Novena for Examinations.

If you did not start this morning, make it tomorrow at the latest.

 Ember Days.

Wednesday, Friday and Saturday are days of fast and abstinence. Meat is allowed on the campus tomorrow and Saturday, but not in town.

At What Time You May Play or Dance.
(St. Francis de Sales, "Introduction to a Devout Life."

"In order that playing and dancing may be lawful we must use them as a recreation, without having any affection for them; we may use them for a short time, but we should not continue till we are wearied or stupefied with them; and we must use them but seldom, lest we should otherwise turn a recreation into an occupation.

"But on what occasions may we lawfully play and dance? Just occasions of innocent games are frequent, whilst those of hazard are rare, on account of their being more blamable and dangerous; therefore, in one word, dance and play as your own prudence and discretion may direct you, to comply with the civil request of the company in which you are engaged; for condescension is a branch of charity which makes indifferent things good, and dangerous thing allowable; it even takes away the harm from those things that are in some measure evil; and therefore games of hazard, which otherwise would be reprehensible, are not so if we use them sometimes through a just condescension."

Easter Duty.

FIVE more days!

Two Standards -- A Vacation Thought.

"Could I save my soul outside of the Church? It is of course, possible, but the probability is doubtful. There are many instances that I can well remember, in which were it not for my religion, I would readily have tossed all thought of a soul to be saved to the wind. But luckily there had been a better self built up within me. It proved to be a guiding light that did not allow me to have two sets of morals-- one for the daytime and one for the night-time" -- a wise Junior.

The Spirit of the Spring.

Is your faith stronger than Spring fever? Do you need God's grace less now? Late attendance at Holy Communion in the Walsh Hall chapel does not show an increase corresponding to the increase in late sleeping.
