food-stops around campus.

... the new and improved book worship depot begins an ecclesiastical era for student textbooks ...

The Eck Center opened south of Morris Inn, housing a visiting center, the headquarters for the Alumni Association and the Hammes Notre Dame Bookstore. Though criticized for its distance from much of the campus, the bookstore still gained praise for its aesthetic pleasures. Nothing can be said about its crowd effectiveness until the fall, when football season brings in the masses.
... music and movies make the world smile ...

Third Eye Blind visited Stepan Center in the fall, while Brunchard Muraldi grazed that geodesic dome in the spring. They provide a needed respite from the monotony of life at in South Bend.

Touching earphones across the nation, teen sensations 'N Sync, Britney Spears, and the backstreet Boys get cheers and jeers from immature and mature audiences alike, while Larryn Hill's "Misdirection" kicked butt at the Grammys. In the movie scene, "Bush Floor," "A Bug's Life," and "Enemy of the State" dominated the fall movie season, while "Patch Adams" and "You've Got Mail" raked in the bucks during the holidays.

Early '99 allowed only two real hits with "Analyze This" and "The Matrix." Otherwise, audiences have thrown the onslaught of non-high school flicks back into the faces of Hollywood studios.

... and then the fish ...

Everyone's favorite sea creature made appearances at several football games during the football season. From frogs to fish to squid, the student section was given an unexpected biology lesson during Notre Dame's most traditional tradition.

... and then the fish ...

Everyone's favorite sea creature made appearances at several football games during the football season. From frogs to fish to squid, the student section was given an unexpected biology lesson during Notre Dame's most traditional tradition.

... all that snow ruins travel plans ...

After an unorthodox fall semester that saw sary a snow flake, weather persons across Michiana thanked God for the New Year's winter attack. Throughout winter vacation and into spring break, the sky screamed at the earth, dumping loads of snow across the nation, delaying airplane travel and making the lives of students a living hell. This weather continued until rays of sunlight began to break the morale of the clouds. Unfortunately, the harsh winter turned into a rainy spring, making the month of April the second wettest on record in South Bend.

Hey, video game reviews

"Asteroids" ★★★★★ (out of five)
By JAMES SCHUYLER
Scene Writer
In the category of nostalgia from the file cabinet that is the mind, a video game that one played as a kid is not something that anyone would mention, for one simple reason: Most of them were ugly and clunky and a disgrace in light of what is available to the avid gamer today.
It was, therefore, rather surprising how much excitement there was when Activision decided to revamp and remaster the arcade classic, "Asteroids." Unfortunately, the excitement effect soon disappeared. Although filled with better graphics, many more ship designs and an abundance of weapon options, the game has made little real improvement. There is still a ship that sits in the middle of the screen, things still fly in and out of the screen and the player's ship can move around the square section of space that imprisons it. In a comparison between "Asteroids" and other games, "Asteroids" is downright boring. What is the game good for? Well, besides a extra-large and very expensive coaster, it will keep anyone gamer from having to do a whole lot of thinking, as he or she just sits there and presses buttons.

"Apocalypse" ★★★★★ (out of five)
By JAMES SCHUYLER
Scene Writer
The easiest way to see how far Hollywood video games have come in the last few years is the fact that they now feature Hollywood's favorite actors in starring roles. Activision's "Apocalypse" was surprising in that an actor would put his name on a video game that was not first a movie. Bruce Willis' likeness and voice were used for the persona of the main character of the arcade game.
To determine how good the game is, one must begin with the fact that "Apocalypse" is virtually plotless. There is some semblance of a plot, but it in no way affected the game-play, which involved a lot of running and shooting and not much else. The developers of the game wasted too much time on the non-live action, which should develop the plot, and far too little on the actual game-play.
Case in point: The most common way to die in this game is by falling from a height. It was rather strange that no matter where the character went, he was still at a great height, able to avoid flying robots, but never the edge of a platform. This became annoying.
There was no strategy needed to advance from one level to another, besides realizing that the things shooting at the character would stop when blown up. The game was fast-paced, but sometimes it became too fast. The game took very little time to gain victory. "Apocalypse" is a game that should not receive much repetitive play after a first attempt.

At the same time, even though our customers have experienced success at the store, we would like to remain responsive for replacing our graduating players who are leaving the program. The number of our returning players will vary, so your patience with the newcomers will also be appreciated. We thank you in advance for continuing your goal of proceeding as a program.

Connor Dunlop has set to date six seniors from the 1998-99 squad excluding four members of the starting line-up. Those players include Ben Beno and Troy Sagan, All-American defenceman Benoit Corin, and goaltender Kirk Urris. Daphnade and Corin combined for 319 points in 430 games in the other Irish losses to graduation include center Craig Hugck and defenceman Whitney.

Dunlop - who helped the U.S. team play second in the 1998-99fourth place in the USHL - could provide tremendous experience to the team's center component of centers, which includes seniors-to-be Ben Beno and Troy Sagan.

A known as a clever playmaker, Dunlop was named an All-USHL player in 1998-99. Dunlop totalled 46 goals and 56 assists in 136 games with the U.S. Development Program during the past two seasons. He contributed 23 goals and 42 assists over 70 games in 1998-99. His father Blake Dunlop played 11 years in the National Hockey League with the Minnesota North Stars, Philadelphia Flyers, St. Louis Blues and Bed Wings. Wroblewski, at 6-foot-1 and 209 pounds, will bring his power-forward style of play to the Irish program and could play any forward position. As a winner with the Irish program, he totalled 32 goals and 43 assists.

Connor, John and Michael all have the ability to make a major impact as first-time USHL all-star. The 6-foot, 190-pound Connor has great all-around skills as a tremendous competitor and dynamic play-maker who could end up playing as a first-line unit. John has great hands and reach-combined with a strong work ethic and will give us a great power forward who can play on eight or nine goals.

Harry is a classic stay-at-home defenceman who will join an Irish team that returns seven of the top-eight players from a 1998-99 squad. Harry set the Irish record for team goal-saving in 1998-99. A blueliner who didn't begin playing hockey until he was nearly seven, he was the 6-2, 195-poundHarry registered four assists in two seasons with the U.S. program and helped anchor one of the USHL's top penalty-keiling units.

Zasowski - a stand-up goalie known for his competitiveness and willingness to challenge shooters - is expected to challenge Kimento and junior-to-be Kyle Koglut for time between the pipes. When named first-team USHL all-star. The 5-foot-11, 182-pound Zasowski currently is playing in the USHL's championship series, the Clark Cup, and ironically is facing shots from one of his future teammates - junior-to-be Maxime-Chin who plays for the rival Des Moines Buccaneers.

Zasowski set a USHL record in 1998-99 for victories and tied a league record with seven shutouts. In addition to a great season, he has a very competitive style against and 20 draws per season in the USHL in goal in 1998-99, earning him the consideration for the NCAA tournament. The charge is 3 cents per character, plus $1.00 per display. The Observer reserves the right to edit classifieds for content, wording or length.
Martin, 33, has one game to go. 

"I have been so fortunate to be able to play with so many great players," he said. "I have always felt that it was a blessing to be able to play with such talented people." 

When asked about his future plans, Martin said he is still considering all options. 

"I am just going to take it one day at a time," he said. "I will make a decision when the time is right." 

-End-
Tigers blast past Mariners, 7-0

Associated Press

SEATTLE
Juan Encarnacion and Kenji Johjima homered off Jamie Moyer, and Brian Moehler shut down Seattle as the Detroit Tigers beat the Mariners 7-0 Monday night.

Moehler (2-3), who pitched three shutouts last season, allowed seven hits in seven innings, striking out two and walking none. Doug Brocail and Mel Rojas finished with perfect relief.

Moyer (1-3) lost in his first start since signing a $16 million, two-year contract extension that makes him the highest-paid pitcher in the history of the Mariners. He gave up five runs, 11 hits and three walks in seven innings, striking out seven.

Moyer, whose ERA dropped to 7.64, has allowed eight scoreless innings in 12 innings so far this season, with 15 hits, with Encarnacion and Matt Mantei each going 3-for-4.

Twins blast past Mariners, 7-0

Boston stranded 12 runners in 12 first-inning innings. The Red Sox got their only run in the third inning when Jose Offerman singled and scored on John Valentin's double.

Jeff Bagwell hit a solo home run, his first of the year, in the ninth.

Tigers hit three last season, Detroit 7-6-4, has allowed eight scoreless innings in 12 innings so far this season, with 15 hits, with Encarnacion and Matt Mantei each going 3-for-4.

Louisville, Ky.

Bob, Wayne and Nick have combined to win the Kentucky Derby six times in the 1990s, and it wouldn't be surprising if one of the horses is in the winner's circle again Saturday.

"I feel good about this Derby," Bob baffert said. "I've got two horses who are contenders. I hope one of them wins."

If General Challenge or Prime Thunder — first and second, respectively, in the Santa Anita Derby — does win, Baffert will be the first person in any racing capacity to win the Kentucky Derby three straight years.

The last horseman to be in position to win three straight was Wayne Lukas. He sent out Thunder Gulch to win in 1995 and followed with Grindstone, but in 1997 his Deeds Not Words finished 13th as Baffert won with Silver Charm. Baffert's last winner was Real Quiet.

Lukas will try to return the favor at Churchill Downs when he sends out Charismatic and Cat Thief.

"I think the horses that are battled-tested will be there at the end," said Lukas. "That's the two colts certainly are just that."

Charismatic, fourth in the Santa Anita Derby and a winner at Keeneland, will be making his 15th start. Cat Thief, winless in four starts this year but second twice and third once in the Derby, will make his 13th, will be going to the post for the 12th time.

"I'm grateful to be in this position," said Nick Zito, who will try to win his first Derby since 1994 (Go for Gin), winner of the Wood Memorial at Aqueduct, and Stephen Got Even, winner of the Gallery Furniture.com at Turfway Park.

Zito likes the Derby rivalry he's formed with Baffert and Lukas.

"I would love to finish it off," he said, "I would love to have that honor."

Zito also said he didn't want to see the 1990s end with four trainers having two Derby wins apiece. That would happen should Carl Nafzger win with Florida Derby winner Viceroy. Nafzger won in 1990 with Unbridled, his only previous Derby starter.

Besides Nafzger, the only other Derby-winning trainers in the last nine years not named Baffert, Lukas or Zito were Lynn Whiting (L. B. Baffert) in 1992 and Mac Miller (Sea Hero) in 1993.

"I'm not a rivalry guy," Baffert said when asked about Lukas and Zito. "I won the last two, so I don't see it as a rivalry."

"I don't think of it that way," Lukas said when asked about rivalry. "Each of these is a separate race," he said. In other words, the real stars of the show — the horses — are different every year.

Lukas also said with a smile, "One guy's got three Derby wins and the other two guys have two, so it's catching up for them." Lukas also owns the Derby with 1990's runners winning Colors in 1988.

Lukas' stable worked both of his colts five-eighths of a mile in the rain Monday. Cat Thief went six furlongs in 1:13 3/5 while another colt and went 1:02. Charismatic worked in 1:02 3/5.

Mike Smith will ride Cat Thief Saturday and Chris Anley will be aboard Charismatic. "They were just workouts," Lukas said. "I don't put much stock in workouts."

Because of the rain and sloppy track, Zito postponed Baffert's and Lukas' Saturday 2-5. Chris McCarron, who will ride in the Derby, was up for the workout. Jorge Chavez will ride Adonis.

Adonis will be making his seventh career start, while Stephen Got Even will be making his sixth, and possibly entering the Fifty Excellents' Meeting in the Derby, worked each of his colts three-quarters of a mile last Friday.

The strapping General Challenge is set to make his sixth start. Prime Timber will go in the post for the seventh time.

It appears there will be 20 horses starting the Derby, scheduled for Saturday, May 21.

Hurricanes blow by Bruins, 3-2

Associated Press

BOSTON

A disputed third-period goal gave the Carolina Hurricanes undisputed possession of the lead in their playoff series against the Boston Bruins.

Andrei Kovalenko's skate was in the crease when the puck got past Byron Dafoe 2:54 into the period. The Hurricanes then held on for their second straight period. The Hurricanes then took a 2-1 lead in the series, but a return game in the best-of-seven Eastern Conference quarterfinal Monday.

The Bruins tied the game at 2.

The Flyers had been miffed by hard checks by Kris King and Steve Sullivan pushed it ahead to Johnson. His weak backhand bounced the puck off the boards after the faceoff at center ice, stunned by Johnson's goal 10 seconds later. Chris McAllister was looking to his left and didn't see the puck until it was in the net.

But the emotional lift was short-lived for the Flyers, who were stunned by Johnson's goal 10 seconds later. Chris McAllister bobbled the puck off the boards after the faceoff at center ice, and Steve Sullivan pushed it ahead to Johnson. His weak backhand surprised Vanbiesbrouck, who had his stick in the air and his feet nearly crossed as the puck deflected in off his skate.

The Bruins tied the game at 2-2 on a goal by Game Two, but the chippy play that some expected didn't really develop.

Working the left point, Dykhuis waited for LeClair's screen to develop and fired a shot that whizzed between LeClair and Mikael Renberg. It went over Joseph's right shoulder with 3:44 left in the period. Joseph, nicknamed "Cujo," was magnificent. He made 11 saves in the third, stopping John LeClair from the side of the net for save No. 33. His 15th save was spectacular, too. Joseph tipped Keith Jones' backhand out of the crease and then stopped a shot from the point and a rebound for saves No. 38 and 39. He finished the job with 4 1/2 minutes left, absorbing a shot by Rod Brind'amour with his chest and pounding on the rebound.

The Flyers had been miffed by hard checks by Kris King and Steve Sullivan pushed it ahead to Johnson. His weak backhand bounced the puck off the boards after the faceoff at center ice, stunned by Johnson's goal 10 seconds later. Chris McAllister was looking to his left and didn't see the puck until it was in the net.

Klein leads ND to 12th-place finish

By MOLLY McVOY

The best season in Belles' track history continued Saturday as the team defeated DePauw College, 77-67. "I think all of us ran our best to win it for the team," Sarah Gallagher said. "It was great."

The meet's outcome came down to the last event -- the 400-meter relay. The team of junior Martina Long, sophomores Genevieve Yavello and seniors Gallagher and Stacy Davis pulled through for the Belles to win the meet with a combined time of four minutes and 36 seconds.

"It was so exciting because it came down to the last race," said Yavello. "And it felt great to win it." The 4x400 was not the only excitement for Long in the meet, as is expected, also won the 100-meter dash with a time of 12.08 seconds. The Belles were strong in nearly every respect on Saturday. In the field events, they won discus, javelin, high jump, triple jump and took second in the shot put.

Junior Allyson Treloar dominated the hurdles, leading the javelin with a winning distance of 116 feet one inch. Freshman Erica Burket continued her outstanding freshman season winning both the 100-meter hurdles and the high jump for Saint Mary's. Burket holds the Saint Mary's record for the 100 with a time of 16.00 seconds. As it has been all season, the distance team ran strong against DePauw. Yavello took second in both the 800-meters and 1,500-meters. Gallagher also ran well in the 800 winning the event in 2:17.02. Gons won the 5,000-meters and took second in the 3,000-meter. With this win, Saint Mary's moved ahead of DePauw in the league. The Belles now stand in sixth place overall.

The last meet for the Belles is the MIAA conference championships next weekend at Alma College.

"We're hoping to really step up and compete well," Gallagher said when asked about the Belles goals at the conference championships.

SMC loses two games to Chicago

By TRACY HARBER

Saint Mary's took on the University of Chicago in a Monday doubleheader, winning both games, 11-5 and 4-2.

The Belles started the first game strong. Starting sophomore pitcher Anne Seeger only gave up two hits in the first three innings, and the defense was busy, especially senior rightfielder Diane Andrews. Chicago's offense got strong in the fourth inning, scoring eight runs on six hits and two errors. Chicago catcher Staci Raci also had a strong game, collecting the Belles scoreless. The Belles lost the first game 0-11.

"We played hard in both games, but we just couldn't pull it out," Seeger said. In the second game, the Belles came back strong. Freshman pitcher Kristin McTavish gave up no hits until the third inning when she gave up two singles and a run. Her stellar performance earned Martin a fifth place league ranking.

Saint Mary's record in the bottom of the third on a single by junior Sarah Martin. They also scored on an error in the fourth. The score remained 2-1 until the top of the sixth inning when Chicago's Michelle Darro hit her second home run of the day, tying the score, 2-2.

The Belles fought their way into extra innings, but the well disciplined Chicago hitters came back in the top of the eighth to bring the score to 3-2 and win the game.

The Belles will play Husserl College Wednesday before ending their season. "We are going to try to put the games today behind us, look ahead to Wednesday, and end the season with a couple of wins," Seeger said.

really excited to run the 100, I haven't got to do it all year."

Her time found her in the record books with the third fastest time in school history with her 11.82 second victory. She also broke a record in the 200 m to route to a 23.77 second victory.

Grow's performance was not the only show stopper of the day on the women's side. Kellie Saxen won the high jump at 5-7 and Carri Lenz claimed her second victory of the year in the 400.

In addition, sophomore Heather O'Brien covered 5,000 meters in 18 minutes, 24.47 seconds on her way to victory.

The men's side also held its share of winners on Saturday. Travis Davey picked up his first win in the 100. Freshman Pat Conway and Mike Mansour also had strong performances in the sprints as well.

Terry Way also contributed with victories in the 200 and a second place finish in the 400.

continued from page 24

while striking out six of the batters that she faced.

Offensively, Kriech, Lizzy Lemire and Eimen all had two hits for Notre Dame. Lemire had two of the Irish's 12 hits and Eimen once again was a perfect 2-for-2.

In game two, Bessolo worked four and a third innings, allowing only one hit while striking out six Friar batters. Akire worked the final two and three-fifths innings to pick up the save.

The Irish managed only one run for the game, which came in the third inning with two outs. Amy Lake walked and then stole second base. Akire then followed with a double to drive in Lake and give the Irish the 1-0 shutout victory.

"Clutching a spot in the Big East tournament really takes the pressure off of us for this weekend," said Big East rookie of the week Rebecca Eimen. "We are looking forward to the tournament. This week we will try to keep playing the same way we have been all season and hope that it carries to the end of the year."

Eimen was named rookie of the week and has recently taken over as the starter at second base. She batted .400 overall this past week and .571 in Big East games. She added two stolen bases, while making no errors on 23 chances for the week.

Akire earned player of the week honors by taking over the team lead in hitting. She batted .438 for the week with a double, a home run and four RBIs, while adding four runs scored during the week. She currently leads the Irish and conference with a .348 batting average.

Finally, Angela Bessolo was named Big East co-pitcher of the Week, after giving up only one run and posting a 2-0 conference mark for the week. She is 12-5 for the season with a 2.78 ERA. She shared the award with Seton Hall's Misty Beaver.

Next up for the Irish is a doubleheader today against IUPUI at home at Ivy Field. The game is scheduled for 4 p.m.

Junior Angela Bessolo was named Big East pitcher of the week after going 2-0 in conference play last week. Bessolo and the Irish return to action today against IUPUI on Ivy Field at 4 p.m.

Big East honors three players

Special to The Observer

After clinching a berth in the Big East Tournament and running their conference record to a perfect 12-0, three Notre Dame players were honored by the Big East for their performances last week.

Sophomore Melanie Akire of Union City, Calif., earned Big East co-player of the Week honors, senior Angela Bessolo of Lakewood, Calif., was named Big East co-pitcher of the week and freshman Rebecca Eimen of Manifold, Okla., grabbed the Big East rookie of the week award.

All are first time honorees this season.

Akire vaulted herself into the team lead in overall batting after hitting .438 overall (7-for-16) with four runs scored, a double, a home run and four RBIs in Notre Dame's five games. Notre Dame's starting shortstop also contributed on the mound in the team's 1-0 win over Providence after driving in what proved to be the winning run in the third inning. Believing starting pitcher Bessolo, Akire allowed no hits and no runs in two and two-
thirds innings of work to grab her third save of the season.

She now leads both the Big East and the Irish in hitting with a .348 mark overall and .528 average in conference play. Akire shares the award with Seton Hall third baseman Vickie Lamb.

Bessolo, who is 5-0 in the Big East, gave up just one run on route to a 2-0 record last week against Connecticut on Saturday, she pitched a complete game, allowing seven hits and one run in Notre Dame's 9-1 win.

A day later, she and Akire combined to shutout Providence as the team sneaked by the Friars 1-0 in the second half of the doubleheader. A right-handed pitcher, Bessolo is 12-5 this season with a 2.78 earned-run average. She shared the award with Seton Hall pitcher Misty Beaver.

Eimen, who recently took over the starting position at second base, batted .400 overall and a team-leading .571 in Big East games last week. She also stole two bases and was perfect in 23 fielding opportunities.
YOUR HOROSCOPE

TUESDAY, APRIL 27, 1999

CELEBRITIES BORN ON THIS DAY: Ed Bassmaster, Curtis King, Sierra Leone, Arek Amenu, Sandy Dennis, Corey Knowlton.

Happy Birthday! You need to get your act together this year. Stop thinking and start doing. You need to concentrate on what it is you want to accomplish and go for it. The more you try to hide or maneuver, the greater your chances of being caught with your pants down and taking flight. Only you can take the initiative to make your life better. Your numbers: 9, 22, 36, 46, 87.

ARIES (March 21-April 19): Your interest in picking up new information or skills is growing. Sign up for a seminar or course that offers a dual benefit. You'll enjoy getting bored.

AURUS (April 20-May 20): You will have greater success with your business plans if you pick a date that offers guarantees. Stress due to money has been wearing you down. Get busy doing things you enjoy.

CERMINI (May 21-June 20): You will have to make a decision regarding your personal associations. The situation that you're in is actually something you are avoiding in your emotional relationship.

CAPRICORN (Dec. 22-Jan. 19): Don't let your desire for fame hurt you more than it serves your purpose. The valued opinion of others won't always be a good omen. It could damage your reputation if you are not more representative about your feelings.

1999-2000: July 19-Aug. 20: You will be sharing leadership responsibilities if you get work assignments with others. Your beliefs and attitudes will be respected by others. Move into a leadership position. You belong in the fast lane.

TAURUS (April 20-May 20): You'll be desperate for intellectual bantering. Travel should be high on your list. Foreign cultures offer a host of interesting information for you to absorb. It's time to spread your wings and take flight. Only you can get busy doing it.

VIRGO (Aug. 23-Sept. 22): Don't let the loss we will be. It's time to spread your wings and take flight. Only you can get busy doing it.

Libra (Sept. 23-Oct. 22): Travel plans are moving this week. Focus on educational pursuits will enrich your vision. You will prosper through travel and educational pursuits. Sign up in the Center for Social Concerns this week.

SCORPIO (Oct. 23-Nov. 21): Money-making ventures look promising. Take a closer look but don't take too much time deciding. Your intimate relationships will feel a lot more positive. Check out retirement planning.

SAGITARIUS (Nov. 22-Dec. 21): Don't let your partner play mood games with you. Stand up for your rights and speak your mind. It is too easy to be too soft when in fact you need to be prepared to let him know what he faults are.

Capricorn (Dec. 22-Jan. 19): Get busy setting up those interviews. You need a job that offers more challenges and higher wages. Sign up for courses that will bring you more skill and business knowledge.

AQUARIUS (Jan. 20-Feb. 19): You'll be deceiving for emotional bantering. Travel should be high on your list. Foreign cultures offer a host of interesting information for you to absorb. It's time to spread your wings and take flight. Only you can get busy doing it.

PISCES (Mar. 20-April 19): Emotional setbacks will surface it you get stuck in your厢 partners. The infatuation with your personal partner. The infatuation with your personal partner. The infatuation with your personal partner.

JANET WENDT

SCOTT ADAMS

YOU'RE GETTING A VISIT FROM HAMMERHEAD BOB!

I CAN'T TELL WHEN I'M BORING. I MIGHT BE BORING NOW AND I DON'T EVEN KNOW IT.

THERE'S NO WAY TO END A CONVERSATION WITH ME. I'LL FOLLOW YOU TO THE BATHROOM.

I'M NAILED.

Relays prep ND for final Big East race

By BRIAN J. HOBINNS
Sports Writer

The Notre Dame track teams traveled to Des Moines, Iowa, and Purdue for one last dose of competition in the Drake and Purdue relays before the Big East tournament this upcoming weekend. In both locations the team had a solid performance and built up their confidence for the conference championships. While the Big East championships are the most significant point for the meet, the teams agree that meets like the Drake and Purdue relays are part of the important formula for success heading into the conference.

Drake

The provided Irish athletes with the nation's top competition, pushing them to the edge of their ability and pushing them to the edge of their comfort zone. Senior Nadia Schneider thrived in this environment. Schneider gained a NCAA provision qualifying with a time of 57.82 in the 400-meter hurdles in a race that came down to a photo finish. In the race Schneider ran against some of the top athletes in the country.

"I knew the names, but I hadn't run against them this year," Schneider said. "She said she is happy with the result and is confident in her abilities."

The Irish will face tough opponents in the upcoming tournament. The two shutouts in the Big East meet in the East.

Sharrin worked the first six innings of the first game to pick up the win. Michelle Moschel pitched the final inning to pick up her fourth save of the year. The Belles have only one more game to play before the MIAA Conference tournament begins.

The Belles are predicted to do well, due to the fact that they have defeated most of the competition in their conference.

"We hope to do well and defeat the tough competitors in our conference," Harrin said. "It's a great opportunity for us to prove ourselves in the upcoming tournament."
