University of Notre Dame.

THIS UNIVERSITY was founded in 1842, by the Congregation of the Holy Cross, under the direction of Very Rev. E. Sorin, and was chartered by the Legislature of the State of Indiana in 1844, with power to confer all the usual degrees.

The College buildings are on an eminence near two small picturesque lakes of pure spring water, in the midst of the fine and healthy farming region of the St. Joseph Valley, and scarcely a mile from the river. The College can easily be reached from all parts of the United States and Canada by means of three great trunk lines of railway—the Lake Shore and Michigan Southern, the Chicago and Lake Huron, and the Great Western and Michigan Central; the first two passing within a mile of the College grounds, and the last connecting at Niles with the recently-built railway between that city and South Bend, which runs within a half mile of the College. At the Michigan Southern railroad depot, South Bend, omnibuses or private conveyances can be obtained.

The College grounds are extensive and well shaded, and contain ball-alleys, gymnasiums, etc., with abundant room for all games and athletic exercises. The buildings are new, having all been erected since the destruction of the old college by fire in April, 1879, and are well adapted for the purposes which they serve. They are heated by steam, lighted by gas, supplied with hot and cold water, and all the other modern improvements and conveniences. Particular attention has been given to the subjects of ventilation and protection against fire, and in furnishing the various rooms of the University every effort has been made to secure the comfort and health of the inmates. The Institution is capable of giving accommodation to five hundred resident students.
The Site

of the College is one particularly adapted to the improvement of the students. It is secluded and healthy, and constant care is rendering a spot naturally beautiful still more attractive by art and good taste.

We state only the advantages of

Health and Retirement

that are enjoyed by the inmates of the Institution; a description of all that pleases at Notre Dame would take us beyond the limit of these pages. We prefer to give a hearty invitation to all our patrons, and to all who think of confiding their sons to our care, to come and see, and judge for themselves.

The advantages arising from the

Retired Position

of the College cannot fail to be appreciated by parents who have at heart the education of their children; and even the careless student, when once interested in his studies, soon finds out the benefits he can derive from an uninterrupted attention to class and study. Though secluded in a great measure from the busy world without, yet the number of students and the extensive College grounds give him a world of his own, in which, what with Class, Examination, Notes, Literary Societies, Religious Associations, Baseball Clubs, Boat Clubs, Dramatic, Musical, Literary and Scientific Entertainments, he finds full enjoyment and amusement, and companions, ideas and sentiments that all concur to fix his mind on his studies and establish him in habits of piety, application and order, the influence of which will be felt during his entire life. He breathes for a few short years the atmosphere of order, of regularity in all that he does, of profound application to studies, broken only by healthy and regular recreation; and certainly in our times, when serious and solid studies are becoming so rare—when all kinds of inducements to waste and fritter away time are forced upon young students—when morals are so lightly watched over—the advantage of the retired location of Notre Dame cannot be too highly spoken of.

Providence has singularly blessed the institution in regard to health; and those who have had their sons in the College can give
their testimony that the regular course of life, added to the salubrious climate and the fresh country air, has done much to improve the health of their children.

The disciplinary government is mild, yet sufficiently energetic to preserve order and regularity. The morals and general deportment of the pupils are assiduously watched over, and their comforts and personal habits receive the same attention as if they were in the bosom of their own families.

The Education

given at Notre Dame is calculated to form both the heart and intellect of the students. Every attention is given to their moral and religious culture. Every day the students have an opportunity of attending classes where they may acquire a knowledge of Christian doctrine. Twice a week, Lectures and instructions on religious topics are delivered to all the students together. The religious instruction is, of course, confined to Catholic students. The intellectual training is carried on with care and diligence by the officers and professors of the University. The best systems of teaching are adopted, and the best authors for each branch selected; so that no pains are spared to secure the objects which the University has in view as an educational institution.

The Minim Department.

For the care and training of children under the age of thirteen, there has been established a Department to which the most careful attention has always been paid by the authorities of the University; it is known as the Minim Department, and has ever been one of the greatest objects of interest to the Faculty as well as to all persons visiting Notre Dame. The pupils in this Department, unless for their out-door sports, and in the refectory and dormitory, pass the day
entirely under the care of Sisters who take a tender and motherly care of their young charges.

All the elementary branches of an English education are here taught, together with French and German. Also, for the Minims, Music (piano) is not an extra. In order to develop this Department and thereby extend the advantages it affords for the forming of the young heart, these concessions have lately been made in favor of the Minims.

Not the least considerable of the advantages enjoyed by the pupils of the Minim Department is their complete separation from the larger students. The discipline to which they are subject is much milder than that of the students more advanced in age.

Regulations of the University.

All students are required to attend the exercises of public worship with punctuality and decorum.

Students must show themselves obedient and respectful towards the Professors and Prefects of the institution. They must never absent themselves from the place in which they ought to be, unless with permission from proper authority.

Students must carefully avoid every expression in the least injurious to religion or morals, their Professors, Prefects, or fellow-students.

The use of tobacco is strictly forbidden, except to such students of the Senior Department as have received the written permission of their parents to use it, and intoxicating liquors are absolutely prohibited.

Compensation for all damage done to the furniture or other property of the College will be required from the person or persons causing such damage.

No branch of study, once commenced, shall be discontinued without permission from the Director of Studies.

No one shall leave the University grounds without the permission
Students are expected to take baths regularly.

Students who have failed to give satisfaction in the class-room, or who have been guilty of misconduct, must perform such tasks as shall be assigned them, and may be excluded from all college exercises until these tasks be accomplished.

No book, periodical, or newspaper shall be introduced into the College without having been previously examined and approved by the Director of Studies. Objectionable books found in the possession of students will be withheld from them until their departure from the University, or destroyed.

All letters sent or received by students may be opened by the President or his representative.

General Information.

The academic year commences on the first Tuesday of September, and closes during the last week of June, when the Annual Commencement, the Conferring of Degrees and Distribution of Premiums take place. It is divided into two Sessions. At the termination of each Session a strict examination of all the different classes is made in the presence of the Faculty. There is no vacation at Easter.

When a student presents himself for admission into the College, he is examined by the Director of Studies, and placed in the class for which his previous attainments may have qualified him. His further promotion depends on his application and progress. Should any student, during the year, be found capable of passing to a higher class, he will be promoted, and such promotion is equivalent to the honors of the class he left.

The Degree of Bachelor of Arts will be conferred on such of the students as shall have completed the Classical Course and passed
successfuly an examination in all the branches of the course, before the Faculty.

The Degree of Master of Arts will be conferred on such of the graduates of the first degree who shall have devoted at least two years to literary or scientific studies, and shall have sustained satisfactorily an appropriate thesis. Students desiring to receive this degree should make application in writing.

The Degree of LL. B., as also those of Bachelor of Science, Master of Science, and Civil Engineer, will be conferred on similar conditions. Diplomas will be given to the students who shall have completed the Commercial Course and passed a satisfactory examination before the Board of Examiners. In all cases, students receiving diplomas are supposed to be of good moral character.

No student will receive a Diploma or University Honor of any kind until such time as all indebtedness to the Institution shall have been satisfactorily settled.

Special facilities exist at Notre Dame for the acquirement of the French and German languages. Not only are these languages taught very carefully by persons of acknowledged competency, but also there is every opportunity for conversation in these tongues.

_all students applying for admission will be required to give satisfactory evidence of their moral standing._

There are in the Institution several Societies, whose constitutions and by-laws have been approved by the Faculty; such as the Archconfraternity, Sodality of the Blessed Virgin, Holy Angels, Holy Childhood, St. Aloysius Philodemic, Classical, Scientific, Thespian, St. Cecilia, Columbian, St. Stanislaus Philopatrian, and Philharmonic Societies, Cornet Band, and Orchestra, with some of which students are recommended to connect themselves.

_In case of sickness the student does not remain in the College rooms, but is immediately taken to the Infirmary, where he is attended and nursed with devoted care, by experienced Sisters, whose attention to the sick needs no recommendation._

ELECTIVE STUDIES.

Languages.—Greek, Italian, Spanish, Hebrew. Fine Arts.—Painting, Drawing (Figure and Landscape). Music.—Vocal and Instrumental. Dogma.

Any Student in this Course is at liberty to take any of these Studies at any period of his Course, provided he can do so consistently with his regular studies. In addition to the regular recitations and practical illustrations in the Natural and Physical Sciences, Lectures are given throughout the Course by the Professors.

* It must be remembered that whichever of the Four Languages, viz.: French, German, Latin or Greek, is taken up at the beginning of the Freshman Year, must be continued to the end of the Course, or till satisfactorily known.
Candidates for admission into this Course must pass a thorough examination in the Chemistry and Physics of the Scientific Course and in the several branches of Pure and Mixed Mathematics, besides Grammar, Rhetoric, History, Geography, and Geology. The Course requires one year, as follows:

FIRST SESSION.

I.—DRAWING.
1 Theory—Shades, Shadows, etc.—Advanced Course in Perspective.
2 Practice—Topographical Drawing.

II.—APPLIED MATHEMATICS.
1 Civil Engineering—(Begun)—Mahan.
2 Lectures on Resistance of Building Materials, etc.
3 Pure Mathematics—Calculus reviewed.

SECOND SESSION.

I.—DRAWING.
Plans and Elevations of Engineering Constructions—Stone-Cutting.

II.—APPLIED MATHEMATICS.
1 Civil Engineering—Concluded.—Mahan.
2 Lectures on Roads and Bridges.
3 Hydraulics.
DEPARTMENT
of
Natural and Physical Science.

Students wishing to pursue a Scientific course will find every facility for doing so at Notre Dame. Fully aware of the demands of the age, the authorities have spared neither pains nor expense to meet all the requirements of the student of the Physical and Natural Sciences.

The Physical Cabinet

contains an extensive collection of apparatus of the latest style and most improved construction. Several of them were on exposition at the Centennial, and obtained for those who exhibited them the highest awards given for physical instruments. Among these may be mentioned König's Apparatus for analyzing sound, electrical and optical apparatus by Edgerton, instruments for projection, etc. Besides the apparatus designed for subjective use and for experimental purposes in the class-room, there is a large number of select instruments for lecture purposes, especially for illustrating those interesting branches of Physics, Acoustics, Optics, Magnetism, and Electro-Magnetism, and Statical and Dynamical Electricity. In Acoustics, the instruments for studying the origin and nature of sound, the existence and interference of vibrations, together with the beautiful apparatus designed by Lissajous, König and others for the observation of sonorous vibrations by the optical and stroboscopic method, and by means of manometric flames, are of the most improved character. The instruments for illustrating Optics are also most select and complete. Besides the stereopticons, vertical lanterns, microscopes, spectrosopes, etc., for projection, there is a large number of slides, transparencies, and preparations for illustrating the various branches of Physical and Natural Science, Astronomy, Architecture, Art, etc. The apparatus for the study of spectrum analysis—including a fine Heidelberg spectroscope,
a collection of Plücker tubes for obtaining the spectra of gases and vapors—prisms, lenses, and other apparatus for projecting spectra on the screen, as well as those used in studying the phenomena of the double refraction and polarization of light, should also be mentioned. For studying statical and dynamical electricity, magnetism, and electro-magnetism, there is a large number of electrical machines, and batteries of different kinds, coils, helices, magnets, electro-magnets, galvanometers, thermo-electric multipliers, Geisler tubes, rotators, magno-electric and electro-magnetic machines, telegraph apparatus, telephones, etc.

*The Chemical Laboratory*

is fitted up with all the appliances necessary for the successful study of General Chemistry and Chemical Analysis. As in the Physical Cabinet, additions are constantly being made to the Laboratory, and it will be the object of the authorities to make it in all its details as complete and perfect as possible.

*The Museum of Natural History,*

embracing large and rare geological, mineralogical, zoölogical and botanical collections, is as complete in all its arrangements as the student could desire.

*The Mineralogical Cabinet*

contains a large collection of minerals from all parts of the world. It is especially rich in specimens illustrating the crystalline structure, modes of occurrence, etc., of the various ores and minerals, and embraces a large number of magnificent specimens of pellucid quartz crystals, cairngorm stone, amethyst, agate, jasper, sardonyx, chalcedony, geodes of various kinds, calcite of all the principal crystalline forms, amazon stone, fluorspar, mica, tourmaline, beryl, dendrite, selenite, garnet, the various ores of gold, silver, iron, copper, lead, zinc, as well as of the other metals of rarer occurrence. For the practical study of the physical properties of minerals, the student of mineralogy will find in this collection all he could wish for. Besides this, there is also a rich store of specimens for blow-pipe analysis.
The Geological Cabinet

is very complete, both in the number and character of the specimens it contains. It embraces fossils of all the geological formations, both of this country and Europe. Among them are many unusually well preserved, and of more than ordinary size. In a word, it is furnished with all the specimens that the student needs to make the study of Geology easy and interesting.

Popular Lectures on the Physical and Natural Sciences

form one of the most interesting features in connection with the Scientific Department. These are intended mainly for those students who cannot or who do not wish to take up the Scientific Course, but who nevertheless desire to have a general knowledge of the leading facts and principles of the Physical and Natural Sciences. All these lectures, especially those on Physics and Chemistry, are illustrated experimentally; and, to attain most effectually the object in view, the best of apparatus and specimens, especially those designed for projection, have been secured. This method of popularizing Science is, we believe, peculiar to Notre Dame, not having yet been introduced, at least as far as we are aware, in any other college in the country. All who have had an opportunity of judging of its results speak of it with praise and commendation.
Donations to the Museum.

A CARD OF THANKS.

The Curator of the Museum most gratefully acknowledges donations during the past year, of valuable specimens of Natural History from the following persons:

Rev. J. M. Toohey, C. S. C., a number of valuable specimens of gold and silver ores from the Black Hills.

Mr. M. S. Foote, a collection of shells and minerals.

Thomas Shortis, Toronto, Canada, a classified collection of Canadian ores and minerals.

Hon. Judge Dunne, LL. D., Chicago, Ill., fossils and minerals from Utah Territory.

Mr. A. D. Tourtilotte, Toledo, O., a very complete collection of silver ores from Carbonate City, N. M.

Mr. P. Ruppe, Hancock, Mich., a collection of fine specimens from the Lake Superior Copper and Silver mines.

Col. E. Otis, U. S. A., an interesting collection of minerals and fossils from Dakota.

Master W. F. Berthelet, Milwaukee, Wis., a collection of fossils from the Wisconsin Lime-stone formations.

Mr. D. McCarthy, Maloin, Ark., quartz crystals, from Hot Springs, Arkansas.

To other kind friends, also, who have in various ways rendered him material aid in increasing his collections, the Curator returns his most sincere thanks.
AN APPEAL.

One of the greatest losses occasioned by the disastrous fire that laid the College buildings in ashes was the almost total destruction of the

MUSEUM OF NATURAL HISTORY.

All the valuable collections of years were consumed,—only a small collection of specimens that happened to be in an out-building being spared. In order to repair this loss as far and as speedily as possible, the Curator of the Museum respectfully solicits the aid and co-operation of the friends and old students of Notre Dame,—of those especially who live in mining districts, or where specimens of Natural History can be readily obtained. He would be particularly obliged for specimens of

MINERALS, Fossils,
Shells, Corals,

Alcoholic Preparations,

Indian Relics, Etc., Etc.

All collections, however small, will be thankfully received and duly acknowledged in the columns of the Scholastic. All contributions should be sent to

Rev. J. A. ZAHM, C. S. C., Curator of Museum,
Notre Dame, Indiana.
Law Department.

All the branches necessary for a good legal education are included in the Course. The Common Law System of Pleading and practice is taught. The course of studies in this Department embraces, chiefly, Constitutional and International Law, Municipal Law, Law of Contracts, Equity Jurisprudence, Criminal Law, Evidence, Pleading, and Practice.

For the purpose of acquiring a practical as well as a theoretical knowledge of the legal profession, the students shall, during the Course, be required to argue cases, draw up pleadings, and conduct Law and Chancery suits according to the rules and formalities of regular courts of justice.

As it is a matter of the highest importance to a young lawyer that on being admitted to the practice of his profession he should be able to express himself clearly and fluently, full opportunity will be offered for cultivating the art of public speaking. As one means of attaining this end, and for the purpose of familiarizing the student with the practical workings of his future profession, Moot Courts, under the direction of a Professor, will be frequently held during the Course. For the cultivation of other kinds of eloquence, still further facilities are afforded in the various Literary and Debating Societies of the University.

The entire Course for those commencing the study of the Law is intended to be completed in two years, divided into four terms, which correspond with those of the other departments of the University.

Every applicant for admission into this Department is expected to have, at least, a complete English education. It is very desirable that he should also have a Classical training before commencing the study of the Law; nevertheless, those who may not possess this advantage will, without extra charge, be offered ample opportunities for acquiring a knowledge of the Classics while pursuing their legal studies.

Students intending to follow the Law Course may enter at any time, but it is more advisable and profitable for them to present themselves at the beginning of a term.

The students will be required to pass an examination at the close of each term, and to present an essay of not more than seven pages of
legal cap, on some of the matters which they shall have seen, and furthermore to give proof of proficiency in Rhetoric, English Literature, and Logic, before being allowed to graduate. The notes of the special examinations and essays, as well as those of the application and general standing of the members in class throughout the Law Course, will be placed to their respective credits in the result of the final examination for the degree of LL. B. The following comprises a list of the authors generally read during the course: Walker's American Law; Blackstone's Commentaries; Parsons' Contracts; Greenleaf's Evidence; Washburn on Real Property; Stephen on Pleading; Equity Jurisprudence—Story; Constitutional Law; Criminal Law—Bishop.

Commercial Department.

It will be seen that the course requires two years' study for graduation; it includes arithmetic, grammar and letter-writing, geography, United States history, reading, spelling, penmanship, book-keeping, and Commercial Law,—that is, a complete business education.

Considering the character and needs of the country, especially the great West in which we live, this Course is the most practical, and one of the most important that an educational institution can afford.

Those, therefore, who have not the time or the means to take a complete college course, in the Classics and the Sciences, would do well to enroll themselves in the Commercial Course. No plan of study is more injudicious than a hap-hazard selection of such studies as an inexperienced student may fancy. The consistent training resulting from a fixed course of studies is of the utmost benefit to the student.

The Commercial Course at Notre Dame has always received the most careful attention on the part of the officers and Commercial Faculty of the University. Notre Dame claims to give the graduates of this course a more complete business training than can be obtained in any commercial college. Believing that a business education includes something more than a mere knowledge of Book-keeping, and
that a good education cannot be had in a few weeks, this course has been extended over two years, the shortest time in which the studies necessarily used in business life can be mastered. Should a student desire during this period to take up any other studies in which he may be interested, and for which he has time, he will have liberty to do so. General history and linear drawing are especially recommended to the students of this course. Many commercial students find it also to their advantage to take up the study of German or French, for which there are the amplest facilities. A talented and studious young man may thus in the course of two years find himself in possession of a most valuable practical education, which will fit him to take his place in the front rank of educated business men.

**JUNIOR YEAR.**

Both Sessions.

1 Arithmetic—Same as First Year Preparatory in Classical Course.
2 Grammar and Letter-Writing—Same as First Year Preparatory in Classical Course.
3 Geography—The amount included in both Sessions of Collegiate Preparatory Course (Eclectic Series).
4 United States History—The amount included in both Sessions of Collegiate Preparatory Course.—Hassard.
5 Reading and Orthography.
6 Penmanship.

**SENIOR YEAR.**

First Session.

1 Arithmetic—Same as First Session of Second Year Preparatory in Classical Course.
2 Grammar and Letter-Writing—Same as First Session of Second Year Preparatory in Classical Course.
3 Orthography.
5 Penmanship.

Second Session.

1 Arithmetic—(Completed)—As in 2d Session Second Year Preparatory.
2 Grammar and Essays—Same as 2d Session of Second Year Preparatory in Classical Course.
3 Orthography.
4 Book-Keeping—Banking, Railroading, Steamboating, etc.—Notre Dame System.—Tony.
5 Commercial Law.
6 Penmanship.

The routine of study in the Course of Book-keeping embraces the following, the whole being completed in one scholastic year:—Preparatory Instructions and Definitions; Initiatory Sets by Double Entry; 1st Series, embracing the Buying and Selling of Merchandise on Private Account; 2d Series, On account of others; 3d Series, Buying and Selling the same on Joint Account; 4th Series, Importing and Exporting on private account, on account of others, and account of ourselves and others in company; 5th Series, Receiving and forwarding Merchandise, the management and Settlement of Executors' Accounts, Buying and Selling, Remitting, Collecting, Discounting, Accepting and Paying Bills of Exchange, Banking—Private and Joint Stock—Steamboating, Railroading, Retailing by Double Entry, Farming, Mechanics' Accounts. The whole Course illustrating the opening, conducting and closing of stock and partnership books—gaining and losing business, etc., etc. Saturdays are devoted to Commercial Law. Particular attention is paid to the explanation of the Law of Negotiable paper.

Specialties.

Post-Graduate Course.

The Students in this Course occupy themselves with Philosophy History, and the Natural and Physical Sciences. Law, Medicine and Civil Engineering are optional studies of the Course.

Law Department.

We trust to see our Law Department better and better attended year after year. We have every reason to be proud of the young men who each year have sought the classic retirement of Notre Dame to pursue their Law Studies. We shall endeavor to make their sojourn among us an agreeable one, and give them every facility for study.

Civil Engineering.

This important Course has long been thoroughly established, and affords advanced students the opportunity of fitting themselves for the practice of this eminent profession.

Languages.

It is the desire of the authorities of the University of Notre Dame to promote the study of the foreign languages, the use of which is so frequent and necessary for business or scientific purposes.

The German Language—the classes of which are so numerously attended—has been taught by five Professors during the past scholastic year. The number of German students attending the University is becoming greater every year. The French Language—though more especially the language of the Collegiate Course—will be of great advantage to the Scientific student. Other languages—such as Italian and Spanish—may be taught when required.

Telegraphy.

This branch invites the special attention of the students of the Commercial Course. The Telegraph Department is fully organized, and is placed under the management of a skilful electrician. Notre
Dame is now in direct communication with South Bend and the rest of the world by electric wires.

**Anatomy and Materia Medica.**

Young men desiring to study for the Medical profession will find opportunities to do so at Notre Dame. The Course of Studies in this Department embraces Materia Medica, Anatomy, and Surgery. As a Preparatory Course, that which is given here, under L. Neyron, M. D., a graduate of the École de Medicine, Lyons, leaves nothing to be desired.

**Drawing and Painting.**

The University enjoys means adequate to all demands in this branch. It possesses a large number of models in all sorts of drawing, a fine Studio, and qualified and zealous teachers of the art. The services of the eminent artist, Signori Luigi Gregori, have been secured for the coming year.

**Music.**

This Department is complete in all its appointments. It has able Professors, and is divided into classes on the regular Conservatory system. An Orchestra of fifteen pieces, with an excellent Quartette, and a Brass Band of twenty-five instruments, are some of the leading features of the Musical Department.

Vocal Music, to which special attention has been paid during the past year, will receive even more careful attention in future, and it is hoped that this branch will become every year more popular among the students.

**Astronomical Observatory.**

A temporary Astronomical Observatory has been erected, in which the fine instrument presented by the Emperor Napoleon has been placed. The studies of the class of Astronomy are now rendered practically interesting.

**Libraries.**

The College Library which, before the fire, contained upwards of thirteen thousand volumes, now numbers seven thousand. Within the last year a reading-room has been opened in connection with this Library, in which the following periodicals are to be found on file,

The Lemonnier Library, for the use of the students of the College, continues to receive contributions from liberal friends, and now numbers nearly 5,000 volumes. The members of the Library Association desire to give their Alma Mater a collection of books which can stand comparison with those possessed by the other educational establishments of the United States, therefore they call on the friends of the University to assist them, by donations of books, pamphlets, periodicals and manuscripts. All contributions should be addressed to Librarian, Lemonnier Library, Notre Dame University, Notre Dame, Indiana.

Card of Thanks.—The Lemonnier Library Association of Notre Dame University return grateful acknowledgment for the following donations, received from June 1, 1880, to June 1, 1881:

**Lecture Course.**

There are a great many students who, owing to different causes, progress but slowly in the acquisition of knowledge in the class-room, but who in the lecture-hall advance most rapidly, whilst all gain a more comprehensive and practical perception of the various branches of Science when clearly and concisely elucidated by the discourse of an expert. The importance of Lectures has, therefore, never been overlooked at Notre Dame, and the authorities of the University have devoted particular attention to the organizing and developing of Lecture Courses on all the more important studies of the Institution. Students, therefore, have every facility, without any interruption of classes, to assist at regular Lectures on Philosophical, Historical, Literary and Scientific subjects. In this respect, the success reached during the past few years forms an epoch in our educational training, and there is every reason for believing that the future will witness still greater triumphs.

Society of the Holy Childhood.

The primary object of the Society of the Holy Childhood, of which this Society forms a part, is to offer an opportunity to children throughout the Christian world to contribute their share towards the redemption of pagan children from the darkness of heathenism. The monthly contributions are small, but the aggregate is considerable—while thousands of children are by this means trained up to habits of charity.

The Notre Dame Cadets is the title of a military company organized at the University during the past year. The object in view is not so much to inculcate a taste for the military career, as the acquiring of some of the many practical advantages that result from military drill and discipline—namely, an erect, dignified, manly bearing; grace and freedom of movement; a ready and unquestioning spirit of obedience, order and discipline in everything. The arms are furnished by the State. The uniform is neat and inexpensive. It is of the regulation gray woolen material made expressly for the Government cadets, and used at the United States Military Academies at West Point and elsewhere. The complete uniform costs only $10 when made by the college tailors. Those who prefer to have it made at home will have samples sent them, if applied for.

The Notre Dame Scholastic

is the title of a neat 16-page paper published every week during term time at the University. This journal opens a field for young aspirants to literary fame, who might otherwise, for want of a proper medium, allow their talents in this line to remain inactive. It also contains many articles of an instructive and literary character from writers of mature and acknowledged ability, thus rendering The Scholastic a valuable publication for all who desire variety and instruction in their reading. During the past years there have appeared in its pages many interesting Biographical Sketches of men of note in Literature, Science, Painting, Sculpture, etc., Essays in prose and verse, and Notes on Art, Music and Literature, gleaned from the best sources. It will be the honest endeavor of the Editor, during the coming year, to merit the encouragement given the paper in the past, and the high encomiums bestowed upon it by gentlemen of high culture and by first-class papers among the weekly press.

In addition to its literary features, The Scholastic attaches to itself a local importance to students, to their parents, and to all who have in former years attended class at the University, by a weekly summary of events transpiring at Notre Dame, by personal notices of the old students, weekly Rolls of Honor, Class Honors, and lists of excellence. Reports relative to the arrangement of classes, the promotion of the more talented and energetic students, etc., will also find a place in this paper, and keep parents and friends accurately informed on all that concerns their children.
