Budget Postponed

The Student Senate postponed consideration of student government's annual budget at its meeting last night. Discussions on the budget were reset for next Monday, November 30.

The budget postponement was necessitated when Treasurer Rich Linting was called home by his father's serious illness.

A second meeting of the Senate President Tim Gunann announced that the Senate would run a reevaluation of our strategy for the next semester.

Civil Rights Exchange Set

The Civil Rights Commission has announced plans for a student exchange program with Xavier University in New Orleans to begin next semester.

The plans call for an exchange of one student from the Notre Dame Student Union to New Orleans and one from Xavier to Notre Dame each semester of their sophomore or junior years.

Xavier is a Catholic Negro university with an approximately equal sex ratio.

Those interested should contact Civil Rights Commission Chairman Fred McFadden in 305 Alumni immediately.

Prof. Crane Explains Pacifism

Three Notre Dame professors, Dorothy Bloge, Nienmeyer, and Crane, were speakers at a forum on Viet Nam last Sunday at the First Unitarian Church in South Bend.

Dr. Crane, an associate professor of marketing, called for immediate unilateral and unconditional withdrawal of our military forces from Viet Nam.

"The government is defending our position in Southeast Asia, while Dr. Bloge, also of the government department, added for a reevaluation of our strategy and an open dialogue to discuss the problem thoroughly. VOICE released the text of Dr. Crane's speech, a summary of which follows.

"The pacifist is not a pacifist, he is the last Hitler. The pacifist is not an eloquent but a violent, a terrorist, who has no sense of moral decorum."

There was no exposition of the idea of pacifism, but rather a statement that there is no sense of moral decorum.

"The pacifist should also be aware that war is necessary and that the end justifies the means."

"A pacifist must be a better man, must be more honest, must be more moral."

Dr. Crane cited the fact that no war has ever been a success, and that all wars have led to war.

The topic was discussed for over an hour in the chapel.

Space limitations prevent discussion of the other speakers in the forum. Details will be published in the Voice.

ND Reapplies for Phi Beta Kappa

By Ray Forey

Notre Dame has sent in an application for re-enrollment in Phi Beta Kappa, the national collegiate honor society.

An 11-member committee from the prestigious society visited the campus soon after the February 1955 re-enrollments were announced.

The proposal was submitted by Professor John D. White

There are three levels of non-violent resistance -- protest, passive resistance (famig, boycotts, picketing), and violent resistance (arrests, hunger strikes, and the like).

Dr. Crane also adds that even though there might be death and violence in non-violent resistance, violence would take a greater toll, as indicated by the death of the million Jews in Europe.

"Dr. Crane believes that the best way to make the Russian impact the Flushing non-cooperation and protest in the Russian example to assimilate them (1899-1905) resulted in the Russian withdrawal. In 1910, reliance in Britain demanded of the troops stationed in Russia and failed to support the newly formed interventionist law. Even though it seem to that it would make a more change to the pacifist non-violence, Dr. Crane points to the fact that, the conscientious objectors who objected to war, even if they were in the fold.

In conclusion, Dr. Crane be

"The pacifist believes that blood and foot steps are the order of the day in Viet Nam and a means of avoiding debate on political issues."

"And now and then it is that our pressure-identified groups that want to keep the war going in Viet Nam as friends of the fighting men, and those of us who want to bring them home as they are, in a reversal of the idea of pacifism and common sense."

The Voice will publish the text of Dr. Crane's speech at a later date.

HPC Backs US NATO Presence

Further action on the plan for a US-NATO presence in Viet Nam was taken at a meeting of the Joint Personnel Council Thursday.

The topic was discussed by representatives of the National Defense Organization of the Arrow R.O.C.T. program.

The Ford Foundation money we have been working on in the Arrow R.O.C.T. program is not an arrow. We are able to give many more people a step up in their education in the years past.

Delegates agreed with Dr. Heffron's statement that there is no question but that we will be accepted. Reenrollment into Phi Beta Kappa is in the best interest of the students of Notre Dame and we will continue to fight.

Letters to the Editor

By William F. Schmelzer

Editor:

I am writing this letter in order to find out if Notre Dame is all that I thought it was. Last Saturday I visited your campus and was only impressed. The campus was beautiful and the game was won good. Special thanks is given to a "Great" day with the Irish. I went to your guest cafeteria, I placed my completely new brown shoes, three-quarter-length, coat, and hat in the pochet. Upon leaving an hour and a half later, I realized the courageous, now, tell me, just who would want a size 10, woman's cost at Notre Dame!! I can understand and am hoping it was picked up by mistake, if so, I would appreciate very much its return to the Rosemary Panther, Mundelein College, 6635 Sheridan Road, Chicago, Illinois. I would be willing to pay the postage.

Rosemary Panter, P. A. — I drove all the way home in a blanket.

Sincerely,

Pat Neale

Sincerely yours, Mrs. Kay Goldstein.

Law School to Aid South Bend

By Buck McFadden

Prof. Conrad Kellenberg of the Notre Dame Law School has informed me that our University is about to establish a legal aid center and provide a legal aid office in South Bend. The office will be located in the section of South Bend which is found connected with the poor area of poverty.

To quote from the Forward of the official proposal, "the neighborhood legal office here proposed is an effort to reach the grass roots of poverty and to assure that competent counsel is available to the impoverished and unfortunate. In addition to providing legal counsel, the work of the office will provide an opportunity for the University to expand its study of the root causes of poverty and to train in a more practical way law students and others to deal more effectively with the problems of the poor.

The staff of the office will, as Lewis F. Powell, Jr. has said, "take opportunities to practice preventive law and to educate the poor as to their legal rights and to emphasize the use of law as an affirmative instrument to remedy social injustices or improve economic conditions."

The report goes on to note the benefits the law center would have not only for law students but also for sociology students as well as others.

Sociology Department

of Notre Dame has in-

formed me that the law center should be established and for their foreign and their commitment, I only hope they will see the similarity of both the proposed community center and the proposed community center and the University. The proposal for the proposed community center would make a significant contribution.

I hope, furthermore, that the departments mentioned will presently explore the benefits these proposed centers hold for them. It will be the same for academic opportunities for academic and personal development.

The Management Club of Notre Dame will sponsor a block Medication Session next Wednesday night at 7:30 in the Memorial Library Auditorium. Five members of the Federal Medicine and Constitution Service will participate.

Two of these participants will act as union negotiators while two others will present management's case. The fifth panel member will act as moderator.

The situation to be simulated involves a contract renewal and will concentrate on such controversial topics as union shop, pay rates, an extra paid holiday, and non-negotiable restrictions.

Richard Brown, president of the Management Club, has announced that the session will be open to Notre Dame and Saint Mary's students.

Ken Ryan kicks the only three points of the game for Western State in the first quarter of Saturday's game with Michigan State. Chris Zich while the big rush in put on by State's tiny Baba Smith.

First Jugger To Appear Soon

Large enough to hold your future, small enough to know you.

ENGINEERS: American Air Filter Company, Louisville, Kentucky, is the world's largest manufacturer of powered ventilation and air conditioning equipment. Yet AAF is small enough for you to know well. AAF needs your talent to fill responsible jobs in sales, product engineering, research and industrial engineering. Potential exists for you to reach the top through the job training we offer. AAF people work in small groups, where initiative is encouraged and do jobs that are not only challenging but also meaningful. We're looking for people who have already demonstrated your interests lie in the field of commercial jet aircraft. We're particularly interested in candidates with a background in engineering or the sciences. This position will be in the company's Product Development Department, and will provide you with an opportunity to work on some of the most advanced jet aircraft engines in the world. Engineers thoroughly interested in outstanding opportunities are invited to apply. Please send your resume to: American Air Filter Company, 2500 W. Bigelow, Louisville, Kentucky 40203. An equal opportunity employer.

Engineers and Scientists: Let's talk about a career at Boeing... 50-year leader in aerospace technology

Campus Interviews Tuesday, November 30

The most effective way to evaluate a company in terms of its potential for dynamic career growth is to examine its past record. At Boeing, in common with its peers in the field, there is a constant search for new products and planning for the future, together with an attention to the development of the individual capabilities of its people. Boeing has a tradition of employing engineers who have achieved distinction in other fields of endeavor. This ensures that Boeing people will bring to their work a broad background of knowledge and experience. Boeing is a major force in the development of advanced technology that will make the future better for all of us. The opportunities we offer to engineers and scientists are diverse in purpose and in their scope. Whether your interest lies in the field of commercial jet aircraft, or in spaceflight technology, you can find at Boeing an opening which combines professional challenge and long-range stability.

The man of Boeing is today pioneering revolutionary advances in both civilian and military aircraft, as well as in space programs of such historic importance as America's first moon landing. Missiles, space capsules, gas turbine engines, transport helicopters, marine vehicles and ballistic missiles are other areas of Boeing activity. There's a spot where your talents and interests can meet at Boeing, and we'd like to show you more of what we do. Design, test, manufacturing or administration. You name it. Boeing is a company of leaders in the field of advanced technology. The Boeing leader in jet transportation provides a measure of the caliber of people with whom you will work. You'll be working with people who work in small groups, where initiative is expected and maximum expression.

Boeing encourages participation in the company's Graduate Study Program at leading colleges and universities near company installations.

We're looking forward to meeting engineering, mathematics and science seniors and graduate students during your visits to your campus. Make an appointment now at your nearest office. Boeing is an equal opportunity employer.
