Coming and returning, day by day,
I look across the fields, a mile away.
Beyond the mist where glides the hidden stream,
And o'er the slopes that love the morning beam.
And still those rolling heights have some new charm
To catch the eye and keep the fancy warm.
The path where once the dusky train did wind:
For where the slack, complacent farmer takes
His mammoth team aside, there to the Lakes
Barbarian commerce journeyed, ages long.
Trailing, in Indian wise, to Indian song.
And ONE walked there was not on commerce bent.
Nor on the chase nor stealthy war intent,
But with a message from his royal Chief,
A tale of love, of sorrow, hope, belief.
From dear Kaskaskia to St. Mary's Saint,
Wistful he takes the trail, the faithful two
Bearing from southern streams his mystic boat
To streams on which the Thousand Islands float.
Ah, he shall see the Thousand Isles no more:
'Tis the spirit lifts the tottering body o'er
This portage last save one; but the spirit wills.
And the ardent Saint his final task fulfills.
A flush lights up his pale thin face to see
Behind him ooze the dreary Kankakee,
While bright before, this fresh, sweet morn of May,
The fair St. Joseph winds for miles away.
Pleased with the omen and the beauteous scene,
Where never Christian foot before had been,
Marquette's eye kindles in the glad surprise,
As 'twere indeed the vale of Paradise!
Sere in a grove would he halt his simple train.
To raise a rustic altar on the plain.
The lovely valley stretching wide below,
And the dewy landscape bright in the morning glow;
While from the grass, and every branch and limb,
The feathery songsters chant their matin hymn.

* In May, 1675, Father Marquette, on the way from his mission at Kaskaskia to join his brethren at the head of Lake Michigan, passed over Portage Prairie from the Kankakee River, in company with his two devoted Canadian boatmen, reaching the St. Joseph, a little below the present site of St. Mary's Academy and about a mile and a half from that of Notre Dame University. The discoverer of the Mississippi (named by him Conception River) was in feeble health when he left the Kaskaskias, and did not live to complete his journey, dying near the river now called by his name, in Michigan, May 15, 1675.
Soon on the Apostle's heart their words prevail
To seek the lowly village off the trail,
Their woodland hospitality partake,
And feed the faith such providence could wake.

Dark-eyed olive maids, of modest grace,
Whose coat-black locks half hide the furtive face,
Receive the sacred flowers and pass before,
Chanting low their welcome, o'er and o'er.

Within the boat is borne the fickle Priest,
On brave and stalwart shoulders proudly eased,
While boys elate take up both oar and post,
That nought of all so blessed may be lost.

Strange pomp! E'en so his loving subjects bear
Some gracious prince aloft in his stately chair;
For martial music, birds and children sing,
And for city and palace, lo, the prairie in spring!

The river reached, to the right they turn, and up
The swift and silvery stream, till the maidens stop
By the artless wigwam village, when Marquette Descends,
And the red-man's feast is quickly set.

But higher is Home, where delight will forever endure.
With keener zest the general appetite.
So simple fare; but the vault is heaven's own,
While sturgeon fat and hominy invite
The limpid stream, in many a curious gourd.

Descends, and the red-man's feast is quickly set.
His soul with the beautiful dwells, with the tender and pure,
His generous cheer than these their simple best.

A woodcock, caught in the hunter's artful snare.
So passed Marquette two hundred years ago.

For he is spent, while the soft moon rising white
And round and grand, with splendor fills the night.

They part, friends of a few blest hours they part,
Part, alas forever, with heavy heart;
And as his boat is on the wave, the Saint's
Eye moistens with the piteous village plaints.

The wild plum's sweet perfume comes o'er the feast.
The mystic moonlight voyage to the Lake:
And swift on the glittering waters down they glide,
And safe on Saint Joseph's breast the Christians ride.

Ah, say, through the cedars on that high bank, is't the moon
That shines on the waters, fair as aurora in June?
Is't the convent angel that hails him as guardian now,
E'en now, when the death-drops stand on his pallid brow?

Is't his Lady bright, the maiden Queen of Heaven,
To whom from his youth his chivalrous heart is given?
Ah, she smiles on him now in her bliss, the victory is won,
He will dwell with her there, and the voyage will quickly be done!

So passed Marquette two hundred years ago.

---

Byron.

Byron's literary career is one of the most remarkable in the range of literature, and his sudden rise to the acme of literary fame enhances the interest incident to a hurried view of his literary character. In 1807 he sent his "Hours of Idleness" before the public, and though the work gave indications of genius it contained some errors; shortly after its appearance it was fiercely assailed by a critic in the Edinburgh Review. Byron retaliated in that stinging satire, "English Bards and Scottish Reviewers." To the scorching words of the Review he certainly owed much of his fame, and shortly the affair began to rise to the summit of success. In 1812 two cantos of "Childe Harold" were published and took the public by storm; "the effect," says Moore, "was as instantaneous as it has proved deep and lasting. It was electric—his fame had not to wait for any of the ordinary gradations but seemed to spring up like the break of that fiery mind which glows in his works. Who cannot feel the pathos which he has poured round the then state of Greece?

"Fair Greece! Sad relics of departed worth! Immortal though no more, though fallen, great." Who does not admire the splendor with which he has clothed that hallowed spot.

"The grave of France, the deadly Waterloo!" How sublime his description of the Alps!

"Above me are the Alps, The palaces of nature, whose vast walls Have pinnacled in clouds their snowy scalps, And throned Eternity in icy walls.
Of cold sublimity, where forms and falls
The avalanche—the thunderbolt of snow!
All that expands the spirit yet appals
Gather round these summits as to show
How earth may pierce to Heaven, yet leave rain man below."

With such consummate beauty has he encrusted the scenes he describes that many of the descriptions in "Childe Harold" are like resplendent gems in the casket of literature, unrivalled and unsurpassed in their sublime beauty. In intense feeling, richness and harmony of expression "Childe Harold" stands alone in our language, and the grandeur of its images and thoughts makes it one of the most impressive works in our literature. In his minor poems the same brilliant qualities have robbed the shorter effusions of his servile genius in a rich veil of poetry where everything breathes the essence of genius and sensibility. In "The Corsair," "Lara," "The Siege of Corinth" and "Parasina" we behold his extraordinary genius in communicating to his pictures the individuality and coloring of his own feelings and character. "The Siege of Corinth" is also remarkable for the variety and force of its descriptions, "Parasina" for its deep pathos, though the story is painful and repulsive, "The Prisoner of Chillon" for its hopeless tone and uncomplaining suffering, "Mazeppa" for its power which makes us forget its incongruities. The "Dream" is a different species of poetry from the above mentioned, and in the words of an eminent critic "there is hardly anything so lofty and so tender in our literature."

Byron's dramatic works are far inferior to his poems, though "Manfred" is full of intense sentiment. His longest work, "Don Juan," is one of the most singular works we have, redolent with beauty and richness of ideas and still abounding in seething sarcasm; in some parts portraying the purest affections of the heart, in others describing the sensuality of the voluptuary. In this strangely combined work Byron has shown a power, a picturesqueness and a pathos which in other works may be equalled but cannot be surpassed. To our regret we notice in this work that his genius had degenerated, the result of a life of deep profligacy whose revolting details defy expression. We must also deplore the low and selfish tone of morality of this otherwise brilliant production. As a poet Byron is remarkable for his conciseness, a quality in which he is superior to Wordsworth, whose proximity has a tendency to diminish the effect of his descriptions. Byron is also conspicuous for his rich abundance of thoughts, ideas and images, each transcending the previous one in its beauty, but he will ever be especially noted for the transcending richness and vivacity of his descriptions. We esteem the great productions which Byron poured forth with startling rapidity from his rich treasury, not only as multiplying the sources of delight to thousands, but also as enabling us to detect the finer feelings of the human heart. Critics generally object to the sameness of character in Byron's works, but with such force, intensity of feeling and beauty does he set them before us that we forget their defects in the sheer beauty with which they are encircled. "One noble imagination," says Jeffrey,—"or one profound and affecting sentiment—or one new gleam cast on the remotest recesses of the soul is more than a sufficient compensation for a thousand critical errors."

When, however, we think of the loose immorality which marks his poems, the utter absence of that purity which should adorn the Christian poet, we cannot regret that the grand works of Byron should lose, year by year, their influence on the lovers of poesy. It is a remarkable fact that in the real American literature there is not one line which can bring a blush to the cheek of the most fastidious. As yet we have not produced a genius bold, impulsive and poetic such as was Byron, we have not yet produced one who has brought down the muse to grovel among the things of the earth.

L. M. P.

Gounod.

[From the French.]

The author of "Cinq-Mars" is the lion of the day. We must kill the fatted calf in order to celebrate the return of this prodigal, of which there had been some doubt. Nobody will forget the reports which were circulated about the illustrious composer, to the effect that "Gounod is going to renounce the stage. He is making, for a finish, a "Polyeucte," as Racine did an 'Athalie,' but all his thoughts are turned toward the Church." Shortly after, it was announced that he was living in London, giving concerts in which he led the orchestra, and sang himself in his own music. It is from London, in any event, whence came to us "Galla," that poignant lamentation upon the misfortunes of the country; and the chorus of "Jeanne d'Arc," interlaced in the tragedy of Jules Barbier. The adventures of "Polyeucte" had at this period a good deal of notoriety. An English songstress to whom Gounod had, in a moment of folly, given the score, refused to return it to him. They succeeded only after extreme difficulty in subduing the tigress, after which Gounod returned to Paris. It was then that he was thought to be passing through the crisis of mysticism; and it may be remarked here that this reputation as to mysticism has followed our grand musician throughout his whole career.

The author of "Cinq-Mars" is beyond all question one of the loftiest artists of our age. It is sufficient to see him to know that he is a man of great merit. He shows it even in the way he carries his head.

Let us follow the composer on the street, for all such observations are valuable in finishing a portrait of character. His gait is unsteady and painful. He moves with a bowed head, seeing no person or thing, and seems as if engaged in profound thought. Suddenly he lifts up his head and straightens himself wherever he goes. What he thinks while upon the road or in the street he at once puts on paper when he enters his study. If he is able to complete four acts in twenty days, it is because in his brain has long been ripening the savoury fruit which he offers to the public. He must not be taken for an improvisor; he has too much of an artist to risk his reputation and his glory upon any such slipshod effort. His melody is spontaneous, bursting out like the waters from a spring; but no one can be more painstaking than he is as to the setting which is given to this jewel, melody. His vast memory retains whatever is born of his imagination.

Observe him when he is writing out a new inspiration. He does not hesitate for a moment. He recommends his morceaux, however advanced it may be. Like all natural men, he pleases himself with great difficulty; and like all wise men, he fears always being betrayed by his interpr-
tations. He attempts in vain to mask his fears at the presentations of his operas; the mobility of his face, and his extreme nervous susceptibility betray his iniquitude.

It is perhaps this fear that induces him to so obstinately insist upon conducting the first representations of his operas. The articles and letters he has published on this subject add eloquence to the strength of conviction. "The composer," he says in substance, "knows better than anybody else what should be done. He knows the movements he has traced out, and the rhythm he has intended. The leader of an orchestra, without any bad intent, may forget, may be deceived, and thus compromise the success of the score. Why should not the author himself take the baton? If the work is to fail, he will at least have done everything possible to save it." This conclusion is perfectly reasonable and admissible, but only with the condition that the maestro has in reality the qualities of an orchestral leader.

Although very erudite and a member of the Academy of Fine Arts, Charles Gounod has nothing of the pedant or the academician in his character. He gives himself readily up to light conversation, flinging lavishly about the verities of art and aesthetic paradoxes, which he defends in excellent terms and with rare force and ability. His countenance brightens marvellously during these discussions. His lips expand under the flow of words, his eyes dilate and are full of sparkling brilliancy. At other times he is overflowing with laughter, and is full of humor and repartee in which there is no afterthought or bitterness. It is at these times that he talks of putting Moliere into comic opera. He abounds in wit and humor. Occasionally melancholy will pierce through the mask of gayety which he wears; but is there not always some melancholy at the foundation of gayety?

Let us now glance for a moment over his works. He was born in 1818, studied at the Conservatory with Halevy, Lesueur, and Paer; and carried off the the Roman prize in 1839 for his cantata of "Fernand." At that time, he was seized upon by a religious zeal, and he went from Medici to the seminary, whose only result was that he studied the old masters in the ecclesiastical setting which surrounded them.

His baggage when he set out to return to Paris was already heavy. He had been for a time in Germany, where he executed an archaic mass; and he had also in his portfolio another solemn mass, some motets, choruses, symphonies, and a quantity of notes yet to be finished. He was made master of the Chapel of Foreign Missions. Four years later his name appeared for the first time upon the bills of the opera, for "Sapho."

This work did not meet the reception which he desired. The tierset at first was mediocre, without interest, and of a poor color. Since authors had got to thinking that they should exclude the dance from their drama, the fashion interfered greatly with his work, which was located in Greece, where the dance mingles with everything, religion as well as pleasure. The musician took but a single step from the sanctuary to the stage, and carried with him a mass of grave formulas calculated to disconcert the public. Without doubt there are here and to be found some exquisite things; the song of the goat-herd, with an Oriental accompaniment of the hautboy and the tambourine, was a melodious pearl. Beautiful also was Sapho, as with lyric in hand she flung her ecstatic notes through space before precipitating herself into the sea. But these beauties were insufficient to redeem an ensemble which was more conscientious and recherché than original, and from which had not been disengaged the personality of the author.

The choruses of "Ulysse" were composed the same year, and executed the year following at the Theatre Francais with the tragedy of Pousard. It is no injustice to affirm that the verses were inferior to the music designed to illustrate them. The critics did justice to the wise effort of Gounod, who attempted to give an impression of antique music, thanks to certain modulations and to certain infinitely curious rhythms. Let us note before going further that music does not hesitate to ally itself with productions with which it is in sympathy. Without speaking of what it has done for "The Doctor In Spite of Himself," I will cite the choruses and solos written for the "Deux Rameaux" of Legouve, and the score composed for the "Joan of Arc" of Jules Barbier. But we will pass all these as well as "Nouve Sanglante," a detestable melodramatic poem, which has wearied all the composers, including also Gounod.

I have hastened in order to reach "Faust." Passing from work to work we see the master gradually forming himself; and in "Faust" the formation is complete. A gentle and humane melancholy is the principal indication of his temperament—a melancholy which comes from desire, and not from deception. Gounod is at the same time a melodist and a harmonist; he is at once refined and natural. What is more natural than the scene of the Kermesse and the ballad of the "King of Thule"? He is susceptible of great emotion, as seen in the death of Valentine. He has bursts of enthusiasm—listen to the trio of the prison, "Auge pur, auge jadeux." His visions are at once placid and exuberant. He has accents which awaken the idea of a warm, beautiful enemy, with the purple rays of the sun dying on the horizon and the art filled with dreamy music. All of the heroines whom he has produced since "Faust" have admirable lives and a suave truthfulness. Each of them, whether she be known as Marguerite, Juliette, or Mireille is imprinted ineffaceably upon our memory. Women have found in Gounod their most divine musician, as they have in Ingres the painter the most purely accomplished in depicting their beauty. In the order of filiation, Gounod is a feminine genius who is descended from Mozart.

—Pins IX sleeps in one of the smallest of the 11,000 rooms at his command. A narrow, humble bed, without curtains or drapery—something similar to those used in seminaries for school-boys—a sofa, two or three common chairs and a writing-table, are all the articles of furniture; few and simple enough for a Capuchin. There is not even a rug by the bedhead to cover the floor of red tiles, not in the best repair. Winter and summer alike, the Pope gets up soon after five o'clock.

—Madame de Maintenon, who became the wife of Louis XIV, of France, and for the last thirty years of his life exercised a controlling influence over his opinions and policy, had a narrow escape from premature burial in childhood. Her parents migrated from France to the island of Martinique when she was ten years old. On the voyage she was taken ill, and the sickness ended in apparent death. The funer al rites were over; the last look taken of the body, about to be dropped into the sea; a cannon was loaded to be fired over the corpse, when the mother, who was ordinarily unloving, insisted on seeing her child once more. To her surprise, she found the heart still beating, and, in a delirium of joy, declared that the child was not dead, but would recover. The hope, born of reflection, proved a true prophecy, and the little girl, so nearly given to burial in the ocean, was spared to become one of the most distinguished women in French history.
The Catholic Young Men's Union.

We have received a circular from the President of the Catholic Young Men's National Union, stating that the Third Annual Convention of the Union will be held in the city of New York, on Wednesday, May 30, 1877, at 10 a. m. The Convention will meet at De La Salle Institute, No. 48 and 50, Second Street.

The circular goes on to say that the growth of the Church in our country has been truly wonderful, but its continued advancement must depend in a great measure upon the loyalty of her young men. We are surrounded by influences hostile to the Faith, and that we may not be misrepresented or misunderstood, intelligent, organized effort is necessary. Let us therefore band together under the influence of our holy religion, increase the membership of existing societies, and form new ones throughout the length and breadth of the land. Surely to Catholic young men there can be no appeal so strong as that which has the progress of the Church at heart.

The New York Union of Young Men's Catholic Societies earnestly invites your co-operation in this grand work of Catholic progress, and hopes your society will be represented in the May Convention. It warmly commends the National Union to you, and strongly urges your Association to join at once. Sympathy alone is of no practical value; acts, not words are the test. Societies will be promptly enrolled upon application to the National Secretary, Juan A. Pizzini, Esq., 11 West Grace Street, Richmond, Va. The requisites for membership are simple. First, a certificate from the Bishop or Pastor (if the society be a parochial one) of the following form:

To the Secretary of the Catholic Young Men's National Union: This is to certify that I have examined the Constitution of the society, and am satisfied that it is thoroughly Catholic, and eligible for admission to the Catholic Young Men's National Union.

Signed........................................

Second, payment of five dollars—annual fee for membership.

Each society is entitled to three votes, to be cast by three delegates and three alternates, or any smaller number that may be sent. If practicable, notify the National Secretary of the election of delegates by May 15th, or as soon thereafter as possible.

The general movement has quickened and stimulated local efforts. In proof of this, New York city may be cited. Eight societies existed prior to the First Convention of the National Union. Since then, in two years, eleven more have been organized. This marked increase is due in great measure to the spirit infused by the two preceding Conventions.

Members of National Union Societies, travelling for business or pleasure, will be received as guests by such societies wherever located, and our Catholic young men will thus have social advantages not otherwise attainable.

The New York Union extends a cordial welcome to any delegates you may send in May next; and every endeavor will be made to render the visit pleasant and agreeable. Kindly acknowledge receipt of circular, and state the action taken by your society. Please address M. J. Drummoud, Chairman of Reception Committee, P. O. Box 6551, New York city.

We heartily commend the objects set forth in this circular and recommend the forty or fifty young men's societies now receiving the Scholastic to act at once and join the Union. In urging them to this we cannot do better than to reprint what we have already said in this paper.

In our young men lies the hope of the future. As each generation of mankind passes from the great stage of the world, a new race filled with buoyant hopes, and aspirations which tend higher, must be formed to replace them. That the youth of the land may be able to enter upon the duties which society and the public exigencies of the country may demand of them, it becomes a matter of vital importance that they be well prepared. That such may be accomplished, the formation of good societies for the improvement of the mind and for a proper appreciation of their future conduct in life must be assigned a high place as an aid. Throughout the length and breadth of the land there are numerous societies which have for their object the cultivation of the intellect, and those who take advantage of the facilities which they offer for the attainment of this object will exercise a stronger influence and attain a greater superiority in the grand future which awaits them than such as neglect the opportunities thus readily presented.

It is with a desire to see such associations more widely extended, and the advantages which they afford better appreciated, that a number of the Catholic Literary Societies in the East have united themselves by a bond of union similar to that which has already existed among like societies in Ireland. Although the Union at present does not count in its ranks a very large number of associations, yet let us hope that it will, like the similar association across the waters, exercise a most beneficial influence on the affairs of the country, and make its effects apparent in the moral conduct and social position of all connected with it; for if the Union be continued in the spirit which animated its founders we cannot doubt but that it will wield an influence for good throughout the land. We hope that it will affiliate to itself Catholic literary associations generally, and cause them to act harmoniously together for the great object for which they were founded, moral and intellectual improvement. Individual societies are very good so far as they go, but they are circumscribed by their objects within too narrow a sphere. As moral, social and intellectual improvement ever go hand in hand, we feel that by societies forming in a grand union they can effect a far greater good than when each is laboring singly and alone.

Scientific Notes.

The treasures of Mycena discovered by Dr. Schleimann are soon to be placed in the Polytechnic at Athens, under the auspices of the Archæological Society of that city, where they will be easily accessible.

The State Geologist of Wisconsin has just reported that the copper-bearing rocks of Lake Superior extend almost uninterrupted across the State. In the Nemakagon River masses of native copper have been found, and the prospect that the country will become a rich copper region is very encouraging.

A test-paper is now sold in Paris, by which the artificial coloring of wines can be readily detected. Dipped in unadulterated wines the paper becomes light blue and dries of a lead color; if aniline color is in the wine, the paper becomes red; if cochineal, violet; if elderberry juice, green; if logwood or the like, dark brown; and so on with a variety of tinctures and results. A hundred-thousandth part of magenta can be detected. The inventors of the test-paper are said to have also devised means for extracting the fraudulent coloring and leaving the wine pure.
A short time since a very fine anaconda, upward of twenty feet in length, was purchased for the Zoological Society in London. During its few weeks' residence in the Zoological Gardens it has evidently fed shortly before its capture. On Monday, April 2, it produced two dead young, about eighteen inches in length. Unlike its near ally, the python, which lays the eggs and then surrounds them with the coils of its body, which apparently broke during the act of deposition. These two young are evidently only the precursors of many more, and it is to be hoped that the remainder will be produced alive. The long interval between the meals of these animals is strikingly shown. At the present time, in the same cage with the anaconda, is a reticulated python, which had not fed for seven months, having during the period changed its skin.

Dr. A. Boula, director of the Zoological gardens at Hamburg, has recently had the fortunate opportunity of dissecting one preserved in spirit, with the vicerina intact. His results are just published in "Abhandlungen aus dem Gebiete der Naturwissenschaften," and they add much to our zoological information. The brain is figured by photography from the three aspects, Dr. A. Pausch, describing the convolutions. In all the specimens the liver exhibited the lateral fissures or incisions which are not found in man, the orang, the chimpanzee, or the gibbon, but in all the higher mammals. Dr. Pausch agrees with the descriptions given by Prof. Huxley and Flower of the specimens in the museum of the College of Surgeons; and serves to separate off the gorilla from the rest of the anthropoid apes, and is minutely and the spigillum a lobet of fair size. As in man only among the primates, valvulae conniventes, the transverse folds of the mucous membrane of the small intestine, so large in the Sumatran rhinoceros, are present, although they are not large.

A great deal of useful information is afforded by a pamphlet of Dr. Armand Gaultier's, just published, and entitled "La Sophistication des Vins." The weight points out that the two principal methods of adulteration are by the addition of water, and by the mixing of spirits. Formerly, it is said, these negligent practices were confined to a few traders of the lowest class, but during the last fifteen years they seem to have become the rule, the most eminent merchants and the proprietors of famous vineyards themselves not being excepted. The charge of consanguineity, that the wines are even regular shops where drugs for coloring wine, with printed instructions as to their use, are sold in broad daylight. The mischief done by the mere addition of water to the wine is, in the belief of the chemists, of less consequence than in the case of the former. The water, or rather, the spirit, in the latter loses much both of its nutritive and tonic properties. Water is good, and wine is good; but the offspring of their alliance is not equally commendable.

Active preparations, says The Farmer (London), are going on for the immediate commencement of the long-projected work of draining the Zuyder Zee. A dam 40 kilometres (24 miles, 1,504 yards) long, and 50 metres broad at its base, and capable of being carried across the gulf, built up to a height of 3/4 metre above the ordinary level of high water. Upon this a pumping machine of 10,000 horsepower will be erected, capable of pumping up from the enclosed sea and discharging on the outside of the dam 6,500,000 cubic metres of water daily. Taking the average depth of the water at 4/5 metres, it is estimated that the work of pumping will be completed in about sixteen years from its commencement. The total cost of reclamation is set down at 80,000,000 francs; but, huge as this sum is, the undertaking is confidently looked upon as likely to produce a most remunerative speculation. The success of the scheme will add to the kingdom a new province 193,300 hectares (or nearly 500,000 acres) in extent. Judging from previous experiences in connection with the Haarlem Sea, it is reckoned that at least 176,000 hectares of the land thus won will be applicable to agricultural purposes, which at an average price of 4,000 francs only per hectare, will richly repay the enterprise and treasure lavished on this gigantic undertaking.

A great deal of useful information is afforded by a pamphlet of Dr. Armand Gaultier's, just published, and entitled "La Sophistication des Vins." The writer points out that the two principal methods of adulteration are by the addition of water, and by the mixing of spirits. $1,350 a night, the second $1,655, and the last named $990 a night. These figures are Strakosch's.

—Jansen, McClurg & Co. announces a new novel, under the title of "Brief Hours: a Romance of The Great Divi-
dible," which is intended to take the wretched position
holdings in life insurance companies yet more uncomfortable. The authorship is anonymous, and the public are at liberty to guess who and what is meant by the "Great Dividable."

—During 1876, there were 443 journals published in Spain, 118 of which were political, 65 religious, 78 literary, 105 scientific, artistic, and industrial, and 190 were miscellaneous. The Correspondencia de España has the largest circula-
tion, having circulated during last year nearly 31,000,-
000 copies. About 24,000 advertisements were inserted in the same paper in 1876.

—As an illustration of the amenities of authors, the recent London law case in which Dr. L. Schmitz, author of several popular histories of Greece and Rome, was sued by Prof. Gentiliadis, of the University of Athens, for an ap-
pendix contributed to Schulz's Greece, by the Professor, is a

giving a history of that country to 1853. The jury found for

the plaintiff. (Damages, $10.)

—Hon. William Parsons, the Irish orator, sailed from New York on the steamer Russia, on Wednesday, the 11th ult. Mr. Parso's numerous friends will be pleased to know that he is about to visit the Troad, the plains of

Troy, in Asia Minor, where Prof. Schleicher has been mak-
ing famous discoveries and excavations, with the view of obtaining materials for a lecture on the subject for next season.

—Among the Italian sculptors who still linger in America after the triumphs of the centennial year, is Antonio D'Amari. He exhibited in Philadelphia a statue of Chris-
topher Columbus pointing out to one of his comrades the first glimpse of land after that perilous voyage which made him the hero of a new world. Mr. D'Amari is making some marble portrait busts, notably of George Wilkes, which almost stirs with life, so real is it.

—Among the men to be proud of is J. Q. A. Ward. He lives in America, exhibits his work nowhere, but has more orders than he knows how to fill. A colossal statue of Washington for New Bedford, and an equestrian statue of the late Gen. Thomas, both in bronze, for our national cap-
it, are nearing toward completion, and they are an honor to the hand that wrought them, and equally an honor to the authority that selected Mr. Ward to create these enduring monuments to our country's heroes.

—The Emperor of Germany has just come into the posi-
tion of a collection of remarkable autograph MSS. formed by an amateur of music, by whom they had been bequeathed to the Emperor. The collection is said to include: "two quarto collections by Haydn; a symphony by Schubert, an air with orchestral accompaniment by Weber, and four volumes of all the sketches or outlines for the symphonies of his compositions, the themes of which we have the following extract: To

—Under the heading of American Inventive Progress the Scientific American of May 7th has a long and interest-
ing article, from which we have the following extract: To show with what rapidity inventors made improvements on inventions embodying original principles, says the writer, it may be noted that in the early days of the sewing ma-

chine 110 patents were granted for improvements thereon in a single year; and out of the 2,910 patents issued in the year 1857, 133 were for improved spinning gins and presses, 184 for improvements on the steam engine, and 198 for novel devices relating to railroad and improvements in the rolling stock. In the year 1848, three years after the pub-
lication of this paper was commenced, 5,600 patents were

granted; but under the stimulus of publishing those inven-
tions as they were patented ten years later, in 1858, the

number had increased sixfold, reaching 3,710, while up to January 1, 1860, as already stated, the aggregate of patents granted amounted to 17,657; since that time up to and at the present the total is 181,015. And curiously here leads us (adds the editor) to review our own work, extending back twenty years, to 1847, a period during which 63,062 applications per

mutation, the people of streets in which even native residents may go astray.

—Professor Horstmann, of Sagan, Silesia, has promised to edit the whole of the "Early English Legends or Lives of the Saints" for the Early English Text Society. His first publication will consist of the larger lives, those chiefly in stanzas, and not contained in the standard collection, from which Mr. Furnivall edited fourteen for the Philological Society in 1863. This extra set will be printed this year, and issued early in 1875. The standard collection will be edited from the best MSS., that from which Mr. Furnivall printed (Harleian 2977), and will be collated with all the other MSS. Of these thick quarto, Dr. Horstmann is making so good an arrangement in a practical manner. There are only three books in the series, and these are so graded that they may be easily used in schools. The mechanical execution of the books challenges admiration, while the thorough excellence of the text may be relied on. This Indiana Edition of the books which we have received makes them of the greatest value and interest to the pupils of the Indiana schools.

—The authorship is anonymous, and the public are at liberty to guess who and what is meant by the "Great Dividable."
The Daily Mass.

One of the most commendable practices of devotion which is perpetuated by the piety of the students is the custom of attending the daily Mass in the College Chapel. It is the duty of all those who understand what is meant by the Sacrifice of the Mass to consecrate the first moments of the day to this devotion. There is no human act so deserving of merits or so fruitful in blessings as the devout attendance to this great Mystery; and it matters not what may be the pressure of study, and scarcity of time in which to learn a difficult lesson, he who first discharges to his God his tribute of Chissian love and gratitude chooses the better part and will be rewarded for it. No student ought to neglect study—but, consecrating the first moments of the day to God, he will in return receive the gift of appreciating the advantages which are offered to students in their college days—advantages for which in after-life they will look in vain. More especially would we urge everyone who can, to attend Mass daily during the beautiful month of May. By attending this, the greatest devotion, may the great Sacrifice of the Church, will we more thoroughly sanctify ourselves during the month.

Reading Aloud.

Do those who have opportunities of reading in public, our young Cecilians for instance, appreciate their opportunity of improving themselves in a great accomplishment? Some, perhaps the great majority of them, by their great painstaking seem to understand the benefits to be derived from it, but there are some few who by their negligence appear to be entirely ignorant of the fact that reading aloud is a practice which, to those intending to enter one of the liberal professions, is of the greatest importance.

No student ought to neglect any opportunity of reading aloud. This reading is an exercise which, combining as it does a muscular effort with a mental one, has a twofold advantage. It does not need a teacher; perhaps it may in a better manner be cultivated alone than under the instructions of a master. We say that it may perhaps be better cultivated alone than under a teacher, because the person practicing the exercise acquires a naturalness of tone from instinct, rather than from art; for if dependent on the instruction of another, all he acquires comes to him from the rules and directions laid down by the master, while if left to himself it must be his own instincts and nothing else which must guide him. The most that is required of the person who practices this exercise is that he should make a strong effort to understand fully the mind of the author, that he should hear his own voice and that he should feel that he is heard by all, if he would read well. He should be able to say whether or no he is heard by the auditors in the farthest part of the room: if he is not able to develop from this exercise just as they are by singing.

The interest which we receive on our investment appears to be entirely ignorant of the fact that reading aloud is a practice which, to those intending to enter one of the liberal professions, is of the greatest importance.

In order that a man may read aloud well, it is necessary that he not only understand the subject, but moreover that he should hear his own voice. If he should feel that he is heard within him that he enunciates distinctly and clearly each and every syllable. Then he should strive to so modulate his voice that it matters not what be the number of his auditors or what their distance from him he may be heard by all of them. In this he must be taught by himself alone and be made perfect by experience. He should moreover feel that he is heard by all, if he would read well. He should be able to say whether or no he is heard by the auditors in the farthest part of the room—i.e., if he is not able to tell certainly whether he is heard or not, it is the result of his want of proper judgment and observation.

Of the benefits to be derived from reading aloud we need mention a few only. In the first place the lungs are developed from this exercise just as they are by singing. They are helped by loud reading, if properly done; because its effect is to induce every once in a while the drawing of a long breath, far oftener and far deeper than by read-
ing without enunciation. By these deep inhalations we cannot fail to develop the capacity of the lungs, and this development will be directly in proportion to their practice.

It is with imperfect and insufficient breathing that consumption, that terrible disease, uniformly begins. One of the characteristics of this disease is that the breath becomes shorter and shorter, through the long, long weary months, down to the very close of life. That which will counteract this short breathing, that which will tend to make us breathe oftenener and deeper, (to this extent. Let any one—we care not whom—make the experiment by reading a page of a book in a loud voice, and he will discover that in less than four or five minutes the tendency to take a long breath will discover itself. Now as a weak voice is developed and strengthened by deep breathing—for so we are told by all medical writers—it follows that the same thing will result from reading aloud. The voice by it is made sonorous and the tones of the voice are rendered clear and distinct. This hoarseness so annoying to audi­tors and which is invariably exhibited by the unaccus­tomcd reader before he has gone over a page, is pre­vented. By the time he has read a page the unaccustomed reader is forced to stop and hem and bow, to the confusion of himself and the disgust of his hearers. He who has ex­ercised himself in reading aloud is freed from this annoyance so disagreeable alike to himself and his audience. His voice does not tire, but continues with its strength almost unabated until he has finished his reading.

Then again, when properly done, loud reading leads to great vocal power. It leads to this on the same principle that by exercise all muscles are strengthened. The voice­making organs are not exceptions to this rule, and conse­quently we find those who habitually exercise them obtain great vocal power. Hence it happens that in many cases the vocal power is diminished by total silence, just as the arm of the Hindu devotee is at length paralyzed forever by its continued non-use. The general plan is to read aloud in a conversational tone, three times a day, for a few minutes at a time, to increase the time every day until half an hour is thus spent three times every day. Continue then to read in this length of time until the desired object is accomplished. The great benefit done to him who prac­tices reading aloud is a sufficient return for any incon­venience which he may have to undergo while thus drilling himself. The time thus spent is not lost, for when we have attained the desired object of our work we will find that the time was put to a good and useful purpose.

---

Personal.

—H. N. Saylor, of '72, is in Kansas.
—Leon. McCollium, of '76, is in business in Tiffin, Ohio.
—J. Brunman, of '75, is in the lumber business at Alton, Ill.
—A. Schenmenhorn, of '74, is doing well in Delphi, Ind.
—J. Wolf, of '74, is in the drygoods business at Streator, Ill.
—Mr. Lang, of Chicago, Ill., was at Notre Dame on the 1st.
—Rev. R. Maunay, of Besançon, Ind., paid us a visit last week.
—Miguel Otero, of '70, is at La Junta, Colorado, keeping books.
—J. T. Rudge, of '75, is travelling in England for his health.

—T. J. Murphy, of '73, is teaching the young idea how to shoot.
—M. T. Corday, of '64, is, we are told, residing in Water­ton, Wis.
—John Wanbaugh, of '73, is a real estate agent at San Pierre, Ind.
—John Kennedy, of '75, is engaged in business in Youngs­town, Ohio.
—Christian Burger, of '74, is in the jewelry business at Reading Pa.
—J. Lyons, of '74, is in business with his father at St. Paul, Minn.
—Bob Delaney, of '70, is clerking in the Capitol at Topeka, Kansas.
—Frank Matthews (Commercial), of '75, is studying law in Chicago, Ill.
—Gerald S. Sullivan, of '76, is pursuing his legal studies in Tiffin, Ohio.
—Horace Korty, of '75, is in the grocery business at Lafayette, Ind.
—J. F. Burnham, of '74, is in Milwaukee, and at present out of business.
—F. G. Bearn, of '76, is clerk in the Fifth Avenue Hotel, Topeka, Kansas.
—Wm. Schultheis, of '75, is keeping books for his father in Detroit, Mich.
—R. Kelly, of '74, is in the wholesale grocery business in Minneapolis, Minn.
—T. Hansard, of '75, is pursuing his law studies at Youngstown, Ohio.
—Geo. Rudge, of '75, is keeping books for the Youngtown Water Works.
—Rev. Michael Hogan, of St. John's Church, Chicago, visited us on the 2nd.
—D. M. Hynds, of '74, is doing an extensive drygoods business at Morris, Ill.
—Scott Ashton, of '71, is Assistant County Prosecutor at Leavenworth, Kansas.
—J. Gray, of '74, is engaged in the coal firm of Hill & Hecker, St. Paul, Minn.
—Mont. McGiuley, of '70, is one of the publishers of the Lafayette Sunday Leader.
—Michael Foley, of '75, is in the Cleveland Seminary, studying for the ministry.
—S. Kennedy, of '75, has begun the study of medicine in the Cleveland Medical College.
—Charles G. Ootaway (Commercial), of '75, is with Ota­way, Colbert & Co., Chicago, Ill.
—We were pleased to see our old friend, Hon. W. C. McMichael, of Mishawaka, last Tuesday.
—Max Katzauer (Commercial), of '75, is with Eddy, Harvey & Carter, Chicago, Ill. He is as fat and jolly as ever.
—Very Rev. Father General returned from his trip East on Saturday last. He intends, we learn, going South in a few days.
—Frank Keller (Commercial), of '76, spent several days at Notre Dame on his way home to Tiffin, Ohio, from Ken­wance, Ill.
—Prof. J. Ackerman, who at one time taught painting here, and who frescoed, the Junior refectory, now resides in Lafayette, Ind.
—John D. O'Tara (Commercial), of '75, is studying for the stage in San Francisco, Cal. He will shortly make a tour through Europe.
—Among the visitors of the past week were Messrs. M. J. Condon, Nashville, Ten., Isaac Evans, Akron, Ohio, and John Wonderly, of Illinois.
—Anthony Mooney (Commercial), of '74, so we infer from a letter, has gone and got married. He is living at Unity Station, on the Wisconsin Central Railroad.
—Among the names of candidates for office in Fort Wayne we notice those of John H. Trentman, of '65, for...
clerk; Morris Cody, the father of John H. Cody, of '63, for alderman from the Second Ward; and James Breen, the father of William P. Breen, of '77, for alderman from the Second Ward. We, of course, hope that all of them may be elected by a handsome majority, as they deserve.

---

**Local Items.**

- Last Tuesday was Bro. Alban’s birthday.
- It tried to snow a little last Sunday afternoon.
- The May devotions began last Monday evening.
- It was almost too chilly for baseball on the 1st of May.
- It was quite chilly at the commencement of the week.
- The Atlantics beat the Juanitas by a score of 31 to 18.
- The Minims were treated to an extra lunch on the 30th ult.

- Baseball shoes and broad-brimmed hats seem to be the rage.
- The hats are nobby. The ribbons are put on regard lessly.
- The Philopatrians are in need of a few more good soldiers.
- The Philopatrians were engaged in rehearsals this last week.
- The fishing brigade was out again in full force this last week.
- The castinet player in the Juniors can handle the bones well.
- The young telegraphers are now able to sling light ning in fine style.
- Vespers next Thursday are of the Ascension, page 91 of the Vesperal.
- The Band was out serenading on Tuesday last, the first day of May.
- There is a fine display of natural flowers in the sanc tuary of the new church.
- The Entertainment next Tuesday evening will begin at seven o'clock p.m., sharp.
- Some way or other our friends on the Campus do not send in many local items.
- Our fishmen did not have much luck this last week. It was almost too cold to fish.
- We have heard that Mr. W. P. Breen will be the valedictorian next Commencement.
- How about the badges next Commencement? Will all the societies retain their colors?
- Vespers to-morrow are of St. John before the Latin Gate, pages 145 and 46 of the Vesperal.
- The Junior Choral Union makes great progress. They practice every day under a good instructor.
- The regular monthly Bulletias were made out on Wed nesday and sent off a day or two afterwards.
- It is said that there is more original spelling in some autograph books than there is original poetry.
- The regular meeting of the Faculty will be held next Tuesday because of Thursday being a feast-day.
- The two Chinese Arbor vitae in the garden in front of the College are handsome conifers. We are only sorry that there are not more of them interspersed through the garden and parks.
- Turner’s South Bend Annual for 1877 is now out. We see from it that there are eleven papers published in St. Joseph County. It characterizes the SCHOLASTIC as “a handsome sheet.”

- The box in the corridor near the Commercial study hall was, let every one understand, placed there to receive communications for the SCHOLASTIC. We would be pleased to see it patronized.
- A joint meeting of the St. Cecilia Philomathean and the St. Stanislaus Philopatrian Societies was held on Fri day, the 37th of April, at which Rev. President Colovin spoke to them at some length.
- There has been nothing done so far towards rebuilding the pier on the upper lake. If the pier is not rebuilt the posts of the old pier should be removed. Let either one or the other thing be done.
- We noticed quite a number taking special classes in the study-hall on recreation days. Some way or other the members of these classes change quite frequently. However, there are some who are noted for the regularity of their attendance.
- We have not yet been notified by the secretaries of the societies what persons are to represent them on Society Day. It is about time the orators were appointed. There should be no delay; otherwise, when the day comes there will be any number to plead want of time.
- The 33d regular meeting of the St. Cecilia Philomathean Association took place April 29th. The minutes of the previous meeting were read and approved of. The weekly reports were handed in. Mr. C. Hagan delivered a declamation, and Mr. D. Ryan read an essay.
- Rev. President Colovin preached the first of the reg ular course of May sermons on Monday evening. It was at once eloquent and practical, and we can do no better than to urge upon all our readers at Notre Dame to follow the good advice given them by the learned preacher.
- On the 2d inst. an exciting and interesting game of baseball was played between the Quicksteps and Young Americas. At the close of the ninth inning the score stood 16 to 35 in favor of the Quicksteps. Mr. M. Kauffman umpired the game to the satisfaction of all engaged in it.
- There was a meeting of the resident Alumni held on the afternoon of the 28th, at which committees of arrange ments, reception, etc., were appointed. The resident secre tary was instructed to learn from the poet and orator whether they would be present in June, and if not to notify the alternates.
- We were mistaken in our last issue when we said that the Thespians would play “Julius Caesar” at the end of the year; they will give us “Damon and Pythias” and “The Sudden Arrival.” We are glad to hear that “Damon and Pythias” will be played, for we know that we will have it well rendered.
- On each of the three days preceding the Feast of the Ascension there will be a procession in the morning. At these processions only the Community at Notre Dame assist. These three days are called the Rogation days, and on them the Church begs the blessings of Heaven on the crops. During the procession the Litanies of the Saints are sung.
—Young gentlemen desirous of appearing in print should not be backward in handing in articles to us. They should not feel too bad if we should consign an essay or two to the waste-basket. They should remember that they have gained something by writing the essay, and should write again, making every effort to do better than in their first trial.

—The first case before Squire Lyons was tried the other day. Although the Scholastic reporter was around hunting up items he could get, the thing seemed that we knew nothing about it until the trial was over. We intend for the future engaging the township constable as reporter in order to prevent the Squire from hiding hereafter his light under a bushel.

—We are pleased to announce that the Herald of South Bend intends issuing a Sunday edition of the paper. The Sunday Herald will be non-political, and will give the current literary news of the day. We wish Messrs. Murray & Dayley every success, and hope that the people of South Bend will give the enterprise their cordial support.

—Per the benefit of those who think that it does not cost much to carry on the College, we might state that for the ordinary requirements per month at Notre Dame there are required 12,000 lbs. of beef, 1,000 lbs. of fish, 2,000 lbs. of butter, 73 lbs. of coffee, 200 lbs. of sugar, 5,000 lbs. of sugar, 1,500 gals. of milk, 200 cords of wood 160 gals. of coal-oil, besides ham, fowls, oysters, potatoes, vegetables, etc., etc.

—We learn that the Lake Shore and Michigan Southern Railroad Company intend erecting a new depot, one worthy of the city of South Bend's importance. This is as it should be. There is a great deal of travel to and from South Bend, more perhaps than to and from any other city on the line, except Toledo and Chicago. Next September we hope that the students returning to Notre Dame may see the new depot.

—The policeman must get rid of the Spitz dog. —N. Y. Times.

Howl do you? Get aboard a bark and drown her in the bay. "Cenima dollars buy a license for my pet?" asks the silly miss. "No! if you can't pay more go and terrier hair. The Spitz is never seen mongrel nice people. —The Pilot.

If he can get a bark with the mastiff, and the bulwaris all right, he might setter on the buoys, if he don't care for the bow-wows.

—At the beginning of the week we were afraid that we would again experience the dreaminess of winter, for the sky was cloudy and every once in a while the snow would begin to fall and the cold air blew spitefully through the branches of the freshly-budding trees. On Tuesday, however, the sun again came out in his glory, and though the air was somewhat raw yet it gave every assurance that winter would not again rule over us.

—The Junior military company were out drilling on the 1st of May. The young boys are able to go through the manual of arms quite readily. They gave us the military salute as they passed us. Will the young gentlemen receive this notice as an editorial one in return? The field-band at the head of the company know how to play. The heartiness with which the base-drummer used his stick filled us with admiration.

—We understand that the St. Cecilians intend buying a melodeon this summer for their meeting-room. It is the intention of the Society to have the meetings open and close with singing. The Director of the Archconfraternity also intends introducing the singing of hymns at the meeting of his Association the coming year. The directors of the band have given notice that they will add to the interest taken in the meetings.

—The coming vacation we intend publishing in book form the English hymns sung by the Juniors this year. In addition to those now sung we will add some thirty or forty other hymns, as well as with the political byewords, that figured in the recent contest. They should reflect that the Latin word *vates* means equally a poet and a prophet,—a proof that the Irish people in America in the manner best calculated to advance those interests, namely upon a sound religious basis, for without this no true progress can be made, socially or otherwise. The sentiment, "Mother the Church, and love thy Fatherland," which it would seem is its motto, is, we are glad to see, thoroughly carried out in practice, and under such auspices and with such able editorial management as it now evinces the Irish Globe cannot fail to be productive of much good. The Globe is a handsomely printed sheet,—good paper, clear type, excellent arrangement of matter,—and with sound principles for its guidance it can scarcely fail in obtaining a fair amount of success. It is published weekly by Mr. Clancy, at 37 Barclay St., New York city.

—We recommend to our readers the following poem which is entitled, THE WASHING OF THE BLOODY SHIRT.

BY T. MEWER.

I.

The Shirt that once through Terror's Hall
Such consternation spread,
Now whitens on a clothes-line small and high.
So sleeps the broil of former days,
So gory dreams are o'er;
And hints that once fell cold to Hayes.
Now feel that chill no more.

No more for Morton or for Blaine
The bleeding garment waves;
Our Nichols washes out the stain
And Louisians saves.

Thus Freedom once again awakes,
And every yawn she gives
Some careless bagging fetter breaks
To show that still she lives.

NOTE: It may mystify the unenlightened to find that Mr. Mewer, who lived several centuries ago, should have been so well acquainted with the names of the politicians, as well as with the political byewords, that figured in the recent contest. They should reflect that the Latin word *vates* means equally a poet and a prophet,—a proof that the poets of ancient times were all prophets, and vice versa. The effusions of Mower, which are continually turning up, display this faculty of foresight in a wonderful degree, and it is also surprising how many of his poems relate to the present state of American affairs,—such as: "Though the last glimpse of the ancient globe is lost, yet Freedom is again heard to whistle to thee! Abraham's daughter," and others. The merits of this noble poet are daily receiving more attention, and his spurious imitator, Thomas Moore, so long the sole possessor of the name and manuscripts, is beginning to feel the object of literary execration. The difference between them is observable in the lines so well known about the roses and the shattered vase, whose sickly effeminity is made more...
offensive by the discovery of the original, a model of rivile
grandeur of thought.

Long, long be my heart with such memories filled,
Like a bull-dog that polices have frequently killed;
You may scrub, you may polish that dog if you will
But the scent of the polices will hang around him still.

Mr. Mewer was also most ingenious in the matter of
founding rhymes. The word "month" is frequently re-
garded as one for which no rhyme can be found in the
English language, but Mr. Mewer, as we find by one of
his lately discovered poems, solved the problem long ago, thus:

I was feeling rather foolish, for of April 'twas the oneth,
And the buds were bursting open in that mild April month.
Our poet, in his declining years, completely lost the use of
his chin, and was unable to pursue his career to its final
development, but enough remains of him to make us sad
at the thought of how much the world has lost, and what
a jewel in him it once possessed without appreciating.

---The following is the sixth annual exercises of the Saint
Stanislaus Philanthropic Society of the University of Notre
Dame, complimentary to Very Rev. A. Granger, Provincial
of the Congregation of the Holy Cross in the United States,
to be given Tuesday evening, May 8th, 1877:

PART FIRST.

Overture.... University Band
Song and Chorus.... Choral Union
Address-Salutatory.... J. H. Ingerson, J. English, R. Keenan,
C. Peltier
The Celebrated Charge (in chorus).... J. Reynolds, L. Fracee,
T. Barry, K. Scanlan, W. Nicholas,
W. Taubly, J. Stewart, I. Rose,
J. McCague, J. Stewart,
T. Barry, T. Gibbons,
C. Peltier

Olio (in which various things will be done)... K. Scanlan

Prologue.... K. Scanlan
Music.... N. D. U. C. Band

PART SECOND.

THE PUBLIC BENEFACCTOR.

Erastus Steele (a merchant).... T. Barry
Harry (his son).... L. Fracee
Solemn Longface (an impostor).... W. Nicholas
Cyrus Caucus (a countryman).... C. Peltier
Bobby Simpson (a lubberly boy).... F. Phelan
Barry Hoolean (a laborer).... R. Keenan

German Declaration.... Paul Schnurrer

BRIGAND AND HIS SON.

A Melodrama.

Corporal Nicolo Gambo.... J. Stewart
Matteo Falcone.... J. Bell
Gianetto Sampiero.... C. Peltier
Brozza.... W. Taylor
Fortunato Falcone (son of Matteo).... W. Nicholas
Bonaventure (Page to Fortunato).... F. Lang

Soldiers, Brigands, etc.

Music.... Orchestra

THE RIGHTFUL HEIR, OR THE BLIND BOY.

A Melodrama in Three Acts.

Edmund (The Blind Boy, or Rightful Heir).... J. Duffleld
Prince Rudolph (Presumptive Heir to the Throne).... W. Taubly,
Oberto (an Honest Agriculturist).... A. Keenan

Elvino (son of Oberto).... G. J. Donnelly
Kailg (a reduced gentleman and upright man).... J. Ingwerson
Starrow (a villainous counterfeit of the Prince).... J. Reynolds
Stanislaus (King of Sarmatia).... A. Anderson
Molino (a good-natured villager, rather eccentric).... R. Keenan
Bonifacio (Royal Usher).... C. Peltier
Lino.... J. A. Burger
Fitzensure.... W. Taylor
Roberto.... E. Poor
Adil.... F. Phelan
Ambrasio.... M. Vander Hayden

Simon.... T. Barry
Dario.... E. Pennington
Utobal.... F. Phelan
Starrow (a villainous confident of the Prince).... Julius Rogers
Bataglia.... J. Bell
Leonardo.... H. Siwers
Godfrey (Courier).... L. Siwers
Raginald.... C. McKinnon
Stewards.... A. Hatt
Closing Remarks.... Rev. P. J. Colovin, C. S. C.

During the play there will be appropriate Music for the
various incidents in the play.

---

**Roll of Honor.**

---

[In the following list are the names of those students who dur-
ning the past week have by their exemplary conduct given sat-
sfaction to all the members of the Faculty.]

**SENIOR DEPARTMENT.**

J. Burke, P. Cooney, R. Calkins, J. Coleman, W. Dechent, J.
Ewing, L. Evers, J. Fitzgerald, T. Garrity, T. Garceau, A.
Hertzig, J. Kinney, J. Kubel, F. Keller, W. Kelly, J. Lambl,
Mattimore, J. Murphy, T. McGrath, J. McEnary, W. McGorrrish.
J. O'Rourke, P. 0'Leary, C. O'Donald, J. Proudhomme, J.
Proudhomme, E. Pefferman, J. Patterson, J. Persa, T. Riopelle,
M. Rogers, P. Skahill, G. Saylor, F. Saxinger, F. Tamba, T.
Vandervannet, M. Williams, C. Whitteburger, H.
Whitner.

**JUNIOR DEPARTMENT.**

J. Abrahams, W. Taulby, B. D. Fleeb, A. Widdicombe, E. Poor,
J. Larkin, A. Burger, F. Ewing, F. Rheinboldt, J. Healy, F.
Insr in the past week have by their exemplary conduct given sat-
sfaction to all the members of the Faculty.

**MINOR DEPARTMENT.**

Geo. Lowrey, B. Lamhin, J. Seeger, J. Scanlan, R. Pleins, W.
Dechant, J. Coleman, W. Dechant, E. Carqueville, L. Bregan,
H. Rogers, F. Schnurrer, E. L. Scanlan, G. Sampson, J. W. Sill,
T. Wagner, L. Wolf.

---

**Class Honors.**

---

[In the following list are given the names of those who have
given entire satisfaction in all their classes during the month
past.]

---

**FOR THE MONTH ENDING MAY 3.**

**PREPARATORY COURSE.**

**SENIORS.—** J. Proudhomme, L. Proudhomme, O. Rettig, W.
Farra, W. McGorrrish, E. Davenport, T. Quinn, H. Whitner, E.
Smith, P. J. Mattimore, P. W. Mattimore, M. Caldwell.

**JUNIORS.—** O. Lindberg, J. Duffleld, W. Nicholas, A. Keenan,
K. Scanlan, F. Carroll, E. Pennington, C. Johnson, R. Johnson,
A. Abrahams, W. Taulby, H. Riopelle, W. Taulby, A. Widdicombe, E. Poor,
J. Larkin, A. Burger, F. Ewing, F. Rheinboldt, J. Healy, F.
List of Excellence.

(The students mentioned in this list are those who have been in the best of the classes of the course named—according to the competitions which are held monthly.—Directors or Students.)

FOR THE MONTH ENDING MAY 3.

PREPARATORY DEPARTMENT.

Saint Mary's Academy.

"Petit Maria" was elected May Queen by unanimous vote. No "returning board" needed.

The exciting competition in the Grammar Classes was long and lively. The result was not reported.

"Rosa Mystica" was read last Sunday. Very Rev. Father General honored the young ladies by his presence at the reading.

The little cottage that formerly stood beside the Exhibition Hall has been removed to the Novitiate grounds, where it will be kept as a relic of bygone days.

The recreation after supper now commences at half-past six, and the May devotions at half-past seven. The Children of Mary enjoy their special privileges of daily Mass and morning procession to Loreto.

The Minim reporter failed to send in an account of that scientific treat they enjoyed last week at Phelan Hall. The Professor of Chemistry, etc., etc., etc., was exceedingly kind, and has so interested the Minims in those sciences that they would immediately enter the senior classes if they could only possess those terrible hard times.

For politeness, neatness, order, amiability, and correct deportment, the following young ladies are enrolled on the Tablet of Honor.

SENIOR DEPARTMENT.

JUNIOR DEPARTMENT.

MINORS—E. Mulligan, M. Lamian, L. Cox, F. Fitz, M. Cox, N. Backett, L. Yannone, L. Ellis. A. Williams, J. Butts, A. Getty and E. Wooten, 100 per excellence.

THE "AVE MARIA," A CATHOLIC JOURNAL

That runs the celebrated *Pullman Palace Cars* from Chicago to Baltimore, Washington City, Philadelphia and New York without change. Through tickets for sale at all principal ticket offices at the lowest current rates.

F. S. MEYER, G. F. & T. A.
Minerals, Shells, Birds, Etc.

The Naturalists' Agency has been established at 3725 Lancaster Avenue, Philadelphia, for the purpose of giving collectors of objects of Natural History an opportunity of buying, selling or exchanging their duplicates or collections.

Specimens were sent to any part of the world by mail. An illustrated monthly Bulletin of Sales goes free.

I received the highest award given to any one at the Centennial Exhibition of 1876, and the only award and medal given to any American for "Collectors of Minerals."

My Mineralogical Catalogue of 50 pages, is distributed free to all customers, to others on receipt of 10 cents. It is profusely illustrated, and the printer and engraver charged me about... most species may be verified. The price list is an excellent check list containing the names of all the species and their prices.

The Naturalists' Agency has been established at 3725 Lancaster Avenue, Philadelphia, for the purpose of giving collectors of objects of Natural History an opportunity of buying, selling or exchanging their duplicates or collections.

The large increase of my business has compelled me to rent the store No. 3727, and use it entirely for Birds, Mammals, and other Natural Objects. I have secured the services of one of the best taxidermists in the country, and can do the best custom work.

The collections of 100 illustrate all the principal species and all the grand subdivisions in Dana and other works on Mineralogy; every Crystal System; and all the principal Ores and every known Mineral. The collections aie labelled with a printed label that can only be removed by soaking. The labels of the $5. and higher priced collections give Dana’s species number, the name, locality, and in most cases, the composition of the Mineral. All collections accompanied by my Illustrated Catalogue and Table of Species.

For Students, Amateurs, Professors, Physicians, and other Professional Men.
