University of Notre Dame.

This University was founded in 1842 by the Congregation of the Holy Cross, under the direction of Very Rev. E. Sorin, and was chartered by the Legislature of the State of Indiana in 1844, with power to confer all the usual degrees.

The College buildings are on an eminence near two small, picturesque lakes of pure spring water, in the midst of the fine and healthy farming region of the St. Joseph Valley, and scarcely a mile from the river. The College can easily be reached from all parts of the United States and Canada by means of three great trunk lines of railway—the Lake Shore and Michigan Southern, the Chicago and Lake Huron, and the Great Western and Michigan Central; the former passing within a mile of the College grounds, and the latter connecting at Niles with the recently-built railway between that place and South Bend, which runs within a half mile of the College. At the Michigan Southern railroad depot, South Bend, omnibuses or private conveyances can be obtained.

The buildings are well adapted for the purposes for which they were erected. The Study-Halls, Class-Rooms, Dining-Rooms, Sleeping Apartments and Recreation Halls are commodious, and capable of giving accommodation to five hundred resident students.

The site of the College is one particularly adapted to the improvement of the Students. It is secluded and healthy, and constant care is rendering a spot naturally beautiful still more attractive by art and good taste.

We state only the advantages of health and retirement that are enjoyed by the inmates of the Institution;—a description of all that pleases at Notre Dame would take us beyond the limit of these pages. We prefer to give a hearty invitation to all our patrons, and to all who think of confiding their sons to our care, to come and see and judge for themselves.

The advantages arising from the retired position of the College cannot fail to be appreciated by parents who have at heart the education of their children; and even the careless student,
when once interested in his studies, soon finds out the benefits he can derive from an uninterrupted attention to class and study. Though secluded in a great measure from the busy world without, yet the number of Students and the extensive College grounds give him a world of his own, in which, what with Class, Examination, Notes, Literary Societies, Religious Associations, Baseball Clubs, Boat Clubs, Dramatic and Musical Entertainments, he finds full enjoyment and amusement, and companions, ideas and sentiments that all concur to fix his mind on his studies and establish him in habits of piety, application and order—the influence of which will be felt during his entire life. He breathes for a few short years the atmosphere of order, of regularity in all that he does; of profound application to studies, broken only by healthy and regular recreation; and certainly in our times, when serious and solid studies are becoming so rare, when all kinds of inducements to waste and fritter away time are forced upon young Students, when morals are so lightly watched over, the advantage of the retired location of Notre Dame cannot be too highly spoken of.

Providence has singularly blessed the Institution in regard to health; and those who have had their sons in the College can give their testimony that the regular course of life, added to the salubrious climate and the fresh country air, has done much to improve the health of their children.

The disciplinary government is mild, yet sufficiently energetic to preserve order and regularity. The morals and general deportment of the pupils are assiduously watched over, and their comforts and personal habits receive the same attention as if they were in the bosom of their own families.

THE EDUCATION

given at Notre Dame is calculated to form both the heart and intellect of the Students. Every attention is given to their moral and religious culture. Every day the Students have an opportunity of attending classes where they may acquire a knowledge of Christian Doctrine. Twice a week, lectures and instructions on religious topics are delivered to all the Students together. Finally, a regular course of Dogmatic Theology is established in the University for the benefit of the more advanced Students who may desire to enter the world having their minds stored not only with profane science, but also with what is much more important—a thorough knowledge of their religion.
The religious instruction is, of course, confined to Catholic Students exclusively. The intellectual training is carried on with care and diligence by the Officers and Professors of the University. The best systems of teaching are adopted, and the best authors for each branch selected, so that no pains are spared to secure the objects which the University has in view as an institution of education.

REGULATIONS OF THE UNIVERSITY.

All Students are required to attend the exercises of public worship with punctuality and decorum.

Students must show themselves obedient and respectful towards the Professors and Prefects of the Institution,—never absenting themselves from the place in which they ought to be without permission from proper authority.

Students must carefully avoid every expression in the least injurious to Religion or morals, their Professors, Prefects or fellow Students. The use of tobacco is strictly forbidden, and intoxicating liquors are absolutely prohibited.

Compensation for all damage done to the furniture or other property of the College will be required from the person or persons causing such damage.

No branch of study, once commenced, shall be discontinued without permission from the Director of Studies.

No one shall leave the University grounds without the permission of the President or Vice-President.

Students are expected to take baths regularly.

Students who have failed to give satisfaction in the Class-Room, or who have been guilty of misconduct, must perform such tasks as may be assigned them, and shall be excluded from all College exercises until such tasks be accomplished.

No book, periodical or newspaper shall be introduced into the College without being previously examined and approved by the Director of Studies. Objectionable books found in the possession of Students will be withheld from them until their departure from the University, or destroyed.

All letters sent or received by Students may be opened by the President or his representative.

GENERAL INFORMATION.

The Academic Year commences on the first Tuesday of September, and closes on the last Wednesday of June, when the Annual Com-
mencement, the Conferring of Degrees and Distribution of Premiums take place. It is divided into two Sessions of five months each. At the termination of each Session a strict examination of all the different classes is made in the presence of the Faculty. There is no vacation at Easter.

When a Student presents himself for admission into the College he is examined by the Director of Studies, and placed in the class for which his previous attainments may have qualified him. His further promotion depends on his application and progress. Should any Student, during the year, be found capable of passing to a higher class, he will be promoted, and such promotion is equivalent to the honors of the class he left.

The Degree of Bachelor of Arts will be conferred on such of the Students as shall have completed the Classical Course, and passed successfully an examination in all the branches of the course before the Faculty.

The Degree of Master of Arts will be conferred on each of the graduates of the first Degree who shall have devoted at least two years to literary or scientific studies, and shall have sustained satisfactorily an appropriate thesis.

The Degree of LL. B., as also those of Bachelor of Science, Master of Science, and Civil Engineer, will be conferred on similar conditions.

Diplomas will be given to the Students who shall have completed the Commercial Course and passed a satisfactory examination before the Board of Examiners. In all cases, Students receiving Diplomas are supposed to be of good moral character.

No Student will receive a Diploma or University Honor of any kind until such time as all indebtedness to the institution shall have been satisfactorily settled.

Special facilities exist at Notre Dame for the acquirement of the French and German Languages. Not only are these Languages taught very carefully by persons of acknowledged competency, but, many of the members of the Institution being natives of France and Germany, opportunities at all times occur for conversation in these tongues.

All Students applying for admission will be required to give satisfactory evidence of their moral standing.

There are in the Institution several Societies, whose Constitutions and By-Laws have been approved by the Faculty: such as the Archconfraternity, Holy Angels, Holy Childhood, St. Aloysius Philodemic,
Thespian, St. Cecilia, Columbian, St. Stanislaus Philopatrian, and Philharmonic Societies, Cornet Band, and Orchestra, with which Students are authorized and recommended to connect themselves.

In case of sickness, the Student does not remain in the College rooms, but is immediately taken to the Infirmary, where he is attended and nursed with devoted care by experienced Sisters, whose attention to the sick needs no recommendation.

V.—LANGUAGES.
(1) French, German or Latin—(See Course of Modern Languages).

VI.—DRAWING.
(1) Theory—Isometry.—Warren's Plane Projection.
(2) Practice—Exercises in Blending and Shading—India Ink and Sepia.

SENIOR YEAR.

FIRST SESSION.

I.—MATHEMATICS.
(1) Descriptive Geometry.
(2) Geodesy—Field Practice.

II.—PHILOSOPHY.
(1) Ethics—Entire Subject.

III.—PHYSICAL SCIENCES.
(1) General Physics—First Six Books.—Atkinson's Ganot.
(2) Analytical Chemistry—First Part—Outlines of Chemical Analysis.

IV.—NATURAL SCIENCES.
(1) Mineralogy—Crystallography.—Dana.

V.—LANGUAGES.
(1) French, German or Latin—(See Course of Modern Languages).

VI.—DRAWING.
(1) Theory—Linear Perspective.
(3) Practice—Use of Water Colors, etc.

SECOND SESSION.

V.—LANGUAGES.
(1) FRENCH, GERMAN OR LATIN—(See Course of Modern Languages).*

ELECTIVE STUDIES.

LANGUAGES.—Greek, Italian, Spanish, Hebrew.
FINE ARTS.—Painting, Drawing (Figure and Landscape).
MUSIC.—Vocal and Instrumental.

Any Student in this Course is at liberty to take any of these Studies at any period of his Course, provided he can do so consistently with his regular Studies.

In addition to the regular recitations and practical illustrations in the Natural and Physical Sciences, Lectures are given throughout the Course by the Professor.

CIVIL ENGINEERING.

Candidates for admission into this Course must pass a thorough examination in the Chemistry and Physics of the Scientific Course—in the several branches of Pure and Mixed Mathematics, as follows: Algebra, Geometry (Special and General), Trigonometry (Plane and Spherical), Astronomy, and the Differential and Integral Calculus. The Course requires one year, as follows:

FIRST SESSION.

I.—DRAWING.
(1) THEORY—Shades, Shadows, etc.
(2) PRACTICE—Topographical Drawing.

II.—APPLIED MATHEMATICS.
(1) CIVIL ENGINEERING—(Begun).—*Rankine.*
(2) LECTURES on Resistance of Building Materials, etc.

SECOND SESSION.

I.—DRAWING.

II.—APPLIED MATHEMATICS.
(1) RANKINE—(Concluded).
(2) LECTURES on Roads and Bridges.
(3) HYDRAULICS—Morin’s Traité d’Hydraulique.

* It must be remembered that whichever of the three Languages, viz.: French, German or Latin, is taken up at the beginning of the Freshman Year, must be continued to the end of the Course, or till satisfactorily known.
All the branches necessary for a good legal education are included in the Course. The Code and Common Law systems of Pleading and Practice are taught. The Course of Studies in this Department embraces, chiefly, Ethics, Political Economy, Constitutional and International Law, Municipal Law, Law of Contracts, Equity Jurisprudence, Criminal Law, Evidence, Pleading and Practice.

For the purpose of acquiring a practical as well as a theoretical knowledge of the legal profession, the students shall, during the Course, be required to argue cases, draw up pleadings, and conduct Law and Chancery suits according to the rules and formalities of regular courts of justice.

As it is a matter of the highest importance to a young lawyer that on being admitted to the practice of his profession he should be able to express himself clearly and fluently, full opportunities will be offered for cultivating the art of public speaking. As one means of attaining this end, and for the purpose of familiarizing the Student with the practical workings of his future profession, Moot Courts, under the direction of a Professor, will be frequently held during the Course. For the cultivation of other kinds of eloquence, still further facilities are afforded in the various Literary and Debating Societies of the University.

In addition to the general course of instruction, students will receive every assistance in studying the Laws peculiar to their respective States.

The entire Course for those commencing the study of the Law is intended to be completed in two years, divided into four terms, which correspond with those of the other departments of the University.

Every applicant for admission into this Department is expected to have at least a complete English education. It is very desirable that he should also have a Classical training before commencing the study of the Law; nevertheless, those who may not possess this advantage will, without extra charge, be offered ample facilities for acquiring a knowledge of the Classics while pursuing their legal studies.

Students intending to follow the Law Course may enter at any time, but it is more advisable and profitable for them to present themselves at the beginning of a term.

The Students will be required to pass through an examination at the close of each term, and also to present an essay of not more than seven pages of legal cap on some of the matters which they shall have seen. The notes of these special examinations and essays, as well as those of the application and general standing of the members in class throughout the Law Course, will be placed to their respective credits in the result of the final examination for the degree of LL.B.
COMMERCIAL COURSE.

FIRST YEAR.
FIRST SESSION.—Walker's American Law; Blackstone's Commentaries.
SECOND SESSION.—Parson's Contracts; Greenleaf's Evidence.

SECOND YEAR.
FIRST SESSION.—Washburn on Real Property; Stephen on Pleading.
SECOND SESSION.—Equity Jurisprudence.—Story; Constitutional Law;
Criminal Law.—Bishop.

COMMERCIAL COURSE.

JUNIOR YEAR.

BOTH SESSIONS.

(2) Télémaque—For Translation.
(3) Conversations and Compositions.

N. B.—Similar Courses exist in the University for the other Modern Languages.
Post-Graduate Course.

The Students in this Course occupy themselves with Philosophy, History, and the Natural Sciences. Law, Medicine, and Civil Engineering may be optional studies of the Course.

Law Department.

We trust to see our Law Department better and better attended year after year. We have every reason to be proud of the young men who each year have sought the classic retirement of Notre Dame to pursue their Law Studies. We will endeavor to make their sojourn among us an agreeable one, and will give them all the advantages for study.

Civil Engineering.

This important Course is now thoroughly established, and will afford our advanced students the opportunity of fitting themselves for the practice of the eminent profession whose name it bears.

Languages.

It is the desire of the authorities of the University of Notre Dame to promote the study of the foreign languages, the use of which is so frequent and necessary for business or scientific purposes. To facilitate this study, no extra fee is exacted.

The German language, the classes of which are so numerously attended, will be taught by three Professors during the next scholastic year. The number of German students attending the University is becoming greater every year. The French language, though more especially the language of the Collegiate Course, will be of great advantage to the Scientific students. Other languages—such as Italian and Spanish—may be taught when required.

Phonography and Telegraphy.

These two branches invite the special attention of the students of the Commercial Course. The Telegraph Department is fully organized, and placed under the management of a skilful electrician. Notre Dame is now in direct communication with South Bend and the rest of the world by electric wires.

Anatomy and Materia Medica.

Young men desiring to study for the Medical profession will find opportunities to do so at Notre Dame. Yet, owing to the want of a sufficient museum whereby this important branch could be thoroughly illustrated, the Course of Studies in this Department is limited, and embraces principally Anatomy. The remainder of the Course is completed in some of our neighboring Universities. As a Preparatory Course, that which is given here, under Rev. L. Neyron, M. D., leaves nothing to be desired.

Painting and Drawing.

The Drawing Classes each year show a large increase over the preceding
years. The University enjoys means adequate to all demands in this branch. It possesses a large number of models in all sorts of drawings, a fine studio, and vigilant and zealous teachers of the art.

Painting promises, likewise, to be one of the popular branches of Art taught at Notre Dame. The famous painter Gregori, of Rome, has been engaged to give instructions in oil painting. Gregori has no superior in Rome.

Music.

This Department is complete in all its appointments. It has five Professors, and is divided into classes on the regular Conservatory system. An Orchestra of fifteen pieces, with an excellent Quartette, and a Brass Band of twenty-five instruments, are some of the leading features of the Musical Department.

Vocal Music has received special attention during the past year. We call the attention of our students and patrons to this favorite and useful branch of music, which is now so deservedly popular. At present it may be studied free of charge.

Astronomical Observatory.

A temporary Astronomical Observatory has been erected, in which the fine instrument presented by the Emperor Napoleon has been placed. The studies of the Class of Astronomy are now rendered practically interesting.

Libraries.

The College Library contains some twelve thousand volumes, very carefully arranged by the Librarian. Donations of books, especially to the Law Library, will be thankfully received.

The Circulating Library was commenced three years ago with four hundred volumes. It now numbers over two thousand five hundred. All the Libraries which formerly belonged to the Literary and Religious Societies have been merged into it. Instead of the dozen or more book-cases which often hid away instructive books, a beautiful collection of Literary and Religious works is now open to the students in an apartment fitted up as a Reading-Room.

Lecture Course.

There are a great many students who, owing to different causes, progress but slowly in the acquisition of knowledge in the class-room, who, in the lecture hall, advance most rapidly; whilst all gain a more comprehensive and practical perception of the various branches of Science when clearly and concisely elucidated by the discourse of an expert. The importance of Lectures has, therefore, never been overlooked at Notre Dame; but of late the authorities of the University have been led to devote particular attention to the organizing and developing of Lecture Courses on all the different important studies of the Institution. Henceforth, therefore, students may expect to have every facility, without any interruption of classes, to assist at regular Lectures on Philosophical, Historical, Literary and Scientific subjects. In this respect, the success reached, this year, forms an epoch in our educational training, and there is every reason for believing that the future will witness still greater triumphs.

This Association was organized in 1869, the year of the Silver Jubilee, and held its first meeting in June of that year, on the day preceding the Annual Commencement.

The Association numbers among its members not only the regular Graduates of the University, but also those who at any time held the office of President or Vice-President of the University, and those on whom Honorary Degrees have been conferred by the Faculty. Those who have been prominently connected with the University of Notre Dame as Professors are eligible to membership, and may be admitted on application by a two-thirds vote of the members present at any regular meeting.

The following is a list of the members up to June 31, 1878. The Graduates of 1876 will be found on another page.

The Notre Dame Scholastic

is the title of a neat 16-page paper published every week during term time at the University. This journal not only opens a field for young aspirants to literary fame who might otherwise, for want of a proper medium, allow their talents in this line to remain inactive, but it also contains many articles of an instructive and literary character from writers of mature and acknowledged ability, thus rendering the Scholastic a valuable publication for all who desire variety and instruction in their reading. During the past scholastic year there have appeared in its pages nearly a hundred interesting biographical sketches of men of note in literature, science, painting, sculpture, etc., essays in prose and verse, and notes on art, music and literature, gleaned from the best sources. It will be the honest endeavor of the Editor, during the coming year, to merit the encouragement given the paper during the past, and the high encomiums bestowed upon it by first-class papers among the weekly press.

In addition to its literary features, the Scholastic attaches to itself a local importance to students, to their parents, and to all who have in former years attended class at the University, by a weekly summary of events transpiring at Notre Dame, by personal notices of the old students, weekly Rolls of Honor, Class Honors, and lists of excellence. Reports relative to the arrangement of classes, the promotion of the more talented and energetic students, etc., will also find a place in this paper, and keep parents and friends accurately informed on all that concerns their children.

**TERMS:**

$1.50 PER ANNUM, Postpaid.

SAINT MARY'S ACADEMY.

(One Mile West of Notre Dame University.)

Conducted by the Sisters of the Holy Cross.

THIS Institution, situated on the beautiful and picturesque banks of the St. Joseph River, is everything that could be desired as a locality for a Female Academy. All the branches of a solid and complete Education are taught here. Music, both Vocal and Instrumental, and the MODERN LANGUAGES, form prominent features in the Course of Instruction.

Particular attention is paid to the religious instruction of Catholic pupils. Pupils of all denominations are received, and, for the sake of order, merely required to attend the public religious exercises with the members of the Institution.

The buildings are spacious and commodious, suited to the Educational requirements of the day, and furnished with all modern improvements. Every portion of the building is heated by steam, and hot and cold baths are attached to the sleeping apartments.

The Grounds are very extensive, beautifully adorned, and situated in that charming seclusion which is so favorable to the healthful development of moral, physical and intellectual power.

The proximity of the two Institutions to each other is a great convenience to parents having children at both, when they visit their sons and daughters.

For further particulars concerning this Institution, the public are referred to the Twenty-First Annual Catalogue of St. Mary's Academy, for the year 1875-6, or address,

ST. MARY'S ACADEMY,
